X12 Electronic Data Interchange (EDI)

X12 boasts more than 320 EDI transaction sets, developed, integrated and tested over the last 40 years. X12 EDI revolutionized business-to-business electronic commerce in the 1970s and 1980s, long before anyone knew to call it B2B e-commerce. X12 EDI today continues to provide a sound and secure solution for high volume messaging.

Foreword

This foreword is not part of the standard but is provided for information only.

The American National Standards Institute (ANSI) was founded in 1918 as the national coordinator for standards in the United States. National standards are developed primarily by trade, technical, professional, consumer, and labor organizations. ANSI itself does not develop standards. It approves a standard only when it has verified evidence presented by a standards developer that those affected by the standard have reached substantial agreement (consensus) on its provisions. Consensus is the heart of the ANSI system. Democracy prevails. ANSI provides an open forum for all concerned interests to identify standards needs, plan to meet those needs, and agree on standards.

ANSI is the

- Coordinator of the U.S. voluntary standards system
- Approval organization for American National Standards
- U.S. member of the International Organization for Standardization (ISO) and International Electrotechnical Commission (IEC)
- Clearinghouse and information center for national and international standards

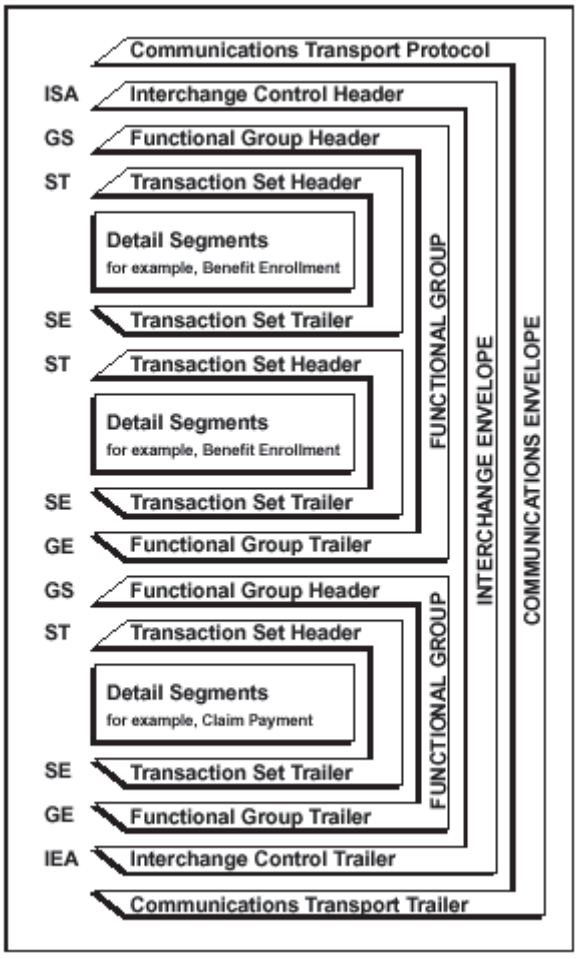
About X12

X12, chartered by the American National Standards Institute for more than 35 years, develops and maintains EDI standards and XML schemas which drive business processes globally. X12's diverse membership includes technologists and business process experts in health care, insurance, transportation, finance, government, supply chain and other industries.

X12 members meet regularly to develop and maintain EDI standards that streamline and facilitate consistent electronic interchange of business transactions, such as order placement and processing, shipping and receiving information, invoicing, payment and cash application data. With more than 320 transaction standards available for use, X12 standards can be used to conduct nearly every facet of business-to-business operations.

X12 is led by diverse leadership groups, including a Board of Directors and a Steering Committee. The Board is responsible for X12's organizational and business affairs. The Steering Committee oversees operational activities related to the development and publication of EDI Standards and related work products.

The aim of X12 EDI is to structure standards so that computer programs can translate data to and from internal formats without extensive reprogramming. In this way, by using internally developed or commercially available software and private or public-access communication networks, X12 believes that all sizes of firms and institutions using intelligent computational devices can benefit from the use of the standard. The efficiencies of a standard interchange format can minimize the difficulties and



expenses that could be incurred if each institution were to impose its own formats on every institution with which it does business.

In X12, various subcommittees develop new standards that become recommendations for the full X12 membership. The full X12 membership must go through a consensus process before a proposed standard (or any change to a standard) is published as an X12 EDI Standard. Approximaetely every five years, these standards are submitted to ANSI to start the process of consensus approval and registration to become American National Standards (ANSs).

X12 EDI has the following subcommittees:

X12C Communications and Controls	**X12F** Finance	**X12I** Transportation	**X12J** Technical Assessment	**X12M** Supply Chain	**X12N** Insurance

Suggestions for improvement to this material are welcome and should be sent to info@x12.org.

Structure of an EDI Transmission

This introduction is not part of the standard but is provided for information only.

To allow transaction sets of different types to be transmitted from one party to another in the same transmission, a hierarchical structure of headers and trailers allows the data to be segregated logically for easy interpretation by the receiver.

The structures for interchange control (Segments ISA, IEA, and TA1), and the structures of the functional group header and trailer and the transaction set header and trailer are contained in each X12 Segment Directory. Transaction sets begin with an ST segment and end with an SE segment. Multiple transaction sets of the same functional group are transmitted together by beginning such a group with a GS segment and ending the group with a GE segment. One or more functional groups are bound together for transmission within an interchange "envelope" bounded by an ISA segment and an IEA segment.

The drawing schematic to the left illustrates a typical format for electronically transmitting a series of diverse business transactions.

Introduction to Transaction Sets

This introduction is not part of this standard and is provided for information only.

Scope

This section contains the purpose and scope and segment sequence tables for all approved-for-publication ASC X12 transaction sets.

Terms and Definitions

X12.6 Application Control Structure contains the formal definitions of terms related to electronic data interchange and ASC X12 Standards. The following definitions are consistent with those formal definitions and are provided in shortened form to aid in the understanding of this section.

Transaction Set

A transaction set is the collection of data that is exchanged in order to convey meaning between the parties engaged in electronic data interchange. A transaction set is composed of a specific group of segments that represent a common business document (for example, a purchase order or an invoice). Each transaction set consists of the transaction set header (ST) as the first segment and contains at least one data segment before the transaction set trailer (SE).

Transaction Set Identifier

The transaction set identifier is a reference number for the transaction set and is the first data element of the transaction set header segment (ST). Codes for transaction set identifiers are shown in the Data Element Dictionary - Simple Data Elements under Data Element #143, Transaction Set Identifier Code.

Transaction Set Name

Each transaction set is assigned a unique name as specified in this section.

Functional Group Identifier

Each transaction set is assigned a functional group identifier code. This identifier is the first data element of the functional group header segment (GS). The functional group identifier code for each transaction set is defined in the Data Element Dictionary - Simple Data Elements under Data Element #479, Functional Identifier Code. The applicable functional group identifier is also shown at the top of each transaction set after the transaction set name. In cases where no functional group ID is given, the transaction set assumes the functional group ID of the functional group with which it is transmitted.

Purpose and Scope

Each transaction set is assigned a unique purpose and scope as specified in this section.

Data Segment

A segment is the intermediate unit of information in a transaction set. Segments consist of logically related data elements in a defined sequence. Segments have a unique segment identifier that comprises the first characters of the segment. When segments are combined to form a transaction set, their relationship to the transaction set is defined by a segment requirement designator and a segment sequence. Some segments may be repeated, and groups of segments may be repeated as loops.

Segment Sequence

"POS" specifies a position in the segment sequence of a transaction set, as denoted in the tables that comprise this section. (This sequential position number may change from one release to the next if segments are added to or deleted from the transaction set.) Within a transmission, segments shall appear in this order.

Segment Identifier

"ID" specifies a unique identifier composed of a combination of two or three letters or digits as assigned in the Segment Directory.

Segment Name

"NAME" specifies the segment's name as assigned in the Segment Directory.

Segment Requirement Designator

"REQ" specifies one of the following two requirement designators defining its need to appear within the transaction set. The requirement designators shown below are each followed by their code abbreviation in parentheses.

1. Mandatory (M)

This segment shall appear in the transaction set at least once (See Loops of Segments).

2. Optional (O)

The appearance of this segment in the transaction set is either at the option of the sending party or is based on the mutual agreement of the interchange parties.

Maximum Use of Segments

"MAX" specifies the maximum number of times a segment is permitted to appear in succession at a specific position within the transaction set. Segments with segment requirement designators "M" or "O" may be used one or more times at their specific position in the transaction set.

The symbol >1 indicates that segments may be used once or more than once at their specific positions in the transaction set.

Loops of Segments

"REPEAT" specifies the number of times the loop may be used at that specific position in the transaction set. The segments comprising a loop are denoted by borders. Within each bordered area, on a shaded line, a loop identifier displays to the left and the repeat value to the right.

The Symbol >1 indicates that a loop may be used once or more than once.

Loops may be nested within other loops.

If the requirement designator of the first segment in a loop is "M," then at least one iteration of the loop is required.

If a loop is used, the first segment shall be used for each iteration of the loop.

Mandatory segments within a loop are mandatory only if the loop is used.

Transaction Set Tables

The purpose and scope and tables for the transaction sets are shown in this section.

Notes and Comments

Where NOTES (denoted by "N") are provided with the tables, these are considered part of the standard. Where COMMENTS (denoted by "C") are included with the tables, these are not considered part of the standard. Multiple notes and comments could appear for the same segment position.

Where reference is made to a Figures Appendix in a note or comment, refer to the Figures section of this publication.

Any notes and comments follow the last table of each transaction set. The number preceding the text denotes the table/segment position to which the text refers.

Semantic Relations

See X12.59 implementation of EDI Structures-Semantic Impact for a complete discussion of semantic relationships.

Transaction Sets

100 - Insurance Plan Description

	3600	SE	Transaction Set Trailer	M	1	

Notes

1/0500 The NM1 loop provides information about the sending and receiving parties.
2/0100 The N1 loop repeats for each individual company.
2/1100 The PID loop repeats for each plan.
2/1500 The BLI loop is used to report plan service features.
2/2300 The AM1 loop describes plan rules.
2/2500 The PO1 loop describes investment funds applicable to the plan.
2/2900 The N4 loop describes state availability and exceptions for each plan.
2/3100 The AM1 loop is used to report state rule exceptions.
2/3300 The PO1 loop reports investment fund state exceptions.

101 - Name and Address Lists

FUNCTIONAL GROUP=**NL**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Name and Address Lists Transaction Set (101) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction can be used to facilitate the rental or exchange of name and address mailing lists between direct marketing companies.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT
	0100	ST	Transaction Set Header	M	1	
	0200	BGN	Beginning Segment	M	1	
	LOOP ID - DTM					>1
	0300	DTM	Date/Time Reference	M	1	
N	0400	N1	Party Identification	M	>1	
	LOOP ID - N9					>1
	0450	N9	Extended Reference Information	O	1	
	LOOP ID - LX					>1
	0500	LX	Transaction Set Line Number	M	1	
N	0600	IN2	Individual Name Structure Components	O	>1

	0800	REF	Reference Information	O	>1	
	0900	SPA	Status of Product or Activity	O	1	
	1000	COM	Communication Contact Information	O	>1	
	1100	SE	Transaction Set Trailer	M	1	

Notes

1/0400 The N1 segment identifies the source responsible for the creation of the information.
1/0600 The IN2 segment is used to communicate the name components.
1/0700 The NX2 segment is used to communicate the address components.

102 - Associated Data

FUNCTIONAL GROUP=**AC**
SUBCOMMITTEE=**C**

This X12 Transaction Set contains the format and establishes the data contents of the Associated Data Transaction Set (102) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set may be used to convey associated data. Associated data is defined as an object, a set of functionally-related information not using the usual transaction set structure in segments. The complete set of information constituting an object, including the information necessary to uniquely identify an object, is defined as a package. Objects may include graphic, text, parametric, tabular, image, spectral, audio, etc. data. The character set repertoire of an object is not governed by the character set repertoire identified for any accompanying transaction sets contained in the interchange.

Associated data may be linked with other business transactions as an augmentation to other functional data. Therefore, referencing capabilities properly relating the object to the associated transaction set must be provided. Because user preferences require flexibility within the techniques for referring to an object, no particular methodology is specified. The only requirement is the assignment of an object identification number attributable to the object which should be unique for a sufficient time to avoid any confusion. Multiple references to identify all related transaction sets and objects are permitted.

The transaction set is not media dependent, is not limited to a specific transmission protocol, and can be linked to other transaction sets. Interchanges may contain functional groups containing transaction sets, packages, or transaction sets and packages. The transaction set may be included in any functional group within an interchange. Only one package may be conveyed within a single occurrence of an Associated Data Transaction Set.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT
	0100	ST	Transaction Set Header	M	1	
N	0200	ORI	Object Reference Identification	M	1	
N	0300	REF	Reference Information	O	>1	
N	0400	OOI	Associated Object Type Identification	M	>1	
N	0500	BDS	Binary Data Structure	M	1	
	0600	SE	Transaction Set Trailer	M	1	

Notes

1/0200 The ORI segment shall identify the object identification reference number. This corresponds to the object identification specified in any related applicable transaction set where the REF (or equivalent) segment is used to link the functional data and object(s).

1/0300 An occurrence of the REF segment will, if needed, identify a unique application transaction reference number specified in the transaction set associated with the object.

1/0400 One occurrence of the OOI segment is mandatory and shall be used for file format identification (Code value "13" in data element 1691).

1/0500 The BDS segment shall contain the object.

103 - Abandoned Property Filings

FUNCTIONAL GROUP=**AB**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Abandoned Property Filings Transaction Set (103) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to report abandoned property filings information, such as uncashed checks or abandoned bank account balances, to government agencies and may be used by the government agencies to distribute information on abandoned property for publication to the general public. It may also be used to initiate an Electronic Funds Transfer (EFT) payment to transfer the value of the abandoned property to the government agencies.

Notes

1/0900 This AMT segment contains the total monetary value of the filing.

1/1000 This NM1 loop identifies the senders and/or receiver of the filing. The senders may include both parent and subsidiary entities.

2/0100 This N1 loop identifies the property holders. Each loop occurrence identifies one holder.

2/0900 This NM1 segment contains previous identification for the holder identified at position 2/0100.

2/1200 The YNQ segment refers to questions concerning the property holder.

2/1300 This PER loop identifies contact information for the property holder identified at position 2/0100.

2/1700 The LX loop describes the property.

2/1800 The BLN segments contain balance information for the property identified by the assigned number. There may be more than one balance for the property, specifying an initial balance, and additions and deductions to the initial balance.

2/2800 This NM1 loop describes the property owner if known.

104 - Air Shipment Information

FUNCTIONAL GROUP=**SA**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Air Shipment Information Transaction Set (104) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide the sender with the capability to transmit detailed bill of lading and rating information pertinent to an air carrier shipment.

This transaction set provides shipment detail information for the air carrier in terms of 1) sender information, 2) shipment detail for multiple and single piece shipments, 3) consignee and third-party information, 4) detail and charges for each shipment, and 5) shipment totals.

105 - Business Entity Filings

FUNCTIONAL GROUP=**BF**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Business Entity Filings Transaction Set (105) for use within the context of an Electronic Data Interchange (EDI) environment. This bi-directional transaction set can be used by business entities, governmental administrators and regulators to exchange required business entity filing information, such as annual reports, registered agent changes and changes of officers, partners and directors, and may include information about any required fees.

Notes

1/1100 The NM1 loop carries name, address and related information about the sender and if required, the receiver of the transaction set.

1/1800 The LM loop carries external codes applicable to the entire transaction set.

2/0100 The HL loop defines individual reports and differentiates between the reporting entity, related parties and other relevant entities and parties required for a specific report type. The first occurrence indicates the type of report and the second occurrence contains information about the business entity. Additional uses of the HL loop vary based on the nature of the filing and the filing jurisdiction's requirements.

2/0500 The NM1 loop describes the reporting entity and other entities and parties by their names, addresses and related information.

2/3100 The LM loop carries external codes applicable to either the specific report, person or entity being described.

2/4400 The REF loop carries financial and fee information by relating line items to monetary amounts and dates.

2/4800 The EFI loop can be used to carry object information within the structure of an individual report.

106 - Motor Carrier Rate Proposal

FUNCTIONAL GROUP=**MH**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Motor Carrier Rate Proposal Transaction Set (106) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by a motor carrier to propose rates and services to a shipper, receiver, or other relevant party.

Notes

1/0700 The AT5 segment identifies any special services or special handling required for all shipments covered by this proposal.

2/0600 The AT5 segment is used to identify any special services or special handling requirements covered by the geography in this loop. The presence of an AT5 segment in this loop is in addition to any special services or special handling contained in the header.

2/1700 The AT5 segment is used to identify any special services or special handling required for shipment covered by the geography in this loop. The presence of an AT5 segment in this loop is in addition to any special services or special handling contained in the header.

2/1800 The MCT segment provides accessorial charges for this lane only.

107 - Request for Motor Carrier Rate Proposal

FUNCTIONAL GROUP=**MC**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Request for Motor Carrier Rate Proposal Transaction Set (107) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by a shipper, receiver, or other relevant party to request that a motor carrier provide a rate and service proposal.

109 - Vessel Content Details

FUNCTIONAL GROUP=**VE**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Vessel Content Details Transaction Set (109) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide all the information necessary to report event details for a shipment and status for one or more containers bound for a port. It is intended to accommodate the details for one status or event associated with many containers, as well as more than one status or event for one shipment.

110 - Air Freight Details and Invoice

FUNCTIONAL GROUP=**IA**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Air Freight Details and Invoice Transaction Set (110) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide a customer with an air invoice for transportation and other charges related to shipments, including Original Invoices, Past Due Billings, Balance Due Bills and Revisions.

Notes

1/0750 The N1 Loop is used only to convey entity information relevant to the debtor or for a party other than the shipper or consignee.

2/0200 The N1 loop is used to convey entity information relevent to the shipper and consignee.

111 - Individual Insurance Policy and Client Information

FUNCTIONAL GROUP=**IF**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Individual Insurance Policy and Client Information Transaction Set (111) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to exchange policy and client information among organizations administering individual life and health insurance contracts and their trading partners (e.g., agents, brokers). It is not intended to be used for group insurance.

Notes

1/0300 The 1000 loop provides information about the sending and receiving parties.

2/0100 The structure of the transaction is defined in BHT01 at 1/0200.

2/2200 The 2300 loop can be used to provide additional information at the level of the specific policy, coverage, component, account, etc., being described.

2/3600 The 2500 loop provides details about the role(s) played by a client at the given level. For example, this could contain specifics for the owner of a policy, or for a beneficiary for a given coverage.

2/4100 The IN1 segment identifies parties related to the client in the given role. For example, if the client is a beneficiary, the IN1 segment could be used to provide the reference number for the trustee for that beneficiary.

112 - Property Damage Report

FUNCTIONAL GROUP=**PQ**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Property Damage Report Transaction Set (112) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set will be used to provide property damage information between property and casualty insurance companies, independent agents, service and information providers. This information includes, but is not limited to providing cost estimates involving functions such as demolishing, new constructions, damage repair and replacement.

Notes

1/0700 Loop 1100 is used to identify the specific entity related to the Supplementary Information.

2/0100 HL01 (Hierarchical ID Number) will be assigned sequentially within the hierarchy starting with one and incremented by one for each HL segment.

2/0100 The AD (Administrative Information Level) is mandatory. All other levels are optional.

2/0100 The levels BD (Building), UT (Unit or Lot), RM (Room), SR (Subroom), EX (Exception), PS (Property Segment Group), PB (Personal Property), and 9 (Line Item), must always appear (in the transaction set), in the above order, e.g., the Building level cannot be subordinate to the Room level, however the Building level may be omitted.

2/0100 V (Name and Address Information) level may be used as a subordinate level to level 9 (Line Item) in order to identify a specific vendor related to the line item.

2/0700 The LM is used in the Line Item Hierarchical Level. The Agency Qualifier Code will identify the Agency whose code list will be used to identify the Product/Service in the SLN.

113 - Election Campaign and Lobbyist Reporting

FUNCTIONAL GROUP=**CL**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Election Campaign and Lobbyist Reporting Transaction Set (113) for use within the context of an Electronic Data Interchange (EDI) environment. This Bi-directional transaction set can be used by candidates, candidate committees, party committees, political action groups, lobbyists and other entities to exchange disclosure data.

Notes

1/0500 The LQ segment provides coded information related to a filing, such as, a notice of a late filing.

1/0700 The NM1 segment provides name and address information regarding the sender and receiver of a filing.

1/1300 The AWD loop provides monetary amounts covering fees and related information associated with a late filing.

1/1400 The LQ segment provides coded information related to the monetary amounts carried in the AWD loop.

2/0100 The HL loop divides a filing into sections such as basic report information, loans, contributions, receipts, expenditures, related parties and other information contained in a filing.

2/0500 The LQ segment provides coded information related to an individual report identified in the N9 segment.

2/0700 The NM1 segment provides name, address and related information for reportable entities, such as filers, committees, committee officers, and contributors.

2/2100 The LQ loop provides coded information, such as, type of committee, last office held by a candidate, and other information about the entities identified in the NM1 segment.

2/3300 The LQ segment provides coded information related to the monetary amount carried in the AWD segment as reported for the entity identified in the NM1 loop.

2/3400 The N1 segment provides the name of an entity who benefited from an expenditure made by a party identified in the NM1 segment.

120 - Vehicle Shipping Order

FUNCTIONAL GROUP=**VC**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Vehicle Shipping Order Transaction Set (120) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to notify a carrier of the impending arrival of a motor vehicle which the carrier is to ship to the destination herein specified or on which that carrier is to perform a service. It may be sent to a carrier by the vehicle manufacturer, by another carrier, or by an agent of the manufacturer.

Table 1

Notes

1/0300 G6202 is the date notified.
1/0520 DTM02 is the estimated ship date.
1/0600 N1, N2, N3 and N4 are required when a vehicle is to be shipped to a destination for which a dealer code is not able to be supplied in VC04.

121 - Vehicle Service

FUNCTIONAL GROUP=**VS**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Vehicle Service Transaction Set (121) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by a carrier to notify a Vehicle Manufacturer that a requested movement or service has been performed on motor vehicles or that a change in status has occurred.

124 - Vehicle Damage

FUNCTIONAL GROUP=**VD**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Vehicle Damage Transaction Set (124) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to provide vehicle damage information flow between Property & Casualty (P&C) insurance companies, independent agents, service providers, information providers, self-insurers and financial institutions. Business functions consist of the estimating of vehicle damage and the detailed reporting of parts and labor cost connected with repairing the estimated damage.

125 - Multilevel Railcar Load Details

FUNCTIONAL GROUP=**MR**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Multilevel Railcar Load Details Transaction Set (125) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by the origin rail carrier or loading contractor to report the departure of a multilevel railcar and its contents to the vehicle manufacturer. It is used by the vehicle manufacturer, origin rail carrier, or loading contractor to forward data pertaining to the loaded railcar and its contents to the destination rail carrier or haulaway carrier(s) or both upon departure. It is also used by the destination rail carrier, or unloading contractor to report to the vehicle manufacturer, the arrival of a railcar at the destination rail ramp.

	0400	N7	Equipment Details	M	1	
	0500	VC	Motor Vehicle Control	O	21	
	0600	SE	Transaction Set Trailer	M	1	

Notes

1/0300 G6202 is the departure date for railcar departures and the arrival date for railcar arrivals.

Comments

1/0500 VC segment is not required for Railcar Arrival.

126 - Vehicle Application Advice

FUNCTIONAL GROUP=**VA**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Vehicle Application Advice Transaction Set (126) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by the vehicle manufacturer to notify a carrier as to the result of processing the transactions received from the carrier during the previous day or payments being released today or both.

Table 1

POS	ID	NAME	REQ	MAX	REPEAT
0100	ST	Transaction Set Header	M	1

127 - Vehicle Baying Order

FUNCTIONAL GROUP=**VB**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Vehicle Baying Order Transaction Set (127) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to request or report the assignment of a motor vehicle to a specific predetermined bay (parking space) in a storage or shipping facility and to report conditions of a storage or shipping facility.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT
	0100	ST	Transaction Set Header	M	1

	0600	SE	Transaction Set Trailer	M	1	

Notes

1/0300 G6201 is the date notified.

128 - Dealer Information

FUNCTIONAL GROUP=**DI**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Dealer Information Transaction Set (128) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by the shipper to notify carriers of the establishment of a new "Ship To" Location (e.g. Retail Dealer, Drop Ship Point, or Body Vendor) or profile change to an existing "Ship To" Location in the carrier's area of service.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT

	1100	SE	Transaction Set Trailer	M	1	

Notes

1/0200 N102 is the dealer name.
1/0200 N104 is the shipper assigned code for dealer.

129 - Vehicle Carrier Rate Update

FUNCTIONAL GROUP=**VH**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Vehicle Carrier Rate Update Transaction Set (129) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by either a carrier or the vehicle manufacturer to transmit new freight rates either as the result of a rate adjustment or as a rate proposal for new business.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT

	0600	SE	Transaction Set Trailer	M	1	

Notes

1/0300 In the first instance of the G62 segment, G6202 is the Tariff/Contract/Purchase Order Publication Date.

1/0300 In the second instance of the G62 segment, G6202 is the effective date for rate application.

1/0300 In the third instance of the G62 segment, G6202 is the contract expiration date.

130 - Student Educational Record (Transcript)

FUNCTIONAL GROUP=**ED**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of a Student Educational Record (Transcript) Transaction Set (130) for use within the context of an Electronic Data Interchange (EDI) environment. The student transcript is used by schools and school districts and by post-secondary educational institutions to transmit current and historical records of educational accomplishments and other significant information for students enrolled at the sending schools and institutions. The transcript may be sent to other educational institutions, to other agencies, or to prospective or current employers.

When a student transfers from one educational institution to another, it is essential that the student's prior educational record be made available to the institution to which the student wishes to transfer. For students in Pre-Kindergarten through Grade 12, prompt records transfer will assist receiving schools in making an appropriate initial educational placement of student. It is important that this information be available on a timely basis. In some cases for post-secondary students, it is this record which determines whether the student will be accepted at the receiving institution. In all cases, it is important to know what course work the student has already completed so that the student may be properly placed in courses and educational programs at the next institution.

When a student seeks employment or wishes to inform another agency of the student's academic accomplishments, the student transcript may be sent to a prospective employer, branch of the military, or another government agency.

The student transcript contains personal history and identifying information about the student, the current academic status, dates of attendance, courses completed with grades earned, degrees and diplomas awarded, health information (Pre-Kindergarten through Grade 12 only), and testing information.

Notes

1/0300 The ERP segment is used to indicate what type of student record is being sent.

1/0400 The REF segment includes the student identification numbers.
1/1100 The N1 loop identifies the sending and receiving institutions.
1/1600 The IN1 and IN2 segments indicate the name(s) of the student or other individual agency.
1/2300 The occurrence of the SSE segment indicates the dates of the PreKindergarten - Grade 12 student's entry and exit from the school or school district.
1/2670 The DTP segments indicate the beginning and ending dates for involvement in an activity or the date the award or honor was granted.
2/1400 The NTE segment provides additional information about special programs.
2/1500 The OPS segment provides subject area and other information for the special program identified in the SP segment.
2/1600 The OPX segment provides reasons for placing/removing the student in/from the program or subject area.
2/1700 The DTP segment provides dates associated with the program or subject area.
2/2000 The N1, N3, and N4 segments specify the override institution.
2/2300 This SUM segment is for the summary for the academic session.
2/2900 The N1 and N4 segments specify the override institution.
2/3200 This SUM segment is for the summary for the degree.
2/3350 The N1 segment specifies the institution awarding the degree.

131 - Student Educational Record (Transcript) Acknowledgment

FUNCTIONAL GROUP=**AK**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Student Educational Record (Transcript) Acknowledgment Transaction Set (131) for use within the context of an Electronic Data Interchange (EDI) environment.

The Student Educational Record (Transcript) Acknowledgment record is used to ensure that the original transcript did, in fact, come from the proper office at the educational institution indicated as the sender and that certain key elements of the transcript were received as they were sent. It also provides the sending institution with confirmation that the original record was received by the intended recipient and the date it was received. This information may then be relayed to the student or other individual who requested the record transfer.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT
	0100	ST	Transaction Set Header	M	1	
	0200	BGN	Beginning Segment	M	1

N	0600	SUM	Academic Summary	O	1	
N	0700	IN2	Individual Name Structure Components	M	1	
	0800	SE	Transaction Set Trailer	M	1	

Notes

1/0300 The N1 segments identify the sending and receiving institutions.

1/0400 The REF segments include the student number in the REF segment and the transaction set reference number in the BGN segment of the original transaction set being referenced.

1/0500 The QTY segments include the number of CRS and DEG segments in the original transaction set being referenced.

1/0600 The SUM segment is the same as the last SUM segment in Table 1 of the original transaction set being referenced.

1/0700 The IN2 segment is the first occurrence of the IN2 segment of the original transaction set being referenced.

132 - Human Resource Information

FUNCTIONAL GROUP=**HU**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Human Resource Information Transaction Set (132) for use within the context of an Electronic Data Interchange (EDI) environment. The Human Resource Information Transaction Set is used to transmit current and historical records of employment status, education, teaching credentials, workexperience, and other significant information on employees in an education environment. Data contained in this transaction set may be sent to educational institutions, school districts, retirement systems, and state or other agencies. This information can be useful in establishing credentials for consideration for employment, certification, and administrative and statistical reporting, or community services.

Notes

1/0300 The N1 loop identifies the reporting institution.

2/0100 The HL loop identifies the hierarchical levels of the transaction set: State, System, District, Region, Institution, and Individual.

2/0900 The NM1 loop identifies the name of the entity described in the HL loop.

2/1600 The DTP segment transmits significant dates associated with the the credential or qualification such as the date issued and expiration date.

2/2300 The CRS loop provides information about academic courses taken in other than regular vocational, undergraduate or graduate courses or programs. This would include personal development courses and other training taken by the individual.

2/2500 The N1 loop identifies the entity awarding the credential or validating the qualification.

2/4200 The N9 loop identifies a fund source and the percent contributed to the funding of the employment position described in the EMS loop at 2/3200.

2/4400 The N1 loop identifies the employer for the position described in the EMS loop.

2/4900 The N1 segment identifies the entity for which the workload taskis performed.

133 - Educational Institution Record

FUNCTIONAL GROUP=**CW**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Educational Institution Record Transaction Set (133) for use within the context of an Electronic Data Interchange (EDI) environment. The Educational Institution Record conveys descriptive characteristics of postsecondary and elementary/secondary educational institutions. Data contained in this record includes information about institutional location, type, student enrollment, staffing governance, finance, programs, and services at an educational institution.

Notes

2/0100 The HL segment identifies the appropriate hierarchical level: State, District, System, Institution. All levels are optional.

2/1000 The N1 segment identifies the name of the school or institution described in the following detail. The N1 loop provides information about entities which are being reported under the auspices of the reporting institution previously identified at locations 1/0400-1/0700. (e.g., The medical school associated with an institution may have its own state and federal identifiers and provide some separate information. A school district may report as an aggregate with some individual information supplied for specific schools within the district.)

2/1600 The YNQ loop provides responses to questions about the entity identified in the N1 loop at 2/1000, and related quantity and percent information.

2/1900 The FOS segment indicates various fields of study offered by the institution.

2/2400 The NM1 segment identifies persons or other entities associated with the special program offerings.

2/2600 The FOS segment identifies fields of study associated with accreditation or licensing.

2/2800 The N1 loop provides information about an agency other than those agencies coded in the SLA segment which supplied the accreditation, licensing, or affiliation.

135 - Student Aid Origination Record

FUNCTIONAL GROUP=**SL**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Student Aid Origination Record Transaction Set (135) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by lending institutions ("lenders"), colleges, universities and trade schools ("schools"), and loan guarantee agencies ("guarantors") to exchange information relating to the certification, approval, and guarantee of specific student aid. This information includes, but is not limited to, student and applicant identification, school enrollment data, borrowing history, and the terms of the loan. This standard supports multi-program transactions to exchange information about a student loan, or grant between schools and fund sources. A fund source could be a guarantor and lender combination, state agency, private lender, scholarship agency, or the US Department of Education.

Notes

1/0620 Use the LX loop to identify specific aid information and disbursement details.

1/0700 Use the ENT loop to identify the applicant, student, school, lender, and guarantor entities.

1/2100 Use the PLI loop to identify previous loan information.

1/2500 Use the IN1 loop to identify the applicant, student, spouse, references, and cosigners information.

1/2900 Use the LX loop to identify the applicant and student state residency information; the applicant, student, spouse, references, and cosigners address information; and the applicant, references, and cosigners employer information.

1/3410 Use the LM loop to identify the guarantor exception codes.

138 - Educational Testing and Prospect Request and Report

FUNCTIONAL GROUP=**TT**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Educational Testing and Prospect Request and Report Transaction Set (138) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used by educational institutions and employers to request and receive results of testing programs from testing services and prospective student information from prospect services. Each transaction may include one prospect's identification, demographic information, academic background, goals and preferences, test identification, testing conditions, scoring results, and test normalization analysis including national, regional, and local norms.

Notes

1/0400 The REF segment indicates the test-taker's identification number.

1/0500 The N1 loop provides information about the sender and the intended receiver.

2/0100 The IN1 loop provides information about the test-taker and related individuals who may have requested the testing or, if the test-taker is a minor, have approved the administration of the test.

2/1000 The RQS segments contain responses to questions about such topics as family income, college preferences, and other supplemental information. The RQS segment identifies the question and the test-taker's response.

2/1100 The SCA segment describes demographic norms for the test-taker or other related individuals.

2/1200 The EMS loop provides employment information about the test-taker and related individuals.

2/1500 The TST loop describes the test results being reported or requested.

2/1500 The TST, DEG, SST, PCL and ATV loops provide information about the test-taker identified in the IN1 loop.

2/1800 The MSG segment contains the text of the essay component of a test.

2/1900 The RAP segment identifies a specific proficiency, licensing requirement, etc. which the test or test component meets.

2/2000 The EMS describes a position the requirements for which the test or test component meets.

2/2100 The SCA loop provides statistical analysis and norms for the test or test components.

2/2200 The FOS segment together with the SCA segment describe the predicted degree of success the test-taker might expect upon entering specific academic programs.

2/2300 The N1 loop describes the testing center or the place where the test or test component was administered.

2/2700 The DEG loop describes the test-taker's academic degree goals and field of study interests.

2/2900 The SST loop provides information about the high schools the student has or is attending, along with self-reported course work, credit hours, GPA, etc.

2/3200 The FOS segments provide information about high school course work or subjects the test-taker has taken.

2/3300 The N1 segment identifies the high school.

2/3600 The PCL loop provides information about the test-taker's current or previous experiences at post-secondary institutions.

2/4000 The FOS segment provides information about the course work or subjects that the test-taker has taken at post-secondary institutions.

2/4100 The DEG loop provides information about degrees, majors, minors, and fields of study which the test-taker has completed or pursued at post-secondary institutions.

2/4400 The ATV loop describes the test-taker's activities, awards and accomplishments.

2/4600 The DTP segment contains the date or range of dates that the test-taker participated in an activity.

139 - Student Loan Guarantee Result

FUNCTIONAL GROUP=**SL**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Student Loan Guarantee Result Transaction Set (139) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by guarantee agencies ("guarantors") to inform a lender, a school, or both as to the status of a student loan guarantee. The guarantee result information includes, but is not limited to, the conditions of approval or denial of a loan guarantee, notice of guarantee and loan disclosure terms, and information regarding previously guaranteed loans.

The student loan guarantee result is the second phase of the student loan application process. After the guarantor reviews the lender-approved student loan application, the agency issues a guarantee result. Subsequent lender processing of the student loan application is based on the information contained in the result transaction. After the lender receives a loan guarantee approval, the federally required loan disclosure is generated, and the loan proceeds are disbursed. If the lender receives a loan guarantee rejection, the lender may correct and resubmit the loan application, or the application may remain in a rejected status.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT
	0100	ST	Transaction Set Header	M	1	
	0200	BGN	Beginning Segment	M	1

Notes

1/0500 Use the LM loop to identify the guarantor exception codes.
1/0700 Use the ENT loop to identify the applicant, student, school, lender, and guarantor entities.
1/1100 Use the AMT loop to identify the loan repayment requirements.

140 - Product Registration

FUNCTIONAL GROUP=**WA**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Product Registration Transaction Set (140) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to specify the manufacturer, seller, secondary warranter, and purchaser or lessee of the product. It can specify the date the product was sold, delivered, and placed in service as well as identify the product model and serial numbers. It can specify the class of service expected from this individual sale, for example: industrial, commercial, or household. This registration information can be used to divide sales commissions among sales associates or attribute license fees to the proper manufacturer. It can be used to submit many product registrations at one time to one receiving organization.

Table 1

	4500	LM	Code Source Information	O	1	
	4600	LQ	Industry Code Identification	M	100	
	4700	SE	Transaction Set Trailer	M	1	

Notes

1/0200 BGN02 is used as the initial reference identifier for this transaction. BGN03 defines the date of this registration transaction. Normally BGN04 and BGN05 would not be used in this transaction. BGN01 is normally set to 00 to indicate that this is an original registration. Product registration is normally a by-product of a sale.

1/0300 The N9 segment can provide a reference to a previous registration transaction. For example, this could be a replacement of a previous registration transaction.

1/0400 The N1 loop defines the party submitting the product registration, usually the seller of the product rather than the customer, and the party who maintains the registration database, usually the manufacturer of the product. The N1 loop also can be used to specify the product's distributor.

2/0100 Each iteration of the LX loop is used to group one or more products that are being registered to one individual or organization.

2/0150 The REF segment is used to identify the individual registration number. It can include the data element 128, code value Q8, "Registration Number."

2/0200 The N1 loop is used to identify the individual or organization responsible for the registration. This could be the purchaser, the lessee, the operator, etc. This is the party registered to be notified if a product recall is required. Successive iterations could identify other individuals and organizations who are involved in some manner. It also could be used to specify if the product is to be installed or housed at a location that is different than that listed for the registration. An additional use of the N1 loop has been requested to be able to include the salesperson who sold the product or service contract and the service manager who would be responsible for servicing the product.

2/0600 The PER segment is used to provide an individual's or department's name for a particular support function and, if desired, their communication number for a phone, electronic mail, etc.

2/0800 The REF segment could be used to identify the item into or onto which this product being warranted will be residing. For example, when a controller is attached to a numerically controlled machine tool, part of the registration could include information about the machine tool. The machine tool could be identified with multiple occurrences of the REF segment. A similar situation would be if an engine were being replaced in a heavy duty truck. The REF segment could then be used to specify the vehicle.

2/0900 There is a separate LIN segment for each product included in this sale represented by the single iteration of the LX loop. The LIN segment will contain the product's model number and serial number in data element 234-235 combinations. The other pairs can be used to provide other information about the product.

2/1000 The PID segment can be used to provide additional information regarding the product. However, it seldom will be required. When it is used, PID06, data element 752, is not required.

2/1100 The QTY segment is used to reflect the quantity of items that do not have a serial number. QTY01 will have a discrete quantity qualifier of 01. For all items with a serial number, the value to be used is either explicitly or implicitly set to one.

2/1200 The DTM segment in the LIN loop can be used to specify the dates that are significant to the registration such as delivery, installation, placed in service, failed, brought in for service, etc.

2/1300 The REF segment can identify information about the product that was not able to be coded in the preceding segments. For example, it can be used to specify the warranty coverage code and the warranty registration number.

2/1400 The N1 loop within the LIN loop provides the same capabilities for the single product as the N1 loop above in the LX loop provides for the entire sale.

2/1800 The PER segment is used to provide an individual's or department's name or functional area and, if desired, their communication number for a phone, electronic mail, etc.

2/1900 The PSC loop in the LIN loop refers to the warranty or service contract for the entire product described by the LIN segment. If special operating conditions that could affect the registration are to be noted, such as a household product being used commercially, this would be placed in the PSC segment. Unless noted to the contrary, it will be assumed that the product will be used in its most normal capacity. For example, a kitchen appliance, unless specifically stated to the contrary, will be assumed to be used within a household. The PSC loop also may be used when a for fee registration is being specified, such as an extended warranty or service contract. The PSC segment also may be used without the other segments in the loop to describe conditions of a standard, free warranty registration. The PSC segment is used to specify the period for the warranty or service contract. There may be other measures of service life of a product such as operation counter, an odometer to measure mileage of a vehicle, or a clock that measures operational hours.

2/2000 The SSS special service segment is used in conjunction with the PSC segment to add any extra services to be specified within the service contract. For example, there may be a clause for 24 hour service or a guaranteed service response of no more than so many hours.

2/2100 The repeated use of the AMT segment within the PSC loop allows the total amount of the contract to be specified as well as any special conditions on the amount.

2/2200 The CUR segment is only required when the service contract is to be paid across national boundaries.

2/2300 The ITA segment would be used in those special cases where the normal service contract cost does not apply. For example, in fleet sales, the product and its service contract may be bought from a local dealer, but because one purchaser buys many of them from several dealers spread across a geographic area, they get a discount or extra service on the purchase.

2/2400 The TXI, Tax Information segment, can be used to list the sales tax paid on a service contract. Also it identifies the taxing authority.

2/2500 The ITD segment is to be used in the case where the service contract is to be paid at regular intervals over the life of the contract. For example, the payments might be monthly or quarterly.

2/2600 The N9 segment within the PSC loop can contain a unique code identifying the terms of the service contract. For example, repair order number or contract number as preassigned by the product's manufacturer. It also can be used to record the customer's method of payment for a service contract. It then would be used to contain the check number or charge card number. The expiration date on the charge card does not need to be recorded as the computer program entering the transaction only has to check that the card has not expired. N903 will be able to contain the name of the issuer of the card.

2/2700 The SLN loop is used to describe subassemblies or parts within an assembly that may be covered by separate warranty conditions. A pair of data elements 234 and 235 in the SLN segment will be used to contain the serial number, lot number, model number, etc. of the subassembly being registered. All the loops and segments within the SLN loop perform the same functions for the subassemblies as their counterparts above did for the product.

2/3200 The N1 loop within the SLN loop provides the same capabilities for the single product as the N1 loop above in the LX loop provides for the entire sale. However, the assembly whose information is in the N1 loop is part of the product specified in the SLN loop.

2/3600 The PER segment is used to provide an individual's or department's name or functional area and, if desired, their communication number for a phone, electronic mail, etc.

141 - Product Service Claim Response

FUNCTIONAL GROUP=**WA**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Product Service Claim Response Transaction Set (141) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit the status of a product service claim and the items accepted and rejected for payment from the product service claim. Each product service claim submission could have represented the repair of several individual products and each pair could have consisted of several repair actions involving parts and labor.

Table 1

N	0150	AMT	Monetary Amount Information	O	>1	
N	0200	CUR	Currency	O	1	
	0300	SE	Transaction Set Trailer	M	1	

Notes

1/0200 The BGN segment must contain a number for reference to this claim response transaction and the date on which the transaction was created.

1/0300 The QTY segment can be used to specify the total quantity of claims included in this transaction as well as the quantity approved and the quantity disapproved.

1/0400 The N1 loop defines the party making the product service claim response and the party to receive the response.

1/0900 This is the representative who reviewed the entire claim response and the appropriate communication numbers.

2/0100 The LX loop serves only to separate the individual product service claim response levels. Consequently, the LX segment would probably contain only a sequential number.

2/0150 See X12 EDI Standard Figures, https://figures.x12.org, for an explanation of the use of the REF segment in the LX loop.

2/0200 The PCS segment identifies the status of the item specified by the repeated REF segments.

2/0300 The DTM segment clearly is an optional segment that tells any date or time information that is significant to that particular claim status level. It can be repeated, if necessary.

2/0400 The MSG segment seldom should be used. It is only necessary if the coded warranty claim status in the PCS segment is not sufficient to describe the detail as to a change in a submitted claims. It can be repeated to allow a full length message. However, the use of the MSG segment inhibits computer processing of the transaction by either party.

2/0500 The optional AMT segment would be used if the amount of the individual claim that will be credited or submitted needs to be specified.

2/0600 This is the representative who analyzed this individual claim and the appropriate communication numbers.

2/0700 This is the factory assigned root cause for the problem specified in the original product service claim and should be entered only when it differs from that used in the original claim or was not included with the original claim. It should not be used to repeat back information that was contained in the original claim.

3/0100 TDS01 in the trailer is able to contain the total amount to be credited or paid on the sum of all claims contained in this response transaction.

3/0150 The amounts contained in the AMT segment will represent a detailed breakdown for the entire claim. The total amount to be credited or paid on the sum of all claims is to be specified in the preceding TDS segment.

3/0200 The CUR segment will be used only if it is necessary to convert from one currency to another to pay for these claims.

142 - Product Service Claim

FUNCTIONAL GROUP=**WA**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Product Service Claim Transaction Set (142) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit the servicing organization, claimant, manufacturer, seller, and purchaser of the product.

It can specify the product's current usage, date the product was sold, delivered, and placed in service as well as identify product model and serial numbers and serial numbers of any subassemblies. It can specify a malfunction or recall condition, service performed, labor, parts, and any other associated costs. It can show the costs of the repair and the date service was requested and when it was available to be placed back in service.

Notes

1/0200 BGN02 contains the warranty reference number. This could be a batch number for a group of claims. It will be used in LIN03 in the corresponding product service claim response transaction (141). BGN03 contains the product service claim transaction original creation date.

1/0300 The N1 loop identifies the sending party, usually the servicing organization, and the receiving party, usually the product's manufacturer. In addition, a third party, such as the product's distributor, can be identified. It is also possible to specify a secondary warranter such as a credit card issuer or a motor oil manufacturer.

1/0700 An independent servicing agency, usually identified as the sending party in the first iteration of the N1 loop, has a servicing contract with the manufacturer, usually the receiving party identified in the second iteration of the N1 loop. The REF segment in the N1 loop can contain the identity of this servicing contract between the two parties.

1/0800 The PER segment within the N1 loop of the heading area is used to refer to an individual for administrative purposes. It is not intended to be the one with whom technical issues would be discussed. The technical contacts would be contained in the PER segment within the N1 loops in the detail area. PER02 can be used to identify a person by name or job function or department.

2/0100 The LX loop represents an individual claim. Normally a claim will be for an independent product, assembly, subassembly, or component. However, a single claim also can be used for a group of similar products to be submitted to a single party.

2/0200 N902 in the first or only occurrence of a N9 segment at this position in the LX loop must contain the reference number for all charges in this iteration of the LX loop.

2/0300 The LIN loop must be used to describe the product being serviced. The LIN segment contains 235-234 data element pairs that can be used to identify the product manufacturer

(MF), model number (MN), serial number (SN), equipment identification number (EM), vehicle identification number (VV), model year (RY), etc.

2/0400 The PID segment provides capability for further description of a product that cannot be described in an LIN segment. PID03 to PID05 can be used to described these features, such as the cab configuration of a vehicle.

2/0450 The LOC segment is used to describe the position of equipment within a structure or an assembly, subassembly, or part within a piece of equipment in space relative to an origin. For example, it could describe the location of a telephone switch within a building and of an individual circuit card within the switch by giving the position of a drawer within a rack within a switch.

2/0500 The QTY segment in the LIN loop reflects the quantity of items that do not have a serial number and are being serviced together under one repair order. For all items with a serial number, the value to be used is either explicitly or implicitly set to one. It also can specify the current service life such as miles, kilometers, or hours of the product being serviced.

2/0600 The DTM segment could contain product related dates such as product delivery date (035), acceptance date (301), service requested (211), returned to customer (212), purchased (304), and manufacturer (094).

2/0700 The REF segment provides additional data about the product, its registration data and servicing environment that don't fit well within the LIN segment either because it requires too much extraneous data to be sent or the required codes are not available in the codes lists of the data elements within the LIN segment, but are available within the Reference Number Qualifier data element used in the REF segment.

2/0800 The PER segment lists the contact at the servicing location for technical questions regarding the repair or condition of the product. This could be the service manager or service technician.

2/0900 The PSC segment describes the status of the warranty, the type of warranty, recall notice, service bulletin, or service contract or other conditions for the product that could allow a service claim in effect at the time of service, if any. It also identifies the service contract number in PSC05. The PSC segment is used to describe the period of the warranty or service contract.

2/1000 The SSS segment can be used to describe conditions such as carry-in or on-site service.

2/1040 The LM/LQ loop provides the capability to use an industry or company code list to specify the area of the product under repair.

2/1100 The N1 loop will be used to specify the parties involved with the item being serviced. It could be the registered owner (RW), the one who requested service (SQ), the one who is to be notified when the service has been completed (N1), the item's owner (OW), the initial dealer (ID), or any combination of them. The N1 loop is optional. If the product had been registered, the ownership data should already be available and can be accessed by the model and serial numbers that are placed in the LIN segment. The N1 loop also can be used to identify individuals in the service shop associated with this claim. For example, it could be used to identify the individual who received the item from the customer and wrote the repair order (OE). Another possible use for the N1 loop is to identify who pre-approved the claim. The N9 segment within the N1 loop would be used for the appropriate authorization number.

2/1600 The PER segment in the N1 loop can give the communications contact information, such as telephone number, of an owner's representative (OS) who can supply additional information about the complaint.

2/1700 The PRR loop describes the reported problem. It can be a product recall or service bulletin as well as a customer complaint. Each iteration of the PRR loop describes a single problem. The complaints should be in a coded format contained in PRR04 so that the transaction can be processed by a computer program. The PRR segment can have a code that describes the urgency or severity of the problem.

2/1800 If necessary, the LIN segment describes the portion of the entire product causing the complaint. For example, it may be a subassembly or component. If more than one subassembly is having a problem, each would be identified in a separate PRR loop. The LIN segment contains 235-234 data element pairs that can be used to identify the product manufacturer (MF), model number (MN), and serial number (SN).

2/1850 The LOC segment is used to describe the position of equipment within a structure or an assembly, subassembly, or part within a piece of equipment in space relative to an origin. For example, it could describe the location of a telephone switch within a building and of an individual circuit card within the switch by giving the position of a drawer within a rack within a switch.

2/1900 The QTY segment can specify the quantity of components or subassemblies that do not have a serial number and are being serviced together under one service order. For all items with a serial number the value to be used is either implicitly or explicitly set to one. The QTY segment can also specify the current service life of the component or subassembly, such as mileage or time. The equivalent information regarding the entire product should be contained in the QTY segment within the LIN loop.

2/2000 The DTM segment can be used, for example, to report the time of failure (319) or when service was performed on the unit (302).

2/2100 The MSG segment can be used to describe the customer's complaint. Non-standard complaints that can't be coded in PRR04 can be placed here. This, however, limits the possibility of having a computer completely process the claim.

2/2200 The RC segment can specify the principle part involved in the failure in RC02. If a part number is specified in RC02, then the condition of the part must be included in either RC06 or RC07. Any free-form description of the root cause should be included in RC08. The use of RC08 will probably require human analysis. It may be that a root cause is entitled only to fixed reimbursement.

2/2300 The PER segment lists the contact at the servicing location for technical questions regarding the repair condition of the component or subassembly.

2/2400 The PSC segment describes the status of the warranty, the type of warranty, recall notice, service bulletin, or service contract or other conditions for the assembly or subassembly that could allow a service claim in effect at the time of service, if any. If the assembly or subassembly has a separate service contract that is different than that for the entire product, it can be identified in PSC05.

2/2500 The SSS segment can be used to describe conditions that pertain only to the assembly or subassembly.

2/2600 The CID segment describes a particular portion of the product which has individual test specifications. For example, the tuner in a television set.

2/2700 The TMD segment specifies a code test procedure which will be used in the analysis of the customer's complaint.

2/2800 The MEA segment provides the results of any testing done before performing the service. Unless noted otherwise, this same test usually will be performed at the completion of the service activity. The preceding CID specifies the test conditions.

2/2900 Some tests may require being run at various intervals of time. The time the separate tests were run is specified here.

2/3000 The LIN segment can contain the identity of the test equipment, if significant.

2/3100 The REP loop is used to describe the actions that were taken in servicing a problem. There can be a separate REP loop for each individual repair action, such as for each part replaced or individual adjustment. If this repair was the result of a service bulletin, then the bulletin number would be specified in REP03. A repair action can be identified in REP08 or REP09. For example, it could be the replacement of a part or assembly (RT), performing a calibration (CL), performing an alignment (AL), soldering a component (SD), etc. The repair action

(REP08) should be in a coded format so that the transaction can be processed by a computer program. REP01 can be used to identify the repair action line number for use in the product service claim response in LIN09 to identify this individual repair action.

2/3200 If you want to refer to a problem or a repair listed earlier in the transaction, REF02 provides an identifier to the relevant PRR loop (PRR01) or to a relevant earlier REP loop (REP01). REF01 would contain the qualifier of "prior identifier". For example, if this is an REP loop to calibrate a circuit because a printed circuit board was replaced, REF02 would be used to refer to the REP loop where the printed circuit board was replaced. This also could be used to refer to a reported problem by referencing PRR01.

2/3300 The N1 segment provides an identifier to the individual or organization that authorized this particular repair.

2/3400 The root cause, specified by the RC - Root Cause segment, is the ultimate reason why this particular repair action had to be performed. For example, a loose lubrication fitting could result in the loss of lubricant which caused an assembly to fail. The root cause of this particular repair action then would be the loose lubrication fitting.

2/3500 The DTM segment specifies dates and, if necessary, times that are important to the service operations performed on the product. For example, it can include the time service was requested, when the product was presented for service, the actual repair start and stop times, and when the product was returned to the customer after the completion of the service. Such detailed time information could be vital if there was a service contract that had a penalty if the item was out of service for more than a specified period of time.

2/3550 The LIN segment within the REP loop is intended to be used to specify the parts used in the service action. The manufacturer, model and serial number, location on product, etc. can be specified.

2/3600 The MSG segment can be used to describe a non-standard repair action. This, however, limits the possibility of having a computer completely process the claim. The use of a standard repair action in REP08 rather than putting a reason in an MSG segment allows computer processing of the claim.

2/3650 The LM/LQ loop provides the capability to use an industry or company code list to specify the area of the product under repair.

2/3700 The MEA loop is for any tests that are run at the completion of the repair to prove that the product is now able to operate within the specifications as given in the CID loop within the PRR loop above. The function of segments within this MEA loop are the same as in the MEA loop above.

2/3800 This is used, for example, when time is significant in the test procedures.

2/3900 The LIN segment can contain the identity of the test equipment, if significant.

2/4000 The IT1 segment is used to specify a charge associated with the servicing of one item. For example, each of the individual parts or assemblies can be specified by part number. It also can list the labor operation number and the standard labor hours for this repair. Each occurrence of IT101 within a single transmission must be a unique alphanumeric string. Therefore, it is possible, but not required, to use sequential numbers as the identifier in IT101.

2/4050 The LIN segment within the IT1 loop is intended to be used to specify the parts or supplies that are being charged against the service action.

2/4100 The N1 segment is the source of a purchased replacement part.

2/4200 The N9 segment, if necessary, can contain the invoice number for the purchased replacement part. It refers back to the previous N1 segment which identified the source of the part.

2/4300 The PRT segment specifies the actual or specified disposition of the replaced part identified by the IT1 loop.

2/4400 The ITA segment specifies summary charges for each REP loop. This can include any special service charges, a minimum labor charge, and miscellaneous charges.

2/4500 AMT01 contains the amount claimed for this LX loop. The AMT loop contains financial data for the entire claim. Of course, the transmission could have been composed of more than one claim. If so, table 3 will contain the summary financial data for the entire transaction.

2/4600 The TXI segment specifies the taxes, usually sales tax, for each of the taxing jurisdictions that can be involved in this particular claim.

2/4700 One or the other of the CUR segments in table 2 or 3 can be used, but not both. In table 2, CUR represents the currency in a single iteration of the LX loop. In table 3, it represents the currency for the entire transaction. CUR segments will only be used if there are two different currencies involved in the claim. For example, the claim is being submitted to a firm in the United States and the work was done in Canada and the claim is to be paid in Canadian funds.

3/0100 The TDS loop in table 3 is used to accumulate the total costs and charges associated with all items being claimed in this single transaction. This loop is placed at the end rather than the beginning of the transaction to supply the grand total and to simplify processing the accumulated values.

3/0200 The TXI segment specifies the taxes, usually sales tax, for each of the taxing jurisdictions that can be involved in this entire transaction.

3/0300 The currency used specifies that for the entire transaction these are the currency conversion rates. The CUR segment in this TDS loop should not be used if the CUR segment was used in one or more iterations of the preceding AMT loop. That would have indicated that some of the individual claims within this transaction were to be paid in one currency and others in another currency.

143 - Product Service Notification

FUNCTIONAL GROUP=**WA**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Product Service Notification Transaction Set (143) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit either a mandatory or a voluntary recall. While the recall transaction could be sent to a consumer, it is more likely to be sent to a servicing organization to provide them notice of the recall and to establish their authority to service the items specified in the recall notice. It could be sent to the seller if they are required to notify the purchaser, and it could be sent to an owning organization where they are capable of receiving EDI transactions, such as a large fleet owner of automobiles. It could be a recall from the distribution channel of products. One recall notice is limited to one set of items sharing the possibility of the same problem.

The notice also can be a service bulletin which could specify a repair, engineering change, a field replacement, or other such action to a product. The service action could be specified for the next time that product is being serviced. It could just as well specify that the action must take place as soon as possible or it could be at a specified particular date and time so as to coordinate the change at many product locations. This could happen, for example, in an interconnected computer system or a telephone switching system.

	5200	SE	Transaction Set Trailer	M	1	

Notes

1/0200 BGN02 is used as an initial reference for this transaction. BGN03 defines the date of this Product Service Notification transaction.

1/0300 The DTM segments, if used, contain sequentially the date by which the work should be completed.

1/0500 The N1 loop defines the party submitting the product recall notice or service bulletin and the succeeding iterations reference the parties to whom the recall notice or service bulletin is to be sent. When there is to be only a single recipient, the N1 loop will be used twice.

2/0100 The LIN segment is used to explicitly describe the item being recalled or on which there is a product service notification. The LIN segment contains 235 - 234 data element pairs that can be used to identify the product manufacturer (MF), model number (MN), serial number (SN), equipment identification number (EM), vehicle identification number (VV), model year (RY), etc.

2/0200 The PID segment provides capability for further description of a product that cannot be described in an LIN segment. PID03 to PID05 can be used to describe these features, such as the cab configuration of a vehicle. PID05 may contain a free-form description of the product. If so, PID01 must be "X." If PID05 is not used, PID01 will be an "S." PID02 will be set to "08," "product." PID06 is not used.

2/0300 The REF segments are used to contain the serial number of the item being recalled or to be serviced, a list of all serial numbers, a range of serial numbers to indicate the first and last items in the sequence being recalled or on which the product service notification has been issued. Obviously, there are other phrases that could be substituted for serial number, such as engineering change number, vehicle identification number, or lot number as used in the case of food or pharmaceutical products. At least one REF, DTM or QTY segment is normally required for each LIN loop. Usually the REF segment in the detail area is used to carry this

information. The REF segment in the header would be used when this is considered administrative information rather than detailed information.

2/0350 The LOC segment is used to describe the position of equipment within a structure or an assembly, subassembly, or part within a piece of equipment in space relative to an origin. For example, it could describe the location of a telephone switch within a building and of an individual circuit card within the switch by giving the position of a drawer within a rack within the switch.

2/0400 The CID segment is used to specify the service characteristics affected by the change to the listed product. CID04 and CID05 are used to describe the characteristics that are affected. CID05, when used, contains a free-form description of the affected characteristic.

2/0500 The DTM segment can be used to specify the first and last manufacturing or ship dates involved in the recall or service bulletin. The DTM segment finds its principal use when no REF segment can be used. That is, when there are no serial numbers that can be used. If desired, the DTM segment can be used in addition to the REF segment.

2/0600 The QTY segment is used to reflect the quantity of items that are being specified in this individual instance of the product service notification, it known, The QTY segment most likely would be used when serial numbers or date codes are not applicable.

2/0650 The PWK (paperwork) segment is used to identify the type, title, and version number of a hard copy report associated with the service bulletin or recall notice. Note that as it is a hard copy document it cannot be processed by a computer. Thus, it is recommended that the use of this segment be avoided.

2/0700 The N1 loop is used to identify any individual or organization who is registered as the person to notify in case of a product recall or for required service, such as an engineering change.

2/0900 The maximum use of the N3 segment has been set at three to allow a separate field for each identifier for the location of a piece of equipment within a facility or of an assembly, subassembly, or part within a piece of equipment. Examples have been found where there are seven individual items of location required. If the count for the N3 segment was smaller, it would be necessary to concatenate some of this information.

2/1100 The REF segment identifies the serial number of the items involved in the notification under the control of the party named in the N1 segment. This could be a fleet owner or dealer for automobiles.

2/1250 The QTY (quantity) segment is used within the N1 loop to identify the total quantity of the parts, sub-assemblies, assemblies, or products located at the address specified in the N1 loop.

2/1300 The PRR loop is used to identify the problem or problems that caused this recall, change notice, or service bulletin. One single problem may require the PRR segment to be repeated several times. The PRR segment can contain a code that describes the urgency or severity of the problem. If the problem is with the product, the PRR segment would be required. However, if the problem is in a subassembly, it will be necessary to use the SLN loop. When the SLN loop is used its PRR loop becomes mandatory. Thus, either the PRR loop in the basic LIN loop is required or the PRR loop within the SLN loop is required. Seldom would both be required within a single occurrence of the transaction.

2/1400 The MSG segment is used for additional textual information with respect to the problem report that cannot be coded or as may be required by law or as needed to completely cover notification or product change reason information. It is carried within MSG01. The multiple use of the MSG segment allows the instructions to be as long and complex as required. It is good practice to not allow sentences to straddle the boundary of the MSG segment. It is virtually imperative that individual words do not cross the boundary of an MSG segment. It must be noted that normally it is not possible to process the textual information contained in the MSG with a computer program. Thus, it is much better to use coded data.

2/1430 The N9 loop within the PRR loop is used to identify the additional free-form messages in the following MSG segment with regard to the problem, feature, change, etc. that is affected.

This would be used rather than the previous MSG segment only when discrete identifiers must be associated with the messages. It is capable of containing a date and time associated with the message.

2/1450 The MSG segment is used for additional textual information with respect to the problem report that cannot be coded or as may be required by law or as needed to completely cover notification or product change reason information. It is carried within MSG01. The multiple use of the MSG segment allows the instructions to be as long and complex as required. It is good practice to not allow sentences to straddle the boundary of the MSG segment. It is virtually imperative that individual words do not cross the boundary of an MSG segment. It must be noted that normally it is not possible to process the textual information contained in the MSG with a computer program. Thus, it is much better to use coded data.

2/1500 The REP segment or segments are used to describe the recommended repair action or the return to the manufacturer for this iteration of the PRR loop

2/1600 The MSG segments within the REP loop are used to describe verbally a service action whenever the repair or product change service instructions can not be encoded. The MSG segments are associated with the previous REP segment. The use of the multiple MSG segment allows the instructions to be as long and complex are required. It is good practice to not allow sentences to straddle the boundary of an MSG segment. It is virtually imperative that the individual words do not cross the boundary of the MSG segment. It must be noted that the use of the MSG segment is an inhibitor for full computer processing of the transaction set. Thus, coded values should be used whenever possible.

2/1700 The QTY segment within the REP loop is able to contain the service hours required for this repair action. They can be either the hours allowed or the actual service hours.

2/1800 The N9 loop within the REP loop is used to identify the additional free-form messages in the following MSG segment with regard to the repair or change action that is affected. This would be used rather than the previous MSG segment only when discrete identifiers must be associated with the messages. It is capable of containing a date and time associated with the message.

2/1900 The MSG segment within the N9 loop within the REP loop is used whenever there are further service instructions that must be uniquely identified by the preceding REF segment. The multiple use of the MSG segment allows the messages to be as long as required.

2/2000 The PRT loop is used to identify the disposition of a product assembly, subassembly, or part and where to ship them.

2/2100 The following Nn segments can be used to tell where to return a product or assembly or to send it for disposal.

2/2500 The REF segment can contain the return authorization code.

2/2700 The ITA segment specifies if there is to be a credit adjustment or fixed amount for a required repair or engineering change.

2/2900 The SLN loop is used to describe assemblies or subassemblies or parts within an assembly that may be the specific cause of the product service, change notice, or recall notification, in whatever assembly they appear. If they appear in more than one product family, each product family would required a separate transaction, although they could be grouped within a single transmission. It would be unusual to find problems or engineering changes reported in both the basic LIN loop and its SLN loop.

2/3000 The REF segments are used to contain the serial number of the item being recalled or to be serviced, a list of all serial numbers, a range of serial numbers to indicate the first and last items in the sequence being recalled or on which the product service notification has been issued. Obviously, there are other phrases that could be substituted for serial number, such as engineering change number, vehicle identification number, or lot number as used in the case of food or pharmaceutical products. At least one REF, DTM or QTY segment is normally required for each LIN loop. Usually the REF segment in the detail area is used to carry

information. The REF segment in the header would be used when this considered administrative information rather than detailed information about the product.

2/3050 The LOC segment is used to describe the position of equipment within a structure or an assembly, subassembly, or part within a piece of equipment in space relative to an origin. For example, it could describe the location of a telephone switch within a building and of an individual circuit card within the switch by giving the position of a drawer within a rack within the switch.

2/3100 The DTM segment can be used to specify the first and last manufacturing or ship dates involved in the recall or service bulletin. The DTM segment finds its principal use when no REF segment can be used. That is, when there are no serial numbers that can be used. If desired, the DTM segment can be used in addition to the REF segment.

2/3200 The N1 loop is used to identify any individual or organization who is registered as the person to notify in case of a product recall or for required service, such as an engineering change.

2/3600 The REF segment identifies the serial number of the items involved in the notification under the control of the party named in the N1 segment. This could be a fleet owner or dealer for automobiles.

2/3800 The PRR loop is used to identify the problem or problems that caused this recall, change notice, or service bulletin. One single problem may require the PRR segment to be repeated several times. The PRR segment can contain a code that describes the urgency or severity of the problem. If the problem is with the product, the PRR segment would be required. However, if the problem is in a subassembly, it will be necessary to use the SLN loop. When the SLN loop is used its PRR loop becomes mandatory. Thus, either the PRR loop in the basic LIN loop is required or the PRR loop within the SLN loop is required. Seldom would both be required within a single occurrence of the transaction.

2/3900 The MSG segment is used for additional textual information with respect to the problem report that cannot be coded or as may be required by law or as needed to completely cover notification or product change reason information. It is carried within MSG01. The multiple use of the MSG segment allows the instructions to be as long and complex as required. It is good practice to not allow sentences to straddle the boundary of the MSG segment. It is virtually imperative that individual words do not cross the boundary of an MSG segment. It must be noted that normally it is not possible to process the textual information contained in the MSG with a computer program. Thus, it is much better to use coded data.

2/4000 The REP segment or segments are used to describe the recommended repair action or the return to the manufacturer for this iteration of the PRR loop.

2/4100 The MSG segments within the REP loop are used to describe verbally a service action whenever the repair or product change service instructions cannot be encoded. The MSG segments are associated with the previous REP segment. The use of the multiple MSG segment allows the instructions to be as long and as complex as required. It is good practice not to allow sentences to straddle the boundary of an MSG segment. It is virtually imperative that the individual words do not cross the boundary of an MSG segment. It must be noted that the use of the MSG segment is an inhibitor for full computer processing of the transaction. Thus, coded values should be used whenever possible.

2/4200 The QTY segment within the REP loop is able to contain the service hours required for this repair action. They can be either the hours allowed or the actual service hours.

2/4300 The PRT loop is used to identify the disposition of a product assembly, subassembly, or part and where to ship them.

2/4400 The following Nn segments can be used to tell where to return a product or assembly or to send it for disposal.

2/4800 The REF segment can contain the return authorization code.

2/5000 The ITA segment specifies if there is to be a credit adjustment or a fixed amount for a required repair or engineering change.

144 - Student Loan Transfer and Status Verification

FUNCTIONAL GROUP=**LT**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Student Loan Transfer and Status Verification Transaction Set (144) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used by lending institutions ("lenders"), guarantee agencies ("guarantors"), and secondary markets to send and receive information regarding the transfer of ownership of a student loan. It can also be used to verify the status of a student loan prior to and subsequent to the purchase of the loan.

The loan status verification and transfer data includes, but is not limited to, borrower, student, and loan detail information. A potential purchaser of a student loan would use this transaction set to request information, from the guarantor of the loan, regarding loan status. This transaction set would in turn be used by the guarantor to return the verified loan status information to the requester. Subsequent to the purchase of the loan, this transaction set would be used by the purchaser to notify the guarantor of a transfer of ownership.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT

Notes

1/0900 Use the ENT loop to identify the borrower, student, school, lender, guarantor, servicer, seller, secondary market, or all of the above.

146 - Request for Student Educational Record (Transcript)

FUNCTIONAL GROUP=**RY**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of The Request for Student Educational Record (Transcript) Transaction Set (146) within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used by educational institutions to which a student has applied for admission. This request is then sent to the educational institution which the student is currently attending or previously attended.

Table 1

Notes

1/0300 The ERP segment is used to indicate what type of student record is being requested.
1/0400 The REF segment is used to indicate the student's identification numbers.
1/0700 The SSE segment is used to indicate dates of attendance at the institution receiving the request.
1/0800 The SST segment is used to indicate the date of high school graduation.
1/1000 The N1 loop identifies the sending and receiving institutions.
1/1500 The IN1 loop indicates the name and address of the student.

147 - Response to Request for Student Educational Record (Transcript)

FUNCTIONAL GROUP=**RZ**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of a Response to Request for Student Educational Record (Transcript) Transaction Set (147) within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to advise the requesting institution regarding when the record will be sent or why it will not be sent.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT

Notes

1/0300 The NM1 loop is used to identify the submitter and receiver of the report.

2/0100 HL identifies the appropriate hierarchical level: Reporting Agency (RA), Claim Administrator (AB), Primary Claim Administrator (PA), Secondary Claim Administrator (SA), Insurer (AA), Insured (AC), Contract Holder (CH), Contract Holder Branch (CB), Claimant (CL), Cause of Injury (CI), Source of Injury (SI), Body Part (BP), Nature of Injury (NI), and Payment Detail (PY). All levels are optional.

2/1300 NM1 segment designates the names of the entities represented at that hierarchical level.

2/1830 The ESI segment identifies pre and post injury information, including income and work schedules.

2/2500 The time period applies to all income and work schedules specified within the loop.

2/2700 The LN segment is used primarily by Credit Insurance. Other business lines may also utilize this segment in determining coverage and claim processing.

2/3200 The LX loop allows III Loop at position 3250 or NM1 Loop at position 3500 to be used independently, or represent a "1 to 1", "1 to Many" or "Many to 1" relationship between their respective information.

2/3250 The III segment contains information about the accident or injury or illness or incident.

2/3450 The LM loop specifies the code(s) and code source(s) for Cause of Injury, Source of Injury, Body Part, and Nature of Illness, and or Diagnosis, Occupation Code, or similar coded data consistent with injury, illness, or incident reporting represented at the Claimant or other hierarchical level as appropriate.

2/3500 The NM1 Loop specifies medical provider, witness, supervisor, place of occurrence, third party, and other entities pertaining to Injury, Illness, or Incident detail.

2/4000 The CFI segment specifies benefit payment, recovery, and reserve information at that hierarchical level.

2/4400 The REL segment is used to identify beneficiaries' relationship to the benefit payments or legal benefit compensability and distribution decisions.

2/4460 The AD1 segment specifies benefit adjustments and offsets represented at that hierarchical level.

2/4500 The NM1 segment specifies information about the offset benefits provider, payee, or dependent.

149 - Notice of Tax Adjustment or Assessment

FUNCTIONAL GROUP=**NT**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Notice of Tax Adjustment or Assessment Transaction Set (149) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by a taxing authority to transmit to a taxpayer either a notice of adjustment to a prior tax filing, or a notice of assessment of taxes due to the taxing authority, which may be a notice of warrant.

2/1600 This N1 loop reflects names and addresses associated with a particular subset of a tax form or schedule.

150 - Tax Rate Notification

FUNCTIONAL GROUP=**TN**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Tax Rate Notification Transaction Set (150) for use within an Electronic Data Interchange (EDI) environment. This transaction set can be used by taxing authorities to electronically transmit information concerning tax rates.

Notes

1/0300 The N1 segment is used to identify the name of the taxing authority.

1/0800 The DTP segment is used for the tax rate effective date or period for the entire notification.
2/0200 The DTP segment is used for the tax rate effective date or period for a particular tax form.
2/0210 The MTX segment may be used to transmit required fuel tax footnote information for a specific jurisdiction.
2/0250 The N1 segment denotes the jurisdiction for which the specified tax rate applies.
2/0260 The DTP segment is used for the tax rate effective date or period for a particular tax rate for a jurisdiction.
2/0400 The DTP segment is used for the tax rate effective date or period for a particular subset of a tax form.
2/0800 The N1 segment denotes the jurisdiction for which the specified tax rate applies.
2/0900 The DTP segment is used for the tax rate effective date or period for a particular tax rate for a jurisdiction.

151 - Electronic Filing of Tax Return Data Acknowledgment

FUNCTIONAL GROUP=**TA**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Electronic Filing of Tax Return Data Acknowledgment Transaction Set (151) within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to electronically acknowledge receipt of each tax return filed using the Electronic Filing of Tax Return Data Transaction Set (813) and may indicate any error conditions.

This transaction set can be used by a federal, state, or local taxing authority to acknowledge the status of an electronically filed tax return which has been electronically filed using Transaction Set 813.

Notes

1/0400 The REF segment is used to provide identification numbers for this acknowledgment.

152 - Statistical Government Information

FUNCTIONAL GROUP=**GR**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Statistical Government Information Transaction Set (152) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to report pre-defined statistical government information.

Table 1

Notes

1/0500 This N1 identifies the entity required by specification of the statistical report being submitted.

153 - Unemployment Insurance Tax Claim or Charge Information

FUNCTIONAL GROUP=**CB**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Unemployment Insurance Tax Claim or Charge Information Transaction Set (153) for use within the context of an Electronic Data Interchange (EDI) environment. This bi-directional transaction set can be used by employment security agencies to notify employers or other agencies of a possible charge to their employers' unemployment insurance tax account and by employers responding to the notice with supplemental information that might affect the chargeability of the claim. This transaction set can also be used by employers to notify claimant(s)' representative, e.g., union, to protest a claim.

Notes

1/0300 This N1 segment must identify the employer and may also identify the issuing agency, the employer's representative or the claimant's(s') representative.
1/0700 This REF segment identifies an employer's successor/predecessor account identification.
2/0100 This NM1 loop identifies a claimant.
2/0300 This REF segment is used for the claim number or change to the Social Security Number.
2/0900 This PAM loop reflects wages and/or compensation paid.
2/1000 This REF segment further identifies this wage item.

154 - Secured Interest Filing

FUNCTIONAL GROUP=**UC**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Secured Interest Filing Transaction Set (154) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to file Uniform Commercial Code (UCC) financing statement forms, liens, judgments, and other statements of secured interest, and to exchange secured interest filing information.

155 - Business Credit Report

FUNCTIONAL GROUP=**BC**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Business Credit Report Transaction Set (155) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to transmit business credit information to a trading partner. This transaction set may be used to convey identification, location, financial, payment experiences, banking, suits, liens, judgments and public filing details, operational, affiliate, organizational, credit rating, and other information about a business to support automated business decision processing and update business data bases.

Notes

1/0300 The 10000 loop is used to describe the requestor and the credit reporting agency.

2/0100 The HL segment identifies the appropriate hierarchical level: company, subsidiary, parent company, direct affiliate, indirect affiliate, management, director, chief executive, management details, ultimate parent, property, headquarters, and branches.

2/0200 The N1 segment identifies requested entity on which the business credit report is requested.

2/0800 The NM1 segment specifies individual or business operational names associated with the hierarchical entity.
2/1200 The NX1 segment specifies addresses associated with the hierarchical entity.
2/1700 The YNQ segment provides responses to conditions relating to the entity location referenced in 2/1200.
2/1900 The REQ segment specifies whether location, facilities or real estate description are included.
2/2700 The N1 segment identifies a name associated with the facility or location details referenced in 2/1900. This may be mortgage company lessor, property owner or co-occupant.
2/2900 The INR segment specifies the type of information provided. This includes general categories of operations, summary details, financial information, update details, public records, history, banking, payments, special events, related entity data and insurance plus subcategories of these areas.
2/3900 The YNQ is used to provide responses to conditions relating to information identified in 2/2900.
2/4500 The INQ segment identifies the result of a credit inquiry found when providing information from vendors or financial institutions dependent on the type of information referenced in 2/2900.
2/5400 The NM1 segment specifies names and addresses associated with the details requested in 2/2900.
2/5450 The NX1 segment specifies addresses associated with the details requested in 2/2900.
2/5900 The YNQ segment provides responses to conditions relating to the entity referenced in 2/5400.
2/6050 The LM and III segments specify codes associated with special events, corporate filings, ratings and activity codes.
2/6200 Loop 23310 provides relevant dates and details relating to the type of code identified in 2/6100.
2/6450 The NM1 segment specifies names associated with the changes identified in 2/6100.
2/6600 The REQ segment specifies the type of financial information provided.
2/6900 The YNQ segment provides responses to conditions relating to the information requested in 2/6600.
2/7000 The API segment provides current activity or process codes on a specific public record item relating to the type identified in 2/2900.
2/7500 The LM and III segments specify codes associated with the record item.
2/7800 The CRC segment indicates whether the amounts provided in 2/7850 regarding the specific public record items relating to the type identified in 2/2900 relate only to the company identified in 2/0200 or are totals for the public record item.
2/7900 The NM1 segment specifies names and addresses associated with the public filing.
2/8350 The YNQ segment provides responses to conditions relating to the entity referenced in 2/7900.
2/8450 The IN1 segment specifies names and addresses associated with the names in 2/7900.
2/8750 The CED segment identifies an event relating to the specific public record item relating to the type identified in 2/2900.
2/8900 The NM1 segment specifies name associated with changes, specifically author of bankruptcy plan.
2/9000 The LM and LQ segments specify codes associated with public filing events.

157 - Notice of Power of Attorney

FUNCTIONAL GROUP=**NP**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Notice of Power of Attorney Transaction Set (157) for use within the context of an Electronic Data Interchange (EDI) environment. This bi-directional transaction set can be used to notify entities of the existence of a power of attorney and to provide information as to its applicability. The transaction set may also be used to acknowledge powers of attorney or their cancellation.

Table 1

	1500	PER	Administrative Communications Contact	O	>1	
	1600	DTM	Date/Time Reference	O	>1	
	1700	SE	Transaction Set Trailer	M	1	

Notes

1/0300 The N1 loop identifies the sender and receiver of the transaction set.

2/0100 Each transaction set must contain at least one HL loop at the Agent Level. Each HL loop at the Agent Level must have at least one subordinate HL loop at the Principal Level.

2/0100 HL01 (Hierarchical ID Number) will be assigned sequentially within the hierarchy starting with one and incremented by one for each HL segment.

2/0100 HL03 (Hierarchical Level Code) may only contain the codes: AG (Agent Level) and PR (Principal Level), where the Agent is the party to whom Power of Attorney is being granted, modified, or revoked, and the Principal is the party on behalf of whom Power of Attorney is being granted, modified, or revoked. The Principal Level is always subordinate to the Agent Level.

2/0200 The NM1 segment describes the Agent to whom Power of Attorney is being granted, modified, or revoked, when occurring within an HL loop at Agent Level. The NM1 loop describes the Principal, who is the party on whose behalf Power of Attorney is being granted, modified, or revoked, when used within an HL loop at Principal Level.

2/1000 The SPY loop identifies the scope of the power of attorney, and the action requested.

158 - Tax Jurisdiction Sourcing

FUNCTIONAL GROUP=**TJ**
SUBCOMMITTEE=**F**

This Draft Standard for Trial Use contains the format and establishes the contents of the Tax Jurisdiction Sourcing Transaction Set (158) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to transmit any address, in US Postal Service format, from a wireless telecommunications vendor to the holder of tax jurisdiction sourcing information for the state in which the address resides, and to receive in return a sourcing of all tax jurisdictions which have governance over the address in question.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT
	0100	ST	Transaction Set Header	M	1	
	0200	BGN	Beginning Segment	M	1

N	0900	ASI	Action or Status Indicator	O	1	
	1000	SE	Transaction Set Trailer	M	1	

Notes

1/0300 The N1 segments are used to provide the sender and receiver of the transaction set.

1/0400 The DTP segment is used to provide the effective date range of the sourcing information.

1/0600 The NX2 segments are used to provide the address or address ranges being sourced.

1/0700 The PPA segment is used in a response transaction only, to provide the FIPS-55 Named Populated Places standard codes applicable to the address.

1/0800 The TA segments are used in a response transaction only, to identify all special taxing districts applicable to the address.

1/0900 The ASI segment is used in a response transaction only, to indicate that information related to the Address requested could not be provided.

159 - Motion Picture Booking Confirmation

FUNCTIONAL GROUP=**MP**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Motion Picture Booking Confirmation Transaction Set (159) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to confirm Motion Picture business terms, conditions, and licensing agreement information from distributor to exhibitor.

Table 1

3000	SE	Transaction Set Trailer	M	1			

Notes

1/0300 The N1 segment provides identification of the sender and receiver.
1/1400 The DTP segment specifies the beginning and ending playdates.

160 - Transportation Automatic Equipment Identification

FUNCTIONAL GROUP=**SJ**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Transportation Automatic Equipment Identification Transaction Set (160) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to allow participants to share automatic identification equipment information and data at interchange points.

Table 1

161 - Train Sheet

FUNCTIONAL GROUP=**TR**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Train Sheet Transaction Set (161) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to allow railroads to exchange train sheet information and ensure that crews operating equipment on other railroads are aware of current operating conditions.

Table 1

170 - Revenue Receipts Statement

FUNCTIONAL GROUP=**ER**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data content of the Revenue Receipts Statement Transaction Set (170) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to report daily ticket sales information for each show within a contract week. A contract week is normally a Friday through Thursday and is the period a film is shown in a theatre. Daily information is presented by show and includes ticket category, price, attendance and time of entertainment events.

The transaction set is designed to report multiple levels of detail from individual points of occurrence or form consolidated points such as holding companies (circuits).

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT
	0100	ST	Transaction Set Header	M	1	
N	0200	N1	Party Identification	M	1

	0800	BOX	Box Office Detail	M	250	
	0900	SE	Transaction Set Trailer	M	1	

Notes

1/0200 The N1 segment is used for the Theater or circuit name.

1/0600 The REF segment is used to reference Picture and Name and can be repeated so that multiple films can be recorded.

175 - Court and Law Enforcement Notice

FUNCTIONAL GROUP=**FC**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Court and Law Enforcement Notice Transaction Set (175) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to notify interested parties about important court events and actions related to a specific court case. It may also be used to transmit information about a specific law enforcement or administration of justice event to interested parties. This may include events like case dispositions, notices about criminal offenses, accidents or incidents, arrest warrants, court orders, and administrative actions.

Notes

1/1100 CDS describes a different case, usually from a different court or agency, related to a specific administration of justice event.

176 - Court Submission

FUNCTIONAL GROUP=**FC**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Court Submission Transaction Set (176) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to submit a legal document or claim and supporting documentation to a court or other designated recipient. It can be transmitted to the submitter to indicate the date and docket information assigned, or it can be transmitted to the submitter to indicate claim disposition or an opinion deciding a case.

179 - Environmental Compliance Reporting

FUNCTIONAL GROUP=**EP**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Environmental Compliance Reporting Transaction Set (179) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by commercial and public facilities to submit environmental compliance reports to the Environmental Protection Agency and state and local environmental agencies. The transaction set can also be used to forward data or exchange environmental compliance data amongst environmental agencies at all levels of government, and to return status to the submitter.

180 - Return Merchandise Authorization and Notification

FUNCTIONAL GROUP=**AN**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Return Merchandise Authorization and Notification Transaction Set (180) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can provide for customary and established business and industry practice relative to the returning of merchandise to the vendor. This transaction set may satisfy request for returns, authorization or disposition of the return, notification of return, or notification of consumer return.

Notes

2/0100 Quantity is specified either in the BLI segment (BLI03) or in the QTY segment.
2/1400 The N1 segment is used to identify the location of the material specified in the QTY loop.
2/1700 The LX loop conveys serial number, lot number and inventory data.

2/2000 The N1 segment identifies the name of the manufacturer associated with the serial or lot number specified in the LX loop.

185 - Royalty Regulatory Report

FUNCTIONAL GROUP=**RD**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Royalty Regulatory Report Transaction Set (185) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide royalty regulatory data for extraction of minerals and petroleum products from leased property. The data can be sent to federal and state government agencies to meet regulatory requirements. The data can be exchanged between private industry trading partners for information purposes.

1/0400 N1 can be used to identify the sender.

186 - Insurance Underwriting Requirements Reporting

FUNCTIONAL GROUP=**UW**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Insurance Underwriting Requirements Reporting Transaction Set (186) for use within the context of an Electronic Data Interchange (EDI) environment. The standard can be used by the information providers to report the results of specific services to their trading partners for information to complete the insurance underwriting process on individually underwritten life and health insurance.

	7800	SE	Transaction Set Trailer	M	1				

Notes

1/0300 The CUR segment is used to designate the currency type used in monetary amounts in the transaction set.

1/0400 The LTR segment allows for transmitting expected ranges for all occurrences of a test in the transaction set.

1/0500 The 1000 loop allows for identifying the sender and the receiver of the message and their respective account numbers.

1/0800 The REF segment is used to convey regulatory licensing identification.

2/0100 The 2000 loop occurs for each insurance company account, division, etc.

2/0200 The 2050 loop contains information about the proposed insured.

2/0300 The 2075 loop identifies the proposed insured, including social security number. Additional 2075 loops can be used to identify additional entities associated with the proposed insured's application for insurance such as the agent or underwriter.

2/0400 The REF segment includes the insurance company's identification (application number, policy number, etc.).

2/0500 The N3 segment applies to the individual applicant identified in the NM1 segment at 2/0300.

2/0600 The N4 segment applies to the individual applicant identified in the NM1 segment at 2/0300.

2/0700 The DMG segment applies to the individual applicant identified in the NM1 segment at 2/0300.

2/0900 The AM1 segment is used to describe the insurance coverage being requested. The AM1 segment is also used to advise report costs.
2/1000 The PWK segment is used to indicate that additional paper reports have been sent.
2/1200 The DMA segment applies to the individual applicant identified in the NM1 segment at 2/0300.
2/1300 The QTY segment applies to the individual applicant identified in the NM1 segment at 2/0300.
2/1400 The 2100 loop repeats for each individual report. The BOR segment includes the type of report and laboratory/information provider report number.
2/1600 The MSG segment sends the narrative version of the individual report as required by the Fair Credit Reporting Act.
2/1700 The 2150 loop is to identify entities involved in creating the report. If this data goes through a clearinghouse, this segment can also be used to maintain the original information provider which was originally stored in the NM1 at 1/0500.
2/1800 The REF segment is repeated to capture multiple identification numbers for the entity identified in the NM1 at 2/1700.
2/2200 The DMA segment identifies the language spoken by the proposed insured.
2/2300 The REL segment identifies the relationship between the proposed insured and interpreter.
2/2400 The 2200 loop is used to describe the specimen received by the laboratory.
2/2900 The 2250 loop is used to identify the firm which collected and forwarded the specimen and the paramedic who collected the specimen.
2/3100 The 2300 loop repeats for each individual test being reported and provides the results for each test.
2/3400 The NM1 segment identifies the individuals or laboratory locations responsible for an individual test.
2/3600 The 2350 loop categorizes the information being reported in this and subordinate loops.
2/3700 The 2400 loop allows relationships among hierarchically-related groups of information about the insurance applicant.
2/3800 The UQS segment allows information providers to send unique questions.
2/6700 The 2450 loop contains binary data of medical images such as heart chart, ECG, etc.
2/7000 The bounded 2500 loop allows the signature(s) and identifying information for multiple people.
2/7000 The UD segment identifies the status of the signature if not included in this transaction.
2/7300 The REL segment identifies the relationship between the signee and the proposed insured.
2/7400 The DTP segment indicates the date the signature was signed.
2/7500 The 2550 loop contains binary data representing a signature and identifying information.

187 - Premium Audit Request and Return

FUNCTIONAL GROUP=**AE**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Premium Audit Request and Return Transaction Set (187) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to communicate premium audit information between property and casualty insurers, and independent premium audit service providers. This information includes, but is not limited to: premium audit request information (i.e., type of audit being requested, policyholder name, business locations, class codes, estimated exposures, date of coverage, producing agency, endorsements); and completed audit information (i.e., actual classification codes and exposures, description of operations, sources of financial information, subcontractor exposures) for the auditable general liability, commercial automobile and worker's compensation lines of insurance.

Notes

2/0100 At least one occurrence each of the insurer level, company/corporation level, and insurance policy level is required. The insurer level and the company/corporation level will always be the first two hierarchical levels and must be in that (hierarchical) order. If the premium audit is documented by location, the insurance policy level will immediately follow the location record level. If the premium audit is documented by policy, the insurance policy level will immediately follow the company/corporation level or the operating unit level, whichever is the lower level to which the hierarchy extends.

2/0100 The location record level is optional. If the premium audit is documented by location and the operating unit level is NOT used, the location record level will immediately follow the company/corporation level. If the operating unit level is used, the location record level will immediately follow that level. If the premium audit is documented by policy, the location record level will immediately follow the insurance policy level.

2/0100 The operating unit level is optional and if used, must immediately follow the company/corporation level.

2/0100 The provider of service level, employee level, and vehicle level are all optional and are hierarchically equal. If the premium audit is documented by location, any of these levels (if used) would be a child of the insurance policy level and would immediately follow (in any order) the insurance policy level. If the premium audit is documented by policy any of these levels (if used) would be a child of and would immediately follow either the insurance policy level or the location record level, whichever is the lower level to which the hierarchy extends.

2/0100 The support document level is optional and when used, will always immediately follow the provider of service level.

2/0100 Valid codes for HL03 to define levels for this transaction set are given below: AA - Insurer 19 - Provider of Service 34 - Location Record 35 - Company/Corporation 36 - Operating Unit 64 - Employee 65 - Insurance Policy 66 - Vehicle SD - Support Document

2/0200 Loop 2100 is used (at HL35 or HL65) to encapsulate loop 2120 for the attachment of premium audit data in formats external to the transaction set (e.g., an electronic spreadsheet file). At HL66 it contains information on vehicles being audited.

2/1800 Loop 2200 contains information to identify the insurer (HLAA), the insured (HL35), the insured business (HL36), an insured location (HL34), an insurance policy (HL65), an employee (HL64), a subcontractor (HL19), or a vehicle garaging location (HL66).

2/2800 Loop 2300 contains premium audit detail information related to the insured business records (HL36), an insured location (HL34), an insurance policy (HL65), split audits (HL65), officer compensation (HL65), endorsements (HL65), classification codes (HL65), premium modifications (HL65), audit notes information (HL65), an employee (HL64), a subcontractor, (HI19) or subcontractor insurance coverage (HLSD).

2/4200 Loop 2310 contains supporting detail by specified date for an insurance policy (HL65) or an employee (HL64).

2/4800 Loop 2320 contains quantitative detail necessary to the audit of certain types of insurance policies (HL65).

2/5000 Loop 2330 contains monetary or financial detail necessary to the audit of certain types of insurance policies (HL65).

2/5400 Loop 2340 contains information to identify the issuing insurer (HLAA), the insured business records location (HL36), the insured location records location (HL34), the producing agent (HL65), various state jurisdictions applicable to an insurance policy (HL65), or the insurance carrier for a subcontractor (HLSD).

2/6300 Loop 2350 contains information to document the premium auditor's time and fee, either for audits to be billed by the policy (HL65) or those to be billed by location (HL34).

188 - Educational Course Inventory

FUNCTIONAL GROUP=**EC**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Educational Course Inventory Transaction Set (188) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by schools and school districts and by postsecondary educational institutions to request and to transmit information about educational courses that are currently being offered or that have been offered in the past by the school, school district or postsecondary institution.

Notes

1/0300 The N1 loop indicates the sending and receiving institutions.
1/0800 The CSE loop indicates information about the educational course.
1/1100 The REF segment provides an additional identifier by which an educational course is known.

189 - Application for Admission to Educational Institutions

FUNCTIONAL GROUP=**AF**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Application for Admission to Educational Institutions Transaction Set (189) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set contains all the information, except for official transcripts, that students use to apply for admission to educational institutions. The individual student may send the application for admission directly to the educational institution. In addition, entities other than the student may route or handle the application for admission. These entities include high schools, high school counselors, admission application service providers and clearinghouses, other educational institutions, testing agencies, and recommenders.

Notes

1/0300 The N1 loop provides information about the sender and the intended receiver.

2/0100 The REF loop contains reference numbers for the applying student.

2/0200 The DTP segments contain issuance dates, or effective and expiration dates, where applicable, for the reference numbers supplied in the REF segment.

2/0300 The N4 segment identifies the location for which the reference number is effective; for example, the port of entry for issuance of a visa.

2/0400 The N1 segment identifies the organization, where applicable, that produced or issued the reference number; for example, the postsecondary institution that produced the State Department forms for an international student.

2/0500 The IN1 loop provides name, address and other demographic information about the applying student and other individuals related to the student.

2/1300 The III segment allows for additional codified information to be provided about the applying student or an individual related to the applying student. In particular, this segment is used to send religion information where it is appropriate.

2/1500 The N3 loop contains address information for the individual (student, parent, guardian, spouse, etc.) in the IN1 loop. Multiple addresses, such as a mailing address and a home address, are possible for each individual.

2/1700 The DTP segments are the effective and expiration dates for each address.

2/1800 The COM loop contains a contact number, such as home phone number, work phone number, or e-mail address, for the individual (student, parent, guardian, spouse, etc.) identified in an occurrence of the IN1 loop.

2/1900 The DTP segments are the effective and expiration dates for each contact number.

2/2000 The N1 loop provides job and employer information about the individual identified in the occurrence of the IN1 segment.

2/2160 The QTY indicates the amount of time the individual worked within the time period (hour per week, months per year, etc.).

2/2300 The DTP segments allow the applying student to report the beginning and ending dates for involvement in an activity, or the date an award was granted.

2/2400 The AMT loop contains financial support and sponsorship information for international students. The AMT segment contains the amount and type of the financial source or sponsorship.

2/2500 The MSG segment contains a qualifying comment or remark about the funding source in the AMT segment.

2/2600 The SSE loop provides information on the desired entry dates, majors, degree programs, and their relative priority according to the applying student.

2/2900 The RSD loop contains an applying student's responses to questions that will determine whether a student is a resident of a state or province for tuition purposes. The RSD segment contains the residency type question and a response.

2/3000 The N4 segment contains the state, country or province about which the residency question applies.

2/3100 The DTP segments contain the dates the residences type began or ended, or the date the supporting documents were issued.

2/3200 The QTY segment contains the length of time the residency type has been in effect.

2/3300 The REF segment contains the reference number for documents used to support the student's response to the residency type question.

2/3400 The RQS loop provides a means to ask a number of questions of the student. The RQS segment contains the question and the student's response.

2/3500 The MSG segment contains a longer explanation of the student's response when needed; for example, explanatory notes associated with a criminal conviction.

2/3600 The SST loop provides information about the high schools the student attended along with self-reported course work, credit hours, GPA, etc.

2/4500 The TST loop provides self-reported information about which tests the student has taken or is planning to take and any associated scores.

2/4900 The PCL loop provides information about other colleges and universities the student has previously attended or is applying to. Self-reported hours, GPA, and curriculum are also reported here.

2/6200 The MSG segments provide for a student to write essays on a number of topics.

2/6300 The LT loop provides for letters of recommendation and evaluations to be supplied. The LT segment contains the type and the source of the letter of recommendation.

2/6400 The DTP contains the date of the letter of recommendation.

2/6500 The QTY indicates the length of time that the source of the recommendation has known the applying student.

2/7100 The MSG segments contain the text of the recommendation.

190 - Student Enrollment Verification

FUNCTIONAL GROUP=**SV**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Student Enrollment Verification Transaction Set (190) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by guarantee agencies ("guarantors"), lending institutions ("lenders"), educational institutions ("schools"), secondary markets, and others to request and receive information required to verify a student's enrollment status.

Federal regulations require lenders, guarantors, and schools to exchange student enrollment status information. This information includes, but is not limited to, student identification, enrollment status and dates, and school detail. The student's current enrollment status affects various aspects of the student loan process, such as the student's disbursement terms, deferment terms, deferment status, and repayment terms. Other entities such as the Internal Revenue Service, insurance companies and student lending processors require reporting of additional information including student address, grade point average, tuition and expenses paid, and expected degree date in order for students or taxpayers to qualify for certain programs.

Notes

1/0430 The N1 loop identifies the sender and the receiver.

1/0500 The ENT loop identifies the student, taxpayer, school, lender, or guarantor entities.

191 - Student Loan Pre-Claims and Claims

FUNCTIONAL GROUP=**SD**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Student Loan Pre-Claims and Claims Transaction Set (191) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by lending institutions (lenders), secondary markets, or student loan servicers to exchange information with guarantee agencies (guarantors) regarding pre-claims assistance on student loans that are approaching a default status and claim payment requests for defaulted student loans.

This information includes, but is not limited to, borrower identification, loan detail, payment history, and due diligence history. Federal regulations require loan owners to file a pre-claims assistance request as part of their due diligence process, prior to filing a claim for default reimbursement. Loan owners are also required to file specific information to submit a claim payment request.

Notes

1/0300 Use the ENT loop to identify the borrower, student, last school attended, loan holder, servicer, guarantors and other related entities.

1/1300 Use the IN1 loop to identify the spouse, employer, relatives, references, and certification authorities.

1/2000 Use the REF loop to identify the borrower's student loans.

1/2800 Use the IN1 loop to identify the co-signers, co-makers, endorsers, or prior schools.

194 - Grant or Assistance Application

FUNCTIONAL GROUP=**GT**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Grant or Assistance Application Transaction Set (194) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by organizations submitting applications for grants, cooperative agreements, and other assistance. These applications will typically include project, budget, personnel, descriptive, and other related data.

195 - Federal Communications Commission (FCC) License Application

FUNCTIONAL GROUP=**LA**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Federal Communications Commission (FCC) License Application Transaction Set (195) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set provides a uniform, singular, transmittal medium between applicants, coordinators, and license granting authorities, for the submission, acknowledgment of new applications, and the resubmittal of corrections to previously transmitted Federal Communications Commission (FCC) License Application.

Notes

1/0800 The AMT loop can carry various fees and explanations associated with the processing of a Federal Communications Commission (FCC) License Application.

1/1800 The REF loop can carry references to rules and, when applicable, associated statements and eligibility descriptions.

1/2100 The CRC loop answers questions asked in a Federal Communications Commission (FCC) License Application and associates reference numbers to answers given.

2/1500 The CRC loop answers questions asked about the details of a Federal Communications Commission (FCC) License Application and associates reference numbers and dates to the answers given.

196 - Contractor Cost Data Reporting

FUNCTIONAL GROUP=**PK**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Contractor Cost Data Reporting Transaction Set (196) for use within the context of an Electronic Data Interchange (EDI) environment.

This transaction set can be used to support contractor cost reporting requirements for actual costs and estimates at completion associated with major research and development (R&D) and production contracts or programs. This includes nonrecurring and recurring costs by work breakdown structure elements summarizing all activities on a contract or proposal; non recurring and recurring functional cost or hour categories for selected work breakdown structure elements; progress curve (learning curve) information detailing unit or average lot data by functional cost or hour categories; and summary contractor business base information such as indirect expenses, rates, and resources. This information can be used to evaluate contractor proposals, make cost projections of a given program, develop historical data bases to develop statistical techniques, and make independent cost analysis of new acquisitions. This transaction set can be used to convey proposed, initial, progress, updated, or final (end of contract) cost information.

197 - Real Estate Title Evidence

FUNCTIONAL GROUP=**TO**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Real Estate Title Evidence Transaction Set (197) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to transfer the data contained in standard Title Reports, Title Commitments, and Title Policy Forms of the American Land Title Association, as well as the corresponding State Forms or other title evidence formats indicating the results of the title examination process.

Notes

1/0300 The N1 Loop is used to indicate the party sending and receiving the title evidence. This may be a title agent, underwriter, or other office that prepares title evidences.

1/0700 The REF Segment contains the reference numbers of the sending and receiving parties.

2/0100 The PID Loop contains the type and content of the title evidence.

2/0200 The REF Segment contains title evidence numbers.

2/0500 The NM1 Loop provides for the transmission of signature, authorization, corporate seal images, and information.

2/1100 The NX1 Loop is used to provide both an address and legal description for the subject property.

2/1500 The FGS Loop provides for the description of individual schedules within a certain form of title evidence.

2/2000 The IN1 Loop provides title vesting, liability, premium, and information on the insured.

2/2200 The AMT segment provides details on the liability and premium amounts associated with the title insurance product.

2/2500 The LQ Loop provides for the description of title exceptions, requirements, and other specific elements of the title evidence document.

2/2900 The IN1 Loop is the name associated with the title exception.

198 - Loan Verification Information

FUNCTIONAL GROUP=**ME**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Loan Verification Information Transaction Set (198) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to request, validate, or exchange standard loan verification information among entities involved in the loan life-cycle. These entities may include lenders, employers, depository institutions, credit agencies, investors, mortgage insurance companies, and so on.

Notes

1/0300 The N1 loop is used to identify the requestor, respondent, forwarder, and/or any bill-to information.

2/0100 The IN1 loop is used to identify the applicant(s) or borrower(s).

2/0600 The API loop is used to indicate the type of verification.

2/0700 The N1 loop is used to identify the verification entity, i.e., Holder of Account, Income Provider.

2/1200 The PER segment is used to provide contact information for person supplying highest verified income.

2/1300 The AIN segment is used to indicate the highest verified income.

2/1500 The PWK segment is used to define the source documentation used for the verification.

2/1600 The PER segment is used to provide contact information for person supplying or recording verification information.

2/1700 The EMS segment is used to flag current versus previous employment and also indicates the position held.
2/1800 The NTE segment is used to describe a leave of absence or reason for leaving.
2/2100 The AIN loop is used to provide detailed income information.
2/2300 The NX1 loop is used to provide detailed rental or mortgage information.
2/3100 The YNQ segment is used to answer questions relating to the status of a mortgage account.
2/3400 The FAA loop is used to provide detailed deposit information.
2/4000 The CDA loop is used to provide detailed loan information.

199 - Real Estate Settlement Information

FUNCTIONAL GROUP=**TO**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Real Estate Settlement Information Transaction Set (199) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to transfer real estate settlement information among mortgage lenders, real estate closing agents, and other interested parties.

N	3200	PCT	Percent Amounts	O	1		
	3300	SE	Transaction Set Trailer	M	1		

Notes

1/0300 The N1 Loop allows for transmission of information regarding the parties that are sending and receiving the transmission. It can also be used for sending static information regarding the lender, settlement agent, etc. that would hold true for all of the transactions in the transaction file.

1/0700 The REF Segment is used for identifying information further identifying the sender, receiver, or parties identified in the transmission (lender, settlement agent, title underwriter, etc.). This may be a service location, customer/vendor number, contract number, tax identification number, branch identification, etc.

2/0900 The LX Loop allows for the transmission of settlement information for several different real estate transactions to be grouped with a single transmission.

2/1000 The REF Segment is used for identifying the loan number, the settlement agent's identifying number, settlement location identification, title underwriter's policy number, mortgage broker's file number, folder number, etc. for the transaction.

2/1300 The DTM Segment identifies the settlement and disbursement dates.

2/1400 The III Segment identifies the version of the HUD-1 form that is being used for the transaction.

2/1500 The MSG Segment is for designating any specific closing instructions, i.e. documents to be returned, endorsements to be issued, etc.

2/1600 The NX1 Loop is for identifying the street address for the property involved in the transaction or if a street address does not exist, then the legal description can be used.

2/2000 The IN1 Loop is used for identifying the buyers, sellers, lenders, and settlement agents that are party to the transaction.

2/2500 The FGS Loop is used for identifying the various charges and disbursements of funds as part of the real estate closing. These charges are identified by the line number of the charge as they exist on either the HUD-1 or HUD1A forms required by the Real Estate Settlement Procedures Act (RESPA).

2/2600 The AMT Segment is used to represent the dollar amounts involved in the settlement charge. This may be one of the following: a total for a charge, a proration amount used to calculate the charge, or a distribution of the charge. The AMT03 qualifier (debt/credit flag), is used to identify whether the charge is to the buyer or the seller. If it is a debit, the charge is to the buyer, if it is a credit the charge is to the seller.

2/2700 The YNQ Segment is used to identifying whether the charge was paid outside of the closing and does not need to be disbursed by the settlement agent. A "Y" means that the charge was paid outside of the closing.

2/2800 The NM1 Segment is used to specify a payee for a settlement charge.

2/2900 The NTE Segment is used for identifying a description of the charge.

2/3000 The DTP Segment is used to identify beginning and ending dates for prorated charges.

2/3100 The QTY Segment is used to identify the amount of time to be used when calculating prorations.

2/3200 The PCT Segment is used to identify commission rates, loan origination fees (points), and any other charges needing a percentage rate calculation.

200 - Mortgage Credit Report

FUNCTIONAL GROUP=**ME**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Mortgage Credit Report Transaction Set (200) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to transmit the data that comprises a mortgage credit report. It is the electronic response to the Mortgage Credit Report Order Transaction Set (833).

Notes

1/0400 The DTP segment is used to state the original release and last-ordered date.
1/0500 The REF segment is used to state order, case, loan, and data-authentication numbers.
1/0600 The AMT segment records charges for a credit report.
1/0900 The N1 loop is used to describe reporting agency, requestor, repository, and bill-to-info information.
2/0200 The REF segment is used to record an internal control number.
2/0300 The IN1 loop describes applicant's name and aliases.
2/0600 The N10 segment is used to indicate age in number of years or text.
2/0800 The QTY segment is used to state the number and age of dependents.
2/0900 The YNQ segment indicates whether or not the applicant has been interviewed.
2/1000 The NTE segment is used to report any interview comments.
2/1100 The NX1 loop describes details of applicant's current and previous addresses.
2/1600 The YNQ segment indicates whether or not the rent has been verified.
2/1800 The N1 loop describes the names of current and previous employers, tenants, and nonemployment income sources.
2/2500 The YNQ segment indicates whether or not the employer has been verified.
2/3000 The YNQ segment indicates whether or not the position has been verified.
2/3200 The YNQ segment indicates whether or not the income has been verified.
2/3400 The N1 segment is used to state the credit grantor name.
2/5300 The N1 segment is used to state the court, attorney, or garnishee name.
2/6000 The INQ loop details credit inquiries.
2/6800 The YNQ segment indicates whether or not the inquiry has been verified.
2/7000 The VAR loop describes any variations discovered between credit files.
2/8600 The SCM loop describes credit scoring specifics.
2/9230 The REF loop is used to convey summarized credit information.
2/9240 The G32 segment is used to convey summarized credit details.

201 - Residential Loan Application

FUNCTIONAL GROUP=**ME**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Residential Loan Application Transaction Set (201) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to transfer the data contained in the Uniform Residential Loan Application between mortgage lenders, mortgage service vendors, insurance companies, credit reporting agencies and secondary market organizations. It can also be used, in conjunction with other transaction sets, to provide information needed to obtain an automated underwriting decision from a residential real estate automated underwriting system.

Notes

1/0300 The N1 loop identifies the sending and receiving parties such as the mortgage company, loan broker, service bureau mortgage insurer, etc.
2/0100 The LRQ loop contains requested loan, borrower and subject property information. One iteration equals one loan application.
2/0300 The YNQ segment is used to determine whether or not improvements have been made, whether or not they are complete, or whether or not the mortgage is eligible for a special mortgage program.
2/1000 The NX1 loop contains information about the subject property.
2/1420 The YNQ segment is used to describe specific subject property attributes. (e.g. Is this an energy efficient home? Is the property in a government approved condominium project?)
2/1500 The PEX loop provides the proposed monthly housing expenses.
2/1700 The AMT loop contains financing terms, refinance and construction loan information.
2/1900 The IN1 loop identifies the borrower(s) and their asset and liability information.
2/3210 The AIN loop provides information about the borrower's income.
2/3220 The YNQ segment determines the income's relationship to its source or the taxability of the income. A "Y" means that the income is from a primary source or is taxable. A "N" means the income is from a secondary source or is not taxable.
2/3800 The PEX loop provides current housing expense information.
2/4000 The NX1 loop provides the applicant's current and previous residence information.
2/4400 The N1 loop provides the applicant's current and previous employment information.
2/4900 The YNQ segment determines whether or not a borrower is self employed. A "Y" indicates that the borrower is self employed.
2/5400 The REA loop provides information about other properties owned.
2/5750 The NM1 loop provides alias information used to obtain credit.
2/5800 The CDA loop provides consumer credit account information.
2/5900 The YNQ segment determines whether or not a liability will be satisfied by the sale of owned real estate or by refinancing a current loan, if the liability has a co-signer, or if the liability is subordinated. A "Y" means that the liability will be satisfied by a sale or refinance, that the liability has a co-signer, or that the liability is resubordinated.
2/6500 The FAA loop provides financial asset information.
2/7100 The AMT loop provides alimony and child support income and expense information along with job related, liability, and other expense information.
2/7220 The YNQ segment determines how the Federal Housing Administration (FHA) treats alimony in the home purchase process. A "Y" indicates that alimony will be treated as a reduction to total income. A "N" indicates that alimony will be included in the aggregate of obligations.
2/7300 The LX loop contains information about the interviewer who obtained the loan application data and other parties to the real estate transaction.

202 - Secondary Mortgage Market Loan Delivery

FUNCTIONAL GROUP=**MJ**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Secondary Mortgage Market Loan Delivery Transaction Set (202) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to report mortgage loan information (i.e., borrower, property, underwriting information, etc.) among mortgage lenders, mortgage service vendors, and secondary mortgage market organizations.

Notes

1/0500 The N1 Loop is used to identify the sender and receiver information.

2/0100 The N9 segment identifies the issuer reference number or originator of the mortgage reference number.

2/0200 The DEX Loop is used to report loan delivery execution and contract data for mortgage loans.

2/0300 The REF segment identifies the subservicer number, master contract number, contract number, and pool number for the loans being delivered.

2/0800 The QTY segment is used to report contract information such as commitment period, contract buyup and buydown.

2/0900 The MPP segment identifies Government National Mortgage Association (GNMA) and Fannie Mae (FNMA) pool information.

2/1200 The ASM Loop is used to identify wire instructions, proceed amounts and account numbers associated with the contract or pool funding.

2/1500 The NM1 segment identifies the document custodian of the mortgage.

2/1600 The LX Loop is used to identify mortgage loan level information.

2/2000 The YNQ segment is used to answer questions about the loan such as third party originated, capitalized mortgage, property covered by flood insurance, etc.

2/2100 The QTY segment is used to report the number of borrowers, guaranty fee rates, or buyup or buydown rates.

2/3200 The IGI loop is used to identify information associated with mortgage insurance including the mortgage insurance certificate numbers.

2/3500 The NX1 loop is used to describe the characteristics of the subject property.

2/3900 The LN1 loop is used for high level and subordinate loan level information.

2/4000 The YNQ segment identifies if a subject lien is involved.

2/4300 The CRC Loop is used to identify the borrower and co-borrower information at either the summary loan level or the individual borrower level.

2/4400 The IN1 segment identifies the borrower and co-borrower name.

2/4700 The QTY segment is used to report borrower age, years employed by company, total other properties owned and financed, or total number of dependents.

2/4900 The YNQ segment identifies whether the borrower is self employed or a non-occupant co-borrower.

2/5200 The SCM loop is used to capture credit scoring information for borrower and co-borrower.

2/5400 The PAM Loop is used to identify the number of bedrooms in each unit of the property and gross rental income per unit.

2/5500 The YNQ segment determines whether the unit should be counted as an efficiency or studio.

2/5700 The UWI Loop is used to identify automated underwriting system information.

3/0100 The CTT segment is used to provide summary information on the number of loans in delivery. It is the count of the number of iterations of the LX loop. Each LX loop defines a single loan.

203 - Secondary Mortgage Market Investor Report

FUNCTIONAL GROUP=**MG**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Secondary Mortgage Market Investor Report Transaction Set (203) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used for the transfer and reporting of mortgage servicing information between mortgage servicers, mortgage service bureaus, and secondary mortgage market organizations.

Notes

1/0300 The DTP segment states the reporting cycle date.

1/0400 The REF segment indicates the Servicer or Issuer Institution Number.

1/0500 The N1 loop identifies the sending and receiving parties, such as Mortgage Servicer, Service Bureau, Investor, etc.

2/0200 The REF segment is used to identify Sub Servicer, Pool, Document Custodial Note Holder, or Issuer.

2/0600 The DTP segment is used to state the Last Paid Installment Date and the Date of the Last Payment Received.

2/0700 The AMT segment is used to report amounts such as the Actual or Scheduled Unpaid Principal Balance, Principal or Interest Due to Investor, Current Principal and Interest, Prepayment Penalties.

2/1000 The PRC segment is used to report Variable Loan Information characteristics (Adjustable Rate Mortgages, Graduated Payment Mortgages, etc.)

2/1400 The DTP segment is used to identify the Original Maturity Date and the Date of First Payment.

2/1600 The YNQ segment determines whether or not Foreclosure proceedings have begun on the loan, flood insurance is current, hazard insurance is current, real estate tax is current, or guarantee is terminated.

2/1700 The AMT loop is used to define curtailment data, to state the Original Principal Balance, and to state the Tax & Insurance Escrow Fund Balance.

2/1800 The DTP segment is used to define dates associated with curtailment data.

204 - Motor Carrier Load Tender

FUNCTIONAL GROUP=**SM**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Motor Carrier Load Tender Transaction Set (204) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to allow shippers or other interested parties to offer (tender) a shipment to a full load (truckload) motor carrier including detailed scheduling, equipment requirements, commodities, and shipping instructions pertinent to a load tender. It is not to be used to provide a motor carrier with data relative to a Less-than-Truckload bill of lading, pickup notification, or manifest.

0200	SE	Transaction Set Trailer	M	1	

Notes

1/0900 Segment G62 in header is used to convey the must-respond-by date and time when responding to a 204 transaction.

1/1400 Loop 0100 is used to convey name and address detail relative to bill-to, party controlling freight, or other shipment level name and address information. It is not used to convey ship from or ship to detail which should be handled within loop 0300 in table 2.

2/0300 Use G62 segment either in loop 0300 or loop 0350, but not both.

2/0400 Segment AT8 in loop 0300 is intended for the transmitting of total weight, quantity, and volume relative to the specific stop-off. Should weight, quantity, and volume also be sent in segment AT8 in loop 0320 and tied to commodity detail, then the accumulated amounts of weight, quantity, and volume in the AT8 segment in loop 0320 should equal the amounts in the single AT8 occurrence in loop 0300.

2/0500 Use LAD segment either in loop 0300 or loop 0350, but not both.

2/1370 The PER segment is used to specify the sales representative for the product shipped.

2/1400 The G61 segment contains the person or company to be contacted by the carrier in case of emergency.

2/1410 The L11 segment contains the specific hazardous material reference numbers. Used in loop 0325 it pertains to all iterations of loop 0330 following.

2/1500 Use loop 0350 for conveying seller's order/invoice level detail or buyer's purchase order level detail. If not using order level detail, this loop should not be used.

2/1900 If sending order level detail within the 0350 loop, then use L5 and AT8 segments in loop 0360 to relay commodity detail. Otherwise, use L5 and AT8 segments within the 0320 loop to relay commodity detail. Use either loop 0320 or loop 0360, but not both.

2/1950 Accumulated weights, quantities, and volumes sent in the AT8 segment in loop 0360 should total to the weight, quantity, and volume in the OID segment in loop 0350. Accumulated weights and quantities in the LAD segment in loop 0350 should total to the weight and quantity in the OID segment in loop 0350.

2/2000 The G61 segment contains the person or company to be contacted by the carrier in case of emergency.

2/2010 The L11 segment contains the specific hazardous material reference numbers. Used in loop 0365 it pertains to all iterations of loop 0370 following.

205 - Mortgage Note

FUNCTIONAL GROUP=**MN**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Mortgage Note Transaction Set (205) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by mortgage originators, settlement agents, warehouse lenders, document custodians, secondary market entities and other industry participants to exchange the data comprising the mortgage note and mortgage characteristics.

2/1000 The YNQ segment is used to answer questions regarding the high level options associated with the mortgage note (e.g., assumable, convertible, etc.) and electronic mortgage registration (e.g., Consolidation, Extension, or Modification Agreement, or Metes and Bounds Legal Description).

2/1500 The YNQ segment is used to answer questions regarding the details for specific mortgage note options (e.g., fee required, interest only, prepayment restrictions, etc.)

3/0100 Number of line items (CTT01) is the accumulation of the number of MNC segments.

206 - Real Estate Inspection

FUNCTIONAL GROUP=**MG**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Real Estate Inspection Transaction Set (206) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by mortgage lenders, insurance companies or others to initiate, modify or cancel a site inspection by a field service organization, home inspection company, insurance vendor or other industry participant. It can also be used by a field service organization, home inspection company, insurance inspection vendor, or other industry participant to report the results of a site inspection.

Notes

1/0500 Loop 0100 identifies all parties associated with the Real Estate Inspection.

2/0100 Loop 0200 provides instructions and information pertaining to a property inspection and identifies the recommendations and observations of the property.

2/0100 The SI segment identifies the type of inspection being requested or completed.

2/0200 The N9 segment identifies a unique number associated with this inspection.

2/0300 The RLT segment provides information pertaining to the guarantor and guarantor case number.

2/1000 The NTE Segment provides additional information regarding partially occupied multiple unit properties, fee description of special inspection charges, or other special inspection instructions.

2/1200 Loop 0210 provides information about the borrower associated with the property.

2/1800 Loop 0220 provides information about the property involved in the inspection.

2/2600 The YNQ segment provides the answers to statements about the property to assist the inspector. It also provides a response to statements regarding the inspector's observation of the property.

2/3200 Loop 0221 identifies the information obtained by interviews conducted during the inspection.
2/3900 The YNQ segment provides for responses by the interviewee about the status of the property and its occupant(s).

210 - Motor Carrier Freight Details and Invoice

FUNCTIONAL GROUP=**IM**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Motor Carrier Freight Details and Invoice Transaction Set (210) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide detail information for charges for services rendered by a motor carrier. It is used both as a motor carrier invoice to request payment or as details pertaining to motor freight shipment(s) charges.

Notes

2/0100 Loops 0300, 0305, 0310 and 0320 shall only be used to identify locations and associated data for loading and unloading of freight.

2/2400 Loops 0460 and 0463 shall be used to identify all small package carrier details related to the consignee (delivery location) and the related shipment. The shipper shall be identified in loop 0100.

211 - Motor Carrier Bill of Lading

FUNCTIONAL GROUP=**BL**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Motor Carrier Bill of Lading Transaction Set (211) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to allow shippers or other parties, responsible for contracting with a motor carrier, to provide a legal bill of lading for a shipment. It is not to be used to provide a motor carrier with data relative to a load tender, pickup manifest, or appointment scheduling.

	2200	SE	Transaction Set Trailer	M	1	

Notes

1/0500 The MS2 segment is used to provide the carrier with the trailer number of the trailer that has the shipment on it.

1/1000 Loop 0100 is used to specify the parties to the Bill of Lading, including but not limited to, the ship-from, ship-to, or bill-to parties.

2/0100 The AT1 segment provides the line number for all of the related items included. It may include reference numbers, rates and charges, descriptions, and or line item details. Any data included within a single loop is related to the other data included in that loop. Any reference numbers included in a loop with line item details are related to that line item only. Any reference numbers included in its own line item are related to the entire shipment and can not be broken out by line item detail.

2/0300 Care should be taken when using the AT3 segment to provide the carrier with a pre-rated Bill of Lading. Rates and charges included on the Bill of Lading are subject to audit. Accessorial charges usually can not be determined before the shipment has been delivered, therefore use of this segment may not negate the requirement for transaction set 210, Freight Invoice and Details.

2/0300 The AT3 segment provides a means of transmitting freight charges and the basis for those charges. The amount of the charge appears in AT301. If the charge is based on a percent discount, the percent discount is transmitted in AT307 with the charge, after the discount has been applied, in AT301. If the charge is not based on a rating structure (per mile, per hundred weight, as weight etc.) the type of charge is identified in AT306. If the charge is based on a rate, the rate is transmitted in AT303 with the qualifier (per mile, per hundred weight) codified in AT302. If the quantity of the unit being rated is required AT305 is used in conjunction with AT304. For example, for a charge of $20.00 that is based on a rate of $1.00 per mile the segment would be as follows: AT3*2000*PM*1*MI*20 N/L.

2/0400 Segment AT4 provides a means for the shipper to provide a text description of the line item. The National Motor Freight Classification and the freight class shall be included in the AT2 segment if applicable.

2/0500 The AT2 segment is used to provide the carrier with the appropriate data to rate the shipment. It is included per line item when the line item includes an item of freight.

2/0600 The MAN segment provides the marks and numbers associated with the line item identified in the AT2 segment.

2/0700 The OID segment provides the purchase order numbers and details associated with the line item details included in the AT2 segment.

2/0800 Loop 0220 shall only be used when the marks and numbers or the purchase order detail can not be associated with the specific Bill of Lading line item details included in the AT2

segments transmitted with this Bill of Lading.

2/1100 The G61 segment shall only be used to provide the name and phone number of the contact for any hazardous materials included on this Bill of Lading.

212 - Motor Carrier Delivery Trailer Manifest

FUNCTIONAL GROUP=**TM**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Motor Carrier Delivery Trailer Manifest Transaction Set (212) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to allow motor carriers to provide consignees or other interested parties with the contents of a trailer, containing multiple shipments, that has been tendered for delivery. It is not to be used to provide the recipient with data relative to a full truckload shipment.

	1500	SE	Transaction Set Trailer	M	1

Notes

1/0500 Loop 0100 provides the location where the carrier will deliver the trailer.

1/1200 The AT7 segment provides the status of all of the shipments on the trailer.

2/0100 Loop 0200 provides the specific details concerning all of the shipments included in the manifest. There will be one iteration of loop 0200 for each shipment contained in the manifest. The most common way to identify the shipments is by the PRO number assigned by the carrier.

2/0300 The BLR segment shall only be used when the carrier delivering the freight is not the carrier that picked up the freight. The pickup carrier shall be identified by its Standard Carrier Alpha Code (SCAC).

2/0700 For use of the TSD segment in transaction set 212 the only codes that can be used in TSD02 are as follows: 1 - indicates that the shipment is in the first quarter of the trailer (closest to the nose of the trailer); 2 - indicates that the shipment is in the second quarter of the trailer; 3 - indicates that the shipment is in the third quarter of the trailer; 4 - indicates that the shipment is in the fourth quarter of the trailer (closest to the rear door of the trailer).

2/1000 Loop 0220 shall only be used to provide the identification of the shipper if the carrier has not provided that information in a previous shipment status message.

213 - Motor Carrier Shipment Status Inquiry

FUNCTIONAL GROUP=**MI**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Motor Carrier Shipment Status Inquiry Transaction Set (213) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to request shipment status from a motor carrier. The requestor may be a shipper or consignee.

215 - Motor Carrier Pickup Manifest

FUNCTIONAL GROUP=**UP**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Motor Carrier Pickup Manifest Transaction Set (215) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to allow shippers, or other parties, to provide a motor carrier with a manifest of all of the shipments tendered to a carrier. It is not to be used to provide a motor carrier with data relative to a load tender, legal bill of lading, pickup notification, or appointment scheduling.

Notes

1/0700 Loop 0100 shall provide the ship-from name and address location and any relevant reference numbers. The ship-to locations are transmitted in loop 0220.

1/1300 The X1 segment is used to provide export license information relative to the party named in the N1 segment.

1/1400 The X2 segment is used to provide import license information relative to the party named in the N1 segment.

2/0100 The SMD segment is used to provide the primary service level (for example ground, air, two day) and shipment method of payment for all of the packages (shipments) contained in each iteration of the loop. The individual package detail and any additional service requirements are transmitted in loop 0240.

2/0800 Loop 0220 shall be used to provide the ship-to name and address as well as other related parties to the shipment with the exception of the ship-from which is transmitted in loop 0100.

2/1700 Loop 0240 provides data, including all bar coded carrier or shipper assigned package identification numbers, relative to each individual package.

2/2210 Loop 250 shall be used to provide additional delivery locations within the ship-to transmitted loop in Loop ID 220, for example a department, or a ship-to name and address if loop 220 is not used."

2/2300 Loop 0260 shall only be used to transmit data relative to international shipments.

216 - Motor Carrier Shipment Pickup Notification

FUNCTIONAL GROUP=**PU**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Motor Carrier Shipment Pickup Notification Transaction Set (216) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to allow shippers or other interested parties to provide a motor carrier with notification that a shipment is available for pickup. It is not to be used to provide a motor carrier with data relative to a legal bill of lading, rating, pricing, or appointment scheduling.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT

	0900	SE	Transaction Set Trailer	M	1	

Notes

1/0200 PUN04 is required on the original pickup notification as well as any change or cancel pickup notifications when scheduling multiple pickups the same day.

1/0300 The G61 segment is used to provide the motor carrier with the name and phone number of the contact that can answer questions concerning the freight available for pickup at the location specified in loop 0100.

1/0400 The TEM segment provides the motor carrier with the total number of handling units and the approximate weight of the shipment that is available for pickup at the location specified in loop 0100.

1/0450 The K2 segment will convey special instructions regarding the pickup to the carrier. Examples of these special instructions could include items such as: nonstackable pallets, no dock, make pickup at door 3 today, urgent; must be picked up today.

1/0500 Loop 0100 is used to provide the motor carrier with the pickup (ship-from) location and the delivery (ship-to) location.

217 - Motor Carrier Loading and Route Guide

FUNCTIONAL GROUP=**FG**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Motor Carrier Loading and Route Guide Transaction Set (217) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide interested parties with a motor carrier's loading instructions and/or routing guide. A transmission may include a list of the motor carrier's terminals, a list of all points served, or a matrix of all points served showing the advertised service times. The motor carrier may also indicate its breakbulk terminal(s) to be used for each point for loading purposes.

0100	SE	Transaction Set Trailer	M	1	

Notes

1/0300 Loop 0100 provides detailed information relative to freight terminals.
2/0100 The value of DE 447 in the LS and LE segments shall be the loop ID of 0200.
2/0200 Loop 0200 provides the service matrix between freight terminals or locations.
2/1100 The value of DE 447 in the LS and LE segments shall be the loop ID of 0200.
2/1200 Loop 0300 provides the service points list and associated information.

219 - Logistics Service Request

FUNCTIONAL GROUP=**AB**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Logistics Service Request Transaction Set (219) for use within the context of an Electronic Data Interchange (EDI) environment. This set can be used by a shipper to transmit data to a logistics related organization to provide order detail relevant to upcoming transportation requirements.

Table 1

Notes

2/0100 The 2000 Loop defines pickup or delivery information for an order.
2/1000 The 2200 Loop provides hazardous information associated with an order or stop-off.
2/2000 The 2300 Loop provides details for tracking containers within an order.
2/2700 The 2350 Loop provides hazardous information associated with container information.
2/3700 The 2370 Loop provides item details.
2/4500 The 2375 Loop provides hazardous information associated with item information.

220 - Logistics Service Response

FUNCTIONAL GROUP=**AH**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Logistics Service Response Transaction Set (220) for use within the context of an Electronic Data Interchange (EDI) environment. This set can be used by a logistics related organization to transmit data to a shipper in response to a logistics service request.

Table 1

Notes

1/0200 The reference number in the B9 segment, element 01 must be a unique logistics identification number.
1/0800 The 0500 Loop provides rate information back to shipper.
2/0100 The 2000 Loop defines pickup or delivery information for an order.
2/1000 The 2200 Loop provides details for tracking containers within an order.
2/1600 The 2250 Loop provides item details.

222 - Cartage Work Assignment

FUNCTIONAL GROUP=**CE**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Cartage Work Assignment Transaction Set (222) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to provide the cartage carrier with placement, rating, and scheduling information pertinent to the movement of equipment by a cartage carrier.

Table 1

	3400	SE	Transaction Set Trailer	M	1		

Notes

1/0400 The G62 segment is only used to indicate the respond by date and time.

1/0600 Loop 0100 shall only be used for locations related to the entire workassignment such as the party which will pay the bill. It is not used to send parties related to the physical movement of the equipment.

2/0100 Loop 2000 is required for each placement in the workassignment.

2/0600 Loop 2100 shall only be used to transmit charges related to the entire placement.

2/2100 Loop 2410 shall only be used to provide hazardous material contact for the commodity listed in the LAD segment.

2/2400 Loop 2415 is used to provide hazardous material information specific to the commodity contained in the LAD segment.

2/3100 Loop 2600 shall only be used to transmit charges specific to the stop-off indicated in the S5 segment.

223 - Consolidators Freight Bill and Invoice

FUNCTIONAL GROUP=**MQ**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Consolidators Freight Bill and Invoice Transaction Set (223) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by a freight consolidator to transmit invoice and freight bill data to the appropriate party. The freight bill services may be provided by the consolidator or a motor carrier unrelated to the consolidator. This transaction shall not be used to transmit freight bill data without consolidator's invoice data.

224 - Motor Carrier Summary Freight Bill Manifest

FUNCTIONAL GROUP=**MA**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Motor Carrier Summary Freight Bill Manifest Transaction Set (224) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to transmit multiple freight bills at the summary level to a single payer.

Table 1

POS	ID	NAME	REQ	MAX	REPEAT

225 - Response to a Cartage Work Assignment

FUNCTIONAL GROUP=**MY**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Response to a Cartage Work Assignment Transaction Set (225) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by a cartage carrier to provide for customary and established business practice relative to a response to a cartage work assignment. The transaction set includes either acceptance or decline of the work assignment and any related reference numbers.

Table 1

POS	ID	NAME	REQ	MAX	REPEAT
0100	ST	Transaction Set Header	M	1

0400	SE	Transaction Set Trailer	M	1	

227 - Trailer Usage Report

FUNCTIONAL GROUP=**TU**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Trailer Usage Report Transaction Set (227) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to transmit information related to the shipper's, consignee's, or third party's planned usage of a trailer supplied by a motor carrier for trailer inventory reporting purposes only. This transaction set is used to provide the motor carrier with information related to the loading of a trailer, rejection of the trailer, and reported location. It is not to be used to provide a motor carrier with data relative to a load tender or pickup notification and requires no response.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT
	0100	ST	Transaction Set Header	M	1

	1400	SE	Transaction Set Trailer	M	1	

Notes

1/0300 Subsequent iterations of Loop 0100 are used to convey name and address detail to identify the location of the trailer.

1/0300 The first iteration of Loop 0100 is used to convey name and address detail to identify the sender of the transaction set.

1/1100 The G62 segment is used to provide the date/time the trailer arrived at the reported location.

228 - Equipment Inspection Report

FUNCTIONAL GROUP=**EN**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Equipment Inspection Report Transaction Set (228) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by a transportation carrier to provide equipment owners with the results of an equipment inspection activity. This transaction set can be used to communicate whether or not the equipment is in a damaged state. If damage has been identified, it can also be used to convey details regarding the damage. It is not used to convey information relevant to damage claims or repair activities.

Table 1

	5000	SE	Transaction Set Trailer	M	1	

Notes

1/1000 The W2 loop is used to convey equipment level information.
1/1300 The M7 at position 1300 is used to convey the original seals numbers.
1/2000 The N1 loop is used to convey the equipment owner, operator, or any parties associated to the equipment.
1/3000 The EQD loop is used to convey the results of a inspection.

1/3400 The M7 at position 1/3400 is used to convey the new seals after inspection. Only transmitted when a seal number has been replaced. All seals must be transmitted when any single seal has been replaced.

1/4000 The NM1 loop is used to convey who executed the inspection, the location where the inspection occurred, and any parties associated to the damage.

240 - Motor Carrier Package Status

FUNCTIONAL GROUP=**MZ**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Motor Carrier Package Status Transaction Set (240) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to provide the status of a package, packages, or group of packages considered a shipment by a motor carrier.

Notes

1/0300 This loop (1000) identifies the receiver(s) of the data.
2/0200 This loop (2500) provides the delivery address.
2/0700 The NTE is used to provide specific delivery information when a signature is not available.
2/0800 This loop (2600) provides the proof of delivery signature if captured upon delivery.
2/1000 This loop (2700) describes the package status.

242 - Data Status Tracking

FUNCTIONAL GROUP=**DS**
SUBCOMMITTEE=**C**

This X12 Transaction Set contains the format and establishes the data contents of the Data Status Tracking Transaction Set (242) within the context of an Electronic Data Interchange (EDI) environment. This management transaction set is the vehicle by which the transmission status information is conveyed by a service request handler to the interchange sender, interchange receiver, or both; it can be used to provide status information regarding interchange as it flows from an interchange sender through one or more service request handlers to an interchange receiver during its transmission cycle. It can be used by the interchange sender or interchange receiver to request from a service request handler ad hoc or periodic reports containing status information regarding interchanges.

Table 1

C	1200	STS	Interchange Status Segment	O	1	
C	1300	N1	Party Identification	O	1	
C	1400	REF	Reference Information	O	10	
C	1500	QTY	Quantity Information	O	>1	
	1600	SE	Transaction Set Trailer	M	1	

Comments

1/0400 The DTP segment is used to provide date/times or date/time ranges associated with the report being requested or provided, for example the start and end dates and time of the report.

1/0500 The REF segment contains reference numbers to further identify the report or specify the report request.

1/0600 The MSG segment contains the report title.

1/0700 HL identifies the appropriate hierarchical interchange level: HL03 indicates Interchange (IN), Functional Group (FG), Transaction Set (TS). All levels are optional. All hierarchical levels that are used must be used in the hierarchical order that they are listed.

1/0900 The N1 segment identifies the source of the following status information.

1/1000 The REF segment contains reference numbers assigned by the party identified in the N1 segment that further identifies the interchange, functional group or transaction set.

1/1100 The QTY segments can be used to report aggregate counts (e.g., number of functional groups and segments) that were contained in the interchange, functional group or transaction set that is being tracked.

1/1200 The STS segment provides status as reported by the source identified in the preceding N1 loop.

1/1300 The N1 segment identifies the source of the status information included; provided only if the source is different from that in the HL loop N1 segment.

1/1400 The REF segment provides reference numbers assigned by the party identified in the N1 segment that further identifies the status or error reported in STS (e.g., file number, message Id).

1/1500 The QTY segments can be used to report aggregate counts from the status report that were contained in the interchange, functional group or transaction set that is being tracked.

244 - Product Source Information

FUNCTIONAL GROUP=**PN**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Product Source Information Transaction Set (244) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction can be used to transmit classification and categorization data of company's products, processes, and facilities to existing and prospective trading partners or listing agencies.

Table 1

Notes

1/0300 The NM1 segment identifies the source responsible for the creation of the information.
1/0500 The N1 segment identifies the Organization attributed to the information.

245 - Real Estate Tax Service Response

FUNCTIONAL GROUP=**ME**
SUBCOMMITTEE=**F**

This X12 Transaction Set (DSTU) contains the format and establishes the data content of the Real Estate Tax Response Transaction Set (245) for use within an Electronic Data Interchange (EDI) environment. This transaction set can be used to respond to requests for information, modifications to loan status, complete property tax data necessary for paying tax bills, or cancellations of real estate property data. This transaction set facilitates the transfer of property tax information among real estate industry participants.

Table 3

POS	ID	NAME	REQ	MAX	REPEAT
0100	SE	Transaction Set Trailer	M	1	

Notes

1/0300 The NM1 Loop is used to identify the requesting party, the service provider, lender, or any institution involved.

2/0100 The HL Loop identifies the appropriate loop identity: Alternate Taxing Authority (AJ), Amount Information (AM), Installments (IS), Loan Data (LN), Lender or Mortgage Company (LD), Party to the Loan (LP), Property Identification (PI), Property Tax (PK), Taxing Authority (TA), Tax Delinquency (TD), Tax Installment (TX). All levels are optional.

2/1100 The NM1 Loop is used to identify all parties to the transaction for a specified loan: Lenders, Investors, Parties to the Loan and Tax authorities.

2/1700 The NX1 Loop is used to identify the property.

2/2300 The TDT Loop is used to define the delinquency information.

2/2400 The REF Loop is used to further define the delinquency information.

2/2600 The AMT Loop is used to identify the various tax amounts, installment, payment information and due date information.

248 - Account Assignment/Inquiry and Service/Status

FUNCTIONAL GROUP=**SU**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Account Assignment/Inquiry and Service/Status Transaction Set (248) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used for two-way, multi-transactional purposes of assigning accounts for collection, reporting status inquiries and inquiry responses and to update accounts between entities.

Table 1

	1800	SE	Transaction Set Trailer	M	1	

Notes

1/0300 The NM1 loop will contain only information pertaining to the Credit Grantor and the Agency.

2/0100 The HL loop will contain parent-child (subordinate) data relationships pertaining to the debtor and/or any association to the debtor.

2/0200 The NM1 segment will contain only information pertaining to the debtor and/or any subordinate association to the debtor.

249 - Animal Toxicological Data

FUNCTIONAL GROUP=**AT**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Animal Toxicological Data Transaction Set (249) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to exchange animal toxicology data collected from studies conducted on pesticides, drugs, or other substances. This transaction set accommodates the lowest reportable level of individual animal toxicology data for transfer between industry and the government, within industry itself, and between government agencies. The transaction set will enable the exchange of both definitive end points or in-life study data, as well as observational or opinion type data.

	3000	SE	Transaction Set Trailer	M	1	

Notes

1/0400 The N1 loop designates the study originator(s) or participating laboratory, study submitter(s) and author(s). The primary contact shall be listed in each case.

2/0100 The Group Identification (GID) loop reports the study group information. Each unique combination of dose level and gender is defined as a separate group.

2/0300 One or more Message Text (MSG) segment(s) identifies the test substance/compound name.

2/0500 The REF segment is used to specify both the animal species and the strain of animals used within this group on this study.

2/0600 The N1 loop reports the names and addresses associated with the animal source supplier.

2/1000 The Animal (ANI) loop reports individual animal information.

2/1100 One or more Animal Results Counts (ARC) segment(s) report the count of each type of result for this animal.

2/1500 The Animal Observation Location (AOL) loop indicates the location of an observation result.

2/1700 The Animal Observation Result (AOR) loop reports an observation type result for the specified location and individual animal.

2/1800 One or more Note/Special Instruction (NTE) segment(s) describe the observed change in the animal observation location.

2/2000 The Animal Reproductive Status (AST) loop specifies individual reproductive status and counts of offspring/fetal data.

2/2300 The Animal Offspring Identification (AOI) loop uniquely identifies each offspring/fetus for the individual animal specified.

2/2400 The Animal Test Results (ATR) segment reports reproductive/developmental test results for the individual offspring specified.

2/2500 The Animal Observation Location (AOL) loop indicates the location of an observation result for a reproductive/developmental study.

2/2700 The Animal Observation Results (AOR) loop reports an observation type result for the specified location and individual offspring on a reproductive/developmental study.

2/2800 One or more Note/Special Instruction (NTE) segment(s) describe the observed change in the offspring observation location.

250 - Purchase Order Shipment Management Document

FUNCTIONAL GROUP=**PV**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Purchase Order Shipment Management Document Transaction Set (250) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to allow a retailer or manufacturer to communicate purchase order data, to a transportation provider, for the purpose of managing the purchase order cycle from the time of pickup request through delivery.

251 - Pricing Support

FUNCTIONAL GROUP=**CP**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Pricing Support Transaction Set (251) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to request or transmit budget or actual data for labor and overhead rates, factors, and other supporting data for a specified period of time.

This bi-directional transaction set can stand alone, or can be used to support the Contract Pricing Proposal (805) Transaction Set.

Notes

1/0300 The SPI segment identifies the security classification or contractor level of protection for the pricing support, the contract or proposal number against which the pricing support applies, and whether the pricing support is certified.

1/0800 When the N1 loop is used, it will carry the name and address of the party to be contacted if clarification about the proposal or requests for additional information concerning the proposal is required.

2/0100 The PPL loop identifies the proposal schedules (e.g., G&A expenses, overhead expenses) included in the transaction. PPL01 carries a code that identifies the schedule type, and PPL04 carries a free-form description or name of the schedule.

2/1700 The PO1 loop provides bill of material and purchase history information.

2/2300 The LX loop provides purchase history information.

252 - Insurance Producer Administration

FUNCTIONAL GROUP=**IE**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Insurance Producer Administration Transaction Set (252) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set is used to transmit insurance producer information (licensing and appointment data, background information, etc.) among insurance companies and insurance distributors such as agents, brokers, and their organizations.

Notes

2/0010 The N1 loop repeats for each company or intermediate distributor.
2/0100 The ENT loop repeats for each individual producer.
2/0400 The YNQ segment indicates pending new business for the producer.
2/1000 The NM1 loop reports all names and addresses for the producer.
2/1350 The N9 loop is used to provide producer team information including team member reference identifiers and percentage due those team members when commissions are payable.
2/1750 The LX loop is used to report transfers of business between producers.
2/2100 The NM1 segment identifies transferred policy owners.
2/2200 The UC loop is used to report background information.
2/2500 The NM1 segment identifies parties related to the background events.
2/3500 The LIC loop is used to report state license information.
2/3900 The ACT loop reports company appointments.
2/4300 The YNQ segment indicates corporate appointments.
2/4800 The PWK loop reports the status and locations of required documents.
2/5200 The EFI loop is used to transmit images of required forms and signatures.

255 - Underwriting Information Services

FUNCTIONAL GROUP=**UI**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Underwriting Information Services Transaction Set (255) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to request specific services from information providers in support of the underwriting process. In addition, the standard can be used between trading partners to request/receive status information on outstanding requests.

Notes

1/0400 The NM1 loop allows for one or more insurance companies to request the same information.

2/0100 The ACT loop is the primary loop for the requested services. It is based on the procurement of services for a unique policy/application/account or other unique identifier for one or more proposed insureds. The ACT segment contains the case identification.

2/0760 The NTE segment is used to communicate specific underwriting instructions to the service provider.

2/0800 The NM1 loop contains proposed insured's name, address & other information necessary to identify him/her. It is possible that there may be multiple proposed insureds within a policy number in one ACT loop.

2/1800 The EFI is included to provide a vehicle for capturing the proposed insured's signature to authorize specific services.

2/2100 The PO1 loop contains services requested to be performed by the information provider.

2/2700 The LX loop contains detailed information sources used by the information provider in completing their assignments. These could be doctors, clinics, employers, and other references. The LX segment is used as a unique reference number within the PO1 loop.

256 - Periodic Compensation

FUNCTIONAL GROUP=**PE**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Periodic Compensation Transaction Set (256) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set is used to report compensation data, including compensation amounts, compensation earned, compensation paid, adjustments and balances.

Notes

2/0100 The N1 loop repeats for each company paying compensations.
2/0600 The BLI loop contains data for each individual contract.
2/1800 The AM1 loop contains calculations for each contract activity.
2/2200 Each AMT loop contains compensation details for each entity.
2/2300 REF02 contains the reference number identifying the entity receiving compensation.
2/2500 The RPA loop contains compensation calculation details.
2/2700 The ENT segment identifies each organization or individual receiving compensations.

259 - Residential Mortgage Insurance Explanation of Benefits

FUNCTIONAL GROUP=**MG**
SUBCOMMITTEE=**F**

This Draft Standard for Trial Use contains the format and establishes the data contents of the Residential Mortgage Insurance Explanation of Benefits Transaction Set (259) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to transmit the results of a claim for mortgage insurance benefits, referred to as an explanation of benefits (EOB), between a mortgage insurer and the customer receiving the financial benefit. This standard can be used for transmitting the results of both pool and primary mortgage insurance claims.

Notes

1/0300 The 0100 loop repeats for each individual company.

2/0100 The 0200 Loop contains all information needed for a residential mortgage insurance explanation of benefits document.

2/0900 The 0300 Loop contains the borrower's name and insured property address.

2/1300 The 0400 Loop contains the event items and dates, along with mortgage interest rate intervals and amounts for adjustable interest loans.

2/1800 The 0500 Loop contains detail claimable expense items submitted, the amount authorized for payment, and an explanation of any adjustments.

260 - Application for Mortgage Insurance Benefits

FUNCTIONAL GROUP=**MG**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Application for Mortgage Insurance Benefits Transaction Set (260) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by mortgage lenders to file claims with both government agencies and private mortgage insurers in the event that defaults or foreclosure activity allow for the collection of a third-party guarantee/insurance benefit. The information in a standard format will allow all mortgage insurance claim payments to be requested similarly, whether they be to an investor, insurer, or guarantor.

Notes

1/0300 The 0100 loop identifies the name and address of the sending party, an entity such as the mortgage company, loan servicer, payee or investor, and the receiving party, the mortgage insurer.

1/0700 The REF segment contains an additional supplemental reference number that identifies only the sender.

2/0100 The CSI segment identifies the status of the subject claim within the claim process and provides the date associated with that status.

2/0200 Loop 0200 contains essential information about the subject real estate property. The NM1 segment provides the name of the mortgagor(s).

2/0300 The REF segment contains reference numbers that are case-specific.

2/0400 The N3 and N4 segments refer to the location of the real estate property.

2/1800 The 0230 loop will provide information on mortgage loan fiscal data, such as the fiscal data item name, the credit, debit, and interest amounts associated with the fiscal data item, and the date or time period covered.

261 - Real Estate Information Request

FUNCTIONAL GROUP=**ME**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data content of the Real Estate Information Request Transaction Set (261) for use within an Electronic Data Interchange (EDI) environment. This transaction set can be used to initiate, modify or cancel a request for real estate information. This transaction set will be used to transfer information among real estate industry participants.

Notes

1/0300 The N1 loop is used to provide sender, receiver, and third party information.

2/0050 The LX loop contains all information necessary to complete real estate information request.

2/0070 The AM1 segment is used to specify the type of service or report being requested for the property.

2/0210 The LN1 segment is the loan information for the property.

2/0220 The AMT segment is used to provide cost information for the expanded services.

2/0230 The QTY segment is used to provide expanded loan or services information.

2/0260 The PWK segment is used to specify any special report requirements for the requested service.

2/0300 The NM1 loop is used to identify multiple real estate information ship-to and bill-to parties and any interested parties.

2/0900 The NX1 loop contains real estate information and supplies a completed checklist of all relevant documents required by the real estate information provider.

2/2550 The PWK loop accommodates requests for paperwork to be returned within date or time requirements.

2/2600 The IN1 loop is used to identify the borrower, property owner, contact persons for access to the property, and any third party who needs to be notified to facilitate real estate information.

2/2900 The DTM segment is used to provide the Best Time to Contact information.

262 - Real Estate Information Report

FUNCTIONAL GROUP=**ME**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Real Estate Information Report Transaction Set (262) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used for the transfer and reporting of real estate information among real estate industry participants.

Notes

1/0300 The NM1 Loop is used to identify the real estate information provider, recipient, and bill-to information.

1/0800 The REF records the real estate information provider's ID and other reference information such as geographic coordinates.

2/0100 Each iteration of the LX loop is used to provide real estate information for the subject property.

2/0150 The AM1 segment records the real estate information service type and report type.

2/0160 The PWK segment records the real estate information type and form information.

2/0170 The SPI identifies and provides category information for any associated binary files such as property photographs, plat maps and floor plans.

2/0180 The CUR identifies the country currency used in the transaction. If the segment is not present then the default currency is U.S. Dollars.

2/0280 The NX1 Loop identifies the property address of the subject property and comparable property sales comparison information.

2/0500 The PDS records legal property identifiers and data sources.

2/0700 The QTY segment records the number of units, and amount of improvements finished above grade.

2/0800 The REF segment identifies the mortgage loan number, file number, Federal Housing Administration or Veterans Administration case number, map reference number, geographic coordinates, census tract, and site Federal Emergency Management Administration map information.

2/0900 The DTP identifies the tax year for real estate taxes, map date, date of sale, reconciliation date, appraisal date and other real estate information dates.

2/1000 The YNQ segment indicates the occupancy, property rights, project type, sales or refinancing, neighborhood characteristics, project information for Planned Urban Developments, corner lot, zoning compliance, best use, Federal Emergency Management Administration special flood hazard area, reconciliation appraisal basis information.

2/1100 The AMT segment records loan charges and concessions, reconciliation of appraised value, indicated value by sales comparison, indicated value by income, and other real estate amount information.

2/1200 The PCT segment records the neighborhood present land use percentage.

2/1300 The III Loop is used to identify neighborhood boundaries and characteristics, marketability, market condition information, and the property's attributes.

2/1420 The PEX Loop identifies the ongoing and recurring property expenses, real estate taxes and special assessments.

2/1440 The DTP records any dates associated with the property expense.

2/1460 The III records items included or covered by the expense or fee.

2/1500 The LQ Loop is used to identify the number, type and location of components within the subject property (e.g. lot, building, rooms, garage) including dimensions and attributes.

2/1980 The III records specific attributes or features of a property area.

2/2000 The RET Loop records both current and historical property transactions such as listings, sales and rentals. Each iteration of the RET Loop represents one real estate transaction.

2/2100 The REF records transaction identifiers such as Multiple Listing Service.

2/2200 The DTP records the real estate transaction dates such as listing date, sales date, expiration date, status dates, closing date, open house date, tour date.

2/2300 The PTF records all financial information associated with the real estate transaction such as list price, sales price, rent, commissions, transfer fees and closing costs. This segment is not used for ongoing property expenses.

2/2400 The QTY records transaction quantity information such as days on market and book quantities ordered.

2/2500 The III records transaction terms, remarks or miscellaneous information.

2/2600 The NM1 Loop records information about each transaction participant (agents, brokers, owners, etc.).

2/3100 The REF records the participant's ID and geographic coordinates.

2/3200 The LN2 Loop records specific loan information. Each loop is used for a different loan.

2/3300 The AMT specifies the loan amounts such as principal, balance and payments.

2/3400 The DTP records the loan dates.

2/3500 The IN1 Loop is used to identify lender or client, real estate information company, appraiser, supervisory appraiser information, local schools, fire districts, etc.

2/4100 The YNQ Loop is used to record certifications and changes made to the definition of market value, statement of limiting conditions, and appraiser certification.

263 - Residential Mortgage Insurance Application Response

FUNCTIONAL GROUP=**ME**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Residential Mortgage Insurance Application Response Transaction Set (263) for use within the context of an Electronic Data Interchange (EDI) environment. This standard is used by a mortgage insurance company to communicate the receipt and disposition of a Residential Mortgage Insurance Application Transaction Set (872). It will be used to provide the mortgage originator with the results of the insurance application and, if accepted, will provide basic information about the insurance coverage. It can also be used to confirm certification of coverage. It is not intended to replace the legal commitment (Certificate of Coverage of Insurance) which will continue to be delivered in its current form.

Notes

1/0300 The N1 segment is used to identify the mortgage insurer and the organization initiating the Mortgage Insurance Application.

2/0200 The N1 segment is used to identify the name and possibly the identification of the insured.

2/0300 The REF segment is used to identify the loan number.

2/0400 The N1 segment is used to identify the borrower's name or social security number, or both.

2/0500 The MIR segment contains the mortgage insurance company's response to the application for mortgage insurance. If accepted, it will contain information about premium and coverage.
2/0600 The TXI segment is used to report state tax due on the mortgage insurance.
2/0700 The G63 segment is used to report the renewal time periods for the mortgage insurance.
2/0800 The PCT segment contains the premium rate used to calculate the renewal premium.

264 - Mortgage Loan Default Status

FUNCTIONAL GROUP=**MG**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Mortgage Loan Default Status Transaction Set (264) for use within an Electronic Data Interchange (EDI) environment. This transaction set will allow all notifications of mortgage loan default/foreclosure status to be filed similarly, whether they be to an insurer, guarantor, investor, or servicer. This transaction set can be used to submit notification of delinquent mortgage loans that could potentially result in foreclosure activity leading to the collection of a third-party guarantee/insurance benefit. This transaction set can also be used to file default status reports, as well as foreclosure and bankruptcy information with servicers, attorneys, trustees, government agencies, private mortgage insurers and investors.

Notes

1/0200 The BGN segment indicates whether the set is a corrected and verified or an advance notification transmission.

1/0300 The MIS segment provides information on the name and address change of the sending party.

1/0400 Loop 0100 identifies the sending and or the receiving parties.

1/0700 N4 may also contain the geographical location of the sender's principal servicing office, if any.

2/0100 Each iteration of loop 0200 is used to provide mortgagee information associated with a specific group of mortgages.

2/0150 The DTM segment contains the reporting date of the loan defaults.

2/1000 Loop 0210 is used to provide detail loan default information on a specific mortgage loan.

2/1000 The DTP segment contains the reporting date or a key loan associated date for the loan default.

2/1100 The REF segment provides the associated reference numbers for a specific mortgage loan.

2/1200 Loop 0211 provides information on the mortgagor, or the property owner, or the investor.

2/1400 The N3 and N4 segments contain the address information for the property.

2/1800 Loop 0212 contains detail loan default and foreclosure information on a specific mortgage loan.

2/1800 The REC segment provides information on the real estate condition of the property. REC04 and REC05 provide information on damage and number of living units on the property and

are not used in transaction set 264.

2/1900 The N3 and N4 segments provide the address information for the property.

2/2100 The DFI, QTY, AMT, INT, SOM, DTP and MRC segments provide detail default information on the mortgage loan.

2/2800 The MSG segment provides loan detail remarks or comments.

2/2810 The YNQ segment is used to identify whether the property has fire insurance only, or a servicer had advanced funds on non-escrowed taxes.

3/0100 QTY and AMT provide loan administration summaries for all mortgages reported in Table 2.

265 - Real Estate Title Insurance Services Order

FUNCTIONAL GROUP=**TO**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents for the Real Estate Title Insurance Services Order (265) Transaction Set for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by a real estate agent, mortgage lender, or other real estate company to order, update, or cancel title services from a title insurance services company. This standard can also be used by the title services company to return title information to the party originating the order. This transaction set replaces the paper forms used to request services such as title searches and insurance, and replaces mortgage closing documents.

Notes

1/0300 The N1 loop is used to name the party requesting information.

2/0200 The REF segment is used for the client's property reference number.

2/0300 The PDS segment is used to supply property description detail. This may be a simple legal description of the property such as lot, block and subdivision.

2/0400 The PDE segment provides for the transmission of a Property Metes and Bounds legal description. This type of description generally consists of several points of reference and a series of directions, angles, and distances.

266 - Mortgage or Property Record Change Notification

FUNCTIONAL GROUP=**MG**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Mortgage or Property Record Change Notification Transaction Set (266) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by financial institutions such as Mortgagees, Lienholders, and Lessors to inform interested parties such as Insurers, Investors, and Taxing Authorities of mortgage or property record changes. This transaction set is intended to be used by financial institutions to communicate change notifications, such as the sale of mortgages, assumptions, transfers, and terminations of interest.

Notes

1/0200 BGN indicates whether the set is an original or a corrected and verified transmission.

1/0300 Loop 0100 provides information on the principal parties of this transaction, such as the sending and receiving parties.

2/0100 Loop 0200 contains group level reporting information.

2/0200 API indicates the reporting type.

2/0600 Loop 0210 identifies the parties involved in the reporting process.

2/1200 Loop 0220 contains mortgage loan detail level information.

2/1300 Loop 0221 contains information on the individual or parties associated with the loan.

2/1900 API identifies the status of a specific loan or actions to be taken towards the loan.

2/1900 Loop 0222 contains loan specific details, identifies the property associated with a mortgage loan, and loan handling information.

267 - Individual Life, Annuity and Disability Application

FUNCTIONAL GROUP=**AD**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Individual Life, Annuity and Disability Application Transaction Set (267) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set is used to transmit new business application information among distributors (agents, broker/dealers, etc.), insurance companies and reinsurance companies for the purpose of underwriting an individual life, annuity or disability contract.

Notes

2/0010 The N1 loop repeats for each company or intermediate distributor.

2/0050 The ACT loop repeats for each individual application.

2/0600 The YNQ segment is used to report answers to application questions identified in YNQ01.

2/0660 The LQ loop is used to report jurisdictional information about the application.

2/0700 The SI loop is used to report policy options being exercised.

2/1050 The PID loop is used to report coverages at the contract level.

2/1850 The BEN loop is used to report beneficiary information that relates only to the coverage's reported in the PID loop.

2/2400 The ENT loop repeats for each entity associated with the policy.

2/2720 The AMT segment is used to report financial information for the entity that is not related to a specific product.

2/2770 The RPA segment is used to allocate commissions that are independent of the product.

2/2800 The YNQ segment reports answers to entity-related questions identified in YNQ01.

2/2950 The NM1 loop identifies the entity.

2/3300 The LQ loop reports underwriting requirements.

2/3500 The NM1 loop identifies information sources for underwriting requirements.

2/3900 The BEN loop is used to report beneficiary information that relates only to a specific entity in the ENT loop.

2/4450 The PID loop is used to report on coverages, service features and riders that relate to a specific entity in the ENT loop.

2/5100 The BEN loop is used to report beneficiary information that relates only to a coverage, service feature or rider in the PID loop.

2/5650 The UC loop is used to report additional risk assessment information.

2/5700 The HL segment is used to build the varying levels of detail that can be reported in the UC loop for different kinds of risk assessment information.
2/5800 The YNQ segment is used to report answers to risk assessment questions.
2/5850 The NM1 segment is used to identify parties related to risk assessment information.
2/7250 The PWK segment is used to report status and disposition of required forms.
2/7300 The NM1 segment identifies the person completing or signing a form.
2/7550 The EFI loop is used to transmit images of required forms and signatures.
2/7650 The LX loop is used to report payments made with the application or in the future.
2/7850 The N1 segment is used to identify payees or payers.
2/8155 The AM1 loop is used to report tax status of payment subtotals.
2/8300 The NM1 segment identifies the originator of the administrative message.

268 - Annuity Activity

FUNCTIONAL GROUP=**PF**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Annuity Activity Transaction Set (268) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set is used to convey annuity account activity from annuity providers to distributors (e.g., broker/dealers, financial planners, banks, savings and loans) for the purpose of communicating account positions and transaction activity.

Notes

2/0100 The N1 loop repeats for each distributor.
2/0500 The PID loop contains product information.
2/0900 The PO1 loop contains fund information.
2/1300 The ACT loop contains information on groups of individuals sponsored by an organization or association and referenced in the transaction.
2/2100 The CON loop repeats for each contract being reported.
2/2700 The NM1 loop reports all entities related to the contract.
2/3900 The IT1 reports transactions activity.
2/5600 The LX loop reports contract valuations.

269 - Health Care Benefit Coordination Verification

FUNCTIONAL GROUP=**HV**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Health Care Benefit Coordination Verification Transaction Set (269) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to transmit and respond to Health Care Benefit coordination information such as claim identification, previous adjudication details, and adjudication verification from one Health Care Payer to another. The transaction can be used as a notification of benefit coordination information. When used as a request for verification of benefit coordination information, the 269 is the response to that request for benefit coordination information verification.

Table 1

Notes

2/0100 The TRN segment is used to uniquely identify and tie an inquiry to a response.

270 - Eligibility, Coverage or Benefit Inquiry

FUNCTIONAL GROUP=**HS**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Eligibility, Coverage or Benefit Inquiry Transaction Set (270) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to inquire about the eligibility, coverages or benefits associated with a benefit plan, employer, plan sponsor, subscriber or a dependent under the subscriber's policy. The transaction set is intended to be used by all lines of insurance such as Health, Life, and Property and Casualty.

Notes

2/0200 If the Eligibility, Coverage or Benefit Inquiry Transaction Set (270) includes a TRN segment, then the Eligibility, Coverage or Benefit Information Transaction Set (271) must return the trace number identified in the TRN segment.

271 - Eligibility, Coverage or Benefit Information

FUNCTIONAL GROUP=**HB**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Eligibility, Coverage or Benefit Information Transaction Set (271) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to communicate information about or changes to eligibility, coverage or benefits from information sources (such as - insurers, sponsors, payors) to information receivers (such as - physicians, hospitals, repair facilities, third party administrators, governmental agencies). This information includes but is not limited to: benefit status, explanation of benefits, coverages, dependent coverage level, effective dates, amounts for co-insurance, co-pays, deductibles, exclusions and limitations.

272 - Property and Casualty Loss Notification

FUNCTIONAL GROUP=**LN**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Property and Casualty Loss Notification Transaction Set (272) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide loss information flow between property and casualty (P & C) insurance companies, agents, service providers, and industry bureaus.

Expected users are property and casualty insurance companies, agents, service providers (e.g., adjusters or glaziers), and industry bureaus (e.g., National Insurance Crime Bureau (NICB) or the Index System). Business functions consist of loss notification, work assignments and reporting.

Notes

2/0300 This occurrence of the Basic Claim Information (BCI) segment is required for Loss Notification and Reporting purposes. If the effective date range is specified, it applies to all coverages on the policy unless otherwise specified within the appropriate coverage loop (LQ).

2/0500 This occurrence of the Individual or Event Location (LIE) segment is used to specify the location of the loss.

2/3400 This occurrence of the Individual or Event Location (LIE) segment is used to specify the recovery location.

Comments

2/1700 This loop is used to specify witness information or administrative persons associated with the loss (i.e., claim handler, etc.).

2/2700 This Reference Numbers (REF) loop is used to specify information about a loss exposure.

2/5400 This NX1 loop is used to specify information pertinent to an involved party.

2/7400 This occurrence of the Individual or Organizational Name (NM1) loop is used to specify associated party information.

273 - Insurance/Annuity Application Status

FUNCTIONAL GROUP=**ID**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Insurance/Annuity Application Status Transaction Set (273) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by insurance providers to inform their trading partners of the current status of a life insurance or annuity application during the underwriting process.

Notes

2/0100 The ACT loop repeats for each individual case.

2/1000 The LX loop is required to avoid collision with the BLI loop.

2/1100 The BLI segment is used to transmit coverage which relates to the entire application.

2/1700 The BEN loop is used to transmit beneficiary information that relates only to the coverage information in 2/1000- 2/1600.

2/3300 The LQ loop contains the underwriting requirements.

2/4100 The BEN loop is used to transmit beneficiary information that relates only to the entity information in 2/2000 - 2/3200.

2/4400 The BLI loop is used to transmit coverage information that relates only to the entity information in 2/2000 - 2/3200.

2/5000 The BEN loop is used to transmit beneficiary information that relates only to the coverage information in 2/4400- 2/4900.

274 - Healthcare Provider Information

FUNCTIONAL GROUP=**PW**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Healthcare Provider Information Transaction Set (274) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to exchange demographic and educational/professional qualifications about healthcare providers between providers, provider networks or any other entity that maintains or verifies healthcare provider information. Such exchanges include the transmitting, inquiring, or responding to an inquiry. Healthcare provider information is routinely exchanged for the purpose of 1) maintaining provider data bases for claim adjudication, provider directories, patient referrals, and reporting provider information, 2) submitting an application to join a provider organization or provider network such as, but not limited to, a hospital, preferred provider organization (PPO) or health maintenance organization (HMO), and 3) verifying credentials such as educational/professional qualifications, licenses, and malpractice coverage/history.

Notes

1/0400 The PER segment is used to supply the sender's point of contact to the receiver.

2/0100 Valid hierarchical level codes for this transaction set are information source, information receiver, provider, group and site of service.

2/0200 The TRN segment is used to identify trace numbers that provide an electronic link between this transaction and other transactions.

2/0300 The NM1 segment is used to identify individuals and entities related to the hierarchical level identified by HL03.

2/2100 Loop 2110 provides multiple addresses related to the entity identified in the NM1 segment. The NX1 segment provides the type of address for each iteration of the loop. For instance, billing service or place of business.

275 - Patient Information

FUNCTIONAL GROUP=**PI**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Patient Information Transaction Set (275) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to communicate individual patient information requests and patient information (either solicited or unsolicited) between separate health care entities in a variety of settings to be consistent with confidentiality and use requirements. Patient information consists of demographic, clinical, and other supporting data.

Table 1

Notes

1/0500 Loop 1000 identifies a single patient; it also identifies other entities or individuals which include the requester, responder or other organizations.

1/0800 The PRV segment is only used in Loop 1000 when identifying a requestor or responder who is also a provider.

2/0150 The TRN segment in Loop 2000 identifies a previously sent transaction set. The 2000 Loop provides supporting or additional information for that item when TRN is used.

2/0175 The STC segment in 2000 Loop identifies the status and action requested in a prior transaction when the response is provided in this transaction.

2/0200 The NM1 segment in Loop 2000 identifies an individual provider within a responder group.

276 - Health Care Claim Status Request

FUNCTIONAL GROUP=**HR**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Health Care Claim Status Request Transaction Set (276) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by a provider, recipient of health care products or services, or their authorized agent to request the status of a health care claim or encounter from a health care payer. This transaction set is not intended to replace the Health Care Claim Transaction Set (837), but rather to occur after the receipt of a claim or encounter information. The request may occur at the summary or service line detail level.

2/0400 The DMG segment may only appear at the Subscriber (HL03=22) or Dependent (HL03=23) level.

277 - Health Care Information Status Notification

FUNCTIONAL GROUP=**HN**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Health Care Information Status Notification Transaction Set (277) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by a health care payer or authorized agent to notify a provider, recipient, or authorized agent regarding the status of a health care claim or encounter or to request additional information from the provider regarding a health care claim or encounter, health care services review, or transactions related to the provisions of health care. This transaction set is not intended to replace the Health Care Claim Payment/Advice Transaction Set (835) and therefore, will not be used for account payment posting. The notification may be at a summary or service line detail level. The notification may be solicited or unsolicited.

Notes

2/0200 The SBR segment may only appear at the Subscriber (HL03=22) level.

2/0400 The DMG segment may only appear at the Subscriber (HL03=22) or Dependent (HL03=23) level.

Comments

2/1300 The 2210 loop may be used when there is a status notification or a request for additional information about a particular claim.

2/2200 The 2225 loop may be used when there is a status notification or a request for additional information about a particular service line.

278 - Health Care Services Review Information

FUNCTIONAL GROUP=**HI**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Health Care Services Review Information Transaction Set (278) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to transmit health care service information, such as subscriber, patient, demographic, diagnosis or treatment data for the purpose of request for review, certification, notification or reporting the outcome of a health care services review.

Expected users of this transaction set are payors, plan sponsors, providers, utilization management and other entities involved in health care services review.

280 - Voter Registration Information

FUNCTIONAL GROUP=**VI**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Voter Registration Information Transaction Set (280) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to submit voter registration application information and to transmit information regarding a previously registered voter and changes to such information.

283 - Tax or Fee Exemption Certification

FUNCTIONAL GROUP=**TE**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Tax or Fee Exemption Certification Transaction Set (283) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be transmitted by buyer to seller to certify as to the tax exempt status of one or more business transactions, and from a seller to a Taxing Authority to verify that proper exemption certification has been obtained for the transaction(s). Exemption certification protects the claim of exemption from various taxes and fees for buyers and sellers.

Notes

1/0500 This NM1 loop is used to identify the buyer and the seller.

1/1500 This YNQ segment is used to respond to questions concerning the buyer or the seller.

2/0200 This LQ segment contains a code representing the reason for the tax or fee exemption, from an industry maintained code source.

2/0700 This YNQ segment is used to respond to questions concerning the exemption status.

2/0900 Each occurrence of this LX loop identifies a purchase made under this exemption certification.

2/1400 This N1 loop identifies the site to which the purchase is shipped, or the party on whose behalf the purchase was made. For example, a builder whose purchases are normally not exempt may make an exempt purchase of building materials under contract to an exempt organization such as a church.

284 - Commercial Vehicle Safety Reports

FUNCTIONAL GROUP=**IH**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Commercial Vehicle Safety Reports Transaction Set (284) for use within the context of an Electronic Data Interchange (EDI) environment. This bi-directional transaction set can be used by authorized parties to electronically request and send reports on information related to the safe operation of commercial road vehicles, such as inspection reports, safety and compliance review reports, and hazardous material incident reports.

Notes

1/0300 The NM1 loop carries information about the party transmitting or receiving the report.

2/0100 The HL segment identifies the hierarchical relationship of commercial vehicle safety information carried by the transaction. A Report parent level is required for all reports. An Inspection Report may have child levels Event, Company, Shipment, Product Description, Component, Person, Transportation Equipment, Violation. A Compliance Review may have child levels Company, Fleet, Violation, Safety Factor, Safety Fitness, Support Document, Review History, Recommendation. Company may have Product Description child levels. A Hazardous Materials Incident may have child levels Event, Company, Shipment, Traffic Unit, Property. Event may have a Response child level. Shipment may have Product Description child levels. Traffic Unit may have child levels Person, Transportation Equipment. Person may have a Nature of Injury child level. Product Description may have Container child levels. An Accident Report may have child levels Event, Reference Location, Traffic Unit, Property. Traffic Unit may have child levels Transportation Equipment, Person, Shipment. Transportation Equipment may have child levels Action, Damage, Person. Person may have child levels Action, Nature of Injury. Shipment may have Product Description child levels.

2/0500 The YNQ provides responses to conditions relating to the entity specified in 2/0100.

2/1200 The LQ loop provides report data in coded form.

2/1400 The YNQ provides responses to conditions relating to the data specified in 2/1200.

2/2400 The NM1 loop identifies the entity reporting or receiving the data, the entities involved in the event, or the location of the event.

2/3400 The YNQ provides responses to conditions relating to the entity specified in 2/2400.

285 - Commercial Vehicle Safety and Credentials Information Exchange

FUNCTIONAL GROUP=**CV**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Commercial Vehicle Safety and Credentials Information Exchange Transaction Set (285) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used by enforcement officials, government administrators and other authorized parties to electronically ask for information on the safety performance, regulatory compliance and credentials status of commercial motor vehicles, carriers and drivers. It can also be used by sources that maintain such data to respond to such requests.

Notes

1/0300 The NM1 segment may be used to supply the name of the sender or receiver of the transaction, as well as a communication number.

2/0100 The NX1 segment is used to identify the type of entity, such as motor carrier, vehicle and driver.

286 - Commercial Vehicle Credentials

FUNCTIONAL GROUP=**KM**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Commercial Vehicle Credentials Transaction Set (286) for use within the context of an Electronic Data Interchange (EDI) environment. This bi-directional transaction set can be used by owners, lessees, and drivers of commercial motor vehicles to electronically apply for credentials necessary to legally operate those vehicles, and by authorizing jurisdictions to electronically transmit credential data to applicants and other authorized entities.

3000	SE	Transaction Set Trailer	M	1				

Notes

2/0200 HL01 (Hierarchical ID Number) will be assigned sequentially within the hierarchy starting with one (1) and incremented by one (1) for each HL segment.

2/0200 The HL segment identifies the hierarchical relationship of commercial vehicle credential information carried by the transaction set. A parent level for either a credential action or report is required with optional child levels, for example, company, cost, vehicle, component, measurement, quantity, jurisdiction, and fleet.

288 - Wage Determination

FUNCTIONAL GROUP=**WI**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Wage Determination Transaction Set (288) for use within the context of an Electronic Data Interchange (EDI) environment. This bi-directional transaction set can be used to request and respond to requests for wage information such as prevailing wage rates. This information can be determined by occupational categories, geographical area, nature of the workforce, and contract status.

Table 1

	1200	NTE	Note/Special Instruction	O	>1	
	1300	SE	Transaction Set Trailer	M	1	

Notes

1/0500 The N1 segment identifies the party or agency sending the request, and the party or agency receiving the response. It can also be used to identify the wage determination certifying party and other relevant parties.

1/1000 The REF Segment is used to convey coded categories of services requested.

1/1200 The REF Segment is used to convey an identification number assigned to wage information.

1/1300 The AMT Segment is used to convey values relating to contract expenditures.

1/1500 The LM Loop is required when a request is found to be in non-compliance.

2/0100 The LX Loop conveys wage information.

2/1000 The AMT Segment is used to convey wage rates.

290 - Cooperative Advertising Agreements

FUNCTIONAL GROUP=**CO**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Cooperative Advertising Agreements Transaction Set (290) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to initiate, review, and conclude a cooperative advertising agreement. It is designed to be used iteratively. The transaction set can be used to request advertising support, provide guidelines for local advertising, provide cost or budget estimates, issue a cooperative advertising commitment, and provide the actual expenses.

Table 1

Notes

1/0500 The N1 segment identifies the advertising company, the party responsible for the advertising placement, and all of the local outlets sharing in the cost of the advertising.
1/0800 The ASM segment occurs for each participant.
2/0400 The CRC segment will indicate if the cost of the publication is shared by the participants.
3/0100 The QTY segment indicates the number of participants.

3/0200 The first occurrence of the AMT segment is the campaign summary. The second occurrence identifies the campaign summary to be shared.

300 - Reservation (Booking Request) (Ocean)

FUNCTIONAL GROUP=**RO**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Reservation (Booking Request) (Ocean) Transaction Set (300) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by a shipper or a forwarder to reserve space, containers and equipment for transport by ocean vessel.

301 - Confirmation (Ocean)

FUNCTIONAL GROUP=**RO**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Confirmation (Ocean) Transaction Set (301) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide all the information necessary for an ocean carrier to confirm space, container, and equipment availability in response to the Reservation (Booking Request) (Ocean) Transaction Set (300); or to notify other parties such as terminal operators or other ocean carriers.

304 - Shipping Instructions

FUNCTIONAL GROUP=**SO**
SUBCOMMITTEE=**I**

This X12 Transaction Set provides the format and establishes the data contents of the Shipping Instructions Transaction Set (304) for use within the context of an Electronic Data Interchange (EDI) environment.

When this transaction set is transmitted to an ocean carrier, it provides all the information necessary to prepare and distribute a contract of carriage such as an ocean bill of lading, sea waybill, and other shipping documents. When this transaction set is transmitted to a freight forwarder or customs broker, it provides for the transmission of shipping and financial information required by the forwarder or customs broker to move cargo and provide the services requested.

Notes

1/1150 The currency specified at this position will be in effect for all monetary values except those accompanied by a currency segment. If any other currency segments are transmitted, they will apply to the loop in which they occur.

2/1410 If the hazardous endorsement (LH204) is "NONE", then use of LH204 is mandatory; however, the receiver must consider it to be blanks when printing a paper document.

2/1620 The PO4 loop may be used to transmit layered packaging information. The use of the PO4 loop in Table 2 Position 162 is mutually exclusive with the use of the PO4 loop in Table 2 Position 172 in a single iteration of the LX loop.

2/1720 The PO4 loop may be used to transmit layered packaging information. The use of the PO4 loop in Table 2 Position 172 is mutually exclusive with the use of the PO4 loop in Table 2 Position 162 in a single iteration of the LX loop.

2/1760 The lading quantity of principal interest to the parties exchanging information is transmitted in the LO segment. The quantity ordered and other pertinent lading quantities are to be transmitted in the QTY segments in the LO loop.

2/3000 If the hazardous endorsement (LH204) is "NONE", then use of LH204 is mandatory; however, the receiver must consider it to be blanks when printing a paper document.

309 - Customs Manifest

FUNCTIONAL GROUP=**AQ**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Customs Manifest Transaction Set (309) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by carriers, terminal operators, port authorities, or service centers to provide Customs with manifest data on cargo arriving in or departing from oceangoing vessels, railroad trains, or other types of conveyances. The transaction set can be also used by carriers to provide terminal operators, port authorities, or service centers with manifest data on cargo arriving at their facilities via the conveyances mentioned above.

310 - Freight Receipt and Invoice (Ocean)

FUNCTIONAL GROUP=**IO**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Freight Receipt and Invoice (Ocean) Transaction Set (310) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide ocean bill of lading information. It is sent by ocean carriers to interested parties and can be used as the receipt for the shipment; to substitute for a paper bill of lading where the parties have agreed that a paper bill of lading is not necessary; to allow shipper or forwarder to verify bill of lading information before an original is printed and released; for information purposes, i.e., as a bill of lading copy; by the carrier to convey manifest information to a terminal operator; and as an invoice for freight.

319 - Terminal Information

FUNCTIONAL GROUP=**SO**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Terminal Information Transaction Set (319) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by terminal operators to provide shipment arrival event information to authorized parties. It can be used to transmit information such as arrival of the shipment, availability for pickup, or the actual pickup of the shipment. Some of the authorized parties to shipment are customs house brokers, freight forwarders, or consignees.

323 - Vessel Schedule and Itinerary (Ocean)

FUNCTIONAL GROUP=**SO**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Vessel Schedule and Itinerary (Ocean) Transaction Set (323) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide all the information necessary for an ocean carrier to communicate the schedule and itinerary of an ocean vessel to interested parties.

325 - Consolidation of Goods In Container

FUNCTIONAL GROUP=**SO**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data content of the Consolidation of Goods in Container Transaction Set (325) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to provide information on the goods loaded into a container. It is sent by a consolidator to the deconsolidator or to the consignee.

326 - Consignment Summary List

FUNCTIONAL GROUP=**SO**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Consignment Summary List Transaction Set (326) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to provide a list to a customer of all consignments for which an ocean carrier has accepted or is expected to accept responsibility for the transport of goods. It is sent by an ocean carrier or consolidator to a shipper, freight forwarder, consignee, customs broker, or any other interested party.

350 - Customs Status Information

FUNCTIONAL GROUP=**AU**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Customs Status Information Transaction Set (350) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by the Customs Service (CS) to supply carriers, terminal operators, port authorities and service providers with cargo release and cargo hold information for import shipments. It can also be used by the CS to provide exporters or their agents, carriers, and service providers with information pertaining to export shipments.

Notes

1/0200 The M10 must be present if the P4 loop is used.
1/0400 The P4 and BA1 loops are mutually exclusive.
1/0400 The P4 loop is used when supplying cargo releases and hold information for import shipments.
1/0850 The BA1 Loop is used when supplying status information to exporters or their agents for export shipments.

352 - Customs Carrier General Order Status

FUNCTIONAL GROUP=**AV**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Customs Carrier General Order Status Transaction Set (352) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by carriers, terminal operators, port authorities, or service centers to provide Customs or consignees with bill of lading status information for cargo in or about to go into "General Order" and entry and release information.

353 - Customs Events Advisory Details

FUNCTIONAL GROUP=**AX**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Customs Events Advisory Details Transaction Set (353) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by carriers to notify Customs of events concerning cargo moving in-bond, or of conveyance arrivals or departures. These events include the arrival of containers, or cargo covered by individual ocean bills of lading or in-bond numbers, which have moved in-bond to an inland destination or which have been exported. Carriers can also use this transaction set to notify Customs of the arrival or departure of a conveyance for which an electronic manifest has been filed and for the transfer of custodial liability when an in-bond movement involves multiple legs.

354 - Customs Automated Manifest Archive Status

FUNCTIONAL GROUP=**AY**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Customs Automated Manifest Archive Status Transaction Set (354) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by Customs to inform carriers, terminal operators, port authorities, and service centers that the manifest for a specific vessel or voyage is going to be removed from the system. This means that either all bills of lading on a manifest have been reconciled (or closed) or that a number of them are still open and will be reconciled manually.

355 - Customs Acceptance/Rejection

FUNCTIONAL GROUP=**AZ**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Customs Acceptance/Rejection Transaction Set (355) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by Customs to report errors and discrepancies discovered in the Customs transaction sets to ocean carriers, terminal operators, port authorities and service centers.

2/0500 The N1 segment is used to identify a subsidiary or division of the named insured; and/or a freight forwarder.

404 - Rail Carrier Shipment Information

FUNCTIONAL GROUP=**SR**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Rail Carrier Shipment Information Transaction Set (404) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit rail-carrier-specific bill of lading information to a railroad. It is the initial tender of a shipment between a consignor and a rail carrier and can be used as notification of equipment release and/or a legal bill of lading.

Notes

1/0200 BAX01 is the to location Standard Point Location Code (SPLC).

1/0200 If BAX02 = "T" (Train Consist), then BAX06 must not be blank

1/1400 If the hazardous endorsement (LH204) is "NONE", then use of LH204 is mandatory. However, the receiver must consider it to be blanks when printing a paper document.

1/2300 If the hazardous endorsement (LH204) is "NONE", then use of LH204 is mandatory. However, the receiver must consider it to be blanks when printing a paper document.

419 - Advance Car Disposition

FUNCTIONAL GROUP=**SR**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Advance Car Disposition Transaction Set (419) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide the receiving rail carrier with advance notification of cars being offered for interchange directly or via a switching carrier, to allow for disposition prior to the actual interchange.

Table 1

420 - Car Handling Information

FUNCTIONAL GROUP=**CH**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Car Handling Information Transaction Set (420) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide a carrier which is going to receive a rail car from another rail carrier the means to redirect a home route or pre-block a rail car prior to actual interchange.

423 - Rail Industrial Switch List

FUNCTIONAL GROUP=**RL**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Rail Industrial Switch List Transaction Set (423) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set is intended solely for producing switch lists and equipment notifications. It is not for recording release times and the ordering of empty equipment. It is also to provide switching information agreed to between customer and carrier to show car identity, placement, pull and destination information.

424 - Rail Carrier Services Settlement

FUNCTIONAL GROUP=**SB**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Rail Carrier Services Settlement Transaction Set (424) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to provide detailed information of charges associated with rail services. The information is provided by a rail carrier and is sent to a rail carrier on whose behalf the services were performed.

425 - Rail Waybill Request

FUNCTIONAL GROUP=**WT**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Rail Waybill Request Transaction Set (425) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to request a copy of a revenue or movement waybill from the origin or previous rail carrier. This will be used only when the requesting carrier is unable to locate the original transmission.

426 - Rail Revenue Waybill

FUNCTIONAL GROUP=**RW**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Rail Revenue Waybill Transaction Set (426) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to respond to a request for a rail revenue waybill. Revenue waybill information includes movement, rates, and charges information required to collect revenue from the paying party or parties.

Notes

1/0400 BX05 contains the Standard Carrier Alpha Code (SCAC) of the original roadhaul carrier receiving the shipment.

1/2410 One R2B segment is needed for each line haul carrier participating in the route of the shipment.

1/2410 R2B01 must be present and a valid Rule 260 Junction on all occurrences after the first.

1/2410 When used to convey a Statement of Difference the proportional amount (R2B03) and all divisions (R2C segments) must be present for the road issuing the SD. For other roads in the route, only the proportional amount is required and the divisions are optional.

1/2410 When used to convey a Statement of Difference, all divisions must be present for the road issuing the SD. For other roads in the route, the divisions are optional.

1/2430 When communicating more than one Miscellaneous Charge, send subsequent miscellaneous charges on additional R2D segments associated with a road's R2B segment.

429 - Railroad Retirement Activity

FUNCTIONAL GROUP=**RU**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Railroad Retirement Activity Transaction Set (429) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set provides the sender with the capability to transmit information pertaining to the processing of railroad employee sickness and unemployment benefit claims against retirement funds. This transaction set will support the transfer of claim information from the Retirement Board to carriers as well as supporting corresponding response from a carrier to the Retirement Board.

Table 1

431 - Railroad Station Master File

FUNCTIONAL GROUP=**RM**
SUBCOMMITTEE=**I**

This X12 Transaction Set provides the format and establishes the data contents of the Railroad Station Master File Transaction Set (431) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set will be used by the Association of American Railroads (AAR) and the rail carriers to apply and disseminate information concerning the railroad stations. Rail carriers report to the AAR the addition or deletion of, or changes to, the list of stations they serve as updates to the centrally maintained master file. The AAR in turn provides all updates to the rail carriers and other subscribers to the system.

434 - Railroad Mark Register Update Activity

FUNCTIONAL GROUP=**RJ**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Railroad Mark/Register Update Activity Transaction Set (434) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to allow the Railroad Industry Reference File central site to communicate Mark/Register update activity to subscribers. This information includes the assignment and expiration of railroad reporting marks, Standard Carrier Alpha Codes (SCAC) and unit initials.

Table 1

435 - Standard Transportation Commodity Code Master

FUNCTIONAL GROUP=**RK**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Standard Transportation Commodity Code Master Transaction Set (435) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to transmit Standard Transportation Commodity Codes and associated information.

455 - Railroad Parameter Trace Registration

FUNCTIONAL GROUP=**PB**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Railroad Parameter Trace Registration Transaction Set (455) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by a freight carrier to: (1) request the establishment of a set of parameters used to select movement activity from a central data store over time; (2) request information about past activities within a date range that meets a set of parameters; and (3) request the establishment of a set of parameters for subsequent use on demand.

460 - Railroad Price Distribution Request or Response

FUNCTIONAL GROUP=**TP**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Railroad Price Distribution Request or Response Transaction Set (460) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to request or communicate prices (rates and associated information) between two or more parties. It can send or respond to a rate docket which includes maintenance status, qualifying conditions, geographic data, routes, rates, and interline divisions.

463 - Rail Rate Reply

FUNCTIONAL GROUP=**TP**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Rail Rate Reply Transaction Set (463) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to reply to a Rail Rate Transaction from the receiver's application process based on data content or business rules. This transaction set is used as an application acceptance, application rejection or to indicate that no data was found for a request.

Table 1

Notes

1/0300 The NM1 loop carries information about the party transmitting the report.

2/0100 The HL loop divides a report into sections such as event, patient, device, medication, reporter, user facility, distributor and manufacturer.

2/0200 The LM loop provides report data in coded form.

2/0800 The LIN loop provides product device or medication specific information.

2/1600 The NM1 loop carries party or organization reporting information.

2/3500 CTT01 is the number of occurrences of the HL segment.

501 - Vendor Performance Review

FUNCTIONAL GROUP=**WG**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Vendor Performance Review Transaction Set (501) for use within the context of an Electronic Data Interchange (EDI) environment. This bi-directional transaction set can be used to request and receive past performance information. The transaction set may also be used to challenge the validity of the information received and to respond to challenges.

This transaction set can be used by selling parties to request, receive, and challenge historic information regarding their performance on contracts in the areas of capability, eligibility, quality assurance, and delivery performance.

Notes

2/0100 The CRT loop defines the type of report for which information exists in the database.

2/0400 The SPR segment can carry the rating category and rating summary value codes for pre-award surveys.

2/0500 The N1 loop carries the address of and the information contained in the database of the reporting location.

503 - Pricing History

FUNCTIONAL GROUP=**PH**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Pricing History Transaction Set (503) for use within the context of an Electronic Data Interchange (EDI) environment. This bi-directional transaction set can be used by a purchasing party or vendor to request pricing history information for an item. The transaction set can also be used to respond to a request for pricing history information.

Notes

2/1000 The QTY loop can be used to convey pricing information when multiple quantities of the cited item were purchased.

504 - Clauses and Provisions

FUNCTIONAL GROUP=**CC**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Clauses and Provisions Transaction Set (504) for use within the context of an Electronic Data Interchange (EDI) environment. This bi-directional transaction set can be used to request or respond to requests for clauses and special provisions.

511 - Requisition

FUNCTIONAL GROUP=**RN**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Requisition Transaction Set (511) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to requisition needed material and equipment from a supply distribution system for immediate consumption or stockage against projected requirements. The originator can also use this transaction set to amend or terminate the original requisition. This transaction set may be used to convey a description and quantity of the required material, delivery and billing information, and other logistics information necessary to evaluate and meet the material needs of the originator. This transaction set is not used to establish a contractual relationship between trading partners, and may precede the use of a purchase order.

Notes

1/0500 The LM loop identifies logistic data common to the entire transaction set.

1/0700 The N1 loop identifies name and or address information common to the entire transaction set.

2/1500 Each iteration of the QTY loop qualifies a portion of the total quantity ordered with particular logistics information codes.

2/1800 The N1 loop identifies the name and address information unique to each use of the LX loop.

2/2200 The REF loop conveys serial and lot number inventory data.

517 - Material Obligation Validation

FUNCTIONAL GROUP=**MV**
SUBCOMMITTEE=**M**

This X12 Transaction Set provides the format and establishes the data contents of the Material Obligation Validation Transaction Set (517) for use within the context of an Electronic Data Interchange (EDI) environment. The material obligation validation transaction set may be used to: (1) verify the continued need for open orders, (2) confirm open order quantities and order priority, (3) request reinstatement of erroneously cancelled open orders, and (4) validate Government Furnished Material (GFM) orders. The transaction set may convey a description of the material, the urgency of need associated with the transaction and quantity of required material. This transaction set is bi-directional between trading partners.

521 - Income or Asset Offset

FUNCTIONAL GROUP=**AO**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Income or Asset Offset Transaction Set (521) for use within the context of an Electronic Data Interchange (EDI) environment. This bi-directional transaction set can be created by an agency or entity to require an employer or asset holder to withhold and deliver assets or income on behalf of a person or entity to whom they are owed, as in a levy, lien, or garnishment. It can also be used to confirm or modify a prior notification. This transaction set can also be used by the employer or third party to report the ability to comply with the requirement and the terms of that compliance and may be used to initiate an electronic funds transfer in order to satisfy the requirement.

Notes

1/0300 This BPR segment can be used by the responder to initiate a single electronic funds transfer payment for the entire offset. The amount of the entire offset is the sum of the offsets contained in the PAM segments for individuals or organizations named in Table 2, less any adjustment amounts contained in any AD1 segments.

1/0900 This N1 loop may refer to the issuing agency, the payer or asset holder or its agent, or the entity to which remittance should be sent.

2/0100 This NM1 refers to the obligor.

2/1700 This N1 loop refers to the payees, such as children, custodial parent, or trustee.

3/0100 This AMT segment is used to carry the total monetary value of the transaction set, including all offsets against income or assets of all obligors.

527 - Material Due-In and Receipt

FUNCTIONAL GROUP=**MD**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Material Due-In and Receipt Transaction Set (527) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide advanced notification of scheduled material receipts, to report receipts, and to inquire about the status of receipt reporting.

This transaction set may be used to convey a description of the material, receiving conditions and quantities, necessary contract information, and other logistics information. This transaction set is bi-directional between trading partners.

Notes

1/0500 The LM loop identifies logistics data common to the entire transaction set.

1/0700 The N1 loop identifies name and or address information common to the entire transaction set.

2/0200 The CS segment identifies data related to material obtained from procurement sources.

2/0300 The N9 segment identifies data related to material obtained from non-procurement sources.

2/0900 The N9 segment identifies shipment identification information.

2/1200 The LM loop identifies logistics data unique to each use of the RCD loop.

2/1400 The CS loop identifies contract summary, logistics, and packaging data unique to material received from a procurement source.
2/2100 The N1 loop identifies name and or address information unique to each use of the RCD loop.
2/2500 The REF loop conveys serial number, lot number and inventory data.
2/3100 The QTY loop stratifies the RCD02 quantity based on unique logistic and receiving location data.

536 - Logistics Reassignment

FUNCTIONAL GROUP=**LR**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Logistics Reassignment Transaction Set (536) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to provide information necessary to transfer management responsibility between an old and new managing organization. This transaction set may be used to convey a description and quantity of the transferred material, specific inventory locations, product quality information, technical data, open contract information, demand data, procurement history, and other information necessary for the new managing organization to evaluate and meet the material needs of customers.

540 - Notice of Employment Status

FUNCTIONAL GROUP=**ES**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Notice of Employment Status Transaction Set (540) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to notify government agencies or authorized parties of the identity of newly hired employees, of the termination of employees, or to confirm employment status. The transaction set may also be used to convey this information between authorized parties, or to convey responses from the agency if necessary.

Notes

1/0300 This N1 loop can be used to identify the sender and receiver, such as an agent or transmitter or government agency.
2/0100 This NM1 loop must identify the employer.
2/0600 This REF segment contains the employer identification. Either the Federal Employer Identification Number (FEIN) or a state identification number is required.
2/0700 This ENT loop identifies the employee.
2/1000 The second and subsequent iterations of the N4 segment identify state(s) in which the employee works.
2/1200 This YNQ segment contains an agency response to name, Social Security Number, or other information reported if necessary, e.g., error indications.
2/1300 The DTM segment may optionally contain the employee's birthdate, and may contain Date of Hire, Termination Date, First Day Worked, Last Day Worked, First Pay Date, or Last Pay Date.
2/1400 The HD segment conveys whether health insurance coverage is available for dependents.
2/1500 The EMS segment gives the status of employment.

561 - Contract Abstract

FUNCTIONAL GROUP=**D4**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Contract Abstract Transaction Set (561) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to abstract a new contract, abstract a change in terms of a previously abstracted contract, or to correct a previously transmitted abstract. This bi-directional transaction set includes the information necessary to administer a contract, including modifications and corrections to that contract, and provides an acknowledgment mechanism to enable management of the contract administration process. This transaction set is typically used internally within a business entity as a post-award management report, when the purchasing and contract administration functions are separated within that entity.

Table 3

	POS	ID	NAME	REQ	MAX	REPEAT
N	0100	CTT	Transaction Totals	O	1	
	0200	SE	Transaction Set Trailer	M	1	

Notes

1/0400 The LM loop identifies industry code data unique to the transaction set.

1/0600 The N1 loop carries address information such as the purchasing party and the contract administration office.

2/0200 The CS segment carries the details of a specific contract.

2/0900 To carry the percent variation in quantity over and under for a specified deliverable quantity of an item.

2/1600 The N1 loop carries address information about the contractor, paying office, accounting station, and inventory control point.

2/2200 The N1 loop carries address information for each delivery location.

2/2600 The RRE loop is used to report errors in the contract.

3/0100 CTT01 is the number of iterations of HL segment. If used, CTT02 is the hash total of the values found in quantity ordered (PO102) for each PO1 segment. See data element 347 for proper hashing technique.

567 - Contract Completion Status

FUNCTIONAL GROUP=**D3**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Contract Completion Status Transaction Set (567) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to report administrative closure status on completed contracts. The originator can use this transaction set to close contract files, to indicate why contract files will not be closed within established milestones, or to extend contract closeout milestone dates.

This transaction set may be used to convey contract summary data, financial information, dates pertinent to the administrative closing of a contract file, and logistics information necessary to evaluate contract closeout status.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT

	1500	N4	Geographic Location	O	1	
	1600	SE	Transaction Set Trailer	M	1	

Notes

1/0200 The BC segment can carry a transaction reference number and a reference to a previous transaction number.

1/0500 The CS loop carries the details of the contract(s) being reported and the logistics management information relative to the administrative closeout of the contract(s).

1/0600 The AMT segment carries the amount of obligated dollars which remain unliquidated, if any existed, at the time the contract was administratively closed.

1/0700 The N9 segment contains the number of the last payment voucher applicable to the reported contract.

1/1000 The LM loop identifies logistic data unique to each use of the CS loop.

568 - Contract Payment Management Report

FUNCTIONAL GROUP=**D5**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Contract Payment Management Report Transaction Set (568) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to enable the transmission of a management report to provide the details of payments and collections made against funds obligated on contracts, orders, and other services.

Notes

1/0200 The BGN segment identifies the transaction set purpose code, a unique number used to identify this transmission, and the date and time of transaction set creation.

1/0300 The AMT segment identifies the collected amount and the disbursed amount to the extent that either amount applies to the transaction set.

1/0400 The N1 loop identifies the name and address information for the transmitting and receiving parties.

1/0800 The PER segment identifies the name and communications number of an information point of contact familiar with the details of the contract payment management report.

2/0100 The CS segment identifies the contract, modification, call, and order number of the procurement instrument, and the voucher number of the payment being reported on in this contract payment management report.

2/0200 The N9 segment identifies the number of the original voucher on which a payment was made if the voucher being reported on in this transmission is a change, correction, or adjustment to that previous voucher.

2/0300 The DTM segment identifies the date of the voucher being reported on in this transmission.

2/0400 The LM loop provides the capability to transmit industry-specific codes from an industry-specific code list.

2/0500 The LQ segment identifies the industry-specific codes.

2/0600 The REF segment identifies a reference number associated with the following appropriation data.

2/0900 The N9 segment identifies a contract line item, exhibit line item, or subclassification of either against which specific data is being reported.

2/1000 The AMT segment identifies the gross, net, deducted, or collected amounts and the net variance amount applicable to the line item being reported.

2/1100 The QTY segment identifies the quantity shipped.

2/1300 The LQ segment identifies industry-specific codes applicable to the line item.

2/1400 The N1 loop identifies address information for a quantity delivered in a specific shipment, to a specific ship-to address.

2/1800 The N9 segment identifies the shipment identification number and suffix number, if one exists, for the shipment which resulted in the voucher action.

3/0100 CTT01 identifies the number of CS segments used in the transaction. If used, CTT02 is the hash total of the values found in monetary amount (AMT02) for each AMT segment at position 100 in table 2. See data element 347 for proper hashing technique.

601 - Customs Export Shipment Information

FUNCTIONAL GROUP=**SE**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Customs Export Shipment Information Transaction Set (601) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by exporters or their agents, carriers, and service providers to transmit export shipment information to Customs agencies.

603 - Transportation Equipment Registration

FUNCTIONAL GROUP=**EO**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of a Transportation Equipment Registration Transaction Set (603) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used between transportation equipment owners or controllers and transportation services providers or other interested parties to provide a fleet listing of owned/controlled equipment and their physical attributes such as length, width, and height.

Notes

1/0300 The N1 segment is used to identify the sender and receiver.

2/0200 The originator of the transaction set must use one iteration of the DTM segment to identify the ticket creation date or positive response creation date.
2/0200 The receiver will use the additional iterations of the DTM to define a date and time of forwarding creation.
2/0800 The N1 segment is used to identify parties associated with the excavation.
2/1500 The LIE loop is used to provide physical location information related to the excavation
2/1700 The LM segment is used to identify the one call agency.

625 - Well Information

FUNCTIONAL GROUP=**WL**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data content of the Well Information Transaction Set (625) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set facilitates the exchange of engineering, geological and environmental information related to non-financial well activities. The transaction set can be used between private industry trading partners to relay information about joint venture well activities or between private industry and government agencies.

This transaction set shall not be used to relay financial information such as regulatory royalty payment information or costs associated with well activities.

Notes

1/0300 The HL segment identifies the appropriate level: Report, Contract, Operating Unit, Ancillary Facility, Well, Wellbore, and Well Completion.

1/0400 The PID segment, when used, identifies a component and its accompanying description if needed, for the associated hierarchical level.

1/0700 The YNQ segment provides responses to conditions relevant to the associated hierarchical level.

1/0900 The LIE Loop is used to provide physical location information related to the associated hierarchical level.

1/1000 The PPA segment is used to relay descriptive information about a location.

1/1100 The MEA segment shall only be used to relay measurement information (e.g., 660 feet from section line) associated with a physical location.

1/1200 The CID Loop shall only be used to identify non-location related attributes (e.g., the evaporation rate, the number of producing wells, blowout preventor test pressure measurement) of the associated hierarchical level or a component of the hierarchical level.

1/1300 The QTY segment is used to relay quantities or counts associated with the physical characteristics of a well.

1/1400 The MEA segment shall only be used to relay any physical measurements related to the physical characteristics of a well.

650 - Maintenance Service Order

FUNCTIONAL GROUP=**MO**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes then data contents of the Maintenance Service Order Transaction Set (650) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set provides a uniform, singular medium for the exchange of maintenance related information among organizations involved in the reporting, requesting, scheduling, planning, estimating, coordinating and performing of maintenance actions. It provides the structure to convey maintenance-related information, including maintenance action directives, maintenance actions, cost estimates, maintenance action assignments, maintenance action status, and completion reports. This transaction set can be used in a bi-directional environment alone or in conjunction with the Project Schedule Reporting Transaction Set (806) to linkschedule and maintenance action information as well as with the Specifications/Technical Information Transaction Set (841) to linkmaintenance-related, media independent, technical data.

Notes

1/0500 The N1 segment identifies the organization originating and receiving the transaction set.

2/0100 The HL levels are group workcandidate and workcandidate. Valid HL parent-child relationships are 1) group workcandidate-group workcandidate and 2) group work candidate-workcandidate.

2/0700 The YNQ segment identifies conditions related to a maintenance or repair requirement.

2/1500 The LM loop identifies management data that pertains to each use of the HL loop.

2/1900 The NM1 segment identifies individuals and organizations involved in identifying, coordinating or performing maintenance.

715 - Intermodal Group Loading Plan

FUNCTIONAL GROUP=**GL**
SUBCOMMITTEE=**I**

This X12 Transaction Set provides the format and establishes the data contents of the Intermodal Group Loading Plan Transaction Set (715) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by intermodal or domestic shippers and carriers to provide detailed information on the stowage of containers and other equipment aboard a train. The stowage information may be planned or actual and may be by block or by railcar.

1/0400 The V1 and N4 in positions 040 and 045 and in positions 090 and 095 are mutually exclusive.

753 - Request for Routing Instructions

FUNCTIONAL GROUP=**RF**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Request for Routing Instructions Transaction Set (753) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to request routing instructions and provide general information about merchandise that is ready to be shipped.

Table 1

Notes

1/0350 The YNQ segment shall be used when the shipment has one or more non-unitized containers with more than one purchase order.

1/0400 One iteration of the N1 segment must be used to identify the ship-from location.

2/0200 One iteration of the N1 segment must be used to identify the ship-to location.
2/0850 Segment AT8 provides the total weight, quantity and volume pertaining to the shipment.
2/0880 Segment AT8 provides the total weight, quantity and volume pertaining to the preceding CMC Commodity Classification.
2/0900 The 0210 loop is used to specify the quantities ready to ship for each purchase order.
2/1050 The YNQ segment shall be used to identify an order that shares a non-unitized container with another order.

754 - Routing Instructions

FUNCTIONAL GROUP=**RG**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Routing Instructions Transaction Set (754) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to communicate routing instructions to a supplier for a specific shipment. It can be used also to respond to a Request for Routing Instructions Transaction Set (753).

Notes

1/0400 One iteration of the N1 segment must be used to identify the ship-from location.

2/0100 Either the 0200 loop or the 0300 loop must be used, but both loops must not be used within a single transaction set.

805 - Contract Pricing Proposal

FUNCTIONAL GROUP=**CP**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Contract Pricing Proposal Transaction Set (805) cover sheet and pricing support detail for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set enables the transmission of cost and pricing data for a given contract action and provides pricing support detail data or references where that data can be found in the proposal.

Notes

1/0600 When the N1 loop is used, it will carry the name and address of a party pertinent to the proposal, such as the proposing party, the place(s) of performance, the contract administration, and auditing offices.

1/1600 When CB101 is code "01", "05", "08", "10", "11", "12", "14" or "17", discussion will be carried in the MSG segment in the CB1 loop; numbers and their text descriptions will be carried in the N9 segment of the CB1 loop.

1/1900 When the N1 loop is used, it will carry the name and address of a party needed to clarify a response to a question answered in the CB1 loop, such as party for whom the same or a similar item as the one being proposed, has been previously produced.

2/0400 PD03 is the unit of measurement for the data contained in the PD loop.

2/0800 When the N1 loop is used, it will carry the name and address of a party related to the proposal data such as a major subcontractor whose cost or price information has been rolled up into this price proposal.

3/0300 When the AMT segment is used, it can carry amounts such as the proposed cost, total proposed fee, total proposed profit, total cost of money, total proposed price or alternate proposed price.

806 - Project Schedule Reporting

FUNCTIONAL GROUP=**PJ**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Project Schedule Reporting Transaction Set (806) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set provides for the transmission of planning, scheduling, and status information. The purpose of this transaction set is to establish an initial plan, report progress against the plan, and report changes to the plan. It is designed to serve the needs of government agencies, prime contractors and their subcontractors.

Notes

2/0150 The QTY segment is used to specify a quantity of units which are expected as payments, e.g., trade-ins or returns.

3/0700 Number of line items (CTT01) is the accumulation of the number of IT1 segments. If used CTT02 is the hash total of the quantities invoiced (IT102) for each IT1 segment.

811 - Consolidated Service Invoice/Statement

FUNCTIONAL GROUP=**CI**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Consolidated Service Invoice/Statement Transaction Set (811) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set provides for the billing or reporting of complex and structured service invoice/statement detail.

This standard can be used by organizations who are interested in sending or receiving either consolidated or standalone invoices for service arrangements which require processing other than that done for the typical product invoice.

The Consolidated Service Invoice/Statement can be used as a credit/debit memo to differentiate between payable invoice items and information-only memo items. This transaction set should not be used as a standalone notification of a credit/debit adjustment.

Notes

2/2820 The YNQ segment is used to indicate if passenger or renter is a no-show, or to indicate if insurance was purchased.

2/3850 The NX2 segment is used to convey parsed address information.

2/7352 At least one occurrence of the AMT segment or PCT segment is required.

3/1150 The number of line items (CTT01) is the accumulation of the number of IT1 segments.

812 - Credit/Debit Adjustment

FUNCTIONAL GROUP=**CD**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Credit/Debit Adjustment Transaction Set (812) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to notify a trading partner of an adjustment or billback and may be used to request an adjustment or billback. It identifies and contains the details and amounts covering exceptions, adjustments, credits, or debits for goods or services. This transaction set is multidirectional between trading partners.

Notes

1/0200 BCD05 indicates whether the net of the detail is a credit or a debit.

1/0900 SHD is used to indicate shipment detail relative to credit or debit of returned product.

813 - Electronic Filing of Tax Return Data

FUNCTIONAL GROUP=**TF**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Electronic Filing of Tax Return Data Transaction Set (813) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by tax filers to electronically file tax returns with a federal, state, or local taxing authority and which may initiate payments related to the tax return.

Notes

1/0400 The TIA segment allows for tax information and amounts associated with the entire filing. At least one occurrence of the TIA segment must be present in the transaction set, either in Table 1 or Table 2.

1/0500 This N1 loop reflects names and addresses associated with the entire filing.

2/0500 This N1 loop reflects names and addresses associated with a particular tax form (TFS).

2/0920 At least one occurrence of the TIA segment must be present in the transaction set, either in Table 1 or Table 2.

2/1300 This N1 loop reflects names and addresses associated with a particular subset of a tax form.

2/1800 At least one occurrence of the TIA segment must be present in the transaction set, either in Table 1 or Table 2.

814 - General Request, Response or Confirmation

FUNCTIONAL GROUP=**GE**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the General Request, Response or Confirmation Transaction Set (814) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to request actions to be performed, to respond to a request for actions to be performed or to confirm information related to actions performed.

Notes

1/0400 The N1 loop is used to identify the transaction sender and receiver.

2/0800 The NM1 loop is used to identify the parties associated with the individual line item (LIN), such as an individual consumer in a consolidated third party Consumer Service Provider transaction.

815 - Cryptographic Service Message

FUNCTIONAL GROUP=**CS**
SUBCOMMITTEE=**C**

This X12 Transaction Set contains the format and establishes the data contents of the Cryptographic Service Message Transaction Set (815) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide the data format required for cryptographic key management including the automated distribution and exchange of keys. The mechanism uses X12 structures and data formats and is based on existing standards such as X509 and ANSI X3 and X9 developed by the Accredited Standards Committees (ASCs) X9 and X12. The standard provides an X12 format for key distribution and exchange. The Cryptographic Service Message (CSM) transaction conveys the pertinent keying material for use in the EDI environment. The business requirements addressed in this standard for the key management data encompasses distribution and exchange of keying material in support of authentication, encryption and assurances.

Table 1

Notes

1/0200 The CSB segment and the CSC loop are mutually exclusive. If CSM01 = PKS "Public Key Service Message", then the CSC loop shall be used and the CSB segment shall not be used.

816 - Organizational Relationships

FUNCTIONAL GROUP=**OR**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Organizational Relationships Transaction Set (816) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to transmit pertinent information about a parent organization, its members and the relationship of a member to another member, and/or to the parent organization. A parent organization could be an association, a multi-hospital system, a chain of retail stores, a holding company, etc.

This transaction set can be used to convey the identity and relationship of members to a parent organization; identify eligibility to purchase under the terms and conditions negotiated by a parent organization on behalf of its members; and to update application databases.

Notes

1/0200 BHT03 and BHT04 are mandatory.

1/0400 The N1 loop shall identify the transaction set issuer and optionally provide contact information if necessary.

2/0200 N105, when used, defines the relationship of the entity designated in N102 or N104 to its parent organization.

818 - Commission Sales Report

FUNCTIONAL GROUP=**RP**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Commission Sales Report Transaction Set (818) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to allow a retailer to advise a trading partner of commission sales and salary information. Commission data enables a trading partner to reconcile commission payments and salary support.

Notes

1/0200 SAL06 is required if the reporting period start date is different from the reporting period start date in BSC03. If SAL06 is used, it overrides the date sent in BSC03.

1/0200 SAL07 is required if the reporting period end date is different from the reporting period end date in BSC04. If SAL07 is used, it overrides the date sent in BSC04.

1/1000 SAL06 is required if the reporting period start date is different from the reporting period start date in BSC03. If SAL06 is used, it overrides the date sent in BSC03.

1/1000 SAL07 is required if the reporting period end date is different from the reporting period end date in BSC04. If SAL07 is used, it overrides the date sent in BSC04.

819 - Joint Interest Billing and Operating Expense Statement

FUNCTIONAL GROUP=**JB**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Joint Interest Billing and Operating Expense Statement Transaction Set (819) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit periodic expense details from the operator of an asset to the various owners of that asset (e.g., the operation of a petroleum lease or property having multiple owners).

Notes

2/0380 If the PSA segment is sent in the ⇊ loop, the AMT02 amount is the sum of the quantities in PSA04. If the PSA segment is not used in the ⇊ loop, AMT02 is the sum of the quantities in ⇊03.

3/0100 Amount (AMT02) is the sum of the ⇊ amounts (⇊03).

3/0900 Number of line items (CTT01) is the accumulation of the number of ⇊ segments. If used, hash total (CTT02) is the sum of the value of monetary amounts (⇊03) for each ⇊ segment.

820 - Payment Order/Remittance Advice

FUNCTIONAL GROUP=**RA**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Payment Order/Remittance Advice Transaction Set (820) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to make a payment, send a remittance advice, or make a payment and send a remittance advice.

This transaction set can be an order to a financial institution to make a payment to a payee. It can also be a remittance advice identifying the detail needed to perform cash application to the payee's accounts receivable system. The remittance advice can go directly from payer to payee, through a financial institution, or through a third party agent.

Notes

2/0100 The LOOP ID - 2000 is for vendor or consumer third party consolidated payments.
2/2800 The LOOP ID - 3000 is for tax payments.
2/2870 The LOOP ID - 4000 is for child support payments.
2/2900 The LOOP ID - 5000 is for pension payments.
2/3600 The LOOP ID - 6000 is for payroll payments.
2/4500 The LOOP ID - 7000 is for royalty payments.
2/5600 The LOOP ID - 8000 is for health coverage insurance premium payments.
2/6080 The LOOP ID - 9000 is for third party tax payments.

Comments

1/0350 The TRN segment is used to uniquely identify a payment order/remittance advice.
1/0400 The CUR segment does not initiate a foreign exchange transaction.
1/0700 The LOOP ID - 1000 allows for name/address information for the payer and payee which would be utilized to address remittance(s) for delivery.
2/0100 ENT09 may contain the payee's accounts receivable customer number.
2/0200 Allowing LOOP ID - 2200 to repeat in this area allows the paying entity within a payer and the paid entity within a payee to be identified (not the payer and payee).
2/0800 The LOOP ID - 2300 contains adjustment items which are not netted to an RMR segment in this transaction set.
2/1300 The LOOP ID - 2320 within LOOP ID -2300 is the adjustment line item detail loop.
2/1500 The LOOP ID - 2400 is for open items being referenced or for payment on account.
2/1900 The LOOP ID - 2410 within the LOOP ID - 2400 is the remittance line item detail loop.
2/2100 The LOOP ID - 2420 can only contain adjustment information for the immediately preceding RMR segment and affects the amount (RMR04) calculation. If this adjustment amount is not netted to the immediately preceding RMR, use the LOOP ID - 2300 (position 2/0800).
2/2600 The LOOP ID - 2422 within LOOP ID - 2420 is the adjustment line item detail loop.
2/3700 The AMT segment can be used to provide information about allocation or distribution of net pay that is split across multiple payment orders.
2/5700 The LOOP ID - 8100 contains adjustment items which are not netted to an RMR segment in this transaction set.
2/5900 The LOOP ID - 8210 is for open items being referenced or for payment on account.
2/5980 The LOOP ID - 8211 can only contain adjustment information for the immediately preceding RMR segment and affects the amount (RMR04) calculation. If this adjustment amount is not netted to the immediately preceding RMR, use the outer LOOP ID - 8100 (position 2/5700).

821 - Financial Information Reporting

FUNCTIONAL GROUP=**FR**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Financial Information Reporting Transaction Set (821) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to report balances, detail and summary financial transactions, and other related financial account information.

Notes

1/0300 At least one DTM segment, for period-ending date, must be used. Others are period-starting date, statement-issued (process) date, and transaction-creation date.

1/0500 This N1 segment identifies the forwarder of this transaction. Where the forwarder and the financial institution identified in elements ENT02-04 are different entities, the use of this segment is recommended. The second N1 segment can be used to identify an additional participant in the issuing of the transaction.

1/0600 This PER segment identifies the administrative contact(s) of the forwarder of the transaction.

1/0650 The LM loop is intended to provide information regarding problems and errors which affect all accounts contained within this Financial Information Reporting (821) transaction set. The

description of the problem or error is contained in an Industry Code list identified in the LQ segment.

1/0690 The DTM segment is intended to provide information regarding the expected problem resolution date and/or time. Additional uses of this segment are for the provision of the problem occurrence date and/or time, and the alternate problem resolution date and/or time.

2/0100 This ENT segment provides numeric identification of the originating financial institution and the receiving corporate entity, related to specific accounts.

2/0850 The LM loop is intended to provide information regarding problems and errors which affect the specific account being reported within this ACT loop. The description of the problem or error is contained in an Industry Code list identified in the LQ segment.

2/0890 The DTM segment is intended to provide information regarding the expected problem resolution date and/or time. Additional uses of this segment are for the provision of the problem occurrence date and/or time, and the alternate problem resolution date and/or time.

2/0950 The RTE loop is used to indicate rates associated with the related account, and the effective date of that rate.

2/2400 The NM1 loop is intended to provide individuals or organizations related to the transaction reported in the FIR segment.

2/2800 The DTM is intended to provide a date and/or time related to the individual or organization identified in the NM1 segment.

822 - Account Analysis

FUNCTIONAL GROUP=**AA**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Account Analysis Transaction Set (822) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit detailed balance, service charge and adjustment detail primarily from a bank to its corporate clients. However, this transaction set can also be used between or within corporations.

Notes

1/0300 At least one DTM segment, for the period-ending date, must be used. Others are period-starting date and statement-issued date.

1/0350 This CUR segment identifies the default currency for the entire account analysis.

1/0400 The N1 segment identifies the forwarder of this transaction. Where the forwarder and the financial institution identified in elements ENT02-04 are different entities, the use of this segment is recommended.

1/1000 This RTE segment identifies the default rate(s) for the entire account analysis.

2/0050 The ENT segment provides numeric identification of the originating financial institution and the receiving corporate entity, related to specific account(s).

2/0100 This N1 is to define the originating financial institution and to define the receiving entity associated with the financial information reported.

2/1030 This CUR segment overrides for a particular account the default currency identified in Table 1.

2/1060 This RTE segment overrides for a particular account the default rate(s) identified in Table 1.

2/1100 Multiple balances for the same period can be reported within a single occurrence of the LX loop.

2/1100 The LX segment is used only as a means to start a loop containing balance information.

2/1200 BLN04 through BLN06 are not recommended for usage in transaction set 822. The time period of the analysis is defined in the DTM segment (position 2/1300).

2/1300 The DTM segment is used to reflect the time period of the analysis.

823 - Lockbox

FUNCTIONAL GROUP=**LB**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Lockbox Transaction Set (823) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit lockbox (incoming payments) information and totals from a bankor any other lockbox service provider to a company .

Table 3

POS	ID	NAME	REQ	MAX	REPEAT
0100	SE	Transaction Set Trailer	M	1	

Notes

1/0200 Mandatory: Lockbox (LBX) depository bankID; optionally, identify ultimate recipient (company who has the LBX) of the LBX information.

1/0800 The TRN segment is used to uniquely identify a lockbox transaction set.

1/0900 The DTM segment can be used to indicate the transaction creation (and, optionally, time) and the cutoff date and time for lockbox transactions reported in this transaction set.

2/0100 DEP segment contains LBX ID number, depository bankABA number, and bankacct. number, deposit date/time.

2/0200 AMT = Total deposit dollars.

2/0300 QTY = Number of batches in deposit; number of checks in deposit.

2/0400 REF = Identifies deposit number and/or deposit sequence number.

2/0800 AMT = Total batch dollars.

2/0900 QTY = Number of checks in batch.

2/1100 The BPR segment identifies the payment method.

2/1300 REF = Identifies payee code, MICR line, checknumber and scan line.

2/1400 DTM = Identifies checkdate, postmarkdate, date/time checkreceived by LBX.

2/1440 This ADX loop contains adjustment items which are not netted to an RMR segment in this transaction set.

2/1500 Loop IT1 within the ADX loop is the adjustment line detail loop.

2/1600 N1 = Identifies payer/remitter name, number.

2/2200 Loop RMR is for open items being referenced or for payment on account.

2/2300 N1 = Identifies payer name, number if distinct from remitter name, number.

2/2500 REF = Identifies scan line.

2/2600 DTM = Identifies document date.

2/2700 Loop IT1 within the RMR loop is the remittance line detail loop.

2/3700 This ADX loop can only contain adjustment information for the immediately preceding RMR segment and affects the amount (RMR04) calculation. If this adjustment amount is not netted to the immediately preceding RMR, use the outer ADX loop.

2/4200 Loop IT1 within the ADX loop is the adjustment line detail loop.

Comments

2/0500 Identifies processing or other date/time information.
2/1000 DTM = Identifies processing or other date/time information.

824 - Application Advice

FUNCTIONAL GROUP=**AG**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Application Advice Transaction Set (824) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide the ability to report the results of an application system's data content edits. The results of editing transaction sets can be reported at the functional group, an entire transaction set, or any portion of a transaction set, in either coded or free-form format. It is designed to accommodate the business need of reporting the acceptance, rejection, acceptance with change, or partial acceptance or rejection of any transaction set. The Application Advice should not be used in place of a transaction set designed as a specific response to another transaction set (e.g., purchase order acknowledgment sent in response to a purchase order).

Table 1

Notes

2/0100 The OTI loop is intended to provide a unique identification of the transaction set or portion thereof, that is the subject of this application acknowledgment.

2/0200 The REF segment allows for the provision of secondary reference identification or numbers required to uniquely identify the original transaction set or portion thereof. The primary reference identification or number should be provided in elements OTI02-03.

2/0300 The DTM segment allows for the provision of date, time, or date and time information required to uniquely identify the original transaction set or portion thereof.

2/0400 The PER segment should be utilized if administrative communications contact information is important to the unique identification of the original transaction set or portion thereof.

2/0500 The AMT segment should be utilized if monetary amount information is important to the unique identification of the original transaction set or portion thereof.

2/0600 The QTY segment should be utilized if quantity information is important to the unique identification of the original transaction set or portion thereof.

2/0650 The NM1 segment allows for the provision of entity identification information required to uniquely identify the original transaction set or portion thereof.

2/0820 The RED segment may be used to provide data related to the error condition specified in the associated TED01 element.

2/0830 The REF loop allows for freeform error reporting.

2/0850 The LM loop is used to identify industry-based or proprietary application error conditions.

2/0870 The RED segment may be used to provide data related to the error condition specified in the associated LQ02 element.

826 - Tax Information Exchange

FUNCTIONAL GROUP=**TI**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Tax Information Exchange Transaction Set (826) for use within the context of an Electronic Data Interchange (EDI) environment. This bi-directional transaction set can be used to exchange tax information between various tax agencies and other authorized parties.

Notes

1/0200 The BTI Segment establishes the Tax Information Exchange Program.

1/0280 This YNQ segment refers to the validity of taxpayer identification in Table 1.

2/0100 The TFS segment establishes the tax form, schedule, or type.

2/0400 The TIA segment specifies individual data fields within the tax form, schedule, or type identified in the TFS segment.

2/0420 This YNQ segment refers to the validity of taxpayer identification in the TFS loop.

2/1420 This YNQ segment refers to the validity of taxpayer identification in the FGS loop.

827 - Financial Return Notice

FUNCTIONAL GROUP=**FR**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Financial Return Notice Transaction set (827) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to report to the originator the inability to process, or modifications to, the original payment order.

Table 1

POS	ID	NAME	REQ	MAX	REPEAT
0100	ST	Transaction Set Header	M	1	
0200	RIC	Financial Return	M	1	
0250	CUR	Currency	O	1	
0300	TRN	Trace	O	2	
0400	REF	Reference Information	O	>1	
0500	DTM	Date/Time Reference	O	>1	
LOOP ID - NM1					10
0600	NM1	Individual or Organizational Name	O	1	
0700	N2	Additional Name Information	O	2	
0800	N3	Party Location	O	2	
0900	N4	Geographic Location	O	1	
1000	REF	Reference Information	O	5	
1100	PER	Administrative Communications Contact	O	3	
1200	SE	Transaction Set Trailer	M	1	

Comments

1/0200 RIC identifies error condition, amount, debit/credit and account number of item being returned.

1/0300 Two iterations of the TRN should be used; one with a "1" in the TRN01 to provide a reference identification for the return notice, and one with a "2" in the TRN01 to provide a reference identification for the original payment transaction.

1/0400 REF provides additional identification, such as reference numbers originally sent with the payment order.

1/0500 DTM provides additional identification, such as payment date, check date, postmark date, etc., originally sent with the payment order.

828 - Debit Authorization

FUNCTIONAL GROUP=**DA**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Debit Authorization Transaction Set (828) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to provide information from the paying entity to the financial institution regarding debits that the paying entity has authorized against its account. The financial institution would hold this information then match it against incoming debits to determine whether those debits have been authorized by the account holder.

This transaction set can be used to add new authorizations or cancel existing authorizations.

With regard to electronic debits, this would be used for ACH debit processing only. This transaction set can also be used for paper-based debits (i.e., checks). In the paper-based world, this transaction set would serve the purpose of the "issuance file" or "check register" used in account reconciliation applications.

Either one-time or recurring debits can be authorized with this transaction set.

One transaction set can be used to identify multiple debit authorization details against one bank account.

Table 1

N	0100	CTT	Transaction Totals	M	1	
N	0200	AMT	Monetary Amount Information	O	1	
	0300	SE	Transaction Set Trailer	M	1	

Notes

1/0200 The BAU segment contains information about the account being debited.

1/0500 The N1 through N4 information shall refer to the originator of the Debit Authorization, if it is used.

1/1000 The PER segment contents shall identify the party to be contacted for resolution of debit authorization errors, and must have signing authority on the account, if used.

2/0100 The DAD segment contains detail information regarding the individual debit authorizations. The content refers to the originator of the debit, whereas the BAU refers to the holder of the account being debited.

2/0200 If used, the NM1, N3, N4, REF and PER segments shall refer to the payee of the authorization detailed in the DAD segment.

3/0100 The CTT segment shall contain a count of the number of DAD segments in CTT01. Other data elements of the CTT segment should not be used.

3/0200 The AMT segment is used to reflect the sum of Debit Authorization Detail monetary amounts (DAD08). The total amount shall appear in AMT02, with a qualifier of "TT" in AMT01.

829 - Payment Cancellation Request

FUNCTIONAL GROUP=**PY**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Payment Cancellation Request Transaction Set (829) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to cancel a previously transmitted electronic payment between an originating company and its originating financial institution before funds are released.

Table 1

POS	ID	NAME	REQ	MAX	REPEAT
0100	ST	Transaction Set Header	M	1	
0200	PCR	Payment Cancellation Request	M	1	
0300	TRN	Trace	O	2

0600	QTY	Quantity Information	O	10	
0700	AMT	Monetary Amount Information	O	10	
0800	SE	Transaction Set Trailer	M	1	

Comments

1/0200 PCR identifies type of cancellation.
1/0300 TRN uniquely identifies item(s) to be cancelled. Optional use: unique identifier for Payment Cancellation Request.
1/0400 DTM identifies effective payment date/time.
1/0500 REF identifies ancillary reference information.
1/0600 QTY identifies counts associated with the payment(s).
1/0700 AMT identifies amounts associated with the payment(s).

830 - Planning Schedule with Release Capability

FUNCTIONAL GROUP=**PS**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Planning Schedule with Release Capability Transaction Set (830) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business practice relative to the transfer of forecasting/material release information between organizations.

The planning schedule transaction may be used in various ways or in a combination of ways, such as: (1) a simple forecast; (2) a forecast with the buyer's authorization for the seller to commit to resources, such as labor or material; (3) a forecast that is also used as an order release mechanism, containing such elements as resource authorizations, period-to-date cumulative quantities, and specific ship/delivery patterns for requirements that have been represented in "buckets," such as weekly, monthly, or quarterly. The order release forecast may also contain all data related to purchase orders, as required, because the order release capability eliminates the need for discrete generation of purchase orders.

N	0100	CTT	Transaction Totals	O	1	
	0200	SE	Transaction Set Trailer	M	1	

Notes

2/2200 QTY is used to specify supplemental quantities relevant to the forecast function. However, QTY is not related to the actual forecast quantity in the FST segments.

2/4100 At least one occurrence of segment FST is required, either in the FST loop or within the SDP loop. These two loops are mutually exclusive.

3/0100 Number of line items (CTT01) is the accumulation of the number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (FST01) for each FST segment.

831 - Application Control Totals

FUNCTIONAL GROUP=**CT**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data content of the Application Control Totals Transaction Set (831) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit totals associated with a collection of like transactions.

The items reported in this transaction set must be of the same transaction set ID code.

Table 1

Notes

1/0300 One occurrence of the DTM, N9, or TRN segment must be present. The DTM segments are used to provide a start/end date or time range.

1/0550 At least one QTY segment or AMT loop (1/0600) is required.

832 - Price/Sales Catalog

FUNCTIONAL GROUP=**SC**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Price/Sales Catalog Transaction Set (832) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to furnishing or requesting the price of goods or services in the form of a catalog.

Table 3

	POS	ID	NAME	REQ	MAX	REPEAT
N	0100	CTT	Transaction Totals	O	1	
	0200	SE	Transaction Set Trailer	M	1	

Notes

2/0150 If BCT10 is used and G5301 is used, then the G5301 takes precedence.

2/1695 When TRT04 is used, the TRD segment must be used to provide the ingredient detail information.

2/5500 The LX Loop will occur once for each product name or product variant name, identified in the NFE segment.

3/0100 Number of line items (CTT01) is the accumulation of the number of LIN segments. Hash total (CTT02) is not used in this transaction.

Comments

2/6000 This segment provides the information from the Footer of the nutrition fact panel relating to the Calorie Diet(s). Example a 2000 or 2500 Calorie Diet, also includes the total Fat, Cholesterol, Sodium, Total Carbohydrates, and Dietary Fiber.

833 - Mortgage Credit Report Order

FUNCTIONAL GROUP=**ME**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Mortgage Credit Report Order Transaction Set (833) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by a mortgage originator to request, track, and cancel a series of value-added, investigative credit reports which are typically required in mortgage lending. It is a collection of borrower information that is needed to order a mortgage credit report.

Notes

1/0400 The N1 segment identifies name, address and contact of requestor, vendor, default billing, etc.
2/0200 The REF segment identifies Order Number, Loan Number, etc.
2/0300 The PER segment is contact information for the requesting individual.
2/0400 The K2 segment gives special instructions for credit report.
2/0500 The LRQ segment contains the details of the loan including principal balance, interest rate, payment amounts, etc.
2/0600 The N1 loop identifies repository names, Bill To, Send To names, addresses and contacts.
2/1200 The NX1 loop is the property address for subject loan.
2/1400 The LX loop is the loop reference for individual credit subject.
2/1500 The REF segment is other identifying numbers for individuals.
2/1600 The PER segment identifies communications numbers for individuals.
2/2000 The CIV segment is the civil action liability item(s).
2/2100 The REA loop gives the details of real estate asset owned by individual.
2/2600 The IN1 loop identifies credit subject names, alias, dependents name and demographic data.
2/3000 The NX1 loop is the residence type, address and history.
2/3400 The N1 loop identifies names, addresses and contacts of personal references.
2/3950 The YNQ segment indicates whether or not special action is required for employment, financial assets or consumer credit accounts.
2/4000 The EMP loop provides current and previous employment information
2/4500 The FAA loop provides financial asset information.
2/4800 The IN1 loop identifies co-owners of asset accounts.
2/5100 The CDA loop provides consumer credit account information.
2/5400 The IN1 loop identifies other obligations.

834 - Benefit Enrollment and Maintenance

FUNCTIONAL GROUP=**BE**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Benefit Enrollment and Maintenance Transaction Set (834) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to establish communication between the sponsor of the insurance product and the payer. Such transaction(s) may or may not take place through a third party administrator (TPA).

For the purpose of this standard, the sponsor is the party or entity that ultimately pays for the coverage, benefit or product. A sponsor can be an employer, union, government agency, association, or insurance agency.

The payer refers to an entity that pays claims, administers the insurance product or benefit, or both. A payer can be an insurance company, health maintenance organization (HMO), preferred provider organization (PPO), government agency (Medicare, Medicaid, Champus, etc.), or an entity that may be contracted by one of these former groups.
For the purpose of the 834 transaction set, a third party administrator (TPA) can be contracted by a sponsor to handle data gathering from those covered by the sponsor if the sponsor does not elect to perform this function itself.

Notes

1/0500 The AMT segment is used to record the total Flexible Spending Account contributions in the transaction set.

1/0600 The QTY segment is used to record the total number of subscribers and dependents in the transaction set.

1/0700 At least one iteration of loop 1000 is required to identify the sender or receiver.

2/0100 A Subscriber is a person who elects the benefits and is affiliated with the employer or the insurer. A Dependent is a person who is affiliated with the subscriber, such as a spouse, child, etc., and is therefore entitled to benefits. Subscriber information must come before dependent information. The INS segment is used to note if information being submitted is subscriber information or dependent information.

2/0200 The REF segment is required to link the dependent(s) to the subscriber.

2/3100 Loop 2310 contains information about the primary care providers for the subscriber or the dependent, and about the beneficiaries of any employer-sponsored life insurance for the subscriber.

2/3200 Either NM1 or N1 will be included depending on whether an individual or organization is being specified.

2/5500 Loop 2500 may only appear for the Subscriber.

835 - Health Care Claim Payment/Advice

FUNCTIONAL GROUP=**HP**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Health Care Claim Payment/Advice Transaction Set (835) for use within the context of the Electronic Data Interchange (EDI) environment. This transaction set can be used to make a payment, send an Explanation of Benefits (EOB) remittance advice, or make a payment and send an EOB remittance advice only from a health insurer to a health care provider either directly or via a financial institution.

Notes

2/0030 The LX segment is used to provide a looping structure and logical grouping of claim payment information.

2/0200 The CAS segment is used to reflect changes to amounts within Table 2.

2/0800 The DTM segment in the SVC loop is to be used to express dates and date ranges specifically related to the service identified in the SVC segment.

2/0900 The CAS segment is used to reflect changes to amounts within Table 2.

Comments

1/0400 The TRN segment is used to uniquely identify a claim payment and advice.

1/0500 The CUR segment does not initiate a foreign exchange transaction.

1/0800 The N1 loop allows for name/address information for the payer and payee which would be utilized to address remittance(s) for delivery.

836 - Procurement Notices

FUNCTIONAL GROUP=**RQ**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Procurement Notices Transaction Set (836) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by the buyer to notify the seller or other interested parties of the award or pending award of a contract which may contain some indefinite features, such as delivery schedule, location, and/or quantities. This transaction set can also be used for purchasing actions such as the notification of intent to award or actual award of a small business set-aside purchase, notification of being outside of the competitive range, notice of receipt of protest, notice of receipt of a late bid, notice of bid rejection, notice of the disposition of an unsolicited proposal, public notice of the abstract of bids, and the notification of the award of a requirements type contract.

837 - Health Care Claim

FUNCTIONAL GROUP=**HC**
SUBCOMMITTEE=**N**

This X12 Transaction Set contains the format and establishes the data contents of the Health Care Claim Transaction Set (837) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to submit health care claim billing information, encounter information, or both, from providers of health care services to payers, either directly or via intermediary billers and claims clearinghouses. It can also be used to transmit health care claims and billing payment information between payers with different payment responsibilities where coordination of benefits is required or between payers and regulatory agencies to monitor the rendering, billing, and/or payment of health care services within a specific health care/insurance industry segment.

For purposes of this standard, providers of health care products or services may include entities such as physicians, hospitals and other medical facilities or suppliers, dentists, and pharmacies, and entities providing medical information to meet regulatory requirements. The payer refers to a third party entity that pays claims or administers the insurance product or benefit or both. For example, a payer may be an insurance company, health maintenance organization (HMO), preferred provider organization (PPO), government agency (Medicare, Medicaid, Civilian Health and Medical Program of the Uniformed Services (CHAMPUS), etc.) or an entity such as a third party administrator (TPA) or third party organization (TPO) that may be contracted by one of those groups. A regulatory agency is an entity responsible, by law or rule, for administering and monitoring a statutory benefits program or a specific health care/insurance industry segment.

Notes

1/0200 Loop 1000 contains submitter and receiver information. If any intermediary receivers change or add data in any way, then they add an occurrence to the loop as a form of identification. The added loop occurrence must be the last occurrence of the loop.

2/0150 Loop 2010 contains information about entities that apply to all claims in loop 2300. For example, these entities may include billing provider, pay-to provider address, insurer, primary administrator, contract holder, pay-to plan, pay-to factoring agent, or claimant.

2/1950 The CR1 through CR5 and CRC certification segments appear on both the claim level and the service line level because certifications can be submitted for all services on a claim or for individual services. Certification information at the claim level applies to all service lines of the claim, unless overridden by certification information at the service line level.

2/2500 Loop 2310 contains information about the claim level providers including, but not limited to: rendering, referring, and attending.

2/2900 Loop 2320 contains insurance information about: paying and other Insurance Carriers for that Subscriber, Subscriber of the Other Insurance Carriers, School or Employer Information for that Subscriber.

2/3250 Segments NM1-N4 contain name and address information for the entities referenced in loop 2320.

2/3650 Loop 2400 contains Service Line information.

2/4250 The CR1 through CR5 and CRC certification segments appear on both the claim level and the service line level because certifications can be submitted for all services on a claim or for individual services. Certification information at the claim level applies to all service lines of the claim, unless overridden by certification information at the service line level.

2/4930 Loop 2410 contains compound drug components or medical and surgical supplies with their quantities and prices.

2/5000 Loop 2420 contains information about the service line providers including, but not limited to: rendering, referring and attending. These segments override the information in the claim - level segments if the entity identifier codes in each NM1 segment are the same.

838 - Trading Partner Profile

FUNCTIONAL GROUP=**TD**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Trading Partner Profile Transaction Set (838) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to request, change, verify or transmit business profile information to or from a trading partner. This information can be used by the receiver to facilitate the processing of the sender's business transactions.

The transaction set may be used to convey government survey information, business classification, general survey information, summary supplier ratings, changes in the EDI environment information, tax information, entity relationships, and general business profile information to update automated information data bases between trading partners.

Notes

1/0300 For each occurrence of the PLA segment within the LX loop, the sum of FBB03 for separately identified countries cannot exceed 100.

1/0950 The MS1 segment is used to pass the latitude and longitude of the party identified in the N1 loop.

1/1760 The MS1 segment is used to pass the latitude and longitude of the place/location identified in the LCD loop.

839 - Project Cost Reporting

FUNCTIONAL GROUP=**PK**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Project Cost Reporting Transaction Set (839) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set provides the transmission of cost and schedule information to support performance measurement (earned value), program management reporting, and contract funds status reporting. This transaction set will also support the Department of Defense (DoD), Department of Energy (DoE), NASA, and other government agency Cost/Schedule Control Systems Criteria (C/SCSC) and funds status reporting requirements. It is designed to serve the needs of government agencies, prime contractors, and their subcontractors.

Notes

1/0800 At least one iteration of the N1 loop is required to identify the contractor.

840 - Request for Quotation

FUNCTIONAL GROUP=**RQ**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Request for Quotation Transaction Set (840) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide potential buyers with the ability to solicit price, delivery schedule, and other items from potential sellers of goods and services.

N	0100	CTT	Transaction Totals	O	1	
	0200	SE	Transaction Set Trailer	M	1	

Notes

1/1800 If segment LIN is used, do not use LIN01.

2/2960 The SCH segment is used to specify various quantities of items ordered that are to be scheduled. When this segment is used, the unit of measurement code (SCH02) should always be identical to the unit of measurement code in the associated PO1 segment (PO103) and the sum of values of quantity (SCH01) should always equal the quantity ordered (PO102) in the PO1 segment.

3/0100 The number of line items (CTT01) is the accumulation of the number of PO1 segments. If used, hash total (CTT02) is the sum of the value of quantities ordered (PO102) for each PO1 segment.

841 - Specifications/Technical Information

FUNCTIONAL GROUP=**SP**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Specifications/Technical Information Transaction Set (841) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit or request specifications or technical information between trading partners. It can be used to transmit engineering change and engineering change requests. It can also be used to allow EDI trading partners the ability to exchange a complete or partial technical description of a product, process, service, etc. over the same path as any other EDI transaction. The detail area can include graphic, text, parametric, tabular, image, spectral, or audio data. A transmission includes identification information to assist the receiver in interpreting and utilizing the information included in the transaction.

Further action as a consequence of the receipt and initial processing of the specification or other technical data may or may not require human intervention. The transmission and receipt of the data may require private agreement between the trading partners to automate the receipt of the data.

The total transaction must be in the general form of all ASC X12 transactions so that an EDI computer system will be able to automatically recognize it as a Specification/Technical Information Transaction Set and pass it on for processing of the data itself. The transaction set is not media dependent.

The detail area of the Specification/Technical Information Transaction Set provides a structure which allows for the exchange of a variety of specification information. For example, if the transaction contains information describing a complete assembly, it would be necessary to include the assembly model, the models for each of the individual parts, and the associated specifications. In the case of a process it may be necessary to transmit the specification of the product along with the specifications of the process and raw materials. This transaction set can also be linked to other transaction sets.

This transaction set is not limited to a specific transmission protocol and uses other standards as applicable where they do not conflict with these requirements for specification transaction.

Table 3

POS	ID	NAME	REQ	MAX	REPEAT
0100	SE	Transaction Set Trailer	M	1	

Notes

2/0100 To be meaningful, at least one of the SPI, PID, REF, MEA, EFI or CID loops must be present with each occurrence of the HL loop.

2/2010 If no other sampling is specified, then only the sampling indicated in this segment is performed when the CSS01 event occurs.

2/2010 The sampling sequence specified in the CSS segment will take precedence over any other sampling rate (PSD03, PSD09, SPS06, CSF02, and CSF03) from the point the CSS01 event occurs until the specified sequence is completed.

2/2820 Conditional values specified in DE 740 (Range Minimum) will be interpreted as "greater than or equal to this value." Values specified in DE 741 (Range Maximum) will be interpreted to mean "less than or equal to this value."

2/2820 If no other sampling rate is specified, then the only sampling indicated in the CSF segment is performed while the CSF conditions are met. Sampling will cease when the conditions are no longer met.

2/2820 The sampling rate specified is the CSF segment. It would take precedence over the normal sampling rate specified in PSD03 while the conditions of the CSF segment are satisfied, but would NOT take precedence over the sampling sequence activated by the proposed CSS segment.

2/2840 Either the MEA segment or the STA segment must occur, but not both.

Comments

2/0330 The PRR segment contains the reason for an engineering change.

2/0340 The PRT segment is used to describe what should be done with the parts or assemblies specified in the preceding SPI segment.

2/0350 The PRS segment is used to tell the current status of the parts specified in the SPI segment required to make the change.

2/0400 The repeated pairs of 234 and 234 data elements in the LIN segment can be used to list where this modified part or assembly is used.

2/1700 The CID segment may be used to define either a general class of properties, such as physical properties, or an individual property within a class. The CID loop allows the user the ability to define specifications such as the properties of the item or class, the environmental conditions under which the specifications apply, the test methods to be used, and other parameters related to properties within the current HL hierarchical level.

2/2820 If the conditions are such that several CSF values are activated at the same time, the value with the highest sampling rate shall prevail.

2/2820 Repetitions of the CSF loop allow several frequency changes (and the conditions that would trigger those changes) to be specified.

2/2840 Repetitions of the CID loop will have an implied logical AND between the conditions set in each iteration.

2/2840 The CID loop within the CSF loop is used to specify the conditions that will trigger activation of the conditional value in the CSF segment.

2/2850 The elements of the CID segment identify the conditional property. If the property is a measurement from within the manufacturing process of a plant environment, rather than the product, the segment also identifies the location where the measurements are to be observed.

2/2860 If the condition is based on single test measurements, the MEA segment is used to specify the units of measure, and the open or closed numeric range of the conditional test.

842 - Nonconformance Report

FUNCTIONAL GROUP=**NC**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Nonconformance Report Transaction Set (842) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to report products and processes that do not fulfill specifications or requirements.

The Nonconformance Report Transaction Set provides the ability for the sender to report the nonconformance at the level of detail that is required. It also provides the ability to report the specific nonconformances of a component/part while identifying the assembly as the product that is in nonconformance. The Nonconformance Report Transaction Set may be used to report, initiate, or request actions related to the nonconformance being reported. Financial and accounting information is provided for reporting purposes only.

The Nonconformance Report Transaction Set has the capability to report the cause of the nonconformance and to state the proposed action to be followed to prevent a repetition of the problem.

Notes

2/0100 The HL levels are item, component, product characteristic, report, and serial number. Valid HL Parent-Child relationships are 1) item - component, 2) item - product characteristic, 3) component - product characteristic, 4) report - item, 5) item - serial number, and 6) component - serial number.

843 - Response to Request for Quotation

FUNCTIONAL GROUP=**RR**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Response to Request for Quotation Transaction Set (843) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide potential buyers with price, delivery schedule, and other terms from potential sellers of goods and services, in response to a request for such information.

Notes

1/1800 If segment LIN is used, do not use LIN01.

2/2920 The SCH segment is used to specify various quantities of items ordered that are to be scheduled. When this segment is used the unit of measurement code (SCH02) should always be identical to the unit of measurement code in the associated PO1 segment (PO103) and the sum of values of quantity (SCH01) should always equal the quantity ordered (PO102) in the PO1 segment.

3/0100 Number of line items (CTT01) is the accumulation of the number of PO1 segments. If used, hash total (CTT02) is the sum of the value of quantities ordered (PO102) for each PO1 segment.

844 - Product Transfer Account Adjustment

FUNCTIONAL GROUP=**CF**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Product Transfer Account Adjustment Transaction Set (844) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit specific data in the form of a debit, credit, or request for credit relating to pre-authorized product transfer actions.

846 - Inventory Inquiry/Advice

FUNCTIONAL GROUP=**IB**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Inventory Inquiry/Advice Transaction Set (846) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used in the following ways: (1) for a seller of goods and services to provide inventory information to a prospective purchaser, with no obligation to the purchaser to acquire these goods or services; (2) for a representative of a seller of goods and services to supply inventory information to that seller; (3) for one location to supply another location with inventory information; and (4) for an inquiry as to the availability of inventory with no obligation on the seller of goods and services to reserve that inventory.

Notes

2/3900 The REF loop conveys serial number, lot number, and inventory data.

3/0100 Number of line items (CTT01) is the accumulation of number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (QTY02) of each QTY segment.

847 - Material Claim

FUNCTIONAL GROUP=**MX**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Material Claim Transaction Set (847) for use within the context of an Electronic Data Interchange (EDI) environment. This standard provides trading partners a means to advise each other of costs and charges involved in fabricated or purchased material or both which has been deemed damaged, unusable, or obsolete. This transaction set is not to be used to submit claims against transportation or insurance carriers. The Material Claim Transaction Set (847) can be used in the following ways: (1) for a seller of material to advise the buyer of costs and charges resulting from order cancellation or change and must be based on the buyer's authorization to fabricate or purchase material or both; (2) for a buyer of material to advise the seller of costs and charges resulting from material which was deemed damaged or unusable.

Notes

1/0200 BHT03 and BHT04 are mandatory.

2/0700 The SHP segment is used to show the material's shipped quantity in comparison to the authorization quantities.

2/0900 The DTM segment is used to show dates for the authorization to fabricate or purchase materials.

3/0100 Number of Line Items (CTT01) is the accumulation of the number of HL segments. Hash Total (CTT02) is not used.

Comments

2/1900 The DTM segment is used to provide contact availability times.

848 - Material Safety Data Sheet

FUNCTIONAL GROUP=**MS**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Material Safety Data Sheet Transaction Set (848) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to communicate chemical characteristics, hazards, and precautions for the safe handling and use of a material. The transaction set is intended to convey the information required for a Material Safety Data Sheet (MSDS) as defined by the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard, 29 CFR 1910.1200 in the United States, and Workplace Hazardous Materials Information System (WHIMS) in Canada, and various state, province, and local requirements under right-to-know legislation.

The MSDS provides the receiver with detailed information concerning material identity, emergency response, chemical and physical characteristics, toxicology, and industrial hygiene procedures.

State and federal law dictate who is obligated to provide the MSDS and to whom it should be issued. In addition, third-party providers or others with no statutory obligation may voluntarily provide an MSDS to anyone.

This transaction set allows for transmission of MSDS data in a structured, unstructured, or semi-structured form.

CAUTION: With this transaction set, text format is critical due to the MSDS's primary role as a vehicle for hazards communication. The risk if this information is not transmitted clearly and accurately could be harmful to human life, harmful to the environment, could cause mishandling of product, could result in regulatory non-compliance, and could result in liability.

Trading partners need to agree on how to interpret, store, and display/print MSDS text, especially text contained in the MSG and SD1 segments. For example, a sender may wish to format text so that one print line is mapped to one MSG segment. Segment terminator and data element delimiter characters shall not appear in any MSDS data.

WARNING: Alteration of the original document will occur if the EDI translator or application software converts characters to uppercase. This may adversely affect the appearance, effectiveness, clarity, readability, and communicability of the printed MSDS document.

Table 3

POS	ID	NAME	REQ	MAX	REPEAT
0200	SE	Transaction Set Trailer	M	1	

Notes

2/0100 LIN loop is product level. MSS is section level. The first SD1 loop is safety data relating to the section only. The first CID loop is for complex measurements on safety data. LX loop is used to specify product characteristics, components, or complex measurements (i.e., those with environmental parameters). The second SD1 loop is safety data relating to a particular product characteristic or component. The second CID loop is for complex measurements on safety data, which related to a particular product characteristic or component.

2/0300 Regulation notifications can be contained in MSS or SD1 or both.

2/0500 Trading partners must agree on a convention for text processing that will not split words, and which can convey correct meaning, in successive SD1 or MSG segments.

2/0600 Regulation notifications can be contained in MSS or SD1 or both.

2/0800 Trading partners must agree on a convention for text processing that will not split words, and which can convey correct meaning, in successive SD1 or MSG segments.

849 - Response to Product Transfer Account Adjustment

FUNCTIONAL GROUP=**CF**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Response to Product Transfer Account Adjustment Transaction Set (849) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit a detailed or summary response to a party requesting an accounting adjustment relating to a pre-authorized product transfer.

Notes

2/1900 The AMT segment is to be used only in cases where the amount cannot be computed from other detail.

3/0100 Number of line items (CTT01) is the accumulation of the number of CON segments. If used, hash total (CTT02) is the sum of the quantities (QTY02) for each QTY segment.

3/0200 The AMT segment is to be used only in cases where the amount cannot be computed from other detail.

850 - Purchase Order

FUNCTIONAL GROUP=**PO**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Purchase Order Transaction Set (850) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to the placement of purchase orders for goods and services. This transaction set should not be used to convey purchase order changes or purchase order acknowledgment information.

Notes

1/1800 If segment LIN is used, do not use LIN01.

2/0100 PO102 is required.

2/2950 The SCH segment is used to specify various quantities of items ordered that are to be scheduled. When this segment is used the unit of measurement code (SCH02) should always be identical to the unit of measurement code in the associated PO1 segment (PO103) and the sum of values of quantity (SCH01) should always equal the quantity ordered (PO102) in the PO1 segment.

3/0100 The number of line items (CTT01) is the accumulation of the number of PO1 segments. If used, hash total (CTT02) is the sum of the value of quantities ordered (PO102) for each PO1 segment.

3/0200 If AMT is used in the summary area, then AMT01 will = TT and AMT02 will indicate total transaction amount as calculated by the sender.

851 - Asset Schedule

FUNCTIONAL GROUP=**LS**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Asset Schedule Transaction Set (851) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set provides for the customary and established business and industry practice relative to establishing a schedule of assets and the contractual terms and conditions relating to those assets agreed upon between lessor, lessee, buyer, seller, or any other party needing to establish a precise list of assets.

Notes

1/2600 If PAM06 is used, it identifies the type of lease period. The lease period is described in PAM07 through PAM12.

2/0100 Number of line items (CTT01) is the accumulation of the number of LS1 segments. If used, hash total (CTT02) is the sum of the value of quantities (LS101) for each LS1 segment.

852 - Product Activity Data

FUNCTIONAL GROUP=**PD**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Product Activity Data Transaction Set (852) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to advise a trading partner of inventory, sales, and other product activity information. Product activity data enables a trading partner to plan and ship, or propose inventory replenishment quantities, for distribution centers, warehouses or retail outlets.

The receiver of the transaction set will maintain some type of inventory/product movement records for its trading partners to enable replenishment calculations based on data provided by the distributor, warehouse or retailer.

Notes

1/0600 The reporting location is required. The reporting location is specified explicitly in the N1 segment using the code RL in N101, or implicitly using the SDQ segment (Table 2) with the location data elements. They are mutually exclusive (the SDQ and the N1 with N101 containing RL).

2/0800 The quantity for the item identified in the LIN segment is required. Quantity is specified either in the ZA segment (ZA02) or in the SDQ segment.

3/0100 The number of line items (CTT01) is the accumulation of the number of LIN segments. Hash total (CTT02) is not used in this transaction set.

3/0100 When sending item and activity data in the LIN loop, the CTT segment is required.

853 - Routing and Carrier Instruction

FUNCTIONAL GROUP=**RI**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Routing and Carrier Instruction Transaction Set (853) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set provides the sender with the capability to transmit detailed routing and carrier information pertinent to a route. This transaction set only provides routing information and does not convey information about a shipping event or provide shipping authorization.

Notes

3/0100 The number of line items (CTT01) is the accumulation of the number of TD5 segments. Hash total (CTT02) is not used in this transaction set.

854 - Shipment Delivery Discrepancy Information

FUNCTIONAL GROUP=**DD**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Shipment Delivery Discrepancy Information Transaction Set (854) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to enable a carrier to notify a shipper or consignee of discrepancies between tendered freight and actual delivered freight. Delivery discrepancy data enables a party to track and control damages, overages, and shortages. This transaction set is not used to acknowledge receipt of goods.

Table 1

Notes

1/0400 The L11 segment is used to transmit reference numbers that are unique to the entire shipment, such as a master purchase order number or a master shipment identification number.

1/0600 The N1 loop allows for transmission of information and reference numbers pertaining to the shipper. The N9 could include dock number, door number, or plant number.

2/0100 The LX loop will contain only the information pertaining to the discrepancy.

2/0500 This N1 loop allows for transmission of information and reference numbers pertaining to the consignee.

2/1000 The Q8 loop allows for transmission of detailed information pertaining to the shipment discrepancy.

2/1300 This N1 loop allows for transmission of information pertaining to the final disposition of the shipment.

855 - Purchase Order Acknowledgment

FUNCTIONAL GROUP=**PR**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Purchase Order Acknowledgment Transaction Set (855) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to a seller's acknowledgment of a buyer's purchase order. This transaction set can also be used as notification of a vendor generated order. This usage advises a buyer that a vendor has or will ship merchandise as prearranged in their partnership.

Notes

1/1800 If segment LIN is used, do not use LIN01.

2/0100 PO102 is required.

2/2930 If AMT is used in the detail area, then AMT01 will = 1 and AMT02 will indicate total line amount as calculated by the sender.

2/3100 The SCH segment is used to specify various quantities of items ordered that are to be scheduled. When this segment is used the unit of measurement code (SCH02) should always be identical to the unit of measurement code in the associated PO1 segment (PO103) and the sum of values of quantity (SCH01) should always equal the quantity ordered (PO102) in the PO1 segment.

3/0100 The number of line items (CTT01) is the accumulation of the number of PO1 segments. If used, hash total (CTT02) is the sum of the value of quantities ordered (PO102) for each PO1 segment.

3/0200 If AMT is used in the summary area, then AMT01 will = TT and AMT02 will indicate total transaction amount as calculated by the sender.

856 - Ship Notice/Manifest

FUNCTIONAL GROUP=**SH**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Ship Notice/Manifest Transaction Set (856) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to list the contents of a shipment of goods as well as additional information relating to the shipment, such as order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment. The transaction set enables the sender to describe the contents and configuration of a shipment in various levels of detail and provides an ordered flexibility to convey information.

The sender of this transaction is the organization responsible for detailing and communicating the contents of a shipment, or shipments, to one or more receivers of the transaction set. The receiver of this transaction set can be any organization having an interest in the contents of a shipment or information about the contents of a shipment.

Notes

2/3900 The AMT loop is used to convey monetary amount information pertaining to a shipment or order. The only AMT01 codes that may be used are SM1-Insurance Value, SM2-Declared Value, SM3-Shipment Value, SM4-Pay on Delivery, and SM5-Landed Cost Value.

2/3900 The AMT loop is used with the Shipment or Order levels, as identified by BSN05. The AMT loop does not replace the use of an Invoice document between the trade parties..

3/0100 Number of line items (CTT01) is the accumulation of the number of HL segments. If used, hash total (CTT02) is the sum of the value of units shipped (SN102) for each SN1 segment.

Comments

2/0100 The HL segment is the only mandatory segment within the HL loop, and by itself, the HL segment has no meaning.

857 - Shipment and Billing Notice

FUNCTIONAL GROUP=**BS**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Shipment and Billing Notice Transaction Set (857) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set provides the recipient of a shipment with data for both receipt planning and payment generation.

EDI and telecommunications technologies suggest efficiencies in the way business data is processed. For example, the sender of a shipment may send the recipient's receiving function a Ship Notice/Manifest (856), and the payables function an Invoice (810), even though the contents of these two documents may be largely redundant. In certain business environments, the Shipment and Billing Notice permits the consolidation of these two documents into one.

Specifically, this transaction set is appropriate where the shipment data, when it includes terms and item prices, can be used both to plan receipts and to generate payment. In this environment, the exact prices for the items shipped may not be known in advance by both parties. This transaction set is not appropriate in so-called Evaluated Receipts Settlement (ERS) environments, in which the exact prices for the items shipped have been agreed upon by, and are known to, both parties in advance.

This transaction set is not to be used to replace the Ship Notice/Manifest (856) or Invoice (810) individually, but only to replace both, together. For example, do not use this transaction set in place of a Ship Notice/Manifest while continuing to send either paper or electronic invoice.

Notes

1/0200 BHT01, Hierarchical Structure Code, may only contain the code values 0001, 0002, and 0003.

1/0200 BHT03 and BHT04 are mandatory.

1/0200 When BHT01, Hierarchical Structure Code, contains a value of 0003, the levels of the transaction set are Shipment, Tare (pallet), Pack (carton), Subpack, Order and Item. The levels, when used, must always appear (in the transaction set) in the above order, e.g., the pack level can not be subordinate to the order level, however the pack level may be omitted.

1/0200 When BHT01, the Hierarchical Structure Code, contains a value of 0001, the levels of the transaction set are Shipment, Order, Tare (pallet), Pack (carton), Subpack, and Item. The levels, when used, must always appear (in the transmission) in the above order, e.g., the tare level cannot be subordinate to the item level; however, the pack level may be omitted.

1/0200 When BHT01, the Hierarchical Structure Code, contains a value of 0002, the levels of the transaction set are Shipment, Order, Item, Tare (pallet), Pack (carton), and Subpack. The levels, when used, must always appear (in the transmission) in the above order, e.g., the tare level cannot be subordinate to the pack level; however, the tare level may be omitted.

1/0300 HL01 (Hierarchical ID Number) will be assigned sequentially within the hierarchy starting with one and incremented by one for each HL segment.

1/0300 HL02 (Hierarchical Parent ID) will have the value of 0 when used at the Shipment Level.

1/0300 HL03 (Hierarchical Level Code) may only contain the codes: S (Shipment Level), O (Order Level), T (Tare Level), P (Pack Level), Q (Subpack Level), and I (Item Level).
1/0400 The BS1 loop may only be used at the Shipment Level.
1/0400 The transaction set shall contain one and only one occurrence of the BS1 loop, Shipment level.
1/1800 The BS2 loop may only be used at the Order Level.
1/1800 The Transaction Set shall contain at least one occurrence of the BS2 loop, Order Level.
1/3000 The BS3 loop may only be used at the Tare (pallet) Level.
1/3200 LX01 (Assigned Number) will be sequentially assigned starting with one and incremented by one for each LX segment.
1/3200 The BS4 loop may only be used at the Pack (carton) and Subpack Levels. The Subpack Level may only be used in conjunction with the Pack Level.
1/3200 The LX segment is used to bound the segments for the Pack and Subpack Levels to allow all segments within the loop to be optional. It has no relevance to the application data being sent.
1/3700 The BS5 loop may only be used at the Item Level.
1/3700 There shall be at least one occurrence of the BS5 loop, Item Level within each Order Level.

Comments

1/0100 The structure of this transaction set is one shipment of one or more orders.
1/0100 This transaction set is used to convey information that is normally found on a shipping/receiving document and an invoice, in a paper environment. In most cases prices are excluded from the receiving documents. Care should be exercised to keep this information from the receiving area if it is the current practice to exclude such information. It may be prudent to consult an auditor or legal representative if there is any question.

858 - Shipment Information

FUNCTIONAL GROUP=**SI**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Shipment Information Transaction Set (858) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide the sender with the capability to transmit detailed bill-of-lading, rating, and/or scheduling information pertinent to a shipment.

This transaction set can also be used to exchange Government Bills of Lading (GBLs), Commercial Bills of Lading (CBLs), Transportation Control and Movement Documents (TCMDs), and Personal Property Government Bills of Lading (PPGBLs). It may be used by the U.S. Civilian Government, U.S. Department of Defense, and any of their trading partners to exchange information about the shipment of freight, household goods, and passengers. This transaction set fulfills information requirements established by U.S. Government transportation movement rules and regulations.

Notes

1/0300 BX05 contains the Standard Carrier Alpha Code (SCAC) of the original roadhaul carrier receiving the shipment.

2/1800 If the hazardous endorsement (LH204) is "NONE", then use of LH204 is mandatory. However, the receiver must consider it to be blanks when printing a paper document.

2/2100 All receivers of the EDI transactions covering empty tank cars which last contained hazardous commodities must be able to add the constant words: RESIDUE: LAST CONTAINED ahead of the contents of LHE01 and add the constant: RESIDUE following the contents of the LHE02 when printing paper documents.

2/2200 When used in the hazardous material loop, the segment will identify the various certification, exemption or shipper-related numbers that relate to the specific line item of the shipment that are in addition to the UN/UA number reference in the LH1 segment.

859 - Freight Invoice

FUNCTIONAL GROUP=**FB**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Freight Invoice Transaction Set (859) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide the sender with the capability to transmit an invoice, including charges, allowances, and details, for transportation services rendered.

This transaction set can also be used to exchange transportation services invoice information based on services provided in accordance with Government transportation rules and regulations. It may be used by the U.S. Civilian Government, U.S. Department of Defense, and any of their trading partners to exchange invoice information resulting from the shipment of freight, household goods, and passengers. This transaction set fulfills financial information requirements established by the U.S. Government.

860 - Purchase Order Change Request - Buyer Initiated

FUNCTIONAL GROUP=**PC**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Purchase Order Change Request - Buyer Initiated Transaction Set (860) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide the information required for the customary and established business and industry practice relative to a purchase order change. This transaction can be used: (1) by a buyer to request a change to a previously submitted purchase order or (2) by a buyer to confirm acceptance of a purchase order change initiated by the seller or by mutual agreement of the two parties.

Table 3

	POS	ID	NAME	REQ	MAX	REPEAT
N	0100	CTT	Transaction Totals	O	1	
	0200	SE	Transaction Set Trailer	M	1	

Notes

1/0200 This transaction set is a Receiving Advice unless BRA04 contains a value of "8". When BRA04 contains a value of "8", the transaction set is an Acceptance Certificate and the units

received is the units accepted.

3/0100 The number of line items (CTT01) is the accumulation of the number of RCD segments. If used, hash total (CTT02) is the sum of the value of quantities received (RCD02) for each RCD segment.

862 - Shipping Schedule

FUNCTIONAL GROUP=**SS**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Shipping Schedule Transaction Set (862) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by a customer to convey precise shipping schedule requirements to a supplier, and is intended to supplement the planning schedule transaction set (830). The shipping schedule transaction set will supersede certain shipping and delivery information transmitted in a previous planning schedule transaction, but it does not replace the 830 transaction set. The shipping schedule transaction set shall not be used to authorize labor, materials or other resources.

The use of this transaction set will facilitate the practice of Just-In-Time (JIT) manufacturing by providing the customer with a mechanism to issue precise shipping schedule requirements on a more frequent basis than with the issuance of a planning schedule transaction, e.g., daily shipping schedules versus weekly planning schedules. The shipping schedule transaction also provides the ability for a customer location to issue shipping requirements independent of other customer locations when planning schedule transactions are issued by a consolidated scheduling organization.

863 - Report of Test Results

FUNCTIONAL GROUP=**RT**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Report of Test Results Transaction Set (863) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit the results of tests performed to satisfy a specified product or process requirement. This includes, but is not limited to, test data such as inspection data, certification data, and statistical process control measurements.

Notes

1/1400 The REF segment is to be used to send identification numbers associated with party referenced in the PER.

2/0100 Either the LIN Loop or the HL Loop may be used but not both in the same transaction.

864 - Text Message

FUNCTIONAL GROUP=**TX**
SUBCOMMITTEE=**C**

This X12 Transaction Set contains the format and establishes the data content of the Text Message Transaction Set (864) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide users with a capability to electronically move messages, contracts, explanations, and other one-time communications.

It is the intent of this transaction set to provide electronic communication (messages) for people, not for computer processing. The use of the transaction set to transmit quasi or unique transaction set standards is discouraged.

The use of the Text Message transaction set demands of the sender certain detailed information about the recipient. The transaction set's purpose is to provide communication to the recipient in some human-readable form. The recipient's network will dictate what capabilities are available for delivery of the information. It is the responsibility of the sender to obtain this information and include it in the transmission.

Table 3

POS	ID	NAME	REQ	MAX	REPEAT
0100	SE	Transaction Set Trailer	M	1	

Notes

2/0100 Either the MSG segment or the MTX segment may be used in the same MIT loop.

2/0100 In each MIT loop, at least one occurrence of the MSG segment or the MTX segment is required.

Comments

2/0900 To convey a large quantity of text, use of the MTX segment is preferred. Within an 864 transaction set, to avoid potential processing confusion by the receiving party, either the MTX or MSG segment should be selected for use within the MIT loop.

865 - Purchase Order Change Acknowledgment/Request - Seller Initiated

FUNCTIONAL GROUP=**CA**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Purchase Order Change Acknowledgment/Request - Seller Initiated Transaction Set (865) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by the seller to convey acceptance or rejection of changes to a previously submitted purchase order from the buyer. The transaction set is used by the seller to accept, reject, or modify a purchase order. Also, the transaction set can be seller-initiated to change a purchase order.

N	0200	AMT	Monetary Amount Information	O	5	
	0300	SE	Transaction Set Trailer	M	1	

Notes

1/1800 If segment LIN is used, do not use LIN01.

2/3000 If AMT is used in the detail area, then AMT01 will = 1 and AMT02 will indicate total line amount as calculated by the sender.

3/0100 Number of line items (CTT01) is the accumulation of the number of POC segments. If used, hash total (CTT02) is the sum of the value of quantities ordered (POC03) for each POC segment.

3/0200 When AMT is used, then one occurrence of AMT01 will = TT and AMT02 will indicate total transaction amount as calculated by the sender.

866 - Production Sequence

FUNCTIONAL GROUP=**SQ**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Production Sequence Transaction Set (866) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for the receiver of goods to request the order in which shipments of goods arrive at one or more locations, or to specify the order in which the goods are to be unloaded from the conveyance method, or both. This specifies the sequence in which the goods are to enter the materials handling process, or are to be consumed in the production process, or both. This transaction set shall not be used to authorize labor, materials, or other resources. This transaction set shall not be used to revise any product characteristic specification.

867 - Product Transfer and Resale Report

FUNCTIONAL GROUP=**PT**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Product Transfer and Resale Report Transaction Set (867) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to: (1) report information about product that has been transferred from one location to another; (2) report sales of product from one or more locations to an end customer; or (3) report sales of a product from one or more locations to an end customer, and demand beyond actual sales (lost orders). Report may be issued by either buyer or seller.

Notes

2/2800 The LX loop conveys serial number, lot number, and inventory data.

3/0100 The number of line items (CTT01) is the accumulation of the number of LIN segments. If used, hash total (CTT02) is the sum of the value of quantities (QTY02) for each QTY segment.

868 - Electronic Form Structure

FUNCTIONAL GROUP=**MT**
SUBCOMMITTEE=**C**

This X12 Transaction Set contains the format and establishes the data contents of the Electronic Form Structure Transaction Set (868) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide a structure for transfer of EDI standards, or portions thereof, in an electronic form. These EDI standards include but are not limited to: X12 standards, approved X12 Transaction Sets, UN/EDIFACT standard messages, and industry EDI conventions and guidelines. It is intended to provide users with the following:

The ability to send and receive EDI standards data which can be used to update application or translation software.

The ability to exchange data maintenance information with trading partners about transaction sets, segments, composite data structures, elements and codes that will be used for EDI transmissions.

The ability to transmit complete or partial EDI standards or conventions.

869 - Order Status Inquiry

FUNCTIONAL GROUP=**RS**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Order Status Inquiry Transaction Set (869) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to request all pertinent information relative to an entire purchase order, selected line items on a purchase order, or selected products/services on a purchase order. Inquiry can also be made for all or a selected portion of the customer's ordered items, all or a selected portion of the customer's unshipped items, or all or a selected portion of the customer's shipped items.

Notes

3/0100 CTT01 is the number of HL segments. CTT02 is not used.

870 - Order Status Report

FUNCTIONAL GROUP=**RS**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Order Status Report Transaction Set (870) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to report on the current status of a requirement forecast, an entire purchase order, selected line items on a purchase order, selected products/services on a purchase order, or purchase orders for a specific customer in their entirety or on a selection basis. The transaction set can also be used to report on the current status of single or multiple requisitions. The report format allows for the inclusion of "reasons" relative to the status. This transaction set may also be used to update the supplier's scheduled shipment or delivery dates. This transaction set can result from either an inquiry or a prearranged schedule agreed to by the trading partners.

2/3400 The LX loop conveys serial number, lot number, and inventory data.

3/0100 The number of line items (CTT01) is the accumulation of the number of HL segments. If used, hash total (CTT02) is the sum of the value of quantities ordered (PO102) for each PO1 segment.

872 - Residential Mortgage Insurance Application

FUNCTIONAL GROUP=**ME**
SUBCOMMITTEE=**F**

This X12 Transaction Set contains the format and establishes the data contents of the Residential Mortgage Insurance Application Transaction Set (872) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction can be used by a mortgage originator to request mortgage insurance and to provide supporting information needed to obtain a mortgage insurance commitment on one or several residential mortgage loans. It can also be used, in conjunction with other transaction sets, to provide information needed to obtain an automated underwriting decision from a residential real estate automated underwriting system.

Notes

1/0300 The N1 Segment identifies the transaction requester and service provider entities.

2/0200 The NM1 Segment identifies the loan originator.

2/0400 The LRQ Loop contains information about the loan, borrower, property, and requested coverage.

2/1180 The YNQ segment is used to answer questions regarding the details of specific adjustable mortgage options. (e.g. Is a Fee Required? Is the mortgage payment interest only? Do prepayment restrictions apply?)
2/1400 The SCM Loop contains scores which pertain to the entire loan.
2/1600 The NX1 Loop contains the address of the subject property.
2/1800 The PAS Loop contains the subject property's appraisal information.
2/2110 The REF loop is used to describe appraised property comparable values.
2/2200 The IN1 Loop contains information about the Borrower(s).
2/2400 The YNQ segment is used to answer questions relating to the Home Mortgage Disclosure Act (HMDA). (e.g. Is the borrower a first time home buyer? Did the borrower provide demographic information?)
2/2900 The SCM Loop contains scores for the individual borrower defined in the IN1 Loop.
2/3100 The NX1 Loop contains current and previous address information for the borrower defined in the IN1 Loop.
2/3500 The REA Loop contains general information about the subject property.
2/3700 The MCD Loop contains mortgage loan closing information.
2/4100 The PRJ Loop contains multifamily housing project information about the subject property.

873 - Commodity Movement Services

FUNCTIONAL GROUP=**CU**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Commodity Movement Services Transaction Set (873) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to convey request and response information for commodity movement services. This transaction is not to be used for product sales or purchases.

875 - Grocery Products Purchase Order

FUNCTIONAL GROUP=**OG**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format establishes the data contents of the Grocery Products Purchase Order Transaction Set (875) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to provide for customary and established grocery industry practice relative to the placement of purchase orders for finished goods in a retail or wholesale consumer market. This standard can be used by a retailer or wholesaler organization to request delivery of finished goods from a broker or supplier organization. This transaction set should not be used to convey purchase order changes or purchase order acknowledgment information.

1/0800 The G23 segment can be used at the header level or detail level, but not both. When it is used at the detail level, there must be at least one occurrence of the G23 segment for each iteration of the G68 segment.

1/0900 One occurrence of the N1 loop must be used to identify the party to whom the merchandise is to be shipped.

2/0500 The G23 segment can be used at the header level or detail level, but not both. When it is used at the detail level, there must be at least one occurrence of the G23 segment for each iteration of the G68 segment.

876 - Grocery Products Purchase Order Change

FUNCTIONAL GROUP=**OG**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Grocery Products Purchase Order Change Transaction Set (876) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to provide for customary and established grocery industry practice relative to the changing of purchase orders for finished goods in a retail or wholesale consumer market. This standard can be used by a retailer or wholesaler organization to request a change to a previously submitted purchase order.

Changes are accomplished by restating the value of the data elements to be changed rather than indicating the difference between the old and new value. Deletions are handled by restating the values to zeros or blanks. If an item is to be deleted, the quantity ordered is restated to zero.

FUNCTIONAL GROUP=**DF**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Market Development Fund Allocation Transaction Set (883) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is initiated by a manufacturer and provides for customary and established business and industry practice relative to informing a broker or retailer/wholesaler how funds should be allocated in a market development program.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT

Notes

1/0300 At least two iterations of the N1 segment in the header area are required to identify the broker or buying party, and the manufacturer.

1/0400 The G62 segment in the header area is used to indicate the transaction set generation date and time.

2/0100 The LIN loop in the detail area (0100) is used to provide fund accrual information.

2/0500 Either the 0200 loop or 0300 loop must be used, but both loops cannot be used within a single transaction set.

2/0500 The N1 loop in the detail area (0200) is used to provide allocation of funds by customer (product within customer).

2/1000 The LX loop in the detail area (0300) is used to provide allocation of funds by product (customer within product)

884 - Market Development Fund Settlement

FUNCTIONAL GROUP=**MF**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Market Development Fund Settlement Transaction Set (884) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set provides for customary and established business and industry practice relative to communicating settlement information associated with a single market development fund event. This transaction set is multidirectional between trading partners.

Table 1

	1100	SE	Transaction Set Trailer	M	1	

Notes

1/0300 At least two iterations of the first N1 segment are required to identify the broker or buying party, and the manufacturer.

885 - Retail Account Characteristics

FUNCTIONAL GROUP=**UA**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Retail Account Characteristics Transaction Set (885) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to enable a retailer, wholesaler or broker to provide detailed attributes of a retail store such as store number, size of store, class of trade, product category information, customer demographic information, or marketing, etc. to a trading partner.

Table 1

	1400	SE	Transaction Set Trailer	M	1	

Notes

1/0200 The N1 segment in the header area is used to identify the sending and receiving parties.

1/0300 The DTM segment in the header area is used to specify the transaction generation date and time.

1/0400 The PER segment in the header area is used to identify contacts for the sending party.

2/0300 The DTM segment in the detail area is used to provide the effective date of the retail account characteristics.

886 - Customer Call Reporting

FUNCTIONAL GROUP=**UB**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Customer Call Reporting Transaction Set (886) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to enable a broker or manufacturer to communicate retail store level information such as condition of products, shelf space allocation, store conditions, marketing programs in effect, information on competitor products, selective pricing information, display information, etc.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT

Notes

1/0200 The N1 segment in the header area is used to identify the sending and receiving parties.
1/0300 The PER segment in the header area is used to identify contacts for the sending party.

887 - Coupon Notification

FUNCTIONAL GROUP=**CN**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Coupon Notification Transaction Set (887) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used by a manufacturer to notify a distributor, retail clearing house, manufacturer's agent or broker of the issuance of coupons and to provide information necessary for processing.

Table 1

Notes

1/0300 One iteration of the N1 segment is required to identify the vendor.
1/0700 The PER segment is used to identify the contacts for the sending party.

888 - Item Maintenance

FUNCTIONAL GROUP=**QG**
SUBCOMMITTEE=**M**

This X12 Transaction Set provides the format and establishes the data contents of the Item Maintenance Transaction Set (888) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to enable a manufacturer, supplier, broker, or agent to provide detailed finished goods product information to a partner in a consumer goods market. This transaction set can be used to provide information about new products or changes in existing product specifications. Price changes will not be sent with this transaction set, but can be sent with the Price Change Transaction Set (879).

Notes

1/0200 One iteration of the N1 loop should be used to identify the buying party (BY) to establish the area or location for which the item maintenance applies.

2/0200 The G62 segment is used to specify the effective date for the item maintenance action reflected in G5301.

889 - Promotion Announcement

FUNCTIONAL GROUP=**QG**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Promotion Announcement Transaction Set (889) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by a broker, distributor or manufacturer and provides for customary and established business and industry practice relative to the announcement of promotion allowance amounts, dates and performance conditions that may apply; the replacement of a previously transmitted promotion in its entirety; the cancellation of a previously transmitted promotion; changes to promotion dates; or acceptance of a promotion offered by a broker or supplier. This transaction set is multidirectional between trading partners.

890 - Contract & Rebate Management Transaction

FUNCTIONAL GROUP=**D4**
SUBCOMMITTEE=**M**

This X12 transaction set contains the format and establishes the data contents of the Contract and Rebate Management transaction for use within the context of an Electronic Data Interchange (EDI) environment. This X12 transaction set can be used to confirm, in an electronic format, the details of a contract that has been negotiated between two or more Foodservice parties. Information conveyed in the transaction includes trade party name, address and contact information; trade party role(s), identification of the contract program(s) and the specifics of the program(s) - including specific deals, date(s), contract performance requirements, volume measurements, benchmarks, rebate/billback information, and identification of the product(s), product classification, services(s), and equipment.

1/1700 Loop 0120 is used to identify a parent company.
1/2300 Loop 0140 is used to specify the minimum expected expenditure amount under the contract.
1/2600 Loop 0160 is used to specify the minimum expected quantity purchase under the contract.
1/3000 Loop 0180 is used to identify the party that may make price changes, and the frequency thereof.
2/0200 Loop 0190 specifies programs under the contract.
2/1700 This segment denotes the expected quantity performance by the contractee.
2/3200 Loop 0305 specifies product classes relevant to the program.
2/3800 Loop 0310 specifies products that are relevant to a program.
2/4500 Loop 0320 specifies the price brackets for the product classes (Loop 0305) and products (Loop 0310).
2/4800 Loop 0340 specifies the equipment that is included under a program.
2/5400 Loop 0350 specifies the services that are included under a program.

891 - Deduction Research Report

FUNCTIONAL GROUP=**UD**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Deduction Research Transaction Set (891) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by a seller to request information about a deduction from an invoice. It can also be used by a seller's agent or buyer to provide complete details needed to resolve deduction amounts.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT
	0100	ST	Transaction Set Header	M	1	
	0200	BGN	Beginning Segment	M	1	
N	0300	N1	Party Identification	M	2	
N	0400	PER	Administrative Communications Contact	O	3	

Table 2

	POS	ID	NAME	REQ	MAX	REPEAT

	0700	SE	Transaction Set Trailer	M	1	

Notes

1/0300 The N1 segment in the header area is used to identify the sending and receiving parties.
1/0400 The PER segment in the header area is used to identify contacts for the sending party.

892 - Trading Partner Performance Measurement

FUNCTIONAL GROUP=**WG**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Trading Partner Performance Measurement Transaction Set (892) for use within the context of an Electronic Data Interchange (EDI) environment. The message allows a trading partner to indicate a level of service desired or achieved for specified performance objectives pertaining to a trading partner relationship. The transaction supports any business relationship where performance measures have been identified and the parties wish to share desired goal or achieved performance information in order to improve the levels of service.

Table 1

Table 3

POS	ID	NAME	REQ	MAX	REPEAT
0100	SE	Transaction Set Trailer	M	1	

Notes

2/0100 The CRT loop defines the type of report for which information exists in the database.

2/0300 PMP01 clarifies the reporting period specified in the DTM segment.

2/0300 PMP02 pertains to a CRT01 value of YK - Out of Stock.

2/0300 PMP03 pertains to a CRT01 value of YD - Item Data Synchronization.

2/0300 PMP04 pertains to a CRT01 value of YG - On Time Delivery or YJ- Order to Delivery Cycle Time.

2/0400 The MEA segment identifies the performance goal and performance result for the Performance Measure identified in CRT segment.

2/1300 If needed, the N3 segment is used to provide address location information for the performance measure.

2/1400 If needed, the N4 segment is used to provide geographic location information for the performance measure.

893 - Item Information Request

FUNCTIONAL GROUP=**AM**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Item Information Request Transaction Set (893) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by distributors and brokers to request complete item information from the manufacturers, suppliers, brokers, or agents. The item information will be returned using the Item Maintenance Transaction Set (888). This transaction set can be used also to request product activity. The product activity will be returned using the Product Activity Data Transaction Set (852).

	0600	SE	Transaction Set Trailer	M	1	

Notes

1/0400 At least two occurrences of the N1 loop must be present; one to specify the receiver of the request, and additional segments to identify the recipients of the response.

894 - Delivery/Return Base Record

FUNCTIONAL GROUP=**DX**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Delivery/Return Base Record Transaction Set (894) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to enable a Direct Store Delivery (DSD) vendor to communicate the details of a DSD delivery and is to be used during the checkin procedure.

Table 1

895 - Delivery/Return Acknowledgment or Adjustment

FUNCTIONAL GROUP=**DX**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Delivery/Return Acknowledgment or Adjustment Transaction Set (895) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to enable a distributor or Direct Store Delivery (DSD) vendor to communicate adjustments to a DSD delivery or to acknowledge the completion of a delivery.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT

	0600	SE	Transaction Set Trailer	M	1	

Notes

1/0100 The individual data fields will contain replacement values, not differences. The authentication code in the identification segment will contain the corresponding authentication code from the authentication segment in the Base or Adjustment Transaction immediately preceding it.

896 - Product Dimension Maintenance

FUNCTIONAL GROUP=**QG**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Product Dimension Maintenance Transaction Set (896) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide information about the physical characteristics of items for use in computerized shelf space management systems.

Table 1

Notes

2/1700 Successive occurrences of the PO5 segment allows the sender to provide an equivalent value and unit of measure data for the same product attribute. This supports products that are labeled with both Imperial and Metric values, or if multiple values are listed using the same measuring system. As an example, if the product height in the first PO5 segment is

listed as 1 inch (imperial), in a second PO5 segment the value would be 2.54 centimeters (metric). Or, a product label could list the product weight as 1 pound and 16 ounces.

2/1800 Successive occurrences of the PO6 segment allows the sender to provide an equivalent value and unit of measure data for the same product attribute. This supports products that are labeled with both Imperial and Metric values, or if multiple values are listed using the same measuring system. As an example, if the product height in the first PO6 segment is listed as 1 inch (imperial), in a second PO6 segment the value would be 2.54 centimeters (metric). Or, a product label could list the product weight as 1 pound and 16 ounces.

2/1900 Successive occurrences of the PO7 segment allows the sender to provide an equivalent value and unit of measure data for the same product attribute. This supports products that are labeled with both Imperial and Metric values, or if multiple values are listed using the same measuring system. As an example, if the product height in the first PO7 segment is listed as 1 inch (imperial), in a second PO7 segment the value would be 2.54 centimeters (metric). Or, a product label could list the product weight as 1 pound and 16 ounces.

2/2000 Successive occurrences of the PO8 segment allows the sender to provide an equivalent value and unit of measure data for the same product attribute. This supports products that are labeled with both Imperial and Metric values, or if multiple values are listed using the same measuring system. As an example, if the product height in the first PO8 segment is listed as 1 inch (imperial), in a second PO8 segment the value would be 2.54 centimeters (metric). Or, a product label could list the product weight as 1 pound and 16 ounces.

2/2400 The ING segment is used to identify a product's ingredients excluding healthcare pharmaceuticals. The healthcare pharmaceutical information is provided in the TRT Loop.

2/3000 If TRT04 in loop 2300 is used TRD is required.

2/4200 For the ALG loop, the ALG Segment identifies the product allergens, the N1 Segment identifies the agency responsible for the allergen statements, the REF Segment identifies the regulations pretaining to the specific allergens and the COM Segment provides the URL links to the specific regulation.

2/6900 The LX Loop will occur once for each product name or product variant name, identified in the NFE segment.

Comments

2/8000 This segment provides the information from the Footer of the nutrition fact panel relating to the Calorie Diet(s). Example a 2000 or 2500 Calorie Diet, also includes the total Fat, Cholesterol, Sodium, Total Carbohydrates, and Dietary Fiber.

920 - Loss or Damage Claim - General Commodities

FUNCTIONAL GROUP=**GC**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Loss or Damage Claim - General Commodities Transaction Set (920) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to file a legal claim with a transportation carrier for loss or damage.

Notes

1/1100 F04 is used only for bulk shipment.

924 - Loss or Damage Claim - Motor Vehicle

FUNCTIONAL GROUP=**GC**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Loss or Damage Claim - Motor Vehicle Transaction Set (924) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to file a legal claim with a carrier for loss or damage to a motor vehicle.

Table 1

POS	ID	NAME	REQ	MAX	REPEAT
0100	ST	Transaction Set Header	M	1	
0200	F01	Identification of Claim (Claimant Originated)	M	1

925 - Claim Tracer

FUNCTIONAL GROUP=**GC**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Claim Tracer Transaction Set (925) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by a claimant to request from a carrier the status of a loss or damage claim.

Table 1

947 - Warehouse Inventory Adjustment Advice

FUNCTIONAL GROUP=**AW**
SUBCOMMITTEE=**M**

This X12 Transaction Set contains the format and establishes the data contents of the Warehouse Inventory Adjustment Advice Transaction Set (947) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to inform a warehouse/depositor or other business party of a quantity or status change to inventory records. This transaction set provides detail information concerning the internal adjustments which occur between a warehouse and a depositor or other business party.

980 - Functional Group Totals

FUNCTIONAL GROUP=
SUBCOMMITTEE=

This X12 Transaction Set contains the format and establishes the data contents of the Functional Group Totals Transaction Set (980) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit selected totals and accumulated totals for each type of transaction set contained in a functional group.

Table 1

POS	ID	NAME	REQ	MAX	REPEAT
0100	ST	Transaction Set Header	M	1	
0200	BT1	Batch Totals	M	10	
0400	SE	Transaction Set Trailer	M	1	

990 - Response to a Load Tender

FUNCTIONAL GROUP=**GF**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Response to a Load Tender Transaction Set (990) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide general information relative to a specific shipment. The Response to a Load Tender is used as the response to a Motor Carrier Load Tender Transaction Set (204) which has been used as a load tender.

Table 1

POS	ID	NAME	REQ	MAX	REPEAT
0100	ST	Transaction Set Header	M	1

0700	SE	Transaction Set Trailer	M	1	

993 - Secured Receipt or Acknowledgment

FUNCTIONAL GROUP=**NR**
SUBCOMMITTEE=**C**

This X12 Transaction Set contains the format and establishes the data contents of the Secured Receipt or Acknowledgment Transaction Set (993) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set provides three distinct security services: the 993 provides security protocol error reporting, non-repudiation of receipt for X12.58 authenticated transaction sets or functional groups, and transmission of authentication independent of the document for which the authentication is rendered. When the 993 is used to pass a dis-embodied signature (non-repudiation of origin), both the transaction set and the 993 with the assurance for the transaction set may be transmitted completely independent of each other. A 993 may be generated as a 'trusted receipt' for a 993 that contained a dis-embodied signature.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT
N	0100	ST	Transaction Set Header	M	1	
	0200	AK1	Functional Group Response Header	M	1	
	0300	AK2	Transaction Set Response Header	O	1

N	0600	S4A	Assurance Header Level 2	O	1	
	0700	SVA	Security Value	O	1	
	0800	SE	Transaction Set Trailer	M	1	

Notes

1/0100 A 993 used to report a security protocol or assurance protocol error shall not be acknowledged, thereby preventing an endless cycle of acknowledgments of acknowledgments.

1/0400 A single 993 can report only security protocol or assurance protocol errors; therefore only one SPE or APE segment can occur per transaction.

1/0400 At least one occurrence of the SPE, APE, or S4A loop must be used.

1/0500 A single 993 can report only security protocol or assurance protocol errors; therefore only one SPE or APE segment can occur per transaction.

1/0500 At least one occurrence of the SPE, APE, or S4A loop must be used.

1/0600 At least one occurrence of the SPE, APE, or S4A loop must be used.

1/0600 When two iterations of the S4A loop are used, the first iteration shall contain the assurance (digital signature) and the second iteration shall be used for a trusted time stamp.

996 - File Transfer

FUNCTIONAL GROUP=**FT**
SUBCOMMITTEE=**C**

This X12 Transaction Set contains the format and establishes the data contents of the File Transfer Transaction Set (996) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to transmit file information in formats agreed to by the sending and receiving parties. This transaction set is not intended to replace or bypass the use of existing X12 transaction sets to accommodate internal applications. The transaction set is solely intended for the exchange of formatted electronic accounting machine (EAM), 80 column card images.

Table 1

POS	ID	NAME	REQ	MAX	REPEAT
0100	ST	Transaction Set Header	M	1

997 - Functional Acknowledgment

FUNCTIONAL GROUP=**FA**
SUBCOMMITTEE=**C**

This X12 Transaction Set contains the format and establishes the data contents of the Functional Acknowledgment Transaction Set (997) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to define the control structures for a set of acknowledgments to indicate the results of the syntactical analysis of the electronically encoded documents. The encoded documents are the transaction sets, which are grouped in functional groups, used in defining transactions for business data interchange. This standard does not cover the semantic meaning of the information encoded in the transaction sets.

	POS	ID	NAME	REQ	MAX	REPEAT
NNN	0100	ST	Transaction Set Header	M	1	
NNN	0200	AK1	Functional Group Response Header	M	1	
LOOP ID - AK2						>1
N	0300	AK2	Transaction Set Response Header	O	1	
LOOP ID - AK3						>1
C	0400	AK3	Data Segment Note	O	1	
	0500	AK4	Data Element Note	O	99	
	0600	AK5	Transaction Set Response Trailer	M	1	
	0700	AK9	Functional Group Response Trailer	M	1	
	0800	SE	Transaction Set Trailer	M	1	

Notes

1/0100 Only one acknowledgement can be sent for each functional group. The acknowledgment can be either a single Transaction Set 997 or a single Transaction Set 999 as mutually agreed upon by the trading partners. Different Functional Groups may have different acknowledgements, e.g. some Functional Groups, within the same interchange, may be acknowledged with the 997 and others with the 999.

1/0100 There is only one Functional Acknowledgment Transaction Set per acknowledged functional group.

1/0100 These acknowledgments shall not be acknowledged, thereby preventing an endless cycle of acknowledgments of acknowledgments. Nor shall a Functional Acknowledgment be sent to report errors in a previous Functional Acknowledgment.

1/0200 AK1 is used to respond to the functional group header and to start the acknowledgment for a functional group. There shall be one AK1 segment for the functional group that is being acknowledged.

1/0200 The Functional Acknowledgement is generated at the point of translation, intended for the originator (not any intermediate parties).

1/0200 The Functional Group Header Segment (GS) is used to start the envelope for the Functional Acknowledgment Transaction Sets. In preparing the functional group of acknowledgments, the application sender's code and the application receiver's code, taken from the functional group being acknowledged, are exchanged; therefore, one acknowledgment functional group responds to only those functional groups from one application receiver's code to one application sender's code.

1/0300 AK2 is used to start the acknowledgment of a transaction set within the received functional group. The AK2 segments shall appear in the same order as the transaction sets in the functional group that has been received and is being acknowledged.

Comments

1/0400 The data segments of this standard are used to report the results of the syntactical analysis of the functional groups of transaction sets; they report the extent to which the syntax complies with the standards or proper subsets of transaction sets and functional groups. They do not report on the semantic meaning of the transaction sets (for example, on the ability of the receiver to comply with the request of the sender).

998 - Set Cancellation

FUNCTIONAL GROUP=**AL**
SUBCOMMITTEE=**I**

This X12 Transaction Set contains the format and establishes the data contents of the Set Cancellation Transaction Set (998) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to request the deletion of a previously transmitted transaction set and will indicate the reason for this action, such as diversion or cancelled bill.

Table 1

POS	ID	NAME	REQ	MAX	REPEAT
0100	ST	Transaction Set Header	M	1	
0200	ZD	Transaction Set Deletion - ID, Reason, and Source	M	1	
0300	SE	Transaction Set Trailer	M	1	

999 - Implementation Acknowledgment

FUNCTIONAL GROUP=**FA**
SUBCOMMITTEE=**C**

This X12 Transaction Set contains the format and establishes the data contents of the Implementation Acknowledgment Transaction Set (999) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to define the control structures for a set of acknowledgments to indicate the results of the syntactical and relational analysis of the electronically encoded documents, based upon a full or implemented subset of X12 transaction sets. The encoded documents are the transaction sets, which are grouped in functional groups, used in defining transactions for business data interchange. This standard does not cover the semantic meaning of the information encoded in the transaction sets.

Table 1

	POS	ID	NAME	REQ	MAX	REPEAT
NNN	0100	ST	Transaction Set Header	M	1	
NNN	0200	AK1	Functional Group Response Header	M	1	
LOOP ID - AK2						>1
N	0300	AK2	Transaction Set Response Header	O	1	
LOOP ID - IK3						>1
C	0400	IK3	Implementation Data Segment Note	O	1	
	0500	CTX	Context	O	10	
LOOP ID - IK4						>1
	0600	IK4	Implementation Data Element Note	O	1	
N	0700	CTX	Context	O	10	
N	0800	IK5	Implementation Transaction Set Response Trailer	M	1	
	0900	AK9	Functional Group Response Trailer	M	1	
	1000	SE	Transaction Set Trailer	M	1	

Notes

1/0100 Neither the 997 nor the 999 Acknowledgment shall be acknowledged, thereby preventing an endless cycle of acknowledgments. Nor shall an Implementation Acknowledgment be sent to report errors in a previous Implementation Acknowledgment.

1/0100 Only one acknowledgement can be sent for each functional group. The acknowledgment can be either a single Transaction Set 997 or a single Transaction Set 999 as mutually agreed upon by the trading partners. Different Functional Groups may have different acknowledgements, e.g. some Functional Groups, within the same interchange, may be acknowledged with the 997 and others with the 999.

1/0100 There is only one Implementation Acknowledgment Transaction Set per acknowledged functional group.

1/0200 AK1 is used to respond to the functional group header and to start the acknowledgment for a functional group. There shall be one AK1 segment for the functional group that is being acknowledged.

1/0200 The Functional Group Header Segment (GS) is used to start the envelope for the Implementation Acknowledgment Transaction Sets. In preparing the functional group of acknowledgments, the application sender's code and the application receiver's code, taken

from the functional group being acknowledged, are exchanged; therefore, one acknowledgment functional group responds to only those functional groups from one application receiver's code to one application sender's code.

1/0200 The Implementation Acknowledgement is generated at the point of translation, intended for the originator (not any intermediate parties).

1/0300 AK2 is used to start the acknowledgment of a transaction set within the received functional group. The AK2 segments shall appear in the same order as the transaction sets in the functional group that has been received and is being acknowledged.

1/0700 The CTX Segment shall be used to disambiguate a reported error that is dependent on context.

1/0800 If any implementation guide errors have been reported in IK3 or IK4, then code I5 shall be reported in the IK5 Segment.

Comments

1/0400 The data segments of this standard are used to report the results of the syntactical analysis of the functional groups of transaction sets; they report the extent to which the syntax complies with the standards or proper subsets of transaction sets and functional groups as expressed in compliant implementation guides. They do not report on the semantic meaning of the transaction sets (for example, on the ability of the receiver to comply with the request of the sender).

Introduction to Segments

This introduction is not part of this standard and is provided for information only.

Scope

This section provides the definitions and specifications of the segments used in the construction of transaction sets developed by ASC X12.

Terms and Definitions

X12.6 Application Control Structure contains the formal definitions of terms related to electronic data interchange and ASC X12 Standards. The following definitions are consistent with those formal definitions and are provided in shortened form to aid in the understanding of this section.

Data Segment

A segment is the intermediate unit of information in a transaction set. Segments consist of logically related data elements in a defined sequence. Segments have a unique segment identifier that comprises the first characters of the segment. When segments are combined to form a transaction set, their relationship to the transaction set is defined by a segment requirement designator and a segment sequence. Some segments may be repeated, and groups of segments may be repeated as loops.

Segment Identifier

Each segment has a unique identifier composed of a combination of two or three letters or digits. This section specifies each segment's ID.

Segment Name

This section specifies each segment's name.

Purpose

Each segment is assigned a unique purpose as specified in this section.

Used In Reference

The transaction sets in which the segments are used are listed under the heading "Transaction Sets Used In," referenced by transaction set ID.

Data Element

A data element can represent a qualifier, a value, or text (such as a description). Each data element is assigned an identifier used for reference.

Data Element Position

Data elements are assigned a specific position within a segment.

Data Element Reference Designator

"REF" specifies the position assigned to each data element in a segment. The counting of positions starts with 01 for the first data element and is incremented by one to the end of the segment.

Data Element Identifier

"ID" specifies a unique identifier composed of a combination of one to four digits for simple data elements as assigned in the Data Element Dictionary - Simple Data Elements. If the ID begins with a "C," this indicates that the data element is a composite data structure. Refer to Data Element Dictionary - Composite Data Elements.

Data Element Name

"NAME" specifies the data element's name as assigned in the Data Element Dictionary - Simple Data Elements or Data Element Dictionary - Composite Data Elements.

Repetition Designator

"RPT" specifies that an element's repeat may be one, indicating the simple data element or composite data structure may occur no more than once, or contain a specific value greater than one, indicating the maximum number of occurrences of the simple data element or composite data structure.

Attributes

"ATTRIBUTES" specifies aditional information concerning the data element at the specified position.

Condition Designator

A data element is assigned one of the following three condition designators specifying its need to appear within the segment. The condition designators shown below are each followed by their code abbreviation in parentheses.

1. Mandatory (M)

This element is required to appear in the segment.

2. Relational (X)

See Relational Conditions.

3. Optional (O)

The appearance of this data element is at the option of the sending party or is based on the mutual agreement of the interchange parties.

Relational Conditions

Relational conditions may exist between two or more data elements within a segment based on the presence or absence of one of those data elements (presence means a data element must not be empty). Relational conditions are specified by a condition code and the identity of the subject elements.

Within a segment, the existence of a relational condition is indicated by the designator "X" in the attributes column.

The relational condition is displayed under the heading "Syntax Notes." The number on the left identifies the reference designator of the first data element of the relational condition. A statement of the conditional relation is provided in two forms: a code and verbiage to explain the code.

The code is constructed using an uppercase letter (P, R, E, C, or L) followed by the two-digit number of the data element reference designator for each data element included in the relational condition. For example, P0102 represents a paired relation between the first and second data elements of the segment.

The codified relation statement is constructed as follows. The first character represents one of the following relations.

CODE
CONDITION
REQUIREMENT

P
Paired or Multiple
If any data element specified is present, then all must be present.

R
Required
At least one of the data elements specified must be present.

E
Exclusion
No more than one of the data elements specified may be present.

C
Conditional
If the first data element specified is present, then all others must be present. However, any or all data elements not specified as the first may appear without requiring that the first data element be present.

L
List Conditional
If the first data element specified is present, then at least one of the others must be present. However, any or all data elements not specified as the first may appear without requiring that the first data element be present.

Notes and Comments

Where syntax and semantic notes appear under the segment they are considered part of the standard. Where comments are included, they are not considered part of the standard. Multiple notes and comments could appear for the same data element.

Syntax Notes

Dependencies based on the presence or absence of other data elements, such as a weight and its unit of measure, are shown as syntax notes. Other types of syntactic notes may also appear. This type of note defines a syntactical relationship and, therefore, is considered to be part of the standard.

Semantic Note Designator (Z)

A data element within a segment may have a designator ("Z") that indicates the existence of a semantic note. Such a note provides important additional information about the intended meaning of the data element in the context of its use within the segment. The note may also define a relationship among data elements based on the presence of one or more values in one of the data elements. Semantic notes are considered part of the standard.

If a condition designator and a semantic note both affect a single data element, the condition will appear first, separated from the semantic note designator by a slash separator bar (/).

Semantic notes that are general in nature are identified by the designator "00" to the left of the note.

Comments

Comments are provided to clarify or aid in understanding the intended use of the segment. Comments are not considered part of the standard. Comments that are general in nature are identified by the designator "00" to the left of the comment.

Where reference is made to a Figures Appendix, refer to the Figures section of this publication.

Restricted Segments

Restricted segments are used for managing electronic data interchange and are not used in business application transaction sets. These segments are indicated in the Segment Directory by a shaded notation identifying them as either "Management" or "Control" segments.

Deletions

Segments approved for deletion effective for this release, appear as flagged entities until the next annual release and will subsequently be removed at that version release.

Segments

AAA - Request Validation
ACD - Account Description
ACK - Line Item Acknowledgment
ACS - Ancillary Charges
ACT - Account Identification
AD1 - Adjustment Amount
ADI - Animal Disposition
ADJ - Adjustments to Balances or Services
ADT - Animal Parturition Status
ADV - Advertising Demographic Information
ADX - Adjustment
AEI - Equipment Information Summary
AES - Automatic Equipment Identification Site Information
AIN - Income
AK1 - Functional Group Response Header
AK2 - Transaction Set Response Header
AK3 - Data Segment Note
AK4 - Data Element Note
AK5 - Transaction Set Response Trailer
AK9 - Functional Group Response Trailer
ALG - Allergen
AM1 - Informational Values
AMT - Monetary Amount Information
ANI - Animal Identification
AOC - Animal Offspring Counts
AOI - Animal Offspring/Fetus Identification

AOL - Animal Observation Location
AOR - Animal Observation Result
AP1 - Alternate Parts
APE - Assurance Protocol Error
API - Activity or Process Information
APR - Association of American Railroads Pool Code Restrictions
ARC - Animal Results Counts
ARS - Applicant Residence Specifics
ASI - Action or Status Indicator
ASL - Asset Liability
ASM - Amount and Settlement Method
ASO - Asset Ownership
AST - Animal Reproductive Status
AT1 - Bill of Lading Line Item Number
AT2 - Bill of Lading Line Item Detail
AT3 - Bill of Lading Rates and Charges
AT4 - Bill of Lading Description
AT5 - Bill of Lading Handling Requirements
AT6 - International Manifest Information
AT7 - Shipment Status Details
AT8 - Shipment Weight, Packaging and Quantity Data
AT9 - Trailer or Container Dimension and Weight
ATA - Beginning Segment for Motor Carrier Delivery Trailer Manifest
ATH - Resource Authorization
ATN - Attendance
ATR - Animal Test Result
ATV - Student Activities and Awards

AVA - Funds Availability
AWD - Amount with Description
AXL - Vehicle Axle Measurements
B1 - Beginning Segment for Booking or Pickup/Delivery
B10 - Beginning Segment for Transportation Carrier Shipment Status Message
B11 - Beginning Segment for Shipment Status Inquiry
B12 - Beginning Segment for Consolidation of Goods In Container
B13 - Beginning Segment for Appointment Schedule
B2 - Beginning Segment for Shipment Information Transaction
B2A - Set Purpose
B3 - Beginning Segment for Carrier's Invoice
B3A - Invoice Type
B3B - Beginning Segment for Rail Carrier's Invoice
B4 - Beginning Segment for Inquiry or Reply
B9 - Beginning Segment for Logistics Services
B9A - Service Request
BA1 - Export Shipment Identifying Information
BA2 - Beginning Segment for Cargo Terminal Information
BAA - Beginning Segment for Product Transfer Account Adjustment
BAK - Beginning Segment for Purchase Order Acknowledgment
BAL - Balance Detail
BAT - Batch
BAU - Beginning Segment for the Debit Authorization
BAX - Beginning Segment for Advance Consist and Transportation Automatic Equipment ID
BBC - Legal Claims
BC - Beginning Segment for Contract Completion Status
BCA - Beginning Segment for Purchase Order Change Acknowledgment

BCD - Beginning Credit/Debit Adjustment
BCH - Beginning Segment for Purchase Order Change
BCI - Basic Claim Information
BCM - Beginning Segment for Contractor Cost Data Reporting
BCO - Beginning Segment for Procurement Notices
BCP - Beginning Segment for Contract Pricing Proposal
BCQ - Beginning Segment for Shipper's Car Order
BCS - Beginning Segment for Project Cost Reporting
BCT - Beginning Segment for Price/Sales Catalog
BCU - Legal Claim Updates
BDD - Beginning Segment for Shipment Delivery Discrepancy Information
BDS - Binary Data Structure
BEG - Beginning Segment for Purchase Order
BEN - Beneficiary or Owner Information
BEP - Borrower Education Program
BER - Beer Information
BFR - Beginning Segment for Planning Schedule
BFS - Borrower Financial Summary
BGF - Beginning Segment for File Transfer Information
BGN - Beginning Segment
BGP - Beginning Segment for Problem Log Inquiry or Advice
BHT - Beginning of Hierarchical Transaction
BIA - Beginning Segment for Inventory Inquiry/Advice
BIG - Beginning Segment for Invoice
BIN - Binary Data Segment
BIX - Beginning Segment for Automotive Inspection
BJF - Beginning Segment Railroad Junctions and Interchanges Update Activity

BL - Billing Information
BLI - Basic Baseline Item Data
BLN - Balance Information
BLR - Transportation Carrier Identification
BLS - Beginning Segment for Asset Schedule
BMA - Beginning Segment for Market Development Fund Allocation
BMG - Beginning Segment For Text Message
BMM - Beginning Segment for Multilevel Railcar Load Details Transaction
BMP - Beginning Segment for Market Development Fund Settlement
BMS - Beginning Segment For Material Safety Data Sheet
BNR - Beginning Segment For Nonconformance Report
BNX - Rail Shipment Information
BOL - Beginning Segment for the Motor Carrier Bill of Lading
BOR - Beginning of Report
BOS - Beginning Segment for Joint Interest Billing and Operating Expense Statement
BOX - Box Office Detail
BPA - Beginning Segment for Price Authorization Acknowledgment/Status
BPP - Beginning Segment for Project Schedule Reporting
BPR - Beginning Segment for Payment Order/Remittance Advice
BPT - Beginning Segment for Product Transfer and Resale
BQR - Beginning Segment for Response to Request for Quotation
BQT - Beginning Segment for Request for Quotation
BR - Beginning Segment for Material Management
BRA - Beginning Segment for Receiving Advice or Acceptance Certificate
BRC - Beginning Segment for Response to Product Transfer Account Adjustment
BRR - Beginning Segment for Railroad Mark Register Update Activity
BSC - Beginning Segment for Commission Sales Report and Periodic Compensation

BSD - Breakdown Structure Description
BSF - Business Function
BSI - Beginning Segment for Order Status Inquiry
BSN - Beginning Segment for Ship Notice
BSR - Beginning Segment for Order Status Report
BSS - Beginning Segment for Shipping Schedule/Production Sequence
BSW - Beginning Segment for Carrier's Services Settlement
BT1 - Batch Totals
BTA - Beginning Tax Acknowledgment
BTC - Beginning Segment for Parameter Trace Registration
BTI - Beginning Tax Information
BTP - Beginning Segment For Trading Partner Profile
BTR - Beginning Segment for Test Results
BTS - Beginning Segment for Train Sheets
BUY - Loan Buydown
BVA - Beginning Vehicle Advice
BVB - Beginning Segment for Vehicle Baying Order
BVI - Beverage Information
BVP - Beginning Segment for Vehicle Shipping Order
BVS - Beginning Segment for Vehicle Service
BW - Beginning Segment for Weight Message Set
BX - General Shipment Information
C2 - Bank ID
C3 - Currency Identifier
C4 - Alternate Amount Due
C8 - Certifications and Clauses
C8C - Certifications Clauses Continuation

CA1 - Rate Request Identifier
CAD - Carrier Details
CAI - Civil Action Income
CAL - Calendar
CAS - Claims Adjustment
CAT - Category of Patient Information Service
CB1 - Contract and Cost Accounting Standards Data
CBS - Cost Breakdown Structure
CCI - Credit Counseling Information
CD - Shipment Conditions
CD1 - Cargo Detail
CD2 - Multi-Valued Characteristics
CD3 - Carton (Package) Detail
CDA - Consumer Credit Account
CDD - Credit/Debit Adjustment Detail
CDI - Change Detail Information
CDS - Case Description
CED - Administration of Justice Event Description
CER - Certification

ZD - Transaction Set Deletion - ID, Reason, and Source
ZR - Waybill Reference Identification
ZT - Waybill Request Information

AAA - Request Validation

To specify the validity of the request and indicate follow-up action authorized

TRANSACTION SETS USED IN

147 200 269 271 274 278 359 832 849

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	559	Agency Qualifier Code	1	O	ID	2/2
03	901	Reject Reason Code	1	O	ID	2/2
04	889	Follow-up Action Code	1	O	ID	1/1
05	1787	Error Reason Code	99	O	ID	2/2

Semantic Notes

01 AAA01 designates whether the request is valid or invalid. Code "Y" indicates that the code is valid; code "N" indicates that the code is invalid.

Comments

02 If AAA02 is used, AAA03 contains a code from an industry code list.

ACD - Account Description

To specify type of relationship between entity and vendor or financial institution

TRANSACTION SETS USED IN

155

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1636	Account Relationship Code	1	O	ID	1/2
02	650	Rating Remarks Code	1	O	ID	2/2
03	1262	Loan Type Code	1	O	ID	1/2

ACK - Line Item Acknowledgment

To acknowledge the ordered quantities and specify the ready date for a specific line item

TRANSACTION SETS USED IN
855 865

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	668	Line Item Status Code	1	M	ID	2/2
02	380	Quantity	1	X	R	1/15

17 P1718
19 P1920
21 P2122
23 P2324
25 P2526
27 P2728
28 C282729

Semantic Notes

29 ACK29 Industry Reason Code may be used to identify the item status. In addition, it may be used in conjunction with ACK01 to further clarify the status.

ACS - Ancillary Charges

To identify additional charges and payment terms for shipment charges that may or may not be directly related to a line item

TRANSACTION SETS USED IN

104 110 215

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	610	Amount	1	M/Z	N2	1/15
02	150	Special Charge or Allowance Code	1	M	ID	3/3
03	352	Description	1	O	AN	1/80
04	146	Shipment Method of Payment Code	1	O	ID	2/2

Semantic Notes

01 ACS01 for a line item: is the freight or special charge; for the total invoice: the total charges -- expressed in the standard monetary denomination for the currency specified.

Comments

02 If ACS02 contains the value "999" (indicating Other), then ACS03 is required to identify the charge.

ACT - Account Identification

To specify account information

TRANSACTION SETS USED IN

148 186 198 201 248 252 255 267 268 273 274 821 822 833 834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	508	Account Number	1	M	AN	1/35
02	93	Name	1	O/Z	AN	1/60
03	66	Identification Code Qualifier	1	X	ID	1/2
04	67	Identification Code	1	X	AN	2/80
05	569	Account Number Qualifier	1	X	ID	1/3
06	508	Account Number	1	X	AN	1/35
07	352	Description	1	O/Z	AN	1/80
08	107	Payment Method Type Code	1	O	ID	1/2
09	1216	Benefit Status Code	1	O	ID	1/1

Syntax Notes

03	P0304
05	C0506
07	C0705

Semantic Notes

02	ACT02 is the name of the account in ACT01.
07	ACT07 is the name associated with the account identified in ACT06.

Comments

06	ACT06 is an account associated with the account in ACT01.
08	ACT08 indicates if the data for the account in ACT01 is used for billing or information purposes.

AD1 - Adjustment Amount

To specify the characteristics of an adjustment

TRANSACTION SETS USED IN

148 187 521 811 834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	426	Adjustment Reason Code	1	M	ID	2/2
02	782	Monetary Amount	1	O/Z	R	1/18
03	1129	Adjustment Reason Code Characteristic	1	O	ID	1/2
04	594	Frequency Code	1	O/Z	ID	1/1
05	9	Late Reason Code	1	O	ID	2/2

Semantic Notes

02 AD102 is the adjustment amount.

04 AD104 is frequency of the AD102 monetary amount.

ADI - Animal Disposition

To record the disposition of an individual animal

TRANSACTION SETS USED IN
249

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1606	Animal Disposition Code	1	M	ID	2/2
02	373	Date	1	M/Z	DT	8/8
03	1313	Test Period or Interval Value	1	X/Z	N0	1/6
04	344	Unit of Time Period or Interval Code	1	X	ID	2/2

Syntax Notes

03	P0304

Semantic Notes

02	ADI02 identifies the date of disposition or termination.
03	ADI03 identifies the dose day or interval on test of disposition or termination.

ADJ - Adjustments to Balances or Services

To identify adjustments to account balances or service charges on the account

TRANSACTION SETS USED IN

822

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	952	Adjustment Application Code	1	M	ID	1/2
02	782	Monetary Amount	1	M/Z	R	1/18
03	782	Monetary Amount	1	O/Z	R	1/18
04	373	Date	1	M/Z	DT	8/8
05	373	Date	1	M/Z	DT	8/8
06	1470	Number	1	O/Z	N0	1/9
07	352	Description	1	O	AN	1/80
08	235	Product/Service ID Qualifier	1	X	ID	2/2
09	234	Product/Service ID	1	X	AN	1/80
10	610	Amount	1	X/Z	N2	1/15
11	610	Amount	1	X/Z	N2	1/15
12	610	Amount	1	X/Z	N2	1/15
13	380	Quantity	1	X/Z	R	1/15
14	380	Quantity	1	X/Z	R	1/15
15	380	Quantity	1	X/Z	R	1/15
16	128	Reference Identification Qualifier	1	X/Z	ID	2/3
17	127	Reference Identification	1	X/Z	AN	1/80

Syntax Notes

08	P0809
10	L101112
10	C1009
11	L111012
11	C1109
12	L121011
12	C1209
13	C1309
13	L131415
14	C1409
14	L141315
15	C1509
15	L151314
16	P1617
17	C1709

Semantic Notes

02 AD02 is the adjustment amount.

03 AD03 is the adjustment to the average collected balance.

04 AD04 is the date of the original financial transaction.

05 AD05 is the date the adjustment was processed.

06 AD06 represents the number of days between the original transaction date and the adjustment date.

10 AD10 is the change in the service price. A negative sign preceding the amount indicates a price reduction.

11 AD11 is the former service price.

12 AD12 is the new service price.

13 AD13 is the change in the service volume. A negative sign preceding the amount indicates a volume reduction.

14 AD14 is the former service volume.

15 AD15 is the new service volume.

16 AD16 is the subservice identifier.

17 AD17 is the actual subservice number.

Comments

06 AD06 is recommended for float and ledger balance adjustments.

08 AD08 and AD09 are needed to identify the product or service to which the adjustment applies.

08 AD08 through AD17 are only utilized for adjustments to services.

ADT - Animal Parturition Status

Report the parturition status for the parent animal

TRANSACTION SETS USED IN
249

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1619	Parturition Status Code	1	M	ID	1/1
02	373	Date	1	O/Z	DT	8/8
03	1313	Test Period or Interval Value	1	X/Z	N0	1/6
04	344	Unit of Time Period or Interval Code	1	X	ID	2/2
05	373	Date	1	O/Z	DT	8/8

09	1313	Test Period or Interval Value	1	X/Z	N0	1/6
10	344	Unit of Time Period or Interval Code	1	X	ID	2/2

Syntax Notes

03	P0304
06	P0607
09	P0910

Semantic Notes

02	ADT02 designates the date on which parturition began.
03	ADT03 identifies the dose day or interval on test that parturition began.
05	ADT05 designates the date on which parturition was complete.
06	ADT06 identifies the dose day or interval on test that parturition was complete.
08	ADT08 designates the time of day parturition was complete.
09	ADT09 identifies the gestation day that parturition was complete.

ADV - Advertising Demographic Information

To convey advertising demographic information

TRANSACTION SETS USED IN
840 843 850 855 860 865

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	559	Agency Qualifier Code	1	M	ID	2/2
02	1000	Service Characteristics Qualifier	1	M	AN	2/3
03	740	Range Minimum	1	O	R	1/20
04	741	Range Maximum	1	O	R	1/20
05	729	Category	1	O	AN	1/6
06	1000	Service Characteristics Qualifier	1	X	AN	2/3
07	739	Measurement Value	1	X	R	1/20

Syntax Notes

06	P0607

Comments

01	ADV01 defines the source for each of the service characteristic qualifiers.

ADX - Adjustment

To convey accounts-payable adjustment information for the purpose of cash application, including payer-generated debit/credit memos

TRANSACTION SETS USED IN

256 820 823 891

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	782	Monetary Amount	1	M/Z	R	1/18
02	426	Adjustment Reason Code	1	M/Z	ID	2/2
03	128	Reference Identification Qualifier	1	X/Z	ID	2/3
04	127	Reference Identification	1	X	AN	1/80

Syntax Notes

03 P0304

Semantic Notes

01 ADX01 specifies the amount of the adjustment and must be signed if negative. If negative, it reduces the payment amount; if positive, it increases the payment amount.

02 ADX02 specifies the reason for claiming the adjustment.

03 ADX03 and ADX04 specify the identification of the adjustment.

AEI - Equipment Information Summary

To provide summary information on equipment type and count

TRANSACTION SETS USED IN

160

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	40	Equipment Description Code	1	M	ID	2/2
02	380	Quantity	1	M/Z	R	1/15
03	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1

Semantic Notes

02 AEI02 is the quantity of the equipment specified in AEI01.

03 AEI03 indicates if the equipment is tagged. A "Y" indicates tagged; an "N" indicates not tagged.

AES - Automatic Equipment Identification Site Information

To identify the status of an automatic equipment identification reader site

TRANSACTION SETS USED IN

160

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1559	Automatic Equipment Identification Site Status Code	1	M	ID	1/1
02	1557	Movement Type Code	1	M	ID	1/1
03	1556	Train Termination Status Code	1	M	ID	1/1
04	1555	Automatic Equipment Identification Consist Confidence Level Code	1	M	ID	1/1
05	1271	Industry Code	1	O/Z	AN	1/30

Semantic Notes

05 AES05 is the user-defined direction of the switch.

AIN - Income

To provide type and amount of income obtained

TRANSACTION SETS USED IN

132 148 198 200 201 202 206 248 262 820 823 833 834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1186	Type of Income Code	1	M/Z	ID	2/2
02	594	Frequency Code	1	M/Z	ID	1/1
03	782	Monetary Amount	1	M/Z	R	1/18
04	380	Quantity	1	O/Z	R	1/15
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	127	Reference Identification	1	O/Z	AN	1/80
07	522	Amount Qualifier Code	1	O/Z	ID	1/3
08	1685	Tax Treatment Code	1	O/Z	ID	1/1
09	1687	Earnings Rate of Pay	1	X	R	1/15
10	355	Unit or Basis for Measurement Code	1	X	ID	2/2
11	380	Quantity	1	X/Z	R	1/15
12	1271	Industry Code	1	O/Z	AN	1/30
13	352	Description	1	O/Z	AN	1/80

Syntax Notes

09 P091011

Semantic Notes

01 AIN01 defines the nature or source of income earned.

02 AIN02 defines the periodicity of the income amount.

03 AIN03 defines amount of income.

04 AIN04 specifies number of scheduled periods or year of income receipt.

05 AIN05 identifies if the employee's income is expected to continue in lieu of compensation benefits. A "Y" indicates income is expected to continue; an "N" indicates income is not expected to continue.

06 AIN06 is used to identify an internal control number.

07 AIN07 indicates the income being identified in this segment is a net amount, a gross amount, or other amount.

08 AIN08 identifies the tax status or treatment of the amount specified in AIN03.

11 AIN11 identifies the number of units of time at which the rate specified in AIN09 applies.

12 AIN12 identifies the American Payroll Association Code to be used to identify the specific income type for payroll payments.

13 AIN13 further describes the type of income identified in AIN12.

AK1 - Functional Group Response Header

To start acknowledgment of a functional group

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

993 997 999

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	479	Functional Identifier Code	1	M/Z	ID	2/2
02	28	Group Control Number	1	M/Z	N0	1/9
03	480	Version / Release / Industry Identifier Code	1	O/Z	AN	1/12

Semantic Notes

01 AK101 is the functional ID found in the GS segment (GS01) in the functional group being acknowledged.

02 AK102 is the functional group control number found in the GS segment in the functional group being acknowledged.

03 AK103 is the version release industry identifier code in the GS segment (GS08) in the functional group being acknowledged.

AK2 - Transaction Set Response Header

To start acknowledgment of a single transaction set

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

993 997 999

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	143	Transaction Set Identifier Code	1	M/Z	ID	3/3
02	329	Transaction Set Control Number	1	M/Z	AN	4/9
03	1705	Implementation Convention Reference	1	O/Z	AN	1/35

Semantic Notes

01 AK201 is the transaction set ID found in the ST segment (ST01) in the transaction set being acknowledged.

02 AK202 is the transaction set control number found in the ST segment in the transaction set being acknowledged.

03 AK203 is the implementation convention reference, if any, found in the ST segment (ST03) in the transaction set being acknowledged.

AK3 - Data Segment Note

To report errors in a data segment and identify the location of the data segment

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

997

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	721	Segment ID Code	1	M	ID	2/3
02	719	Segment Position in Transaction Set	1	M	N0	1/10
03	447	Loop Identifier Code	1	O	AN	1/6
04	720	Segment Syntax Error Code	1	O	ID	1/3

AK4 - Data Element Note

To report errors in a data element or composite data structure and identify the location of the data element

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

997

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C030	Position in Segment	1	M		
02	725	Data Element Reference Code	1	O	AN	1/4
03	723	Data Element Syntax Error Code	1	M	ID	1/3
04	724	Copy of Bad Data Element	1	O/Z	AN	1/99

Semantic Notes

04 In no case shall a value be used for AK404 that would generate a syntax error, e.g., an invalid character.

AK5 - Transaction Set Response Trailer

To acknowledge acceptance or rejection and report errors in a transaction set

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

997

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	717	Transaction Set Acknowledgment Code	1	M	ID	1/1
02	718	Transaction Set Syntax Error Code	1	O	ID	1/3
03	718	Transaction Set Syntax Error Code	1	O	ID	1/3
04	718	Transaction Set Syntax Error Code	1	O	ID	1/3
05	718	Transaction Set Syntax Error Code	1	O	ID	1/3
06	718	Transaction Set Syntax Error Code	1	O	ID	1/3

AK9 - Functional Group Response Trailer

To acknowledge acceptance or rejection of a functional group and report the number of included transaction sets from the original trailer, the accepted sets, and the received sets in this functional group

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN
997 999

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	715	Functional Group Acknowledge Code	1	M	ID	1/1
02	97	Number of Transaction Sets Included	1	M	N0	1/6
03	123	Number of Received Transaction Sets	1	M	N0	1/6
04	2	Number of Accepted Transaction Sets	1	M	N0	1/6
05	716	Functional Group Syntax Error Code	1	O	ID	1/3
06	716	Functional Group Syntax Error Code	1	O	ID	1/3
07	716	Functional Group Syntax Error Code	1	O	ID	1/3
08	716	Functional Group Syntax Error Code	1	O	ID	1/3
09	716	Functional Group Syntax Error Code	1	O	ID	1/3

Comments

01	If AK901 contains the value "A" or "E", then the transmitted functional group is accepted.

ALG - Allergen

To describe the allergens associated with the product.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	O/Z	AN	1/20
02	1797	Allergen Type Code	1	M	ID	1/3
03	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
04	352	Description	1	O/Z	AN	1/80
05	1321	Condition Indicator Code	1	O/Z	ID	2/3

Semantic Notes

01 ALG01 is the line item identification

03 ALG03 pertains to ALG02. Valid codes are C, F, M, and U.

04 ALG04 contains the allergen description or disclaimer statement.

05 ALG05 use code "UUN - Allergen Relevant Data Provided" only after all relevant allergens have been identified in ALG02.

Comments

02 When ALG02 equals A96 the manufacturer is claiming the product is free of allergens, equating to an "Allergen Disclaimer".

02 If ALG02 equals "A95" then ALG04 is the name of the allergen.

03 ALG03 provides the containment level of the allergen described in ALG02.

AM1 - Informational Values

To specify a code and the amount or quantity or percentage associated with it

TRANSACTION SETS USED IN

100 111 186 252 255 256 261 262 267 268

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

02	782	Monetary Amount	1	M	R	1/18
03	478	Credit/Debit Flag Code	1	O	ID	1/1

ANI - Animal Identification

To uniquely identify each animal within the group

TRANSACTION SETS USED IN
249

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	373	Date	1	M/Z	DT	8/8
03	373	Date	1	M/Z	DT	8/8
04	1313	Test Period or Interval Value	1	X/Z	N0	1/6
05	344	Unit of Time Period or Interval Code	1	X	ID	2/2
06	127	Reference Identification	1	O/Z	AN	1/80
07	127	Reference Identification	1	O/Z	AN	1/80
08	373	Date	1	O/Z	DT	8/8
09	127	Reference Identification	1	O/Z	AN	1/80

Syntax Notes

04 P0405

Semantic Notes

01 ANI01 must uniquely identify each animal within the group.
02 ANI02 reports the date this animal was first dosed.
03 ANI03 reports the last date this animal was dosed.
04 ANI04 identifies the dose day or interval on test the initial body weight was recorded for this animal.
06 ANI06 identifies a lot or vertical cross section to which this animal belongs.
07 ANI07 identifies the generation to which this animal belongs.
08 ANI08 identifies this animal's date of birth.
09 ANI09 identifies the cage in which this animal was housed.

AOC - Animal Offspring Counts

To report offspring counts for the parent animal

TRANSACTION SETS USED IN
249

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1620	Offspring Count Code	1	M	ID	2/2
02	609	Count	1	M/Z	N0	1/9
03	373	Date	1	X/Z	DT	8/8
04	1313	Test Period or Interval Value	1	X/Z	N0	1/6
05	344	Unit of Time Period or Interval Code	1	X	ID	2/2

Syntax Notes

03	R0304
04	P0405

Semantic Notes

02	AOC02 reports the number of offspring in the category defined by AOC01.
03	AOC03 reports the calendar date on which an offspring count was recorded.
04	AOC04 reports the lactation day on which the offspring count was recorded.

AOI - Animal Offspring/Fetus Identification

To identify offspring/fetuses of the parent animal

TRANSACTION SETS USED IN
249

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	127	Reference Identification	1	M/Z	AN	1/80
03	1068	Gender Code	1	M	ID	1/1
04	1622	Offspring/Fetus Status Code	1	X	ID	2/2
05	1313	Test Period or Interval Value	1	X/Z	N0	1/6
06	344	Unit of Time Period or Interval Code	1	X	ID	2/2
07	1606	Animal Disposition Code	1	X	ID	2/2
08	1313	Test Period or Interval Value	1	X/Z	N0	1/6
09	344	Unit of Time Period or Interval Code	1	X	ID	2/2
10	127	Reference Identification	1	O/Z	AN	1/80
11	373	Date	1	X/Z	DT	8/8
12	1313	Test Period or Interval Value	1	X/Z	N0	1/6
13	344	Unit of Time Period or Interval Code	1	X	ID	2/2

Syntax Notes

04	P040506
07	P0708
08	P0809
10	L101112
12	P1213

Semantic Notes

01	AOI01 indicates the results reported are for either an offspring or a fetus. A "Y" indicates offspring; an "N" indicates fetus.
02	AOI02 uniquely identifies each fetus removed or each of the offspring within the litter before weaning.
05	AOI05 designates the gestation day on which the fetal status code was recorded.
08	AOI08 designates the lactation day on which the offspring disposition was recorded.
10	AOI10 uniquely identifies each weaned offspring within the study.
11	AOI11 designates the calendar day on which the offspring was weaned.
12	AOI12 designates the lactation day on which the offspring was weaned.

AOL - Animal Observation Location

To report the location of a specific observation

TRANSACTION SETS USED IN

249

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1611	Observation Type Code	1	M	ID	2/2
02	352	Description	1	M/Z	AN	1/80
03	1612	Tissue or Specimen Disposition Code	1	O	ID	1/1
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
05	1614	Sub-Location	1	O/Z	AN	1/24
06	1614	Sub-Location	1	O/Z	AN	1/24
07	1614	Sub-Location	1	O/Z	AN	1/24
08	752	Surface/Layer/Position Code	1	O/Z	ID	2/2

Semantic Notes

02 AOL02 specifies an organ name, a differentiated organ structure or the physical primary location of the observation.

04 AOL04 indicates whether this data was used in analysis. A "Y" indicates data was used in analysis; an "N" indicates it was not used.

05 AOL05 is used to further qualify AOL03.

06 AOL06 is used to further qualify AOL05.

07 AOL07 is used to further qualify AOL06.

08 AOL08 designates relative position or symmetry of the organ being observed.

AOR - Animal Observation Result

To report observation results at the specified location

TRANSACTION SETS USED IN

249

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1615	Observation Distribution	1	O/Z	AN	1/16
02	1616	Observation Severity	1	O/Z	AN	1/17
03	1617	Neoplasm Code	1	O	ID	1/1
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
05	1618	Linkage Identifier	1	O/Z	AN	1/4
06	1618	Linkage Identifier	1	O/Z	AN	1/4
07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
08	1313	Test Period or Interval Value	1	X/Z	N0	1/6
09	344	Unit of Time Period or Interval Code	1	X	ID	2/2
10	1313	Test Period or Interval Value	1	X/Z	N0	1/6
11	344	Unit of Time Period or Interval Code	1	X	ID	2/2
12	1313	Test Period or Interval Value	1	X/Z	N0	1/6
13	344	Unit of Time Period or Interval Code	1	X	ID	2/2

Syntax Notes

08 P0809
10 P1011
12 P1213

Semantic Notes

01 AOR01 identifies the distribution of the observation.
02 AOR02 designates a grading for the severity of the observation.
04 AOR04 indicates the relationship of the lesion to the cause of death. A "Y" indicates a direct correlation of the lesion to the cause of death; an "N" indicates anything other than fatal.
05 AOR05 identifies the in-life mass identification correlated to the observation.
06 AOR06 identifies the gross observation correlated to this observation.
07 AOR07 indicates if this observation was used in analysis. A "Y" indicates this observation was used in analysis; an "N" indicates it was not used.
08 AOR08 indicates the dose day or interval on test of the observation on-set.
10 AOR10 indicates the dose day or interval on test that the observation terminated.
12 AOR12 indicates the duration of this observation in elapsed time.

AP1 - Alternate Parts

To transmit identifying numbers, values and descriptive information related to the use of alternate parts

TRANSACTION SETS USED IN

124

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1321	Condition Indicator Code	1	M	ID	2/3

Syntax Notes

07 C0706

Semantic Notes

02 AP102 is the primary disclosure State or Province.
04 AP104 is the minimum savings percent.
05 AP105 is the minimum savings dollars.
06 AP106 is the beginning zip code of a range for aftermarket parts.
07 AP107 is the ending zip code of a range for aftermarket parts.
08 AP108 is the print disclosure switch.
09 AP109 is the maximum number of suppliers allowed.
10 AP110 is the vehicle age delimiter.
11 AP111 is the matrix name used.
12 AP112 is the Certified Aftermarket Parts Association (CAPA) part number.
13 AP113 is the Certified Aftermarket Parts Association (CAPA) part description.

APE - Assurance Protocol Error

To report assurance protocol errors in a security structure

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

993

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1432	Business Purpose of Assurance Code	1	M	ID	3/3

07	1262	Loan Type Code	1	O/Z	ID	1/2
08	1201	Information Status Code	1	O/Z	ID	1/1

Semantic Notes

01 API01 specifies the situation or category to which the code applies.
02 API02 indicates the type of action taken towards an activity or process.
03 API03 identifies the specific type of maintenance needed for the process.
04 API04 provides the reason for the action or process.
05 API05 identifies the area affected by the activity or process.
06 API06 identifies the type of insurance policy associated with a product.
07 API07 identifies the type of loan, if any, involved in the process.
08 API08 identifies how current the information is.

APR - Association of American Railroads Pool Code Restrictions

Used to limit the application of restrictions to a subset of standard Association of American Railroads Pool Codes

TRANSACTION SETS USED IN

453

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1

03	1011	Association of American Railroads (AAR) Pool Code	1	O/Z	ID	7/7

Semantic Notes

01 APR01 indicates if restriction is included. A "Y" indicates restriction is included; an "N" indicates restriction is excluded.

03 APR03 indicates the high end of a range.

ARC - Animal Results Counts

To record the number of results reported for each test or observation type

TRANSACTION SETS USED IN

249

ARS - Applicant Residence Specifics

To provide type of residency

TRANSACTION SETS USED IN

200 201 833

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1070	Type of Residence Code	1	M/Z	ID	1/1
02	1078	Property Ownership Rights Code	1	M/Z	ID	1/1
03	122	Rate/Value Qualifier	1	O	ID	2/2
04	782	Monetary Amount	1	O	R	1/18
05	127	Reference Identification	1	O	AN	1/80

Semantic Notes

01 ARS01 defines the nature of usage of residence.

02 ARS02 defines the nature of the right to occupy residence.

02 If ARS02 is Rent "R", ARS03 is the period type for rental payments.

02 If ARS02 is Rent "R", ARS04 is the amount of rental payment.

ASI - Action or Status Indicator

To indicate the action to be taken with the information provided or the status of the entity described

TRANSACTION SETS USED IN

111 155 158 185 252 255 267 268 814 816

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	306	Action Code	1	M	ID	1/2
02	875	Maintenance Type Code	1	M	ID	3/3
03	641	Status Reason Code	1	O	ID	3/3

ASL - Asset Liability

To report financial information

TRANSACTION SETS USED IN

186 267

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	522	Amount Qualifier Code	1	M/Z	ID	1/3

10	128	Reference Identification Qualifier	1	X	ID	2/3
11	127	Reference Identification	1	X	AN	1/80

Syntax Notes

06 C0607

10 P1011

Semantic Notes

02 ASO02 identifies the primary asset.

03 ASO03 further identifies the asset identified in ASO02 when there is a multiple or compound value.

04 ASO04 is only used when ASO02 is "10".

07 ASO07 specifies the monetary value of the asset referenced in ASO02, ASO03 and ASO04.

08 ASO08 specifies a percentage of ownership of the assets referenced in ASO02, ASO03 and ASO04.

09 ASO09 quantifies assets referenced in ASO02, ASO03 and ASO04.

AST - Animal Reproductive Status

To report reproductive status for the parent animal

TRANSACTION SETS USED IN
249

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1

10	1313	Test Period or Interval Value	1	X/Z	N0	1/6
11	344	Unit of Time Period or Interval Code	1	X	ID	2/2

Syntax Notes

04	P0405
07	P0708
10	P1011

Semantic Notes

01	AST01 indicates the reproductive status of a specific animal. A "Y" indicates a reproductive status of pregnant; an "N" indicates a reproductive status of not pregnant.
02	AST02 identifies the mate for this specific animal.
03	AST03 designates the date on which cohabitation began.
04	AST04 identifies the dose day or interval on test that cohabitation began.
06	AST06 designates the date on which mating was confirmed.
07	AST07 identifies the dose day or interval on test that mating was confirmed.
09	AST09 designates the date that mating was estimated to have occurred.
10	AST10 identifies the dose day or interval on test that mating was estimated to have occurred.

AT1 - Bill of Lading Line Item Number

To reference a Bill of Lading line number

TRANSACTION SETS USED IN

211

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	213	Lading Line Item Number	1	M	N0	1/6

AT2 - Bill of Lading Line Item Detail

To specify Bill of Lading quantity, weight, commodity classification and other details.

TRANSACTION SETS USED IN

211

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	80	Lading Quantity	1	X/Z	N0	1/7
02	211	Packaging Form Code	1	X/Z	ID	3/3
03	187	Weight Qualifier	1	M/Z	ID	1/2
04	188	Weight Unit Code	1	M	ID	1/1
05	81	Weight	1	M	R	1/10
06	80	Lading Quantity	1	X/Z	N0	1/7
07	211	Packaging Form Code	1	X/Z	ID	3/3
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	22	Commodity Code	1	O/Z	AN	1/30
10	59	Freight Class Code	1	O	AN	2/5
11	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
12	148	Lading Value	1	O	R	2/9
13	184	Volume Unit Qualifier	1	X	ID	1/1
14	183	Volume	1	X	R	1/8

Syntax Notes

01	P0102
06	P0607
13	P1314

Semantic Notes

01	AT201 is the number of carrier handling units for the line item.
02	AT202 is the packaging form of the lading quantity in AT201.
03	AT203 and AT204 qualify AT205.
06	AT206 is used only if AT202 contains the codes PLT, SKD, or SLP.
06	AT206 is the total number of pieces contained on the pallets, skids or slip sheets identified in AT201.
07	AT207 is the packaging form of the units contained on pallets, skids, or slip sheets.
08	AT208 indicates if the carrier is required to verify the number of cartons on the pallet, slip sheet, or skid. A "Y" indicates that the carrier is required to verify the number of cartons. An "N" indicates that the carrier is not required to verify the number of cartons. If AT208 is not present in the segment a code of "N" is assumed.
09	AT209 is the National Motor Freight Classification Number.
11	AT211 is used to indicate a master handling unit line item. A "Y" indicates the line item is a master handling unit describing lading quantity, packaging form code, and weight. The commodity code, freight class, and weight would be contained in additional line items. An "N" indicates that the line is a sub line item of a master handling unit line item. Lading

quantity and package type are not used for sub line items. AT211 is used only when describing master handling unit and sub line items.

AT3 - Bill of Lading Rates and Charges

To specify Bill of Lading rates and charges

TRANSACTION SETS USED IN

211 222

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	58	Amount Charged	1	M/Z	N2	1/15
02	1600	Freight Rate Qualifier	1	X	ID	2/2
03	60	Freight Rate	1	X	R	1/15
04	1601	Rated-as Qualifier	1	X	ID	2/2
05	380	Quantity	1	X	R	1/15
06	1602	Bill of Lading Charge Code	1	X	ID	3/3
07	954	Percentage as Decimal	1	X/Z	R	1/10

Syntax Notes

02	P0203
02	E020607
02	R020607
04	P0405
04	C0402

Semantic Notes

01	AT301 is the charge per Bill of Lading line item.
07	AT307 is the percent discount that was used to determine the charge in AT301.

Comments

05	AT305 is the quantity of units (miles, gallons, deficit weight, etc.) as defined by the qualifier in AT304.

AT4 - Bill of Lading Description

To specify the lading description

TRANSACTION SETS USED IN

211

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	79	Lading Description	1	M	AN	1/50

AT5 - Bill of Lading Handling Requirements

To identify Bill of Lading handling and service requirements

TRANSACTION SETS USED IN

106 107 204 211 214 216 219 220 222

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	152	Special Handling Code	1	X	ID	2/3
02	560	Special Services Code	1	X	ID	2/10
03	153	Special Handling Description	1	X	AN	2/30
04	355	Unit or Basis for Measurement Code	1	X	ID	2/2
05	408	Temperature	1	X/Z	R	1/4
06	408	Temperature	1	X/Z	R	1/4

Syntax Notes

01	E0103
02	E0203
04	L040506
05	C0504
06	C0604

Semantic Notes

05	AT505 is the minimum temperature.
06	AT506 is the maximum temperature.

AT6 - International Manifest Information

To transmit international manifest data

TRANSACTION SETS USED IN

215

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1610	International Dutiable Status Code	1	M	ID	2/2
02	512	Import/Export Code	1	M	ID	1/1
03	335	Transportation Terms Code	1	O	ID	3/3

AT7 - Shipment Status Details

To specify the status of a shipment, the reason for that status, the date and time of the status and the date and time of any appointments scheduled.

TRANSACTION SETS USED IN

212 214 240

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1650	Shipment Status Indicator Code	1	X/Z	ID	2/2
02	1651	Shipment Status or Appointment Reason Code	1	O	ID	2/2
03	1652	Shipment Appointment Status Code	1	X	ID	2/2
04	1651	Shipment Status or Appointment Reason Code	1	O	ID	2/2
05	373	Date	1	X	DT	8/8
06	337	Time	1	X	TM	4/8
07	623	Time Code	1	O/Z	ID	2/2

Syntax Notes

01	E0103
02	C0201
04	C0403
06	C0605
07	C0706

Semantic Notes

01	If AT701 is present, AT705 is the date the status occurred. If AT703 is present, AT705 is a date related to an appointment.
01	If AT701 is present, AT706 is the time of the status. If AT703 is present, AT706 is the time of the appointment.
07	If AT707 is not present then AT706 represents local time of the status.

AT8 - Shipment Weight, Packaging and Quantity Data

To specify shipment details in terms of weight, and quantity of handling units

TRANSACTION SETS USED IN

204 212 214 223 753

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	187	Weight Qualifier	1	X	ID	1/2
02	188	Weight Unit Code	1	X	ID	1/1
03	81	Weight	1	X	R	1/10
04	80	Lading Quantity	1	O/Z	N0	1/7
05	80	Lading Quantity	1	O/Z	N0	1/7
06	184	Volume Unit Qualifier	1	X	ID	1/1
07	183	Volume	1	X	R	1/8

Syntax Notes

01	P010203
06	P0607

Semantic Notes

04	AT804 is the quantity of handling units that are not unitized (for example a carton). When added to the quantity in AT805, it is the total quantity of handling units in the shipment.
05	AT805 is the quantity of handling units that are unitized (for example on a pallet or slip sheet). When added to the quantity in AT804 it is the total quantity of handling units for the shipment.

AT9 - Trailer or Container Dimension and Weight

To specify trailer or container dimensions

TRANSACTION SETS USED IN

106 107 212 754 856 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	567	Equipment Length	1	O	N0	4/5
02	65	Height	1	O/Z	R	1/8
03	189	Width	1	O/Z	R	1/8
04	187	Weight Qualifier	1	X	ID	1/2
05	188	Weight Unit Code	1	X	ID	1/1
06	81	Weight	1	X/Z	R	1/10
07	184	Volume Unit Qualifier	1	X	ID	1/1
08	183	Volume	1	X/Z	R	1/8

Syntax Notes

04	P040506
07	P0708

Semantic Notes

02	AT902 is the height of the trailer or container in inches.
03	AT903 is the width of the trailer or container in inches.
06	AT906 is the weight of the trailer or container. It is the tare weight of the trailer or container.
08	AT908 is the volumetric capacity of the trailer or container.

ATA - Beginning Segment for Motor Carrier Delivery Trailer Manifest

To transmit identifying numbers and other basic data relating to the Motor Carrier Delivery Trailer Manifest Transaction Set

TRANSACTION SETS USED IN
212

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	127	Reference Identification	1	M/Z	AN	1/80
03	373	Date	1	O/Z	DT	8/8

Semantic Notes

01 ATA01 is the Standard Carrier Alpha Code (SCAC) of the carrier that is delivering the trailer.
02 ATA02 is the delivery trailer manifest number assigned by the carrier.
03 ATA03 is the date that the delivery trailer manifest was created.

ATH - Resource Authorization

To specify resource authorizations (i.e., finished labor, material, etc.) in the planning schedule

TRANSACTION SETS USED IN
830

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	672	Resource Authorization Code	1	M	ID	2/2
02	373	Date	1	X/Z	DT	8/8
03	380	Quantity	1	X/Z	R	1/15
04	380	Quantity	1	O	R	1/15
05	373	Date	1	X/Z	DT	8/8

Syntax Notes

02 R0203
03 C0305
04 C0405

Semantic Notes

02 ATH02 is the resource authorization through date: The date through which the buyer authorizes the seller to commit the resource defined in element ATH01.

03 ATH03 is the current cumulative requirements quantity: The cumulative quantity that has been authorized to date from the cumulative start date (ATH05) through the resource authorization through date (ATH02).

05 ATH05 is the cumulative start date: The date where the cumulative quantity count starts. This date might be the start date of a contract period, a calendar or fiscal year, or other.

Comments

01 It is imperative that negotiations defining financial commitment have previously occurred and are agreed to by both buyer and seller.

04 ATH04 is the maximum cumulative requirements quantity: The maximum cumulative quantity that has been authorized to date from the cumulative start date (ATH05) through the resource authorization through date (ATH02). This is a high water markIf the forecast decreases, the current cumulative requirements quantity also decreases, but the maximum cumulative requirements quantity does not decrease.

ATN - Attendance

To specify attendance information

TRANSACTION SETS USED IN

820

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M/Z	R	1/15
02	355	Unit or Basis for Measurement Code	1	O	ID	2/2
03	673	Quantity Qualifier	1	O/Z	ID	2/2
04	594	Frequency Code	1	O	ID	1/1
05	1684	Attendance Type Code	1	O/Z	ID	1/4
06	352	Description	1	O/Z	AN	1/80

Semantic Notes

01 ATN01 is a measure of attendance time.

03 ATN03 identifies the period for which the quantity in ATN01 is being reported.

05 ATN05 identifies the type of attendance for which the quantity in ATN01 is being reported.

06 ATN06 is used to clarify the attendance type describing the quantity being reported in ATN01.

ATR - Animal Test Result

To report individual animal test results

TRANSACTION SETS USED IN
249

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1607	Test Type Code	1	M	ID	2/2
02	1313	Test Period or Interval Value	1	M/Z	N0	1/6
03	344	Unit of Time Period or Interval Code	1	M	ID	2/2
04	739	Measurement Value	1	X/Z	R	1/20
05	C001	Composite Unit of Measure	1	X		
06	1608	Non-Numeric Test Value	1	X/Z	AN	1/30
07	352	Description	1	O/Z	AN	1/80
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	752	Surface/Layer/Position Code	1	O/Z	ID	2/2
10	337	Time	1	O/Z	TM	4/8

Syntax Notes

04 R0406
04 P0405

Semantic Notes

02 ATR02 identifies the dose day or interval on test this result was recorded.
04 ATR04 used to report numeric test results.
06 ATR06 reports non-numeric test results.
07 ATR07 clarifies ATR01 by identifying the name of a specific test performed for which the results are being reported.
08 ATR08 indicates whether this data was used in analysis. A "Y" indicates data was used in analysis; an "N" indicates it was not used.
09 ATR09 designates relative position or symmetry of the organ or observation being reported.
10 ATR10 identifies the time of day this result was measured.

Comments

10 ATR10 need be present only when more than one result is recorded for the same test type on the same day.

ATV - Student Activities and Awards

To identify the activities in which a student has been involved, awards and honors the student has received, significant achievements, including employment, or publications

TRANSACTION SETS USED IN
130 133 138 189

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1270	Code List Qualifier Code	1	X	ID	1/3
02	1271	Industry Code	1	X/Z	AN	1/30
03	790	Entity Title	1	O/Z	AN	1/132
04	790	Entity Title	1	O/Z	AN	1/132
05	380	Quantity	1	X/Z	R	1/15
06	C001	Composite Unit of Measure	1	X		
07	1131	Level of Individual, Test, or Course Code	1	O/Z	ID	2/2
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
10	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

01	P0102
05	P0506

Semantic Notes

02	ATV02 contains the activity or the award code.
03	ATV03 is the free-form name of the activity or award.
04	ATV04 is the free-form name of the organization sponsoring the activity or granting the award.
05	ATV05 and ATV06 together can be used to indicate hours per week, days per week, days per month, etc. that a student was involved in the activity.
07	ATV07 indicates the level of participation in this activity.
08	ATV08 defines whether the student was paid for participation in the activity. A "Y" indicates that the student was paid; an "N" indicates that the student was not paid.
09	ATV09 defines whether the activity was a school-sponsored activity. A "Y" indicates that the activity was school sponsored; an "N" indicates that the activity was not school sponsored.
10	ATV10 defines whether the student was recruited by postsecondary institutions in this activity. A "Y" indicates that the student was recruited; an "N" indicates that the student was not recruited.

AVA - Funds Availability

To indicate the funds availability in days

TRANSACTION SETS USED IN

821 823

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	782	Monetary Amount	1	M/Z	R	1/18
02	895	Availability	1	M	R	1/6

Semantic Notes

01 The monetary amount in AVA01 can be negative where the amount represents an adjustment or backvalue.

AWD - Amount with Description

To specify a code and/or description with an associated amount

TRANSACTION SETS USED IN
113 155 259 814

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C007	Amount Qualifying Description	1	M		
02	782	Monetary Amount	1	X	R	1/18
03	61	Free-form Information	1	X/Z	AN	1/30
04	100	Currency Code	1	O	ID	3/3

Syntax Notes

02 E0203
02 R0203

Semantic Notes

03 AWD03 is used when information source provides non-numeric values.

AXL - Vehicle Axle Measurements

To specify axle measurements for loading vehicles on aircraft or other conveyances

TRANSACTION SETS USED IN
858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	235	Product/Service ID Qualifier	1	M	ID	2/2
02	234	Product/Service ID	1	M/Z	AN	1/80
03	90	Measurement Unit Qualifier	1	X	ID	1/1
04	82	Length	1	O	R	1/8
05	189	Width	1	O	R	1/8
06	187	Weight Qualifier	1	X	ID	1/2
07	81	Weight	1	X	R	1/10
08	127	Reference Identification	1	O/Z	AN	1/80

Syntax Notes

04	C0403
05	C0503
06	P0607

Semantic Notes

02	AXL02 identifies the axle described in the segment.
08	AXL08 identifies the type of axle described in the segment.

B1 - Beginning Segment for Booking or Pickup/Delivery

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN
215 300 301 303 990

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	145	Shipment Identification Number	1	O	AN	1/30
03	373	Date	1	O/Z	DT	8/8
04	558	Reservation Action Code	1	O	ID	1/1
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	1658	Shipment or Work Assignment Decline Reason Code	1	O/Z	ID	3/3
07	146	Shipment Method of Payment Code	1	O	ID	2/2

Semantic Notes

01 B101 is the Standard Carrier Alpha Code (SCAC) of either the carrier receiving the booking request or the carrier sending the booking confirmation.

03 B103 is either the date of the booking request or the date the booking was accepted by the carrier.

05 If B105 is "Y", partial loadings are allowed. If B105 is "N", partial loadings are not allowed.

06 B106 should be sent if the B104 action code is a "D" for decline.

B10 - Beginning Segment for Transportation Carrier Shipment Status Message

To transmit identifying numbers and other basic data relating to the transaction set

TRANSACTION SETS USED IN
214 223

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	X/Z	AN	1/80
02	145	Shipment Identification Number	1	O	AN	1/30
03	140	Standard Carrier Alpha Code	1	M	ID	2/4
04	71	Inquiry Request Number	1	O	N0	1/3
05	128	Reference Identification Qualifier	1	X	ID	2/3
06	127	Reference Identification	1	X	AN	1/80
07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
08	373	Date	1	X/Z	DT	8/8
09	337	Time	1	X/Z	TM	4/8

Syntax Notes

01	R0106
01	E0105
05	P0506
08	P0809

Semantic Notes

01	B1001 is the carrier assigned reference number.
07	B1007 indicates if the reference numbers included in this transmission were transmitted to the carrier in electronic format or key entered by the carrier. A "Y" indicates the carrier utilized the electronic shipper supplied reference information to create this document; an "N" indicates the carrier key entered the reference information from a shipper supplied document.
08	B1008 is the transaction creation date.
09	B1009 is the transaction creation time.

Comments

01	B1001 is the carrier's PRO (invoice number) that identifies the shipment.
03	B1003 is required when used in Transaction Set 214.
06	B1006 is the carrier assigned bar code identification or another carrier assigned shipment identification, such as a manifest number.

B11 - Beginning Segment for Shipment Status Inquiry

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN
213

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	66	Identification Code Qualifier	1	M	ID	1/2
02	67	Identification Code	1	M	AN	2/80
03	373	Date	1	O/Z	DT	8/8
04	355	Unit or Basis for Measurement Code	1	X	ID	2/2
05	380	Quantity	1	X	R	1/15
06	522	Amount Qualifier Code	1	X	ID	1/3
07	782	Monetary Amount	1	X	R	1/18
08	349	Item Description Type Code	1	X	ID	1/1
09	352	Description	1	X	AN	1/80
10	284	Service Level Code	1	O	ID	2/2
11	756	Report Transmission Code	1	O	ID	1/2

Syntax Notes

04	P0405
06	P0607
08	P0809

Semantic Notes

03	B1103 is the pickup date.

Comments

01	B1101 identifies the requestor.

B12 - Beginning Segment for Consolidation of Goods In Container

To specify the beginning of the Consolidation of Goods in Container Transaction Set

TRANSACTION SETS USED IN

325

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	206	Equipment Initial	1	M	AN	1/4
02	207	Equipment Number	1	M	AN	1/15
03	24	Equipment Type Code	1	M	ID	4/4

B13 - Beginning Segment for Appointment Schedule

To transmit identifying numbers and other basic data relating to the Appointment Schedule transaction set

TRANSACTION SETS USED IN

163

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4

Semantic Notes

01 B1301 is the appointment pickup or delivery request reference number. It is a number assigned by the party requesting the original appointment that uniquely identifies the request for a pickup or delivery appointment. It is not a unique appointment number.

02 B1302 is the Standard Carrier Alpha Code (SCAC) of the carrier who will be keeping the appointment.

B2 - Beginning Segment for Shipment Information Transaction

To transmit basic data relating to shipment information

TRANSACTION SETS USED IN

204 304

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	375	Tariff Service Code	1	O	ID	2/2
02	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
03	154	Standard Point Location Code	1	O	ID	6/9
04	145	Shipment Identification Number	1	O	AN	1/30
05	188	Weight Unit Code	1	O	ID	1/1
06	146	Shipment Method of Payment Code	1	M	ID	2/2
07	147	Shipment Qualifier	1	O	ID	1/1
08	86	Total Equipment	1	O	N0	1/3
09	460	Shipment Weight Code	1	O	ID	1/1
10	501	Customs Documentation Handling Code	1	O	ID	2/2
11	335	Transportation Terms Code	1	O/Z	ID	3/3
12	591	Payment Method Code	1	O	ID	3/3

Semantic Notes

02 B202 contains the Standard Carrier Alpha Code (SCAC) of the carrier that will receive the bill of lading.

11 If B211 is used, B206 will indicate the party or parties responsible for payment of the transportation terms identified in B211.

Comments

02 B202 is mandatory for transaction set 204.

09 B209 is mandatory for rail transactions.

B2A - Set Purpose

To allow for positive identification of transaction set purpose

TRANSACTION SETS USED IN

163 204 211 212 223 304 310 311 821 893

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	346	Application Type Code	1	O	ID	2/2

B3 - Beginning Segment for Carrier's Invoice

To transmit basic data relating to the carrier's invoice

TRANSACTION SETS USED IN
110 210 310 312 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	147	Shipment Qualifier	1	O	ID	1/1
02	76	Invoice Number	1	M	AN	1/22
03	145	Shipment Identification Number	1	O	AN	1/30
04	146	Shipment Method of Payment Code	1	M	ID	2/2
05	188	Weight Unit Code	1	O	ID	1/1
06	373	Date	1	M/Z	DT	8/8
07	193	Net Amount Due	1	M	N2	1/15
08	202	Correction Indicator Code	1	O	ID	2/2
09	32	Delivery Date	1	X/Z	DT	8/8
10	374	Date/Time Qualifier	1	X	ID	3/3
11	140	Standard Carrier Alpha Code	1	M	ID	2/4
12	373	Date	1	O	DT	8/8
13	375	Tariff Service Code	1	O	ID	2/2
14	335	Transportation Terms Code	1	O/Z	ID	3/3

Syntax Notes

09 P0910

Semantic Notes

06 B306 is the billing date.

09 On collect freight bills the data in B309 will be the actual delivery date. For the shipments invoiced prior to delivery, the B309 will be the estimated date of delivery.

14 If B314 is used, B304 will indicate the party or parties responsible for payment of the transportation terms identified in B314.

B3A - Invoice Type

To indicate type of invoice and number of shipments

TRANSACTION SETS USED IN

110 223 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	640	Transaction Type Code	1	M	ID	2/2
02	21	Number of Shipments	1	O	N0	1/5

Comments

02 B3A02 is the number of shipments invoiced.

B3B - Beginning Segment for Rail Carrier's Invoice

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN

410

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	76	Invoice Number	1	M	AN	1/22
02	146	Shipment Method of Payment Code	1	M	ID	2/2
03	373	Date	1	M/Z	DT	8/8
04	193	Net Amount Due	1	M	N2	1/15
05	373	Date	1	O/Z	DT	8/8
06	140	Standard Carrier Alpha Code	1	M	ID	2/4
07	91	Transportation Method/Type Code	1	M	ID	1/2
08	145	Shipment Identification Number	1	O	AN	1/30
09	188	Weight Unit Code	1	O	ID	1/1
10	202	Correction Indicator Code	1	O	ID	2/2
11	100	Currency Code	1	O/Z	ID	3/3

Semantic Notes

03 B3B03 is the billing date.

05 B3B05 is the payment due date.

11 B3B11 defines the currency used in the transaction.

Comments

09 The B3B09 default value is pounds.

B4 - Beginning Segment for Inquiry or Reply

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN
109 313 315

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	152	Special Handling Code	1	O	ID	2/3
02	71	Inquiry Request Number	1	O	N0	1/3
03	157	Shipment Status Code	1	O	ID	1/2
04	373	Date	1	O/Z	DT	8/8
05	337	Time	1	O/Z	TM	4/8
06	159	Status Location	1	O	AN	3/5
07	206	Equipment Initial	1	X	AN	1/4
08	207	Equipment Number	1	X	AN	1/15
09	578	Equipment Status Code	1	O	ID	1/2
10	24	Equipment Type Code	1	O	ID	4/4
11	310	Location Identifier	1	X	AN	1/30
12	309	Location Qualifier	1	X	ID	1/2
13	761	Equipment Number Check Digit	1	O	N0	1/1

Syntax Notes

07	P0708
11	P1112

Semantic Notes

04	B404 is the date of last reported status of cargo.
05	B405 is the time (HHMM) of the last reported status of the cargo.

B9 - Beginning Segment for Logistics Services

To indicate the beginning of a logistics service transaction set

TRANSACTION SETS USED IN

219 220

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	353	Transaction Set Purpose Code	1	M	ID	2/2
03	146	Shipment Method of Payment Code	1	O	ID	2/2

Semantic Notes

01 B901 is the logistics identification number.

B9A - Service Request

To identify the specified logistics services requested

TRANSACTION SETS USED IN

219 220

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1644	Service Request Code	1	M	ID	2/2

BA1 - Export Shipment Identifying Information

To transmit identifying data for an export shipment

TRANSACTION SETS USED IN
350 601

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	645	Related Company Indication Code	1	M	ID	1/1
02	306	Action Code	1	M	ID	1/2
03	91	Transportation Method/Type Code	1	M	ID	1/2
04	26	Country Code	1	M/Z	ID	2/3
05	127	Reference Identification	1	M/Z	AN	1/80
06	116	Postal Code	1	O/Z	ID	3/15
07	26	Country Code	1	O/Z	ID	2/3
08	156	State or Province Code	1	O/Z	ID	2/2
09	151	Authority	1	O	AN	1/20
10	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
11	310	Location Identifier	1	O/Z	AN	1/30
12	182	Vessel Name	1	O	AN	2/50

Semantic Notes

04 BA104 is the country of final destination of the goods.
05 BA105 is the Export Transaction Number (XTN).
06 BA106 is the postal code of the point of manufacture.
07 BA107 is the country from which the cargo is shipped.
08 BA108 is the state or province of the point of manufacture.
10 BA110 is the Standard Carrier Alpha Code (SCAC) of the conveyance operator.
11 BA111 is the Foreign Trade Zone (FTZ) number.

BA2 - Beginning Segment for Cargo Terminal Information

To indicate the beginning of the Cargo Terminal Information Transaction Set and transmit identifying numbers and dates

TRANSACTION SETS USED IN
319

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	597	Vessel Code	1	M	ID	1/8
03	55	Flight/Voyage Number	1	M	AN	2/30
04	127	Reference Identification	1	M/Z	AN	1/80
05	127	Reference Identification	1	M/Z	AN	1/80
06	113	Pier Number	1	M	AN	1/4
07	112	Pier Name	1	M	AN	2/14
08	115	Port or Terminal Function Code	1	O	ID	1/1
09	114	Port Name	1	O	AN	2/24
10	373	Date	1	O/Z	DT	8/8
11	897	Vessel Code Qualifier	1	O	ID	1/1

Semantic Notes

04 BA204 is the terminal operator reference number.
05 BA205 is the broker number.
10 BA210 is the date as required by customs.

Comments

08 BA208 can contain only values "T" or "U".

BAA - Beginning Segment for Product Transfer Account Adjustment

To identify the beginning of a Product Transfer Account Adjustment Transaction Set and further define the type of product account adjustment transaction set and its reference number and date

TRANSACTION SETS USED IN
844

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	640	Transaction Type Code	1	M	ID	2/2
03	373	Date	1	M/Z	DT	8/8
04	128	Reference Identification Qualifier	1	X	ID	2/3
05	127	Reference Identification	1	X	AN	1/80
06	337	Time	1	O/Z	TM	4/8

Syntax Notes

04 P0405

Semantic Notes

03 BAA03 is the account adjustment date.
06 BAA06 is the account adjustment time.

BAK - Beginning Segment for Purchase Order Acknowledgment

To indicate the beginning of the Purchase Order Acknowledgment Transaction Set and transmit identifying numbers and dates

TRANSACTION SETS USED IN
855

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	587	Acknowledgment Type Code	1	M	ID	2/2
03	324	Purchase Order Number	1	M	AN	1/22
04	373	Date	1	M/Z	DT	8/8
05	328	Release Number	1	O	AN	1/30
06	326	Request Reference Number	1	O	AN	1/45
07	367	Contract Number	1	O	AN	1/30
08	127	Reference Identification	1	O/Z	AN	1/80
09	373	Date	1	O/Z	DT	8/8
10	640	Transaction Type Code	1	O	ID	2/2

Semantic Notes

04 BAK04 is the date assigned by the purchaser to purchase order.
08 BAK08 is the seller's order number.
09 BAK09 is the date assigned by the sender to the acknowledgment.

BAL - Balance Detail

To identify the specific monetary balances associated with a particular account

TRANSACTION SETS USED IN

187 248 568 810 811 884

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	951	Balance Type Code	1	M	ID	1/2
02	522	Amount Qualifier Code	1	M	ID	1/3
03	782	Monetary Amount	1	M	R	1/18

BAT - Batch

To indicate batch identifying information

TRANSACTION SETS USED IN
823

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	X	DT	8/8
02	337	Time	1	O	TM	4/8
03	127	Reference Identification	1	X/Z	AN	1/80
04	894	Batch Type Code	1	O	ID	2/2

Syntax Notes

01 R0103

Semantic Notes

03 BAT03 is the batch number.

BAU - Beginning Segment for the Debit Authorization

To identify the beginning of the Debit Authorization Transaction Set; the BAU segment is used to identify the financial institution and account of the payer (i.e., the party authorizing the debit against its account)

TRANSACTION SETS USED IN

828

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	591	Payment Method Code	1	M	ID	3/3
03	506	(DFI) ID Number Qualifier	1	M	ID	2/2
04	507	(DFI) Identification Number	1	M	AN	3/12
05	508	Account Number	1	M	AN	1/35
06	93	Name	1	O/Z	AN	1/60

Semantic Notes

01 BAU01 is assigned by the account holder's application and relevant as an application trace number.

06 BAU06 identifies the party holding the account being debited. If used, it further serves to identify the account holder to the financial institution.

Comments

00 The reference information in the BAU segment is meaningful to the originator of the authorization, not the originator of the debit.

BAX - Beginning Segment for Advance Consist and Transportation Automatic Equipment ID

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN
160 418

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	154	Standard Point Location Code	1	M	ID	6/9
02	579	Type of Consist Code	1	M	ID	1/1
03	374	Date/Time Qualifier	1	M	ID	3/3
04	373	Date	1	M	DT	8/8
05	337	Time	1	M	TM	4/8
06	41	Interchange Train Identification	1	O	AN	1/10
07	154	Standard Point Location Code	1	O	ID	6/9
08	127	Reference Identification	1	O/Z	AN	1/80
09	1280	Direction Identifier Code	1	O	ID	1/1
10	373	Date	1	X/Z	DT	8/8
11	337	Time	1	X/Z	TM	4/8
12	623	Time Code	1	O	ID	2/2
13	353	Transaction Set Purpose Code	1	O	ID	2/2
14	284	Service Level Code	1	O	ID	2/2
15	41	Interchange Train Identification	1	O	AN	1/10
16	1470	Number	1	O	N0	1/9

Syntax Notes

11	C1110
12	C1211

Semantic Notes

08	BAX08 is the Reader Identification Number.
10	BAX10 is the date the last piece of equipment passed the reader.
11	BAX11 is the time the last piece of equipment passed the reader.

BBC - Legal Claims

To identify the basis and type of a legal claim

TRANSACTION SETS USED IN

155 176

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1017	Claim Type Code	1	M	ID	1/2
02	352	Description	1	O	AN	1/80

BC - Beginning Segment for Contract Completion Status

To indicate the beginning of a Contract Completion Status Transaction Set

TRANSACTION SETS USED IN
567

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	373	Date	1	O/Z	DT	8/8
03	337	Time	1	O/Z	TM	4/8
04	127	Reference Identification	1	O/Z	AN	1/80
05	127	Reference Identification	1	O/Z	AN	1/80
06	640	Transaction Type Code	1	O	ID	2/2
07	306	Action Code	1	O	ID	1/2

Semantic Notes

02 BC02 is the date of transaction set preparation.
03 BC03 is the time of transaction set preparation.
04 BC04 is the transaction reference number.
05 BC05 is the reference number of a previous transaction.

BCA - Beginning Segment for Purchase Order Change Acknowledgment

To indicate the beginning of the Purchase Order Change Acknowledgment Transaction Set and transmit identifying numbers and dates

TRANSACTION SETS USED IN
865

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	587	Acknowledgment Type Code	1	O	ID	2/2
03	324	Purchase Order Number	1	M	AN	1/22
04	328	Release Number	1	O	AN	1/30
05	327	Change Order Sequence Number	1	O	AN	1/8
06	373	Date	1	M/Z	DT	8/8
07	326	Request Reference Number	1	O	AN	1/45
08	367	Contract Number	1	O	AN	1/30
09	127	Reference Identification	1	O/Z	AN	1/80
10	373	Date	1	O/Z	DT	8/8
11	373	Date	1	O/Z	DT	8/8
12	373	Date	1	O/Z	DT	8/8
13	92	Purchase Order Type Code	1	O	ID	2/2
14	786	Security Level Code	1	O	ID	2/2
15	640	Transaction Type Code	1	O	ID	2/2

Semantic Notes

06 BCA06 is the date assigned by the purchaser to purchase order.
09 BCA09 is the seller's order number.
10 BCA10 is the date assigned by the sender to the acknowledgment.
11 BCA11 is the date of the purchase order change request.
12 BCA12 is the order change acknowledgment date.

BCD - Beginning Credit/Debit Adjustment

To transmit identifying dates and numbers for the transaction set and indicate the monetary value to the receiver of the transaction

TRANSACTION SETS USED IN
812

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	M/Z	DT	8/8
02	475	Credit/Debit Adjustment Number	1	M	AN	1/22
03	305	Transaction Handling Code	1	M	ID	1/2
04	610	Amount	1	M/Z	N2	1/15
05	478	Credit/Debit Flag Code	1	M	ID	1/1
06	373	Date	1	O/Z	DT	8/8
07	76	Invoice Number	1	X	AN	1/22
08	424	Vendor Order Number	1	O	AN	1/22
09	373	Date	1	O/Z	DT	8/8
10	324	Purchase Order Number	1	X	AN	1/22
11	353	Transaction Set Purpose Code	1	O	ID	2/2
12	640	Transaction Type Code	1	O	ID	2/2
13	128	Reference Identification Qualifier	1	X	ID	2/3
14	127	Reference Identification	1	X	AN	1/80
15	306	Action Code	1	O	ID	1/2

Syntax Notes

07 R071014
13 P1314

Semantic Notes

01 BCD01 is the credit/debit adjustment date.
04 BCD04 is the net amount of this complete transaction.
06 BCD06 is the invoice date.
09 BCD09 is the purchase order date.

Comments

07 If using BCD07 or BCD10, do not use BCD14 to identify invoice number or purchase order number.
11 For BCD11, only codes 00, 05, 06, 07, and 15 are permitted to be used.

BCH - Beginning Segment for Purchase Order Change

To indicate the beginning of the Purchase Order Change Transaction Set and transmit identifying numbers and dates

TRANSACTION SETS USED IN
860

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	92	Purchase Order Type Code	1	M	ID	2/2
03	324	Purchase Order Number	1	M	AN	1/22
04	328	Release Number	1	O	AN	1/30
05	327	Change Order Sequence Number	1	O	AN	1/8
06	373	Date	1	M/Z	DT	8/8
07	326	Request Reference Number	1	O	AN	1/45
08	367	Contract Number	1	O	AN	1/30
09	127	Reference Identification	1	O/Z	AN	1/80
10	373	Date	1	O/Z	DT	8/8
11	373	Date	1	O/Z	DT	8/8
12	1166	Contract Type Code	1	O	ID	2/2
13	786	Security Level Code	1	O	ID	2/2
14	587	Acknowledgment Type Code	1	O	ID	2/2
15	640	Transaction Type Code	1	O	ID	2/2
16	1232	Purchase Category Code	1	O	ID	2/2

Semantic Notes

06 BCH06 is the date assigned by the purchaser to purchase order.
09 BCH09 is the seller's order number.
10 BCH10 is the date assigned by the sender to the acknowledgment.
11 BCH11 is the date of the purchase order change request.

BCI - Basic Claim Information

To identify information basic to the processing of any claims transaction

TRANSACTION SETS USED IN
124 272 274

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1271	Industry Code	1	O/Z	AN	1/30
02	1336	Insurance Type Code	1	O	ID	1/3
03	127	Reference Identification	1	O/Z	AN	1/80
04	156	State or Province Code	1	O/Z	ID	2/2
05	1250	Date Time Period Format Qualifier	1	X	ID	2/3
06	1251	Date Time Period	1	X/Z	AN	1/35
07	755	Report Type Code	1	O	ID	2/2
08	100	Currency Code	1	O/Z	ID	3/3

Syntax Notes

05 P0506

Semantic Notes

01 BCI01 is used to specify the line of insurance (i.e., line of business).
03 BCI03 is used to specify the actual policy number.
04 BCI04 is used to specify the state associated with the policy (i.e., policy's base state).
06 BCI06 is used to specify the range of dates the policy was in effect.
08 BCI08 is used to specify the currency specified in a contractual agreement of the policy.

BCM - Beginning Segment for Contractor Cost Data Reporting

To indicate the beginning of the contractor cost data reports and transmit identifying numbers, descriptions, action codes, program and contract type, funding identification, and security level

TRANSACTION SETS USED IN
196

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	373	Date	1	M/Z	DT	8/8
03	373	Date	1	M/Z	DT	8/8
04	367	Contract Number	1	X	AN	1/30
05	369	Free-form Description	1	X/Z	AN	1/45
06	1308	Contract Action Code	1	O	ID	2/2
07	1193	Program Type Code	1	O	ID	2/2
08	369	Free-form Description	1	O/Z	AN	1/45
09	1198	Contracting Funding Code	1	O	ID	2/2
10	1166	Contract Type Code	1	O	ID	2/2
11	786	Security Level Code	1	O	ID	2/2
12	100	Currency Code	1	O	ID	3/3

Syntax Notes

04 R0405

Semantic Notes

02 BCM02 is the transaction set effective date.
03 BCM03 is the report effective date.
05 BCM05 is used to describe the report.
08 BCM08 is used to describe other unlisted program types.

BCO - Beginning Segment for Procurement Notices

To indicate the beginning of the Procurement Notices Transaction Set and transmit identifying numbers and dates

TRANSACTION SETS USED IN
836

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	586	Request for Quote Reference Number	1	O	AN	1/45
03	373	Date	1	O/Z	DT	8/8
04	127	Reference Identification	1	O/Z	AN	1/80
05	846	Contract Status Code	1	O	ID	2/2
06	373	Date	1	O/Z	DT	8/8
07	373	Date	1	O/Z	DT	8/8
08	587	Acknowledgment Type Code	1	O	ID	2/2
09	128	Reference Identification Qualifier	1	X	ID	2/3
10	127	Reference Identification	1	X	AN	1/80
11	640	Transaction Type Code	1	O	ID	2/2
12	306	Action Code	1	O	ID	1/2

Syntax Notes

09 P0910

Semantic Notes

03 BCO03 is the date to be used for reference purposes in an RFQ and a response to RFQ.
04 BCO04 is the contract number.
06 BCO06 is the contract beginning date.
07 BCO07 is the contract expiration date.

BCP - Beginning Segment for Contract Pricing Proposal

To indicate the beginning of a Contract Pricing Proposal Transaction Set and transmit identifying numbers and dates

TRANSACTION SETS USED IN
805

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	128	Reference Identification Qualifier	1	M	ID	2/3
03	127	Reference Identification	1	M	AN	1/80
04	373	Date	1	O/Z	DT	8/8
05	1308	Contract Action Code	1	O	ID	2/2
06	1166	Contract Type Code	1	O	ID	2/2
07	373	Date	1	O/Z	DT	8/8
08	337	Time	1	O/Z	TM	4/8
09	327	Change Order Sequence Number	1	O	AN	1/8
10	127	Reference Identification	1	O/Z	AN	1/80
11	127	Reference Identification	1	O/Z	AN	1/80
12	352	Description	1	O/Z	AN	1/80
13	352	Description	1	O/Z	AN	1/80

Semantic Notes

04 BCP04 is the start of the proposer's fiscal year.
07 BCP07 is the transaction creation date.
08 BCP08 is the transaction creation time.
10 BCP10 is the revision number of the proposal.
11 BCP11 is the option number being proposed.
12 BCP12 is the description of an "other" type of contract action.
13 BCP13 is the description of an "other" type of contract.

BCQ - Beginning Segment for Shipper's Car Order

To indicate the beginning of the Shipper's Car Order Transaction Set and transmit identifying numbers and dates

TRANSACTION SETS USED IN
422

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	373	Date	1	M/Z	DT	8/8
03	337	Time	1	M/Z	TM	4/8
04	127	Reference Identification	1	O/Z	AN	1/80
05	140	Standard Carrier Alpha Code	1	O	ID	2/4
06	640	Transaction Type Code	1	O	ID	2/2
07	1271	Industry Code	1	O/Z	AN	1/30

Semantic Notes

02 BCQ02 is the transaction date.
03 BCQ03 is the transaction time.
04 BCQ04 is the unique customer order number.
07 BCQ07 is the Association of American Railroads (AAR) Status Code for the Car Order.

BCS - Beginning Segment for Project Cost Reporting

To indicate the beginning of the Project Cost Reporting Transaction Set and provide information identifying a program name, number, contract type, and security classification

TRANSACTION SETS USED IN
839

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	373	Date	1	M/Z	DT	8/8
03	367	Contract Number	1	M	AN	1/30
04	373	Date	1	M/Z	DT	8/8
05	1166	Contract Type Code	1	O	ID	2/2
06	352	Description	1	O/Z	AN	1/80
07	127	Reference Identification	1	O/Z	AN	1/80
08	1193	Program Type Code	1	O	ID	2/2
09	786	Security Level Code	1	O	ID	2/2
10	954	Percentage as Decimal	1	O/Z	R	1/10
11	954	Percentage as Decimal	1	O/Z	R	1/10
12	C001	Composite Unit of Measure	1	O/Z		

Semantic Notes

02	BCS02 is the transaction set date.
04	BCS04 is the report effective date.
06	BCS06 is the program name.
07	BCS07 is the program number identification.
10	BCS10 is the customer share ratio number.
11	BCS11 is the contractor share ratio number.
12	BCS12 is the notation for the total project monetary costs.
12	If BCS12 is absent, the total project monetary costs are assumed to be whole dollar amounts.

BCT - Beginning Segment for Price/Sales Catalog

To indicate the beginning of the Price/Sales Catalog Transaction Set and specify catalog purpose and number information

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	683	Catalog Purpose Code	1	M	ID	2/2
02	684	Catalog Number	1	O	AN	1/15
03	685	Catalog Version Number	1	O	AN	1/15
04	686	Catalog Revision Number	1	O	AN	1/6
05	355	Unit or Basis for Measurement Code	1	O	ID	2/2
06	684	Catalog Number	1	O	AN	1/15
07	685	Catalog Version Number	1	O	AN	1/15
08	686	Catalog Revision Number	1	O	AN	1/6
09	352	Description	1	O	AN	1/80
10	353	Transaction Set Purpose Code	1	O	ID	2/2

BCU - Legal Claim Updates

To identify specific actions already taken on a legal claim, and/or indicate that information related to a previously filed claim is being updated by this transaction

TRANSACTION SETS USED IN
176

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
02	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
05	306	Action Code	1	O	ID	1/2
06	127	Reference Identification	1	O/Z	AN	1/80
07	373	Date	1	O/Z	DT	8/8

Semantic Notes

01 BCU01 indicates if a related claim has been filed in this case before. A "Y" indicates a related claim has been filed previously; an "N" indicates no related claim has been filed.

02 BCU02 indicates if notices in this case have never been previously received. A "Y" indicates that no notice has been received; an "N" indicates that notice has been received.

03 BCU03 is a change of address indicator. A "Y" indicates that the address submitted is different than the address on notices received; an "N" indicates there is no change of address.

04 BCU04 indicates if notice is required under Bankruptcy Rule 3004. A "Y" indicates notice is required; an "N" indicates notice is not required.

06 BCU06 is a previous claim number.

07 BCU07 is the previous claim date.

BDD - Beginning Segment for Shipment Delivery Discrepancy Information

To transmit identifying numbers and other basic data relating to the transaction set

TRANSACTION SETS USED IN

854

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	76	Invoice Number	1	M	AN	1/22
02	140	Standard Carrier Alpha Code	1	M	ID	2/4
03	145	Shipment Identification Number	1	O	AN	1/30

BDS - Binary Data Structure

To transfer binary data in a single data segment, convey a critical filter for transmission and allow identification of the end of the data segment through a count; there is no identification of the internal structure of the binary data in this segment

TRANSACTION SETS USED IN

102 179 271 274 275 824

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1570	Filter ID Code	1	M	ID	3/3
02	784	Length of Binary Data	1	M/Z	N0	1/15
03	785	Binary Data	1	M	B	1/999999999999999

Semantic Notes

02 BDS02 is the length of the data in BDS03 after application of the filter indicated by BDS01. For example, a 1000 byte binary file that has been filtered using Base 64 encoding (value 'B64' in BDS01) will have a value of 1336 in the BDS02.

BEG - Beginning Segment for Purchase Order

To indicate the beginning of the Purchase Order Transaction Set and transmit identifying numbers and dates

TRANSACTION SETS USED IN
850

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	92	Purchase Order Type Code	1	M	ID	2/2
03	324	Purchase Order Number	1	M	AN	1/22
04	328	Release Number	1	O	AN	1/30
05	373	Date	1	M/Z	DT	8/8
06	367	Contract Number	1	O	AN	1/30
07	587	Acknowledgment Type Code	1	O	ID	2/2
08	1019	Invoice Type Code	1	O	ID	3/3
09	1166	Contract Type Code	1	O	ID	2/2
10	1232	Purchase Category Code	1	O	ID	2/2
11	786	Security Level Code	1	O	ID	2/2
12	640	Transaction Type Code	1	O	ID	2/2

Semantic Notes

05 BEG05 is the date assigned by the purchaser to purchase order.

BEN - Beneficiary or Owner Information

To supply beneficiary, co-participant, and owner information

TRANSACTION SETS USED IN
111 267 268 273 834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1130	Primary or Contingent Code	1	O	ID	1/1
02	954	Percentage as Decimal	1	O/Z	R	1/10
03	1069	Individual Relationship Code	1	O	ID	2/2
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	1187	Type of Account Code	1	O	ID	2/2

Semantic Notes

02 BEN02 is the percent of benefits that the beneficiary will receive.

04 BEN04 is the employee signature on file indicator. A "Y" value indicates the employee signature has been obtained and is on file; an "N" value indicates the employee signature has not been obtained.

05 BEN05 is spouse signature on file indicator. A "Y" value indicates the spouse signature has been obtained and is on file; an "N" value indicates the spouse signature has not been obtained.

BEP - Borrower Education Program

To identify the type and location of borrower education provided

TRANSACTION SETS USED IN

201 202

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1133	Program Participation and Services Code	1	M	ID	1/2
02	1132	Instructional Setting Code	1	O	ID	1/2

BER - Beer Information

To specify beer style and related characteristics

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1832	Beer Style	1	M	ID	2/3
02	739	Measurement Value	1	O/Z	R	1/20

Semantic Notes

02 BER02 is the value of a beer's bitterness, identified in the International Bitterness Units (IBU) Scale

BFR - Beginning Segment for Planning Schedule

To indicate the beginning of a planning schedule transaction set; whether a ship or delivery based forecast; and related forecast envelope dates

TRANSACTION SETS USED IN
830

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M/Z	ID	2/2
02	127	Reference Identification	1	X/Z	AN	1/80
03	328	Release Number	1	X	AN	1/30
04	675	Schedule Type Qualifier	1	M	ID	2/2
05	676	Schedule Quantity Qualifier	1	M	ID	1/1
06	373	Date	1	M/Z	DT	8/8
07	373	Date	1	O/Z	DT	8/8
08	373	Date	1	M/Z	DT	8/8
09	373	Date	1	O/Z	DT	8/8
10	367	Contract Number	1	O	AN	1/30
11	324	Purchase Order Number	1	O	AN	1/22
12	783	Planning Schedule Type Code	1	O	ID	2/2
13	306	Action Code	1	O	ID	1/2

Syntax Notes

02	R0203

Semantic Notes

01	If BFR01 contains the value "04" (Net Change), BFR09 is required.
02	BFR02 is the identifying number for a forecast assigned by the orderer/purchaser.
06	BFR06 is the forecast horizon start date: The date when the forecast horizon (envelope) begins.
07	BFR07 is the forecast horizon end date: The date when the forecast horizon (envelope) ends.
08	BFR08 is the date forecast generated: The date the forecast data was generated.
09	BFR09 is the date forecast updated: The date the forecast was updated with "net change" data. (Used only when data element 353 in BFR01 contains the value "04", meaning net change.)

BFS - Borrower Financial Summary

To provide summary totals for borrower's financial position

TRANSACTION SETS USED IN
872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	122	Rate/Value Qualifier	1	O/Z	ID	2/2
02	782	Monetary Amount	1	X/Z	R	1/18
03	122	Rate/Value Qualifier	1	O/Z	ID	2/2
04	782	Monetary Amount	1	X/Z	R	1/18
05	373	Date	1	O/Z	DT	8/8
06	782	Monetary Amount	1	X/Z	R	1/18
07	373	Date	1	O/Z	DT	8/8
08	782	Monetary Amount	1	X/Z	R	1/18
09	1186	Type of Income Code	1	O/Z	ID	2/2
10	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

01	C0102
03	C0304
05	C0506
07	C0708

Semantic Notes

01	BFS01 defines period for income total.
02	BFS02 defines borrower income amount.
03	BFS03 defines period for expense total.
04	BFS04 defines borrower expense amount.
05	BFS05 defines asset total effective date.
06	BFS06 defines borrower asset total.
07	BFS07 defines borrower liability total effective date.
08	BFS08 defines borrower liability total.
09	BFS09 is used to state the source of borrower income.
10	BFS10 defines if the borrower is a non-occupant. A "Y" indicates the borrower is a non-occupant; an "N" indicates the borrower is an occupant.

BGF - Beginning Segment for File Transfer Information

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN
996

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	143	Transaction Set Identifier Code	1	O	ID	3/3
02	128	Reference Identification Qualifier	1	M	ID	2/3
03	127	Reference Identification	1	M	AN	1/80

Comments

00	Due to the installation of the ST segment in all transaction sets, data element 143 in all of the "B" segments is redundant. DE 143 will be retained as an optional data element for a period of adjustment. It is suggested that DE 143 not be transmitted so it may be dropped from segment definitions in the future.
00	The reference number qualifier code for file identifier is "FI".

BGN - Beginning Segment

To indicate the beginning of a transaction set

TRANSACTION SETS USED IN

100 101 103 105 106 107 108 112 113 124 130 131 132 133 135 138 139 140 141 142 143 144 146 147

201 202 203 205 206 228 240 242 244 245 249 250 251 252 255 259 260 261 262 263 264 265 266 267
268 269 272 273 275 280 283 284 285 286 288 362 423 432 433 470 475 500 501 503 504 521 540 561
568 603 620 625 650 715 753 754 814 822 824 831 833 834 853 872 873 874 877 881 887 888 891 892

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	127	Reference Identification	1	M/Z	AN	1/80
03	373	Date	1	M/Z	DT	8/8
04	337	Time	1	X/Z	TM	4/8
05	623	Time Code	1	O/Z	ID	2/2
06	127	Reference Identification	1	O/Z	AN	1/80
07	640	Transaction Type Code	1	O	ID	2/2
08	306	Action Code	1	O	ID	1/2
09	786	Security Level Code	1	O	ID	2/2

Syntax Notes

05 C0504

Semantic Notes

02 BGN02 is the transaction set reference number.

03 BGN03 is the transaction set date.

04 BGN04 is the transaction set time.

05 BGN05 is the transaction set time qualifier.

06 BGN06 is the transaction set reference number of a previously sent transaction affected by the current transaction.

BGP - Beginning Segment for Problem Log Inquiry or Advice

To provide identifying numbers associated with the creation and maintenance of Interline Service Management problem logs

TRANSACTION SETS USED IN
452

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	1484	Problem Log Reason Code	1	O	ID	2/2
03	128	Reference Identification Qualifier	1	X	ID	2/3
04	127	Reference Identification	1	X	AN	1/80
05	206	Equipment Initial	1	X	AN	1/4
06	207	Equipment Number	1	X	AN	1/15
07	1251	Date Time Period	1	O	AN	1/35
08	154	Standard Point Location Code	1	O/Z	ID	6/9
09	41	Interchange Train Identification	1	O/Z	AN	1/10

Syntax Notes

03 P0304
05 P0506

Semantic Notes

08 BGP08 is the Standard Point Location Code of the problem.
09 BGP09 is the Train ID associated with the problem.

Comments

07 BGP07 is the date associated with a trip cycle in (CCYYMMDD) format. This data will be used to identify a trip cycle. If a problem log exists for the equipment during the trip cycle, problem log information will be returned.

BHT - Beginning of Hierarchical Transaction

To define the business hierarchical structure of the transaction set and identify the business application purpose and reference data, i.e., number, date, and time

TRANSACTION SETS USED IN

111 148 248 270 271 274 276 277 278 816 837 847 857 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1005	Hierarchical Structure Code	1	M	ID	4/4
02	353	Transaction Set Purpose Code	1	M	ID	2/2
03	127	Reference Identification	1	O/Z	AN	1/80
04	373	Date	1	O/Z	DT	8/8
05	337	Time	1	O/Z	TM	4/8
06	640	Transaction Type Code	1	O	ID	2/2

Semantic Notes

03	BHT03 is the number assigned by the originator to identify the transaction within the originator's business application system.
04	BHT04 is the date the transaction was created within the business application system.
05	BHT05 is the time the transaction was created within the business application system.

BIA - Beginning Segment for Inventory Inquiry/Advice

To indicate the beginning of an Inventory Inquiry/Advice Transaction Set

TRANSACTION SETS USED IN
846

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	755	Report Type Code	1	M	ID	2/2
03	127	Reference Identification	1	M/Z	AN	1/80
04	373	Date	1	M/Z	DT	8/8
05	337	Time	1	O/Z	TM	4/8
06	306	Action Code	1	O	ID	1/2

Semantic Notes

03 BIA03 identifies the number of the inquiry/advice that is transferred.
04 BIA04 identifies the date of the inquiry/advice that is transferred.
05 BIA05 identifies the time of the inquiry/advice that is transferred.

BIG - Beginning Segment for Invoice

To indicate the beginning of an invoice transaction set and transmit identifying numbers and dates

TRANSACTION SETS USED IN

810 811

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	M/Z	DT	8/8
02	76	Invoice Number	1	M	AN	1/22
03	373	Date	1	O/Z	DT	8/8
04	324	Purchase Order Number	1	O	AN	1/22
05	328	Release Number	1	O	AN	1/30
06	327	Change Order Sequence Number	1	O	AN	1/8
07	640	Transaction Type Code	1	O	ID	2/2
08	353	Transaction Set Purpose Code	1	O	ID	2/2
09	306	Action Code	1	O	ID	1/2
10	76	Invoice Number	1	O/Z	AN	1/22
11	1005	Hierarchical Structure Code	1	O	ID	4/4

Semantic Notes

01 BIG01 is the invoice issue date.

03 BIG03 is the date assigned by the purchaser to purchase order.

10 BIG10 is the consolidated invoice number associated with the invoice identified in BIG02. When BIG07 contains code CI (Consolidated Invoice), BIG02 will contain the consolidated invoice number and BIG10 is not used.

Comments

07 BIG07 is used only to further define the type of invoice when needed.

BIN - Binary Data Segment

To transfer binary data in a single data segment and allow identification of the end of the data segment through a count; there is no identification of the internal structure of the binary data in this segment

TRANSACTION SETS USED IN

105 176 186 187 197 240 252 255 267 268 280 841 842

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	784	Length of Binary Data	1	M	N0	1/15
02	785	Binary Data	1	M	B	1/999999999999999

BIX - Beginning Segment for Automotive Inspection

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN

928

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2

04	154	Standard Point Location Code	1	O	ID	6/9
05	19	City Name	1	X	AN	2/30
06	156	State or Province Code	1	X	ID	2/2
07	26	Country Code	1	O	ID	2/3

Syntax Notes

04	C040506
05	P0506
07	C070506

Semantic Notes

03	BJF03 is the official Rule 260 Junction Name.

BL - Billing Information

To identify the individual billing segments within a movement when joint rail rates have been established between carriers but do not cover the entire movement

TRANSACTION SETS USED IN
404 410 417 426 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	747	Rebill Reason Code	1	M	ID	2/2
02	573	Freight Station Accounting Code	1	X/Z	ID	1/5
03	573	Freight Station Accounting Code	1	X/Z	ID	1/5
04	154	Standard Point Location Code	1	O/Z	ID	6/9
05	19	City Name	1	X/Z	AN	2/30
06	156	State or Province Code	1	O	ID	2/2

08	154	Standard Point Location Code	1	O/Z	ID	6/9
09	19	City Name	1	X/Z	AN	2/30
10	156	State or Province Code	1	O	ID	2/2
11	26	Country Code	1	O	ID	2/3
12	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
13	140	Standard Carrier Alpha Code	1	O	ID	2/4
14	140	Standard Carrier Alpha Code	1	O	ID	2/4
15	140	Standard Carrier Alpha Code	1	O	ID	2/4
16	140	Standard Carrier Alpha Code	1	O	ID	2/4
17	140	Standard Carrier Alpha Code	1	O	ID	2/4

Syntax Notes

02	R0205
03	R0309
06	C0605
10	C1009

Semantic Notes

02	BL02 is the FSAC for the origin point of the rate for this portion of this movement.
03	BL03 is the FSAC for the destination point of the rate for this portion of the movement.
04	BL04 is the Standard Point Location Code (SPLC) for the origin point of the rate for this portion of the movement.
05	BL05 through BL07 is the city, state, and country for the rate for the beginning portion of the move.
08	BL08 is the Standard Point Location Code (SPLC) for the destination point of the rate for this portion of the move.
09	BL09 through BL11 is the city, state, and country for the rate for ending portion of the move.
12	BL12 is the Standard Carrier Alpha Code (SCAC) of the first carrier participating in the rate for the move defined in BL02 through BL11.

BLI - Basic Baseline Item Data

To specify basic item data: item identification, quantity, and price

TRANSACTION SETS USED IN
100 111 180 256 267 268 273

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	235	Product/Service ID Qualifier	1	M	ID	2/2
02	234	Product/Service ID	1	M	AN	1/80
03	380	Quantity	1	X	R	1/15
04	355	Unit or Basis for Measurement Code	1	O	ID	2/2
05	236	Price Identifier Code	1	X	ID	3/3
06	212	Unit Price	1	X	R	1/17
07	355	Unit or Basis for Measurement Code	1	O	ID	2/2
08	235	Product/Service ID Qualifier	1	X	ID	2/2
09	234	Product/Service ID	1	X	AN	1/80
10	235	Product/Service ID Qualifier	1	X	ID	2/2
11	234	Product/Service ID	1	X	AN	1/80

14	1161	Product Option Code	1	O	ID	1/2
15	1161	Product Option Code	1	O	ID	1/2
16	1161	Product Option Code	1	O	ID	1/2
17	1161	Product Option Code	1	O	ID	1/2
18	594	Frequency Code	1	O	ID	1/1

Syntax Notes

04	C0403
05	P0506
07	C0706
08	P0809
10	P1011
12	P1213

Comments

00	Element 235/234 combinations should be interpreted to include products or services. See the Data Element Dictionary for a complete list of IDs.
01	BLI01, BLI02, and BLI08 through BLI13 provide for four different product/service IDs for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model, SKU.

BLN - Balance Information

To provide specific balance information for financial account reporting

TRANSACTION SETS USED IN
103 111 256 821 822

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1270	Code List Qualifier Code	1	M	ID	1/3
02	1271	Industry Code	1	M	AN	1/30
03	782	Monetary Amount	1	M/Z	R	1/18
04	373	Date	1	O	DT	8/8
05	337	Time	1	X	TM	4/8
06	623	Time Code	1	O	ID	2/2

Syntax Notes

06 C0605

Semantic Notes

03 BLN03 is the monetary amount of a financial account balance type described in BLN02. A financial account may have more than one balance type. If more than one balance type is present, multiple BLN loops should be used.

BLR - Transportation Carrier Identification

To transmit the identifying SCAC code and effective date and time for the data in the transaction set

TRANSACTION SETS USED IN

106 108 212 217 227 432 455 754

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	373	Date	1	X/Z	DT	8/8
03	337	Time	1	O/Z	TM	4/8

Syntax Notes

03 C0302

Semantic Notes

02 BLR02 is the effective date of the data in this transaction set.

03 BLR03 is the effective time of the data in this transaction set.

BLS - Beginning Segment for Asset Schedule

To indicate the beginning of the Asset Schedule Transaction Set and transmit type of schedule and identifying numbers

TRANSACTION SETS USED IN
851

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	640	Transaction Type Code	1	M	ID	2/2
03	127	Reference Identification	1	M/Z	AN	1/80
04	373	Date	1	M	DT	8/8
05	337	Time	1	O	TM	4/8
06	587	Acknowledgment Type Code	1	O	ID	2/2

Semantic Notes

03 BLS03 is the lease schedule number.

BMA - Beginning Segment for Market Development Fund Allocation

To indicate identifying numbers, dates, and other basic data relative to market development funds

TRANSACTION SETS USED IN
883

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	127	Reference Identification	1	M/Z	AN	1/80
03	331	Allowance or Charge Method of Handling Code	1	M	ID	2/2
04	373	Date	1	M/Z	DT	8/8
05	373	Date	1	M/Z	DT	8/8
06	640	Transaction Type Code	1	M	ID	2/2
07	782	Monetary Amount	1	O/Z	R	1/18
08	352	Description	1	O/Z	AN	1/80

Semantic Notes

02 BMA02 is the Fund Identification Number.
04 BMA04 is the beginning date of the market development fund.
05 BMA05 is the ending date of the market development fund.
07 BMA07 is the overall market development fund amount.
08 BMA08 is the market development fund description.

BMG - Beginning Segment For Text Message

To indicate the beginning of a Text Message Transaction Set

TRANSACTION SETS USED IN

864

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	352	Description	1	O	AN	1/80
03	640	Transaction Type Code	1	O	ID	2/2

Comments

02	BMG02 contains the message subject.

BMM - Beginning Segment for Multilevel Railcar Load Details Transaction

To indicate the beginning of the Multilevel Railcar Load Details Transaction Set

TRANSACTION SETS USED IN

125

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	154	Standard Point Location Code	1	M/Z	ID	6/9
03	380	Quantity	1	M/Z	R	1/15
04	186	Waybill Number	1	M	N0	1/6
05	154	Standard Point Location Code	1	O/Z	ID	6/9
06	145	Shipment Identification Number	1	O	AN	1/30
07	1094	Vehicle Status	1	O	AN	1/2
08	508	Account Number	1	O/Z	AN	1/35
09	127	Reference Identification	1	O/Z	AN	1/80
10	353	Transaction Set Purpose Code	1	O	ID	2/2

Semantic Notes

01	BMM01 is the Standard Carrier Alpha Code (SCAC) for a railroad on whose line the shipment originated.
02	BMM02 is the railcar destination.
03	BMM03 is the number of vehicles on railcar.
05	BMM05 is the departure point for railcar shipments only.
08	BMM08 is the account number for charges.
09	BMM09 is the shipper's authorization number for nonstandard move.

BMP - Beginning Segment for Market Development Fund Settlement

To indicate identifying numbers and other basic data relative to market development funds

TRANSACTION SETS USED IN
884

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	305	Transaction Handling Code	1	M	ID	1/2
02	127	Reference Identification	1	M/Z	AN	1/80
03	591	Payment Method Code	1	O	ID	3/3
04	127	Reference Identification	1	O/Z	AN	1/80

Semantic Notes

02 BMP02 is the market development fund event identification number.

04 BMP04 is the fund identification number.

BMS - Beginning Segment For Material Safety Data Sheet

To indicate the beginning of the Material Safety Data Sheet Transaction Set, identify the distinct type of report, and transmit key identifying numbers and dates relating to that report

TRANSACTION SETS USED IN
848

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	373	Date	1	M/Z	DT	8/8
03	819	Language Code	1	O	ID	2/3
04	127	Reference Identification	1	O/Z	AN	1/80
05	796	Revision Value	1	O/Z	AN	1/30
06	127	Reference Identification	1	O	AN	1/80
07	796	Revision Value	1	O	AN	1/30
08	156	State or Province Code	1	O/Z	ID	2/2
09	26	Country Code	1	O/Z	ID	2/3

Semantic Notes

02 BMS02 specifies date the report is effective (YYMMDD).
04 BMS04 specifies sender's report identifier.
05 BMS05 indicates the chronological sequence of this revision.
08 BMS08 specifies the state or province for ultimate receipt of this report.
09 BMS09 specifies the country for ultimate receipt of this report.

Comments

01 If BMS01 is code "05" and BMS04 is used, then BMS06, if used, must identify the previous version of this report which is being replaced.
01 If BMS01 is code "05" and BMS05 is used, then BMS07, if used, must identify the previous version of this report which is being replaced.
03 BMS03 specifies the language of the text information in the Material Safety Data Sheet (MSDS).

BNR - Beginning Segment For Nonconformance Report

To indicate the beginning of a Nonconformance Report Transaction Set

TRANSACTION SETS USED IN

842

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	127	Reference Identification	1	M/Z	AN	1/80
03	373	Date	1	M/Z	DT	8/8
04	337	Time	1	O/Z	TM	4/8
05	886	Nonconformance Report Status Code	1	O	ID	2/2
06	640	Transaction Type Code	1	O	ID	2/2

Semantic Notes

02 BNR02 is the nonconformance report identifier number.

03 BNR03 is the date that the nonconformance report was created.

04 BNR04 is the time that the nonconformance report was created.

Comments

05 BNR05 indicates the status or intention of the nonconformance report.

BNX - Rail Shipment Information

To transmit rail-specific shipment data

TRANSACTION SETS USED IN

404 417 426 858 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	460	Shipment Weight Code	1	O	ID	1/1
02	129	Referenced Pattern Identifier	1	O	AN	1/13
03	11	Billing Code	1	O	ID	1/1
04	223	Repetitive Pattern Number	1	O	N0	5/5

BOL - Beginning Segment for the Motor Carrier Bill of Lading

To transmit identifying numbers, dates, and other basic data related to the transaction set

TRANSACTION SETS USED IN

211

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	146	Shipment Method of Payment Code	1	M/Z	ID	2/2
03	145	Shipment Identification Number	1	M/Z	AN	1/30
04	373	Date	1	M/Z	DT	8/8
05	337	Time	1	O/Z	TM	4/8
06	127	Reference Identification	1	O/Z	AN	1/80
07	160	Status Report Request Code	1	O	ID	1/1
08	226	Section Seven Code	1	O	ID	1/1
09	501	Customs Documentation Handling Code	1	O	ID	2/2
10	146	Shipment Method of Payment Code	1	O/Z	ID	2/2
11	100	Currency Code	1	O/Z	ID	3/3

Semantic Notes

01	BOL01 is the Standard Carrier Alpha Code (SCAC) of the carrier that is to provide transportation services.
02	BOL02 is the method of payment for the freight charges.
03	BOL03 is the identification number assigned by the shipper, usually the Bill of Lading number.
04	BOL04 is the date the carrier picked up the freight.
05	BOL05 is the actual time the carrier picked up the freight.
06	BOL06 is the number assigned by the carrier to the shipment, usually the PRO number.
10	BOL10 is the method of payment for the COD fee.
11	BOL11 is the currency that all monetary units are specified in for this transaction set.

BOR - Beginning of Report

To identify characteristic information of the report being transmitted

TRANSACTION SETS USED IN
186

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	755	Report Type Code	1	M	ID	2/2
02	127	Reference Identification	1	O/Z	AN	1/80
03	127	Reference Identification	1	O/Z	AN	1/80
04	127	Reference Identification	1	O/Z	AN	1/80
05	1250	Date Time Period Format Qualifier	1	X	ID	2/3
06	1251	Date Time Period	1	X/Z	AN	1/35
07	91	Transportation Method/Type Code	1	O/Z	ID	1/2
08	306	Action Code	1	O	ID	1/2
09	641	Status Reason Code	1	O	ID	3/3
10	819	Language Code	1	O/Z	ID	2/3

Syntax Notes

05 P0506

Semantic Notes

02 BOR02 is the vendor assigned case number.
03 BOR03 is the form number used in the report.
04 BOR04 is the physical order ticket number.
06 BOR06 indicates date report was sent to client.
07 BOR07 is the method by which laboratory test samples were sent.
10 BOR10 indicates language used on the report.

BOS - Beginning Segment for Joint Interest Billing and Operating Expense Statement

To indicate the beginning of a joint interest billing and operating expense statement transaction and to transmit the identifying numbers and dates

TRANSACTION SETS USED IN
819

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	613	Statement Number	1	M	AN	1/16
02	373	Date	1	M/Z	DT	8/8
03	559	Agency Qualifier Code	1	O	ID	2/2
04	781	Statement Format Code	1	O	ID	6/6
05	640	Transaction Type Code	1	O	ID	2/2
06	373	Date	1	O/Z	DT	8/8

Semantic Notes

02 BOS02 is the period ending date for the month the charges are for.

06 BOS06 is the date of the invoice to which the information applies.

BOX - Box Office Detail

To provide detail information regarding a specific event

TRANSACTION SETS USED IN
170

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	594	Frequency Code	1	M	ID	1/1
02	1162	Show Code	1	M	ID	2/2
03	1163	Ticket Category Code	1	M	ID	2/2
04	782	Monetary Amount	1	M/Z	R	1/18
05	100	Currency Code	1	O/Z	ID	3/3
06	782	Monetary Amount	1	O/Z	R	1/18
07	380	Quantity	1	O/Z	R	1/15
08	380	Quantity	1	O/Z	R	1/15
09	380	Quantity	1	O/Z	R	1/15
10	380	Quantity	1	O/Z	R	1/15
11	782	Monetary Amount	1	O/Z	R	1/18
12	212	Unit Price	1	O/Z	R	1/17
13	782	Monetary Amount	1	O/Z	R	1/18
14	127	Reference Identification	1	O/Z	AN	1/80
15	127	Reference Identification	1	O/Z	AN	1/80

Semantic Notes

04 BOX04 is the gross box office receipts.
05 If BOX05 is omitted, currency is assumed to be in U.S. Dollars.
06 BOX06 is the total tax amount.
07 BOX07 is the total number of tickets sold.
08 BOX08 is the total tickets refunded and voided.
09 BOX09 is the total tickets refunded.
10 BOX10 is total tickets voided.
11 BOX11 is other deductions.
12 BOX12 is the individual ticket price - total including tax.
13 BOX13 is the tax per ticket.
14 BOX14 is the opening ticket number.
15 BOX15 is the closing ticket number.

BPA - Beginning Segment for Price Authorization Acknowledgment/Status

To identify the beginning of a Price Authorization Acknowledgment/Status Transaction Set

TRANSACTION SETS USED IN
845

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	373	Date	1	M/Z	DT	8/8
03	128	Reference Identification Qualifier	1	X	ID	2/3
04	127	Reference Identification	1	X	AN	1/80
05	337	Time	1	O/Z	TM	4/8

Syntax Notes

03	P0304

Semantic Notes

02	BPA02 is the price authorization status date.
05	BPA05 is the price authorization status time.

BPP - Beginning Segment for Project Schedule Reporting

To indicate the beginning of the Project Schedule Reporting Transaction Set and program identifying numbers

TRANSACTION SETS USED IN
806

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	373	Date	1	M/Z	DT	8/8
03	1164	Network or Schedule Data Type Code	1	M	ID	2/2
04	367	Contract Number	1	X	AN	1/30
05	352	Description	1	X/Z	AN	1/80
06	127	Reference Identification	1	X/Z	AN	1/80
07	373	Date	1	O/Z	DT	8/8
08	755	Report Type Code	1	O	ID	2/2
09	127	Reference Identification	1	O/Z	AN	1/80
10	352	Description	1	O/Z	AN	1/80
11	373	Date	1	O/Z	DT	8/8
12	127	Reference Identification	1	O/Z	AN	1/80
13	786	Security Level Code	1	O	ID	2/2
14	799	Version Identifier	1	O/Z	AN	1/30

Syntax Notes

04	R040506

Semantic Notes

02	BPP02 is the transaction set date.
05	BPP05 is the program name.
06	BPP06 is the program number identification.
07	BPP07 is the report effective date.
09	BPP09 is the schedule number identification.
10	BPP10 is available for a schedule title or reference.
11	BPP11 is the schedule date or schedule effective date.
12	BPP12 is the priority rating reference number.
14	BPP14 is the schedule version number.

BPR - Beginning Segment for Payment Order/Remittance Advice

To indicate the beginning of a Payment Order/Remittance Advice Transaction Set and total payment amount, or to enable related transfer of funds and/or information from payer to payee to occur

TRANSACTION SETS USED IN
103 521 813 820 823 835

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	305	Transaction Handling Code	1	M	ID	1/2

16	373	Date	1	O/Z	DT	8/8
17	1048	Business Function Code	1	O/Z	ID	1/3
18	506	(DFI) ID Number Qualifier	1	X/Z	ID	2/2
19	507	(DFI) Identification Number	1	X	AN	3/12
20	569	Account Number Qualifier	1	O/Z	ID	1/3
21	508	Account Number	1	X	AN	1/35

Syntax Notes

06	P0607
08	C0809
12	P1213
14	C1415
18	P1819
20	C2021

Semantic Notes

02	BPR02 specifies the payment amount.
06	When using this transaction set to initiate a payment, all or some of BPR06 through BPR16 may be required, depending on the conventions of the specific financial channel being

used.

06 BPR06 and BPR07 relate to the originating depository financial institution (ODFI).

08 BPR08 is a code identifying the type of bank account or other financial asset.

09 BPR09 is the account of the company originating the payment. This account may be debited or credited depending on the type of payment order.

10 BPR10 shall be mutually established between the originating depository financial institution (ODFI) and the company originating the payment.

12 BPR12 and BPR13 relate to the receiving depository financial institution (RDFI).

14 BPR14 is a code identifying the type of bank account or other financial asset.

15 BPR15 is the account number of the receiving company to be debited or credited with the payment order.

16 BPR16 is the date the originating company intends for the transaction to be settled (i.e., Payment Effective Date).

17 BPR17 is a code identifying the business reason for this payment.

18 BPR18, BPR19, BPR20 and BPR21, if used, identify a third bank identification number and account to be used for return items only.

20 BPR20 is a code identifying the type of bank account or other financial asset.

BPT - Beginning Segment for Product Transfer and Resale

To indicate the beginning of the Product Transfer and Resale Report Transaction Set and transmit identifying data

TRANSACTION SETS USED IN
867

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	127	Reference Identification	1	O/Z	AN	1/80
03	373	Date	1	M/Z	DT	8/8
04	755	Report Type Code	1	O	ID	2/2
05	648	Price Multiplier Qualifier	1	X	ID	3/3
06	649	Multiplier	1	X	R	1/10
07	306	Action Code	1	O	ID	1/2
08	337	Time	1	O/Z	TM	4/8
09	127	Reference Identification	1	O/Z	AN	1/80
10	786	Security Level Code	1	O	ID	2/2

Syntax Notes

05 P0506

Semantic Notes

02 BPT02 identifies the transfer/resale number.
03 BPT03 identifies the transfer/resale date.
08 BPT08 identifies the transfer/resale time.
09 BPT09 is used when it is necessary to reference a Previous Report Number.

BQR - Beginning Segment for Response to Request for Quotation

To indicate the beginning of a Response to Request for Quote Transaction Set and transmit identifying numbers and dates

TRANSACTION SETS USED IN
843

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	586	Request for Quote Reference Number	1	M	AN	1/45
03	373	Date	1	M/Z	DT	8/8
04	374	Date/Time Qualifier	1	X	ID	3/3
05	373	Date	1	X	DT	8/8
06	379	Bid Type Response Code	1	O	ID	2/2
07	786	Security Level Code	1	O	ID	2/2
08	327	Change Order Sequence Number	1	O	AN	1/8

Syntax Notes

04 P0405

Semantic Notes

03 BQR03 is the date to be used for reference purposes in an RFQ and a response to RFQ.

BQT - Beginning Segment for Request for Quotation

To indicate the beginning of a Request for Quotation Transaction Set and transmit identifying numbers and dates

TRANSACTION SETS USED IN

840

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	586	Request for Quote Reference Number	1	M	AN	1/45
03	373	Date	1	M/Z	DT	8/8
04	374	Date/Time Qualifier	1	X	ID	3/3
05	373	Date	1	X	DT	8/8
06	92	Purchase Order Type Code	1	O	ID	2/2
07	960	Request for Quote Type Code	1	O	ID	2/2
08	1166	Contract Type Code	1	O	ID	2/2
09	786	Security Level Code	1	O	ID	2/2
10	1232	Purchase Category Code	1	O	ID	2/2
11	327	Change Order Sequence Number	1	O	AN	1/8

Syntax Notes

04 P0405

Semantic Notes

03 BQT03 is the date to be used for reference purposes in an RFQ and a response to RFQ.

BR - Beginning Segment for Material Management

To indicate the beginning of a material management transaction and transmit identifying numbers and dates

TRANSACTION SETS USED IN
511 517 527 536

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	640	Transaction Type Code	1	M	ID	2/2
03	373	Date	1	M/Z	DT	8/8
04	67	Identification Code	1	X	AN	2/80
05	66	Identification Code Qualifier	1	O	ID	1/2
06	306	Action Code	1	O	ID	1/2
07	128	Reference Identification Qualifier	1	X	ID	2/3
08	127	Reference Identification	1	X	AN	1/80
09	337	Time	1	O/Z	TM	4/8
10	128	Reference Identification Qualifier	1	X	ID	2/3
11	127	Reference Identification	1	X	AN	1/80

Syntax Notes

05	C0504
07	P0708
10	P1011

Semantic Notes

03	BR03 is the date of the transaction set preparation.
09	BR09 is the time of the transaction set preparation

BRA - Beginning Segment for Receiving Advice or Acceptance Certificate

To indicate the beginning of a Receiving Advice or Acceptance Certificate Transaction Set and transmit an identifying number, date, and time

TRANSACTION SETS USED IN
861

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M	AN	1/80
02	373	Date	1	M/Z	DT	8/8
03	353	Transaction Set Purpose Code	1	M	ID	2/2
04	962	Receiving Advice or Acceptance Certificate Type Code	1	M	ID	1/1
05	337	Time	1	O/Z	TM	4/8
06	412	Receiving Condition Code	1	O	ID	2/2
07	306	Action Code	1	O	ID	1/2

Semantic Notes

02 BRA02 is the date that the receiving advice transaction set is created.

05 BRA05 is the time that the receiving advice transaction set is created.

BRC - Beginning Segment for Response to Product Transfer Account Adjustment

To identify the beginning of a Response to Product Transfer Account Adjustment Transaction Set

TRANSACTION SETS USED IN

849

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	373	Date	1	M/Z	DT	8/8
03	128	Reference Identification Qualifier	1	X	ID	2/3
04	127	Reference Identification	1	X	AN	1/80
05	337	Time	1	O/Z	TM	4/8

Syntax Notes

03	P0304

Semantic Notes

02	BRC02 is the date of the response to product transfer account adjustment.
05	BRC05 is the time of the response to product transfer account adjustment.

BRR - Beginning Segment for Railroad Mark Register Update Activity

To indicate the nature of the activity being reported and identify the company involved

TRANSACTION SETS USED IN

434

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
03	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
04	67	Identification Code	1	O/Z	AN	2/80
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

02 BRR02 is the Standard Carrier Alpha Code, Road Mark or Unit Initials of the reported entity.

03 BRR03 is the Standard Carrier Alpha Code of the entity that owns the Standard Carrier Alpha Code identified in BRR02.

04 BRR04 is the 3-digit AAR Rule 260 Carrier Identification.

05 BRR05 indicates whether this entity reports equipment releases. A "Y" indicates this entity reports equipment releases; an "N" indicates it does not.

06 BRR06 indicates whether this entity reports equipment placements. A "Y" indicates this entity reports equipment placements; an "N" indicates it does not.

BSC - Beginning Segment for Commission Sales Report and Periodic Compensation

To indicate the beginning of a commission sales report or periodic compensation

TRANSACTION SETS USED IN

256 818

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M/Z	ID	2/2
02	373	Date	1	M/Z	DT	8/8
03	373	Date	1	M/Z	DT	8/8
04	373	Date	1	M/Z	DT	8/8

Semantic Notes

01	For BSC01, the only valid code is "00" (Original).
02	BSC02 is the application transaction creation date.
03	BSC03 is the reporting period start date.
04	BSC04 is the reporting period end date.

BSD - Breakdown Structure Description

To define discrete line items within industry or government reports

TRANSACTION SETS USED IN
196 839

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	M	ID	2/3
02	127	Reference Identification	1	X	AN	1/80
03	352	Description	1	X	AN	1/80
04	1178	Reporting Structure Identifier	1	O	AN	1/3
05	127	Reference Identification	1	O/Z	AN	1/80
06	1196	Breakdown Structure Detail Code	1	O	ID	2/2
07	1178	Reporting Structure Identifier	1	O/Z	AN	1/3
08	786	Security Level Code	1	O	ID	2/2
09	1311	Calculation Operation Code	1	O	ID	1/1

Syntax Notes

02 R0203

Semantic Notes

05 BSD05 is the summary level structure code reference.
07 BSD07 is the summary level reporting structure identification.

BSF - Business Function

To transmit basic data identifying the function performed at a facility

TRANSACTION SETS USED IN

244

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	687	Class of Trade Code	1	X	ID	2/2
02	1270	Code List Qualifier Code	1	X	ID	1/3
03	1271	Industry Code	1	X	AN	1/30

Syntax Notes

01	R0102
01	E0102
02	P0203

BSI - Beginning Segment for Order Status Inquiry

To indicate the beginning of an order status inquiry and provide the type of customer status inquiry

TRANSACTION SETS USED IN

869

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	373	Date	1	M/Z	DT	8/8
03	847	Order/Item Code	1	M	ID	1/2
04	848	Product/Date Code	1	O	ID	1/2
05	849	Location Code	1	O	ID	1/2
06	337	Time	1	O/Z	TM	4/8
07	353	Transaction Set Purpose Code	1	O	ID	2/2
08	640	Transaction Type Code	1	O	ID	2/2
09	306	Action Code	1	O	ID	1/2

Semantic Notes

01 BSI01 is a status inquiry reference number.

02 BSI02 is date of the inquiry.

06 BSI06 is time of the inquiry.

BSN - Beginning Segment for Ship Notice

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN
856

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	396	Shipment Identification	1	M	AN	2/30
03	373	Date	1	M/Z	DT	8/8
04	337	Time	1	M/Z	TM	4/8
05	1005	Hierarchical Structure Code	1	O	ID	4/4
06	640	Transaction Type Code	1	X/Z	ID	2/2
07	641	Status Reason Code	1	O	ID	3/3

Syntax Notes

07 C0706

Semantic Notes

03 BSN03 is the date the shipment transaction set is created.
04 BSN04 is the time the shipment transaction set is created.
06 BSN06 is limited to shipment related codes.

Comments

06 BSN06 and BSN07 differentiate the functionality of use for the transaction set.

BSR - Beginning Segment for Order Status Report

To indicate the beginning of an Order Status Report Transaction Set

TRANSACTION SETS USED IN

870

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	850	Status Report Code	1	M	ID	1/2
02	847	Order/Item Code	1	M	ID	1/2
03	127	Reference Identification	1	M/Z	AN	1/80
04	373	Date	1	M/Z	DT	8/8
05	848	Product/Date Code	1	O	ID	1/2
06	849	Location Code	1	O	ID	1/2
07	337	Time	1	O/Z	TM	4/8
08	127	Reference Identification	1	O/Z	AN	1/80
09	373	Date	1	O/Z	DT	8/8
10	337	Time	1	O/Z	TM	4/8
11	353	Transaction Set Purpose Code	1	O	ID	2/2
12	306	Action Code	1	O	ID	1/2

Semantic Notes

03 BSR03 indicates a status report document number assigned by the sender.

04 BSR04 indicates the date of this report from the sender.

07 BSR07 indicates the time of this report from the sender.

08 BSR08 indicates a status report document number assigned by the inquirer.

09 BSR09 indicates the date this report was requested from the sender by the inquirer.

10 BSR10 indicates the time this report was requested from the sender by the inquirer.

BSS - Beginning Segment for Shipping Schedule/Production Sequence

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN
862 866

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	127	Reference Identification	1	M/Z	AN	1/80
03	373	Date	1	M/Z	DT	8/8
04	675	Schedule Type Qualifier	1	M	ID	2/2
05	373	Date	1	M/Z	DT	8/8
06	373	Date	1	M/Z	DT	8/8
07	328	Release Number	1	X	AN	1/30
08	127	Reference Identification	1	X/Z	AN	1/80
09	367	Contract Number	1	O	AN	1/30
10	324	Purchase Order Number	1	O	AN	1/22
11	676	Schedule Quantity Qualifier	1	O	ID	1/1

Syntax Notes

07 R0708

Semantic Notes

02 Use BSS02 to indicate a document number.
03 Use BSS03 to indicate the date of this document.
05 Use BSS05 to indicate the schedule horizon start date (the date when the schedule begins).
06 Use BSS06 to indicate the schedule horizon end date (the date when the schedule ends).
08 BSS08 is the identifying number for a forecast assigned by the orderer/purchaser.

BSW - Beginning Segment for Carrier's Services Settlement

To transmit basic data relating to the carrier's settlement.

TRANSACTION SETS USED IN

424

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	M/Z	DT	8/8
02	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
03	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
04	193	Net Amount Due	1	M	N2	1/15
05	11	Billing Code	1	M	ID	1/1
06	202	Correction Indicator Code	1	O	ID	2/2
07	613	Statement Number	1	O	AN	1/16

Semantic Notes

01 BSW01 is the settlement date.

02 BSW02 is the issuing carrier.

03 BSW03 is the receiving carrier.

BT1 - Batch Totals

To specify batch totals of monetary data elements, weights, or quantity

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

980

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	143	Transaction Set Identifier Code	1	M	ID	3/3
02	515	Number of Transaction Sets Totaled	1	M	N0	1/7
03	516	Total Qualifier	1	M	ID	1/1
04	517	Data Element Totaled	1	O	AN	4/5
05	518	Total	1	M	R	1/15
06	516	Total Qualifier	1	X	ID	1/1
07	517	Data Element Totaled	1	O	AN	4/5
08	518	Total	1	X	R	1/15
09	516	Total Qualifier	1	X	ID	1/1
10	517	Data Element Totaled	1	O	AN	4/5
11	518	Total	1	X	R	1/15

Syntax Notes

06	P0608
09	P0911

BTA - Beginning Tax Acknowledgment

To acknowledge acceptance or rejection of a transaction set

TRANSACTION SETS USED IN

151

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	587	Acknowledgment Type Code	1	M	ID	2/2
02	373	Date	1	O	DT	8/8
03	522	Amount Qualifier Code	1	X	ID	1/3
04	782	Monetary Amount	1	X	R	1/18

Syntax Notes

03	P0304

Comments

02	BTA02 is the effective date of the acknowledgment

BTC - Beginning Segment for Parameter Trace Registration

To provide basic information regarding the parameter trace conditions described

TRANSACTION SETS USED IN
455

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	1491	Parameter Trace Registration Type Code	1	M	ID	1/1
03	1492	Parameter Trace Type Code	1	M	ID	1/1
04	1493	Output Event Selection Code	1	M	ID	1/1
05	127	Reference Identification	1	M/Z	AN	1/80
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	609	Count	1	O	N0	1/9
10	67	Identification Code	1	O/Z	AN	2/80
11	1011	Association of American Railroads (AAR) Pool Code	1	O	ID	7/7
12	1271	Industry Code	1	O/Z	AN	1/30

Semantic Notes

05 BTC05 is the Trace Identifier.

06 If BTC06 is "Y", then waybill information should be included. If "N", waybill information will not be included.

07 If BTC07 is "Y", then trip information should be included. If "N", then trip information will not be included.

08 If BTC08 is "Y", then all events from current cycle should be included. If "N", the specific number of events will be sent in BTC09.

10 BTC10 identifies the network address of a party to receive responses to this set of parameters if other than sender.

12 BTC12 is the Car Location Message (CLM) Format.

BTI - Beginning Tax Information

To indicate the type of tax information

TRANSACTION SETS USED IN
151 153 813 826

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	M/Z	ID	2/3
02	127	Reference Identification	1	M	AN	1/80
03	66	Identification Code Qualifier	1	M/Z	ID	1/2
04	67	Identification Code	1	M	AN	2/80
05	373	Date	1	O/Z	DT	8/8
06	818	Name Control Identifier	1	O	AN	1/4
07	66	Identification Code Qualifier	1	X/Z	ID	1/2
08	67	Identification Code	1	X	AN	2/80
09	66	Identification Code Qualifier	1	X/Z	ID	1/2
10	67	Identification Code	1	X	AN	2/80
11	66	Identification Code Qualifier	1	X	ID	1/2
12	67	Identification Code	1	X	AN	2/80
13	353	Transaction Set Purpose Code	1	O	ID	2/2
14	640	Transaction Type Code	1	O	ID	2/2

Syntax Notes

07	P0708
09	P0910
11	P1112

Semantic Notes

01	BTI01 and BTI02 define the tax exchange program or tax filing.
03	BTI03 and BTI04 define the tax authority.
05	BTI05 is the transaction set creation date.
07	BTI07 and BTI08 provide the taxpayer's identity.
09	BTI09 and BTI10, and BTI11 and BTI12, define secondary identification numbers for a tax filing or exchange program.

BTP - Beginning Segment For Trading Partner Profile

To indicate the type and purpose of the profile data

TRANSACTION SETS USED IN
838

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M/Z	ID	2/2
02	127	Reference Identification	1	M/Z	AN	1/80
03	373	Date	1	M/Z	DT	8/8
04	337	Time	1	M	TM	4/8
05	640	Transaction Type Code	1	M	ID	2/2
06	353	Transaction Set Purpose Code	1	O/Z	ID	2/2
07	127	Reference Identification	1	X/Z	AN	1/80
08	373	Date	1	X/Z	DT	8/8
09	337	Time	1	O	TM	4/8
10	591	Payment Method Code	1	O	ID	3/3

Syntax Notes

08 C0807
09 C0908

Semantic Notes

01 BTP01 indicates the purpose of this EDI transmission.
02 BTP02 is the identifying number of this transaction.
03 BTP03 and BTP04 are the transaction set date and time.
06 BTP06 indicates the status of the data content within the transaction.
07 BTP07 indicates reference number or previous reference number associated with this transaction.
08 BTP08 and BTP09 are date and time associated with BTP07.

BTR - Beginning Segment for Test Results

To indicate the beginning of a test results transaction set

TRANSACTION SETS USED IN
863

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M/Z	ID	2/2
02	373	Date	1	M/Z	DT	8/8
03	337	Time	1	O/Z	TM	4/8
04	755	Report Type Code	1	O	ID	2/2
05	127	Reference Identification	1	O/Z	AN	1/80
06	127	Reference Identification	1	O	AN	1/80
07	786	Security Level Code	1	O	ID	2/2
08	1005	Hierarchical Structure Code	1	O	ID	4/4

Semantic Notes

01 If BTR01 equals "01", "02", "03", "04", "05", "18" or "19", then BTR06 is required to identify the original test report reference number transmitted.

02 BTR02 is the date that this transaction set was created by the sending party.

03 BTR03 is the time that this transaction set was created by the sending party.

05 BTR05 specifies test results report reference number created by the sending party.

BTS - Beginning Segment for Train Sheets

To transmit identifying symbols, loads, empties, weights, lengths, horsepower, and related data

TRANSACTION SETS USED IN
161

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	41	Interchange Train Identification	1	M/Z	AN	1/10
02	86	Total Equipment	1	X	N0	1/3
03	578	Equipment Status Code	1	X	ID	1/2
04	86	Total Equipment	1	X	N0	1/3
05	578	Equipment Status Code	1	X	ID	1/2
06	81	Weight	1	O/Z	R	1/10
07	82	Length	1	O/Z	R	1/8
08	1272	Horsepower	1	O/Z	N0	1/16
09	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
10	353	Transaction Set Purpose Code	1	O	ID	2/2
11	284	Service Level Code	1	O	ID	2/2
12	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
13	373	Date	1	O/Z	DT	8/8
14	41	Interchange Train Identification	1	O/Z	AN	1/10
15	1470	Number	1	O/Z	N0	1/9
16	373	Date	1	O/Z	DT	8/8

Syntax Notes

02 P0203
04 P0405

Semantic Notes

01 BTS01 is the tenant carrier's train identifier.
06 BTS06 is measured in short tons.
07 BTS07 is measured in feet.
08 BTS08 is the total working horsepower for all engines in the train.
09 BTS09 is the SCAC of the tenant road.
12 BTS12 indicates if this is a key train. A "Y" indicates this is a key train; an "N" indicates this is not a key train.
13 BTS13 is the tenant carrier's scheduled train departure date.
14 BTS14 is the host carrier's train identifier that correlates to the tenant carrier's schedule. In the event the tenant carrier's schedule is for an extra train, this must be the predefined generic schedule covering the trackage territory.
15 BTS15 is the section number of the tenant carrier's train schedule for a specific origin day.
16 BTS16 is the host carrier's scheduled train departure date.

BUY - Loan Buydown

To describe the features of a loan buydown

TRANSACTION SETS USED IN

202 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1084	Loan Buydown Type Code	1	M/Z	ID	1/1
02	1091	Source of Funds Code	1	M/Z	ID	1/1
03	782	Monetary Amount	1	O/Z	R	1/18
04	954	Percentage as Decimal	1	O/Z	R	1/10
05	954	Percentage as Decimal	1	O/Z	R	1/10

Semantic Notes

01 If BUY01 equals "P", then BUY04 and BUY05 are required.

02 BUY02 defines source of funds for buydown.

03 BUY03 defines total amount of buydown.

04 BUY04 is percent of permanent payment decrease.

05 BUY05 is percent of permanent rate decrease.

BVA - Beginning Vehicle Advice

To indicate the beginning of the Vehicle Application Advice Transaction Set

TRANSACTION SETS USED IN
126

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1236	Payment Type Code	1	M	ID	2/2

24	1094	Vehicle Status	1	O	AN	1/2
25	353	Transaction Set Purpose Code	1	O	ID	2/2

Syntax Notes

07 P0708
08 R0809
10 P1011

Semantic Notes

22 BVA22 is the ocean bill of lading number.

BVB - Beginning Segment for Vehicle Baying Order

To indicate the beginning of the Vehicle Baying Order Transaction Set

TRANSACTION SETS USED IN
127

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	66	Identification Code Qualifier	1	M	ID	1/2
03	67	Identification Code	1	M	AN	2/80
04	1238	Bay Type Code	1	O	ID	1/1
05	1239	Capacity Qualifier	1	X	ID	2/2
06	380	Quantity	1	X/Z	R	1/15
07	353	Transaction Set Purpose Code	1	O	ID	2/2

Syntax Notes

05 P0506

Semantic Notes

06 BVB06 is the yard storage capacity.

BVI - Beverage Information

To specify beverage category and type.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1820	Beverage Category	1	M	ID	2/2
02	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
04	1821	Cider Type	1	O	ID	2/2
05	1822	Pre-Mix Drink Code	1	O	ID	2/2

Semantic Notes

02 BVI02 indicates if the beverage is Alcoholic

03 BVI03 indicates if the beverage is Carbonated

BVP - Beginning Segment for Vehicle Shipping Order

To indicate the beginning of the Vehicle Shipping Order Transaction Set

TRANSACTION SETS USED IN
120

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1056	Vehicle Production Status	1	M	AN	1/2
02	66	Identification Code Qualifier	1	M	ID	1/2
03	67	Identification Code	1	M/Z	AN	2/80
04	66	Identification Code Qualifier	1	X	ID	1/2
05	67	Identification Code	1	X/Z	AN	2/80
06	1062	Vehicle Service Code	1	X	ID	2/4
07	140	Standard Carrier Alpha Code	1	O	ID	2/4
08	1094	Vehicle Status	1	O	AN	1/2
09	127	Reference Identification	1	O/Z	AN	1/80
10	373	Date	1	O/Z	DT	8/8
11	353	Transaction Set Purpose Code	1	O	ID	2/2

Syntax Notes

04 P0405
05 R0506

Semantic Notes

03 BVP03 contains the move origin or service location.
05 BVP05 contains the destination of movement.
09 BVP09 is the reference number of the shippers document.
10 BVP10 is the shippers document date.

BVS - Beginning Segment for Vehicle Service

To indicate the beginning of the Vehicle Service Transaction Set

TRANSACTION SETS USED IN

121

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	66	Identification Code Qualifier	1	M	ID	1/2
03	67	Identification Code	1	M/Z	AN	2/80
04	380	Quantity	1	O/Z	R	1/15
05	1062	Vehicle Service Code	1	O	ID	2/4
06	1094	Vehicle Status	1	O	AN	1/2
07	76	Invoice Number	1	O	AN	1/22
08	66	Identification Code Qualifier	1	X	ID	1/2
09	67	Identification Code	1	X/Z	AN	2/80
10	598	Bill of Lading/Waybill Number	1	O	AN	1/50
11	508	Account Number	1	O/Z	AN	1/35
12	127	Reference Identification	1	O/Z	AN	1/80

Syntax Notes

08 P0809

Semantic Notes

03 BVS03 contains the move origin service location.

04 BVS04 is the number of vehicles on invoice.

09 BVS09 is the Dispatch Terminal Code. Required if not equal to the BVS03 Move Origin Code.

11 BVS11 is the account number for charges.

12 BVS12 is the shipper's authorization number.

BW - Beginning Segment for Weight Message Set

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN

440

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	298	Origin EDI Carrier Code	1	M	ID	2/4
02	145	Shipment Identification Number	1	O	AN	1/30
03	188	Weight Unit Code	1	M	ID	1/1

BX - General Shipment Information

To transmit identification numbers and other basic shipment data

TRANSACTION SETS USED IN

404 417 426 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	91	Transportation Method/Type Code	1	M	ID	1/2
03	146	Shipment Method of Payment Code	1	M	ID	2/2
04	145	Shipment Identification Number	1	O	AN	1/30
05	140	Standard Carrier Alpha Code	1	O	ID	2/4
06	188	Weight Unit Code	1	O	ID	1/1
07	147	Shipment Qualifier	1	O	ID	1/1
08	226	Section Seven Code	1	O	ID	1/1
09	195	Capacity Load Code	1	O	ID	1/1
10	160	Status Report Request Code	1	O	ID	1/1
11	501	Customs Documentation Handling Code	1	O	ID	2/2
12	199	Confidential Billing Request Code	1	O	ID	1/1
13	714	Goods and Services Tax Reason Code	1	O	ID	1/1
14	346	Application Type Code	1	O	ID	2/2

C2 - Bank ID

To specify data required for electronic payment

TRANSACTION SETS USED IN

110 210 304 310

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	8	BankClient Code	1	M	ID	1/1
02	66	Identification Code Qualifier	1	M	ID	1/2
03	67	Identification Code	1	M	AN	2/80
04	20	Client BankNumber	1	O	AN	3/9
05	7	BankAccount Number	1	O	AN	6/17
06	107	Payment Method Type Code	1	O	ID	1/2
07	373	Date	1	O	DT	8/8

Comments

07	C207 is the effective payment date.

C3 - Currency Identifier

To specify the currency being used in the transaction set

TRANSACTION SETS USED IN

100 104 110 111 112 124 155 204 210 213 215 267 268 310 312 325 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	100	Currency Code	1	M/Z	ID	3/3
02	280	Exchange Rate	1	O	R	4/10
03	100	Currency Code	1	O/Z	ID	3/3
04	100	Currency Code	1	O/Z	ID	3/3

Semantic Notes

01 C301 is the billing currency.

03 C303 is the payment currency.

04 C304 is the rated currency.

Comments

00 Currency is implied by the code for the country in whose currency the monetary amounts are specified.

C4 - Alternate Amount Due

To specify alternate payment

TRANSACTION SETS USED IN

410

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	100	Currency Code	1	M	ID	3/3
02	193	Net Amount Due	1	M	N2	1/15

C8 - Certifications and Clauses

To specify applicable certifications and clauses

TRANSACTION SETS USED IN

304 310

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	213	Lading Line Item Number	1	O	N0	1/6
02	246	Certification/Clause Code	1	X	ID	2/4
03	247	Certification/Clause Text	1	X	AN	2/60
04	1302	Shipper's Export Declaration Requirements	1	O	AN	1/2

Syntax Notes

03 R0302

C8C - Certifications Clauses Continuation

To specify additional applicable certifications and clauses

TRANSACTION SETS USED IN

304 310

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	247	Certification/Clause Text	1	M	AN	2/60
02	247	Certification/Clause Text	1	O	AN	2/60
03	247	Certification/Clause Text	1	O	AN	2/60

CA1 - Rate Request Identifier

To identify the rate request identification number and any applicable suffix

TRANSACTION SETS USED IN

106 107 108

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1662	Rate Request ID	1	M	N0	1/9
02	1663	Rate Response Suffix	1	O	N0	1/3

CAD - Carrier Details

To specify transportation details for the transaction

TRANSACTION SETS USED IN

810 811 880

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	91	Transportation Method/Type Code	1	M	ID	1/2
02	206	Equipment Initial	1	O	AN	1/4
03	207	Equipment Number	1	O	AN	1/15
04	140	Standard Carrier Alpha Code	1	X	ID	2/4
05	387	Routing	1	X	AN	1/35
06	368	Shipment/Order Status Code	1	O	ID	2/2
07	128	Reference Identification Qualifier	1	O	ID	2/3
08	127	Reference Identification	1	X	AN	1/80
09	284	Service Level Code	1	O	ID	2/2

Syntax Notes

05	R0504
07	C0708

CAI - Civil Action Income

To name the income pursuant to a civil action (judgment, child support, etc.)

TRANSACTION SETS USED IN
833

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1185	Public Record or Obligation Code	1	M/Z	ID	2/2
02	93	Name	1	M/Z	AN	1/60
03	93	Name	1	O	AN	1/60
04	522	Amount Qualifier Code	1	O/Z	ID	1/3
05	782	Monetary Amount	1	O	R	1/18
06	122	Rate/Value Qualifier	1	O/Z	ID	2/2
07	127	Reference Identification	1	O	AN	1/80

Semantic Notes

01 CAI01 defines the nature of the legal obligation income.
02 CAI02 and CAI03 specify the name of the entity obligated to make payments.
04 CAI04 defines the type of legal obligation income stated in CAI05.
06 CAI06 defines the time period for income if recurring.

CAL - Calendar

To identify the calendar and working shift details for the plan or schedule

TRANSACTION SETS USED IN
196 806 816 839

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	M/Z	ID	2/3
02	127	Reference Identification	1	M	AN	1/80
03	344	Unit of Time Period or Interval Code	1	O	ID	2/2
04	374	Date/Time Qualifier	1	O	ID	3/3
05	373	Date	1	O	DT	8/8
06	337	Time	1	O	TM	4/8
07	623	Time Code	1	O	ID	2/2
08	678	Ship/Delivery or Calendar Pattern Code	1	O	ID	1/2
09	374	Date/Time Qualifier	1	O	ID	3/3
10	373	Date	1	O	DT	8/8
11	337	Time	1	O	TM	4/8
12	623	Time Code	1	O	ID	2/2
13	678	Ship/Delivery or Calendar Pattern Code	1	O	ID	1/2
14	673	Quantity Qualifier	1	X	ID	2/2
15	380	Quantity	1	X	R	1/15
16	369	Free-form Description	1	O	AN	1/45

Syntax Notes

14 P1415

Semantic Notes

01 CAL01 identifies whether a reference number is a calendar or shift.

CAS - Claims Adjustment

To supply adjustment reason codes and amounts as needed for an entire claim or for a particular service within the claim being paid

TRANSACTION SETS USED IN
835 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1785	Claim Adjustment Group Code	1	M	AN	1/10
02	1034	Claim Adjustment Reason Code	15	M	ID	1/5
03	782	Monetary Amount	1	M/Z	R	1/18
04	380	Quantity	1	O/Z	R	1/15
05	1034	Claim Adjustment Reason Code	1	X	ID	1/5
06	782	Monetary Amount	1	X/Z	R	1/18
07	380	Quantity	1	X/Z	R	1/15
08	1034	Claim Adjustment Reason Code	1	X	ID	1/5
09	782	Monetary Amount	1	X/Z	R	1/18
10	380	Quantity	1	X/Z	R	1/15
11	1034	Claim Adjustment Reason Code	1	X	ID	1/5
12	782	Monetary Amount	1	X/Z	R	1/18
13	380	Quantity	1	X/Z	R	1/15
14	1034	Claim Adjustment Reason Code	1	X	ID	1/5
15	782	Monetary Amount	1	X/Z	R	1/18
16	380	Quantity	1	X/Z	R	1/15
17	1034	Claim Adjustment Reason Code	1	X	ID	1/5
18	782	Monetary Amount	1	X/Z	R	1/18
19	380	Quantity	1	X/Z	R	1/15

Syntax Notes

05	L050607
06	C0605
07	C0705
08	L080910
09	C0908
10	C1008
11	L111213
12	C1211
13	C1311
14	L141516
15	C1514
16	C1614
17	L171819
18	C1817

19 C1917

Semantic Notes

03 CAS03 is the amount of adjustment.
04 CAS04 is the units of service being adjusted.
06 CAS06 is the amount of the adjustment.
07 CAS07 is the units of service being adjusted.
09 CAS09 is the amount of the adjustment.
10 CAS10 is the units of service being adjusted.
12 CAS12 is the amount of the adjustment.
13 CAS13 is the units of service being adjusted.
15 CAS15 is the amount of the adjustment.
16 CAS16 is the units of service being adjusted.
18 CAS18 is the amount of the adjustment.
19 CAS19 is the units of service being adjusted.

Comments

00 Adjustment information is intended to help the provider balance the remittance information. Adjustment amounts should fully explain the difference between submitted charges and the amount paid.

CAT - Category of Patient Information Service

To specify categories of patient information service

TRANSACTION SETS USED IN
271 275

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	755	Report Type Code	1	O	ID	2/2
02	756	Report Transmission Code	1	X	ID	1/2
03	799	Version Identifier	1	O	AN	1/30
04	1270	Code List Qualifier Code	1	X	ID	1/3
05	1271	Industry Code	1	X/Z	AN	1/30
06	1271	Industry Code	1	O/Z	AN	1/30
07	799	Version Identifier	1	O	AN	1/30

Syntax Notes

03	C0302
04	P0405
06	C0605
07	C0704

Semantic Notes

05	If CAT06 is present, then CAT05 is the beginning of a range of codes.
06	If present, CAT06 is the end of a range of codes.

CB1 - Contract and Cost Accounting Standards Data

To specify contract and cost accounting standards data

TRANSACTION SETS USED IN

805 840 850 860

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1309	Acquisition Data Code	1	M	ID	2/2
02	1310	Financing Type Code	1	O	ID	1/1

CBS - Cost Breakdown Structure

To identify and quantify each line item being proposed

TRANSACTION SETS USED IN

805

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	M/Z	AN	1/20
02	380	Quantity	1	M/Z	R	1/15
03	C001	Composite Unit of Measure	1	M		

Semantic Notes

01 CBS01 is the line item or exhibit (including subline numbers of either).

02 CBS02 is the line item quantity.

CCI - Credit Counseling Information

To define the applicant's participation in credit counseling

TRANSACTION SETS USED IN

200

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	67	Identification Code	1	M/Z	AN	2/80
02	127	Reference Identification	1	M/Z	AN	1/80
03	128	Reference Identification Qualifier	1	X	ID	2/3
04	127	Reference Identification	1	X/Z	AN	1/80
05	1250	Date Time Period Format Qualifier	1	X	ID	2/3
06	1251	Date Time Period	1	X/Z	AN	1/35
07	1251	Date Time Period	1	X/Z	AN	1/35
08	1251	Date Time Period	1	X/Z	AN	1/35
09	782	Monetary Amount	1	O	R	1/18
10	483	Counseling Status Code	1	X	ID	1/1

Syntax Notes

03	P0304
05	L05060708
05	P0510
06	C0605
07	C0705
08	C0805

Semantic Notes

01	CCI01 identifies the credit repository reporting the credit counseling information.
02	CCI02 identifies the credit file identifier or hit level for the particular credit repository.
04	CCI04 identifies the credit counseling identification number.
06	CCI06 identifies the date counseling was reported.
07	CCI07 identifies the date counseling was checked.
08	CCI08 identifies the date counseling was settled.

CD - Shipment Conditions

To specify condition restrictions or provisions applicable to the rate docket

TRANSACTION SETS USED IN

404 410 417 426 433 460 490 494 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	495	Condition Segment Logical Connector	1	M	AN	1/3
02	498	Condition Code	1	X	ID	4/4

30	128	Reference Identification Qualifier	1	M	ID	2/3
31	127	Reference Identification	1	M	AN	1/80

Semantic Notes

08 CD108 is the delivery not before date.
09 CD109 is the terminal cargo location.
25 CD125 is the date of delivery of cargo to final consignee or next mode.

CD2 - Multi-Valued Characteristics

To provide characteristics that may have multiple values

TRANSACTION SETS USED IN
186 255

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1136	Code Category	1	M	ID	2/2
02	235	Product/Service ID Qualifier	1	M/Z	ID	2/2
03	1137	Medical Code Value	1	M	AN	1/15
04	1137	Medical Code Value	1	O	AN	1/15
05	1137	Medical Code Value	1	O	AN	1/15
06	1137	Medical Code Value	1	O	AN	1/15
07	1137	Medical Code Value	1	O	AN	1/15
08	1137	Medical Code Value	1	O	AN	1/15

Semantic Notes

02 CD202 qualifies all subsequent fields.

CD3 - Carton (Package) Detail

To transmit identifying codes, weights, and other related information related to an individual carton (package)

TRANSACTION SETS USED IN
210 215 240

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	187	Weight Qualifier	1	X	ID	1/2
02	81	Weight	1	X	R	1/10
03	619	Zone	1	O	AN	2/3
04	34	Service Standard	1	O	N1	1/4
05	284	Service Level Code	1	X	ID	2/2

10	58	Amount Charged	1	X/Z	N2	1/15
11	284	Service Level Code	1	X	ID	2/2
12	284	Service Level Code	1	O	ID	2/2
13	591	Payment Method Code	1	O	ID	3/3
14	26	Country Code	1	O/Z	ID	2/3

Syntax Notes

01	P0102
07	P0708
09	P0910
11	C1105
12	C1211
14	C1405

Semantic Notes

08	CD308 is the charge for the single package.
10	CD310 is the total charge for all of the packages.
14	CD314 is the country where the service is to be performed.

CDA - Consumer Credit Account

To provide duration, amount and associated information on consumer credit accounts

TRANSACTION SETS USED IN
198 201 833

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	508	Account Number	1	O/Z	AN	1/35
02	782	Monetary Amount	1	O/Z	R	1/18
03	782	Monetary Amount	1	O/Z	R	1/18

07	1189	Type of Credit Account Code	1	O/Z	ID	1/1
08	380	Quantity	1	O/Z	R	1/15
09	380	Quantity	1	O/Z	R	1/15
10	1250	Date Time Period Format Qualifier	1	X/Z	ID	2/3
11	1251	Date Time Period	1	X/Z	AN	1/35
12	1251	Date Time Period	1	X/Z	AN	1/35
13	1251	Date Time Period	1	X/Z	AN	1/35
14	1251	Date Time Period	1	X/Z	AN	1/35
15	1251	Date Time Period	1	X/Z	AN	1/35
16	352	Description	1	O/Z	AN	1/80
17	127	Reference Identification	1	O/Z	AN	1/80
18	1262	Loan Type Code	1	O	ID	1/2
19	594	Frequency Code	1	O	ID	1/1
20	127	Reference Identification	1	O/Z	AN	1/80
21	875	Maintenance Type Code	1	O/Z	ID	3/3
22	546	Status Code	1	O/Z	ID	2/2

Syntax Notes

10	L101112131415
11	C1110
12	C1210
13	C1310
14	C1410
15	C1510
19	C1905

Semantic Notes

01	CDA01 defines the credit account number.
02	CDA02 defines the credit account balance.
03	CDA03 defines the credit account original balance.

04 CDA04 defines the credit account past due amount.
05 CDA05 defines the credit account minimum payment amount.
06 CDA06 defines the credit account ownership type.
07 If CDA07 is "I", then CDA08, CDA09 are required.
07 If CDA07 is "I", then CDA08 is number of months reviewed in the credit account.
07 If CDA07 is "I", then CDA09 is number of months remaining in the credit account.
07 If CDA07 is "H", then CDA03 is the maximum home equity line of credit amount.
07 If CDA07 is "H", then CDA05 is the maximum home equity line of credit payment amount.
07 If CDA07 is "H", then CDA11 is the date of the initial home equity line of credit draw.
08 CDA08 defines the number of months reviewed in the credit account.
09 CDA09 defines the number of months remaining in the credit account.
10 CDA10 defines the date format used in CDA11 through CDA15.
11 CDA11 defines the date the credit account was opened.
12 CDA12 defines the date of the last credit account activity.
13 CDA13 defines the date the credit account was closed.
14 CDA14 defines the date the credit account was high delinquent.
15 CDA15 defines the date the credit account payoff is due.
16 CDA16 is the text description of account security.
17 CDA17 is used to identify an internal control number.
20 CDA20 is used to associate liabilities reported in this segment to a real estate item.
21 CDA21 defines the type of verification action that must take place.
22 CDA22 defines status of the liability or the business transaction.

CDD - Credit/Debit Adjustment Detail

To provide information relative to a line item adjustment

TRANSACTION SETS USED IN
812

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	426	Adjustment Reason Code	1	M	ID	2/2
02	478	Credit/Debit Flag Code	1	M	ID	1/1
03	350	Assigned Identification	1	O	AN	1/20
04	610	Amount	1	X	N2	1/15
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	417	Price Bracket Identifier	1	O	AN	1/3
07	477	Credit/Debit Quantity	1	X	R	1/10
08	355	Unit or Basis for Measurement Code	1	X	ID	2/2
09	427	Unit Price Difference	1	O	R	1/15
10	236	Price Identifier Code	1	X	ID	3/3
11	212	Unit Price	1	X	R	1/17
12	236	Price Identifier Code	1	X	ID	3/3
13	212	Unit Price	1	X	R	1/17
14	933	Free-form Message Text	1	O/Z	AN	1/264

Syntax Notes

04	R0407
07	C0711
07	P0708
10	P1011
12	P1213

Semantic Notes

05	CDD05 is the code indicating whether adjustment is for returned goods. A "Y" confirms that the adjustment is for returned goods.
14	CDD14 is used only to further clarify the adjustment reason code in CDD01.

Comments

12	If comparison pricing is used, then CDD12 and CDD13 are required.

CDI - Change Detail Information

To provide information on changes or adjustments

TRANSACTION SETS USED IN
205 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1552	Option Type Code	1	O	ID	1/2
02	C045	Conditions Indicated	1	O		
03	1549	Convertibility Rate Type Code	1	O	ID	1/2

05	122	Rate/Value Qualifier	1	X	ID	2/2
06	380	Quantity	1	X	R	1/15
07	1470	Number	1	X/Z	N0	1/9
08	1470	Number	1	O/Z	N0	1/9
09	1089	Index Identity Code	1	O	ID	2/2
10	1681	Primary Source of Index Code	1	O	ID	2/2
11	352	Description	1	O/Z	AN	1/80

Syntax Notes

05	P0506
08	C0807

Semantic Notes

07	CDI07 indicates the sequential number of the payment at which a change option can occur or a change option period begins.
08	CDI08 indicates the sequential number of the payment at which a change option period ends.
11	CDI11 provides additional information associated with the changes or adjustments.

CDS - Case Description

To identify and describe a specific court case

TRANSACTION SETS USED IN

105 154 155 175 176 186 200 252 267 521

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

10	66	Identification Code Qualifier	1	X	ID	1/2
11	67	Identification Code	1	X	AN	2/80

Syntax Notes

03	C0304
06	P0607
08	P0809
10	P1011

CED - Administration of Justice Event Description

To describe specific administration of justice events and actions

TRANSACTION SETS USED IN

154 155 175 176 186 252 267

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1012	Administration of Justice Event Type Code	1	M	ID	1/3
02	306	Action Code	1	O	ID	1/2
03	1013	Notice Type Code	1	O	ID	1/3
04	1008	Case Type Code	1	O	ID	1/2
05	352	Description	1	O	AN	1/80

CER - Certification

To provide information of the certification agency identified for the recognition, endorsement or certification of the product.

TRANSACTION SETS USED IN
832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	559	Agency Qualifier Code	1	X	ID	2/2
02	1035	Name Last or Organization Name	1	X	AN	1/80
03	352	Description	1	O/Z	AN	1/80
04	127	Reference Identification	1	O/Z	AN	1/80
05	66	Identification Code Qualifier	1	X	ID	1/2
06	67	Identification Code	1	X	AN	2/80
07	373	Date	1	O/Z	DT	8/8
08	373	Date	1	O/Z	DT	8/8

Syntax Notes

01	R0102
05	P0506

Semantic Notes

03	CER03 is the description of the certification program.
04	CER04 is the certificate number correlating to CER01 or CER02.
07	CER07 is the effective date of the certificate
08	CER08 is the expiration date of the certificate

CF1 - Beginning Segment for Summary Freight Bill Manifest

To transmit identifying numbers, dates, and other basic data related to the transaction set

TRANSACTION SETS USED IN

224

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	474	Master Reference (Link) Number	1	M	AN	1/22
02	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
03	373	Date	1	O/Z	DT	8/8
04	609	Count	1	O/Z	N0	1/9
05	610	Amount	1	O/Z	N2	1/15
06	373	Date	1	O/Z	DT	8/8

Semantic Notes

02 CF102 is the Standard Carrier Alpha Code (SCAC) of the carrier that provided the transportation services.

03 CF103 is the date the summary freight bill manifest was created.

04 CF104 is the number of invoices represented by this summary freight bill manifest.

05 CF105 is the total amount due for all of the freight bills represented by this summary freight bill manifest.

06 CF106 is the date payment is due for all of the freight bills represented by this summary freight bill manifest.

CF2 - Summary Freight Bill Detail

To identify the freight bill number, net amount due, and other basic data related to the freight bill such as date of pickup

TRANSACTION SETS USED IN
224

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	76	Invoice Number	1	M	AN	1/22
02	193	Net Amount Due	1	M	N2	1/15
03	145	Shipment Identification Number	1	O	AN	1/30
04	146	Shipment Method of Payment Code	1	O	ID	2/2

06	373	Date	1	O/Z	DT	8/8
07	187	Weight Qualifier	1	X	ID	1/2
08	188	Weight Unit Code	1	X	ID	1/1
09	81	Weight	1	X	R	1/10
10	640	Transaction Type Code	1	O	ID	2/2

Syntax Notes

07	C0709
08	C0809
09	L090708

Semantic Notes

05	CF205 is the date the shipment was picked up by the carrier.
06	CF206 is the date the shipment was delivered by the carrier.

CFI - Compensation Financial Information

To report compensation and or claim financial information

TRANSACTION SETS USED IN

148

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1136	Code Category	1	M/Z	ID	2/2
02	426	Adjustment Reason Code	1	O/Z	ID	2/2
03	1129	Adjustment Reason Code Characteristic	1	O/Z	ID	1/2

05	594	Frequency Code	1	O/Z	ID	1/1
06	1698	Settlement Type Code	1	O/Z	ID	1/2
07	9	Late Reason Code	1	O/Z	ID	2/2

Semantic Notes

01 CFI01 identifies the financial activity being reported.

02 CFI02 further defines the financial activity or category being reported.

03 CFI03 defines the financial category being reported.

04 CFI04 defines the specific purpose of individual records within the transaction being transmitted.

05 CFI05 identifies the claim financial time period being reported.

06 CFI06 defines the type of lump sum being reported.

07 CFI07 defines the reason a payment is late.

CFT - Cost Reporting Format Type

To identify the cost reporting type, type of units reported, and funds details for the Contract Funds Status Report (CFSR)

TRANSACTION SETS USED IN
839

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	755	Report Type Code	1	M	ID	2/2
02	C001	Composite Unit of Measure	1	O		
03	1198	Contracting Funding Code	1	O	ID	2/2
04	374	Date/Time Qualifier	1	X	ID	3/3
05	373	Date	1	X	DT	8/8
06	374	Date/Time Qualifier	1	X	ID	3/3
07	373	Date	1	X	DT	8/8
08	1199	Appropriation Code	1	O	ID	2/2
09	352	Description	1	O	AN	1/80

Syntax Notes

04	P0405
06	P0607

CGS - Charge

To specify charges

TRANSACTION SETS USED IN

121 215

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	58	Amount Charged	1	X	N2	1/15
02	100	Currency Code	1	O	ID	3/3
03	374	Date/Time Qualifier	1	X	ID	3/3
04	373	Date	1	X	DT	8/8
05	150	Special Charge or Allowance Code	1	X	ID	3/3

Syntax Notes

01	P0105
03	P0304

CHB - Chargeback Information

To define elements associated with a charge to unemployment insurance tax account

TRANSACTION SETS USED IN
153

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	309	Location Qualifier	1	X	ID	1/2
02	310	Location Identifier	1	X	AN	1/30
03	1468	Reason Stopped Work Code	1	O	ID	2/2
04	1017	Claim Type Code	1	O	ID	1/2
05	1029	Claim Status Code	1	O	ID	1/2
06	98	Entity Identifier Code	1	O/Z	ID	2/3
07	478	Credit/Debit Flag Code	1	O	ID	1/1
08	1271	Industry Code	1	O/Z	AN	1/30
09	248	Allowance or Charge Indicator Code	1	O	ID	1/1

Syntax Notes

01 P0102

Semantic Notes

06 CHB06 may be used to identify the type of employer.
08 CHB08 is a code assigned by an employment security agency.

CHI - Cheese Information

To specify a cheese type and related characteristics

TRANSACTION SETS USED IN
832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1842	Cheese Type	1	M	ID	1/3
02	C079	Composite Multiple Language Extended Text Information	1	O/Z		
03	1843	Relative Firmness of Cheese	1	O	ID	2/2
04	1845	Cheese Ripening Process	1	O	ID	2/2
05	1844	Surface of Cheese at End of Ripening	1	O	ID	2/2
06	738	Measurement Qualifier	1	X	ID	1/3
07	739	Measurement Value	1	X	R	1/20
08	355	Unit or Basis for Measurement Code	1	X	ID	2/2
09	235	Product/Service ID Qualifier	1	X/Z	ID	2/2
10	234	Product/Service ID	1	X	AN	1/80

Syntax Notes

06 P060708
06 P060910

Semantic Notes

02 Specify the 'other' cheese type
09 When code 'HB' is used format is 2 alpha characters, dash, 2 alpha character. Example: CA-ON.

Comments

01 If CHI01 equals '89' then CHI02 is the cheese name.

CHR - Car Hire Rates

To identify source and type of car hire rate

TRANSACTION SETS USED IN

414

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1007	Rate Source Code	1	M	ID	1/1
02	221	Billed/Rated-as Qualifier	1	M	ID	2/2
03	649	Multiplier	1	O	R	1/10

CI - Carrier Interchange Agreement

To identify motor carriers and the status of their interchange agreements

TRANSACTION SETS USED IN
361 424

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	93	Name	1	O	AN	1/60
02	140	Standard Carrier Alpha Code	1	O	ID	2/4
03	66	Identification Code Qualifier	1	X	ID	1/2
04	67	Identification Code	1	X	AN	2/80
05	66	Identification Code Qualifier	1	X	ID	1/2
06	67	Identification Code	1	X	AN	2/80
07	772	Interchange Agreement Status Code	1	O	ID	1/1
08	374	Date/Time Qualifier	1	X	ID	3/3
09	373	Date	1	X	DT	8/8
10	374	Date/Time Qualifier	1	X	ID	3/3
11	373	Date	1	X	DT	8/8
12	93	Name	1	O	AN	1/60
13	128	Reference Identification Qualifier	1	X	ID	2/3
14	127	Reference Identification	1	X	AN	1/80

Syntax Notes

03	P0304
05	P0506
08	P0809
10	P1011
13	P1314

CIC - Car Information Control

To transmit identifying equipment mark and type associated with the cycle or transaction

TRANSACTION SETS USED IN
414 432

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	206	Equipment Initial	1	O	AN	1/4
02	207	Equipment Number	1	O	AN	1/15
03	301	Car Type Code	1	X	ID	1/4
04	207	Equipment Number	1	O/Z	AN	1/15
05	1482	Mechanical Car Code	1	X	ID	4/4

Syntax Notes

03 E0305

Semantic Notes

04 CIC04 is the high car number if range is reported.

CID - Characteristic/Class ID

To specify the general class or specific characteristic upon which test results are being reported or are to be taken

TRANSACTION SETS USED IN

112 142 143 244 625 841 842 848 863

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	738	Measurement Qualifier	1	X	ID	1/3
02	750	Product/Process Characteristic Code	1	X	ID	2/3
03	559	Agency Qualifier Code	1	X	ID	2/2
04	751	Product Description Code	1	X	AN	1/12
05	352	Description	1	X	AN	1/80
06	822	Source Subqualifier	1	O	AN	1/15
07	1073	Yes/No Condition or Response Code	1	O	ID	1/1

Syntax Notes

01	R01020405
03	P0304
06	C060304
07	L070405

Comments

06	CID06 specifies the individual code list of the agency specified in CID03.
07	CID07 refers to whether or not the characteristic identified in CID04 or CID05 or both is affected by the product change. If it is affected, the value is "Y". A value of "N" is used when it is known that it will not be affected. Any other value indicates it is indeterminate.

CII - Conveyance Insurance Information

Conveyance Insurance Information

TRANSACTION SETS USED IN
309 355 358 359

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	93	Name	1	M/Z	AN	1/60
02	127	Reference Identification	1	M/Z	AN	1/80
03	1095	Year	1	M/Z	N0	4/4
04	100	Currency Code	1	O/Z	ID	3/3
05	610	Amount	1	M/Z	N2	1/15

Semantic Notes

01 CII01 is the Name of the Insurance Company.
02 CII02 is the Policy Number of the Insurance.
03 CII03 is the Year policy in CII02 was Issued.
04 CII04 is USD (U.S. Dollars) if not stipulated.
05 CII05 is the Amount of the Insurance on policy in CII02.

CIV - Civil Action Liability

To provide law suit, outstanding judgment, tax lien or foreclosure status

TRANSACTION SETS USED IN
833

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1185	Public Record or Obligation Code	1	M/Z	ID	2/2
02	522	Amount Qualifier Code	1	M/Z	ID	1/3
03	782	Monetary Amount	1	M	R	1/18
04	122	Rate/Value Qualifier	1	O/Z	ID	2/2
05	93	Name	1	O/Z	AN	1/60
06	93	Name	1	O	AN	1/60
07	128	Reference Identification Qualifier	1	X/Z	ID	2/3
08	127	Reference Identification	1	X/Z	AN	1/80
09	19	City Name	1	O/Z	AN	2/30
10	1096	County Designator Code	1	O/Z	ID	5/5
11	156	State or Province Code	1	O	ID	2/2
12	1250	Date Time Period Format Qualifier	1	X	ID	2/3
13	1251	Date Time Period	1	X/Z	AN	1/35
14	374	Date/Time Qualifier	1	O/Z	ID	3/3
15	1250	Date Time Period Format Qualifier	1	X	ID	2/3
16	1251	Date Time Period	1	X	AN	1/35
17	352	Description	1	O/Z	AN	1/80
18	127	Reference Identification	1	O	AN	1/80

Syntax Notes

07 P0708
12 P1213
15 P1516

Semantic Notes

01 CIV01 defines the type of legal liability.
02 CIV02 defines legal obligation amount type.
04 CIV04 defines time period if obligation is recurring.
05 CIV05 and CIV06 state name or recipient of legal liability payment.
07 CIV07 defines the type of judgment identifier or docket number.
08 CIV08 is the judgment identifier value or the docket number.
09 CIV09 is the city where the civil action was filed.
10 CIV10 is the county designator listed in Code Source 145.
13 CIV13 defines the date civil action was filed.
14 If CIV14 is "268", CIV16 is the end date of the support obligation.
17 CIV17 is text description of civil action liability.

CL1 - Claim Codes

To supply information specific to hospital claims

TRANSACTION SETS USED IN

278 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1315	Priority (Type) of Admission or Visit	1	O	ID	1/1
02	1314	Point of Origin for Admission or Visit	1	O	ID	1/1
03	1352	Patient Discharge Status	1	O	ID	1/2
04	1345	Nursing Home Residential Status Code	1	O	ID	1/1

CLD - Load Detail

To specify the number of material loads shipped

TRANSACTION SETS USED IN
856

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	622	Number of Loads	1	M	N0	1/5
02	382	Number of Units Shipped	1	M	R	1/10
03	103	Packaging Code	1	O	AN	3/5
04	357	Size	1	X	R	1/8
05	355	Unit or Basis for Measurement Code	1	O/Z	ID	2/2

Syntax Notes

05 C0504

Semantic Notes

05 CLD05 is used to dimension the value given in CLD04.

Comments

00 The CLD data segment may be used to provide information to aid in the preparation of move tags and/or bar coded labels.

CLI - Cost Line Item

To identify the cost line items associated with a specific reporting structure reference (i.e., a work breakdown structure) or summary project level reference

TRANSACTION SETS USED IN
196 650 839

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	98	Entity Identifier Code	1	X	ID	2/3
02	1196	Breakdown Structure Detail Code	1	X	ID	2/2
03	350	Assigned Identification	1	X/Z	AN	1/20
04	369	Free-form Description	1	O	AN	1/45
05	562	Rate or Value Type Code	1	O/Z	ID	1/2
06	1166	Contract Type Code	1	O	ID	2/2

Syntax Notes

01 R010203

Semantic Notes

03 CLI03 is a sequential number or identification assigned by the initiator.

05 CLI05 indicates whether cost line items are lot unit average values or unit average values.

Comments

01 CLI01, CLI02, or CLI03 can be used to describe a cost line item. Typically when CLI03 is used, CLI01 or CLI02 are not used.

CLM - Health Claim

To specify basic data about the claim

TRANSACTION SETS USED IN
837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1028	Claim Submitter's Identifier	1	M	AN	1/38
02	782	Monetary Amount	1	O/Z	R	1/18
03	1032	Claim Filing Indicator Code	1	O	ID	1/2
04	1343	Non-Institutional Claim Type Code	1	O	ID	1/2
05	C023	Health Care Service Location Information	1	O		
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
07	1359	Provider Accept Assignment Code	1	O	ID	1/1
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	1363	Release of Information Code	1	O	ID	1/1
10	1351	Patient Signature Source Code	1	O	ID	1/1
11	C024	Related Causes Information	1	O		
12	1366	Special Program Code	1	O	ID	2/3
13	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
14	1338	Level of Service Code	1	O	ID	1/3
15	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
16	1360	Provider Agreement Code	1	O	ID	1/1
17	1029	Claim Status Code	1	O	ID	1/2
18	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
19	1383	Claim Submission Reason Code	1	O	ID	2/2
20	1514	Delay Reason Code	1	O	ID	1/2
21	1774	Claim Authorization Exception Code	1	O	ID	1/2

Semantic Notes

02 CLM02 is the total amount of all submitted charges of service segments for this claim.

06 CLM06 is provider signature on file indicator. A "Y" value indicates the provider signature is on file; an "N" value indicates the provider signature is not on file.

08 CLM08 is assignment of benefits indicator. A "Y" value indicates insured or authorized person authorizes benefits to be assigned to the provider; an "N" value indicates benefits have not been assigned to the provider.

13 CLM13 is CHAMPUS nonavailability indicator. A "Y" value indicates a statement of non-availability is on file; an "N" value indicates statement of nonavailability is not on file or not necessary.

15 CLM15 is charges itemized by service indicator. A "Y" value indicates charges are itemized by service; an "N" value indicates charges are summarized by service.

18 CLM18 is explanation of benefit (EOB) indicator. A "Y" value indicates that a paper EOB is requested; an "N" value indicates that no paper EOB is requested.

CLP - Claim Level Data

To supply information common to all services of a claim

TRANSACTION SETS USED IN
269 835

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1028	Claim Submitter's Identifier	1	M	AN	1/38
02	1029	Claim Status Code	1	M	ID	1/2
03	782	Monetary Amount	1	M/Z	R	1/18
04	782	Monetary Amount	1	M/Z	R	1/18
05	782	Monetary Amount	1	O/Z	R	1/18
06	1032	Claim Filing Indicator Code	1	O	ID	1/2
07	127	Reference Identification	1	O/Z	AN	1/80
08	1331	Facility Code Value	1	O	AN	1/3
09	1325	Claim Frequency Type Code	1	O	ID	1/1
10	1352	Patient Discharge Status	1	O	ID	1/2
11	C022	Health Care Code Information	1	X/Z		
12	380	Quantity	1	X/Z	R	1/15
13	954	Percentage as Decimal	1	O/Z	R	1/10
14	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
15	280	Exchange Rate	1	O	R	4/10
16	1732	Source of Payment Typology Code	1	O/Z	ID	2/6

Syntax Notes

11 P1112

Semantic Notes

03 CLP03 is the amount of submitted charges this claim.

04 CLP04 is the amount paid this claim.

05 CLP05 is the patient responsibility amount.

07 CLP07 is the payer's internal control number.

11 CLP11 is used to convey diagnostic related group code.

12 CLP12 is the diagnosis-related group (DRG) weight.

13 CLP13 is the discharge fraction.

14 CLP14 is the patient authorization to coordinate benefits. A "Y" indicates that the authorization exists; an "N" indicates that the authorization does not exist.

16 CLP16 is the Source of Payment Typology Code (see Code Source 944).

CLR - Car Location Routing Request

To identify the network address of parties to receive notification

TRANSACTION SETS USED IN

451

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	66	Identification Code Qualifier	1	M	ID	1/2
02	67	Identification Code	1	M	AN	2/80
03	1271	Industry Code	1	O/Z	AN	1/30
04	127	Reference Identification	1	O/Z	AN	1/80

Semantic Notes

03 CLR03 is the Car Location Message (CLM) Format.

04 CLR04 identifies the Fleet Identification Code that has been assigned by the carrier.

CM - Cargo Manifest

To identify specific flight or voyage information for multimodal shipments

TRANSACTION SETS USED IN
353 404 410 417 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	55	Flight/Voyage Number	1	O	AN	2/30
02	115	Port or Terminal Function Code	1	X	ID	1/1
03	114	Port Name	1	O	AN	2/24
04	373	Date	1	O/Z	DT	8/8
05	13	Booking Number	1	O	AN	1/17
06	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
07	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
08	373	Date	1	O/Z	DT	8/8
09	182	Vessel Name	1	O	AN	2/50
10	113	Pier Number	1	O	AN	1/4
11	112	Pier Name	1	O	AN	2/14
12	174	Terminal Name	1	O	AN	2/30
13	156	State or Province Code	1	O	ID	2/2
14	26	Country Code	1	O	ID	2/3
15	127	Reference Identification	1	O/Z	AN	1/80
16	202	Correction Indicator Code	1	O	ID	2/2
17	91	Transportation Method/Type Code	1	O	ID	1/2

Syntax Notes

04 C0402

Semantic Notes

04 CM04 is qualified by CM02.
06 CM06 contains the carrier code.
07 CM07 contains the previous carrier code.
08 CM08 is the manifest date.
15 CM15 is the vessel agent number.

Comments

02 CM02 is "D" for rail origin and "L" for rail destination.

CMA - Cooperative Market Agreement

Identifies the transaction set purpose and specifies the details of the cooperative agreement

TRANSACTION SETS USED IN

290

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	640	Transaction Type Code	1	M	ID	2/2
02	128	Reference Identification Qualifier	1	M	ID	2/3
03	127	Reference Identification	1	M	AN	1/80
04	373	Date	1	M/Z	DT	8/8
05	642	Week	1	M/Z	N0	6/6
06	771	Market Area Code Qualifier	1	X	ID	1/3
07	767	Market Area Code Identifier	1	X	AN	1/13
08	100	Currency Code	1	O	ID	3/3
09	1392	Market Profile	1	O	AN	1/8
10	367	Contract Number	1	O	AN	1/30
11	353	Transaction Set Purpose Code	1	O	ID	2/2

Syntax Notes

06 P0607

Semantic Notes

04 CMA04 is the campaign start date.

05 CMA05 is the campaign week number.

CMC - Commodity Classification

To specify freight commodity code and freight classification

TRANSACTION SETS USED IN
753

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	22	Commodity Code	1	O/Z	AN	1/30
02	59	Freight Class Code	1	O/Z	AN	2/5

Semantic Notes

01 CMC01 is the National Motor Freight Classification Commodity Code.

02 CMC02 is the Freight Class Code published in the National Motor Freight Classification.

CN1 - Contract Information

To specify basic data about the contract or contract line item

TRANSACTION SETS USED IN

132 202 255 837 840 850 860

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1166	Contract Type Code	1	M	ID	2/2
02	782	Monetary Amount	1	O/Z	R	1/18
03	332	Percent, Decimal Format	1	O/Z	R	1/6
04	127	Reference Identification	1	O/Z	AN	1/80
05	338	Terms Discount Percent	1	O	R	1/6
06	799	Version Identifier	1	O/Z	AN	1/30

Semantic Notes

02 CN102 is the contract amount.

03 CN103 is the allowance or charge percent.

04 CN104 is the contract code.

06 CN106 is an additional identifying number for the contract.

CNP - Cannabis Product Information

To specify cannabis product information and related characteristics

TRANSACTION SETS USED IN
832

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	739	Measurement Value	1	M/Z	R	1/20
02	1861	Cannabis Plant Type	1	O	ID	3/3
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
05	1862	Carrier Medium	1	X	ID	3/3
06	C079	Composite Multiple Language Extended Text Information	1	X/Z		
07	1863	Extraction Process	1	X	ID	3/3
08	C079	Composite Multiple Language Extended Text Information	1	X/Z		
09	C071	Composite Multiple Language Text Information	1	O/Z		

Syntax Notes

05	E0506
07	E0708

Semantic Notes

01	Specify cannabis dried equivalent, the quantity that is equivalent to 1g of dried cannabis
03	Specify whether the cannabis plant is hybrid (a result of crossbreeding two other species of cannabis plants).
04	Specify whether multiple species are included in the same product (blend).
06	Specify other carrier medium
08	Specify other extraction process
09	Specify cannabis common name, the traditional strain name given as an identifier used to differentiate between cannabis strains.

COB - Coordination of Benefits

To supply information on coordination of benefits

TRANSACTION SETS USED IN

834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1138	Payer Responsibility Sequence Number Code	1	O	ID	1/1
02	127	Reference Identification	1	O/Z	AN	1/80
03	1143	Coordination of Benefits Code	1	O	ID	1/1
04	1365	Service Type Code	9	O	ID	1/2

Semantic Notes

02 COB02 is the policy number.

COD - Channel of Distribution

Indicates the channel in which the item is distributed for commercial sale.

TRANSACTION SETS USED IN

897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	559	Agency Qualifier Code	1	M	ID	2/2
02	C070	Composite Channel of Distribution	1	M		

COI - Container Information

To specify a container's characteristics of packaging, material color, closure device types etc. Example: Bottle made of blue glass with a cork closure.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	103	Packaging Code	1	O	AN	3/5
02	1830	Container Material Color	1	O	ID	2/3
03	1819	Closure Type	1	O	ID	2/3

COM - Communication Contact Information

To specify a communication contact number

TRANSACTION SETS USED IN

100 101 111 132 133 138 155 189 244 252 267 650 832 892 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	365	Communication Number Qualifier	1	M	ID	2/2
02	364	Communication Number	1	M	AN	1/2048
03	C057	Communication Number Component	9	O		
04	819	Language Code	1	O/Z	ID	2/3
05	350	Assigned Identification	1	O/Z	AN	1/20

Semantic Notes

04 COM04 is used to identify the language being used in COM02 and COM03.

05 COM05 allows the sender to group the communication numbers by the language code specified in COM04 for a single occurrence of the COM segment. When used, COM05 starts with the value of 1 and increments by 1.

Comments

02 When data element 364 communication number is a telephone number COM04 language code indicates the language capability of the party being contacted.

02 When data element 364 communication number is either a link or url, COM04 language code indicates the language of the url or link, or indicates the language capability of the party being contacted.

02 When data element 364 communication number is an email address, COM04 language code indicates the language capability of the party being contacted.

04 The value of the language code in COM04 pertains to all occurrences of data element 364.

04 When multiple languages are applicable to a COM segment, a separate COM is required for each language.

CON - Contract Number Detail

To specify contract or reference number and status

TRANSACTION SETS USED IN

132 268 536 844 845 849

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	M	ID	2/3
02	127	Reference Identification	1	M	AN	1/80
03	846	Contract Status Code	1	M	ID	2/2

CPI - Claimant Payment Information

To specify how the claimant payment will be handled

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1764	Payment Handling Code	1	M	ID	2/2
02	782	Monetary Amount	1	O	R	1/18
03	352	Description	1	O/Z	AN	1/80

Semantic Notes

03 CPI03 is used to convey additional claimant payment handling information.

CPL - Program Information

To provide information about a selected program

TRANSACTION SETS USED IN
890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1193	Program Type Code	1	M	ID	2/2
02	352	Description	1	M/Z	AN	1/80
03	306	Action Code	1	M	ID	1/2
04	1762	Contract Date Basis Code	1	X	ID	1/2
05	98	Entity Identifier Code	1	X/Z	ID	2/3
06	352	Description	1	O/Z	AN	1/80
07	1321	Condition Indicator Code	1	X/Z	ID	2/3
08	1765	Program Basis Type Code	1	X/Z	ID	2/2
09	1321	Condition Indicator Code	1	O/Z	ID	2/3
10	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
11	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
12	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

04	P0405
07	P0708

Semantic Notes

02	CPL02 is a unique program identifier referenced from CPL01.
05	CPL05 identifies the party establishing the Date Basis Code in CPL04
06	CPL06 provides for a text description of the program.
07	CPL07 indicates the contractee distribution type.
08	CPL08 indicates the basis for the distribution type in CPL07.
09	CPL09 refers to a Margin or Markup program.
10	CPL10 indicates if a distributor markup is included in the program. A 'Y' indicates that a markup is included. An 'N' indicates that a markup is not included.
11	CPL11 indicates if product substitution is allowed. A 'Y' indicates that product substitution is allowed. An 'N' indicates that product substitution is not allowed.
12	CPL12 refers to a Growth program and indicates if money is paid back to the first unit. A 'Y' indicates that money is paid back to the first unit. An 'N' indicates that money is not paid back to the first unit.

CPM - Customs Profile Management Information

To transmit Customs Profile Management information

TRANSACTION SETS USED IN
359

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	66	Identification Code Qualifier	1	M	ID	1/2
03	67	Identification Code	1	M	AN	2/80
04	93	Name	1	O	AN	1/60
05	140	Standard Carrier Alpha Code	1	O	ID	2/4
06	127	Reference Identification	1	O/Z	AN	1/80

Semantic Notes

06 CPM06 is the unique identification number of the profile amendment described by the originator of the profile amendment.

CPR - Commodity Price Reference

To provide a specific price on a specified date for a given commodity

TRANSACTION SETS USED IN

843

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1053	Market Exchange Identifier Code	1	M	ID	3/3
02	373	Date	1	M/Z	DT	8/8
03	212	Unit Price	1	M	R	1/17
04	1054	Commodity Identification Code	1	M	ID	2/2
05	1073	Yes/No Condition or Response Code	1	O	ID	1/1

Semantic Notes

02 CPR02 is the date of the commodity market price.

Comments

03 CPR03 is always stated in the unit of measure of the commodity market, e.g., gold and silver are always in troy ounces.

05 CPR05 contains code "Y" if a premium is included in the price and code "N" if a premium is not included in the price.

CQ - Credentials and Qualifications

To provide information on any certificate, license, permit, credential, or qualification

TRANSACTION SETS USED IN

132

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1729	Credential Type Code	1	M	ID	1/2
02	1731	Credential Category Code	1	O	ID	1/2
03	66	Identification Code Qualifier	1	X/Z	ID	1/2
04	67	Identification Code	1	X	AN	2/80
05	1131	Level of Individual, Test, or Course Code	1	O	ID	2/2
06	1147	Basis for Academic Credit or Award of Credential Code	1	O/Z	ID	1/1
07	1730	Credential Requirement Code	7	O/Z	ID	1/1
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	1321	Condition Indicator Code	1	O/Z	ID	2/3
10	156	State or Province Code	1	O/Z	ID	2/2

Syntax Notes

03 P0304

Semantic Notes

03 CQ03 and CQ04 indicate the State-assigned credential identifier.

06 CQ06 indicates the predetermined criteria for granting a credential.

07 The positionality of occurrences of CQ07 is not significant.

08 CQ08 defines whether the credential is renewable. A "Y" indicates that the credential is renewable; an "N" indicates that the credential is not renewable.

09 CQ09 indicates the current condition of the credential.

10 CQ10 is the State or Province from which the credential was issued.

CR1 - Ambulance Certification

To supply information related to the ambulance service rendered to a patient

TRANSACTION SETS USED IN
278 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	355	Unit or Basis for Measurement Code	1	X	ID	2/2
02	81	Weight	1	X/Z	R	1/10
03	1316	Ambulance Transport Code	1	O	ID	1/1
04	1317	Ambulance Transport Reason Code	1	O	ID	1/1
05	355	Unit or Basis for Measurement Code	1	X	ID	2/2
06	380	Quantity	1	X/Z	R	1/15
07	166	Address Information	1	O/Z	AN	1/55
08	166	Address Information	1	O/Z	AN	1/55
09	352	Description	1	O/Z	AN	1/80
10	352	Description	1	O/Z	AN	1/80

Syntax Notes

01 P0102
05 P0506

Semantic Notes

02 CR102 is the weight of the patient at time of transport.
06 CR106 is the distance traveled during transport.
07 CR107 is the address of origin.
08 CR108 is the address of destination.
09 CR109 is the purpose for the round trip ambulance service.
10 CR110 is the purpose for the usage of a stretcher during ambulance service.

CR2 - Chiropractic Certification

To supply information related to the chiropractic service rendered to a patient

TRANSACTION SETS USED IN
278 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	609	Count	1	X/Z	N0	1/9
02	380	Quantity	1	X/Z	R	1/15
03	1367	Subluxation Level Code	1	X	ID	2/3
04	1367	Subluxation Level Code	1	O	ID	2/3
05	355	Unit or Basis for Measurement Code	1	X	ID	2/2
06	380	Quantity	1	X/Z	R	1/15
07	380	Quantity	1	O/Z	R	1/15
08	1342	Nature of Condition Code	1	O	ID	1/1
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
10	352	Description	1	O/Z	AN	1/80
11	352	Description	1	O/Z	AN	1/80
12	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

01 P0102
04 C0403
05 P0506

Semantic Notes

01 CR201 is the number this treatment is in the series.
02 CR202 is the total number of treatments in the series.
06 CR206 is the time period involved in the treatment series.
07 CR207 is the number of treatments rendered in the month of service.
09 CR209 is complication indicator. A "Y" value indicates a complicated condition; an "N" value indicates an uncomplicated condition.
10 CR210 is a description of the patient's condition.
11 CR211 is an additional description of the patient's condition.
12 CR212 is X-rays availability indicator. A "Y" value indicates X-rays are maintained and available for carrier review; an "N" value indicates X-rays are not maintained and available for carrier review.

Comments

03 When both CR203 and CR204 are present, CR203 is the beginning level of subluxation and CR204 is the ending level of subluxation.

CR3 - Durable Medical Equipment Certification

To supply information regarding a physician's certification for durable medical equipment

TRANSACTION SETS USED IN
837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1322	Certification Type Code	1	O	ID	1/1
02	355	Unit or Basis for Measurement Code	1	X/Z	ID	2/2
03	380	Quantity	1	X	R	1/15
04	1335	Insulin Dependent Code	1	O	ID	1/1
05	352	Description	1	O/Z	AN	1/80

Syntax Notes

02 P0203

Semantic Notes

02 CR302 and CR303 specify the time period covered by this certification.

05 CR305 is the prognosis of the patient.

CR4 - Enteral or Parenteral Therapy Certification

To supply information regarding certification of medical necessity for enteral or parenteral nutrition therapy

TRANSACTION SETS USED IN
278 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1

Syntax Notes

03	P0304
05	P0506
08	P0809
10	P1011
12	P1213

Semantic Notes

01 CR401 is enteral or parenteral indicator. A "Y" value indicates enteral; an "N" value indicates parenteral.

04 CR404 is the estimated duration of therapy.

06 CR406 is the time period covered by this certification.

09 CR409 is the age of the patient.

11 CR411 is the height of the patient.

13 CR413 is the weight of the patient.

14 CR414 is the number of times the patient is fed per week for parenteral claims or the number of times the patient is fed per day for enteral claims.

15 CR415 is the product name.

18 CR418 is the total number of calories per day of all nutrients prescribed.

19 CR419 is the total number of calories per day prescribed for this product.

20 CR420 is the amino acid name.

21 CR421 is the number of milliliters of amino acid solution used in the prescription per day.

22 CR422 is the percentage of concentration of amino acid used in the prescription.

23 CR423 is the number of grams of amino acid used per day.

24 CR424 is the number of milliliters of dextrose solution used in the prescription per day.

25 CR425 is the percentage of concentration of dextrose used in the prescription.

26 CR426 is the number of milliliters of lipids used in the prescription.

27 CR427 is the percentage of concentration of lipids used in the prescription.

28 CR428 is the number of times per week lipids are used in the prescription.

29 CR429 is the special circumstances or medical justification.

CR5 - Oxygen Therapy Certification

To supply information regarding certification of medical necessity for home oxygen therapy

TRANSACTION SETS USED IN
278 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1322	Certification Type Code	1	O	ID	1/1
02	380	Quantity	1	O/Z	R	1/15

15	1350	Oxygen Test Findings Code	1	O	ID	1/1
16	380	Quantity	1	O/Z	R	1/15
17	1382	Oxygen Delivery System Code	1	O	ID	1/1
18	1348	Oxygen Equipment Type Code	1	O	ID	1/1

Semantic Notes

02 CR502 is the number of months covered by this certification.
05 CR505 is the reason for equipment.
06 CR506 is the oxygen flow rate in liters per minute.
07 CR507 is the number of times per day the patient must use oxygen.
08 CR508 is the number of hours per period of oxygen use.
09 CR509 is the special orders for the respiratory therapist.
10 CR510 is the arterial blood gas.
11 CR511 is the oxygen saturation.
16 CR516 is the oxygen flow rate for a portable oxygen system in liters per minute.

CR6 - Home Health Care Certification

To supply information related to the certification of a home health care patient

TRANSACTION SETS USED IN
278 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	923	Prognosis Code	1	M	ID	1/1

16	1251	Date Time Period	1	X/Z	AN	1/35
17	1384	Patient Location Code	1	X/Z	ID	1/1
18	373	Date	1	O/Z	DT	8/8
19	373	Date	1	O/Z	DT	8/8
20	373	Date	1	O/Z	DT	8/8
21	373	Date	1	O/Z	DT	8/8

Syntax Notes

03 P0304
09 P091011
15 P151617

Semantic Notes

02 CR602 is the date covered home health services began.
04 CR604 is the certification period covered by this plan of treatment.
05 CR605 is the date of onset or exacerbation of the principal diagnosis.
06 A "Y" value indicates patient is receiving care in a 1861J (skilled nursing) facility. An "N" value indicates patient is not receiving care in a 1861J facility . A "U" value indicates it is unknown whether or not the patient is receiving care in a 1861J facility .
07 CR607 indicates if the patient is covered by Medicare. A "Y" value indicates the patient is covered by Medicare; an "N" value indicates patient is not covered by Medicare.
09 CR609 is the date that the surgery identified in CR611 was performed.

CR610 qualifies CR611.
CR611 is the surgical procedure most relevant to the care being rendered.
CR612 is the date the agency received the verbal orders from the physician for start of care.
CR613 is the date that the patient was last seen by the physician.
CR614 is the date of the home health agency's most recent contact with the physician.
CR616 is the date range of the most recent inpatient stay.
CR617 indicates the type of facility from which the patient was most recently discharged.
CR618 is the date of onset or exacerbation of the first secondary diagnosis.
CR619 is the date of onset or exacerbation of the second secondary diagnosis.
CR620 is the date of onset or exacerbation of the third secondary diagnosis.
CR621 is the date of onset or exacerbation of the fourth secondary diagnosis.

CR7 - Home Health Treatment Plan Certification

To supply information related to the home health care plan of treatment and services

TRANSACTION SETS USED IN

278 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	921	Discipline Type Code	1	M	ID	2/2
02	1470	Number	1	M/Z	N0	1/9
03	1470	Number	1	M/Z	N0	1/9

Semantic Notes

02 CR702 is the total visits on this bill rendered prior to the recertification "to" date.

03 CR703 is the total visits projected during this certification period.

CR8 - Implant Certification

To supply information related to medical implant registries

TRANSACTION SETS USED IN
278 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1403	Implant Type Code	1	M	ID	1/2
02	1404	Implant Status Code	1	M	ID	1/1
03	373	Date	1	O/Z	DT	8/8
04	373	Date	1	O/Z	DT	8/8
05	127	Reference Identification	1	O/Z	AN	1/80
06	127	Reference Identification	1	O/Z	AN	1/80
07	127	Reference Identification	1	O/Z	AN	1/80
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

03 CR803 is the warranty expiration date.

04 CR804 is the implant date.

05 CR805 is the manufacturer identification.

06 CR806 is the model number.

07 CR807 is the serial number.

08 CR808 indicates if leads were left in the patient. A "Y" value indicates leads were left in patient; an "N" value indicates leads were not left in patient.

09 CR809 indicates if the pacemaker was returned to the manufacturer. A "Y" value indicates the pacemaker was returned to the manufacturer; an "N" value indicates the pacemaker was not returned to the manufacturer.

CRC - Conditions Indicator

To supply information on conditions

TRANSACTION SETS USED IN

124 148 155 175 176 180 187 195 201 202 206 262 266 272 274 278 280 288 290 435 810 832 837 886

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1136	Code Category	1	M/Z	ID	2/2
02	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
03	1321	Condition Indicator Code	1	M	ID	2/3
04	1321	Condition Indicator Code	1	O	ID	2/3
05	1321	Condition Indicator Code	1	O	ID	2/3
06	1321	Condition Indicator Code	1	O	ID	2/3
07	1321	Condition Indicator Code	1	O	ID	2/3

Semantic Notes

01 CRC01 qualifies CRC03 through CRC07.

02 CRC02 is a Certification Condition Code applies indicator. A "Y" value indicates the condition codes in CRC03 through CRC07 apply; an "N" value indicates the condition codes in CRC03 through CRC07 do not apply.

CRD - Content Reporting Detail

To supply the detail information necessary to fulfill mandated requirements for the reporting of non-domestic materials and/or components included in domestically produced products

TRANSACTION SETS USED IN
832

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	26	Country Code	1	M	ID	2/3
02	522	Amount Qualifier Code	1	X	ID	1/3
03	782	Monetary Amount	1	X/Z	R	1/18
04	488	Percent, Integer Format	1	X/Z	N0	1/3

Syntax Notes

02	P0203
03	R0304

Semantic Notes

03	CRD03 contains nonoriginating traced amount.
03	CRD03 is qualified by CRD02.
04	CRD04 contains value-added percent based on average "A" factor Mexican local content divided by the total selling price.

Comments

00	Use one CRD segment for each country.
02	If CRD02 equals "V0", then CRD04 is required.

CRI - Claim Report Information

To specify information about the claim being reported

TRANSACTION SETS USED IN

148

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	875	Maintenance Type Code	1	X	ID	3/3
02	1029	Claim Status Code	1	O	ID	1/2
03	1203	Maintenance Reason Code	1	O	ID	2/3
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
05	594	Frequency Code	1	O/Z	ID	1/1
06	1032	Claim Filing Indicator Code	1	M	ID	1/2
07	1250	Date Time Period Format Qualifier	1	X	ID	2/3
08	1251	Date Time Period	1	X/Z	AN	1/35
09	1129	Adjustment Reason Code Characteristic	1	O/Z	ID	1/2
10	9	Late Reason Code	1	O/Z	ID	2/2
11	1321	Condition Indicator Code	1	O/Z	ID	2/3

Syntax Notes

01	P010708
09	C0901
10	C1001

Semantic Notes

04	CRI04 specifies whether there is an agreement to compensate. A "Y" indicates an agreement to compensate with liability; an "N" indicates there is no agreement to compensate.
05	CRI05 specifies the frequency of the scheduled report.
08	CRI08 specifies the effective date of Maintenance Type Code CRI01.
09	CRI09 is the payment adjustment associated with the Maintenance Type Code.
10	CRI10 is the reason the transaction is late.
11	CRI11 indicates Loss Type of workers' compensation claim.

CRO - Credit Report Order Details

To provide attributes of the credit report

TRANSACTION SETS USED IN

200 833

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1250	Date Time Period Format Qualifier	1	M/Z	ID	2/3
02	1251	Date Time Period	1	M/Z	AN	1/35
03	235	Product/Service ID Qualifier	1	M/Z	ID	2/2
04	234	Product/Service ID	1	M/Z	AN	1/80
05	306	Action Code	1	M/Z	ID	1/2
06	612	Credit Report Merge Type Code	1	O	ID	1/1

Semantic Notes

01 CRO01 defines the date and time format in CRO02.
02 CRO02 defines the credit product order date.
03 CRO03 defines CRO04 as a credit product type.
04 CRO04 defines the type of credit product ordered.
05 CRO05 defines the action for this order.

CRS - Course Record

To provide the receiving institution or organization with information about courses taken and the status of those courses

TRANSACTION SETS USED IN
130 132 189

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1147	Basis for Academic Credit or Award of Credential Code	1	M	ID	1/1
02	1141	Academic Credit Type Code	1	O	ID	1/1

19	373	Date	1	O/Z	DT	8/8
20	1152	Override Academic Course Source Code	1	O/Z	ID	2/2

Syntax Notes

06	C0605
10	P1011

Semantic Notes

03	CRS03 is either the value of the course or the credits attempted, while CRS04 is the credits earned by the student for the course.
07	CRS07 indicates if the course is a special honors course. A "Y" indicates that the course is designated as an honors course; an "N" indicates it is not an honors course.
10	CRS10 and CRS11 are the content area of the course.
12	CRS12 is the number of academic quality (or grade) points earned by the student for participation in a course.
14	CRS14 and CRS15 refer to the course alpha prefix and number, respectively. These are the course numbers.

16 CRS16 is the course title.

17 CRS17 and CRS18 are the student's days attended and days absent in the course, respectively.

19 CRS19 is the date the student dropped the course.

20 CRS20 indicated if the course was taken as a transfer course at another institution or under the auspices of another institution covered by reciprocal agreement between the participating institutions.

CRT - Contractor Report Type

To identify the contractor report type, type of units reported, status information, and related reporting details

TRANSACTION SETS USED IN
196 501 892

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	755	Report Type Code	1	M	ID	2/2
02	C001	Composite Unit of Measure	1	O/Z		
03	C001	Composite Unit of Measure	1	O/Z		
04	1196	Breakdown Structure Detail Code	1	O	ID	2/2
05	306	Action Code	1	O	ID	1/2
06	562	Rate or Value Type Code	1	O/Z	ID	1/2
07	1308	Contract Action Code	1	O	ID	2/2
08	1193	Program Type Code	1	O	ID	2/2
09	369	Free-form Description	1	O/Z	AN	1/45
10	786	Security Level Code	1	O	ID	2/2

Semantic Notes

02 CRT02 indicates the unit type used for monetary amounts (e.g., values are in thousands) for the entire report.

03 CRT03 indicates the unit type for quantities (e.g., quantities in thousands) for the entire report.

06 CRT06 indicates whether all report values are unit total values or unit average values.

09 CRT09 is used to describe other unlisted program types.

CS - Contract Summary

To provide information about a contract

TRANSACTION SETS USED IN

503 527 536 561 567 568 842 846 870 873 874 947

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

17	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
18	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

04 P0405

Semantic Notes

09 CS09 is the permissible overage as a percentage of the total contract line item number (CLIN) quantity.

10 CS10 is the permissible shortage as a percentage of the total contract line item number (CLIN) quantity.

11 CS11 is the permissible overage dollar value specified by the contract above which discrepancy action is taken.

14 CS14 is the Unit of Measure stipulated in the contract.

15 CS15 is the contract line item number (CLIN) unit price specified in the contract.

17 CS17 conveys the Critical Application Indicator. A "Y" indicates that a Critical Application Indicator is specified in the contract; an "N" indicates that no Critical Application Indicator is specified in the contract.

18 CS18 conveys the Special Requirements Indicator. A "Y" indicates that a Special Requirements Indicator (requiring special testing and or evaluation) is specified in the contract; an "N" indicates that no Special Requirements Indicator is specified in the contract.

Comments

04 CS04 may be used to identify the Contract Line Item Number (CLIN) or Extended (or Exhibit) Line Item Number (ELIN).

07 CS07 and CS13 can be used to indicate two different types of special services required.

CSB - Cryptographic Service Message Body

To provide a mechanism for carrying a field tag and its associated contents from an ANSI X9.17 cryptographic service message (CSM) in an X12 format

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

815

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

02	989	Cryptographic Service Message (CSM) Field Contents	1	O	AN	1/32

Comments

00	X12.42 provides strict rules for converting from the ANSI X9.17 CSM to and from the X12.42 CSM and CSB segments. The process is a one-to-one mapping in each direction.

CSC - Cryptographic Service Message Certificates and Keys

To provide a mechanism for exchanging certificates of authority, public keys and associated information in an X12 format

TRANSACTION SETS USED IN
815

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1642	Cryptographic Management Purpose Code	1	M	ID	3/3
02	824	Security Originator Name	1	O	AN	1/64
03	825	Security Recipient Name	1	O	AN	1/64
04	C050	Certificate Lookup Information	1	O		
05	C040	Reference Identifier	1	O		
06	1570	Filter ID Code	1	X/Z	ID	3/3
07	799	Version Identifier	1	X	AN	1/30
08	995	Length of Data	1	X	N	1/18
09	C033	Security Token Value	1	X		

Syntax Notes

06 P06070809

Semantic Notes

06 CSC06, CSC07 and CSC08 provide additional information about the encoded security value field in CSC09 (C03302).

Comments

02 X9 has a required minimum length of 4 characters for CSC02 (security originator). No mechanism, or registration method, is provided by X9 or X12 to guarantee uniqueness of the identifier.

03 X9 has a required minimum length of 4 characters for CSC03 (security recipient). No mechanism, or registration method, is provided by X9 or X12 to guarantee uniqueness of the identifier.

CSD - Consolidated Shipment Invoice Data

To specify the data relative to carrier invoices on consolidated shipments

TRANSACTION SETS USED IN
223

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	152	Special Handling Code	1	M	ID	2/3
02	128	Reference Identification Qualifier	1	M	ID	2/3
03	127	Reference Identification	1	M	AN	1/80
04	146	Shipment Method of Payment Code	1	M	ID	2/2
05	373	Date	1	X/Z	DT	8/8
06	373	Date	1	X/Z	DT	8/8
07	58	Amount Charged	1	M/Z	N2	1/15
08	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
09	127	Reference Identification	1	O/Z	AN	1/80
10	337	Time	1	X/Z	TM	4/8
11	623	Time Code	1	X	ID	2/2
12	337	Time	1	X/Z	TM	4/8
13	623	Time Code	1	X	ID	2/2

Syntax Notes

10	C1005
10	P1011
12	C1206
12	P1213

Semantic Notes

05	If CSD01 is code "SI", then CSD05 is the date the carrier picked up the shipment from the shipper.
05	If CSD01 is code "HAN", then CSD05 is the date the shipment delivered to the consolidator.
05	If CSD01 is code "LHS", then CSD05 is the date the carrier picked up the shipment from the consolidator.
06	If CSD01 is code "SI", then CSD06 is the date the carrier delivered the shipment to the consolidator.
06	If CSD01 is code "HAN", then CSD06 is the date the carrier picked up the shipment from the consolidator.
06	If CSD01 is code "LHS", then CSD06 is the date the carrier delivered the shipment to the consignee.
07	CSD07 are the total charges related to the reference number in CSD03.
08	CSD08 is the Standard Carrier Alpha Code (SCAC) of the carrier providing the service referenced in CSD01.
09	CSD09 is a unique control number assigned and controlled by the original shipper to identify a specific shipment.
10	CSD10 is the time for the date identified in CSD05.

12 CSD12 is the time for the date identified in CSD06.

Comments

01 The only valid codes for data element 152 in segment CSD are "SI", "HAN", and "LHS".

CSE - Educational Course Information

To provide information on an educational course

TRANSACTION SETS USED IN
188

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	93	Name	1	X	AN	1/60
02	127	Reference Identification	1	X/Z	AN	1/80
03	1141	Academic Credit Type Code	1	O	ID	1/1
04	380	Quantity	1	O/Z	R	1/15
05	380	Quantity	1	O/Z	R	1/15
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
07	1142	Academic Grade or Course Level Code	1	O	ID	1/2
08	66	Identification Code Qualifier	1	X	ID	1/2
09	67	Identification Code	1	X	AN	2/80
10	790	Entity Title	1	O/Z	AN	1/132
11	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
12	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

01 R0102
08 P0809

Semantic Notes

02 CSE02 identifies the course at the institution offering the course from among similar subject area offerings.

04 CSE04 indicates the minimum measure of credit associated with the course as determined by the institution offering the course.

05 CSE05 indicates the maximum measure of credit associated with the course as determined by the institution offering the course.

06 CSE06 indicates if the course is always an honors course. A "Y" indicates that the course is always an honors course; an "N" indicates that it is not always an honors course.

10 CSE10 is the course title.

11 CSE11 indicates if the course is still active. A "Y" indicates the course is still active; an "N" indicates that the course is not still active.

12 CSE12 indicates if the course may be repeated for additional credit. A "Y" indicates the course may be repeated for additional credit; an "N" indicates the course may not be repeated for additional credit.

CSF - Conditional Sampling Frequency

To represent sampling frequency changes or values that are conditional on measurements made on previous samples, related manufacturing stages, or the environment

TRANSACTION SETS USED IN
841

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C001	Composite Unit of Measure	1	M		
02	1167	Sample Selection Modulus	1	X	R	1/6
03	942	Sample Frequency Value per Unit of Measurement Code	1	X	N0	1/9

Syntax Notes

02 E0203

Comments

01 CSF01 specifies the unit of measure for the values given in CSF02 or CSF03.

CSH - Sales Requirements

To specify general conditions or requirements of the sale

TRANSACTION SETS USED IN

830 840 843 850 855 860 865

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	563	Sales Requirement Code	1	O	ID	1/2
02	306	Action Code	1	O	ID	1/2
03	610	Amount	1	X/Z	N2	1/15
04	508	Account Number	1	O/Z	AN	1/35
05	373	Date	1	O/Z	DT	8/8
06	559	Agency Qualifier Code	1	X/Z	ID	2/2
07	560	Special Services Code	1	X	ID	2/10
08	566	Product/Service Substitution Code	1	O	ID	1/2
09	954	Percentage as Decimal	1	X	R	1/10
10	1004	Percent Qualifier	1	X	ID	1/2

Syntax Notes

02	C0203
06	P0607
09	P0910

Semantic Notes

03	CSH03 is the maximum monetary amount value which the order must not exceed.
04	CSH04 is the account number to which the purchase amount is charged.
05	CSH05 is the date specified by the sender to be shown on the invoice.
06	CSH06 identifies the source of the code value in CSH07.

CSI - Claim Status Information

To indicate the status of a claim for mortgage insurance benefits

TRANSACTION SETS USED IN

260

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1383	Claim Submission Reason Code	1	M/Z	ID	2/2
02	374	Date/Time Qualifier	1	M/Z	ID	3/3
03	1250	Date Time Period Format Qualifier	1	M	ID	2/3
04	1251	Date Time Period	1	M	AN	1/35

Semantic Notes

01 CSI01 contains the code indicating the status of the claim for mortgage insurance benefits.

02 CSI02, CSI03, and CSI04 indicate the submission date associated with the claim status indicated in CSI01.

CSM - Cryptographic Service Message Header

To indicate the beginning of a Cryptographic Service Message (CSM) Transaction Set and to provide both the class or type of the CSM and the cryptographic end parties to the transaction

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN
815

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	987	Cryptographic Service Message (CSM) Message Class Code	1	M	ID	3/4
02	824	Security Originator Name	1	O	AN	1/64
03	825	Security Recipient Name	1	O	AN	1/64

Semantic Notes

00 The three data elements in this segment contain data extracted from the ANSI X9.17 CSM. The correspondence is as follows. CSM01 is the MCL (message class) of the X9.17 CSM. CSM02 is the ORG (originator) of the X9.17 CSM. CSM03 is the RCV (recipient) of the X9.17 CSM.

Comments

00 These data elements are separated to allow for the recording (logging) of CSMs sent or received and to allow routing to the appropriate security device. The use of these ANSI X9.17 field tags and associated data here is not repeated in the use of the same tags and data in the CSB segments of the detail area of the transaction.

00 X12.42 provides strict rules for converting from the ANSI X9.17 CSM to and from the X12.42 CSM and CSB segments. The process is a one-to-one mapping in each direction.

CSS - Conditional Sampling Sequence

To specify a special sample-selection procedure to be followed at the start-up of a process, or following a process upset, such as a brief line power loss or product grade change

TRANSACTION SETS USED IN

841

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1020	Sampling Sequence Qualifier	1	M	ID	2/2
02	C001	Composite Unit of Measure	1	M		
03	1021	Sampling Sequence Value	1	M	N0	1/3
04	1021	Sampling Sequence Value	1	O	N0	1/3
05	1021	Sampling Sequence Value	1	O	N0	1/3
06	1021	Sampling Sequence Value	1	O	N0	1/3
07	1021	Sampling Sequence Value	1	O	N0	1/3

Comments

02	CSS02 specifies the unit of measure for the values given in CSS03 through CSS07.
03	CSS03 through CSS07 specify values that are to be used in sequence; CSS03 would be the first value, CSS04 the second, and so forth, until the values provided are exhausted.

CST - Cost Analysis

To provide detailed cost information

TRANSACTION SETS USED IN

843

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	964	Cost Code	1	M	ID	3/3
02	782	Monetary Amount	1	M	R	1/18
03	C001	Composite Unit of Measure	1	X		
04	380	Quantity	1	X	R	1/15

Syntax Notes

03 P0304

CSU - Supplemental Course Data

To provide supplemental information on a course or a particular instance of a course

TRANSACTION SETS USED IN
130 132 188

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	93	Name	1	O/Z	AN	1/60
02	127	Reference Identification	1	O	AN	1/80
03	1250	Date Time Period Format Qualifier	1	X/Z	ID	2/3
04	1251	Date Time Period	1	X	AN	1/35
05	1250	Date Time Period Format Qualifier	1	X/Z	ID	2/3
06	1251	Date Time Period	1	X	AN	1/35
07	1132	Instructional Setting Code	1	O	ID	1/2
08	1141	Academic Credit Type Code	1	O	ID	1/1
09	380	Quantity	1	X	R	1/15
10	C001	Composite Unit of Measure	1	X		

Syntax Notes

03	P0304
05	P0506
09	P0910

Semantic Notes

01	CSU01 and CSU02 are the alpha prefix and the course number, respectively. Together, CSU01 and CSU02 are commonly referred to as the "course number".
03	CSU03 and CSU04 refer to the date the course began.
05	CSU05 and CSU06 refer to the date the course ended.

CT - Car Type

Used to limit the application of restrictions to a subset of standard Association of American Railroads Car Type Codes

TRANSACTION SETS USED IN
453

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	301	Car Type Code	1	M	ID	1/4
03	301	Car Type Code	1	O/Z	ID	1/4

Semantic Notes

01 CT01 indicates if restriction is included. A "Y" indicates restriction is included; an "N" indicates restriction is excluded.

03 CT03 indicates the high end of a range.

CTB - Restrictions/Conditions

To specify restrictions/conditions (such as shipping, ordering)

TRANSACTION SETS USED IN

832 836 840 843 845 850 855 860 865 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	688	Restrictions/Conditions Qualifier	1	M	ID	2/2
02	352	Description	1	X	AN	1/80
03	673	Quantity Qualifier	1	X	ID	2/2
04	380	Quantity	1	X	R	1/15
05	522	Amount Qualifier Code	1	X	ID	1/3
06	610	Amount	1	X	N2	1/15
07	C001	Composite Unit of Measure	1	O		

Syntax Notes

02	R020406
03	P0304
05	P0506
07	C0704

CTC - Car Hire Transaction Control

To transmit identifying parties and document types

TRANSACTION SETS USED IN
414

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	140	Standard Carrier Alpha Code	1	M	ID	2/4
03	1002	Car Hire Detail/Summary Code	1	M	ID	1/1
04	1003	Account Type Code	1	M	ID	2/2
05	353	Transaction Set Purpose Code	1	M	ID	2/2
06	1095	Year	1	M	N0	4/4
07	1108	Month of the Year Code	1	M	ID	2/2
08	1095	Year	1	X	N0	4/4
09	1108	Month of the Year Code	1	X	ID	2/2
10	1006	Account Description Code	1	O	ID	1/2

Syntax Notes

08 P0809

Comments

01 CTC01 contains the equipment user code.
02 CTC02 contains the equipment owner code.
06 CTC06 and CTC07 contain the allowed date.
08 CTC08 and CTC09 contain the earned date.

CTH - Beginning Segment for Contract Transaction Set

To indicate the beginning of the Contract and Rebate Management Transaction Set and transmit identifying contract information

TRANSACTION SETS USED IN
890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	367	Contract Number	1	M	AN	1/30
03	1308	Contract Action Code	1	M	ID	2/2
04	128	Reference Identification Qualifier	1	X	ID	2/3
05	127	Reference Identification	1	X	AN	1/80
06	373	Date	1	O/Z	DT	8/8
07	337	Time	1	O/Z	TM	4/8
08	1771	Contract Level Code	1	O	ID	2/2
09	1762	Contract Date Basis Code	1	X	ID	1/2
10	98	Entity Identifier Code	1	X	ID	2/3
11	352	Description	1	O/Z	AN	1/80

Syntax Notes

04	P0405
09	P0910

Semantic Notes

06	CTH06 is the date the transaction set was created in the business application system.
07	CTH07 is the time the transaction was created within the business application system.
11	CTH11 allows for additional description about this contract.

CTI - Cannabinoid Type Information

To specify cannabinoid type and amount

TRANSACTION SETS USED IN

832

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1864	Cannabinoid Type	1	X	ID	3/3
02	C079	Composite Multiple Language Extended Text Information	1	X/Z		
03	C081	Composite Multi-UOM Range Minimum and Maximum	5	O/Z		

Syntax Notes

01 R0102

Semantic Notes

02 Specify other cannabinoid type

03 Specify the minimum and maximum range amounts of cannabinoid in the product and per unit or unit of use.

Comments

00 Use multiple occurrences of this segment as needed to describe cannabinoid types and amounts in a product.

CTP - Pricing Information

To specify pricing information

TRANSACTION SETS USED IN

124 206 271 304 536 810 821 822 830 832 836 837 840 843 845 846 847 850 851 852 855 857 860 865 878 886 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	687	Class of Trade Code	1	O	ID	2/2
02	236	Price Identifier Code	1	X	ID	3/3
03	212	Unit Price	1	X	R	1/17
04	380	Quantity	1	X	R	1/15
05	C001	Composite Unit of Measure	1	X		
06	648	Price Multiplier Qualifier	1	O	ID	3/3
07	649	Multiplier	1	X/Z	R	1/10
08	782	Monetary Amount	1	O/Z	R	1/18
09	639	Basis of Unit Price Code	1	O	ID	2/2
10	499	Condition Value	1	O	AN	1/10
11	289	Multiple Price Quantity	1	O	N0	1/2
12	C077	Composite Currency	1	O		

Syntax Notes

03	E0312
04	P0405
06	C0607
09	C0902
10	C1002
11	C1103
12	C1202

Semantic Notes

07	CTP07 is a multiplier factor to arrive at a final discounted price. A multiplier of .90 would be the factor if a 10% discount is given.
08	CTP08 is the rebate amount.

Comments

03	See Figures Appendix for an example detailing the use of CTP03 and CTP04.
03	See Figures Appendix for an example detailing the use of CTP03, CTP04 and CTP07.

CTT - Transaction Totals

To transmit a hash total for a specific element in the transaction set

TRANSACTION SETS USED IN

202 205 500 561 568 810 811 819 828 830 832 840 843 844 845 846 847 849 850 851 852 853 855 856 860 861 862 865 866 867 869 870 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	354	Number of Line Items	1	M	N0	1/6
02	347	Hash Total	1	O	R	1/10
03	81	Weight	1	X	R	1/10
04	355	Unit or Basis for Measurement Code	1	X	ID	2/2
05	183	Volume	1	X	R	1/8
06	355	Unit or Basis for Measurement Code	1	X	ID	2/2
07	352	Description	1	O	AN	1/80

Syntax Notes

03	P0304
05	P0506

Comments

00	This segment is intended to provide hash totals to validate transaction completeness and correctness.

CTX - Context

Describes an event context in terms of the application or implementation contexts in force at the time the event occurred and the position in the EDI stream at which that context was activated

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

824 999

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C998	Context Identification	10	M		
02	721	Segment ID Code	1	O	ID	2/3
03	719	Segment Position in Transaction Set	1	O	N0	1/10
04	447	Loop Identifier Code	1	O	AN	1/6
05	C030	Position in Segment	1	O		
06	C999	Reference in Segment	1	O		
07	1837	Copy of Data Element	1	O	AN	1/4096

CUR - Currency

To specify the currency (dollars, pounds, francs, etc.) used in a transaction

TRANSACTION SETS USED IN

103 105 106 107 140 141 142 143 148 159 186 187 219 251 255 256 262 273 286 304 362 412 414 424 426 433 521 805 810 811 812 814 818 819 820 821 822 823 827 830 832 835 837 838 840 843 844 845 846 847 849 850 851 852 855 856 857 860 861 865 867 870 890 920

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

13	782	Monetary Amount	1	O/Z	R	1/18
14	1016	Penalty Code	1	O	ID	1/1

Syntax Notes

05	C0504

Semantic Notes

05	CV05 is the time units qualified by CV04.
07	CV07 is the loaded mile units.
08	CV08 is the empty mile units.
09	CV09 is the total value.
10	CV10 is the time value.
11	CV11 is the mile value.
12	CV12 is the appurtenance value.
13	CV13 is the penalty value.

CYC - Car Hire Cycle

To identify the car hire beginning and ending cycle location and associated information

TRANSACTION SETS USED IN

414

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1095	Year	1	M	N0	4/4

12	26	Country Code	1	O/Z	ID	2/3

Syntax Notes

06 P0607

Semantic Notes

02 D902 is the destination station of movement.
04 D904 is the country code for the city named in the D902.
05 D905 is the freight station accounting code of the destination junction settlement carrier.
08 D908 is the Standard Point Location Code (SPLC) for the city named in the D902.
09 D909 is the postal code for the city names in the D902.
10 D910 is the Standard Point Location Code (SPLC) for the city named in the D906.
11 D911 is the postal code for the city named in the D906.
12 D912 is the country code for the city named in the D906.

Comments

05 D905 is the freight station accounting code of the city name in D906.

DAD - Debit Authorization Detail

To provide detail information about the debit authorization

TRANSACTION SETS USED IN
154 828

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	306	Action Code	1	M	ID	1/2

13	508	Account Number	1	O	AN	1/35
14	1470	Number	1	O/Z	N0	1/9
15	594	Frequency Code	1	O	ID	1/1

Syntax Notes

07 P0708
10 C1009
11 P1112

Semantic Notes

03 DAD03 identifies the date on or after which a debit can be posted to the account identified in the BAU segment.
04 DAD04 identifies the last date that the debit can be applied, if used.
09 If DAD09 and DAD10 are present, they represent the beginning and end of a range of numbers. If only DAD09 is used, it represents a single reference (i.e., not the beginning of a range). DAD09 and DAD10, if used must contain values that are known to the originator of the debit authorization. For check issuance, DAD09 and DAD10 contain the range of check numbers. In the case of ACH debits, the value shall coincide with the content of the Individual ID of the NACHA Detail (Type 6) record.
14 DAD14 is the count of days.

Comments

00 Every DAD shall be unique.
01 When DAD01 contains a "3" (for deletion), this DAD must have the same information as the DAD being deleted.
04 DAD04 must contain a value that is later than or equal to the value of DAD03, if used.

05 This element is only applicable in an ACH environment. If used, DAD05 shall contain a value that is known to the originator of the debit authorization and will be carried in the ACH debit transaction. This value should coincide with the content of the company ID of the NACHA Batch Header (Type 5) record.

11 DAD11 through DAD13 provide information regarding the party initiating the debit, if used. (This is unlike the BAU03 through BAU05 which applies to the party affected by the debit.)

14 DAD14 should be used only if this is a recurring debit (DAD07 equals "R").

15 DAD15 should be used only if this is a recurring debit (DAD07 equals "R").

DAI - Appendix Information

To provide appendix information for the electronic form of the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	487	Maintenance Operation Code	1	M	ID	1/1
02	916	Code List Reference	1	M	AN	1/6
03	490	Note Identification Number	1	O	N0	1/6

Comments

03 DAI03 is the note ID number of the E40 segment that contains the appendix information.

DAM - Damage Information

To identify the part of the vehicle that was damaged

TRANSACTION SETS USED IN
124 272

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1422	Damage Status Code	1	X	ID	2/2

Syntax Notes

01	R0102
07	L070506
10	L100809
13	L131112
16	L161415

Semantic Notes

03	DAM03 is the repair cost of the damaged area.
04	DAM04 is the currency that applies to the repair cost in DAM03, DAM07, DAM10, DAM13, and DAM16.
07	DAM07 is the repair cost of the damaged area.
10	DAM10 is the repair cost of the damaged area.
13	DAM13 is the repair cost of the damaged area.
16	DAM16 is the repair cost of the damaged area.

DAY - Dairy and Non-Dairy Alternative Information

To specify dairy and non-dairy alternative product types and characteristics

TRANSACTION SETS USED IN
832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1838	Dairy and non-Dairy Alternative Category	1	M	ID	3/3
02	1839	Dairy Source - Animal Type	1	X	ID	3/3
03	C079	Composite Multiple Language Extended Text Information	1	X/Z		
04	1840	Non-Dairy Plant-Based Type	1	X	ID	3/3
05	C079	Composite Multiple Language Extended Text Information	1	X/Z		
06	1841	Preservation Technique	1	O	ID	3/3
07	C079	Composite Multiple Language Extended Text Information	1	O/Z		
08	738	Measurement Qualifier	1	X	ID	1/3
09	739	Measurement Value	1	X	R	1/20
10	355	Unit or Basis for Measurement Code	1	X	ID	2/2

Syntax Notes

02	E0204
03	C0302
05	C0504
08	P080910

Semantic Notes

03	Specify other animal-based milk
05	Specify other plant-based milk
07	Specify the declaration of probiotic health claims and the composition of probiotic microorganisms

Comments

01	If DAY01 is a dairy category, then DAY02 is required
01	If DAY01 is a non-dairy category, then DAY04 is required
02	If DAY02 equals 'UUU' then DAY03 is the name of the animal milk source.
04	If DAY04 equals 'UUU' then DAY05 is the name of the plant-based milk source.

DB - Disbursement Information

To specify disbursement dates and amounts for a loan

TRANSACTION SETS USED IN
139 144 191

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1250	Date Time Period Format Qualifier	1	M	ID	2/3
02	1251	Date Time Period	1	M/Z	AN	1/35
03	782	Monetary Amount	1	M/Z	R	1/18
04	782	Monetary Amount	1	O/Z	R	1/18
05	782	Monetary Amount	1	O/Z	R	1/18
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

02 DB02 is the disbursement date.

03 DB03 is the net disbursement amount.

04 DB04 is the lender origination fee.

05 DB05 is the guarantor insurance premium.

06 DB06 indicates if the disbursement date corresponds with school term dates. A "Y" indicates that it does correspond; an "N" indicates that it does not.

DD - Demand Detail

To describe the type of demand and the intended use of material

TRANSACTION SETS USED IN

180 511 517 527 536 830 846 867 869

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1271	Industry Code	1	X	AN	1/30
02	1270	Code List Qualifier Code	1	O	ID	1/3
03	128	Reference Identification Qualifier	1	X	ID	2/3
04	127	Reference Identification	1	X	AN	1/80
05	1271	Industry Code	1	X	AN	1/30
06	1270	Code List Qualifier Code	1	O	ID	1/3
07	380	Quantity	1	O	R	1/15
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	1271	Industry Code	1	X	AN	1/30
10	1270	Code List Qualifier Code	1	O	ID	1/3

Syntax Notes

02	C0201
03	P030405
06	C0605
10	C1009

Semantic Notes

08	DD08 transmits the stock level indicator. A "Y" indicates that the material is normally carried in stock; an "N" indicates that the material is not normally stocked.

DDI - Explanation

To provide description information related to the electronic form of the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	352	Description	1	M	AN	1/80

DED - Deductions

To specify payment related information for child support payment deductions

TRANSACTION SETS USED IN

820 823

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1511	Type of Deduction Code	1	M/Z	ID	2/2
02	127	Reference Identification	1	M/Z	AN	1/80
03	373	Date	1	M/Z	DT	8/8
04	610	Amount	1	M/Z	N2	1/15
05	127	Reference Identification	1	M/Z	AN	1/80
06	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
07	93	Name	1	O/Z	AN	1/60
08	127	Reference Identification	1	O/Z	AN	1/80
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

01 DED01 is the type of deduction.

02 DED02 is the code indicating the case identifier.

03 DED03 is the pay date.

04 DED04 is the payment amount.

05 DED05 is the social security number of the absent parent.

06 DED06 indicates if the obligor has family medical insurance coverage available through their employer. A "Y" indicates medical coverage is available. An "N" indicates there is no coverage. A "W" indicates that the disposition of medical insurance is not applicable to the deduction.

07 DED07 is the name of the absent parent. The absent parent's name contains the first seven letters of the obligor's last name followed by the first three letters of the obligor's first name. A comma must be used to separate the last name from the first name of the absent parent when the last name is less than seven characters.

08 DED08 contains the Federal Information Process Standard (FIPS) Code. The FIPS code is 5 characters when indicating both the state and county codes. It is seven characters when indicating state, county and local codes.

09 DED09 identifies to the child support enforcement agency that an individual's employment has terminated. A "Y" is used if the employee has been terminated otherwise the field is not used. DED04 may contain zero if this field is used.

DEF - Delayed Repayment

To provide information related to student loan delayed repayment

TRANSACTION SETS USED IN

135 191

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	998	Delayed Repayment Qualifier Code	1	M	ID	1/1
02	1264	Delayed Repayment Reason Code	1	M/Z	ID	1/2
03	1250	Date Time Period Format Qualifier	1	M/Z	ID	2/3
04	1251	Date Time Period	1	M	AN	1/35
05	1265	Interest Payment Code	1	O	ID	1/2
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

02 DEF02 is qualified by DEF01.

03 DEF03 is the deferment period date range.

06 DEF06 indicates whether a deferment has been requested. A "Y" indicates a request for immediate deferment; an "N" indicates that a deferment is not requested; a "W" indicates a deferment is not applicable.

DEG - Degree Record

To provide information about an educational institution's academic award

TRANSACTION SETS USED IN

130 132 133 138 189 190 194 274

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1126	Academic Degree Code	1	M	ID	3/3
02	1250	Date Time Period Format Qualifier	1	X/Z	ID	2/3
03	1251	Date Time Period	1	X	AN	1/35
04	352	Description	1	O	AN	1/80
05	641	Status Reason Code	1	O/Z	ID	3/3

Syntax Notes

02	P0203

Semantic Notes

02	DEG02 and DEG03 refer to the date the degree was awarded.
05	DEG05 indicates the type of honors received with the degree.

DEL - Delivery Logistics

To define delivery logistics

TRANSACTION SETS USED IN

121

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M	R	1/15
02	66	Identification Code Qualifier	1	M	ID	1/2
03	67	Identification Code	1	M	AN	2/80
04	76	Invoice Number	1	O	AN	1/22
05	1237	Move Type Code	1	O	ID	1/1

DEP - Deposit

To indicate the lockbox ID, date, time, deposit number, and bank account information

TRANSACTION SETS USED IN
823

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	373	Date	1	M	DT	8/8
03	337	Time	1	O	TM	4/8
04	127	Reference Identification	1	O/Z	AN	1/80
05	506	(DFI) ID Number Qualifier	1	M	ID	2/2
06	507	(DFI) Identification Number	1	M	AN	3/12
07	569	Account Number Qualifier	1	X/Z	ID	1/3
08	508	Account Number	1	X	AN	1/35

Syntax Notes

07 P0708

Semantic Notes

01 DEP01 is the lockbox number.
04 DEP04 is the deposit number.
07 DEP07 is a code indicating the type of bank account or other financial asset.

DET - Diet Information

To specify dietary information associated with a product.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1798	Diet Type Code	1	X	ID	2/2
02	352	Description	1	X/Z	AN	1/80
03	1321	Condition Indicator Code	1	O/Z	ID	2/3
04	1035	Name Last or Organization Name	1	X/Z	AN	1/80
05	127	Reference Identification	1	X/Z	AN	1/80
06	373	Date	1	O/Z	DT	8/8
07	373	Date	1	O/Z	DT	8/8

Syntax Notes

01	R0102
05	C0504

Semantic Notes

02	DET02 is the description of the diet type.
03	DET03 specifies the degree to which a product is organic. Valid codes are: ORG; ORH; ORI; ORP
04	DET04 identifies the organization defining the diet type value in DET01.
05	DET05 is the license or certificate number assigned to the authorized agency identified in DET04.
06	DET06 is the effective date of the diet type certificate.
07	DET07 is the expiration date of the diet type certificate.

DEX - Delivery Execution Information

To provide loan delivery and contract information

TRANSACTION SETS USED IN

202

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	139	Sales Terms Code	1	O	ID	2/2
02	1408	Remittance Type Code	1	O	ID	2/2
03	1407	Investor Ownership Type Code	1	O	ID	1/2
04	1470	Number	1	O/Z	N0	1/9
05	1270	Code List Qualifier Code	1	X	ID	1/3
06	1271	Industry Code	1	X	AN	1/30

Syntax Notes

05 P0506

Semantic Notes

04 DEX04 is the investor's remittance day of the month.

DFI - Default Information

To specify mortgage loan default information

TRANSACTION SETS USED IN
206 259 260 264

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	641	Status Reason Code	1	O/Z	ID	3/3
02	1032	Claim Filing Indicator Code	1	O/Z	ID	1/2
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

01 DFI01 indicates code specifying the reason for default status.

02 DFI02 indicates code specifying type of claim.

03 DFI03 indicates if default resulted in a direct conveyance. A "Y" indicates that it resulted in a direct conveyance; an "N" indicates that it did not.

04 DFI04 indicates if this is the first payment in default. A "Y" indicates this is the first payment in default; an "N" indicates it is not.

DH - Dealer Hours

To provide a carrier with information about the business hours during which deliveries will be received by the dealer

TRANSACTION SETS USED IN

128

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	678	Ship/Delivery or Calendar Pattern Code	1	M	ID	1/2
02	337	Time	1	M/Z	TM	4/8
03	337	Time	1	M/Z	TM	4/8

Semantic Notes

02 DH02 is the start of the dealer's business hours.

03 DH03 is the end of dealer's business hours.

DIS - Discount Detail

To specify the exact type and terms of various discount information

TRANSACTION SETS USED IN

840 843 850 855 860 865

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	653	Discount Terms Type Code	1	M	ID	3/3
02	654	Discount Base Qualifier	1	M	ID	2/2
03	655	Discount Base Value	1	M	R	1/10
04	656	Discount Control Limit Qualifier	1	M	ID	2/3
05	657	Discount Control Limit	1	M/Z	N0	1/10
06	657	Discount Control Limit	1	O/Z	N0	1/10

Semantic Notes

05 DIS05 is the minimum for application of the discount.

06 DIS06 is the maximum for application of the discount.

DK - Docket Header

To assign an identification to a docket

TRANSACTION SETS USED IN
460 463 466 468 485 490 492 494

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	697	Docket Control Number	1	M	AN	1/7
03	690	Docket Identification	1	M	AN	1/11
04	691	Revision Number	1	M	N0	1/4
05	692	Conveyance Code	1	O	ID	1/1
06	693	Docket Type Code	1	O	ID	1/1
07	373	Date	1	O/Z	DT	8/8
08	373	Date	1	O/Z	DT	8/8
09	346	Application Type Code	1	O	ID	2/2
10	260	Group Title	1	O	AN	2/30

Semantic Notes

01 DK01 is the proposing carrier Standard Carrier Alpha Code (SCAC).
07 DK07 is the date the docket becomes effective.
08 DK08 is the date the docket expires.

DL - Auto Claim Detail - Labor

To describe the labor involved in the repair of vehicle damage and to specify actions taken related to the labor

TRANSACTION SETS USED IN

124

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	306	Action Code	1	M	ID	1/2
02	542	Labor Hours	1	O/Z	N1	1/4
03	542	Labor Hours	1	O/Z	N1	1/4
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
05	610	Amount	1	O/Z	N2	1/15
06	1470	Number	1	O/Z	N0	1/9
07	1470	Number	1	O/Z	N0	1/9
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
10	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
11	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

02 DL02 is the actual labor hours.

03 DL03 is the estimating database hours.

04 DL04 is the labor included indicator. A value of "Y" indicates that the labor is included elsewhere. A value of "N" indicates that the labor is not included elsewhere. A value of "U" indicating "unknown" cannot be used.

05 DL05 is the dollar amount of the labor.

06 DL06 is the number of paint stages.

07 DL07 is the number of paint tones.

08 DL08 is the hours judgment indicator. A value of "Y" indicates that labor hours judgment has been used. A value of "N" indicates that no labor hours judgment has been used. A value of "U" indicating "unknown" cannot be used.

09 DL09 is the labor operation judgment indicator. A value of "Y" indicates that labor operation judgment has been used. A value of "N" indicates that no labor operation judgment has been used. A value of "U" indicating "unknown" cannot be used.

10 DL10 is the labor type judgment indicator. A value of "Y" indicates that labor type judgment has been used. A value of "N" indicates that no labor type judgment has been used. A value of "U" indicating "unknown" cannot be used.

11 DL11 is the taxable indicator. A value of "Y" indicates that this labor is taxable. A value of "N" indicates that this labor is not taxable. A value of "U" indicating "unknown" cannot be used.

DLP - Delivery Parameter

To specify the parameters related to determining delivery on-time performance.

TRANSACTION SETS USED IN

892

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

16	616	Number of Periods	1	O	N0	1/3
17	118	Rate	1	O	R	1/9
18	616	Number of Periods	1	O	N0	1/3
19	118	Rate	1	O	R	1/9
20	616	Number of Periods	1	O	N0	1/3
21	118	Rate	1	O	R	1/9

Syntax Notes

03	P0304
09	P0910

Comments

06	DM06 is used for period computation exclusion. (Used to describe free time.)
09	DM09 contains a valid plan number when the code in DM11 is "F".
10	In DM10, use codes "N" and "S" when the code in DM01 is "D".
11	In DM11, there is no distinction between codes "B" and "C" for the purpose of this transaction set. They both indicate a demurrage rate.
12	DM12 is used for additional time period exclusion.

DMA - Additional Demographic Information

To supply additional demographic identification

TRANSACTION SETS USED IN

135 186 187 191 252 255 267 273 284 285 309 358 359 418

06	P0607
08	C0807
09	C0903
13	P1314
15	P1516

Semantic Notes

01	DMA01 defines an alien registration number.
02	DMA02 defines the place of birth.
03	DMA03 defines the driver's license number.
04	DMA04 defines the driver's license state of issue.
09	DMA09 describes the status of the driver's license referenced in DMA03.
10	DMA10 is the City of birth.
11	DMA11 is eye color.
12	DMA12 is hair color.

14 DMA14 is body height.
16 DMA16 is body weight.
17 DMA17 is used to describe marks on body.
18 DMA18 is the country of birth.

DMG - Demographic Information

To supply demographic information

12	26	Country Code	1	O/Z	ID	2/3

Syntax Notes

01	P0102
10	P1011
11	C1105

Semantic Notes

02	DMG02 is the date of birth.
07	DMG07 is the country of citizenship.
09	DMG09 is the age in years.
11	DMG11 is used to specify how the information in DMG05, including repeats of C056, was collected.
12	DMG12 is the country of residence.

DMH - Extended Demographic Information

To supply demographic information related to sex or gender identity

TRANSACTION SETS USED IN

111 148 186 187 252 255 256 267 268 270 271 273 274 275 276 277 278 500 820 834 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1874	Birth Sex	1	X/Z	ID	1/80
02	1875	Sex	1	X/Z	ID	1/80
03	1876	Preferred Name to Use	1	O/Z	AN	1/80
04	C082	Sexual Orientation	10	O/Z		
05	C083	Gender Identity Information	10	O/Z		
06	C084	Pronoun Information	10	O/Z		
07	C085	Recorded Sex or Gender	10	O/Z		

Syntax Notes

01	R0102

Semantic Notes

01	DMH01 conveys the sex that a medical practitioner used to describe an individual at birth.
02	DMH02 is documentation of a specific instance of sex or gender information.
03	DMH03 indicates the specific words to be used to address the individual in person or in writings.
04	The DMH04 composite conveys an individual's sexual orientation in relation to the pattern of emotional, sexual, and romantic attraction.
05	The DMH05 composite conveys an individual's personal sense of being a man, woman, boy, girl, nonbinary, or something else.
06	The DMH06 composite conveys an individual's preferred word or words that can replace their name in communications (aka pronouns).
07	The DMH07 composite conveys an individual's recorded sex or gender and associated attributes.

DMI - Data Maintenance Information

To provide information related to the data maintenance request number in the electronic form of the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	487	Maintenance Operation Code	1	M	ID	1/1
02	926	Data Maintenance Number	1	M	AN	1/6
03	93	Name	1	O	AN	1/60
04	166	Address Information	1	O	AN	1/55
05	166	Address Information	1	O	AN	1/55
06	19	City Name	1	O	AN	2/30
07	156	State or Province Code	1	O	ID	2/2
08	116	Postal Code	1	O	ID	3/15
09	26	Country Code	1	O	ID	2/3

11	364	Communication Number	1	X	AN	1/2048
12	490	Note Identification Number	1	O	N0	1/6

Syntax Notes

10 P1011

Comments

02 DMI03 through DMI11 contain the name, address, and telephone number of the submitter of the data maintenance request.

12 DMI12 is the note ID number of the E40 segment that contains the business reason for the data maintenance request.

DN - Dealer Effectivity

To indicate a change in dealer status

TRANSACTION SETS USED IN

128

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	432	Date Qualifier	1	M	ID	2/2
02	373	Date	1	M	DT	8/8
03	1242	Demand Area	1	O	AN	3/3
04	1243	Financial Status	1	O	AN	3/3

DN1 - Orthodontic Information

To supply orthodontic information

TRANSACTION SETS USED IN

837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	O/Z	R	1/15
02	380	Quantity	1	O/Z	R	1/15
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
04	352	Description	1	O/Z	AN	1/80

Semantic Notes

01 DN101 is the estimated number of treatment months.

02 DN102 is the number of treatment months remaining.

03 DN103 is the orthodontic indicator. A "Y" value indicates that the claim contains services related to treatment for orthodontic purposes. An "N" value indicates that the services for this claim are not for orthodontic purposes.

04 DN104 is the appliance description.

DN2 - Tooth Summary

To specify the status of individual teeth

TRANSACTION SETS USED IN
278 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	1368	Tooth Status Code	1	O	ID	1/2
03	380	Quantity	1	O/Z	R	1/15
04	1250	Date Time Period Format Qualifier	1	X	ID	2/3
05	1251	Date Time Period	1	X	AN	1/35
06	1270	Code List Qualifier Code	1	M/Z	ID	1/3

Syntax Notes

04 P0405

Semantic Notes

01 DN201 is the tooth number.

03 DN203 is the measurement expressed in millimeters of the distance between the gingival crest and the base of the tooth pocket.

06 DN206 designates the code set used to identify the tooth in DN201.

DOS - Definition of Share

Defines the agreement terms and sets specific ranges for campaign amounts

TRANSACTION SETS USED IN

290

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1166	Contract Type Code	1	M	ID	2/2
02	782	Monetary Amount	1	O/Z	R	1/18
03	954	Percentage as Decimal	1	O/Z	R	1/10
04	782	Monetary Amount	1	O/Z	R	1/18
05	954	Percentage as Decimal	1	O/Z	R	1/10
06	98	Entity Identifier Code	1	O/Z	ID	2/3
07	352	Description	1	O/Z	AN	1/80

Semantic Notes

02 DOS02 is the maximum dollar amount of the campaign share.

03 DOS03 is the maximum percentage of the campaign share.

04 DOS04 is the minimum dollar amount of the campaign share.

05 DOS05 is the minimum percentage of the campaign share.

06 DOS06 is an indicator to describe to which party the agreement terms apply.

07 DOS07 is required to describe the terms of DOS01 when DOS01 equals "OT" (Other) is used.

DP - Auto Claim Detail - Parts

To describe the parts involved in the repair of vehicle damage and to specify actions taken related to the parts

TRANSACTION SETS USED IN
124

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	306	Action Code	1	M	ID	1/2
02	234	Product/Service ID	1	X/Z	AN	1/80
03	610	Amount	1	O/Z	N2	1/15

15	360	Allowance or Charge Total Amount	1	O/Z	N2	1/15
16	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
17	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

11 L11021213

Semantic Notes

02 DP02 is the part number.

03 DP03 is the actual part price or sublet amount.

04 DP04 is the estimating database part price.

05 DP05 is the taxable indicator. A value of "Y" indicates that the part is taxable. A value of "N" indicates that the part is not taxable. A value of "U" indicating "unknown" cannot be used.

06 DP06 indicates the availability and usage of aftermarket parts.

07 DP07 is the certified part indicator. A value of "Y" indicates that the part is certified. A value of "N" indicates that the part is not certified. A value of "U" indicating "unknown" cannot be used.

08 DP08 is the price judgment indicator. A value of "Y" indicates that price judgment has been used. A value of "N" indicates that no price judgment has been used. A value of "U" indicating "unknown" cannot be used.

09 DP09 is the glass part indicator. A value of "Y" indicates that the part is a glass part. A value of "N" indicates that the part is not a glass part. A value of "U" indicating "unknown" cannot be used.

10 DP10 is the price included indicator. A value of "Y" indicates that the part price is included elsewhere. A value of "N" indicates that the part price is not included elsewhere. A value of "U" indicating "unknown" cannot be used.

11 DP11 is the quantity used of this part.

12 DP12 is the non-OEM supplier part number.

13 DP13 is the non-OEM supplier reference.

14 DP14 is the adjustment or betterment percent.

15 DP15 is the adjustment or betterment amount.

16 DP16 indicates the wear to the part. A value of "Y" indicates normal wear to the part. A value of "N" indicates the wear to the part as other than normal.

17 DP17 is the non-new parts indicator; a "Y" indicates a search for non-new parts was performed and a part was selected, an "N" indicates that a search for non-new parts was performed and no parts were selected.

DPN - Dependent Information

To provide dependent information

TRANSACTION SETS USED IN
153

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1470	Number	1	M/Z	N0	1/9
02	1067	Marital Status Code	1	O	ID	1/1
03	584	Employment Status Code	1	O/Z	ID	2/2
04	1470	Number	1	O/Z	N0	1/9

Semantic Notes

01 DPN01 refers to the total number of dependents.

03 DPN03 indicates employment status of claimant's spouse.

04 DPN04 refers to the total number of dependent children under 18.

DR - Docket Range

To assign an identification to a range of dockets

TRANSACTION SETS USED IN
486

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	M/Z	DT	8/8
02	140	Standard Carrier Alpha Code	1	M	ID	2/4
03	697	Docket Control Number	1	M	AN	1/7
04	690	Docket Identification	1	M/Z	AN	1/11
05	691	Revision Number	1	X	N0	1/4
06	690	Docket Identification	1	X	AN	1/11

Syntax Notes

06	R0605
06	E0605

Semantic Notes

01	DR01 indicates the expiration date.
04	DR04 indicates an actual docket when DR06 is blank, otherwise DR04 indicates the low value of a range and DR06 the high value.

DRA - Drug Authorization

To specify a drug for which authorization is being requested

TRANSACTION SETS USED IN
278

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	352	Description	2	M/Z	AN	1/80
02	1322	Certification Type Code	1	O/Z	ID	1/1

14	1330	Dosage Form Code	1	O	ID	2/15
15	933	Free-form Message Text	999	O/Z	AN	1/264

Syntax Notes

04 P0405
08 P080910

Semantic Notes

01 DRA01 is the drug name. Position of data in the repeating data element conveys no significance.
02 DRA02 is the drug therapy type.
03 DRA03 Position of data in the repeating data element conveys no significance.
05 DRA05 is the quantity being requested.
06 DRA06 is the Sig. (The Sig is a Latin term used in the pharmacy industry that represents the instructions/directions that are printed on the drug label.)
07 DRA07 is the self administer indicator. A "Y" value indicates that the drug can be administered by the patient. An "N" value indicates that the drug can not be administered by the patient.
08 DRA08 is the end stage renal disease (ESRD) indicator. A "Y" value indicates that the patient has ESRD. An "N" value indicates that the patient does not have ESRD.
10 DRA10 is the ESRD certification date.
11 DRA11 is for questions that are related to the authorization of the drug. Position of data in the repeating data element conveys no significance.
12 DRA12 is the number of refills requested.
13 DRA13 Position of data in the repeating data element conveys no significance.

15 DRA15 is for comments and/or instructions regarding the authorization. Position of data in the repeating data element conveys no significance.

DRT - Car Hire Rate Detail

To identify the rail car hire rate and type

TRANSACTION SETS USED IN
432

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	322	Load/Empty Status Code	1	O	ID	1/1

DTP - Date or Time or Period

To specify any or all of a date, a time, or a time period

TRANSACTION SETS USED IN

100 103 111 112 124 130 132 133 135 138 139 144 148 150 155 158 159 185 186 187 188 189 190 191 196 197 198 199 200 201 202 203 205 206 242 245 248 252 255 256 260 261 262 264 266 267 268 269 270 271 272 273 274 275 276 277 278 362 412 452 453 455 501 504 625 811 815 820 823 833 834 837 856 872 873

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	374	Date/Time Qualifier	1	M	ID	3/3
02	1250	Date Time Period Format Qualifier	1	M/Z	ID	2/3
03	1251	Date Time Period	1	M	AN	1/35

Semantic Notes

02 DTP02 is the date or time or period format that will appear in DTP03.

DVI - Dynamic Vehicle Information

To provide dynamic information pertaining to a vehicle

TRANSACTION SETS USED IN
124 187 272 284 285 286

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	236	Price Identifier Code	1	O	ID	3/3
02	212	Unit Price	1	X	R	1/17
03	100	Currency Code	1	O	ID	3/3
04	1250	Date Time Period Format Qualifier	1	X	ID	2/3
05	1251	Date Time Period	1	X/Z	AN	1/35
06	93	Name	1	O/Z	AN	1/60
07	380	Quantity	1	O/Z	R	1/15
08	127	Reference Identification	1	O/Z	AN	1/80
09	156	State or Province Code	1	X/Z	ID	2/2
10	1250	Date Time Period Format Qualifier	1	X	ID	2/3
11	1251	Date Time Period	1	X/Z	AN	1/35
12	1423	License Plate Type Code	1	O/Z	ID	2/2
13	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
14	26	Country Code	1	O/Z	ID	2/3

Syntax Notes

01	C0102
04	P0405
10	P1011
14	C1409

Semantic Notes

05	DVI05 specifies the purchase date.
06	DVI06 specifies the place of purchase.
07	DVI07 specifies the current mileage.
08	DVI08 specifies the license plate number of the vehicle.
09	DVI09 specifies the license plate state.
11	DVI11 specifies the year of the license plate.
12	DVI12 specifies the type of license plate.
13	DVI13 indicates if the vehicle is still driveable. A "Y" indicates the vehicle is still driveable; an "N" indicates it is not driveable.
14	DVI14 is used to specify the country of the state or province cited in DVI09.

E01 - Electronic Form Main Heading

To provide the information related to all of the values for this instance of the electronic form of the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	487	Maintenance Operation Code	1	M	ID	1/1
02	922	Electronic Form Standards Type Code	1	M	ID	1/1
03	480	Version / Release / Industry Identifier Code	1	M	AN	1/12
04	924	Full or Partial Indicator Code	1	M	ID	1/1

E03 - Interchange Order of Segments

To provide information related to the interchange order table of the control segments for the electronic form of the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	487	Maintenance Operation Code	1	M	ID	1/1
02	906	Level Number Code	1	M	ID	1/1
03	721	Segment ID Code	1	M	ID	2/3
04	903	Envelope Indicator Code	1	M	ID	1/1
05	904	Requirement Designator Code	1	M	ID	1/1
06	905	Maximum Use	1	M	N0	1/7
07	490	Note Identification Number	1	O	N0	1/6

E1 - Empty Car Disposition - Pended Destination Consignee

To identify the party receiving the empty car

TRANSACTION SETS USED IN

404 417 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	93	Name	1	M	AN	1/60
02	66	Identification Code Qualifier	1	X	ID	1/2
03	67	Identification Code	1	X	AN	2/80

Syntax Notes

02 P0203

E10 - Transaction Set Grouping

To provide information grouping of transaction sets by transaction ID and functional ID for the electronic form of the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	487	Maintenance Operation Code	1	M	ID	1/1
02	143	Transaction Set Identifier Code	1	M	ID	3/3
03	479	Functional Identifier Code	1	M	ID	2/2
04	352	Description	1	M/Z	AN	1/80
05	490	Note Identification Number	1	O	N0	1/6

Semantic Notes

04 E1004 contains the transaction set title.

E13 - Segment Order in Transaction Set

To provide the list of segments in a transaction set for the electronic form of the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	487	Maintenance Operation Code	1	M	ID	1/1
02	589	Position in Set	1	M	N0	1/6
03	902	Section Designator Code	1	O	ID	1/1
04	721	Segment ID Code	1	O	ID	2/3
05	904	Requirement Designator Code	1	O	ID	1/1
06	905	Maximum Use	1	O	N0	1/7
07	909	Loop Name	1	O	AN	2/4
08	910	Loop Repeat Count	1	O	N0	1/7
09	489	Loop Level Number	1	O	N0	1/1
10	490	Note Identification Number	1	O	N0	1/6

Comments

02 When E1302 is used in the Electronic Form Transaction Set (868) to send a complete transaction set, it is 10 for the first segment and incremented by 10 for each succeeding segment to the end of the transaction set. When used in the Electronic Form Transaction Set to delete or replace an existing segment, it is the matching sequence number of the segment existing in the transaction set. When used in the Electronic Form Transaction Set to add a segment, it is a number which will insert the new segment in its position within the transaction set.

09 E1309 contains a number (1-9) indicating the loop-level structure within the transaction set. The number 1 indicates the outermost loop, 2 indicates the next loop within the loop, 3 indicates the next loop within 2, etc.

10 E1310 is the note ID number of the E40 segment which contains this segment's nonstandard comments. These comments are as they appear in the transaction set listings of the standards documentation.

E20 - Segment Header Information

To provide for grouping the data elements by segment ID value for the electronic form of the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	487	Maintenance Operation Code	1	M	ID	1/1
02	721	Segment ID Code	1	M	ID	2/3
03	352	Description	1	O/Z	AN	1/80
04	490	Note Identification Number	1	O	N0	1/6

Semantic Notes

03 E2003 contains the segment title.

Comments

04 E2004 is the note ID number of the E40 segment which contains this segment's nonstandard comments. These comments are as they appear in the transaction set listings of the standards documentation.

E22 - Data Element Relationships in a Segment or Composite

To provide the detail information for the data element relationships in a segment or composite for the electronic form of the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	487	Maintenance Operation Code	1	M	ID	1/1
02	912	Relation Code	1	M	ID	1/1
03	911	Position in Segment or Composite	1	M	N0	1/2
04	911	Position in Segment or Composite	1	O	N0	1/2
05	911	Position in Segment or Composite	1	O	N0	1/2
06	911	Position in Segment or Composite	1	O	N0	1/2
07	911	Position in Segment or Composite	1	O	N0	1/2
08	911	Position in Segment or Composite	1	O	N0	1/2
09	911	Position in Segment or Composite	1	O	N0	1/2
10	911	Position in Segment or Composite	1	O	N0	1/2
11	911	Position in Segment or Composite	1	O	N0	1/2
12	911	Position in Segment or Composite	1	O	N0	1/2

E24 - Data Element Sequence in a Segment or Composite

To provide the detail information related to the sequence of the data elements in a segment or composite for the electronic form of the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	487	Maintenance Operation Code	1	M	ID	1/1
02	911	Position in Segment or Composite	1	M	N0	1/2
03	725	Data Element Reference Code	1	M	AN	1/4
04	904	Requirement Designator Code	1	M	ID	1/1
05	491	Data Element Usage Type Code	1	O	ID	1/1
06	490	Note Identification Number	1	O	N0	1/6
07	609	Count	1	O/Z	N0	1/9

Semantic Notes

07	07 conveys the repetition designator for either the simple or composite data element being referenced in the E2407 instance.
07	E2407 shall not be used when referencing a component data element.
07	The absence of data in E2407 shall be interpreted to equal a repetition designator of one (1).

Comments

04	If E2404 contains code "C", then the conditional relationship must be defined in the E22 segment.
06	E2406 contains segment syntax notes and comments.

E30 - Data Element Attributes

To provide the data element attributes for the electronic form of the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	487	Maintenance Operation Code	1	M	ID	1/1
02	725	Data Element Reference Code	1	M	AN	1/4
03	913	Data Element Data Type Code	1	M	ID	1/3
04	914	Minimum Length	1	M	N0	1/2
05	915	Maximum Length	1	M	N0	1/7
06	352	Description	1	O/Z	AN	1/80
07	490	Note Identification Number	1	O	N0	1/6
08	725	Data Element Reference Code	1	X/Z	AN	1/4
09	916	Code List Reference	1	X	AN	1/6

Syntax Notes

08 P0809

Semantic Notes

06 E3006 is the data element title.

08 If E3008 is used, then E3002 indicates the data element number in which the industry code value is carried, and E3008 carries the data element number of the industry code list qualifier.

Comments

07 E3007 is the note ID number of the E40 segment which contains the data element definition.

E34 - Code List Values for a Data Element

To provide the code list values of a data element for the electronic form of the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	487	Maintenance Operation Code	1	M	ID	1/1
02	918	Code Value	1	M	AN	1/8
03	505	Partition Indicator	1	O	AN	1/80
04	352	Description	1	M	AN	1/80

Comments

04	E3404 contains the first 80 characters of the code description; the remainder is found in the following DDI segment.

E4 - Empty Car Disposition - Pended Destination City

To specify the geographic place of named party receiving the empty car

TRANSACTION SETS USED IN

404 417 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	19	City Name	1	M	AN	2/30
02	156	State or Province Code	1	M	ID	2/2
03	116	Postal Code	1	O	ID	3/15
04	26	Country Code	1	O	ID	2/3
05	166	Address Information	1	O	AN	1/55

E40 - EDI Standards Note Reference

To transmit information relative to comments and notes within the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	487	Maintenance Operation Code	1	M	ID	1/1
02	490	Note Identification Number	1	M	N0	1/6
03	568	Electronic Form Note Reference Code	1	M	ID	3/3
04	350	Assigned Identification	1	O	AN	1/20

E41 - Composite Header Information

To provide for grouping the data elements by composite ID value for the electronic form of the X12 standards

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

868

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	487	Maintenance Operation Code	1	M	ID	1/1
02	725	Data Element Reference Code	1	M	AN	1/4
03	352	Description	1	O/Z	AN	1/80
04	490	Note Identification Number	1	O	N0	1/6

Semantic Notes

03 E4103 contains the composite title.

Comments

04 E4104 is the note ID number of the E40 segment which contains this composite's nonstandard comments. These comments are as they appear in the transaction set listings of the standards documentation.

E5 - Empty Car Disposition - Pended Destination Route

To specify the routing of the empty car

TRANSACTION SETS USED IN

404 417 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	133	Routing Sequence Code	1	M	ID	1/2
03	19	City Name	1	O	AN	2/30
04	154	Standard Point Location Code	1	O	ID	6/9

E6 - Advance Car Disposition

To specify advance data on the disposition of equipment

TRANSACTION SETS USED IN

419 420

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	206	Equipment Initial	1	M	AN	1/4
02	207	Equipment Number	1	M	AN	1/15
03	19	City Name	1	M	AN	2/30
04	154	Standard Point Location Code	1	O	ID	6/9
05	140	Standard Carrier Alpha Code	1	M	ID	2/4
06	296	Intermediate Switch Carrier Code	1	O	ID	2/4
07	22	Commodity Code	1	O	AN	1/30
08	301	Car Type Code	1	O	ID	1/4
09	578	Equipment Status Code	1	M	ID	1/2

Comments

03 E603 is the station or city name at which carriers interchange shipments.

E8 - Blocking and Response Information

To identify a block of cars and the response information

TRANSACTION SETS USED IN

420

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	42	Block Identifier	1	X	AN	1/12
02	748	Movement Authority Code	1	X	ID	1/2

Syntax Notes

01	R0102

EA - Equipment Attributes

To specify attributes required for a piece of equipment

TRANSACTION SETS USED IN

300 301

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1402	Equipment Attribute Code	1	M	ID	2/3
02	C001	Composite Unit of Measure	1	X		
03	380	Quantity	1	X	R	1/15

Syntax Notes

02 P0203

Comments

01 When EA01 is "PCO", "PSE", "DHT", "DWI", "YEA" or "MCP", EA02 and EA03 are required.

EB - Eligibility or Benefit Information

To supply eligibility or benefit information

TRANSACTION SETS USED IN
271

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1390	Eligibility or Benefit Information Code	25	M/Z	ID	1/2
02	1207	Coverage Level Code	1	O	ID	3/3
03	C064	Service Type	99	O/Z		
04	1788	Insurance Product Code	1	O	ID	1/3
05	1204	Plan Coverage Description	1	O	AN	1/50
06	615	Time Period Qualifier	1	O	ID	1/2
07	782	Monetary Amount	1	O	R	1/18
08	954	Percentage as Decimal	1	O	R	1/10
09	673	Quantity Qualifier	1	X	ID	2/2
10	380	Quantity	1	X	R	1/15
11	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
12	1791	Network Indicator Code	1	O	ID	1/2
13	C003	Composite Medical Procedure Identifier	99	O/Z		
14	1328	Diagnosis Code Pointer	99	O/Z	N0	1/2
15	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
16	1796	Health Care Services Review Requirement Code	10	O	ID	1/2
17	C022	Health Care Code Information	99	O		

Syntax Notes

09 P0910

Semantic Notes

01 All EB01 values qualify EB06 through EB10. Position of data in the repeating data element conveys no significance.

03 Position of data in the repeating data element conveys no significance.

11 EB11 is the authorization or certification indicator. A "Y" value indicates that an authorization or certification is required per plan provisions. An "N" value indicates that an authorization or certification is not required per plan provisions. A "U" value indicates it is unknown whether the plan provisions require an authorization or certification.

13 Position of data in the repeating composite data element conveys no significance.

14 The first pointer designates the primary diagnosis and remaining diagnosis pointers indicate declining level of importance.

15 A "Y" indicates benefits are shared across Service Type Codes and Procedure Codes; an "N" indicates benefits are not shared.

EC - Employment Class

To provide class of employment information

TRANSACTION SETS USED IN
186 267 834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1176	Employment Class Code	1	O	ID	2/3
02	1176	Employment Class Code	1	O	ID	2/3
03	1176	Employment Class Code	1	O	ID	2/3
04	954	Percentage as Decimal	1	O/Z	R	1/10
05	1201	Information Status Code	1	O/Z	ID	1/1
06	1149	Occupation Code	1	O	ID	4/6

Semantic Notes

04 EC04 is percent of ownership.

05 EC05 applies to the entire segment.

ECS - Fees and Payment Schedule

To provide payment information pertaining to equipment

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	522	Amount Qualifier Code	1	M	ID	1/3
02	782	Monetary Amount	1	M	R	1/18
03	1772	Frequency Pattern Code	1	M	ID	2/2
04	352	Description	1	O/Z	AN	1/80

Semantic Notes

04 ECS04 provides information about the imposed fees.

ED - Equipment Description

To identify further the referenced equipment

TRANSACTION SETS USED IN
311 324 424 451 455

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	206	Equipment Initial	1	M	AN	1/4
02	207	Equipment Number	1	M	AN	1/15
03	322	Load/Empty Status Code	1	O	ID	1/1
04	22	Commodity Code	1	O	AN	1/30
05	79	Lading Description	1	O	AN	1/50
06	186	Waybill Number	1	O	N0	1/6
07	207	Equipment Number	1	O/Z	AN	1/15
08	373	Date	1	O/Z	DT	8/8

Semantic Notes

07 ED07 indicates the high end of an equipment range.
08 ED08 is the waybill date.

EDF - Educational Fee Information

To specify the type of educational fees assessed at an educational institution

TRANSACTION SETS USED IN

133

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1270	Code List Qualifier Code	1	M/Z	ID	1/3
02	1271	Industry Code	1	M	AN	1/30
03	1134	Institutional Governance or Funding Source Level Code	1	O	ID	1/1
04	1270	Code List Qualifier Code	1	X/Z	ID	1/3
05	1271	Industry Code	1	X	AN	1/30
06	352	Description	1	O/Z	AN	1/80
07	1131	Level of Individual, Test, or Course Code	1	O	ID	2/2
08	67	Identification Code	1	O/Z	AN	2/80
09	380	Quantity	1	O/Z	R	1/15
10	380	Quantity	1	O/Z	R	1/15
11	782	Monetary Amount	1	O/Z	R	1/18

Syntax Notes

04 P0405

06 C0604

Semantic Notes

01 EDF01 and EDF02 identify the code source and industry code for the education fee type.

04 EDF04 and EDF05 identify the code source and industry code for the institutional fee basis.

06 EDF06 is a free-form text description that further defines the basis of fees or charges indicated in EDF04 and EDF05.

08 EDF08 identifies a specific program area using a Classification of Instructional Program (CIP) code.

09 EDF09 represents the credit hours typically associated with the type of fee.

10 EDF10 represents the clock hours typically associated with the type of fee.

11 EDF11 is the monetary amount of the fee.

EFI - Electronic Format Identification

To provide basic information about the electronic format of the interchange data

TRANSACTION SETS USED IN

105 176 186 187 197 240 252 255 267 268 280 832 840 841 842 843 850 855 860 865 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	786	Security Level Code	1	M	ID	2/2
02	933	Free-form Message Text	1	O	AN	1/264

15	799	Version Identifier	1	X	AN	1/30
16	1570	Filter ID Code	1	X	ID	3/3

Syntax Notes

05	C0504
07	C0706
09	C0908
15	P1516

EI - Automatic Equipment Identification

To identify individual equipment and its sequence number for automatic identification

TRANSACTION SETS USED IN

160

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	609	Count	1	O/Z	N0	1/9
02	206	Equipment Initial	1	X	AN	1/4
03	207	Equipment Number	1	X	AN	1/15
04	1543	Equipment Orientation Code	1	O	ID	1/1
05	219	Position	1	O/Z	AN	1/3
06	1554	Tag Status Code	1	O	ID	1/1

Syntax Notes

02	P0203

Semantic Notes

01	EI01 is the count of the entrained equipment.
05	EI05 is the tier of the tag placement.

EIA - Beginning Segment for Equipment Inquiry or Advice

To identify functions and provide control information required for the Equipment Inquiry or Advice Transaction Set

TRANSACTION SETS USED IN

456

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

05	609	Count	1	O/Z	N0	1/9
06	127	Reference Identification	1	O/Z	AN	1/80

Syntax Notes

05 C0504

Semantic Notes

02 EIA indicates if waybill information should be included. A "Y" indicates waybill information should be included; an "N" indicates waybill information should not be included.

03 EIA03 indicates if trip information should be included. A "Y" indicates trip information should be included; an "N" indicates trip information should not be included.

04 EIA04 indicates if advice should include all events from the last full cycle. A "Y" indicates advice should include all events from the last full cycle; an "N" indicates that the number of events to be sent will be found in EIA05.

05 EIA05 indicates how many of the last events should be passed.

06 EIA06 contains the 12 character Trace Identifier required in the response of parameter trace inquiries.

ELV - Employee Leave Summary

To provide summary information concerning the employee's leave records

TRANSACTION SETS USED IN

132

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	584	Employment Status Code	1	M/Z	ID	2/2
02	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
03	380	Quantity	1	O/Z	R	1/15
04	380	Quantity	1	O/Z	R	1/15
05	380	Quantity	1	O/Z	R	1/15
06	380	Quantity	1	O/Z	R	1/15

Semantic Notes

01 ELV01 is the type of leave being reported.

02 ELV02 indicates whether an individual receives compensation from the employer during a period of leave. A "Y" indicates leave with pay; an "N" indicates leave without pay.

03 ELV03 is the maximum number of hours of leave that an individual can accrue per calendar year.

04 ELV04 is the actual number of hours of leave earned but not yet taken by an individual per calendar year.

05 ELV05 is the current number of hours of leave available for use by an individual per calendar year.

06 ELV06 is the number of hours of leave an individual has taken per calendar year.

EM - Equipment Characteristics

To send additional information regarding a specific piece of equipment

TRANSACTION SETS USED IN
271 272 404 417 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	188	Weight Unit Code	1	X	ID	1/1
02	81	Weight	1	O/Z	R	1/10
03	184	Volume Unit Qualifier	1	X	ID	1/1

05	26	Country Code	1	O/Z	ID	2/3
06	1429	Construction Type Code	1	O	ID	1/2
07	373	Date	1	O/Z	DT	8/8

Syntax Notes

02	C0201
04	C0403

Semantic Notes

02	EM02 is the maximum load weight.
04	EM04 is the maximum load volume.
05	EM05 is the country of manufacture.
07	EM07 is the last inspection date for convention of safe container.

EMP - Employer

To provide employment specifics

TRANSACTION SETS USED IN
267 833

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	352	Description	1	M/Z	AN	1/80
02	235	Product/Service ID Qualifier	1	X/Z	ID	2/2
03	234	Product/Service ID	1	X/Z	AN	1/80

08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
10	127	Reference Identification	1	O	AN	1/80

Syntax Notes

02 P0203
04 P0405

Semantic Notes

01 EMP01 describes employer's type of business.
02 EMP02 is used to reference business code list (Standard Industrial Classification Code (SICC), etc.).
03 EMP03 is used to state the Standard Industrial Classification Code (SICC) to identify the type of business.
04 EMP04 identifies the type of employee identification.
05 EMP05 states the employee's identification number.
06 EMP06 indicates if employment is on-going. A "Y" indicates employment is on-going; an "N" indicates it is not.
07 EMP07 describes reason for leaving employment.
08 EMP08 defines bonus continuance. A "Y" indicates it will; an "N" indicates it may not.
09 EMP09 defines overtime continuance. A "Y" indicates it will continue; an "N" indicates it may not continue.

EMS - Employment Position

To describe employment position

TRANSACTION SETS USED IN

113 130 132 138 155 186 189 194 198 200 201 248 252 255 267 274 284 286 540 820 833

Syntax Notes

05	P0506
07	P0708
09	P0910
13	P1314

Semantic Notes

01	EMS01 describes the employee's title or position in text.
02	EMS02 defines the employment position relationship.
03	EMS03 defines the occupation category.
04	EMS04 defines the status of employment.
05	EMS05 identifies EMS06 as pay grade.
06	EMS06 defines pay grade for employee, if available.
09	EMS09 and EMS10 identify the employee position number.
11	EMS11 is the employee's annual full-time equivalency.
12	EMS12 indicates the appointment type as full-time or part-time.
13	EMS13 and EMS14 indicate the employee's pay class.
15	EMS15 provides additional detail on employment class such as bargaining unit status or whether the employee is exempt from the Fair Labor Standards Act.

EMT - Employment

To specify employment information

TRANSACTION SETS USED IN
148

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1270	Code List Qualifier Code	1	X	ID	1/3
02	1271	Industry Code	1	X	AN	1/30
03	156	State or Province Code	1	O/Z	ID	2/2
04	67	Identification Code	1	O/Z	AN	2/80
05	352	Description	1	O/Z	AN	1/80
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

01 P0102

Semantic Notes

03 EMT03 is the employee work state or state of hire.

04 EMT04 is the Standard Industrial Classification Code (SICC) (code source 113).

05 EMT05 is an occupation description.

06 EMT06 designates if union pays cash benefits. A "Y" indicates the union pays cash benefits; an "N" indicates that the union does not pay cash benefits.

07 EMT07 designates if employer requires reimbursement if wages continue during disability. A "Y" indicates the employer requires reimbursement; an "N" indicates the employer does not require reimbursement.

08 EMT08 designates if employee is covered by a private, individual disability plan. A "Y" indicates the employee is covered by a private, individual disability plan; an "N" indicates that the employee is not covered by a private, individual disability plan.

ENE - Electronic Systems Environment

To specify electronic systems environment

TRANSACTION SETS USED IN
838

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	709	Communications Environment Code	1	M	ID	2/2
02	365	Communication Number Qualifier	1	M	ID	2/2
03	364	Communication Number	1	M	AN	1/2048
04	66	Identification Code Qualifier	1	X	ID	1/2
05	67	Identification Code	1	X/Z	AN	2/80

Syntax Notes

04 P0405

Semantic Notes

05 ENE05 specifies a contracted provider identification number.

ENM - School Enrollment Data

To specify education enrollment information

TRANSACTION SETS USED IN
133

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	641	Status Reason Code	1	M/Z	ID	3/3
02	1131	Level of Individual, Test, or Course Code	1	O	ID	2/2
03	1139	Session Code	1	O/Z	ID	1/1
04	C056	Composite Race or Ethnicity Information	5	O/Z		
05	1068	Gender Code	1	O	ID	1/1
06	1250	Date Time Period Format Qualifier	1	X/Z	ID	2/3
07	1251	Date Time Period	1	X	AN	1/35
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

06 P0607

Semantic Notes

01 ENM01 indicates the enrollment status to be reported.

03 ENM03 indicates the type of academic session for which the enrollment data is being reported.

04 One or more occurrences of ENM04 are used to provide a race or ethnicity description. The positionality of the occurrences of ENM04 is not significant.

04 All occurrences of ENM04 apply to the gender code in ENM05.

06 ENM06 and ENM07 indicate the date of the enrollment period.

08 ENM08 indicates whether the enrollment data includes Summer Session information. A "Y" indicates that Summer Session information is included. An "N" indicates that Summer Session is not included.

Comments

01 Generally these are enrollments and graduations in various categories.

ENR - School Enrollment Information

To provide school data relative to the applicant or the student

TRANSACTION SETS USED IN
135 190 191

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	641	Status Reason Code	1	M	ID	3/3

15	1250	Date Time Period Format Qualifier	1	X	ID	2/3
16	1251	Date Time Period	1	X/Z	AN	1/35
17	1250	Date Time Period Format Qualifier	1	X	ID	2/3
18	1251	Date Time Period	1	X/Z	AN	1/35
19	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
20	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

03	P0304
06	P0607
12	P1213
15	P1516
17	P1718

Semantic Notes

09	ENR09 indicates the degree intent. A "Y" indicates there is a degree intent; an "N" indicates there is not.
10	ENR10 indicates if there is satisfactory progress toward a degree. A "Y" indicates there is satisfactory progress; an "N" indicates there is not.
11	ENR11 indicates if another post-secondary school was attended. A "Y" indicates another post-secondary school was attended; an "N" indicates one was not.
13	ENR13 is last post-secondary school attended date range.

14 ENR14 indicates if a foreign school was attended. A "Y" indicates a foreign school was attended; an "N" indicates one was not.

16 ENR16 is the last foreign school attended date range.

18 ENR18 is the enrollment period.

19 ENR19 defines if the student is in good standing. A "Y" indicates the student is in good standing; an "N" indicates the student is not in good standing.

20 ENR20 defines if the student qualifies for the good student discount. A "Y" indicates that the student qualifies; an "N" indicates the student does not qualify.

ENT - Entity

To designate the entities which are parties to a transaction and specify a reference meaningful to those entities

TRANSACTION SETS USED IN

135 139 144 190 191 252 256 267 273 540 820 821 822 834 877 880 885 886 891

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	O	N0	1/9
02	98	Entity Identifier Code	1	X	ID	2/3
03	66	Identification Code Qualifier	1	X	ID	1/2
04	67	Identification Code	1	X	AN	2/80
05	98	Entity Identifier Code	1	X	ID	2/3
06	66	Identification Code Qualifier	1	X	ID	1/2
07	67	Identification Code	1	X	AN	2/80
08	128	Reference Identification Qualifier	1	X	ID	2/3
09	127	Reference Identification	1	X	AN	1/80

Syntax Notes

02 P020304
05 P050607
08 P0809

Comments

00 This segment allows for the grouping of data by entity/entities at or within a master/masters. A master (e.g., an organization) can be comprised of numerous subgroups (e.g., entities). This master may send grouped data to another master (e.g., an organization) which is comprised of one or more entities. Groupings are as follows:

00 (1) Single/Single: Only ENT01 is necessary, because there is a single entity (the sending master) communicating with a single entity (the receiving master).

00 (2) Single/Multiple: ENT05, ENT06, and ENT07 would be used to identify the entities within the receiving master. The sending master is a single entity, so no other data elements need be used.

00 (3) Multiple/Single: ENT02, ENT03, and ENT04 would be used to identify the entities within the sending master. The receiving master is a single entity, so no other data elements need be used.

00 (4) Multiple/Multiple: ENT02, ENT03, and ENT04 would be used to identify the entities within the sending master. ENT05, ENT06, and ENT07 would be used to identify the entities within the receiving master.

00 This segment also allows for the transmission of a unique reference number that is meaningful between the entities.

EQ - Eligibility or Benefit Inquiry

To specify inquired eligibility or benefit information

TRANSACTION SETS USED IN

270

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C064	Service Type	99	X/Z		
02	C003	Composite Medical Procedure Identifier	99	X/Z		
03	1207	Coverage Level Code	1	O	ID	3/3
04	1788	Insurance Product Code	1	O	ID	1/3
05	1328	Diagnosis Code Pointer	99	O/Z	N0	1/2
06	1791	Network Indicator Code	1	O	ID	1/2

Syntax Notes

01	R0102

Semantic Notes

01	Position of data in the repeating data element conveys no significance.
02	Position of data in the repeating composite data element conveys no significance.
05	The first pointer designates the primary diagnosis and remaining diagnosis pointers indicate declining level of importance.

EQD - EQD Equipment Damage Information

Used to identify damage on equipment.

TRANSACTION SETS USED IN

228

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	302	Location on Equipment Code	1	M/Z	ID	1/3
02	303	Type of Damage Code	1	M	ID	1/3
03	1741	Equipment Component Code	1	O	ID	1/4

Semantic Notes

01 When reporting no damage (EQD02 equals ND) the EQD01 must be equal to C.

ER - Rail Event Reporting

To supply information regarding movement of shipments

TRANSACTION SETS USED IN
451 456

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	306	Action Code	1	M	ID	1/2
02	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4

09	41	Interchange Train Identification	1	O	AN	1/10
10	373	Date	1	X/Z	DT	8/8
11	322	Load/Empty Status Code	1	O	ID	1/1
12	154	Standard Point Location Code	1	O/Z	ID	6/9

Syntax Notes

09 C0910

Semantic Notes

02 ER02 is the reporting carrier (also the delivering carrier if interchange is being reported).
04 ER04 is the event location.
08 ER08 is the receiving carrier if the value in ER03 is required for interchange.
10 ER10 is the train origination date.
12 ER12 is the location of the secondary point of the event specified in ER03.

ERI - Entity Relationship

To identify the explicit relationship between entities, i.e., parent, child, peer

TRANSACTION SETS USED IN

267 838

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	66	Identification Code Qualifier	1	M	ID	1/2
02	67	Identification Code	1	M	AN	2/80

04	66	Identification Code Qualifier	1	X	ID	1/2
05	67	Identification Code	1	X	AN	2/80
06	706	Entity Relationship Code	1	X	ID	2/2
07	706	Entity Relationship Code	1	O	ID	2/2
08	706	Entity Relationship Code	1	O	ID	2/2
09	1400	Hierarchy Code	1	O	AN	2/2

Syntax Notes

04		P040506

ERP - Educational Record Purpose

To indicate the type of educational record or information being requested or being sent and to specify conditions under which it is being requested or was sent

TRANSACTION SETS USED IN

130 133 138 146 188 190

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	640	Transaction Type Code	1	M/Z	ID	2/2
02	641	Status Reason Code	1	O/Z	ID	3/3
03	306	Action Code	1	O	ID	1/2
04	1250	Date Time Period Format Qualifier	1	X	ID	2/3
05	1251	Date Time Period	1	X/Z	AN	1/35

Syntax Notes

04 P0405

Semantic Notes

01 ERP01 identifies the type of transaction set.

02 ERP02 indicates why the record or information is being sent or not being sent.

05 ERP05 indicates the date by which the educational record is to be sent.

ES - Equipment Status

To provide detail information regarding the dynamic condition of equipment

TRANSACTION SETS USED IN

451 456

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1488	Bad Order Reason Code	1	O	ID	1/1
02	1489	Hold Reason Code	1	O	ID	2/2
03	1490	Association of American Railroads Car Grade Code	1	O	ID	1/1
04	519	Time Period Unit Qualifier	1	X	ID	1/1
05	380	Quantity	1	X/Z	R	1/15
06	617	Switch Type Code	1	O	ID	2/2
07	1271	Industry Code	1	O/Z	AN	1/30

Syntax Notes

04 P0405

Semantic Notes

05 ES05 is the time to repair the Bad Order equipment.

07 ES07 is the Association of American Railroad TRAIN II Shipper Rejection (Report Type 45) Code.

ESI - Employment Status Information

To specify status of employment

TRANSACTION SETS USED IN

132 148

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
04	337	Time	1	O/Z	TM	4/8
05	380	Quantity	1	O/Z	R	1/15
06	584	Employment Status Code	1	X	ID	2/2

08	1468	Reason Stopped Work Code	1	O	ID	2/2
09	641	Status Reason Code	1	O/Z	ID	3/3

Syntax Notes

09 C0906

Semantic Notes

01 ESI01 designates if the segment contains post-injury employment information. A "Y" designates that the segment contains post-injury employment information; an "N" designates that the segment contains pre-injury employment information.

02 ESI02 designates if the person returned to the same job. A "Y" indicates the person returned to same job; an "N" indicates the person did not return to the same job.

03 ESI03 designates if this is a permanent return to work. A "Y" indicates this is a permanent return to work; an "N" indicates this is not a permanent return to work.

04 ESI04 is the start time on the day of injury.

05 ESI05 is the number of hours worked on the last day worked.

09 ESI09 designates the reason for the status indicated in ESI06.

ETD - Excess Transportation Detail

To specify information relating to premium transportation

TRANSACTION SETS USED IN

856

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	626	Excess Transportation Reason Code	1	M	ID	1/2
02	627	Excess Transportation Responsibility Code	1	M	ID	1/1
03	128	Reference Identification Qualifier	1	X/Z	ID	2/3
04	127	Reference Identification	1	X	AN	1/80
05	743	Returnable Container Freight Payment Responsibility Code	1	O	ID	1/2

Syntax Notes

03 P0304

Semantic Notes

03 ETD03 qualifies the authorization number given in EDT04.

EVI - Event Inquiry Reason Information

To specify the event's phase or step in the inquiry process

TRANSACTION SETS USED IN

270

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1872	Event Inquiry Reason Indicator	1	M	ID	2/3

EVN - Occurrence/Encounter Event Verification Identifier

Code indicating the event's uniquely assigned identifier

TRANSACTION SETS USED IN

271

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1873	Occurrence/Encounter Reference Identification	1	M	AN	1/80

EXI - Excavation Ticket Information

To supply excavation ticket information

TRANSACTION SETS USED IN

620

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C040	Reference Identifier	1	M		
02	467	Priority	1	M/Z	N0	1/1
03	1250	Date Time Period Format Qualifier	1	M/Z	ID	2/3
04	1251	Date Time Period	1	M/Z	AN	1/35
05	519	Time Period Unit Qualifier	1	X/Z	ID	1/1
06	380	Quantity	1	X/Z	R	1/15
07	352	Description	1	X/Z	AN	1/80
08	306	Action Code	1	O/Z	ID	1/2

Syntax Notes

05	P0506
06	R0607

Semantic Notes

02	EXI02 is the priority level of the excavation according to the state's notification requirements.
03	EXI03 describes the format of the date given in EXI04.
04	EXI04 is the date and time the excavation is scheduled to begin.
05	EXI05 describes the time units for the duration of work.
06	EXI06 is the number of time units.
07	EXI07 describes non-specific time units for the duration of work.
08	EXI08 describes the method of positive response used by the sender or the positive response action specified by the responder.

F01 - Identification of Claim (Claimant Originated)

To identify a loss or damage claim

TRANSACTION SETS USED IN
920 924

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	M/Z	DT	8/8
02	127	Reference Identification	1	M/Z	AN	1/80

06	100	Currency Code	1	O	ID	3/3
07	280	Exchange Rate	1	O	R	4/10
08	66	Identification Code Qualifier	1	X	ID	1/2
09	67	Identification Code	1	X/Z	AN	2/80

Syntax Notes

08 P0809

Semantic Notes

01 F0101 contains the date of claim.
02 F0102 is claimant's claim number.
03 F0103 is the claim amount.
04 F0104 is the carrier to whom the claim is made.
09 F0109 is the claimant's code.

Comments

06 F0106 must be specified if the country is other than the United States. F0106 relates to amount in F0103.
07 F0107 relates to F0103 and F0106.

F02 - Identification of Shipment

To specify date of shipment, carrier, equipment, and carrier's reference number

TRANSACTION SETS USED IN
920 924 925

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	O/Z	DT	8/8
02	206	Equipment Initial	1	O	AN	1/4
03	207	Equipment Number	1	O	AN	1/15
04	128	Reference Identification Qualifier	1	X	ID	2/3
05	127	Reference Identification	1	X	AN	1/80
06	128	Reference Identification Qualifier	1	X	ID	2/3
07	127	Reference Identification	1	X	AN	1/80
08	597	Vessel Code	1	O	ID	1/8
09	182	Vessel Name	1	O	AN	2/50

Syntax Notes

04 P0405
06 P0607

Semantic Notes

01 F0201 is the date of pickup by the carrier.

Comments

08 F0208 is used if the shipment was received from an ocean carrier.
09 F0209 is used if the shipment was received from an ocean carrier.

F04 - Weight/Volume Loss

To report origin and destination weights or volumes

TRANSACTION SETS USED IN

920

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	81	Weight	1	X	R	1/10
02	188	Weight Unit Code	1	X	ID	1/1
03	187	Weight Qualifier	1	X	ID	1/2
04	81	Weight	1	X	R	1/10
05	188	Weight Unit Code	1	X	ID	1/1
06	187	Weight Qualifier	1	X	ID	1/2
07	183	Volume	1	X	R	1/8
08	184	Volume Unit Qualifier	1	X	ID	1/1
09	183	Volume	1	X	R	1/8
10	184	Volume Unit Qualifier	1	X	ID	1/1

Syntax Notes

01	P010203
01	C0104
04	P040506
07	P0708
07	C0709
09	P0910

Comments

01	Weights and volumes in this segment are: F0401-03 origin weight, F0404-06 destination weight, F0407-08 origin volume, and F0409-10 destination volume.

F05 - Allowance/Charge (Claim)

To report allowances or charges relative to a shipment against which a claim is made

TRANSACTION SETS USED IN

920

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	538	Charge/Allowance Qualifier	1	M	ID	2/2
02	610	Amount	1	M	N2	1/15
03	478	Credit/Debit Flag Code	1	M	ID	1/1

Comments

02 F0502 is the charge or allowance made for a loss or damage claim.

F07 - Auto Claim Detail

To itemize extent of automotive loss or damage

TRANSACTION SETS USED IN
924

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	M	N0	1/9
02	380	Quantity	1	O	R	1/15
03	234	Product/Service ID	1	X	AN	1/80
04	557	Part Name	1	X	AN	3/16
05	610	Amount	1	X/Z	N2	1/15
06	556	Damage Area Code	1	M	ID	2/2
07	540	Damage Type Code	1	M	ID	2/2
08	541	Damage Severity Code	1	M	ID	1/1
09	555	Labor Operation Identifier	1	O	AN	5/6
10	369	Free-form Description	1	O/Z	AN	1/45
11	542	Labor Hours	1	X/Z	N1	1/4
12	542	Labor Hours	1	X/Z	N1	1/4
13	550	Total Labor Cost	1	X	N2	3/8
14	551	Total Miscellaneous Costs	1	O	N2	2/15
15	552	Total Repair Cost	1	M	N2	3/15
16	553	Authorization Identification	1	O	AN	1/4
17	831	Inspection Location Type Code	1	O	ID	1/2
18	556	Damage Area Code	1	O	ID	2/2
19	540	Damage Type Code	1	O	ID	2/2
20	541	Damage Severity Code	1	O	ID	1/1
21	548	Decline/Amend Reason Code	1	O	ID	3/3
22	538	Charge/Allowance Qualifier	1	O	ID	2/2

Syntax Notes

02	C02030405
11	L111213
13	L131112

Semantic Notes

05	F0705 is the amount claimed per unit.
10	F0710 contains the labor operation description.
11	F0711 refers to labor for the operation identified in F0709.
12	F0712 refers to labor not associated with F0709.

Comments

00	If a part was replaced, a part number is required.
06	F0706 through F0708 refer to claimed damage detail.

18 F0718 through F0720 refer to inspection damage detail.

F09 - Detail - Supporting Evidence for Claim

To specify the extent of damage and the amount claimed for damaged goods

TRANSACTION SETS USED IN

920

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M	R	1/15
02	355	Unit or Basis for Measurement Code	1	M	ID	2/2
03	536	Nature of Claim Code	1	M	ID	2/2
04	610	Amount	1	M/Z	N2	1/15
05	610	Amount	1	M/Z	N2	1/15
06	352	Description	1	O	AN	1/80
07	79	Lading Description	1	O	AN	1/50
08	128	Reference Identification Qualifier	1	X	ID	2/3
09	127	Reference Identification	1	X	AN	1/80
10	128	Reference Identification Qualifier	1	X	ID	2/3
11	127	Reference Identification	1	X	AN	1/80
12	213	Lading Line Item Number	1	O	N0	1/6

Syntax Notes

08 P0809

10 P1011

Semantic Notes

04 F0904 contains the amount claimed per unit.

05 F0905 contains the amount claimed for a claim line item.

F10 - Identification of Claim (Tracer)

To identify a loss or damage claim

TRANSACTION SETS USED IN

925

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	M/Z	DT	8/8
02	127	Reference Identification	1	M/Z	AN	1/80
03	127	Reference Identification	1	X	AN	1/80
04	128	Reference Identification Qualifier	1	X	ID	2/3

Syntax Notes

03 P0304

Semantic Notes

01 F1001 contains the date of claim.

02 F1002 contains the claimant claim number.

F11 - Status

To identify a loss or damage claim and to indicate its status

TRANSACTION SETS USED IN

926

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	M/Z	DT	8/8
02	127	Reference Identification	1	M/Z	AN	1/80
03	127	Reference Identification	1	X	AN	1/80
04	610	Amount	1	X/Z	N2	1/15
05	610	Amount	1	O/Z	N2	1/15
06	546	Status Code	1	M	ID	2/2
07	373	Date	1	M/Z	DT	8/8
08	548	Decline/Amend Reason Code	1	O	ID	3/3
09	100	Currency Code	1	X	ID	3/3
10	128	Reference Identification Qualifier	1	X	ID	2/3

Syntax Notes

03 P0310
04 P0409
05 C0504

Semantic Notes

01 F1101 contains the date of the claim.
02 Reference numbers in this segment are F1102 claimant's claim number, and F1103 carrier's claim number.
04 F1104 is the claim amount specified in the currency of the country where the carrier to whom the claim is made is located.
05 F1105 is required when F1106 indicates a payment, which is shown with codes "PF" or "PP".
07 F1107 contains the date of status report.

Comments

08 F1108 is required when F1106 indicates that the claim was declined or amended.
09 F1109 is the currency for which the claim amount is specified.

F12 - Basic Claim Information - Automotive

To provide information for automotive claims

TRANSACTION SETS USED IN

924

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	127	Reference Identification	1	M/Z	AN	1/80
03	373	Date	1	M/Z	DT	8/8
04	475	Credit/Debit Adjustment Number	1	M	AN	1/22
05	373	Date	1	M/Z	DT	8/8
06	543	Labor Rate	1	M/Z	N2	3/6
07	543	Labor Rate	1	M/Z	N2	3/6
08	927	Damage Code Qualifier	1	O	ID	1/1

Semantic Notes

01 F1201 is used for dealer's repair order number.
02 F1202 is used for dealer's document number.
03 F1203 is used for repair order date.
05 F1205 contains the debit/credit memo date.
06 F1206 is used for body repair rate.
07 F1207 is used for chassis repair rate.

Comments

04 F1204 and F1205 will be used if sublet services are reported.

F13 - Payment Information

To transmit check number and amount information associated with a remittance

TRANSACTION SETS USED IN

124 926

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	429	Check Number	1	M	AN	1/16
02	373	Date	1	M/Z	DT	8/8
03	610	Amount	1	M/Z	N2	1/15
04	442	MICR Number	1	O	AN	16/16
05	373	Date	1	O/Z	DT	8/8
06	100	Currency Code	1	M	ID	3/3

Semantic Notes

02 F1302 contains the date of the check.

03 F1303 contains the check amount.

05 F1305 is used for redemption date.

Comments

06 F1306 is the currency for which amount is specified.

F14 - Line Item Reject

To identify the specific reasons why individual line items of a claim or part of a claim are rejected

TRANSACTION SETS USED IN

926

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	M/Z	N0	1/9
02	548	Decline/Amend Reason Code	1	M	ID	3/3

Semantic Notes

01 F1401 refers to a line entry on a freight loss/damage claim.

F6X - Identification (Automotive)

To identify automotive vehicles in a loss or damage claim

TRANSACTION SETS USED IN

924

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	539	Vehicle Identification Number	1	M	AN	1/30
02	833	Automotive Manufacturers Code	1	M	ID	2/2
03	838	Dealer Code	1	M	AN	2/9
04	66	Identification Code Qualifier	1	M	ID	1/2
05	67	Identification Code	1	M	AN	2/80
06	76	Invoice Number	1	M	AN	1/22
07	373	Date	1	O/Z	DT	8/8
08	373	Date	1	O/Z	DT	8/8

Semantic Notes

07 F6X07 contains the factory shipment date.

08 F6X08 contains the delivery to dealer date.

Comments

04 F6X04 and F6X05 are used to identify the origin of the final transportation segment when delivering to dealer.

F9 - Origin Station

To identify the rail origin of the shipment

TRANSACTION SETS USED IN

104 404 410 417 421 422 423 424 425 426 455 456 470 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	573	Freight Station Accounting Code	1	O	ID	1/5
02	19	City Name	1	M/Z	AN	2/30
03	156	State or Province Code	1	M	ID	2/2
04	26	Country Code	1	O/Z	ID	2/3
05	573	Freight Station Accounting Code	1	O/Z	ID	1/5
06	19	City Name	1	X	AN	2/30
07	156	State or Province Code	1	X	ID	2/2
08	154	Standard Point Location Code	1	O/Z	ID	6/9
09	116	Postal Code	1	O/Z	ID	3/15
10	154	Standard Point Location Code	1	O/Z	ID	6/9
11	116	Postal Code	1	O/Z	ID	3/15
12	26	Country Code	1	O/Z	ID	2/3

Syntax Notes

06 P0607

Semantic Notes

02 F902 is the origin station for movement.
04 F904 is the country code for the city named in the F902.
05 F905 is the freight station accounting code of the origin junction settlement carrier.
08 F908 is the Standard Point Location Code (SPLC) for the city named in the F902.
09 F909 is the postal code for the city named in the F902.
10 F910 is the Standard Point Location Code (SPLC) for the city named in the F906.
11 F911 is the postal code for the city named in the F906.
12 F912 is the country code for the city named in the F906.

Comments

05 F905 is the freight station accounting code of the city named in F906.

FA1 - Type of Financial Accounting Data

To specify the organization controlling the content of the accounting citation, and the purpose associated with the accounting citation

TRANSACTION SETS USED IN

180 511 517 527 561 568 810 811 812 814 820 821 842 850 857 858 860 861 867 869 940 945 947

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	559	Agency Qualifier Code	1	M/Z	ID	2/2
02	1300	Service, Promotion, Allowance, or Charge Code	1	O/Z	ID	4/4
03	248	Allowance or Charge Indicator Code	1	O	ID	1/1

Semantic Notes

01 FA101 Identifies the organization controlling the assignment of financial accounting information.

02 FA102 Identifies the purpose of the accounting allowance or charge information.

FA2 - Accounting Data

To specify the detailed accounting data

TRANSACTION SETS USED IN

180 511 517 527 561 568 810 811 812 814 820 821 842 850 857 858 860 861 867 869 940 945 947

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1196	Breakdown Structure Detail Code	1	M	ID	2/2
02	1195	Financial Information Code	1	M	AN	1/80

FAA - Financial Asset Account

To provide duration, amount and associated information on financial assets

TRANSACTION SETS USED IN
198 201 833

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	569	Account Number Qualifier	1	M/Z	ID	1/3
02	508	Account Number	1	O	AN	1/35
03	373	Date	1	O/Z	DT	8/8
04	782	Monetary Amount	1	O/Z	R	1/18
05	1187	Type of Account Code	1	O/Z	ID	2/2
06	782	Monetary Amount	1	O/Z	R	1/18
07	C001	Composite Unit of Measure	1	X/Z		
08	380	Quantity	1	X/Z	R	1/15
09	374	Date/Time Qualifier	1	O	ID	3/3
10	1250	Date Time Period Format Qualifier	1	X	ID	2/3
11	1251	Date Time Period	1	X	AN	1/35
12	128	Reference Identification Qualifier	1	X/Z	ID	2/3
13	127	Reference Identification	1	X	AN	1/80
14	127	Reference Identification	1	O	AN	1/80
15	875	Maintenance Type Code	1	O/Z	ID	3/3

Syntax Notes

07	P0708
09	C0911
10	P1011
12	P1213

Semantic Notes

01	FAA01 defines the type of financial asset or account.
03	FAA03 defines the date a financial asset account was opened.
04	FAA04 defines the current balance amount or valuation.
05	FAA05 defines the type of account ownership.
06	FAA06 defines the average balance or value of an asset or account.
07	FAA07 defines the time period used in FAA08.
08	FAA08 defines the number of time periods used to figure the average balance.
12	FAA12 defines asset identification type.
15	FAA15 defines the type of verification to be obtained for a financial asset account.

FAC - Facing Direction

To identify the direction the equipment is facing

TRANSACTION SETS USED IN

161

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	206	Equipment Initial	1	M	AN	1/4
02	207	Equipment Number	1	M	AN	1/15
03	40	Equipment Description Code	1	O	ID	2/2
04	1273	Direction Facing Code	1	O	ID	1/1
05	578	Equipment Status Code	1	O	ID	1/2
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

06 FAC06 indicates whether the car is manned or unmanned. A "Y" indicates the car is manned; an "N" indicates the car is unmanned.

FBB - Foreign and Industry Business

To specify amount or percentage of foreign and/or industry business by the trading partner

TRANSACTION SETS USED IN

838

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	26	Country Code	1	M	ID	2/3
02	782	Monetary Amount	1	X	R	1/18
03	954	Percentage as Decimal	1	X	R	1/10
04	66	Identification Code Qualifier	1	X	ID	1/2
05	67	Identification Code	1	X	AN	2/80
06	782	Monetary Amount	1	X	R	1/18
07	954	Percentage as Decimal	1	X	R	1/10

Syntax Notes

02	R0203
04	L040607
04	P0405

Comments

01	FBB01 through FBB03 indicate the total amount of business; FBB04 through FBB07 indicate some portion of that total amount.
04	A specific industry location can be identified in FBB04 and FBB05.

FC - Financial Contribution

To specify the financial contribution information

TRANSACTION SETS USED IN

148 834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1224	Contribution Code	1	M	ID	2/2
02	954	Percentage as Decimal	1	O/Z	R	1/10
03	782	Monetary Amount	1	O/Z	R	1/18
04	1470	Number	1	O/Z	N0	1/9
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

02 FC02 is the percent of salary an employee elects to contribute.

03 FC03 is the dollar amount of the contribution.

04 FC04 is the number of payments per year.

05 FC05 is the billing indicator. A "Y" value indicates that the participant is billed for this type of money; an "N" value indicates that the participant is not billed for this type of money.

FCL - Foreclosure

To specify legal outcome and impact of foreclosure on a lender's claim for mortgage insurance benefits

TRANSACTION SETS USED IN

260

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	605	Deficiency Judgment Code	1	O/Z	ID	1/2
02	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
03	522	Amount Qualifier Code	1	X/Z	ID	1/3
04	782	Monetary Amount	1	X	R	1/18
05	426	Adjustment Reason Code	1	O/Z	ID	2/2

Syntax Notes

03	P0304

Semantic Notes

01	FCL01 indicates whether mortgagee obtained a deficiency judgment against mortgagor.
02	FCL02 indicates whether mortgagee's bid for real estate property was successful. A "Y" indicates that it was; an "N" indicates that it was not.
03	FCL03 and FCL04 indicate the authorized bid amount.
05	FCL05 indicates factors that will cause an adjustment to mortgagee's claim, for example, the sale of the mortgaged real estate property.

FDA - Facility Description

To specify facility description and ownership rights in regard to facility

TRANSACTION SETS USED IN

155

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1078	Property Ownership Rights Code	1	X	ID	1/1
02	352	Description	1	X/Z	AN	1/80
03	1074	Type of Real Estate Asset Code	1	X	ID	2/2
04	1073	Yes/No Condition or Response Code	1	X/Z	ID	1/1
05	380	Quantity	1	X/Z	R	1/15
06	61	Free-form Information	1	O/Z	AN	1/30
07	1429	Construction Type Code	1	X/Z	ID	1/2
08	1429	Construction Type Code	1	O/Z	ID	1/2
09	352	Description	1	O/Z	AN	1/80

Syntax Notes

01	R0102
04	C0403
04	E0405
05	C0503
08	C0807

Semantic Notes

02	FDA02 provides a free-form description of the ownership and the property.
04	FDA04 specifies whether the asset type in FDA03 is plural, singular, or unknown. A "Y" indicates the asset type is plural; an "N" indicates there is only one; and a "U" indicates the quantity is unknown.
05	FDA05 specifies an exact quantity relating to the asset type in FDA03.
06	FDA06 provides free-form information relating to the building floor.
07	FDA07 specifies the primary construction material.
08	FDA08 specifies the secondary construction material.
09	FDA09 provides a free-form description of the construction material.

FGS - Form Group

To provide information for a section or data group in a form or schedule

TRANSACTION SETS USED IN

149 150 151 176 197 199 813 826

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	M/Z	AN	1/20
02	128	Reference Identification Qualifier	1	X/Z	ID	2/3
03	127	Reference Identification	1	X	AN	1/80

Syntax Notes

02 P0203

Semantic Notes

01 FGS01 defines the type of section or data group.

02 FGS02 and FGS03 uniquely identify the section or data group.

FH - Family History

To report information about a person's family health history

TRANSACTION SETS USED IN

186 267

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1069	Individual Relationship Code	1	M	ID	2/2
02	673	Quantity Qualifier	1	X	ID	2/2
03	380	Quantity	1	X	R	1/15
04	1213	Current Health Condition Code	1	O	ID	1/1

Syntax Notes

02 P0203

FIR - Financial Information

To specify the details of financial information transactions

TRANSACTION SETS USED IN

821

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1270	Code List Qualifier Code	1	M	ID	1/3
02	1271	Industry Code	1	M	AN	1/30

04	373	Date	1	O/Z	DT	8/8
05	337	Time	1	X	TM	4/8
06	623	Time Code	1	O	ID	2/2
07	380	Quantity	1	O/Z	R	1/15
08	380	Quantity	1	O/Z	R	1/15
09	478	Credit/Debit Flag Code	1	O	ID	1/1
10	1197	Financial Transaction Status Code	1	O	ID	1/2
11	100	Currency Code	1	X	ID	3/3
12	782	Monetary Amount	1	O	R	1/18

Syntax Notes

06 C0605

12 C1211

Semantic Notes

03 FIR03 is the amount of the transaction.

04 FIR04 is the posted date. (Posted is a financial term that describes when the funds are booked.)

07 FIR07 is the summary number of financial transactions identified in FIR02.

08 FIR08 is the total count of detail items (e.g., number of checks) for the financial transactions summarized in FIR07.

Comments

11 FIR11 and FIR12 are used when the entry upon which the transaction is based is of a different currency than that of the account (e.g., if a $100 U.S. check was drawn on a Canadian dollar account, FIR03 would contain the amount of the Canadian dollar debit to the account, FIR11 would be USD, and FIR12 would be the original transaction amount ($100)).

FIS - Mortgage Loan Fiscal Data

To specify mortgage loan fiscal data when applying for insurance claim benefits

TRANSACTION SETS USED IN

259 260

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	522	Amount Qualifier Code	1	M/Z	ID	1/3
02	782	Monetary Amount	1	O/Z	R	1/18
03	782	Monetary Amount	1	O/Z	R	1/18
04	782	Monetary Amount	1	O/Z	R	1/18

Semantic Notes

01 FIS01 contains codes naming fiscal data items related to a claim for mortgage insurance benefits.

02 FIS02 contains a credit monetary amount described by FIS01.

03 FIS03 contains a debit monetary amount described by FIS01.

04 FIS04 contains an interest monetary amount described by FIS01.

FK - Factor

To explain the route and indicate individual carrier divisions or factors

TRANSACTION SETS USED IN
460 485 853

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	91	Transportation Method/Type Code	1	M	ID	1/2
03	156	State or Province Code	1	X	ID	2/2
04	19	City Name	1	X/Z	AN	2/30
05	638	Rule 260 Junction Code	1	X	ID	1/5
06	694	Percentage Division	1	O	N2	1/5
07	634	Factor Amount	1	O	R	1/15
08	634	Factor Amount	1	O	R	1/15
09	634	Factor Amount	1	O	R	1/15
10	634	Factor Amount	1	O	R	1/15
11	634	Factor Amount	1	O	R	1/15
12	634	Factor Amount	1	O	R	1/15
13	634	Factor Amount	1	O	R	1/15
14	634	Factor Amount	1	O	R	1/15

Syntax Notes

03 P0304
03 E0305

Semantic Notes

01 FK01 is the factor carrier Standard Carrier Alpha Code (SCAC).
04 FK04 is the interline station or city name at which carriers interchange shipments.

Comments

05 FK05 is the Association of American Railroads Rule 260 off-Junction.

FNA - Financial Status Information

To provide financial status information about an applicant for a student loan

TRANSACTION SETS USED IN
135

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
03	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
04	1267	Dependency Status Code	1	O	ID	1/1
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

01 FNA01 indicates if the applicant has a prior student loan. A "Y" indicates yes; an "N" indicates no.

02 FNA02 indicates if applicant ever defaulted on a prior student loan. A "Y" indicates yes; an "N" indicates no.

03 FNA03 indicates if there is a current outstanding student loan balance. A "Y" indicates yes; an "N" indicates no.

05 FNA05 indicates if the applicant is eligible for a supplemental loan. A "Y" indicates yes; an "N" indicates no.

06 FNA06 indicates if the applicant has previously applied for a scholarship. A "Y" indicates yes; an "N" indicates no.

FOB - F.O.B. Related Instructions

To specify transportation instructions relating to shipment

TRANSACTION SETS USED IN

104 250 503 754 810 812 830 832 836 838 840 843 850 852 855 856 857 859 860 861 862 865 866

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	146	Shipment Method of Payment Code	1	M/Z	ID	2/2
02	309	Location Qualifier	1	X/Z	ID	1/2
03	352	Description	1	O	AN	1/80
04	334	Transportation Terms Qualifier Code	1	O	ID	2/2
05	335	Transportation Terms Code	1	X	ID	3/3
06	309	Location Qualifier	1	X/Z	ID	1/2
07	352	Description	1	O	AN	1/80
08	54	Risk of Loss Code	1	O/Z	ID	2/2
09	352	Description	1	X	AN	1/80

Syntax Notes

03	C0302
04	C0405
07	C0706
08	C0809

Semantic Notes

01	FOB01 indicates which party will pay the carrier.
02	FOB02 is the code specifying transportation responsibility location.
06	FOB06 is the code specifying the title passage location.
08	FOB08 is the code specifying the point at which the risk of loss transfers. This may be different than the location specified in FOB02/FOB03 and FOB06/FOB07.

FOS - Field of Study

To provide information about a course or field of study associated with an academic program

TRANSACTION SETS USED IN
130 132 133 138 189 190 194

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1153	Academic Field of Study Level or Type Code	1	M	ID	1/1
02	66	Identification Code Qualifier	1	X/Z	ID	1/2
03	67	Identification Code	1	X	AN	2/80
04	352	Description	1	X	AN	1/80
05	352	Description	1	O	AN	1/80
06	380	Quantity	1	O/Z	R	1/15
07	380	Quantity	1	O/Z	R	1/15

Syntax Notes

02	P0203
02	R0204

Semantic Notes

02	FOS02 and FOS03 indicate the program of study.
06	FOS06 indicates the number of years or fractional parts of a year a course or field of study was studied.
07	FOS07 indicates grade point average in the course or field of study.

FPI - Farming and Processing Information

To specify methods and techniques used by a manufacturer or supplier on the product or raw materials

TRANSACTION SETS USED IN
832

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1865	Growing Method	1	M	ID	3/3
02	1866	Growing Medium	1	O	ID	3/3
03	1867	Growing Light Condition	1	O	ID	3/3
04	739	Measurement Value	1	O/Z	R	1/20
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
10	1868	Flowering Trigger	1	O	ID	3/3
11	1869	Drying Method	1	X	ID	3/3
12	C079	Composite Multiple Language Extended Text Information	1	X/Z		
13	C079	Composite Multiple Language Extended Text Information	1	O/Z		

Syntax Notes

11	E1112

Semantic Notes

04	Specifies the growth cycle, estimated number of weeks a seed takes from germination to vegetation.
05	Indicates whether trimming flower, buds, or leaves was done using trimming machine after the plant is dried (dry machine).
06	Indicates whether trimming flower, buds, or leaves was done using trimming machine before plant is dried (wet machine).
07	Indicates whether trimming flower, buds, or leaves was done by hand before plant is dried (Wet hand).
08	Indicates whether trimming flower, buds, or leaves was done by hand after the plant is dried (dry hand).
09	Indicates whether seeds were feminized while harvesting.
12	Specify other drying method.
13	Specify the curing method, a process that involves aging and drying harvested plant material, meat or fish.

FPT - Financial Participation

Defines nature of participation in financial account

TRANSACTION SETS USED IN

197 265 833

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1187	Type of Account Code	1	M/Z	ID	2/2
02	954	Percentage as Decimal	1	O/Z	R	1/10

Semantic Notes

01 FPT01 describes nature of ownership in financial account.

02 FPT02 defines pro rata participation in financial account.

FQR - Forecast Parameters

To specify parameters pertaining to forecast accuracy measurements.

TRANSACTION SETS USED IN

892

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1779	Forecast Purpose Code	1	M	ID	2/2
02	1780	Forecast Type Code	1	M	ID	2/2
03	380	Quantity	1	M/Z	R	1/15
04	355	Unit or Basis for Measurement Code	1	O/Z	ID	2/2

Semantic Notes

03 FQR03 is the forecast lag value.

04 FQR04 specifies the forecast lag value unit of measure.

FRM - Supporting Documentation

To specify information in response to a codified questionnaire document

TRANSACTION SETS USED IN
837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	M/Z	AN	1/20
02	1073	Yes/No Condition or Response Code	1	X/Z	ID	1/1
03	127	Reference Identification	1	X	AN	1/80
04	373	Date	1	X	DT	8/8
05	332	Percent, Decimal Format	1	X	R	1/6

Syntax Notes

02 R02030405

Semantic Notes

01 FRM01 is the question number on a questionnaire or codified form.

02 FRM02, FRM03, FRM04 and FRM05 are responses which only have meaning in reference to the question identified in FRM01.

Comments

00 The FRM segment can only be used in the context of an identified questionnaire or list of questions. The source of the questions can be identified by an associated segment or by transaction set notes in a particular transaction.

FSA - Tax Advantage Account

To report Health Insurance Tax Advantage Account information

TRANSACTION SETS USED IN
834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	875	Maintenance Type Code	1	M	ID	3/3
02	1202	Flexible Spending Account Selection Code	1	O	ID	1/1
03	1203	Maintenance Reason Code	1	O	ID	2/3
04	C062	Tax Advantage Account Information	1	O/Z		
05	594	Frequency Code	1	O/Z	ID	1/1
06	1204	Plan Coverage Description	1	O	AN	1/50
07	1161	Product Option Code	1	O	ID	1/2
08	1161	Product Option Code	1	O	ID	1/2
09	1161	Product Option Code	1	O	ID	1/2

Semantic Notes

04 FSA04 is the Tax Advantage Account Information.

05 FSA05 specifies the frequency of contribution.

FSH - Fish, Seafood, and Marine Life Product Information

To specify fish, seafood, and marine life category and product information

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1846	Fish, Seafood, and Marine Life Source	1	M	ID	3/3
02	C079	Composite Multiple Language Extended Text Information	1	M/Z		
03	1847	Salt and Moisture Content	1	X	ID	3/3
04	739	Measurement Value	1	X/Z	R	1/20
05	1848	Fish Size Code Designation	1	O	ID	3/3
06	1855	Fish Class and Grade	1	O	ID	3/3
07	1849	Product Packed In	1	O	ID	3/3
08	1850	Made From	1	O	ID	3/3

Syntax Notes

04 C0403

Semantic Notes

02 Specify fish, seafood, and marine life name or the name of surimi, product resembling the real product. Examples: lobster, crab, shellfish, etc.

04 Specify fish moisture content percentage.

FST - Forecast Schedule

To specify the forecasted dates and quantities

TRANSACTION SETS USED IN

830 840 843 862

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M	R	1/15
02	680	Forecast Qualifier	1	M	ID	1/1
03	681	Timing Qualifier	1	M/Z	ID	1/1
04	373	Date	1	M	DT	8/8
05	373	Date	1	O	DT	8/8
06	374	Date/Time Qualifier	1	X	ID	3/3
07	337	Time	1	X	TM	4/8
08	128	Reference Identification Qualifier	1	X	ID	2/3
09	127	Reference Identification	1	X	AN	1/80
10	783	Planning Schedule Type Code	1	O	ID	2/2
11	673	Quantity Qualifier	1	O/Z	ID	2/2
12	426	Adjustment Reason Code	1	X	ID	2/2
13	352	Description	1	O/Z	AN	1/80

Syntax Notes

06	P0607
08	P0809
13	C1312

Semantic Notes

03	If FST03 equals "F" (indicating flexible interval), then FST04 and FST05 are required. FST04 would be used for the start date of the flexible interval and FST05 would be used for the end date of the flexible interval.
03	If FST03 equals "B" (indicating shipping/delivery), then FST04 and FST05 are required. The FST04 will represent the shipping date, and the FST05 will represent the delivery date.
11	FST11 is used to qualify further the forecast quantity in FST01.
13	FST13 is used to clarify further the adjustment reason specified in FST12.

Comments

02	As qualified by FST02 and FST03, FST04 represents either a discrete forecast date, the first date of a forecasted bucket (weekly, monthly, quarterly, etc.) or the start date of a flexible interval.
06	FST06 qualifies the time in FST07. The purpose of the FST07 element is to express the specific time of day in a 24-hour clock to satisfy "just-in-time" requirements. As an alternative, the ship/delivery pattern segment (SDP) may be used to define an approximate time, such as a.m. or p.m.
11	FST11, FST12 and FST13 may be used only when FST02 contains code D (Planning).

FTH - First Time Home Buyer

To capture the first time home buyer information found in section of the Loan Application

TRANSACTION SETS USED IN

201

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
03	1070	Type of Residence Code	1	O	ID	1/1
04	1187	Type of Account Code	1	O	ID	2/2

Semantic Notes

01 If FTH01 is "Y" then FTH02 is required. FTH01 indicates whether the property being purchased will be the mortgagor's primary residence. A "Y" indicates that it will be the primary residence; an "N" indicates that it will not be the primary residence.

02 If FTH02 is "Y", then FTH03 and FTH04 are required. FTH02 indicates whether the mortgagor has had ownership interests in a property within the last 3 years. A "Y" indicates that there has been an ownership interest; an "N" indicates there has not been an ownership interest.

FU1 - Bracket Information

To provide product and bracket information

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	417	Price Bracket Identifier	1	M	AN	1/3
02	740	Range Minimum	1	M	R	1/20
03	741	Range Maximum	1	O	R	1/20
04	350	Assigned Identification	1	O	AN	1/20
05	369	Free-form Description	1	O/Z	AN	1/45
06	187	Weight Qualifier	1	O	ID	1/2
07	355	Unit or Basis for Measurement Code	1	O	ID	2/2
08	1321	Condition Indicator Code	1	O/Z	ID	2/3

Semantic Notes

05 FU105 is a description of the price bracket.

08 FU108 indicates if a price bracket pertains to volume changes.

FU2 - Deal Value

To provide price or rate values pertaining to a product bracket

TRANSACTION SETS USED IN
890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	355	Unit or Basis for Measurement Code	1	M	ID	2/2
02	380	Quantity	1	X	R	1/15
03	782	Monetary Amount	1	X	R	1/18
04	352	Description	1	O/Z	AN	1/80
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
07	335	Transportation Terms Code	1	X	ID	3/3
08	309	Location Qualifier	1	X	ID	1/2
09	66	Identification Code Qualifier	1	X	ID	1/2
10	67	Identification Code	1	X	AN	2/80
11	352	Description	1	X/Z	AN	1/80

Syntax Notes

02	R0203
02	E0203
07	P0708
07	L070911
09	P0910

Semantic Notes

04	FU204 provides information about the deal.
05	FU205 indicates if equipment is included in the deal. A "Y" value indicates that the deal does include equipment; an "N" value indicates that the deal does not include equipment.
06	FU206 indicates if service is included in the deal. A "Y" value indicates that the deal does include services; an "N" value indicates that the deal does not include services.
11	FU211 is the free-form name of the location relevant to FOB.

FU3 - Product Detail

To provide detailed product information

TRANSACTION SETS USED IN
890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1766	Product Name	1	M	AN	1/60
02	355	Unit or Basis for Measurement Code	1	O	ID	2/2
03	1767	Brand Name	1	O	AN	1/60

16	677	Item Depth	1	X	R	1/6
17	355	Unit or Basis for Measurement Code	1	X	ID	2/2
18	183	Volume	1	X	R	1/8

Syntax Notes

04	P0405
08	P080910
11	P1112
13	P1314
15	P1516
17	P1718

Semantic Notes

07	FU307 is the product description.

FU4 - Product Pack Detail

To describe the inner packs of a product

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	235	Product/Service ID Qualifier	1	X	ID	2/2
02	234	Product/Service ID	1	X	AN	1/80
03	356	Pack	1	O	N0	1/6
04	355	Unit or Basis for Measurement Code	1	X	ID	2/2
05	357	Size	1	X	R	1/8
06	810	Inner Pack	1	O	N0	1/6
07	352	Description	1	O/Z	AN	1/80

Syntax Notes

01	P0102
04	P0405

Semantic Notes

07	FU407 provides information about the pack.

FU5 - Co-Product Information

To identify co-product and linked products

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1770	Co-Product Type Code	1	M	ID	2/2
02	1766	Product Name	1	M	AN	1/60
03	235	Product/Service ID Qualifier	1	X	ID	2/2
04	234	Product/Service ID	1	X	AN	1/80
05	235	Product/Service ID Qualifier	1	X	ID	2/2
06	234	Product/Service ID	1	X	AN	1/80
07	235	Product/Service ID Qualifier	1	X	ID	2/2
08	234	Product/Service ID	1	X	AN	1/80
09	1767	Brand Name	1	O	AN	1/60
10	1768	Product Label	1	O	AN	1/60
11	352	Description	1	O/Z	AN	1/80
12	98	Entity Identifier Code	1	X	ID	2/3
13	93	Name	1	X	AN	1/60

Syntax Notes

03	P0304
05	P0506
07	P0708
12	P1213

Semantic Notes

11	FU511 provides information about the co-product.

FX2 - Product Classification

To provide information about a product classification relevant to a program

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	23	Commodity Code Qualifier	1	M	ID	1/2
03	22	Commodity Code	1	X	AN	1/30
04	352	Description	1	X/Z	AN	1/80
05	352	Description	1	O/Z	AN	1/80

Syntax Notes

03 R0304

Semantic Notes

01 FX201 indicates if the product class is included or excluded. A 'Y' indicates that the product class is included. An 'N' indicates that the product class is excluded.

04 FX204 is the product classification name.

05 FX205 is a text description of the product class.

FX3 - Product Information

To provide information relevant to a product

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	235	Product/Service ID Qualifier	1	X	ID	2/2
03	234	Product/Service ID	1	X	AN	1/80
04	235	Product/Service ID Qualifier	1	X	ID	2/2
05	234	Product/Service ID	1	X	AN	1/80
06	235	Product/Service ID Qualifier	1	X	ID	2/2
07	234	Product/Service ID	1	X	AN	1/80
08	350	Assigned Identification	1	O	AN	1/20
09	352	Description	1	O/Z	AN	1/80
10	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
11	1321	Condition Indicator Code	1	O/Z	ID	2/3

Syntax Notes

02	P0203
04	P0405
06	P0607

Semantic Notes

01	FX301 indicates if the product is included or excluded. A 'Y' indicates that the product is included. An 'N' indicates that the product is excluded.
09	FX309 is the product description.
10	FX310 indicates if this product is required for the program. A 'Y' indicates that the product is required. An 'N' indicates that the product is not required.
11	FX311 indicates if product substitution is allowed.

FX4 - Equipment Information

To provide details about equipment

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	1230	Type of Product Service Code	1	O	ID	2/4
03	235	Product/Service ID Qualifier	1	X	ID	2/2
04	234	Product/Service ID	1	X	AN	1/80
05	235	Product/Service ID Qualifier	1	X	ID	2/2
06	234	Product/Service ID	1	X	AN	1/80
07	352	Description	1	X/Z	AN	1/80

Syntax Notes

03	P0304
03	R0307
05	P0506

Semantic Notes

01	FX401 indicates if equipment is included or excluded from the program. A 'Y' indicates that the equipment is included in the program. An 'N' indicates that the equipment is not included in the program.
07	FX407 allows for a description of the equipment.

FX5 - Services Information

To identify a provided service

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	875	Maintenance Type Code	1	M	ID	3/3
03	235	Product/Service ID Qualifier	1	X	ID	2/2
04	234	Product/Service ID	1	X	AN	1/80
05	235	Product/Service ID Qualifier	1	X	ID	2/2
06	234	Product/Service ID	1	X	AN	1/80
07	352	Description	1	X/Z	AN	1/80

Syntax Notes

03	P0304
03	R0307
05	P0506

Semantic Notes

01	FX501 indicates if a service is included or excluded from the program. A 'Y' indicates that a service is included in the program. An 'N' indicates that a service is not included in the program.
07	FX507 is the service name or a description of the service.

FX6 - Brand Label

To identify brand labels

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	1767	Brand Name	1	X	AN	1/60
03	352	Description	1	X/Z	AN	1/80

Syntax Notes

02 R0203

Semantic Notes

01 FX601 indicates if the product brand is included or excluded. A 'Y' indicates that the brand is included. An 'N' indicates that the brand is excluded.

03 FX603 is the brand description.

FX7 - Pack and Size

To identify package and sizes

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	673	Quantity Qualifier	1	X	ID	2/2
03	380	Quantity	1	X	R	1/15
04	355	Unit or Basis for Measurement Code	1	X	ID	2/2
05	356	Pack	1	O	N0	1/6
06	810	Inner Pack	1	O	N0	1/6
07	355	Unit or Basis for Measurement Code	1	X	ID	2/2
08	357	Size	1	X	R	1/8
09	352	Description	1	O/Z	AN	1/80

Syntax Notes

02 P020304

07 P0708

Semantic Notes

01 FX701 indicates if a specified product's pack is included or excluded. A 'Y' indicates that the pack is included. An 'N' indicates that the pack is excluded.

09 FX709 contains information about the pack and size.

G01 - Invoice Identification

To transmit identifying dates and numbers for this transaction set

TRANSACTION SETS USED IN
880 881

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	M/Z	DT	8/8
02	76	Invoice Number	1	M	AN	1/22
03	373	Date	1	O/Z	DT	8/8
04	324	Purchase Order Number	1	O	AN	1/22
05	424	Vendor Order Number	1	O	AN	1/22
06	474	Master Reference (Link) Number	1	X	AN	1/22
07	472	Link Sequence Number	1	X	N0	6/6
08	640	Transaction Type Code	1	O	ID	2/2

Syntax Notes

06 P0607

Semantic Notes

01 G0101 is the invoice issue date.
03 G0103 is the date assigned by the purchaser to the purchase order.

G05 - Total Shipment Information

To provide totals relating to the shipment

TRANSACTION SETS USED IN

163 250 857

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	382	Number of Units Shipped	1	X	R	1/10
02	355	Unit or Basis for Measurement Code	1	X	ID	2/2
03	81	Weight	1	X	R	1/10
04	355	Unit or Basis for Measurement Code	1	X	ID	2/2
05	183	Volume	1	X	R	1/8
06	355	Unit or Basis for Measurement Code	1	X	ID	2/2
07	80	Lading Quantity	1	X	N0	1/7
08	355	Unit or Basis for Measurement Code	1	X	ID	2/2

Syntax Notes

01	P0102
01	R010305
03	P0304
05	P0506
07	P0708

G07 - Carrier Information

To identify carrier equipment and condition of shipment

TRANSACTION SETS USED IN

854

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	206	Equipment Initial	1	O	AN	1/4
02	207	Equipment Number	1	O	AN	1/15
03	225	Seal Number	1	O	AN	1/15
04	225	Seal Number	1	O	AN	1/15
05	407	Seal Status Code	1	O	ID	2/2
06	408	Temperature	1	O	R	1/4

Comments

06	G0706 is the temperature of shipment at receipt.

G08 - Pallet Receipt Disposition

To indicate quantity, condition, and disposition of pallets received

TRANSACTION SETS USED IN

944

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	409	Quantity of Pallets Received	1	O	N0	1/3
02	410	Quantity of Pallets Returned	1	O	N0	1/3
03	411	Quantity Contested	1	X	R	1/7
04	412	Receiving Condition Code	1	X	ID	2/2

Syntax Notes

03	P0304

G1 - Shipment Type Information

To specify the General Commodity (GC) code and any required special indicators for the shipment

TRANSACTION SETS USED IN

304 312 326

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	311	Shipment Type Code	1	M	ID	1/2
02	312	Special Indicator Code	1	O	ID	1/1
03	312	Special Indicator Code	1	O	ID	1/1

G11 - Coupon Reporting Specifications

To specify coupon reporting requirements

TRANSACTION SETS USED IN

887

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1178	Reporting Structure Identifier	1	M	AN	1/3
02	729	Category	1	M/Z	AN	1/6
03	729	Category	1	O	AN	1/6
04	729	Category	1	O	AN	1/6
05	729	Category	1	O	AN	1/6
06	729	Category	1	O	AN	1/6
07	128	Reference Identification Qualifier	1	X	ID	2/3
08	127	Reference Identification	1	X	AN	1/80
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
10	369	Free-form Description	1	O/Z	AN	1/45

Syntax Notes

07 P0708

Semantic Notes

02 G1102 through G1106 are mutually defined reporting categories.

09 When G1109 contains code N, the categories identified in G1102 through G1106 are to be excluded for reporting purposes.

10 G1110 describes categories in G1102 through G1106.

G12 - Coupon Physical Characteristics

To describe physical characteristics and placement of coupons

TRANSACTION SETS USED IN

887

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	82	Length	1	X	R	1/8
02	189	Width	1	X	R	1/8
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2
04	380	Quantity	1	O/Z	R	1/15
05	422	Promotion Condition Code	1	O	ID	2/2
06	945	Position Code	1	X/Z	ID	2/2
07	945	Position Code	1	O/Z	ID	2/2

Syntax Notes

01	P010203
07	C0706

Semantic Notes

04	G1204 is the number of coupons per advertisement.
06	G1206 is the position of the coupon within the advertisement.
07	G1207 is the location of the coupon within the distribution medium.

G13 - Store Size Attributes

To indicate the type and size characteristics of a retail store

TRANSACTION SETS USED IN
885

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	687	Class of Trade Code	1	M	ID	2/2
02	380	Quantity	1	X/Z	R	1/15
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2
04	1470	Number	1	O/Z	N0	1/9
05	782	Monetary Amount	1	X	R	1/18
06	522	Amount Qualifier Code	1	O	ID	1/3

Syntax Notes

02	P0203
06	C0605

Semantic Notes

02	G1302 is the size of the store in units defined in G1303, usually in square feet.
04	G1304 is the number of check-out lanes in the store.

G14 - Coupon Special Processing

To describe special processing associated with coupons

TRANSACTION SETS USED IN

887

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1300	Service, Promotion, Allowance, or Charge Code	1	M	ID	4/4
02	1300	Service, Promotion, Allowance, or Charge Code	1	O	ID	4/4

G15 - Coupon Distribution

To specify the number of coupons and method of circulation

TRANSACTION SETS USED IN

887

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M/Z	R	1/15
02	1113	Coupon Distribution Media Code	1	M	ID	2/2
03	1522	Coupon Type Code	1	O	ID	1/2
04	352	Description	1	O	AN	1/80

Semantic Notes

01 G1501 is the number of coupons circulated.

G17 - Item Detail - Invoice

To specify the basic and most frequently used line item data for the invoice and related transactions

TRANSACTION SETS USED IN

880

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	358	Quantity Invoiced	1	M	R	1/15
02	355	Unit or Basis for Measurement Code	1	M	ID	2/2
03	237	Item List Cost	1	X	R	1/9
04	1470	Number	1	O/Z	N0	1/9
05	235	Product/Service ID Qualifier	1	M	ID	2/2
06	234	Product/Service ID	1	M	AN	1/80
07	235	Product/Service ID Qualifier	1	X	ID	2/2
08	234	Product/Service ID	1	X	AN	1/80
09	417	Price Bracket Identifier	1	O	AN	1/3
10	382	Number of Units Shipped	1	X	R	1/10
11	355	Unit or Basis for Measurement Code	1	X	ID	2/2
12	439	Price List Number	1	O	AN	1/16
13	440	Price List Issue Number	1	O	AN	1/16
14	782	Monetary Amount	1	X/Z	R	1/18

Syntax Notes

03 R0314
07 P0708
10 P1011

Semantic Notes

04 G1704 is the Coupon Offer Number.
14 G1714 contains the cumulative monetary amount of unsaleable merchandise.

Comments

02 G1702 qualifies G1701.

G18 - Store Category Size

To identify the shelf size of a department or product category within a retail store

TRANSACTION SETS USED IN

885

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	98	Entity Identifier Code	1	X/Z	ID	2/3
02	1271	Industry Code	1	X/Z	AN	1/30
03	82	Length	1	X/Z	R	1/8
04	355	Unit or Basis for Measurement Code	1	X	ID	2/2

Syntax Notes

01 E0102
03 P0304

Semantic Notes

01 G1801 identifies the store department.
02 G1802 is the product category code available from the Uniform Code Council (UCC).
03 G1803 is the linear length or running length of the department or product category.

G19 - Line Item Detail - Quantity/Unit of Measure/Price Differences

To specify details when differences exist between 1) Quantities ordered/quantities shipped 2) Units of measurement 3) Pricing 4) Coupons redeemed/validated

TRANSACTION SETS USED IN

880

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	382	Number of Units Shipped	1	X	R	1/10
02	355	Unit or Basis for Measurement Code	1	X	ID	2/2
03	383	Quantity Difference	1	X	R	1/9
04	368	Shipment/Order Status Code	1	X	ID	2/2
05	381	Price Reason Code	1	O	ID	1/1
06	445	Terms Exception Code	1	O	ID	2/2
07	438	U.P.C. Case Code	1	O	AN	12/12
08	235	Product/Service ID Qualifier	1	X	ID	2/2
09	234	Product/Service ID	1	X	AN	1/80

Syntax Notes

01	P0102
03	P0304
08	P0809

Comments

04	When G1904 contains "IS", G1907, G1908, and G1909, refer to the original item ordered.

G2 - Beyond Routing

To specify routing of a beyond point

TRANSACTION SETS USED IN

304 311 312

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	312	Special Indicator Code	1	M	ID	1/1
02	352	Description	1	O/Z	AN	1/80

Semantic Notes

02 G202 is the free-form routing description of beyond point.

G20 - Item Packing Detail

To specify packing details of the items shipped

TRANSACTION SETS USED IN

325 879 880

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	356	Pack	1	O	N0	1/6
02	357	Size	1	X	R	1/8
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2
04	81	Weight	1	X	R	1/10
05	355	Unit or Basis for Measurement Code	1	X	ID	2/2
06	183	Volume	1	X	R	1/8
07	355	Unit or Basis for Measurement Code	1	X	ID	2/2
08	397	Color	1	O	AN	1/10
09	810	Inner Pack	1	O	N0	1/6

Syntax Notes

02	P0203
04	P0405
06	P0607

G21 - Product Information

To specify authorize/de-authorize code and product information

TRANSACTION SETS USED IN

878

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	287	Authorize/ De-Authorize Code	1	M	ID	1/1
02	373	Date	1	M	DT	8/8
03	766	U.P.C./EAN Consumer Package Code	1	M	AN	12/12
04	438	U.P.C. Case Code	1	O	AN	12/12
05	356	Pack	1	O	N0	1/6
06	212	Unit Price	1	O	R	1/17
07	235	Product/Service ID Qualifier	1	X	ID	2/2
08	234	Product/Service ID	1	X	AN	1/80
09	810	Inner Pack	1	O	N0	1/6
10	1727	Item Distribution Code	1	O	ID	2/2

Syntax Notes

07 P0708

G22 - Pre-Pricing Information

To specify pre-pricing information

TRANSACTION SETS USED IN
878 879 888 889 894 895

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	288	Pre-priced Option Code	1	M/Z	ID	1/1
02	420	Price New, Suggested Retail	1	O	N2	2/7
03	289	Multiple Price Quantity	1	O	N0	1/2
04	3	Free-form Message	1	O	AN	1/60
05	373	Date	1	O/Z	DT	8/8

Semantic Notes

01 If G2201 equals "A", then G2202 and G2203 are required.
01 If G2201 equals "Y", then G2202 is required.
05 G2205 is the effective date of the price information.

Comments

01 If G2201 equals "Z" or G2201 equals "N", then neither G2202 nor G2203 are required.

G23 - Terms of Sale

To specify the terms of sale

TRANSACTION SETS USED IN
875 876 880 882 888 889 894 895

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	336	Terms Type Code	1	M	ID	2/2
02	333	Terms Basis Date Code	1	M	ID	1/2
03	282	Terms Start Date	1	O	DT	8/8
04	283	Terms Due Date Qualifier	1	O	ID	2/2
05	338	Terms Discount Percent	1	O	R	1/6
06	370	Terms Discount Due Date	1	O	DT	8/8
07	351	Terms Discount Days Due	1	O	N0	1/3
08	446	Terms Net Due Date	1	X	DT	8/8
09	386	Terms Net Days	1	X	N0	1/3
10	362	Terms Discount Amount	1	O	N2	1/10
11	391	Discounted Amount Due	1	O	N2	1/10
12	390	Amount Subject to Terms Discount	1	O	N2	1/10
13	343	Installment Total Invoice Amount Due	1	O	N2	1/10
14	342	Percent of Invoice Payable	1	O	R	1/5
15	3	Free-form Message	1	O	AN	1/60
16	713	Installment Group Indicator	1	O	N0	2/2

Syntax Notes

08 R0809

Comments

00 The G23 segment may be used for the detail or the total transaction set level. Refer to the transaction set assumptions for details on proper usage.

01 If G2301 equals "04" (deferred or installment) then either G2313 or G2314 is required and the data in the segment pertains only to the portion of the invoice described in G2313 or G2314. If G2301 equals "11" (elective) then G2304 is required. If G2301 is not equal to "05"' (discount not applicable) then (G2305 or G2310) and (G2306 or G2307) is required. If G2301 equals "ZZ" (other) then G2315 is required. Multiple use of this segment when G2301 equals "04" (deferred or installment) always implies an "AND" relationship. When G2301 equals "06" (mixed) or "11" (elective) an "OR" relationship is always implied.

10 G2310 is a memo figure requiring specific payment performance and therefore should not be negative.

16 When elective terms are offered in a deferred or installment situation, G2316 (Installment Group Indicator - DE 713) must be used to properly group the terms within each installment.

G24 - Promotion Reference

To reference a promotion number related to the price change

TRANSACTION SETS USED IN

888

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	341	Allowance or Charge Number	1	M	AN	1/16

G25 - F.O.B. Information

To transmit information pertaining to method of freight payment and transfer of title

TRANSACTION SETS USED IN

880 882

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	146	Shipment Method of Payment Code	1	M	ID	2/2
02	433	F.O.B. Point Code	1	M	ID	2/2
03	434	F.O.B. Point	1	O	AN	1/30

G26 - Pricing Conditions

To specify vendor's conditions related to price change

TRANSACTION SETS USED IN

832 879 888

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	290	Price Condition Code	1	M	ID	2/2
02	432	Date Qualifier	1	X	ID	2/2
03	373	Date	1	X	DT	8/8
04	292	Quantity Basis Code	1	X	ID	3/3
05	380	Quantity	1	X	R	1/15
06	355	Unit or Basis for Measurement Code	1	X	ID	2/2

Syntax Notes

02	P0203
04	P040506

G28 - Line Item Numbers

To provide basic product identification information

TRANSACTION SETS USED IN
877 879 886 887

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	438	U.P.C. Case Code	1	X	AN	12/12
02	766	U.P.C./EAN Consumer Package Code	1	X	AN	12/12
03	235	Product/Service ID Qualifier	1	X	ID	2/2
04	234	Product/Service ID	1	X	AN	1/80
05	235	Product/Service ID Qualifier	1	X	ID	2/2
06	234	Product/Service ID	1	X	AN	1/80

Syntax Notes

01	R010203
03	P0304
05	P0506

G29 - Store Display Information

To specify product display information for a retail store

TRANSACTION SETS USED IN
885 886

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1520	Display Type Code	1	M	ID	1/2
02	380	Quantity	1	X/Z	R	1/15
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2

Syntax Notes

02 P0203

Semantic Notes

02 G2902 is the number of displays or quantity of product displayed for the type specified in G2901.

G3 - Compensation Information

To convey brokerage, freight forwarder compensation, and other compensation information related to shipments

TRANSACTION SETS USED IN

304 310

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	315	Compensation Paid	1	O	R	2/5
02	317	Total Compensation Amount	1	M	N0	3/10
03	93	Name	1	O	AN	1/60
04	201	Business Transaction Status Code	1	O	ID	1/3
05	782	Monetary Amount	1	O	R	1/18
06	73	Compensation Qualifier	1	O	ID	1/1

Comments

05 G305 is the amount on which compensation is based.

G30 - Retail Account Marketing Types

To identify the type and number of marketing equipment or programs in a retail account

TRANSACTION SETS USED IN
885

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1521	Marketing Type Code	1	M	ID	1/2
02	1470	Number	1	O/Z	N0	1/9

Semantic Notes

02 G3002 is the number of displays for the type specified in G3001.

G31 - Total Invoice Quantity

To specify summary details of total items shipped in terms of quantity, weight, and volume, and to specify payment method

TRANSACTION SETS USED IN

880 882

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	382	Number of Units Shipped	1	M	R	1/10
02	355	Unit or Basis for Measurement Code	1	M	ID	2/2
03	81	Weight	1	X	R	1/10
04	355	Unit or Basis for Measurement Code	1	X	ID	2/2
05	183	Volume	1	X	R	1/8
06	355	Unit or Basis for Measurement Code	1	X	ID	2/2
07	398	Order Sizing Factor	1	O	R	1/10
08	417	Price Bracket Identifier	1	O	AN	1/3
09	107	Payment Method Type Code	1	O	ID	1/2
10	380	Quantity	1	O/Z	R	1/15
11	81	Weight	1	O/Z	R	1/10

Syntax Notes

03 P0304
05 P0506
07 C0704

Semantic Notes

10 G3110 should only be used to express the quantity of third party pallets
11 G3111 is the gross weight of third party pallets in pounds.

Comments

02 G3102 qualifies G3101.

G32 - Survey Question Response

To provide information in response to ad hoc survey questions

TRANSACTION SETS USED IN

200 886

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

03	782	Monetary Amount	1	X	R	1/18
04	373	Date	1	X	DT	8/8
05	352	Description	1	X	AN	1/80

Syntax Notes

02 R02030405

Semantic Notes

01 G3201 is the ad hoc survey question number.

02 G3202, G3203, G3204 and G3205 are responses which only have meaning in reference to the ad hoc survey question.

G33 - Total Dollars Summary

To specify the total invoice amount, including charges less allowances, before terms discount

TRANSACTION SETS USED IN

880 882

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	610	Amount	1	M	N2	1/15

G35 - Advertising Feature Information

To specify advertising type and coupon information

TRANSACTION SETS USED IN

886

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	422	Promotion Condition Code	1	X	ID	2/2
02	1522	Coupon Type Code	1	X	ID	1/2
03	782	Monetary Amount	1	O/Z	R	1/18

Syntax Notes

03 L030102

Semantic Notes

03 G3503 is the value of the coupon.

G36 - Price List Reference

To provide price list references and descriptions

TRANSACTION SETS USED IN
832 879 888

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	439	Price List Number	1	M	AN	1/16
02	440	Price List Issue Number	1	O	AN	1/16
03	373	Date	1	M/Z	DT	8/8
04	291	Price Condition Applies Code	1	O	ID	3/3

Semantic Notes

03 G3603 is the issue date of the price list.

G37 - Labor Activity

To indicate the type of activity performed and the start and end times for the activity

TRANSACTION SETS USED IN
886

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1523	Labor Activity Code	1	M	ID	1/2
02	337	Time	1	X/Z	TM	4/8
03	337	Time	1	O/Z	TM	4/8

Syntax Notes

03 C0302

Semantic Notes

02 G3702 is the start time of the activity.
03 G3703 is the end time of the activity.

G38 - Claim Payment Information

To indicate the payment amount and reason for disposal of unsalable product

TRANSACTION SETS USED IN

180

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	782	Monetary Amount	1	M/Z	R	1/18
02	591	Payment Method Code	1	O	ID	3/3
03	1292	Returns Disposition Code	1	O	ID	2/2

Semantic Notes

01 G3801 is the amount of payment for the claim.

G39 - Item Characteristics - Vendor's Selling Unit

To identify a vendor's selling unit or to provide physical characteristics relative to a vendor's selling unit

TRANSACTION SETS USED IN
832 888 893

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	438	U.P.C. Case Code	1	X	AN	12/12

Syntax Notes

01	R0102
02	P0203
05	P050607
08	P0809
10	P1011

12 P1213
14 P1415
18 P1819
23 P2324
25 P2526

G4 - Scale Identification

To identify the scale type and the location and time a shipment is weighed

TRANSACTION SETS USED IN
410 417 426 440 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	19	City Name	1	M	AN	2/30
02	156	State or Province Code	1	M	ID	2/2
03	93	Name	1	O/Z	AN	1/60
04	373	Date	1	M/Z	DT	8/8
05	337	Time	1	O/Z	TM	4/8
06	570	Scale Type Code	1	O	ID	1/1

Semantic Notes

03 G403 is the scaling company's name.
04 G404 is the event date.
05 G405 is the event time.

G40 - Bracket Price

To provide a vendor's pricing structure associated with a specific line item

TRANSACTION SETS USED IN
832 879 888 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	417	Price Bracket Identifier	1	O	AN	1/3
02	418	Item List Cost - New	1	M	R	1/9
03	419	Item List Cost - Old	1	O	R	1/9
04	369	Free-form Description	1	O	AN	1/45
05	420	Price New, Suggested Retail	1	O	N2	2/7
06	421	Price Old, Suggested Retail	1	O	N2	2/7
07	355	Unit or Basis for Measurement Code	1	O	ID	2/2
08	236	Price Identifier Code	1	O	ID	3/3
09	1470	Number	1	O/Z	N0	1/9

Semantic Notes

09 G4009 is the shipping unit to billing unit conversion factor.

Comments

07 G4007 is the invoicing unit of measure for the costs specified in G4002 and G4003.

G42 - Promotion Announcement Identification

To identify promotion activities between trading partners

TRANSACTION SETS USED IN

889

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	423	Promotion Status Code	1	M	ID	2/2
02	341	Allowance or Charge Number	1	M	AN	1/16
03	640	Transaction Type Code	1	O	ID	2/2

G43 - Promotion/Price List Area

To specify the geographic area in which a promotion or price is in effect

TRANSACTION SETS USED IN

832 879 883 887 888 889 893 896

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	771	Market Area Code Qualifier	1	M/Z	ID	1/3
02	767	Market Area Code Identifier	1	O	AN	1/13
03	352	Description	1	O	AN	1/80
04	687	Class of Trade Code	1	O	ID	2/2

Semantic Notes

01 If G4301 is "001", "002", or "004", then G4302 is required. If G4301 is "003", then G4303 is required.

G45 - Line Item Detail - Promotion

To provide information for a line item

TRANSACTION SETS USED IN
889

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	438	U.P.C. Case Code	1	X	AN	12/12
02	766	U.P.C./EAN Consumer Package Code	1	X	AN	12/12
03	341	Allowance or Charge Number	1	O	AN	1/16
04	769	Exception Number	1	O	AN	1/16

15	234	Product/Service ID	1	X	AN	1/80
16	235	Product/Service ID Qualifier	1	X	ID	2/2
17	234	Product/Service ID	1	X	AN	1/80

Syntax Notes

01	R010205
05	P0506
08	P0809
10	P1011
14	P1415
16	P1617

Semantic Notes

11 G4511 is the date related to the next promotion of this item.

G46 - Promotion Allowance/Charge

To specify unit amount and method of payment for a charge/allowance for a line item

TRANSACTION SETS USED IN
879 888 889

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	340	Allowance or Charge Code	1	M	ID	1/3
02	331	Allowance or Charge Method of Handling Code	1	M	ID	2/2
03	359	Allowance or Charge Rate	1	X	R	1/15
04	355	Unit or Basis for Measurement Code	1	X	ID	2/2
05	610	Amount	1	X/Z	N2	1/15
06	378	Allowance/Charge Percent Qualifier	1	X	ID	1/1
07	332	Percent, Decimal Format	1	X/Z	R	1/6
08	769	Exception Number	1	O	AN	1/16
09	770	Option Number	1	O	AN	1/20
10	352	Description	1	O	AN	1/80
11	236	Price Identifier Code	1	O	ID	3/3
12	1470	Number	1	O/Z	N0	1/9

Syntax Notes

03 E030506
03 P0304
06 P0607

Semantic Notes

05 G4605 indicates the total dollar amount for the allowance or charge.
07 G4607 is the allowance or charge percent.
12 G4612 is the shipping unit to billing unit conversion factor.

Comments

01 If G4601 equals "1", then G4603, G4605, and G4607 must be omitted.

G47 - Statement Identification

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN

104 110 882

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	M/Z	DT	8/8
02	613	Statement Number	1	M	AN	1/16

Semantic Notes

01 G4701 is the statement date.

G48 - Statement/Invoice Identification

To uniquely identify an invoice or adjustment

TRANSACTION SETS USED IN
882

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	76	Invoice Number	1	X	AN	1/22
02	373	Date	1	X/Z	DT	8/8
03	614	Store Number	1	O	AN	1/10
04	373	Date	1	O/Z	DT	8/8
05	324	Purchase Order Number	1	O	AN	1/22
06	424	Vendor Order Number	1	O	AN	1/22
07	128	Reference Identification Qualifier	1	X	ID	2/3
08	127	Reference Identification	1	X	AN	1/80
09	373	Date	1	O	DT	8/8

Syntax Notes

01	R0107
01	P0102
07	P0708

Semantic Notes

02	G4802 is the invoice issue date.
04	G4804 is the date assigned by the purchaser to the purchase order.

G49 - Statement Total

To provide essential billing totals to the purchaser

TRANSACTION SETS USED IN

882

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	610	Amount	1	M/Z	N2	1/15
02	610	Amount	1	O/Z	N2	1/15
03	610	Amount	1	O/Z	N2	1/15

Semantic Notes

01 G4901 is the total monetary amount for all changes billed on a statement since issuance of the last statement.

02 G4902 is the monetary amount for all unpaid charges prior to issuance of the current transaction.

03 G4903 identifies the total monetary amount currently due the issuer of the charges.

G5 - Scale Information

To transmit scale information

TRANSACTION SETS USED IN
440

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	206	Equipment Initial	1	M	AN	1/4
02	207	Equipment Number	1	M	AN	1/15
03	186	Waybill Number	1	X	N0	1/6
04	373	Date	1	X/Z	DT	8/8
05	81	Weight	1	M	R	1/10
06	187	Weight Qualifier	1	M	ID	1/2
07	167	Tare Weight	1	X	N0	3/8
08	571	Tare Qualifier Code	1	X	ID	1/1
09	232	Weight Allowance	1	X	N0	2/6
10	572	Weight Allowance Type Code	1	X	ID	1/1

14	22	Commodity Code	1	O	AN	1/30
15	128	Reference Identification Qualifier	1	X	ID	2/3
16	127	Reference Identification	1	X	AN	1/80
17	373	Date	1	O/Z	DT	8/8

Syntax Notes

03	P0304
07	P0708
09	P0910
11	P1112
15	P1516

Semantic Notes

04	G504 is the waybill date.
17	G517 is the date associated with the reference identification.

G50 - Purchase Order Identification

To transmit identifying dates and numbers for this transaction set

TRANSACTION SETS USED IN
875

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	473	Order Status Code	1	M	ID	1/1
02	373	Date	1	M/Z	DT	8/8
03	324	Purchase Order Number	1	M	AN	1/22
04	441	Tax Exempt Code	1	O	ID	1/1
05	474	Master Reference (Link) Number	1	X	AN	1/22
06	472	Link Sequence Number	1	X	N0	6/6
07	92	Purchase Order Type Code	1	O	ID	2/2

Syntax Notes

05 P0506

Semantic Notes

02 G5002 is the date assigned by the purchaser to the purchase order.

G51 - Free Goods/Product Condition

To indicate quantity of free goods and under what conditions free goods are earned

TRANSACTION SETS USED IN
887 889

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	773	Quantity Free	1	X	N0	1/9
02	355	Unit or Basis for Measurement Code	1	X	ID	2/2
03	768	Quantity Must Purchase	1	M	N0	1/9
04	355	Unit or Basis for Measurement Code	1	M	ID	2/2
05	438	U.P.C. Case Code	1	O	AN	12/12
06	766	U.P.C./EAN Consumer Package Code	1	O	AN	12/12
07	235	Product/Service ID Qualifier	1	X	ID	2/2
08	234	Product/Service ID	1	X	AN	1/80

Syntax Notes

01	P0102
07	P0708

Comments

02	G5102 qualifies G5101.
04	G5104 qualifies G5103.

G53 - Maintenance Type

To identify the specific type of item maintenance

TRANSACTION SETS USED IN

820 823 832 840 845 846 860 865 885 888 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	875	Maintenance Type Code	1	M	ID	3/3

G54 - Module Description

To describe the UPC Case Codes in a module

TRANSACTION SETS USED IN
832 888

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M	R	1/15
02	355	Unit or Basis for Measurement Code	1	M	ID	2/2

05 P0506
07 P0708
09 P0910
11 P1112
14 P1415
23 P232425
26 P262728
29 P2930

Semantic Notes

21 G5521 indicates if the product is pre-priced. Code "Y" indicates the product is pre-priced. Code "N" indicates the product is not pre-priced.

Comments

16 G5516 is limited to 16 characters.

G61 - Contact

To identify a person or office to whom communications should be directed

TRANSACTION SETS USED IN

163 196 204 211 212 213 215 216 217 219 222 227 249 251 273 300 301 304 310 317 511 517 527 536

11	355	Unit or Basis for Measurement Code	1	X	ID	2/2
12	439	Price List Number	1	O	AN	1/16
13	440	Price List Issue Number	1	O	AN	1/16
14	857	Pre-Price Quantity Designator	1	O	N6	1/9
15	858	Retail Pre-Price	1	O	R	1/9

Syntax Notes

04	R0405
05	P0506
07	P0708
10	P1011

Semantic Notes

01	G801 is quantity ordered.

Comments

02	G6802 qualifies G6801.

G69 - Line Item Detail - Description

To describe an item in free-form format

TRANSACTION SETS USED IN

219 220 511 527 536 875 876 877 878 879 880 888 889 893 940 943 944 945 947

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	369	Free-form Description	1	M	AN	1/45

G70 - Line Item Detail - Miscellaneous

To provide for miscellaneous information relative to a line item

TRANSACTION SETS USED IN
875 876

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	356	Pack	1	O	N0	1/6
02	357	Size	1	X	R	1/8
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2
04	444	Purchase Order Instruction Code	1	O	ID	2/2
05	381	Price Reason Code	1	O	ID	1/1
06	445	Terms Exception Code	1	O	ID	2/2
07	441	Tax Exempt Code	1	O	ID	1/1
08	397	Color	1	O	AN	1/10
09	416	Pallet Blockand Tiers	1	O	N0	6/6
10	810	Inner Pack	1	O	N0	1/6

Syntax Notes

02		P0203

G72 - Allowance or Charge

To specify allowances, charges, or services

TRANSACTION SETS USED IN

875 876 878 880 881 882 894 895 945

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	340	Allowance or Charge Code	1	M	ID	1/3
02	331	Allowance or Charge Method of Handling Code	1	M	ID	2/2
03	341	Allowance or Charge Number	1	X	AN	1/16
04	769	Exception Number	1	O	AN	1/16
05	359	Allowance or Charge Rate	1	X	R	1/15
06	339	Allowance or Charge Quantity	1	X	R	1/10
07	355	Unit or Basis for Measurement Code	1	X	ID	2/2
08	360	Allowance or Charge Total Amount	1	X	N2	1/15
09	332	Percent, Decimal Format	1	X/Z	R	1/6
10	828	Dollar Basis For Percent	1	X	R	1/9
11	770	Option Number	1	O	AN	1/20
12	352	Description	1	O/Z	AN	1/80

Syntax Notes

03	R03050809
05	E050809
06	P0607
09	P0910
11	C1103

Semantic Notes

09	G7209 is the allowance or charge percent.
12	If the code used in G7201 does not sufficiently describe the allowance or charge, use of G7212 is recommended.

G73 - Allowance or Charge Description

To describe the allowance or charge in free-form format

TRANSACTION SETS USED IN

875 876 880 881 882

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	369	Free-form Description	1	M	AN	1/45

Comments

00	Use of the G73 segment requires concurrent use of a corresponding allowance/charge segment.

G76 - Total Purchase Order

To specify summary details of total items shipped in terms of quantity, weight, and volume, and to specify payment method

TRANSACTION SETS USED IN
875 876

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M/Z	R	1/15
02	355	Unit or Basis for Measurement Code	1	M	ID	2/2
03	81	Weight	1	X	R	1/10
04	355	Unit or Basis for Measurement Code	1	X	ID	2/2
05	183	Volume	1	X	R	1/8
06	355	Unit or Basis for Measurement Code	1	X	ID	2/2
07	398	Order Sizing Factor	1	O	R	1/10
08	610	Amount	1	O/Z	N2	1/15
09	417	Price Bracket Identifier	1	O	AN	1/3
10	107	Payment Method Type Code	1	O	ID	1/2

Syntax Notes

03	P0304
05	P0506
07	C0704

Semantic Notes

01	G7601 is quantity ordered.
08	G7608 indicates the total monetary amount of the purchase order as determined by the buyer.

Comments

02	G7602 qualifies G7601.

G82 - Delivery/Return Base Record Identifier

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN

894

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	478	Credit/Debit Flag Code	1	M	ID	1/1
02	861	Supplier's Delivery/Return Number	1	M	AN	1/22
03	860	D-U-N-S Number Code	1	O	ID	9/9
04	862	Receiver's Location Number	1	M	AN	1/13
05	860	D-U-N-S Number Code	1	O	ID	9/9
06	871	Supplier's Location Number	1	M	AN	1/13
07	872	Physical Delivery or Return Date	1	M	DT	8/8
08	873	Product Ownership Transfer Date	1	O	DT	8/8
09	324	Purchase Order Number	1	O	AN	1/22
10	323	Purchase Order Date	1	O	DT	8/8
11	146	Shipment Method of Payment Code	1	O	ID	2/2
12	625	COD Method of Payment Code	1	O	ID	1/1
13	1321	Condition Indicator Code	1	O	ID	2/3

Comments

01 When G8201 equals "D" (debit), information in this segment is for a delivery. When G8201 equals "C" (credit), information in this segment is for a return.

G83 - Line Item Detail/Direct Store Delivery

To specify the basic, and most frequently used line item data for the delivery record transaction

TRANSACTION SETS USED IN
894

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	204	Direct Store Delivery Sequence Number	1	M	N0	1/4
02	380	Quantity	1	M	R	1/15
03	355	Unit or Basis for Measurement Code	1	M	ID	2/2
04	766	U.P.C./EAN Consumer Package Code	1	X	AN	12/12
05	235	Product/Service ID Qualifier	1	X	ID	2/2
06	234	Product/Service ID	1	X	AN	1/80
07	438	U.P.C. Case Code	1	X	AN	12/12
08	237	Item List Cost	1	O	R	1/9
09	356	Pack	1	X	N0	1/6
10	878	Cash Register Item Description	1	O	AN	1/20
11	235	Product/Service ID Qualifier	1	X	ID	2/2
12	234	Product/Service ID	1	X	AN	1/80
13	810	Inner Pack	1	O	N0	1/6
14	235	Product/Service ID Qualifier	1	X	ID	2/2
15	234	Product/Service ID	1	X	AN	1/80
16	355	Unit or Basis for Measurement Code	1	X	ID	2/2
17	237	Item List Cost	1	X	R	1/9

Syntax Notes

04	R0405
04	E0406
05	P0506
07	C0709
07	E0712
11	P1112
14	P1415
16	P1617

Comments

03	G8303 qualifies G8302.
14	G8314 and G8315 are used to provide the country of origin for the product identified in this segment.
16	G8316 and G8317 pertain to G8307 or G8312.
16	G8316 qualifies G8317.
16	G8316 specifies a different unit of measure for the product than what is specified in G8303.

G84 - Delivery/Return Record of Totals

To specify summary details of total items in terms of quantity or amount

TRANSACTION SETS USED IN
894 895

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	X	R	1/15
02	361	Total Invoice Amount	1	X	N2	1/10
03	865	Total Deposit Dollar Amount	1	O	N2	1/6
04	640	Transaction Type Code	1	O	ID	2/2
05	782	Monetary Amount	1	O/Z	R	1/18
06	782	Monetary Amount	1	O/Z	R	1/18
07	782	Monetary Amount	1	O/Z	R	1/18

Syntax Notes

01 R0102

Semantic Notes

05 G8405 is the Total Invoice Allowances Amount - the sum of all allowances in the transaction.

06 G8406 is the Total Invoice Charges Amount - the sum of all charges in the transaction.

07 G8407 is the Total Invoice Taxes Amount - the sum of all taxes in the transaction.

G85 - Record Integrity Check

To provide a secure method of identifying authenticity of record content

TRANSACTION SETS USED IN
894 895

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	866	Integrity CheckValue	1	M	AN	1/12

G86 - Signature Identification

To transmit an electronic identity

TRANSACTION SETS USED IN
113 179 197 268 894 895

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	867	Signature	1	O	AN	1/12
02	93	Name	1	O/Z	AN	1/60

Semantic Notes

02 G8602 is a keyed representation of a signature.

G87 - Delivery/Return Adjustment Identification

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN

895

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	868	Initiator Code	1	M	ID	1/1
02	478	Credit/Debit Flag Code	1	M	ID	1/1
03	861	Supplier's Delivery/Return Number	1	M	AN	1/22
04	866	Integrity Check Value	1	M	AN	1/12
05	869	Adjustment Sequence Number	1	M	N0	1/1
06	870	Receiver Delivery/Return Number	1	O	AN	1/22

Comments

04	G8704 must contain the integrity check value from the G85 (Record Integrity Check) segment in the preceding base or adjustment transaction.

G88 - Delivery/Return Identification Adjustment

To transmit adjustments for identification data

TRANSACTION SETS USED IN

895

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	872	Physical Delivery or Return Date	1	O	DT	8/8
02	873	Product Ownership Transfer Date	1	O	DT	8/8
03	324	Purchase Order Number	1	O	AN	1/22
04	323	Purchase Order Date	1	O	DT	8/8
05	862	Receiver's Location Number	1	O	AN	1/13

G89 - Line Item Detail - Adjustment

To transmit line-item detail adjustments

TRANSACTION SETS USED IN
895

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	204	Direct Store Delivery Sequence Number	1	M	N0	1/4
02	380	Quantity	1	O	R	1/15
03	355	Unit or Basis for Measurement Code	1	O	ID	2/2
04	766	U.P.C./EAN Consumer Package Code	1	X	AN	12/12
05	235	Product/Service ID Qualifier	1	X	ID	2/2
06	234	Product/Service ID	1	X	AN	1/80
07	438	U.P.C. Case Code	1	X	AN	12/12
08	237	Item List Cost	1	O	R	1/9
09	356	Pack	1	O	N0	1/6
10	810	Inner Pack	1	O	N0	1/6
11	235	Product/Service ID Qualifier	1	X	ID	2/2
12	234	Product/Service ID	1	X	AN	1/80
13	426	Adjustment Reason Code	1	O	ID	2/2
14	355	Unit or Basis for Measurement Code	1	X	ID	2/2
15	237	Item List Cost	1	X	R	1/9

Syntax Notes

04	E0406
05	P0506
07	E0712
11	P1112
14	P1415

Comments

03	G8903 qualifies G8902.
14	G8914 and G8915 pertain to G8907 or G8912.
14	G8914 qualifies G8915.
14	G8914 specifies a different unit of measure for the product than what is specified in G8903.

G91 - Price Change Status

To enable the supplier/broker to change pricing information

TRANSACTION SETS USED IN

879

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	259	Change Type Code	1	M	ID	1/1
02	236	Price Identifier Code	1	O	ID	3/3

G92 - Purchase Order Change Type

To identify the reason for a change to a previously transmitted purchase order

TRANSACTION SETS USED IN

876

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	670	Change or Response Type Code	1	M	ID	2/2
02	373	Date	1	M/Z	DT	8/8
03	324	Purchase Order Number	1	M	AN	1/22

Semantic Notes

02 G9202 is the date assigned by the purchaser to the purchase order.

G93 - Price Bracket Identification

To identify price bracket values

TRANSACTION SETS USED IN
832 879 888 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	417	Price Bracket Identifier	1	O	AN	1/3
02	380	Quantity	1	X/Z	R	1/15
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2
04	369	Free-form Description	1	O	AN	1/45
05	91	Transportation Method/Type Code	1	O	ID	1/2
06	236	Price Identifier Code	1	O	ID	3/3
07	306	Action Code	1	O	ID	1/2
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

02 P0203

Semantic Notes

02 G9302 is the bracket value in terms of minimum quantity or weight as specified in G9303.

08 G9308 defines if freight is included in the price of products in the price bracket. A "Y" indicates freight is included in the price of products in the price bracket; an "N" indicates it is not included.

G94 - Promotion Conditions

To indicate the option number associated with a promotion and to specify the "AND" or "OR" condition for the option

TRANSACTION SETS USED IN

889

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	293	Promotion Condition Qualifier	1	O	ID	2/2
02	770	Option Number	1	M	AN	1/20

G95 - Performance Requirements

To specify the "AND" or "OR" condition for the option, or provide information related to the promotion performance conditions and allocations required, or both

TRANSACTION SETS USED IN
852 883 889

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	293	Promotion Condition Qualifier	1	O	ID	2/2
02	422	Promotion Condition Code	1	M	ID	2/2
03	554	Assigned Number	1	O	N0	1/9
04	380	Quantity	1	X	R	1/15
05	355	Unit or Basis for Measurement Code	1	X/Z	ID	2/2
06	352	Description	1	O	AN	1/80
07	1470	Number	1	O/Z	N0	1/9

Syntax Notes

04 P0405

Semantic Notes

05 If G9502 equals "99", then G9506 is required.
07 G9507 contains the number of days included in the promotion period.

GA - Canadian Grain Information

To transmit the transportation and distribution requirements of grain at Canadian ports

TRANSACTION SETS USED IN
404 410 417 422 426 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1275	Fumigated/Cleaned Indicator Code	1	O	ID	1/1
02	22	Commodity Code	1	O/Z	AN	1/30
03	1576	Inspected/Weighed Indicator Code	1	O	ID	1/2
04	128	Reference Identification Qualifier	1	X	ID	2/3
05	127	Reference Identification	1	X	AN	1/80
06	642	Week	1	O/Z	N0	6/6
07	899	Unload Terminal Elevator Code	1	O	ID	3/4
08	373	Date	1	O/Z	DT	8/8
09	1470	Number	1	O/Z	N0	1/9
10	1276	Machine Separable Indicator Code	1	O	ID	2/2
11	1277	Canadian Wheat Board (CWB) Marketing Class Code	1	O	ID	1/1
12	1278	Canadian Wheat Board (CWB) Marketing Class Type Code	1	O	ID	1/1
13	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
14	310	Location Identifier	1	X/Z	AN	1/30
15	156	State or Province Code	1	X	ID	2/2
16	1004	Percent Qualifier	1	X	ID	1/2
17	954	Percentage as Decimal	1	X	R	1/10
18	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

04 P0405
14 P1415
16 P1617

Semantic Notes

02 GA02 is required on the first occurrence of the segment and for each new occurrence of a different commodity code.
06 GA06 is used for crop week
08 GA08 is used for the unload date.
09 GA09 will contain the number of cars being claimed for incentive rate.
13 If GA13 is equal to "Y" then this is a direct hit to departure wharf for vessel loading. If "N" this is to be unloaded at terminal and GA14 is required to identify the terminal or staging area prior to vessel loading.
14 GA14 is the terminal or staging area name.
18 GA18 indicates whether a Canadian Wheat Board Performance car is involved. If GA18 is equal to "Y", then this indicates a Performance Car is involved. If GA18 is equal to "N" a

Performance car is not involved. The default value is "N" if absent.

Comments

02 GA02 contains the Canadian Grain Commission Commodity Code for terminal elevator accounting.

05 GA05 is used for grain block number.

GDP - General Dosing Parameters

Reports dosing parameters for a group of animals or an individual animal

TRANSACTION SETS USED IN

249

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	739	Measurement Value	1	M/Z	R	1/20
02	C001	Composite Unit of Measure	1	M/Z		
03	1603	Route of Administration	1	O/Z	AN	1/20
04	1313	Test Period or Interval Value	1	X/Z	N0	1/6
05	344	Unit of Time Period or Interval Code	1	X	ID	2/2
06	1313	Test Period or Interval Value	1	X/Z	N0	1/6
07	344	Unit of Time Period or Interval Code	1	X	ID	2/2

Syntax Notes

04 P0405

06 P0607

Semantic Notes

01 GDP01 reports the numerical dose value for a group of animals or individual animal during the dose period or interval designated by GDP04.

02 GDP02 identifies the unit of measurement for the dose value.

03 GDP03 is a description of how the substance was administered.

04 GDP04 designates the day on test or interval value the first animal in a group was dosed or the dose day or interval on test when an individual animal received the dose recorded in GDP01.

06 GDP06 designates the day on test or interval value the last animal in this group was dosed.

GE - Functional Group Trailer

To indicate the end of a functional group and to provide control information

CONTROL SEGMENT

TRANSACTION SETS USED IN

None

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	97	Number of Transaction Sets Included	1	M	N0	1/6
02	28	Group Control Number	1	M/Z	N0	1/9

Semantic Notes

02 The data interchange control number GE02 in this trailer must be identical to the same data element in the associated functional group header, GS06.

Comments

00 The use of identical data interchange control numbers in the associated functional group header and trailer is designed to maximize functional group integrity. The control number is the same as that used in the corresponding header.

GF - Furnished Goods and Services

To specify information related to furnished material, equipment, property, information, and services

TRANSACTION SETS USED IN

180 511 517 527 856 869

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	X	ID	2/3
02	127	Reference Identification	1	X	AN	1/80
03	367	Contract Number	1	O	AN	1/30
04	782	Monetary Amount	1	O/Z	R	1/18
05	128	Reference Identification Qualifier	1	X	ID	2/3

08	128	Reference Identification Qualifier	1	X	ID	2/3
09	127	Reference Identification	1	X	AN	1/80

Syntax Notes

01	P0102
05	P0506
08	P0809

Semantic Notes

04	GF04 is the value of government-furnished property.

GH - Group Header

To indicate the list identity for the details following

TRANSACTION SETS USED IN

490

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	373	Date	1	O	DT	8/8
03	354	Number of Line Items	1	O	N0	1/6
04	691	Revision Number	1	O	N0	1/4

Comments

02	GH02 is the expiration date.

GID - Group Identification

To identify each dose group name and dose group gender

TRANSACTION SETS USED IN
249

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	93	Name	1	M/Z	AN	1/60
02	1068	Gender Code	1	M/Z	ID	1/1
03	93	Name	1	O/Z	AN	1/60

Semantic Notes

01 GID01 is the group name identification.
02 GID02 defines the gender of this group.
03 GID03 is the alternate group name.

GR - Guarantee Result Detail

To provide information related to the disposition of a student loan

TRANSACTION SETS USED IN
135 139 144 191

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1262	Loan Type Code	1	M	ID	1/2

21	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
22	1713	Guarantee Amount Reduction Code	1	O	ID	1/2

Syntax Notes

07 P0708
10 P1011
15 P1516

Semantic Notes

04 GR04 is the loan period.
06 GR06 is the result date.
08 GR08 is the loan status date.
09 GR09 is the guaranteed loan amount.
10 GR10 is the current interest rate.
12 GR12 is the new interest rate.
13 GR13 indicates whether the borrower is a new borrower. A "Y" indicates the borrower is a new borrower; an "N" indicates the borrower is not.

14 GR14 is the guarantor loan ID.

16 GR16 is the guarantee expiration date.

17 GR17 is the amount guaranteed at academic level.

18 GR18 is the user ID of the loan processor.

19 GR19 indicates whether there is an outstanding guarantee fee balance. A "Y" indicates there is an outstanding fee balance; an "N" indicates there is not.

20 GR20 is the number of grace months.

21 GR21 indicates whether a promissory note should be printed. A "Y" indicates one should be printed; an "N" indicates one should not be printed.

GR2 - Train Data

To provide train assignment as to its identification and departure

TRANSACTION SETS USED IN
715

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	309	Location Qualifier	1	X	ID	1/2
03	310	Location Identifier	1	X	AN	1/30

03	C0304
05	C0506
07	C0708
09	C0910

GRP - Group Dosage Parameters

To report group-specific variables on dosages

TRANSACTION SETS USED IN

249

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1470	Number	1	M/Z	N0	1/9
02	1370	Unit Dose Code	1	M/Z	ID	1/1
03	373	Date	1	M/Z	DT	8/8
04	373	Date	1	M/Z	DT	8/8

Semantic Notes

01 GRP01 indicates the number of animal records present in this dose group.

02 GRP02 indicates the type of dose treatment for this dose group.

03 GRP03 indicates the group in vivo start date. This is the date testing commenced for animals in this group.

04 GRP04 indicates the group in vivo end date. This is the last date on which an animal in this group was sacrificed.

GS - Functional Group Header

To indicate the beginning of a functional group and to provide control information

CONTROL SEGMENT

TRANSACTION SETS USED IN

None

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	479	Functional Identifier Code	1	M	ID	2/2
02	142	Application Sender's Code	1	M	AN	2/15
03	124	Application Receiver's Code	1	M	AN	2/15
04	373	Date	1	M/Z	DT	8/8
05	337	Time	1	M/Z	TM	4/8
06	28	Group Control Number	1	M/Z	N0	1/9
07	455	Responsible Agency Code	1	M	ID	1/2
08	480	Version / Release / Industry Identifier Code	1	M	AN	1/12

Semantic Notes

04 GS04 is the group date.

05 GS05 is the group time.

06 The data interchange control number GS06 in this header must be identical to the same data element in the associated functional group trailer, GE02.

Comments

00 A functional group of related transaction sets, within the scope of X12 standards, consists of a collection of similar transaction sets enclosed by a functional group header and a functional group trailer.

GY - Geography

To define the geographic region from or to which a rate docket applies

TRANSACTION SETS USED IN
106 107 217 460 490 494

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	262	Geography Qualifier Code	1	M/Z	ID	1/1
02	699	Commodity/Geographic Logical Connector Code	1	O/Z	ID	1/1
03	309	Location Qualifier	1	X	ID	1/2

14	19	City Name	1	X	AN	2/30
15	1073	Yes/No Condition or Response Code	1	X/Z	ID	1/1

Syntax Notes

03	E0309
05	C0503
06	C0605
09	P091011
09	E0913
09	E0915
12	C12091011
13	P1314

Semantic Notes

01	If GY01 is "B" (between) in this iteration of the loop, it must be "B" in the corresponding iteration of the loop. If GY01 is "F" (from) in this iteration of the loop, it must be "T" (to) in the corresponding iteration of the loop. If GY01 is "T" (to) in this iteration of the loop, it must be "F" (from) in the corresponding iteration of the loop.
02	If GY02 is "M" (minus), there must be at least one GY02 that is "P" (plus) within the same loop.
07	GY07 is the Standard Carrier Alpha Code (SCAC) of the location stated in GY05 and GY06.
09	GY09 is the Standard Carrier Alpha Code (SCAC) of the docket owner.
15	If GY15 is "Y", then the location named in GY04 through GY07 will include revenue switching areas. If "N", then this will not include revenue switching areas.

Comments

05 If both GY05 and GY06 are present, a range is indicated.

H1 - Hazardous Material

To specify information relative to hazardous material

TRANSACTION SETS USED IN

104 210 284 285 286 300 301 304 309 310 312 317 322 324 325 355 859 888

08	355	Unit or Basis for Measurement Code	1	X	ID	2/2
09	254	Packng Group Code	1	O	ID	1/3

Syntax Notes

07	P0708

Comments

00	This segment is required when the shipment contains hazardous material.
07	H107 is the lowest temperature for hazardous materials.

H2 - Additional Hazardous Material Description

To specify free-form hazardous material descriptive data in addition to the information provided in the H1 segment

TRANSACTION SETS USED IN

104 210 300 301 304 309 310 312 325 355 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	64	Hazardous Material Description	1	M	AN	2/30
02	274	Hazardous Material Classification	1	O	AN	1/30

H3 - Special Handling Instructions

To specify special handling instructions in coded or free-form format

TRANSACTION SETS USED IN

104 161 163 210 250 300 301 304 310 312 322 324 325 404 417 421 426 456 470 858 859

01	152	Special Handling Code	1	X	ID	2/3
02	153	Special Handling Description	1	X	AN	2/30
03	241	Protective Service Code	1	O	ID	1/4
04	242	Vent Instruction Code	1	O	ID	1/7
05	257	Tariff Application Code	1	O	ID	1/1

Syntax Notes

01	E0102

H5 - Car Service Order

To identify the car service directive or other car movement instructions applicable to the empty movement of the car

TRANSACTION SETS USED IN
417 421 456

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	240	Car Service Order Code	1	M	ID	3/5
02	19	City Name	1	O	AN	2/30
03	156	State or Province Code	1	O	ID	2/2

H6 - Special Services

To identify forms of unitization, liability issues, and special services

TRANSACTION SETS USED IN

163 210 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	560	Special Services Code	1	X	ID	2/10
02	560	Special Services Code	1	O	ID	2/10
03	406	Quantity of Pallets Shipped	1	O	N0	1/3
04	399	Pallet Exchange Code	1	O	ID	1/1
05	81	Weight	1	O	R	1/10
06	188	Weight Unit Code	1	O	ID	1/1
07	108	Pickup or Delivery Code	1	X	ID	1/2

Syntax Notes

01	R0107
02	C0201

Comments

01	H601 indicates base services. If H601 equals "PC" and H602 equals "PL", then H603 must be used.
02	H602 indicates special services.
06	H606 is used only when H605 is expressed in a unit of measure other than pounds (weight refers to pallet weight only).

HAD - Hospital Affiliation Detail

To provide detail information describing a provider's affiliation to a specific hospital

TRANSACTION SETS USED IN
274

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	546	Status Code	1	M/Z	ID	2/2
02	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
05	1270	Code List Qualifier Code	1	X	ID	1/3
06	1271	Industry Code	1	X/Z	AN	1/30

Syntax Notes

05 P0506

Semantic Notes

01 HAD01 describes the provider's medical staff status.

02 HAD02 indicates whether or not the provider actively admits patients to this hospital. A "Y" indicates the provider actively admits; an "N" indicates the provider does not actively admit.

03 HAD03 indicates whether or not this facility is the provider's primary hospital affiliation. A "Y" indicates the facility is the primary affiliation; an "N" indicates the facility is not the provider's primary affiliation.

04 HAD04 indicates whether or not the provider has clinical privileges in good standing. A "Y" indicates the provider has clinical privileges in good standing; an "N" indicates the provider does not have clinical privileges in good standing.

06 HAD06 identifies the provider's supervising department for this affiliation.

HC - Health Condition

To provide the receiving district with notice of the student's health condition status

TRANSACTION SETS USED IN

130 189

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1271	Industry Code	1	M/Z	AN	1/30
02	1271	Industry Code	1	X/Z	AN	1/30
03	1250	Date Time Period Format Qualifier	1	X	ID	2/3
04	1251	Date Time Period	1	X/Z	AN	1/35
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	1270	Code List Qualifier Code	1	M	ID	1/3
07	1270	Code List Qualifier Code	1	X	ID	1/3

Syntax Notes

02	P0207
03	P0304

Semantic Notes

01	HC01 and HC06 refer to Disease Condition Type.
02	HC02 and HC07 refer to Medical Treatment Type.
04	HC04 refers to the date the disease or condition was first encountered.
05	HC05 indicates if the disease or condition has been resolved. A "Y" indicates the disease or condition has been resolved; an "N" indicates the disease or condition has not been resolved.

HCP - Health Care Pricing

To specify pricing or repricing information about a health care claim or line item

TRANSACTION SETS USED IN
837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1473	Pricing Methodology Code	1	X	ID	2/2
02	782	Monetary Amount	1	O/Z	R	1/18
03	782	Monetary Amount	1	O/Z	R	1/18

05	118	Rate	1	O/Z	R	1/9
06	127	Reference Identification	1	O/Z	AN	1/80
07	782	Monetary Amount	1	O/Z	R	1/18
08	234	Product/Service ID	1	O/Z	AN	1/80
09	235	Product/Service ID Qualifier	1	X	ID	2/2
10	234	Product/Service ID	1	X/Z	AN	1/80
11	355	Unit or Basis for Measurement Code	1	X	ID	2/2
12	380	Quantity	1	X/Z	R	1/15
13	901	Reject Reason Code	1	X/Z	ID	2/2
14	1526	Policy Compliance Code	1	O	ID	1/2
15	1527	Exception Code	1	O/Z	ID	1/2

Syntax Notes

01	R0113
09	P0910
11	P1112

Semantic Notes

02	HCP02 is the allowed amount.
03	HCP03 is the savings amount.
04	HCP04 is the repricing organization identification number.
05	HCP05 is the pricing rate associated with per diem or flat rate repricing.
06	HCP06 is the approved DRG code.
07	HCP07 is the approved DRG amount.
08	HCP08 is the approved revenue code.
10	HCP10 is the approved procedure code.
12	HCP12 is the approved service units or inpatient days.
13	HCP13 is the rejection message returned from the third party organization.
15	HCP15 is the exception reason generated by a third party organization.

Comments

06	HCP06, HCP07, HCP08, HCP10, and HCP12 are fields that will contain different values from the original submitted values.

HCR - Health Care Services Review

To specify the outcome of a health care services review

TRANSACTION SETS USED IN

278

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	306	Action Code	1	M	ID	1/2
02	127	Reference Identification	1	O/Z	AN	1/80
03	1271	Industry Code	5	O/Z	AN	1/30
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

02 HCR02 is the number assigned by the information source to this review outcome.

03 HCR03 is the code assigned by the information source to identify the reason for the health care service review outcome indicated in HCR01. See Code Source 886

04 HCR04 is the second surgical opinion indicator. A "Y" value indicates a second surgical opinion is required; an "N" value indicates a second surgical opinion is not required for this request.

HD - Health Coverage

To provide information on health coverage

TRANSACTION SETS USED IN

540 820 834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	875	Maintenance Type Code	1	M	ID	3/3
02	1203	Maintenance Reason Code	1	O	ID	2/3
03	1205	Insurance Line Code	1	O	ID	2/3
04	1204	Plan Coverage Description	1	O	AN	1/50
05	1207	Coverage Level Code	1	O	ID	3/3
06	609	Count	1	O/Z	N0	1/9
07	609	Count	1	O/Z	N0	1/9
08	1209	Underwriting Decision Code	1	O	ID	1/1
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
10	1211	Drug House Code	1	O	ID	2/3
11	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

06 HD06 is the number of collateral dependents for the primary insured. A collateral dependent is a relative related by blood or marriage who resides in the home and is dependent on the employee for support.

07 HD07 is the number of sponsored dependents for the primary insured. A sponsored dependent is a dependent between the ages of 19 and 25 who is not in school.

09 HD09 is a late enrollee indicator. A "Y" value indicates the insured is a late enrollee, which can result in a reduction of benefits; an "N" value indicates the insured is a regular enrollee.

11 HD11 is a prescription drug service coverage indicator. A "Y" value indicates that prescription drug service coverage applies; an "N" value indicates that prescription drug service coverage does not apply.

HI - Health Care Information Codes

To supply information related to the delivery of health care

TRANSACTION SETS USED IN
270 271 275 278 834 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C022	Health Care Code Information	99	M		

Semantic Notes

00 One iteration of the HI segment is allowed for each defined business usage.

HL - Hierarchical Level

To identify dependencies among and the content of hierarchically related groups of data segments

TRANSACTION SETS USED IN

105 111 112 113 132 133 148 155 157 179 186 187 194 196 242 245 248 267 270 271 274 276 277 278 284 286 500 536 561 625 650 805 811 816 837 841 842 847 856 857 858 863 869 870

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	628	Hierarchical ID Number	1	M	AN	1/12
02	734	Hierarchical Parent ID Number	1	O	AN	1/12
03	735	Hierarchical Level Code	1	M	ID	1/2
04	736	Hierarchical Child Code	1	O	ID	1/1

Comments

00 The HL segment is used to identify levels of detail information using a hierarchical structure, such as relating line-item data to shipment data, and packaging data to line-item data.

00 The HL segment defines a top-down/left-right ordered structure.

01 HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction.

02 HL02 identifies the hierarchical ID number of the HL segment to which the current HL segment is subordinate.

03 HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information.

04 HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

HLH - Health Information

To provide health information

TRANSACTION SETS USED IN
834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C061	Member Health and Treatment Information	10	O		
02	65	Height	1	O	R	1/8
03	81	Weight	1	O/Z	R	1/10

06	1213	Current Health Condition Code	1	O	ID	1/1
07	352	Description	1	O/Z	AN	1/80

Semantic Notes

03 HLH03 is the current weight in pounds.
04 HLH04 is the previous weight in pounds.
05 HLH05 is the reason for change in weight.
07 HLH07 describes the reason for last doctor visit.

HPL - Health Care Provider License

To provide license, certification, accreditation, and registration information for health care providers

TRANSACTION SETS USED IN

274

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	X/Z	ID	2/3
02	127	Reference Identification	1	X/Z	AN	1/80
03	546	Status Code	1	O	ID	2/2
04	156	State or Province Code	1	O/Z	ID	2/2
05	352	Description	1	O/Z	AN	1/80
06	83	Code For Licensing, Certification, Registration, or Accreditation Agency	1	X	ID	1/2

Syntax Notes

01	P0102
02	R0206

Semantic Notes

01	HPL01 indicates the kind of health care provider license or certificate.
02	HPL02 indicates the identification number of the health care provider license or certificate.
04	HPL04 contains the state providing the license when HPL01 specifies a state specific licensing agency.
05	HPL05 indicates the schedule or level associated with the license or certificate described by HPL02.

HS - Health Screening

To provide the receiving school district with information about health screening activities

TRANSACTION SETS USED IN

130

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1271	Industry Code	1	M/Z	AN	1/30
02	1250	Date Time Period Format Qualifier	1	X	ID	2/3
03	1251	Date Time Period	1	X/Z	AN	1/35
04	641	Status Reason Code	1	O/Z	ID	3/3
05	1270	Code List Qualifier Code	1	M	ID	1/3

Syntax Notes

02 P0203

Semantic Notes

01 HS01 and HS05 refer to Health Screening Type.

03 HS03 indicates the date the health screening tookplace.

04 HS04 indicates the results of the health screening.

HSD - Health Care Services Delivery

To specify the delivery pattern of health care services

TRANSACTION SETS USED IN

194 271 274 278 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	673	Quantity Qualifier	1	X	ID	2/2
02	380	Quantity	1	X	R	1/15
03	355	Unit or Basis for Measurement Code	1	O	ID	2/2
04	1167	Sample Selection Modulus	1	O	R	1/6
05	615	Time Period Qualifier	1	X	ID	1/2
06	616	Number of Periods	1	O/Z	N0	1/3
07	678	Ship/Delivery or Calendar Pattern Code	1	O	ID	1/2
08	679	Ship/Delivery Pattern Time Code	1	O	ID	1/1
09	616	Number of Periods	1	O/Z	N0	1/3
10	352	Description	1	O/Z	AN	1/80

Syntax Notes

01	P0102
06	C0605
09	C0905

Semantic Notes

06	HSD06 identifies the number of periods, or the minimum in a range of periods when HSD09 is present.
09	HSD09 identifies the maximum in a range of time periods as qualified by HSD05.
10	HSD10 is the textual description of a delivery pattern that can not be codified using only the other elements in the segment.

IA - Interconnect Mailbag Acknowledgment

To report the status of receipt and safe storage of an interconnect mailbag. The interconnect mailbag control number (IA01) is copied from the subject IH segment

CONTROL SEGMENT

TRANSACTION SETS USED IN

None

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	I28	Interconnect Mailbag Control Number	1	M	N0	1/9
02	I32	Interconnect Mailbag Acknowledgment Action Code	1	M	ID	1/1
03	I33	Interconnect Mailbag Error Code	1	O	ID	2/2

06	I33	Interconnect Mailbag Error Code	1	O	ID	2/2
07	I33	Interconnect Mailbag Error Code	1	O	ID	2/2

IC - Intermodal Chassis Equipment

To specify the chassis equipment details in terms of identifying numbers, weights, and ownership

TRANSACTION SETS USED IN

404 410 417 421 426 451 456 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	206	Equipment Initial	1	M	AN	1/4
02	207	Equipment Number	1	M	AN	1/15
03	167	Tare Weight	1	X	N0	3/8
04	571	Tare Qualifier Code	1	X	ID	1/1
05	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
06	567	Equipment Length	1	O	N0	4/5
07	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
08	845	Chassis Type Code	1	O	ID	2/2
09	761	Equipment Number Check Digit	1	O/Z	N0	1/1

Syntax Notes

03 P0304

Semantic Notes

05 IC05 is the chassis owner.

07 IC07 is the equipment lessee.

09 IC09 is the equipment check digit for the equipment number in IC02.

ICH - Individual Characteristics

To provide personal information on an individual

TRANSACTION SETS USED IN
152 272 280

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	609	Count	1	O/Z	N0	1/9
02	1250	Date Time Period Format Qualifier	1	X	ID	2/3
03	1251	Date Time Period	1	X/Z	AN	1/35

09	1069	Individual Relationship Code	1	O/Z	ID	2/2
10	352	Description	1	O/Z	AN	1/80
11	352	Description	1	O/Z	AN	1/80
12	1588	Political Party Affiliation Code	1	O	ID	2/2

Syntax Notes

02	P0203

Semantic Notes

01	ICH01 specifies the chronological age.
03	ICH03 specifies an individual's date of birth.
05	ICH05 specifies an individual's social security number.
06	ICH06 specifies an individual's driver's license number.
07	ICH07 specifies an individual's driver's license state.
09	ICH09 specifies an individual's relationship to the policyholder.
10	ICH10 describes injuries the individual received.
11	ICH11 describes how the individual was transported to the place he/she was taken. It can also be used to describe "Other Political Party" if ICH12 is present and contains the value "OT".

ICM - Individual Income

To supply information to determine benefit eligibility, deductibles, and retirement and investment contributions

TRANSACTION SETS USED IN
834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	594	Frequency Code	1	M/Z	ID	1/1
02	782	Monetary Amount	1	M/Z	R	1/18
03	380	Quantity	1	O/Z	R	1/15
04	310	Location Identifier	1	O/Z	AN	1/30
05	1214	Salary Grade	1	O	AN	1/5
06	100	Currency Code	1	O	ID	3/3

Semantic Notes

01 ICM01 is the frequency at which an individual's wages are paid.
02 ICM02 is the yearly wages amount.
03 ICM03 is the weekly hours.
04 ICM04 is the employer location qualifier such as a department number.

ID - Inspection Detail Segment

To report the inspection results on automotive vehicles

TRANSACTION SETS USED IN

124 928

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	556	Damage Area Code	1	M	ID	2/2
02	540	Damage Type Code	1	M	ID	2/2
03	541	Damage Severity Code	1	M	ID	1/1

ID1 - Item Detail Dimensions

To transmit information about the physical characteristics of items

TRANSACTION SETS USED IN
896

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	766	U.P.C./EAN Consumer Package Code	1	X	AN	12/12

33	863	X-Peg	1	X	R	1/6
34	864	Y-Peg	1	X	R	1/6

Syntax Notes

01 R0102
02 P0203
11 P1112
13 P1314
19 P1920
21 P212223
26 P262728
26 C2625
29 P293031
29 C2925
32 P323334
32 C3225

Semantic Notes

16 ID116 is the package type.

Comments

06 ID106 qualifies ID105.
10 ID110 qualifies ID107 through ID109.
25 ID125 unit of measure modifies ID126 through ID134 inclusive.
26 ID126, ID129, and ID132 contain the peg hole number. The unique peg hole numbers are 1, 2, or 3, counting from the upper left corner of the front of the package to the bottom right corner of the front (left to right, top to bottom, as you read).

ID2 - Item Image Detail

To transmit item image information

TRANSACTION SETS USED IN
896

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	878	Cash Register Item Description	1	O	AN	1/20
02	878	Cash Register Item Description	1	O	AN	1/20

07	874	Space Management Reference Code	1	X	ID	2/2
08	127	Reference Identification	1	X/Z	AN	1/80

Syntax Notes

03 P0304
07 P0708

Semantic Notes

04 ID204 is the code identifying the plot or graphic image of the item as defined by a particular space management system.
05 ID205 is the name of the manufacturer.
06 ID206 is the brand name.
08 ID208 is the code identifying the video image of the item.

Comments

01 ID201 is used for the sixteen character or less item description.
02 ID202 is used for the twenty character or less item description.

ID3 - Dimensions Detail

To provide information about the physical dimensions of the case

TRANSACTION SETS USED IN
896

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	438	U.P.C. Case Code	1	X	AN	12/12

20	851	Nesting	1	X/Z	R	1/6
21	355	Unit or Basis for Measurement Code	1	X	ID	2/2

Syntax Notes

01	R0102
02	P0203
06	P06070809
10	P1011
12	P1213
14	C14151617
15	P15161718
20	P2021

Semantic Notes

15	ID315 is the tray height.
16	ID316 is the tray width.
17	ID317 is the tray depth.

ID319 is the tray nesting code.

ID320 is the tray nesting.

ID4 - Load Details

To identify shipment details that may impact the rates requested

TRANSACTION SETS USED IN

107

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	74	Declared Value	1	O	N2	2/12
02	108	Pickup or Delivery Code	1	O	ID	1/2
03	187	Weight Qualifier	1	X	ID	1/2
04	81	Weight	1	X	R	1/10
05	184	Volume Unit Qualifier	1	X	ID	1/1
06	183	Volume	1	X	R	1/8
07	1470	Number	1	O/Z	N0	1/9
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

03 P0304

05 P0506

Semantic Notes

07 ID407 is the average number of stops per shipment.

08 ID408 indicates whether or not the freight is seasonal. A "Y" indicates that the freight is seasonal; an "N" indicates that the freight is not seasonal.

09 ID409 indicates if the freight contains any hazardous materials. A "Y" indicates that the freight contains hazardous materials; an "N" indicates that the freight does not contain any hazardous materials. A "blank" is the same as an "N".

IDB - Indebtedness for Student Loans

To provide information about previously guaranteed student loans

TRANSACTION SETS USED IN
135 139 144

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1262	Loan Type Code	1	M	ID	1/2
02	522	Amount Qualifier Code	1	M	ID	1/3
03	782	Monetary Amount	1	M/Z	R	1/18
04	953	Interest Rate	1	X	R	1/6
05	1086	Loan Rate Type Code	1	X	ID	1/1

Syntax Notes

04 P0405

Semantic Notes

03 IDB03 is the outstanding balance.

IDC - Identification Card

To provide notification to produce replacement identification card(s)

TRANSACTION SETS USED IN

834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1204	Plan Coverage Description	1	M	AN	1/50
02	1215	Identification Card Type Code	1	M	ID	1/1
03	380	Quantity	1	O/Z	R	1/15
04	306	Action Code	1	O/Z	ID	1/2

Semantic Notes

03 IDC03 is the number of cards being requested.

04 IDC04 is the reason for the card being requested, i.e., add or a change.

IEA - Interchange Control Trailer

To define the end of an interchange of zero or more functional groups and interchange-related control segments

CONTROL SEGMENT

TRANSACTION SETS USED IN

None

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	I16	Number of Included Functional Groups	1	M	N0	1/5
02	I12	Interchange Control Number	1	M	N0	9/9

IGI - Insurer or Guarantor Information

To identify the mortgage insurer or guarantor and provide information about the insurance coverage

TRANSACTION SETS USED IN

202

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1678	Insurer Guarantor Type Code	1	M	ID	1/1

05	1679	Insurer Coverage Indicator Code	1	O	ID	1/1
06	1138	Payer Responsibility Sequence Number Code	1	O	ID	1/1

Syntax Notes

02	P0203	

IH - Interconnect Mailbag Header

To start and identify an interconnect mailbag containing zero, one, or more interconnect mailbag acknowledgments; zero, one, or more interchanges; or some combination of the two. The interconnect mailbag control number value in the interconnect mailbag header (IH) must match the value in the same data element in the corresponding interconnect mailbag trailer (IT)

CONTROL SEGMENT

TRANSACTION SETS USED IN

None

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	I19	Interconnect Mailbag Version Number Code	1	M	ID	5/5
02	I20	Interconnect Mailbag Logon ID	1	O	AN	1/10

10	1858	Insurance Policy Coverage Type Code	1	X	ID	2/5

Syntax Notes

01	P0102
03	L03040510

Semantic Notes

03	III03 is used to categorize III04 or III10.

IIS - Interchange Identification Segment

To uniquely identify interchange control structures

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

242

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	I44	Reported Start Segment ID	1	O	AN	2/3
02	I45	Reported Control Number	1	O/Z	AN	1/14

13	I61	Interchange Message Direction Code	1	O	ID	1/1
14	I64	Reported Group or Transaction Identifier	1	O	AN	2/6

Semantic Notes

02 IIS02, IIS03, IIS04, IIS05, IIS06, IIS07, and IIS08 identify the interchange control structure being reported.

09 IIS09, IIS10, IIS11, and IIS12 are used to report additional control structure identification codes.

IK3 - Implementation Data Segment Note

To report implementation errors in a data segment and identify the location of the data segment

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

999

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	721	Segment ID Code	1	M	ID	2/3

05	901	Reject Reason Code	1	O/Z	ID	2/2

Semantic Notes

02 IMA02 is the Standard Carrier Alpha Code (SCAC) of entity responsible for the movement authority in the IMA01.

03 IMA03 defines if the associated move is reciprocal, interterminal, or intraterminal.

04 IMA04 defines if the associated move is interstate or intrastate.

05 IMA05 defines the reason the equipment was rejected.

IMC - Interconnect Mailbag Client Exchange Header

To Identify within the Interconnect Mailbag a client interchange or data exchange block.

CONTROL SEGMENT

TRANSACTION SETS USED IN

None

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	I66	Exchange Block Sequence	1	M	N0	1/9

06	1270	Code List Qualifier Code	1	M	ID	1/3

Syntax Notes

02	P0203
03	C0304

Semantic Notes

01	IMM01 and IMM06 refer to Immunization Type.
03	IMM03 gives the date of the immunization.

IMP - Impairment Detail

To specify impairment to a body part

TRANSACTION SETS USED IN

148

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1460	Part of Body Code	1	M	ID	2/2
02	954	Percentage as Decimal	1	O/Z	R	1/10

Semantic Notes

02 IMP02 is the percent of impairment to the body part.

IN1 - Individual Identification

To provide identification of an individual or entity

TRANSACTION SETS USED IN

111 130 135 138 146 147 155 186 189 191 197 198 199 200 201 202 205 206 261 262 265 275 280 833 872

02	1107	Name Type Code	1	M/Z	ID	2/2
03	98	Entity Identifier Code	1	O/Z	ID	2/3
04	128	Reference Identification Qualifier	1	X	ID	2/3
05	127	Reference Identification	1	X	AN	1/80
06	1069	Individual Relationship Code	1	O/Z	ID	2/2
07	1131	Level of Individual, Test, or Course Code	1	O	ID	2/2

Syntax Notes

04 P0405

Semantic Notes

01 IN101 defines entity type (person or nonperson).
02 IN102 defines type or usage of name.
03 IN103 defines role of entity. If IN103 equals "03", then IN106 is required.
06 IN106 defines type of dependent relationship.

IN2 - Individual Name Structure Components

To sequence individual name components for maximum specificity

TRANSACTION SETS USED IN

101 130 131 135 138 139 144 146 147 149 155 157 189 190 191 197 198 199 200 201 202 205 206 261 262 265 280 283 521 540 813 826 833 850 855 860 865 872

02	93	Name	1	M	AN	1/60
03	93	Name	1	O	AN	1/60

INC - Installment Information

To specify installment billing arrangement

TRANSACTION SETS USED IN

245 810 811 840 843 850 855 860 865

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	336	Terms Type Code	1	M	ID	2/2
02	C001	Composite Unit of Measure	1	M/Z		
03	380	Quantity	1	M/Z	R	1/15
04	380	Quantity	1	O/Z	R	1/15
05	782	Monetary Amount	1	X	R	1/18
06	522	Amount Qualifier Code	1	X	ID	1/3

Syntax Notes

05 P0506

Semantic Notes

02 INC02 is the installment period (e.g., months).

03 INC03 is the total number of installments.

04 INC04 is the number of the current installment.

IND - Additional Individual Demographic Information

To provide additional demographic information to the receiving school, institution, or agency to assist in identifying the particular student

TRANSACTION SETS USED IN
130 138 146 189 255 267 274

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	26	Country Code	1	O/Z	ID	2/3

11	66	Identification Code Qualifier	1	X	ID	1/2
12	67	Identification Code	1	X	AN	2/80

Syntax Notes

09	P0910
11	P1112

Semantic Notes

01	IND01, IND02, IND03, and IND04 refer to the place of birth.
05	IND05 refers to the student's native or first language.
07	IND07 refers to the language spoken in the home.
08	IND08 refers to the language for correspondence to the student or applicant.

ING - Ingredients

To identify a product's ingredient(s) and with the sequence order of the ingredient in the product if required, and indicate if the ingredient is genetically modified.

TRANSACTION SETS USED IN
832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	M/Z	AN	1/20
02	C068	Composite Ingredient Information	1	M		
03	332	Percent, Decimal Format	1	O/Z	R	1/6
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

00 The ING segment is not to be used for health care pharmaceuticals.
01 ING01 Is the sequence number of the ingredient in the ingredient's list.
03 ING03 Is the percent of ingredient.
04 ING04 Indicates if the ingredient is genetically modified.
04 Valid values are Y or N.
05 ING05 Indicates if the ingredient is of concern.
05 Valid values are Y or N.
06 ING06 Indicates if the ING02 is a Key Active Ingredient.
06 Valid values are Y or N.

Comments

00 This segment describes a single ingredient. Use multiple occurrences of this segment as needed to describe an ingredient list.

INI - Incorporation Information

To provide basic information concerning a corporation

TRANSACTION SETS USED IN
103 283

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	156	State or Province Code	1	M/Z	ID	2/2
02	373	Date	1	M/Z	DT	8/8
03	1065	Entity Type Qualifier	1	O	ID	1/1

Semantic Notes

01 INI01 contains the state or province in which the corporation is incorporated.

02 INI02 contains the date of incorporation.

INP - Insurance Policy Additions and Peril Coverages

To specify additional coverages or peril conditions that pertain to an insurance policy

TRANSACTION SETS USED IN

811

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	546	Status Code	1	M	ID	2/2
02	1857	Insurance Policy Additions and Perils Type Code	1	M	ID	2/2

INQ - Credit Inquiry Details

To identify results of credit inquiry

TRANSACTION SETS USED IN

155 200

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	485	Results Code	1	M	ID	1/2
02	1187	Type of Account Code	1	O	ID	2/2

INR - Information Request

To specify the type and status of information

TRANSACTION SETS USED IN

155

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1136	Code Category	1	M	ID	2/2
02	701	Information Type Code	1	M	ID	2/2
03	1201	Information Status Code	1	O	ID	1/1

INS - Insured Benefit

To provide benefit, characteristics, and identification information on insured entities.

TRANSACTION SETS USED IN

270 271 278 820 834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	1069	Individual Relationship Code	1	M	ID	2/2
03	875	Maintenance Type Code	1	O	ID	3/3
04	1203	Maintenance Reason Code	1	O	ID	2/3
05	1216	Benefit Status Code	1	O	ID	1/1
06	C052	Medicare Status Code	1	O		
07	1219	Consolidated Omnibus Budget Reconciliation Act (COBRA) Qualifying Event Code	1	O	ID	1/2
08	584	Employment Status Code	1	O	ID	2/2
09	1220	Student Status Code	1	O	ID	1/1
10	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
11	1250	Date Time Period Format Qualifier	1	X	ID	2/3
12	1251	Date Time Period	1	X/Z	AN	1/35
13	1165	Confidentiality Code	1	O	ID	1/1
14	19	City Name	1	O/Z	AN	2/30
15	156	State or Province Code	1	O	ID	2/2
16	26	Country Code	1	O	ID	2/3
17	1470	Number	1	O/Z	N0	1/9
18	1792	Changed Identifying Information Code	20	O	ID	1/2
19	1793	Provider Network Status Information Code	1	O	ID	1/2

Syntax Notes

11 P1112

Semantic Notes

01 INS01 indicates status of the insured. A "Y" value indicates the insured is a subscriber: an "N" value indicates the insured is a dependent.

10 INS10 is the handicapped status indicator. A "Y" value indicates an individual is handicapped; an "N" value indicates an individual is not handicapped.

12 INS12 is the date of death.

14 INS14, INS15, and INS16 identify where the employee works.

17 INS17 is the number assigned to each family member born with the same birth date. This number identifies birth sequence for multiple births allowing proper tracking and response of benefits for each dependent (i.e., twins, triplets, etc.).

INT - Interest

To specify interest rate and type and the applicable time period

TRANSACTION SETS USED IN

103 202 203 205 248 259 260 264 266

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	547	Interest Type Code	1	M/Z	ID	1/2
02	953	Interest Rate	1	O/Z	R	1/6
03	1250	Date Time Period Format Qualifier	1	X/Z	ID	2/3
04	1251	Date Time Period	1	X/Z	AN	1/35
05	380	Quantity	1	X/Z	R	1/15
06	673	Quantity Qualifier	1	X	ID	2/2

Syntax Notes

03	P0304
05	P0506

Semantic Notes

01	INT01 indicates the type of interest, for example, mortgage note or debenture interest.
02	INT02 is the interest rate as a percentage.
03	INT03 indicates the range of date format for INT04.
04	INT04 indicates the range of dates to which the interest rate applies.
05	INT05 and INT06 define in terms of quantity the period of time to which the interest rate applies.

INV - Investment Vehicle Selection

To specify type of investment vehicle or account and other basic data about the investment

TRANSACTION SETS USED IN
267 273 820 823 834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	352	Description	1	M/Z	AN	1/80
02	954	Percentage as Decimal	1	X/Z	R	1/10
03	782	Monetary Amount	1	X/Z	R	1/18
04	380	Quantity	1	X/Z	R	1/15
05	156	State or Province Code	1	O/Z	ID	2/2
06	352	Description	1	O/Z	AN	1/80
07	782	Monetary Amount	1	O/Z	R	1/18

Syntax Notes

02 E020304

Semantic Notes

01 INV01 is the investment fund description of the "receiving" or "to" investment fund.

02 INV02 is the percent of contribution amount to be deposited into the investment fund described in INV01.

03 INV03 is the dollar amount to be deposited into the investment fund described in INV01.

04 INV04 is the number of units or shares to be invested in the investment fund described in INV01.

05 INV05 is the state of sale for the investment fund described in INV01.

06 INV06 is the "originating" or "from" investment fund description for an interfund transfer.

07 INV07 is the current balance of the investment fund described in INV01.

INX - Index Detail

To specify an index

TRANSACTION SETS USED IN

194

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1550	Index Qualifier	1	M	ID	1/2
02	C036	Index Identification	1	M		

IPU - Insurance Policy Update Information

To provide information pertaining to changes to an insurance policy

TRANSACTION SETS USED IN

266 811 820

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1203	Maintenance Reason Code	1	O/Z	ID	2/3
02	1859	Insurance Line of Business Code	1	O	ID	3/5
03	1860	Policy Cancellation Reason Code	1	O	ID	3/3
04	933	Free-form Message Text	1	O/Z	AN	1/264
05	336	Terms Type Code	1	O/Z	ID	2/2
06	689	Occupancy Code	1	O	ID	2/2
07	1321	Condition Indicator Code	1	O/Z	ID	2/3

Semantic Notes

01 IPU01 identifies the reason for insurance policy maintenance.

04 IPU04 provides the private flood Compliance Aid Statement, as determined by the code selected In IPU02.

05 IPU05 identifies the policy renewal term.

07 IPU07 identifies the type of mortgage.

Comments

00 IPU03 is used when selecting a cancellation code from IPU01

00 IPU06 is used with mortgage policies

IRA - Investor Reporting Action

To identify actions on or status of the mortgage

TRANSACTION SETS USED IN
203

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1376	Investor Reporting Action Code	1	M	ID	2/2
02	1250	Date Time Period Format Qualifier	1	X	ID	2/3
03	1251	Date Time Period	1	X/Z	AN	1/35

Syntax Notes

02 P0203

Semantic Notes

03 IRA03 is the effective date of the action or status.

IRP - Report Selection Segment

To identify report selection criteria

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

242

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

16	19	City Name	1	X/Z	AN	2/30
17	156	State or Province Code	1	O	ID	2/2

Syntax Notes

17 C1716

Semantic Notes

01 IS201 is the reporting carrier.
04 IS204 is the scheduled event completion location.
05 IS205, IS206, and IS207 are the scheduled event date, time, and time zone.
08 IS208 is the receiving road.
09 IS209 is the train identification number.
10 IS210 is the train origination date.
12 IS212 is the earliest cutoff date.
13 IS213 is the earliest cutoff time.
14 IS214 is the latest cutoff date.
15 IS215 is the latest cutoff time.
16 IS216 is the city for the Standard Point Location Code in IS204.

ISA - Interchange Control Header

To start and identify an interchange of zero or more functional groups and interchange-related control segments

CONTROL SEGMENT

TRANSACTION SETS USED IN

11	19	City Name	1	X/Z	AN	2/30
12	156	State or Province Code	1	X/Z	ID	2/2

Syntax Notes

04	P0405
11	P1112

Semantic Notes

01	ISC01 is the Standard Carrier Alpha Code (SCAC) of the carrier corresponding to the event.
02	ISC02 is the Standard Point Location Code corresponding to an event location.
05	ISC05 is the service commitment date for committed interchanges and arrivals.
06	ISC06 is the cutoff time for the event with the open window time specified in ISC05 (HHMM 24-hour clock).
07	ISC07 is the relative number of days after the start of trip date and is only used when communicating a commitment.
08	ISC08 is the carrier receiving the shipment at the event location.
11	ISC11 is the City Name for the Standard Point Location Code (SPLC) in ISC02.
12	ISC12 is the State or Province for the Standard Point Location Code (SPLC) in ISC02.

ISD - Railroad Interline Service Definition Detail

To identify service commitment starting events

TRANSACTION SETS USED IN
453

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	154	Standard Point Location Code	1	M/Z	ID	6/9
03	304	Event Code	1	M	ID	3/3
04	337	Time	1	M/Z	TM	4/8

Semantic Notes

01 ISD01 is the Standard Carrier Alpha Code (SCAC) corresponding to the first carrier in the route defining the service commitment.

02 ISD02 is the location of the event.

04 ISD04 is the latest time that the event described in ISD03 may occur.

ISE - Deferred Delivery Request Segment

To specify the earliest time when the interchange can be delivered

CONTROL SEGMENT

TRANSACTION SETS USED IN

None

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	I35	Interchange Delivery Date	1	M	DT	6/6

03	1131	Level of Individual, Test, or Course Code	1	O	ID	2/2
04	C056	Composite Race or Ethnicity Information	5	O/Z		
05	380	Quantity	1	O/Z	R	1/15
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

01 ISI01 and ISI02 identify the industry code source and industry code for the educational staff type.

02 All occurrences of ISI02 are codes from the list specified in ISI01.

02 One or more occurrences of ISI02 are used to describe a single staff type. The positionality of the occurrences is not significant.

02 All occurrences of ISI02 apply to the race or ethnicity described by the occurrences of ISI04.

04 One or more occurrences of ISI04 are used to provide a race or ethnicity description. The positionality of the occurrences of ISI04 is not significant.

04 All occurrences of ISI04 apply to the single staff type described by the occurrences of ISI02.

05 ISI05 provides the number of educational institution staff of the type and level specified in ISI02 and ISI03.

06 ISI06 indicates whether all institution instructional staff are of the type and level specified in ISI02 and ISI03. A "Y" indicates that all institution instructional staff are of the type and level specified in ISI02 and ISI03; an "N" indicates that not all institution instructional staff are of the type and level specified in ISI02 and ISI03.

ISR - Item Status Report

To specify detailed purchase order/item status

TRANSACTION SETS USED IN

870

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	368	Shipment/Order Status Code	1	M/Z	ID	2/2
02	373	Date	1	O	DT	8/8
03	641	Status Reason Code	1	O	ID	3/3

Semantic Notes

01 If ISR01 specifies a date, ISR02 is required.

ISS - Invoice Shipment Summary

To specify summary details of total items shipped in terms of quantity, weight, and volume

TRANSACTION SETS USED IN

304 810 857

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	382	Number of Units Shipped	1	X	R	1/10
02	355	Unit or Basis for Measurement Code	1	X	ID	2/2
03	81	Weight	1	X	R	1/10
04	355	Unit or Basis for Measurement Code	1	X	ID	2/2
05	183	Volume	1	X	R	1/8
06	355	Unit or Basis for Measurement Code	1	X	ID	2/2
07	380	Quantity	1	O/Z	R	1/15
08	81	Weight	1	O/Z	R	1/10

Syntax Notes

01	R010305
01	P0102
03	P0304
05	P0506

Semantic Notes

07	ISS07 is the quantity of third party pallets.
08	ISS08 is the gross weight of third party pallets in pounds.

ISX - Interchange Syntax Extension

To allow the interchange sender to specify additional information required for the interchange receiver to perform syntax interpretation of the interchange. This segment allows specification of a release character, character encoding, and similar capabilities.

CONTROL SEGMENT

TRANSACTION SETS USED IN
None

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	I69	Release Character	1	O		1/1
02	I70	Character Encoding	1	O	ID	1/2
03	I71	Overriding X12 Version / Release Code	1	X/Z	ID	6/6
04	I72	Industry Identifier	1	X/Z	AN	1/15

Syntax Notes

04	C0403

Semantic Notes

03	Overriding code reference applies to interchange content.
03	Value must be a published ASC X12 version/release of an X12 standard.
03	When an ISX03 value is received in an interchange, all code value validation for code values defined by the X12 base Standard will be made against the X12 version conveyed by this element. This value overrides, for code value validation only, the first six characters of GS08 when GS07 equals "X." This applies to any functional groups contained within the interchange, and does not override the transaction set, loop, segment, or data element attributes.
03	In order to use ISX03, the sender must have explicit agreement of the receiver.
04	When an ISX04 value is received in an interchange, all code value validation for code values defined by the X12 Standard will be made against the implementation guide conveyed by this element. ISX04 constrains the full set of codes from the X12 standard specified in ISX03.

IT - Interconnect Mailbag Trailer

To define the end of an interconnect mailbag. The interconnect mailbag control number value in the interconnect mailbag trailer (IT) must match the value in the same data element in the corresponding interconnect mailbag header (IH)

CONTROL SEGMENT

TRANSACTION SETS USED IN

None

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	I28	Interconnect Mailbag Control Number	1	M	N0	1/9
02	I30	Interconnect Mailbag Acknowledgment Count	1	M	N0	1/4
03	I31	Interconnect Mailbag Interchange Count	1	M	N0	1/5

IT1 - Baseline Item Data (Invoice)

To specify the basic and most frequently used line item data for the invoice and related transactions

TRANSACTION SETS USED IN

142 215 268 412 810 811 820 823 857

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	O/Z	AN	1/20
02	358	Quantity Invoiced	1	X	R	1/15
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2
04	212	Unit Price	1	X	R	1/17
05	639	Basis of Unit Price Code	1	O	ID	2/2
06	235	Product/Service ID Qualifier	1	X	ID	2/2
07	234	Product/Service ID	1	X	AN	1/80
08	235	Product/Service ID Qualifier	1	X	ID	2/2
09	234	Product/Service ID	1	X	AN	1/80
10	235	Product/Service ID Qualifier	1	X	ID	2/2
11	234	Product/Service ID	1	X	AN	1/80

21	234	Product/Service ID	1	X	AN	1/80
22	235	Product/Service ID Qualifier	1	X	ID	2/2
23	234	Product/Service ID	1	X	AN	1/80
24	235	Product/Service ID Qualifier	1	X	ID	2/2
25	234	Product/Service ID	1	X	AN	1/80

Syntax Notes

02	P020304
06	P0607
08	P0809
10	P1011
12	P1213
14	P1415
16	P1617
18	P1819
20	P2021

22 P2223
24 P2425

Semantic Notes

01 IT101 is the line item identification.

Comments

00 Element 235/234 combinations should be interpreted to include products and/or services. See the Data Dictionary for a complete list of IDs.

06 IT106 through IT125 provide for ten different product/service IDs for each item. For example: Case, Color, Drawing No., ISBN No., Model No., or SKU.

IT3 - Additional Item Data

To specify additional item details relating to variations between ordered and shipped quantities, or to specify alternate units of measures and quantities

TRANSACTION SETS USED IN
810 850 857

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	382	Number of Units Shipped	1	X	R	1/10
02	355	Unit or Basis for Measurement Code	1	X	ID	2/2
03	368	Shipment/Order Status Code	1	X	ID	2/2
04	383	Quantity Difference	1	X	R	1/9
05	371	Change Reason Code	1	X	ID	2/2

Syntax Notes

01	P0102
01	R01030405

IT8 - Conditions of Sale

To specify general conditions or requirements and to detail conditions for substitution of alternate products

TRANSACTION SETS USED IN
840 843 850 855 860 865

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	563	Sales Requirement Code	1	X	ID	1/2
02	306	Action Code	1	X	ID	1/2
03	610	Amount	1	X/Z	N2	1/15
04	508	Account Number	1	O/Z	AN	1/35
05	373	Date	1	X/Z	DT	8/8
06	559	Agency Qualifier Code	1	O	ID	2/2
07	566	Product/Service Substitution Code	1	X	ID	1/2
08	235	Product/Service ID Qualifier	1	X	ID	2/2
09	234	Product/Service ID	1	X	AN	1/80
10	235	Product/Service ID Qualifier	1	X	ID	2/2
11	234	Product/Service ID	1	X	AN	1/80
12	235	Product/Service ID Qualifier	1	X	ID	2/2
13	234	Product/Service ID	1	X	AN	1/80
14	235	Product/Service ID Qualifier	1	X	ID	2/2
15	234	Product/Service ID	1	X	AN	1/80
16	235	Product/Service ID Qualifier	1	X	ID	2/2
17	234	Product/Service ID	1	X	AN	1/80
18	235	Product/Service ID Qualifier	1	X	ID	2/2
19	234	Product/Service ID	1	X	AN	1/80
20	235	Product/Service ID Qualifier	1	X	ID	2/2
21	234	Product/Service ID	1	X	AN	1/80
22	235	Product/Service ID Qualifier	1	X	ID	2/2
23	234	Product/Service ID	1	X	AN	1/80
24	235	Product/Service ID Qualifier	1	X	ID	2/2
25	234	Product/Service ID	1	X	AN	1/80
26	235	Product/Service ID Qualifier	1	X	ID	2/2
27	234	Product/Service ID	1	X	AN	1/80

Syntax Notes

01	R0102030507
08	P0809
10	P1011
12	P1213
14	P1415
16	P1617
18	P1819

20 P2021
22 P2223
24 P2425
26 P2627

Semantic Notes

03 IT803 is the maximum monetary amount value which the order must not exceed.
04 IT804 is the account number to which the purchase amount is to be charged.
05 IT805 is the date specified by the sender to be shown on the invoice.

Comments

00 Element 235/234 combinations should be interpreted to include products and/or services. See the Data Dictionary for a complete list of IDs.
08 IT808 through IT827 provides for ten different product/service IDs for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU.

ITA - Allowance, Charge or Service

To specify allowances, charges, or services

TRANSACTION SETS USED IN

140 142 143 187 219 220 811 819 851 859 867

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	248	Allowance or Charge Indicator Code	1	M	ID	1/1
02	559	Agency Qualifier Code	1	X	ID	2/2
03	560	Special Services Code	1	X	ID	2/10
04	331	Allowance or Charge Method of Handling Code	1	M	ID	2/2
05	341	Allowance or Charge Number	1	O	AN	1/16
06	359	Allowance or Charge Rate	1	O	R	1/15
07	360	Allowance or Charge Total Amount	1	O	N2	1/15
08	378	Allowance/Charge Percent Qualifier	1	O	ID	1/1
09	332	Percent, Decimal Format	1	X/Z	R	1/6
10	380	Quantity	1	X/Z	R	1/15
11	355	Unit or Basis for Measurement Code	1	X	ID	2/2
12	380	Quantity	1	X/Z	R	1/15
13	352	Description	1	X	AN	1/80
14	150	Special Charge or Allowance Code	1	X	ID	3/3
15	822	Source Subqualifier	1	O	AN	1/15
16	662	Relationship Code	1	O	ID	1/1
17	355	Unit or Basis for Measurement Code	1	O	ID	2/2

Syntax Notes

02 L02031314
08 C0809
10 P1011
15 C1502
17 C1712

Semantic Notes

09 ITA09 is the allowance or charge percent.
10 ITA10 is the quantity basis when the allowance or charge quantity is different from the purchase order or invoice quantity.
12 ITA12 is the quantity of free goods.

Comments

01 If ITA01 equals "A" - allowance or "C" - charge, then at least one of ITA06, ITA07, or ITA08 must be present.
02 ITA02 identifies the source of the code value in ITA03 or ITA15.
07 If ITA07 is present with either ITA06 or ITA08, then ITA07 takes precedence.
13 ITA13 is used to clarify the allowance, charge, or service.

15 ITA15 specifies the individual code list of the agency specified in ITA02.
16 ITA16 describes the relationship of ITA06, ITA07 or ITA09 to an associated segment.

ITC - Information Type and Comment Results

To specify the results of a general request for information

TRANSACTION SETS USED IN
155

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1629	Information Request Result Code	1	M	ID	1/1
02	701	Information Type Code	1	X	ID	2/2
03	1201	Information Status Code	1	O	ID	1/1
04	306	Action Code	1	O	ID	1/2
05	703	Financial Information Type Code	1	X	ID	1/1
06	604	Consolidation Code	1	O	ID	1/1
07	1321	Condition Indicator Code	1	O/Z	ID	2/3

09	61	Free-form Information	1	X/Z	AN	1/30
10	344	Unit of Time Period or Interval Code	1	X/Z	ID	2/2
11	352	Description	1	X/Z	AN	1/80
12	261	Source of Disclosure Code	1	O	ID	1/1

Syntax Notes

03	C0302
04	C0402
05	E0509
06	C0605
07	C0705
08	C0805
10	E1011
10	L100509
11	L110509

Semantic Notes

07	ITC07 specifies the condition of the financial information.
08	ITC08 specifies the original format of the financial information.
09	ITC09 provides a free-form description of the financial information.
10	The ITC10 defines the time frame period relating to the financial information type identified in ITC05 or ITC09.
11	ITC11 provides a free-form description of the period covered by the financial information in ITC05 or ITC09.

ITD - Terms of Sale/Deferred Terms of Sale

To specify terms of sale

TRANSACTION SETS USED IN

110 140 210 304 561 810 811 812 819 830 832 836 838 840 843 845 850 855 857 858 859 860 865

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	336	Terms Type Code	1	O	ID	2/2
02	333	Terms Basis Date Code	1	O	ID	1/2
03	338	Terms Discount Percent	1	O	R	1/6
04	370	Terms Discount Due Date	1	X	DT	8/8
05	351	Terms Discount Days Due	1	X	N0	1/3
06	446	Terms Net Due Date	1	O	DT	8/8
07	386	Terms Net Days	1	O	N0	1/3
08	362	Terms Discount Amount	1	O	N2	1/10
09	388	Terms Deferred Due Date	1	O	DT	8/8
10	389	Deferred Amount Due	1	X	N2	1/10
11	342	Percent of Invoice Payable	1	X	R	1/5
12	352	Description	1	O	AN	1/80
13	765	Day of Month	1	X	N0	1/2
14	107	Payment Method Type Code	1	O	ID	1/2
15	954	Percentage as Decimal	1	O/Z	R	1/10

Syntax Notes

03 L03040513
08 L08040513
09 L091011

Semantic Notes

15 ITD15 is the percentage applied to a base amount used to determine a late payment charge.

Comments

01 If the code in ITD01 is "04", then ITD07 or ITD09 is required and either ITD10 or ITD11 is required; if the code in ITD01 is "05", then ITD06 or ITD07 is required.

ITS - Item Selection

To specify the item selection type and item scope.

TRANSACTION SETS USED IN

892

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1782	Item Selection Type Code	1	M/Z	ID	2/2
02	352	Description	1	O/Z	AN	1/80
03	1782	Item Selection Type Code	1	X/Z	ID	2/2
04	352	Description	1	O/Z	AN	1/80

Syntax Notes

04 C0403

Semantic Notes

01 ITS01 identifies the item selection that will be used in calculating the performance measure. The item selected will vary depending on trading partners, and may range from an individual product, such as 'Brand X - 12 ounce can of peas' to all products that the customer distributes.

02 ITS02, when used, provides information about the item selected in ITS01.

03 ITS03 identifies or restricts the scope of the item selection in ITS01.

04 ITS04, when used, provides information about the item selected in ITS03.

IV1 - Lane Estimates

To identify data applicable to the lanes covered by this proposal

TRANSACTION SETS USED IN

107

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	184	Volume Unit Qualifier	1	X	ID	1/1
02	183	Volume	1	X	R	1/8
03	1470	Number	1	O/Z	N0	1/9
04	91	Transportation Method/Type Code	1	O	ID	1/2
05	344	Unit of Time Period or Interval Code	1	O/Z	ID	2/2

Syntax Notes

01	P0102
05	C0502

Semantic Notes

03	IV103 is the number of miles that will be used to calculate the rate for this lane.
05	IV105 is the time period for the volume indicated in IV102.

IVT - Inventory Parameters

To specify parameters pertaining to inventory measurements.

TRANSACTION SETS USED IN

892

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	673	Quantity Qualifier	1	M/Z	ID	2/2
02	1781	Demand Estimation Type Code	1	M/Z	ID	2/2

Semantic Notes

01 IVT01 identifies the inventory measurement basis used in determining a performance measure.

02 IVT02 identifies the technique used in estimating demand.

JCT - Railroad Junction Information

To indicate railroad junction carriers and interchange information

TRANSACTION SETS USED IN
437

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
03	573	Freight Station Accounting Code	1	O/Z	ID	1/5
04	573	Freight Station Accounting Code	1	O/Z	ID	1/5
05	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
06	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
07	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
08	1560	Interchange Type Code	1	M	ID	1/1
09	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1

Semantic Notes

01 JCT01 is carrier number one.

02 JCT02 is carrier number two.

03 JCT03 is the Freight Station Accounting Code for carrier number one.

04 JCT04 is the Freight Station Accounting Code for carrier number two.

05 JCT05 is the reporting road for carrier number one.

06 JCT06 is the reporting road for carrier number two.

07 If JCT07 is "Y", then a junction advice should be suppressed. If "N", then a junction advice should be provided.

09 If JCT09 is "Y", then this delivery report should trigger a junction advice. If "N", then receipt report should not trigger a junction advice.

JID - Equipment Detail

To specify equipment charged within a particular service code

TRANSACTION SETS USED IN

819

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	235	Product/Service ID Qualifier	1	M	ID	2/2
02	234	Product/Service ID	1	M	AN	1/80
03	380	Quantity	1	X	R	1/15
04	C001	Composite Unit of Measure	1	O		
05	286	Product/Service Condition Code	1	O	ID	2/2
06	782	Monetary Amount	1	O	R	1/18

Syntax Notes

04		C0403

JIL - Line Item Detail for the Operating Expense Statement

To specify the service code or classification the expense will be charged to and provide the required expense data

TRANSACTION SETS USED IN

805 819

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	235	Product/Service ID Qualifier	1	M	ID	2/2
02	234	Product/Service ID	1	M	AN	1/80
03	782	Monetary Amount	1	X	R	1/18
04	128	Reference Identification Qualifier	1	X	ID	2/3
05	127	Reference Identification	1	X	AN	1/80
06	373	Date	1	O/Z	DT	8/8
07	522	Amount Qualifier Code	1	O/Z	ID	1/3

Syntax Notes

04 P0405

07 C0703

Semantic Notes

06 JIL06 is the date the transaction occurred.

07 JIL07 qualifies the type of monetary amount given in JIL03.

JIT - Just-In-Time Schedule

To identify the specific shipping/delivery time in terms of a 24-hour clock and identify the associated quantity

TRANSACTION SETS USED IN

862

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M	R	1/15
02	337	Time	1	M	TM	4/8

JL - Journal Identification

To indicate the carrier, date, time, and individual making a journal entry

TRANSACTION SETS USED IN

468

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	373	Date	1	M	DT	8/8
03	337	Time	1	M	TM	4/8
04	93	Name	1	O	AN	1/60

JS - Rail Junction Settlement Role Information

To define the interchange carriers and their roles

TRANSACTION SETS USED IN

437

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	1561	Rail Junction Settlement Role Code	1	M/Z	ID	1/1
03	140	Standard Carrier Alpha Code	1	M	ID	2/4
04	1561	Rail Junction Settlement Role Code	1	M/Z	ID	1/1

Semantic Notes

02 $02 qualifies $01.

04 $04 qualifies $03.

K1 - Remarks

To transmit information in a free-form format for comment or special instruction

TRANSACTION SETS USED IN

128 210 211 214 272 300 301 304 310 311 312 322 323 350 352 353 355 361 468 854

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	61	Free-form Information	1	M	AN	1/30
02	61	Free-form Information	1	O	AN	1/30

K2 - Administrative Message

To transmit information in a free-form format for comment or special instruction

TRANSACTION SETS USED IN

112 194 213 216 267 272 833

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	352	Description	1	M	AN	1/80

K3 - File Information

To transmit a fixed-format record or matrix contents

TRANSACTION SETS USED IN
194 273 355 436 834 835 837 996

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	449	Fixed Format Information	1	M	AN	1/80
02	1333	Record Format Code	1	O	ID	1/2
03	C001	Composite Unit of Measure	1	O/Z		

Semantic Notes

03 K303 identifies the value of the index.

Comments

02 The default for K302 is content.

L0 - Line Item - Quantity and Weight

To specify quantity, weight, volume, and type of service for a line item including applicable "quantity/rate-as" data

TRANSACTION SETS USED IN

104 110 210 300 301 304 310 311 312 317 322 404 410 417 426 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	213	Lading Line Item Number	1	O	N0	1/6
02	220	Billed/Rated-as Quantity	1	X	R	1/11
03	221	Billed/Rated-as Qualifier	1	X	ID	2/2
04	81	Weight	1	X	R	1/10
05	187	Weight Qualifier	1	X	ID	1/2
06	183	Volume	1	X	R	1/8
07	184	Volume Unit Qualifier	1	X	ID	1/1
08	80	Lading Quantity	1	X/Z	N0	1/7
09	211	Packaging Form Code	1	X	ID	3/3
10	458	Dunnage Description	1	O	AN	2/25
11	188	Weight Unit Code	1	O	ID	1/1
12	56	Type of Service Code	1	O	ID	2/2
13	380	Quantity	1	X/Z	R	1/15
14	211	Packaging Form Code	1	O	ID	3/3
15	1073	Yes/No Condition or Response Code	1	X/Z	ID	1/1

Syntax Notes

02	P0203
04	P0405
06	P0607
08	P0809
11	C1104
13	P1315

Semantic Notes

08	L008 is the number of handling units of the line item tendered to the carrier.
13	L013 can only be used if the code in L009 is PLT, SKD, or SLP.
15	L015 designates whether the carrier will be required to verify the number of units contained on a pallet, slip sheet or skid. Code "Y" indicates that the carrier will be required to verify. Code "N" indicates that the carrier will not be required to verify.

Comments

13	L013 is used to convey the total number of boxes, cartons, or pieces contained on a pallet, skid, or slip sheet for the line item.

L1 - Rate and Charges

To specify rate and charges detail relative to a line item including freight charges, advances, special charges, and entitlements

TRANSACTION SETS USED IN

104 110 210 223 300 301 304 310 312 404 410 417 426 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

21	610	Amount	1	O/Z	N2	1/15
22	148	Lading Value	1	O	R	2/9

Syntax Notes

02	P0203
04	R040506
14	P1415
17	P1718

Semantic Notes

19	L119 is the percent used to determine the charge in L104.
20	L120, if used, indicates the currency for all monetary amounts in this L1 segment.
21	L121 is the origin rated as charge amount.

L10 - Weight Information

To transmit weight information

TRANSACTION SETS USED IN

110 213 470 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	81	Weight	1	M	R	1/10
02	187	Weight Qualifier	1	M	ID	1/2
03	188	Weight Unit Code	1	O	ID	1/1

L11 - Business Instructions and Reference Number

To specify instructions in this business relationship or a reference number

TRANSACTION SETS USED IN

163 194 204 210 211 212 214 215 217 219 220 222 223 224 225 227 228 240 250 304 310 312 753 754 854 920 990

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	X	AN	1/80
02	128	Reference Identification Qualifier	1	X	ID	2/3
03	352	Description	1	X	AN	1/80
04	373	Date	1	O/Z	DT	8/8
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

01 R0103

01 P0102

Semantic Notes

04 L1104 contains data relating to the qualifier cited in L1102.

05 L1105 indicates if the reference numbers included in this transmission were transmitted to the carrier in electronic format or key entered by the carrier. A "Y" indicates the carrier utilized the electronic shipper supplied reference information to create this document. A "N" indicates the carrier key entered the reference information from a shipper supplied document.

L12 - Alternate Lading Description

To provide lading description beyond what is required for rating and billing purposes

TRANSACTION SETS USED IN

304

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	592	Lading Description Qualifier	1	O	ID	1/1
02	352	Description	1	O	AN	1/80

L13 - Commodity Details

To specify the commodity details

TRANSACTION SETS USED IN
601

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	23	Commodity Code Qualifier	1	M	ID	1/2
02	22	Commodity Code	1	M	AN	1/30

15	1589	Harbor Maintenance Fee (HMF) Exemption Code	1	X	AN	1/2
16	610	Amount	1	X/Z	N2	1/15

Syntax Notes

08	P0809
10	P1011
15	P1516

Semantic Notes

07	L1307 is a sequential control number assigned by the sender. It must be unique within a statistical month.
12	L1312 is any additional description of the commodity that could help distinguish it from other similar commodities.
16	L1316 is the amount of the exemption from the Harbor Maintenance Fee (HMF).

L1A - Billing Identification

To identify the road issuing the freight bill and the amount for which the freight bill was issued

TRANSACTION SETS USED IN

426

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	610	Amount	1	O/Z	N2	1/15
02	140	Standard Carrier Alpha Code	1	O	ID	2/4

Semantic Notes

01 L1A01 for a line item: is the freight or special charge; for the total invoice: the total charges - expressed in the standard monetary denomination for the currency specified.

L3 - Total Weight and Charges

To specify the total shipment in terms of weight, volume, rates, charges, advances, and prepaid amounts applicable to one or more line items

TRANSACTION SETS USED IN

104 110 204 210 219 220 304 310 311 312 322 325 404 410 426 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	81	Weight	1	X	R	1/10
02	187	Weight Qualifier	1	X	ID	1/2
03	60	Freight Rate	1	X	R	1/15
04	122	Rate/Value Qualifier	1	X	ID	2/2

11	80	Lading Quantity	1	O	N0	1/7
12	188	Weight Unit Code	1	O	ID	1/1
13	171	Tariff Number	1	O	AN	1/7
14	74	Declared Value	1	X	N2	2/12
15	122	Rate/Value Qualifier	1	X	ID	2/2

Syntax Notes

01	P0102
03	P0304
09	P0910
12	C1201
14	P1415

Semantic Notes

05	L305 is the total charges.

L4 - Measurement

To describe physical dimensions and quantities

TRANSACTION SETS USED IN

104 110 204 210 211 300 301 304 311 312 470

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	82	Length	1	M	R	1/8
02	189	Width	1	M	R	1/8
03	65	Height	1	M	R	1/8
04	90	Measurement Unit Qualifier	1	M	ID	1/1
05	380	Quantity	1	O	R	1/15
06	1271	Industry Code	1	O/Z	AN	1/30

Semantic Notes

06 L406 is the Rounding in Pattern for dimensional shipments.

L5 - Description, Marks and Numbers

To specify the line item in terms of description, quantity, packaging, and marks and numbers

TRANSACTION SETS USED IN

104 110 204 210 215 300 301 304 310 311 312 317 322 362 404 410 417 421 423 426 456 470 858 859

09	22	Commodity Code	1	X	AN	1/30
10	595	Compartment ID Code	1	O	ID	1/1

Syntax Notes

03	P0304
07	C0706
08	P0809

Comments

02	L502 may be used to send quantity information as part of the product description.

L7 - Tariff Reference

To reference details of the tariff used to arrive at applicable rates or charge

TRANSACTION SETS USED IN

126 210 304 310 312 810 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

15	19	City Name	1	O/Z	AN	2/30
16	156	State or Province Code	1	O	ID	2/2

Semantic Notes

10 L710 is the effective date.

15 In L715 and L716, "City" and "State" are used for rate combination city and state.

L8 - Line Item Subtotal

To specify line item subtotals

TRANSACTION SETS USED IN

220 325 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	220	Billed/Rated-as Quantity	1	X	R	1/11

Syntax Notes

01	P0102
03	P030405
06	P0607
09	C0908

Semantic Notes

08	L808 for a line item: is the freight or special charge; for the total invoice: the total charges - expressed in the standard monetary denomination for the currency specified.

L9 - Charge Detail

To specify special charge code and the associated monetary amount

TRANSACTION SETS USED IN

210 220 304

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	150	Special Charge or Allowance Code	1	M	ID	3/3
02	782	Monetary Amount	1	M/Z	R	1/18

Semantic Notes

02 L902 is the transportation charge for a special service performed, expressed in the standard monetary denomination for the currency specified.

LAD - Lading Detail

To transmit detailed lading data pertinent to a pickup or delivery

TRANSACTION SETS USED IN
204 219 220 222

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	211	Packaging Form Code	1	X	ID	3/3

04	1204	Plan Coverage Description	1	O	AN	1/50
05	380	Quantity	1	O/Z	R	1/15
06	1161	Product Option Code	1	O	ID	1/2
07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

05 LC05 is the salary multiplier.

07 LC07 is the employee signature on file indicator. A "Y" value indicates the employee signature has been obtained and is on file; an "N" value indicates the employee signature has not been obtained.

LC1 - Lane Commitments

To specify the details concerning the lane covered by this proposal

TRANSACTION SETS USED IN
106 108

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	21	Number of Shipments	1	X/Z	N0	1/5
02	355	Unit or Basis for Measurement Code	1	X	ID	2/2
03	1470	Number	1	O/Z	N0	1/9

07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
08	1664	Lane Ranking	1	O/Z	R	1/4
09	60	Freight Rate	1	X/Z	R	1/15
10	60	Freight Rate	1	X/Z	R	1/15
11	122	Rate/Value Qualifier	1	X	ID	2/2
12	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

01	P0102
09	C0911
10	C1011
11	L110910

Semantic Notes

01	LC101 is the minimum number of shipments. When used in transaction set 106 it is the minimum number of shipments that are covered by this proposal on this lane. When used in transaction set 108 it is the minimum number of shipments that the carrier has agreed to haul on this lane.
03	LC103 is the number of miles on this lane that will be used to calculate the charge.
06	LC106 is the maximum number of shipments. When used in transaction set 106 it is the maximum number of shipments that are covered by this proposal on this lane. When used in transaction set 108 it is the maximum number of shipments that the carrier has agreed to haul on this lane.
07	LC107 indicates if the entity transmitting this transaction accepts the rate proposal. A "Y" indicates that the proposal is accepted; an "N" indicates that the proposal is not accepted.
08	LC108 is the ranking of the carrier's rate proposal on this lane.
09	LC109 is the low end range of the freight rates proposed by the carriers on this lane.
10	LC110 is the high end range of the freight rates proposed by the carriers on this lane.
12	LC112 indicates if this proposal is dependent upon acceptance of another proposal. A "Y" indicates that this proposal is dependent upon the acceptance of another proposal; an "N" indicates that this proposal is not dependent upon acceptance of another proposal.

LCD - Place/Location Description

To further define and describe a place or location

TRANSACTION SETS USED IN

06	L06070809
07	C0706
08	C0806
09	C0906
10	P1011

Semantic Notes

01	LCT01 is the container identification number.
02	LCT12 should only be used when LCT02 is equal to PLT.

LDT - Lead Time

To specify lead time for availability of products and services

TRANSACTION SETS USED IN

194 536 830 832 836 840 843 846 850 855 860 865 867 888 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

03	344	Unit of Time Period or Interval Code	1	M	ID	2/2
04	373	Date	1	O/Z	DT	8/8

Semantic Notes

04 LDT04 is the effective date of lead time information.

Comments

02 LDT02 is the quantity of unit of time periods.

LE - Loop Trailer

To indicate that the loop immediately preceding this segment is complete

CONTROL SEGMENT

TRANSACTION SETS USED IN

124 148 175 185 186 189 200 201 217 223 240 255 264 265 267 271 272 285 404 417 418 421 422 501 503 754 812 832 834 837 838 841 846 850 854 860 890 894 895 940 945

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	447	Loop Identifier Code	1	M	AN	1/6

Semantic Notes

00 One loop may be nested (contained) within another loop, provided the inner (nested) loop terminates before the outer loop. When specified by the standard setting body as mandatory, this segment, in combination with "LS", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The preferred value for the identifier is the segment ID of the required loop beginning segment.

Comments

00 See X12 EDI Standard Figures, https://figures.x12.org, for an explanation of the use of the LE and LS segments.

LEP - EPA Required Data

To specify the Environmental Protection Agency (EPA) information relating to shipments of hazardous material

TRANSACTION SETS USED IN

204 211 219 222 300 301 304 310 312 322 404 417 418 421 423 435 856 858 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	806	EPA Waste Stream Number Code	1	O	ID	4/6
02	807	Waste Characteristics Code	1	O	ID	12/16
03	156	State or Province Code	1	X/Z	ID	2/2
04	127	Reference Identification	1	X/Z	AN	1/80

Syntax Notes

03 P0304

Semantic Notes

03 LEP03 is used to identify the state or province responsible for the hazardous waste number contained in LEP04.

04 LEP04 is the hazardous waste number.

LEQ - Leased Equipment Information

To communicate necessary data for car hire settlements with leased equipment and identify billing parties and allowed dates

TRANSACTION SETS USED IN
414

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	M	ID	2/3
02	127	Reference Identification	1	M	AN	1/80
03	1095	Year	1	M/Z	N0	4/4
04	1108	Month of the Year Code	1	M	ID	2/2
05	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
06	127	Reference Identification	1	M/Z	AN	1/80
07	782	Monetary Amount	1	M/Z	R	1/18
08	373	Date	1	O/Z	DT	8/8
09	280	Exchange Rate	1	O/Z	R	4/10

Semantic Notes

03 LEQ03 and LEQ04 is the allowed date of the transaction.
05 LEQ05 is Standard Carrier Alpha Code (SCAC) of the equipment lessor.
06 LEQ06 contains the lessor number.
07 LEQ07 is the total amount of mileage detail earnings reported in this transaction.
08 LEQ08 is the document issue date.
09 LEQ09 is the Canadian to U.S. conversion rate.

LET - Load and Equipment Type

To identify the load and equipment type for a high/wide shipment

TRANSACTION SETS USED IN

470

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	752	Surface/Layer/Position Code	1	O	ID	2/2
02	40	Equipment Description Code	1	X	ID	2/2
03	1585	Shape Code	1	O	ID	1/2
04	301	Car Type Code	1	X	ID	1/4

Syntax Notes

02	R0204

LFG - Hazardous Information, Finished Goods

To describe hazardous material information for finished goods

TRANSACTION SETS USED IN

832

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	352	Description	1	M/Z	AN	1/80
02	215	Hazardous Classification Code	1	M	ID	1/30
03	277	UN/NA Identification Code	1	M	ID	6/6
04	218	Hazardous Placard Notation Code	1	M	ID	14/40
05	254	Packing Group Code	1	O	ID	1/3
06	1577	Hazardous Material Regulations Exception Code	1	O	ID	1/1

Semantic Notes

01 LFG01 is the hazardous material shipping name.

LFH - Free-form Hazardous Material Information

To uniquely identify the variable information required by government regulation covering the transportation of hazardous material shipments

TRANSACTION SETS USED IN

204 211 219 222 300 301 304 310 312 322 404 417 418 421 423 435 856 858 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	808	Hazardous Material Shipment Information Qualifier	1	M	ID	3/3
02	809	Hazardous Material Shipment Information	1	M	AN	1/25
03	809	Hazardous Material Shipment Information	1	O	AN	1/25
04	1023	Hazard Zone Code	1	O	ID	1/1
05	355	Unit or Basis for Measurement Code	1	X	ID	2/2
06	380	Quantity	1	X/Z	R	1/15
07	380	Quantity	1	O/Z	R	1/15
08	373	Date	1	O/Z	DT	8/8

Syntax Notes

05 P0506

Semantic Notes

06 LFH06 indicates activity of the radioactive material.

07 LFH07 indicates transport index of the radioactive material.

08 LFH08 is the date fumigation began.

LFI - Beginning Segment for Locomotive Information

To provide locomotive information between rail carriers

TRANSACTION SETS USED IN
436

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	154	Standard Point Location Code	1	M	ID	6/9
02	373	Date	1	M/Z	DT	8/8
03	337	Time	1	M	TM	4/8
04	578	Equipment Status Code	1	M	ID	1/2
05	1271	Industry Code	1	M/Z	AN	1/30
06	1271	Industry Code	1	O	AN	1/30
07	1271	Industry Code	1	O	AN	1/30
08	41	Interchange Train Identification	1	O	AN	1/10

Semantic Notes

02 LFI02 and LFI03 are the equipment status date and time.

05 LFI05 through LFI07 are the Locomotive Information Codes (see Code Source 461).

LH - Mixed Hazardous Commodities

To specify hazardous line items in terms of hazardous mnemonic, identification number, reportable quantities, and limited quantities

TRANSACTION SETS USED IN
859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	213	Lading Line Item Number	1	M	N0	1/6
02	758	Hazardous Mnemonic Code	1	M	ID	2/3
03	127	Reference Identification	1	M	AN	1/80
04	128	Reference Identification Qualifier	1	M	ID	2/3
05	759	Reportable Quantity Code	1	O	ID	2/2
06	760	Limited Quantity Indication Code	1	O	ID	1/1

LH1 - Hazardous Identification Information

To specify the hazardous commodity identification reference number and quantity

TRANSACTION SETS USED IN

204 211 219 222 300 301 304 310 312 322 404 417 418 421 423 856 858 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	355	Unit or Basis for Measurement Code	1	M	ID	2/2
02	80	Lading Quantity	1	M	N0	1/7
03	277	UN/NA Identification Code	1	O	ID	6/6
04	200	Hazardous Materials Page	1	O	AN	1/6
05	22	Commodity Code	1	O	AN	1/30
06	355	Unit or Basis for Measurement Code	1	X	ID	2/2
07	380	Quantity	1	X	R	1/15
08	595	Compartment ID Code	1	O	ID	1/1
09	665	Residue Indicator Code	1	O	ID	1/1
10	254	Packing Group Code	1	O	ID	1/3
11	1375	Interim Hazardous Material Regulatory Number	1	O	AN	1/5
12	1271	Industry Code	1	O/Z	AN	1/30

Syntax Notes

06 P0607

Semantic Notes

12 LH112 is the packaging form code for the non-bulk container passed in the LH101 as defined in 49 CFR 178 and required by 49 CFR 172. (See Code Source 937)

Comments

01 LH101 and LH102 are used to convey the number and type of packages for bulk and nonbulk movements.

06 LH106 and LH107 are used to convey the quantity or volume and unit of measure for shipments.

09 In LH109, a value of "R" or "P" requires that the receiver generate the words "residue: last contained" prior to the shipping name in accordance with regulations.

LH2 - Hazardous Classification Information

To specify the hazardous notation and endorsement information

TRANSACTION SETS USED IN

204 211 219 222 284 300 301 304 310 312 322 404 417 418 421 423 435 856 858 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	215	Hazardous Classification Code	1	O	ID	1/30
02	983	Hazardous Class Qualifier	1	O	ID	1/1
03	218	Hazardous Placard Notation Code	1	O	ID	14/40
04	222	Hazardous Endorsement Code	1	O	ID	4/25
05	759	Reportable Quantity Code	1	O	ID	2/2
06	355	Unit or Basis for Measurement Code	1	X/Z	ID	2/2
07	408	Temperature	1	X	R	1/4
08	355	Unit or Basis for Measurement Code	1	X/Z	ID	2/2
09	408	Temperature	1	X	R	1/4
10	355	Unit or Basis for Measurement Code	1	X/Z	ID	2/2
11	408	Temperature	1	X	R	1/4
12	188	Weight Unit Code	1	X/Z	ID	1/1
13	267	Net Explosive Quantity	1	X	N0	1/10

Syntax Notes

06	P0607
08	P0809
10	P1011
12	P1213

Semantic Notes

06	LH206 and LH207 indicate the flashpoint temperature.
08	LH208 and LH209 indicate the control temperature.
10	LH210 and LH211 indicate the emergency temperature.
12	LH212 and LH213 indicate the net explosive weight.

LH3 - Hazardous Material Shipping Name Information

To specify the hazardous material shipping name and additional descriptive requirements

TRANSACTION SETS USED IN

204 211 219 222 284 300 301 304 310 312 322 404 417 418 421 423 435 856 858 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	224	Hazardous Material Shipping Name	1	X	AN	1/25
02	984	Hazardous Material Shipping Name Qualifier	1	X	ID	1/1
03	985	N.O.S. Indicator Code	1	O	ID	3/3
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

01 P0102

Semantic Notes

04 If LH304 is "Y", then this is an Association of American Railroads Operations and Transportation Bulletin 55 commodity. If "N", it is not an Association of American Railroads Operations and Transportation Bulletin 55 commodity.

LH4 - Canadian Dangerous Requirements

To specify additional Transport Canada requirements covering transportation of dangerous goods in Canada

TRANSACTION SETS USED IN

204 211 219 222 300 301 304 310 312 322 404 417 418 421 423 435 832 856 858 897 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	238	Emergency Response Plan Number	1	X	AN	1/12
02	364	Communication Number	1	X	AN	1/2048
03	254	Packing Group Code	1	O	ID	1/3
04	230	Subsidiary Classification Code	1	O	ID	1/3
05	230	Subsidiary Classification Code	1	O	ID	1/3
06	230	Subsidiary Classification Code	1	O	ID	1/3
07	271	Subsidiary Risk Indicator Code	1	O	ID	1/2
08	267	Net Explosive Quantity	1	X	N0	1/10
09	805	Canadian Hazardous Notation	1	O	AN	1/25
10	986	Special Commodity Indicator Code	1	O	ID	1/1
11	364	Communication Number	1	O/Z	AN	1/2048
12	355	Unit or Basis for Measurement Code	1	X	ID	2/2
13	808	Hazardous Material Shipment Information Qualifier	1	X	ID	3/3
14	380	Quantity	1	X	R	1/15
15	355	Unit or Basis for Measurement Code	1	X	ID	2/2

Syntax Notes

01	P0102
08	P0812
13	P131415

Semantic Notes

11	LH411 is an additional telephone number.

Comments

02	LH402 is used for the emergency response plan telephone number.
04	LH404 is for the first subsidiary classification.
05	LH405 is for the second subsidiary classification.
06	LH406 is for the third subsidiary classification.
13	Valid UOM Codes for LH413 code LQI are KG (Kilogram) or LT (Liter)

LH6 - Hazardous Certification

To specify the name of the person certifying that the shipment complies with the regulations and/or the actual certification

TRANSACTION SETS USED IN

204 211 219 222 304 404 423 858 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	93	Name	1	O	AN	1/60
02	272	Hazardous Certification Code	1	X	ID	1/1
03	273	Hazardous Certification Declaration	1	X	AN	1/25
04	273	Hazardous Certification Declaration	1	O	AN	1/25

Syntax Notes

02	P0203

LHE - Empty Equipment Hazardous Material Information

To specify the "last contained" hazardous shipping name, placard notation, and reference numbers for empty equipment

TRANSACTION SETS USED IN
856 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	224	Hazardous Material Shipping Name	1	M	AN	1/25
02	218	Hazardous Placard Notation Code	1	M	ID	14/40
03	128	Reference Identification Qualifier	1	M	ID	2/3
04	127	Reference Identification	1	M	AN	1/80
05	759	Reportable Quantity Code	1	O	ID	2/2

LHR - Hazardous Material Identifying Reference Numbers

To transmit specific hazardous material reference numbers

TRANSACTION SETS USED IN

300 301 304 310 312 322 404 417 418 421 423 856 858 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	M	ID	2/3
02	127	Reference Identification	1	M	AN	1/80
03	373	Date	1	O	DT	8/8

LHT - Transborder Hazardous Requirements

To specify the placard information required by the second government agency when shipment is to cross into another country

TRANSACTION SETS USED IN

204 211 219 222 300 301 304 310 312 322 404 417 418 421 423 856 858 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	215	Hazardous Classification Code	1	O	ID	1/30
02	218	Hazardous Placard Notation Code	1	O	ID	14/40
03	222	Hazardous Endorsement Code	1	O	ID	4/25

LIC - License Information

To provide license information

TRANSACTION SETS USED IN
252

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	156	State or Province Code	1	M/Z	ID	2/2
02	235	Product/Service ID Qualifier	1	M	ID	2/2
03	234	Product/Service ID	1	M	AN	1/80
04	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
05	546	Status Code	1	M/Z	ID	2/2
06	127	Reference Identification	1	O/Z	AN	1/80
07	156	State or Province Code	1	X/Z	ID	2/2
08	127	Reference Identification	1	O/Z	AN	1/80

Syntax Notes

08 C0807

Semantic Notes

01 LIC01 identifies the licensing state.

04 LIC04 defines the license residency type. A "Y" indicates a resident license; an "N" indicates a non resident license.

05 LIC05 defines the license status.

06 LIC06 defines the license number.

07 LIC07 defines the resident state.

08 LIC08 defines the resident state license number.

LID - Loss Information Description

To provide details on a specific insurance claim

TRANSACTION SETS USED IN
124 272

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1250	Date Time Period Format Qualifier	1	M	ID	2/3
02	1251	Date Time Period	1	M/Z	AN	1/35
03	1271	Industry Code	1	O/Z	AN	1/30
04	1271	Industry Code	1	O/Z	AN	1/30
05	352	Description	1	O/Z	AN	1/80
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
08	352	Description	1	O/Z	AN	1/80
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

02 LID02 is the date of loss or system date.

03 LID03 is used to provide the loss description code. See Code Source 290.

04 LID04 is used to provide the cause of loss code. See Code Source 291.

05 LID05 is used to provide a detailed description of the loss event.

06 LID06 indicates whether the keys were in the vehicle at the time of the loss. A "Y" indicates they were in the vehicle; an "N" indicates they were not.

07 LID07 indicates whether the vehicle was locked at the time of the loss. A "Y" indicates the vehicle was locked; an "N" indicates it was not locked.

08 LID08 is text describing weather conditions.

09 LID09 indicates whether the responsible party is known. A "Y" indicates the party is known; an "N" indicates the party is not known.

LIE - Individual or Event Location

To provide an accurate description of where an individual was located or an event took place

TRANSACTION SETS USED IN

195 272 284 620 625

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1466	Location Type Code	1	M	ID	2/2
02	1465	Proximity Code	1	O	ID	2/2
03	352	Description	1	O/Z	AN	1/80
04	98	Entity Identifier Code	1	O	ID	2/3

Semantic Notes

03 LIE03 is the free-form description of the location.

LIN - Item Identification

To specify basic item identification data

TRANSACTION SETS USED IN

100 105 111 140 142 143 154 201 252 267 268 271 272 273 304 325 500 503 511 527 536 650 805 812 814 818 830 832 837 838 840 841 842 843 844 845 846 847 848 849 850 851 852 855 856 860 861 862 863 865 866 867 869 877 881 883 887 888 897

20	P2021
22	P2223
24	P2425
26	P2627
28	P2829
30	P3031

Semantic Notes

01	LIN01 is the line item identification

Comments

00	See the Data Dictionary for a complete list of IDs.
02	LIN02 through LIN31 provide for fifteen different product/service IDs for each item. For example: Case, Color, Drawing No., ISBN No., Model No., or SKU.

LM - Code Source Information

To transmit standard code list identification information

TRANSACTION SETS USED IN

105 112 124 135 139 140 142 148 155 175 176 179 180 185 195 285 286 288 500 501 503 504 511 517 527 536 561 567 568 620 625 650 810 812 814 821 824 830 832 836 838 840 842 843 846 850 856 857 860 861 863 865 867 869 870 885 888 897 940 945 947

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	559	Agency Qualifier Code	1	M	ID	2/2
02	822	Source Subqualifier	1	O	AN	1/15

Comments

02 LM02 identifies the applicable industry code list source information.

LN - Loan Information

To specify information about the loan

TRANSACTION SETS USED IN
148 206 245

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	782	Monetary Amount	1	M/Z	R	1/18
03	1250	Date Time Period Format Qualifier	1	X	ID	2/3
04	1251	Date Time Period	1	X/Z	AN	1/35

06	782	Monetary Amount	1	X/Z	R	1/18
07	954	Percentage as Decimal	1	O/Z	R	1/10
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	1081	Loan Purpose Code	1	O	ID	2/2
10	1085	Loan Payment Type Code	1	O	ID	2/2
11	1086	Loan Rate Type Code	1	O	ID	1/1

Syntax Notes

03 P0304
05 P0506

Semantic Notes

01 LN01 is the loan number.
02 LN02 is the account balance.
04 LN04 is the date of the loan.
05 LN05 is the payment frequency.
06 LN06 is the payment amount.
07 LN07 is the interest rate of the loan.
08 LN08 designates whether this is an open or closed end loan. A "Y" designates an open end loan; an "N" designates a closed end loan.

LN1 - Loan Specific Data

To provide high-level information about a loan

TRANSACTION SETS USED IN
199 202 261 265 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

Syntax Notes

07	P0708
16	L161718192021
17	C1716
18	C1816
19	C1916
20	C2016
21	C2116

Semantic Notes

01	LN101 is the unpaid principal balance of the loan.
02	LN102 describes the lien priority for this loan.

03 LN103 defines the real estate loan type.
04 LN104 is the initial or original principal balance.
05 LN105 is the current loan note rate.
06 LN106 defines the loan-to-value ratio.
07 LN107 is the period type for payment frequency.
08 LN108 is the current periodic principal and interest payment.
09 LN109 defines the security instrument, such as a mortgage or a deed.
10 LN110 defines underwriting documentation requirements.
11 LN111 defines the interest rate characteristics for the loan.
12 LN112 defines whether loan is assumable. A "Y" indicates the loan is assumable; an "N" indicates it is not.
13 LN113 is the lender's account number.
14 LN114 is the initial or original payment rate.
15 LN115 is the rate used by the lender to qualify the loan.
16 LN116 defines the date format used in LN117 through LN121.
17 LN117 is the loan note date.
18 LN118 is the scheduled due date of the first mortgage payment.
19 LN119 is the last paid installment date.
20 LN120 is the date interest on the loan is paid to.
21 LN121 is the next payment installment due date.
22 LN122 is the amount of other or additional financing.
23 LN123 is the current balance of negative amortization.

LN2 - Existing Real Estate Loan Specific Data

To provide specific information about a real estate loan

TRANSACTION SETS USED IN
262

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

12	C1210

Semantic Notes

03	LN203 is the current loan note rate.
04	LN204 is the period type for payment frequency.
06	LN206 defines whether the loan is assumable. A "Y" indicates it is; an "N" indicates it is not.
08	LN208 is the lender's name.
11	LN211 is the initial term of the loan.
12	LN212 is the remaining term of the loan.

LOC - Location

To describe the location in space and time of the axis of an item relative to an origin axis; Euclidean geometry has been assumed with orthogonal axes; the sequence of axes has been chosen in the customary sequence of X, Y, and Z, however, it is possible to just use two-dimensional space rather than three-dimensional space

TRANSACTION SETS USED IN

15	C1514
17	C1716
19	C1918
21	C2120
22	P2223

Semantic Notes

01 LOC01 through LOC03 describe the item.

04 LOC04 is a description of the positional reference point on the item.

08 LOC05 through LOC08 describe the environment in which the item is placed.

09 LOC09 is a description of the positional reference point in the environment. This is the origin of the original axes.

10 LOC10 through LOC15 describe the translation in the three-dimensional space of the axes with respect to the original axes.

10 LOC10 is the principal X axis of the item.

10 LOC10 through LOC14 describe the principal XY plane of the item.

16 LOC16 is measured with respect to the XY plane around the X axis.

18 LOC18 is measured with respect to the YZ plane around the Y axis.

20 LOC20 is measured with respect to the ZX plane around the Z axis.

Comments

00 It is possible to translate the axis system in zero, one, two, or three axial directions.

00 The temporal measurements would be used, for example, to describe the positions of a robot head. They may be specified as t1, t2... or n1, n2...etc. Or, they may be specified in time units such as 0, 0.8, 1.6, etc. They may also represent positions where they would be specified as p1, p2, etc.

17 All angular positions of an axis vector are measured in a counter-clockwise rotation around the original axis vector, looking from the positive direction of the vector towards the origin. The angular unit is specified by the corresponding unit of measurement, as in LOC17, LOC19, and LOC21.

LOD - Location Description

To provide a general description of the area where an entity is located

TRANSACTION SETS USED IN
155 284

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1632	General Territory Code	1	X	ID	1/2

07	1470	Number	1	O/Z	N0	1/9

Semantic Notes

02 LP02 is a serial identifier the shipper assigns to the item or unit it is shipping (for example, an order number or requisition number).

03 LP03 is the serial identifier of the shipping papers (for example a manifest number or bill of lading number). Those papers describe the consist of the shipment.

06 LP06 is used to describe the quantity of vehicle wheels that make contact with the road.

07 LP07 is used to describe the total quantity of axles on the vehicle.

LQ - Industry Code Identification

To identify standard industry codes

TRANSACTION SETS USED IN

20	352	Description	1	O	AN	1/80
21	1136	Code Category	1	O/Z	ID	2/2

Syntax Notes

03 P0304

Semantic Notes

01 LRQ01 is the principal amount requested.
02 LRQ02 is the loan requested interest rate percent.
03 LRQ03 is the period type for payment frequency.
04 LRQ04 is the initial periodic principal and interest payment.
05 LRQ05 defines intended property use.
06 LRQ06 defines the method of conduct of the interview.
07 LRQ07 defines if the loan is an assumption of an existing loan. A "Y" indicates it is an assumption; an "N" indicates it is not.
09 LRQ09 defines the loan purpose.
10 LRQ10 defines the purpose of the refinance.
11 LRQ11 is the total amount of existing liens.

12 LRQ12 is the total amount of debts paid by proceeds.
13 LRQ13 is the legislative reference of a government loan program.
14 LRQ14 is the name of the lender's program for this loan.
19 LRQ19 is the mortgage term expressed in months.
21 LRQ21 defines the current investor of the refinanced loan.

Comments

07 If LRQ07 is "Y - Yes", then LRQ08 is required.
09 If LRQ09 is "05 - Refinance," then LRQ12 is required.
09 If LRQ09 is "15 - Other Loan Purpose," then LRQ20 is required.
09 If LRQ09 is "05" - Refinance and LRQ10 is "14" - Other Purpose of Refinance, then LRQ20 is required.
15 If LRQ15 is "7 - Other Real Estate Loan Type," then LRQ16 is required.
17 If LRQ17 is "01 - Adjustable Rate Mortgage (ARM)" or "13 - Other Loan Payment Type," then LRQ18 is required.

LS - Loop Header

To indicate that the next segment begins a loop

CONTROL SEGMENT

TRANSACTION SETS USED IN

124 148 175 185 186 189 200 201 217 223 240 255 264 265 267 271 272 285 404 417 418 421 422 501 503 754 812 832 834 837 838 841 846 850 854 860 890 894 895 940 945

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	447	Loop Identifier Code	1	M	AN	1/6

Semantic Notes

00 One loop may be nested (contained) within another loop, provided the inner (nested) loop terminates before the outer loop. When specified by the standard setting body as mandatory, this segment in combination with "LE", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The preferred value for the identifier is the segment ID of the required loop beginning segment.

Comments

00 See X12 EDI Standard Figures, https://figures.x12.org, for an explanation of the use of the LS and LE segments.

LS1 - Asset Item Identification

To specify basic asset line item data

TRANSACTION SETS USED IN
154 851

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M	R	1/15

06	234	Product/Service ID	1	O/Z	AN	1/80
07	234	Product/Service ID	1	O/Z	AN	1/80

Semantic Notes

04 LS104 indicates the manufacturer's part number.
05 LS105 indicates the manufacturer.
06 LS106 indicates the type.
07 LS107 indicates the model.

LSC - Location Scope Parameter

To specify parameters pertaining to a location. Determines the role of a facility or group of facilities specified in the performance measurement.

TRANSACTION SETS USED IN
892

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1783	Location Scope Parameter Type Code	1	M	ID	2/2
02	1784	Location Scope Type Code	1	M	ID	2/2

04	708	Rating Summary Value Code	1	O/Z	ID	1/2

Syntax Notes

01 P0102

02 R0203

Semantic Notes

02 LTE02 is the code for the letter of recommendation rating category.

03 LTE03 is the free-form rating category when the codified values are not adequate.

04 LTE04 is the recommendation rating or evaluation.

LTR - Laboratory Test Results

To describe laboratory testing results, normal result ranges, or both

TRANSACTION SETS USED IN
186

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1270	Code List Qualifier Code	1	M	ID	1/3

Syntax Notes

04	L0403
05	L0506
10	L100809
11	L110809
12	L120809

Semantic Notes

02	LTR02 identifies the test performed.
03	LTR03 and LTR06 are the readings for the test performed.
04	LTR04 qualifies the test reading in LTR03.
08	LTR08 and LTR09 or both describe the expected normal ranges for the test performed. They may be used singly or together depending on the test.
10	LTR10 qualifies LTR08 and LTR09 or both if the expected ranges are gender dependent.
11	LTR11 and LTR12 or both describe the minimum and maximum age ranges if the expected normal ranges (LTR08 and LTR09 or both) are age dependent.

LUC - Loan Underwriting

To identify the loan underwriting codes

TRANSACTION SETS USED IN

202

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1103	Loan Documentation Type Code	1	M	ID	1/1

12	954	Percentage as Decimal	1	X	R	1/10

Syntax Notes

07 P0708
09 P0910
11 P1112

Semantic Notes

01 M101 is the code identifying the country in whose currency the insurance is specified.
05 M105 (organization identifier) is the code for the beneficiary of the insurance policy.
06 M106 is free-form information used to describe the type of insurance coverage.

Comments

07 M107 through M112 may be used to specify the values to be used in insurance formulas. For example: M107 and M108 may specify the basis of application and the premium rate ($0.25 per hundred), M109 and M110 may specify the value at which insurance is to be obtained (insure at 110% of bill of lading value), and M111 and M112 may specify the premium rate (rate of .015 per dollar).

M10 - Manifest Identifying Information

To transmit manifest identifying information

TRANSACTION SETS USED IN
309 350 352 353 354 355 356 357 358

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

17	256	Manifest Type Code	1	O/Z	ID	1/1

Syntax Notes

04 P0410
15 P1516

Semantic Notes

04 M1004 is the International Maritime Organization (IMO) Vessel Code maintained in Lloyd's Register of Shipping.
07 M1007 is used for the six-digit Numeric Manifest Sequence Number.
11 M1011 indicates if the transmission involves an in-bond participant. A "Y" indicates it does; an "N" indicates it does not.
12 M1012 is a unique identification number for the manifest assigned by the originator of the manifest with a maximum length of 15.
17 M1017 is the type of initial manifest being amended by this transmission.

Comments

03 M1003 is the code identifying the country in which the ship (vessel) is registered.
08 M1008 is used for number of bills lading. (Maximum five-digits.)

M11 - Manifest Bill of Lading Details

To transmit bill of lading detail information for a manifest

TRANSACTION SETS USED IN
309 355

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	598	Bill of Lading/Waybill Number	1	M/Z	AN	1/50

27	373	Date	1	O/Z	DT	8/8
28	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

03	P0304
05	P0506
07	P0708
11	P1113
15	C1514
18	C1815

19 C1918

Semantic Notes

01 M1101 is the unique bill of lading number.

02 M1102 is used for foreign port where the cargo is loaded.

03 M1103 is used for total number of pieces on a bill of lading using the smallest package unit (maximum eight-digits).

04 M1104 is the smallest package unit code.

11 M1111 is the house bill number for consolidation.

12 M1112 is the unique bill of lading issuer code.

13 M1113 is the issuer code of the consolidated shipment.

14 M1114 is the code of the secondary party nominated to receive bill of lading status notifications.

15 M1115 is the code of the second secondary party nominated to receive bill of lading status notifications.

18 M1118 is the Standard Carrier Alpha Code (SCAC) of an additional second notify carrier.

19 M1119 is the Standard Carrier Alpha Code (SCAC) of an additional second notify carrier.

20 M1120 is the last place/port prior to loading.

21 M1121 is the first foreign port where the carrier takes possession of the cargo.

22 M1122 identifies mode of transportation from the last place/port prior to loading.

23 M1123 is the method of payment for transportation.

24 M1124 is the Maritime Administration Cargo Preference Program Code (see code source 926).

25 M1125 identifies the reporting identifier used for Port of Lading in M1102.

27 M1127 is the date the Goods returning to the U.S., Canada or Mexico departed the U.S., Canada, or Mexico.

28 M1128 is the indicator as to whether the Goods returning to the U.S., Canada or Mexico never left the control of the foreign country's Customs or the border crossing carrier while out of the country. A "Y" indicates the Goods never left the control of Customs or the border crossing carrier while out of the country. An "N" indicates the Goods did leave the control of foreign country's Customs or the border crossing carrier while out of the country.

Comments

01 If identifying the U.S. Customs and Border Protection (CBP) bill number, the maximum length shall be 12. If identifying the Canadian cargo control number, the maximum length shall be 25.

M12 - In-bond Identifying Information

To transmit in-bond information

TRANSACTION SETS USED IN
309 355 357 404 410 417 601 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	581	Customs Entry Type Code	1	M	ID	2/3
02	601	Customs Entry Number	1	X	AN	1/50
03	310	Location Identifier	1	O/Z	AN	1/30
04	310	Location Identifier	1	O/Z	AN	1/30
05	602	Customs Shipment Value	1	O	N0	2/9
06	603	In-bond Control Number	1	X	AN	1/50
07	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
08	128	Reference Identification Qualifier	1	X	ID	2/3
09	127	Reference Identification	1	X	AN	1/80
10	91	Transportation Method/Type Code	1	X	ID	1/2
11	182	Vessel Name	1	X	AN	2/50
12	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
13	373	Date	1	O/Z	DT	8/8
14	310	Location Identifier	1	O/Z	AN	1/30

Syntax Notes

02 E0206
06 C0608
08 P0809
10 P1011

Semantic Notes

03 M1203 is a four-digit numeric census schedule D when identifying a U.S. port, and a three-digit numeric memorandum D when identifying a Canadian port. It is the port of destination if M1201 is "61". It is the port of export if M1201 is "62" or "63".

04 M1204 is five-digit numeric census schedule K. It is the foreign port of destination if M1201 is "62" or "63".

07 M1207 identifies the carrier to whom liability is transferred.

12 M1212 is the Food and Drug Administration prior notification requirement indicator. A "Y" indicates that the shipper has advised the commodity is subject to the prior notification requirement. An "N" indicates the commodity is not subject to the prior notification requirement. If blank the default value is "N".

13 M1213 is the estimated date of departure of the in-bond shipment from the U.S.

14 M1214 is the FIRMS (Facilities Information Resources Management System) code of the location of the in-bond shipment.

Comments

02 If M1202 does not contain the paperless entry number, then M1206 is required by the importing border crossing carrier.

05 M1205 is the value in whole dollars of the in-bond movement. Use twenty dollars per kilo if value is unknown.

M13 - Manifest Amendment Details

To correct a manifest record prior to conveyance arrival or to amend a manifest record after conveyance arrival

TRANSACTION SETS USED IN
309 355 357 358

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	310	Location Identifier	1	M/Z	AN	1/30
03	580	Amendment Type Code	1	O	ID	1/1
04	598	Bill of Lading/Waybill Number	1	M	AN	1/50
05	380	Quantity	1	O/Z	R	1/15
06	393	Amendment Code	1	O	ID	2/2
07	306	Action Code	1	O	ID	1/2
08	598	Bill of Lading/Waybill Number	1	X/Z	AN	1/50
09	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
10	140	Standard Carrier Alpha Code	1	X/Z	ID	2/4
11	66	Identification Code Qualifier	1	X	ID	1/2
12	67	Identification Code	1	X	AN	2/80

Syntax Notes

08 P0810
11 P1112

Semantic Notes

01 M1301 is the bill of lading issuer code.
02 M1302 is used for discharge port (four-digit numeric census schedule D).
05 M1305 is new manifest quantity and is used if M1303 equals "R".
08 M1308 is used to report individual portions of a consolidated shipment.
09 M1309 is the conveyance operator's Standard Carrier Alpha Code (SCAC).
10 M1310 is the issuer code for the consolidated shipment.

M14 - General Order Status Information

General order bill of lading

TRANSACTION SETS USED IN
352 355

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	598	Bill of Lading/Waybill Number	1	M/Z	AN	1/50
02	392	Bill of Lading Status Code	1	M	ID	1/2

10	127	Reference Identification	1	O/Z	AN	1/80
11	310	Location Identifier	1	O/Z	AN	1/30

Syntax Notes

06 P0608

Semantic Notes

01 M1401 is used for bill of lading number.
05 M1405 is the release issue date.
06 M1406 is the unique bill of lading number for the consolidated shipment.
07 M1407 is the unique bill of lading issuer code.
08 M1408 is the issuer code for the consolidated shipment.
09 M1409 is the quantity released by Customs or the quantity being requested sent to General Order by the carrier.
10 M1410 is the Internal Revenue Service identification number of the bonded carrier.
11 M1411 is the Facilities Information Resource Management System (FIRMS) code.

M15 - Customs Events Advisory Details

To notify Customs of in-bond cargo movement or of a conveyance arrival or departure, or of transfer of custodial liability when an in-bond movement involves multiple legs

TRANSACTION SETS USED IN
353 355

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1497	Notification Entity Qualifier	1	M	AN	1/2
02	127	Reference Identification	1	M	AN	1/80

09	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
10	19	City Name	1	X/Z	AN	2/30
11	156	State or Province Code	1	O/Z	ID	2/2
12	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
13	128	Reference Identification Qualifier	1	X	ID	2/3
14	127	Reference Identification	1	X	AN	1/80
15	182	Vessel Name	1	O/Z	AN	2/50
16	91	Transportation Method/Type Code	1	X	ID	1/2
17	310	Location Identifier	1	O/Z	AN	1/30
18	373	Date	1	X/Z	DT	8/8
19	337	Time	1	X/Z	TM	4/8

Syntax Notes

04	R0410
11	C1110
13	P1314
15	C1516
18	P1819

Semantic Notes

03	M1503 is the start date of the event.
04	M1504 is the Schedule D code for place of cargo movement, transfer of liability or conveyance arrival or departure.
05	M1505 is the unique bill of lading issuer code, required when M1501 is "2", "6", or "B".
06	M1506 is the start time of the event.
08	M1508 is the Internal Revenue Service identification number of the next in-bond carrier.
09	M1509 is the Standard Carrier Alpha Code (SCAC) of the next in-bond carrier.
10	M1510 is the city in which a transfer of custodial liability occurs.

11 M1511 is the state or province code for the city named in M1510.

12 If M1512 is "Y", then M1504 is an intermediate port. If "N", then M1504 is the port of final destination.

15 M1515 is the name of the exporting vessel.

17 M1517 is the last foreign port prior to sailing for the United States.

18 M1518 is the end date of the event.

19 M1519 is the end time of the event.

Comments

02 For cargo arrival or export notifications or transfer of liability, M1502 can be an in-bond number, bill of lading number or container ID. For conveyance arrival and departures, M1502 will contain the voyage or trip number.

M2 - Sales/Delivery Terms

To state terms and dates

TRANSACTION SETS USED IN
304 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	139	Sales Terms Code	1	M	ID	2/2
02	138	Sales Reference Number	1	O	AN	4/6
03	137	Sales Reference Date	1	O	DT	8/8
04	335	Transportation Terms Code	1	O	ID	3/3
05	136	Sales Comment	1	O	AN	2/30
06	32	Delivery Date	1	O	DT	8/8
07	309	Location Qualifier	1	X/Z	ID	1/2
08	310	Location Identifier	1	X	AN	1/30

Syntax Notes

07 P0708

Semantic Notes

07 M207 and M208 indicate the location where the transportation terms are ended.

M20 - Permit to Transfer Request Details

To provide Customs with Permit to Transfer details

TRANSACTION SETS USED IN
355 356

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	598	Bill of Lading/Waybill Number	1	M	AN	1/50

10	761	Equipment Number Check Digit	1	O	N0	1/1
11	380	Quantity	1	O/Z	R	1/15

Semantic Notes

01 M2001 is used to identify the bill of lading issuer.

11 M2011 is the number of pieces in the permit to transfer request.

M21 - Supplementary In-Bond Information

To transmit data relating to a U.S. Customs and Border Protection (CBP) in-bond movement

TRANSACTION SETS USED IN
355 357

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	581	Customs Entry Type Code	1	M/Z	ID	2/3
02	310	Location Identifier	1	M/Z	AN	1/30
03	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
04	598	Bill of Lading/Waybill Number	1	M/Z	AN	1/50
05	1428	Master In-bond Type Code	1	M	ID	1/1
06	603	In-bond Control Number	1	M	AN	1/50
07	140	Standard Carrier Alpha Code	1	X/Z	ID	2/4
08	598	Bill of Lading/Waybill Number	1	X/Z	AN	1/50
09	140	Standard Carrier Alpha Code	1	X/Z	ID	2/4
10	598	Bill of Lading/Waybill Number	1	X/Z	AN	1/50
11	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
12	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
13	380	Quantity	1	O/Z	R	1/15
14	128	Reference Identification Qualifier	1	X/Z	ID	2/3
15	127	Reference Identification	1	X	AN	1/80

Syntax Notes

07 P0708
09 P0910
14 P1415

Semantic Notes

01 M2101 is the existing In-Bond Type Code.
02 M2102 is the new port of destination code.
03 M2103 is the unique bill of lading issuer code.
04 M2104 is the unique bill of lading number.
07 M2107 is the issuer code for the house bill of lading.
08 M2108 is the bill of lading number for the house bill of lading.
09 M2109 is the issuer code for the sub-house bill of lading.
10 M2110 is the bill of the lading number for the sub-house bill of lading number.
11 M2111 is the first secondary notify party.
12 M2112 is the second secondary notify party.
13 M2113 is the manifest quantity involved in the in-bond movement.
14 M2114 carries the additional bonded carrier information for a subsequent bonded cargo movement, beyond the intended destination of the first in-bond movement.

M3 - Release

To indicate that the equipment is or is not to be released

TRANSACTION SETS USED IN
404 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	132	Release Code	1	M/Z	ID	1/1
02	373	Date	1	X	DT	8/8
03	337	Time	1	X	TM	4/8
04	623	Time Code	1	O/Z	ID	2/2

Syntax Notes

02	R0203
04	C0403

Semantic Notes

01	If M301 contains code value "S" or "R", then M302 is the date of release. If M301 contains code value "U", then M302 is the estimated date of release.
04	M304 reflects the time zone which the time reflects.

M7 - Seal Numbers

To record seal numbers used and the organization that applied the seals

TRANSACTION SETS USED IN

204 210 212 214 220 223 227 228 304 309 310 311 312 322 324 325 350 355 358 404 410 417 426 858 859 920

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	225	Seal Number	1	M	AN	1/15
02	225	Seal Number	1	O	AN	1/15
03	225	Seal Number	1	O	AN	1/15
04	225	Seal Number	1	O	AN	1/15
05	98	Entity Identifier Code	1	O	ID	2/3

Comments

05	M705 indicates the name of the organization which applied the seal(s).

M7A - Seal Number Replacement

To provide an audit trail of seal number changes

TRANSACTION SETS USED IN
304 350 353

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	225	Seal Number	1	M/Z	AN	1/15
02	225	Seal Number	1	M/Z	AN	1/15
03	373	Date	1	O/Z	DT	8/8
04	98	Entity Identifier Code	1	X/Z	ID	2/3
05	93	Name	1	X	AN	1/60
06	352	Description	1	O/Z	AN	1/80
07	302	Location on Equipment Code	1	O/Z	ID	1/3

Syntax Notes

04	P0405

Semantic Notes

01	M7A01 is the original seal number.
02	M7A02 is the replacement seal number.
03	M7A03 is the date the new seal was installed.
04	M7A04 and M7A05 indicate the party responsible for the seal replacement.
06	M7A06 is a description of why the seal was replaced.
07	M7A07 is the location of the replaced seal on the equipment.

MAN - Marks and Numbers Information

To indicate identifying marks and numbers for shipping containers

TRANSACTION SETS USED IN

211 212 214 215 219 220 240 284 304 309 325 511 601 754 830 840 843 846 850 855 856 857 860 861 865 867 920 940 944 945

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	88	Marks and Numbers Qualifier	1	M/Z	ID	1/2
02	87	Marks and Numbers	1	M/Z	AN	1/80
03	87	Marks and Numbers	1	O	AN	1/80
04	88	Marks and Numbers Qualifier	1	X	ID	1/2
05	87	Marks and Numbers	1	X/Z	AN	1/80
06	87	Marks and Numbers	1	O	AN	1/80

Syntax Notes

04	P0405
06	C0605

Semantic Notes

01	MAN01/MAN02 and MAN04/MAN05 may be used to identify two different marks and numbers assigned to the same physical container.
02	When both MAN02 and MAN03 are used, MAN02 is the starting number of a sequential range and MAN03 is the ending number of that range.
05	When both MAN05 and MAN06 are used, MAN05 is the starting number of a sequential range, and MAN06 is the ending number of that range.

Comments

01	When MAN01 contains code "UC" (U.P.C. Shipping Container Code) and MAN05/MAN06 contain a range of ID numbers, MAN03 is not used. The reason for this is that the U.P.C. Shipping Container code is the same on every carton that is represented in the range in MAN05/MAN06.
03	MAN03 and/or MAN06 are only used when sending a range(s) of ID numbers.
03	When both MAN02/MAN03 and MAN05/MAN06 are used to send ranges of ID numbers, the integrity of the two ID numbers must be maintained.

MAP - Meat and Poultry Information

To specify meat and poultry category and information

TRANSACTION SETS USED IN
832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1851	Animal Species	1	M	ID	3/3
02	C079	Composite Multiple Language Extended Text Information	1	O/Z		
03	739	Measurement Value	1	O/Z	R	1/20
04	1849	Product Packed In	1	O	ID	3/3
05	1841	Preservation Technique	1	O	ID	3/3
06	C079	Composite Multiple Language Extended Text Information	1	O/Z		

Semantic Notes

02 This is the description of a piece of meat that has been cut from an animal carcass.

03 Specify the minimum meat protein percentage.

06 Water retention statement. Example: 100% air chilled, no retained water.

Comments

03 Meat protein percentage as declared on the product packaging.

06 Water retention statement as declared on product packaging. It is the declaration of the amount of water added and retained in a raw single-ingredient product due to evisceration contact with water in excess of naturally occurring moisture.

MBL - Bill of Lading

To specify a bill of lading number and associated information

TRANSACTION SETS USED IN
325 326 355 358

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	598	Bill of Lading/Waybill Number	1	M	AN	1/50
03	306	Action Code	1	O	ID	1/2
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
05	56	Type of Service Code	1	O	ID	2/2
06	80	Lading Quantity	1	O/Z	N0	1/7
07	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
08	598	Bill of Lading/Waybill Number	1	O/Z	AN	1/50

Semantic Notes

04 If MBL04 is "Y", then issuer is an automated manifest system (AMS) participant. If "N", then issuer is not an AMS participant.

06 MBL06 is the actual quantity boarded on the conveyance.

07 MBL07 is the Standard Carrier Alpha Code (SCAC) of the carrier issuing the house bill.

08 MBL08 is the bill of lading/waybill number submitted in the original 309.

MC - Miscellaneous and Accessorial Charges

To transmit codes, descriptions, and values for miscellaneous or accessorial charges associated with rail rate data

TRANSACTION SETS USED IN
485

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	150	Special Charge or Allowance Code	1	M	ID	3/3
02	122	Rate/Value Qualifier	1	M	ID	2/2
03	118	Rate	1	M/Z	R	1/9
04	276	Special Charge Description	1	O/Z	AN	2/25
05	554	Assigned Number	1	O	N0	1/9

Semantic Notes

03 MC03 is the transportation charge for special service performed, expressed in the standard monetary denomination for the currency specified.

04 If MC04 is used, MC01 must contain "999".

MCD - Mortgage Closing Data

To provide details about loan settlement

TRANSACTION SETS USED IN
201 265 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	782	Monetary Amount	1	O/Z	R	1/18
02	373	Date	1	O/Z	DT	8/8
03	782	Monetary Amount	1	X/Z	R	1/18
04	93	Name	1	O/Z	AN	1/60

Syntax Notes

04	C0403

Semantic Notes

01	MCD01 is the amount of the property sales price.
02	MCD02 is the loan closing date.
03	MCD03 is the amount of any purchase deposit.
04	MCD04 is the name of the purchase deposit holder.

MCT - Tariff Accessorial Charges

To identify accessorial charges and define the range for which each charge is applicable

TRANSACTION SETS USED IN

106 107

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	150	Special Charge or Allowance Code	1	M	ID	3/3
02	981	Tariff Value Code	1	O	ID	2/2
03	740	Range Minimum	1	O	R	1/20
04	741	Range Maximum	1	O	R	1/20
05	122	Rate/Value Qualifier	1	X	ID	2/2
06	118	Rate	1	X/Z	R	1/9
07	974	Tariff Reference Flag Code	1	O	ID	1/1
08	276	Special Charge Description	1	O	AN	2/25

Syntax Notes

05 P0506

Semantic Notes

06 MCT06 is the transportation charge for special service performed, expressed in the standard monetary denomination for the currency specified.

Comments

04 MCT04 defines the upper end of a range. If not present the range maximum is open.

MCZ - Marine Catch Zone

To identify the zone location marine life is caught.

TRANSACTION SETS USED IN
832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1835	Marine Catch Zone	1	M	ID	2/3
02	373	Date	1	O/Z	DT	8/8
03	1854	Free-form Extended Text 500 characters	1	O/Z	AN	1/500

Semantic Notes

02 MCZ02 is the date of catch.

03 Specifies the originating place. Does not comply with ISO standards.

MEA - Measurements

To specify physical measurements or counts, including dimensions, tolerances, variances, and weights (See X12 EDI Standard Figures, https://figures.x12.org, for example of use of C001)

TRANSACTION SETS USED IN

112 135 142 155 159 160 175 179 180 185 187 195 196 204 219 220 228 262 280 284 285 286 304 353 404 410 412 417 424 426 470 500 501 511 536 603 620 625 650 810 811 819 830 832 836 837 838 840 841 842 843 844 845 846 847 848 849 850 853 855 856 857 858 859 860 861 863 865 866 867 869 870 873 888 890 892 897 940 945

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	737	Measurement Reference ID Code	1	O	ID	2/2
02	738	Measurement Qualifier	1	O	ID	1/3
03	739	Measurement Value	1	X	R	1/20
04	C001	Composite Unit of Measure	1	X/Z		
05	740	Range Minimum	1	X	R	1/20
06	741	Range Maximum	1	X	R	1/20
07	935	Measurement Significance Code	1	O	ID	2/2
08	936	Measurement Attribute Code	1	X	ID	2/2
09	752	Surface/Layer/Position Code	1	O	ID	2/2
10	1373	Measurement Method or Device Code	1	O	ID	2/4
11	1270	Code List Qualifier Code	1	X/Z	ID	1/3
12	1271	Industry Code	1	X/Z	AN	1/30

Syntax Notes

03 R03050608
04 E0412
05 L050412
06 L060412
07 L07030506
08 E0803
11 P1112

Semantic Notes

04 MEA04 defines the unit of measure for MEA03, MEA05, and MEA06.
11 MEA11 is the external code list for the unit of measure.
12 MEA12 defines the unit of measure for MEA03, MEA05, and MEA06 from an external code list.

Comments

05 When citing dimensional tolerances, any measurement requiring a sign (+ or -), or any measurement where a positive (+) value cannot be assumed, use MEA05 as the negative (-) value and MEA06 as the positive (+) value.

MI - Media Information

Defines the advertising media and the related costs

TRANSACTION SETS USED IN

290

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1393	Media Type Identifier Code	1	M	ID	2/2
02	610	Amount	1	O/Z	N2	1/15
03	610	Amount	1	O/Z	N2	1/15
04	610	Amount	1	O/Z	N2	1/15
05	352	Description	1	O/Z	AN	1/80

Semantic Notes

02 MI02 is the budgeted amount.

03 MI03 is the amount to be shared.

04 MI04 is the actual cost.

05 MI05 is the description if MI01 is coded miscellaneous.

MI1 - Mileage Source

To identify the source of the mileage tables used to request or propose a rate and to indicate the tables version

TRANSACTION SETS USED IN
106 107

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1661	Mileage Source Code	1	M	ID	2/2
02	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
03	1470	Number	1	O/Z	N0	1/9

Semantic Notes

02 MI102 indicates whether the current version of the mileage source is being used. A "Y" indicates that the current version of the mileage source is being used; an "N" indicates that a previous version of the mileage source is being used.

03 MI103 is only used if the code in MI102 is "N".

Comments

03 MI103 is the version number of the mileage source if the current version is not being used.

MIA - Inpatient Adjudication

To provide claim level data related to the adjudication of inpatient claims

TRANSACTION SETS USED IN
835 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	O/Z	R	1/15
02	782	Monetary Amount	1	O/Z	R	1/18
03	380	Quantity	1	O/Z	R	1/15
04	782	Monetary Amount	1	O/Z	R	1/18
05	127	Reference Identification	1	O/Z	AN	1/80
06	782	Monetary Amount	1	O/Z	R	1/18
07	782	Monetary Amount	1	O/Z	R	1/18

15	380	Quantity	1	O/Z	R	1/15
16	782	Monetary Amount	1	O/Z	R	1/18
17	782	Monetary Amount	1	O/Z	R	1/18
18	782	Monetary Amount	1	O/Z	R	1/18
19	782	Monetary Amount	1	O/Z	R	1/18
20	127	Reference Identification	1	O/Z	AN	1/80
21	127	Reference Identification	1	O/Z	AN	1/80
22	127	Reference Identification	1	O/Z	AN	1/80
23	127	Reference Identification	1	O/Z	AN	1/80
24	782	Monetary Amount	1	O/Z	R	1/18

Semantic Notes

01 MIA01 is the covered days.
02 MIA02 is the Prospective Payment System (PPS) Operating Outlier amount.
03 MIA03 is the lifetime psychiatric days.
04 MIA04 is the Diagnosis Related Group (DRG) amount.
05 MIA05 is the Remittance Advice Remark Code. See Code Source 411.
06 MIA06 is the disproportionate share amount.
07 MIA07 is the Medicare Secondary Payer (MSP) pass-through amount.
08 MIA08 is the total Prospective Payment System (PPS) capital amount.
09 MIA09 is the Prospective Payment System (PPS) capital, federal specific portion, Diagnosis Related Group (DRG) amount.

10 MIA10 is the Prospective Payment System (PPS) capital, hospital specific portion, Diagnosis Related Group (DRG), amount.

11 MIA11 is the Prospective Payment System (PPS) capital, disproportionate share, hospital Diagnosis Related Group (DRG) amount.

12 MIA12 is the old capital amount.

13 MIA13 is the Prospective Payment System (PPS) capital indirect medical education claim amount.

14 MIA14 is hospital specific Diagnosis Related Group (DRG) Amount.

15 MIA15 is the cost report days.

16 MIA16 is the federal specific Diagnosis Related Group (DRG) amount.

17 MIA17 is the Prospective Payment System (PPS) Capital Outlier amount.

18 MIA18 is the indirect teaching amount.

19 MIA19 is the professional component amount billed but not payable.

20 MIA20 is the Remittance Advice Remark Code. See Code Source 411.

21 MIA21 is the Remittance Advice Remark Code. See Code Source 411.

22 MIA22 is the Remittance Advice Remark Code. See Code Source 411.

23 MIA23 is the Remittance Advice Remark Code. See Code Source 411.

24 MIA24 is the capital exception amount.

MIC - Mortgage Insurance Coverage

To describe the type and extent of mortgage insurance

TRANSACTION SETS USED IN
263 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1097	Mortgage Insurance Application Type Code	1	M	ID	1/1
02	1100	Mortgage Insurance Coverage Type Code	1	O/Z	ID	1/1
03	1099	Mortgage Insurance Certificate Type Code	1	O/Z	ID	1/1
04	954	Percentage as Decimal	1	O/Z	R	1/10
05	1656	Premium Rate Pattern Code	1	O/Z	ID	1/1
06	1105	Mortgage Insurance Duration Code	1	O/Z	ID	1/1
07	C001	Composite Unit of Measure	1	X/Z		
08	380	Quantity	1	X/Z	R	1/15
09	1102	Mortgage Insurance Renewal Option Code	1	O/Z	ID	1/1
10	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
11	336	Terms Type Code	1	O/Z	ID	2/2
12	1098	Mortgage Insurance Premium Type Code	1	O/Z	ID	1/1
13	610	Amount	1	O/Z	N2	1/15
14	1657	Premium Source Entity Code	1	O/Z	ID	1/1
15	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
16	234	Product/Service ID	1	O/Z	AN	1/80
17	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
18	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

07 P0708

Semantic Notes

02 MIC02 defines the nature of the mortgage insurance coverage.
03 MIC03 defines whether the coverage is applied at the primary or pool level.
04 MIC04 defines the percent of coverage on the insured loan.
05 MIC05 defines the relative pattern of premium rates charged over the life of the coverage.
06 MIC06 defines the term of the coverage.
07 MIC07 defines the unit of measure for the time period.
08 MIC08 defines the number of periods defined in MIC07.
09 MIC09 defines the method used to calculate renewal premiums.
10 MIC10 defines if the mortgage insurance premium is refundable. A "Y" indicates that it is refundable, an "N" indicates that it is not.
11 MIC11 defines the payment terms of the initial premium.
12 MIC12 defines if any of the premium paid at settlement is financed as part of the loan or paid from other funds.
13 MIC13 is the amount of the premium being financed.

14 MIC14 defines the entity or entities responsible for paying the mortgage insurance premium.

15 MIC15 defines if the loan participates in an experience related plan. A "Y" indicates that the loan does participate in an experience related plan; an "N" indicates that the loan does not participate in an experience related plan.

16 MIC16 is the mortgage insurance product identifier value.

17 MIC17 defines if there is an applicable captive reinsurance arrangement. A "Y" indicates that there is, an "N" indicates that there is not.

18 MIC18 defines if the normal commitment/certificate document delivery selection should be reversed. A "Y" indicates that it should; an "N" indicates that it should not.

Comments

06 If MIC06 is "2 - Periodic or 3 - Single (One Time)" then MIC07 and MIC08 are required.

MIR - Mortgage Insurance Response

To determine if mortgage insurance has been approved or declined, and if approved, supply details about the coverage

TRANSACTION SETS USED IN
260 263

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1097	Mortgage Insurance Application Type Code	1	M	ID	1/1
02	1209	Underwriting Decision Code	1	M	ID	1/1
03	1099	Mortgage Insurance Certificate Type Code	1	O	ID	1/1
04	127	Reference Identification	1	O/Z	AN	1/80
05	954	Percentage as Decimal	1	O/Z	R	1/10
06	610	Amount	1	O/Z	N2	1/15
07	C001	Composite Unit of Measure	1	X/Z		
08	380	Quantity	1	X/Z	R	1/15
09	954	Percentage as Decimal	1	O/Z	R	1/10
10	954	Percentage as Decimal	1	O/Z	R	1/10
11	1102	Mortgage Insurance Renewal Option Code	1	O	ID	1/1
12	373	Date	1	O/Z	DT	8/8

Syntax Notes

07 P0708

Semantic Notes

04 MIR04 defines the certificate of insurance number.

05 MIR05 defines the percentage of the premium of the initial term.

06 MIR06 defines the amount of the premium of the initial term.

07 MIR07 defines the unit of measure for the term of the mortgage insurance.

08 MIR08 defines the term of the mortgage insurance coverage as either a period of time or as a percentage of the loan outstanding when compared to the value of the property.

09 MIR09 defines the amount of mortgage insurance as a percentage.

10 MIR10 defines the loan-to-value (LTV) ratio at the time of loan origination. Loan-to-value ratio is the percentage of the loan outstanding when compared to the value of the property.

12 MIR12 defines the expiration date of the proposed coverage.

MIS - Mortgagee Information Status

To provide information indicating status in mortgagee name, address, or name and address

TRANSACTION SETS USED IN

264

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	197	Mortgagee Information Status Code	1	M/Z	ID	2/2
02	374	Date/Time Qualifier	1	O/Z	ID	3/3
03	1250	Date Time Period Format Qualifier	1	O	ID	2/3
04	1251	Date Time Period	1	O	AN	1/35
05	348	Jurisdiction Code	1	O/Z	ID	3/3

Semantic Notes

01 MIS01 provides the status of mortgagee information. For example, NH indicates a change in name for the holding mortgagee.

02 MIS02 through MIS04 provide the date associated with the status, if any.

05 MIS05 identifies the jurisdiction of the regional servicing office.

MIT - Message Identification

To identify the beginning of a specific message and to allow the identification of a subject for the message

TRANSACTION SETS USED IN
864

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	352	Description	1	O/Z	AN	1/80
03	931	Page Width	1	O	N0	1/3
04	932	Page Length Lines	1	O	N0	1/3

Semantic Notes

01 MIT01 contains the message number.
02 MIT02 contains the message subject.

Comments

03 MIT03 default is 80 characters.
04 MIT04 default is 66 lines.

MKS - Marks Awarded

To provide additional information to the receiving institution about the marks, or series of marks, a student was awarded in a particular course

TRANSACTION SETS USED IN
130

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1304	Mark Code Type	1	O	ID	1/2
02	1148	Academic Grade Qualifier	1	X	ID	1/3
03	1258	Academic Grade	1	O	AN	1/3

Syntax Notes

03	C0302

MLA - Mortgage Loan Audit Information

To specify audit information about the loan

TRANSACTION SETS USED IN

245

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	367	Contract Number	1	M/Z	AN	1/30

04	380	Quantity	1	O/Z	R	1/15
05	1365	Service Type Code	1	O	ID	1/2
06	546	Status Code	1	O/Z	ID	2/2
07	C055	Tax Service Non-payment Exception Code	1	O		
08	100	Currency Code	1	O/Z	ID	3/3

Semantic Notes

01 MLA01 contains the loan number.

02 MLA02 is the contract number assigned by the tax service company for the requesting party.

03 MLA03 contains the original amount of the mortgage loan.

04 MLA04 contains the original loan term in months.

06 MLA06 contains the property legal description status.

08 If the original amount of the mortgage loan defined in MLA03 is not in U.S. dollars, then MLA08 will contain the identification of the currency used.

MLS - Milestone

To identify milestone details for tasks or activities

TRANSACTION SETS USED IN

806

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1171	Milestone Number Identification	1	M	AN	1/20
02	352	Description	1	O	AN	1/80
03	1297	WorkStatus Code	1	O	ID	1/2
04	306	Action Code	1	O	ID	1/2

MNC - Mortgage Note Characteristics

To provide detailed characteristics information of a mortgage note

TRANSACTION SETS USED IN

205

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1136	Code Category	1	O	ID	2/2
02	1093	Real Estate Loan Type Code	1	O	ID	1/1

14	750	Product/Process Characteristic Code	1	X	ID	2/3
15	751	Product Description Code	1	X	AN	1/12
16	1074	Type of Real Estate Asset Code	1	O	ID	2/2
17	1076	Real Estate Loan Security Instrument Code	1	O	ID	1/1

Syntax Notes

08 P0809
12 P1213
14 P1415

Semantic Notes

08 MNC08 indicates the number of period days used in interest computation.
09 MNC09 indicates the number of yearly days used in interest computation.

MOA - Outpatient Adjudication

To provide claim level data related to the adjudication of outpatient claims

TRANSACTION SETS USED IN
835 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	954	Percentage as Decimal	1	O/Z	R	1/10
02	782	Monetary Amount	1	O/Z	R	1/18
03	127	Reference Identification	1	O/Z	AN	1/80
04	127	Reference Identification	1	O/Z	AN	1/80
05	127	Reference Identification	1	O/Z	AN	1/80
06	127	Reference Identification	1	O/Z	AN	1/80
07	127	Reference Identification	1	O/Z	AN	1/80
08	782	Monetary Amount	1	O/Z	R	1/18
09	782	Monetary Amount	1	O/Z	R	1/18

Semantic Notes

01 MOA01 is the reimbursement rate.

02 MOA02 is the claim Healthcare Common Procedure Coding System (HCPCS) payable amount.

03 MOA03 is the Remittance Advice Remark Code. See Code Source 411.

04 MOA04 is the Remittance Advice Remark Code. See Code Source 411.

05 MOA05 is the Remittance Advice Remark Code. See Code Source 411.

06 MOA06 is the Remittance Advice Remark Code. See Code Source 411.

07 MOA07 is the Remittance Advice Remark Code. See Code Source 411.

08 MOA08 is the End Stage Renal Disease (ESRD) payment amount.

09 MOA09 is the professional component amount billed but not payable.

MPI - Military Personnel Information

To report military service data

TRANSACTION SETS USED IN
186 267 270 271

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1201	Information Status Code	1	M	ID	1/1
02	584	Employment Status Code	1	M	ID	2/2
03	1595	Government Service Affiliation Code	1	M	ID	1/1
04	352	Description	1	O/Z	AN	1/80
05	1596	Military Service Rank Code	1	O	ID	2/6
06	1250	Date Time Period Format Qualifier	1	X	ID	2/3
07	1251	Date Time Period	1	X/Z	AN	1/35

Syntax Notes

06 P0607

Semantic Notes

04 MPI04 is the actual response to further identify the exact military unit.
07 MPI07 indicates the date span of military service.

MPP - Mortgage Pool Program

To identify mortgage pool types

TRANSACTION SETS USED IN
202 203

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1136	Code Category	1	M	ID	2/2
02	1193	Program Type Code	1	M	ID	2/2
03	374	Date/Time Qualifier	1	X	ID	3/3
04	1250	Date Time Period Format Qualifier	1	X	ID	2/3
05	1251	Date Time Period	1	X	AN	1/35
06	782	Monetary Amount	1	O/Z	R	1/18
07	1579	Accrual Rate Method Code	1	O	ID	1/1
08	1322	Certification Type Code	1	O	ID	1/1

Syntax Notes

03 P030405

Semantic Notes

06 MPP06 is the total unpaid principal balance of the mortgage within the pool.

MPT - Manufacturer Preparation Information

To specify manufacturer preparation methods

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1853	Manufacturer Preparation Type Code	1	M	ID	3/3

MRC - Mortgagor Response Characteristics

To provide information on mortgagor responses and number of contacts made with a mortgagor

TRANSACTION SETS USED IN

264

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	98	Entity Identifier Code	1	M/Z	ID	2/3
02	196	Mortgagor Response Code	1	M/Z	ID	1/1
03	1079	Contact Method Code	1	M/Z	ID	1/1
04	380	Quantity	1	M/Z	R	1/15
05	1251	Date Time Period	1	O/Z	AN	1/35
06	1079	Contact Method Code	1	X	ID	1/1
07	380	Quantity	1	X	R	1/15
08	1079	Contact Method Code	1	X	ID	1/1
09	380	Quantity	1	X	R	1/15

Syntax Notes

06	P0607
08	P0809

Semantic Notes

01	MRC01 indicates the person contacted, whether it is the mortgagor, or the co-mortgagor.
02	MRC02 defines the attitude of mortgagor towards repayment of the loan, or the loan default, or the delinquency.
03	MRC03, MRC06, and MRC08 define the method of contact. "F" for face-to-face, "M" for mail, and "T" for telephone contact.
04	MRC04, MRC07, and MRC09 define the quantity as the number of contacts made with a mortgagor or a co-mortgagor.
05	MRC05 indicates the date of last contact with the mortgagor.

MS1 - Equipment, Shipment, or Real Property Location

To specify the location of a piece of equipment, a shipment, or real property in terms of city and state or longitude and latitude or postal code

TRANSACTION SETS USED IN
112 212 214 811 838

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	19	City Name	1	X	AN	2/30
02	156	State or Province Code	1	X	ID	2/2
03	26	Country Code	1	X	ID	2/3
04	1654	Longitude Code	1	X/Z	ID	7/10
05	1655	Latitude Code	1	X/Z	ID	7/10
06	1280	Direction Identifier Code	1	O/Z	ID	1/1
07	1280	Direction Identifier Code	1	O/Z	ID	1/1
08	116	Postal Code	1	O	ID	3/15
09	1794	Longitude, Decimal Format	1	X/Z	R	1/10
10	1795	Latitude, Decimal Format	1	X/Z	R	1/10

Syntax Notes

01	L010203
01	E010409
02	C0201
03	C0301
04	P0405
06	L060409
07	L070510
08	C0801
09	P0910

Semantic Notes

04	MS104 is the longitude expressed in Degrees, Minutes, and Seconds.
05	MS105 is the latitude expressed in Degrees, Minutes, and Seconds.
06	MS106 may only be 'E' or 'W'.
07	MS107 may only be 'N' or 'S'.
09	MS109 is the longitude expressed in decimal degrees.
10	MS110 is the latitude expressed in decimal degrees.

MS2 - Equipment or Container Owner and Type

To specify the owner, the identification number assigned by that owner, and the type of equipment

TRANSACTION SETS USED IN

106 107 211 212 214 240

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	X	ID	2/4
02	207	Equipment Number	1	X	AN	1/15
03	40	Equipment Description Code	1	O	ID	2/2
04	761	Equipment Number Check Digit	1	O	N0	1/1

Syntax Notes

01	P0102
04	C0402

Comments

03	MS203 identifies the type for the equipment specified in MS202.

MS3 - Interline Information

To identify the interline carrier and relevant data

TRANSACTION SETS USED IN
204 211 214 219 220

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	133	Routing Sequence Code	1	M	ID	1/2
03	19	City Name	1	X/Z	AN	2/30
04	91	Transportation Method/Type Code	1	O	ID	1/2
05	156	State or Province Code	1	O	ID	2/2

Syntax Notes

05 C0503

Semantic Notes

01 MS301 is the Standard Carrier Alpha Code (SCAC) of the interline carrier.
03 MS303 is the city where the interline was performed.

MS4 - Shipment or Package Dimensions

To identify the dimensions of a shipment or package

TRANSACTION SETS USED IN

215

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	90	Measurement Unit Qualifier	1	M	ID	1/1
02	82	Length	1	M	R	1/8
03	65	Height	1	M	R	1/8
04	189	Width	1	M	R	1/8

MS5 - Shipment Rates and Charges

To specify shipment rates and charges

TRANSACTION SETS USED IN
215

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	74	Declared Value	1	X/Z	N2	2/12
02	122	Rate/Value Qualifier	1	X	ID	2/2
03	60	Freight Rate	1	X	R	1/15
04	74	Declared Value	1	X/Z	N2	2/12
05	100	Currency Code	1	O/Z	ID	3/3

Syntax Notes

02	P0203
05	L050104

Semantic Notes

01	MS501 is the declared value for insurance purposes.
04	MS504 is the declared value for Customs purposes.
05	MS505 indicates the currency of MS501 and MS504.

MS6 - Shipment Quantity and Weight

To specify shipment weight

TRANSACTION SETS USED IN

215

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M/Z	R	1/15
02	187	Weight Qualifier	1	X	ID	1/2
03	81	Weight	1	X/Z	R	1/10
04	355	Unit or Basis for Measurement Code	1	X	ID	2/2

Syntax Notes

02 P020304

Semantic Notes

01 MS601 is the number of cartons (packages) in a shipment.

03 MS603 is the weight of the shipment.

MSG - Message Text

To provide a free-form format that allows the transmission of text information

TRANSACTION SETS USED IN

100 112 124 138 141 142 143 149 153 159 175 176 186 187 188 189 195 196 197 198 200 201 202 206 242 249 252 255 256 259 260 262 264 265 267 268 271 272 273 278 283 286 435 504 521 536 620 810 811 813 819 821 833 839 841 848 851 864 868 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	933	Free-form Message Text	1	M	AN	1/264
02	934	Printer Carriage Control Code	1	X	ID	2/2
03	1470	Number	1	O/Z	N0	1/9

Syntax Notes

03 C0302

Semantic Notes

03 MSG03 is the number of lines to advance before printing.

Comments

02 MSG02 is not related to the specific characteristics of a printer, but identifies top of page, advance a line, etc.

03 If MSG02 is "AA - Advance the specified number of lines before print" then MSG03 is required.

MSI - Multi-stop Shipment Information

To specify multi-stop shipment information

TRANSACTION SETS USED IN

754

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	165	Stop Sequence Number	1	O	N0	1/3

Semantic Notes

01 MSI01 identifies whether the shipment is a multi-stop shipment. A "Y" indicates the shipment is a multi-stop shipment; an "N" indicates the shipment is not a multi-stop shipment.

Comments

01 When MSI01 contains code Y, MSI02 will contain the stop sequence number.

MSS - Material Safety Data Sheet Section Information

To identify the report section

TRANSACTION SETS USED IN
848

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	820	Report Section Name Code	1	X	ID	2/2
02	352	Description	1	X/Z	AN	1/80
03	156	State or Province Code	1	O/Z	ID	2/2
04	26	Country Code	1	O/Z	ID	2/3
05	259	Change Type Code	1	O	ID	1/1
06	1472	Report Section Number	1	X	AN	1/15
07	821	Safety Characteristic/Hazard Code	1	X	ID	3/3

Syntax Notes

01 R010206
01 E0107

Semantic Notes

02 MSS02 is a text description of the report section.
03 MSS03 indicates the state or province issuing the regulations that determine what is reported in this section of the Material Safety Data Sheet (MSDS).
04 MSS04 identifies the country issuing the regulations that determine what is reported in this section.

Comments

05 MSS05 indicates whether any data in this report section has changed since the last revision of this report.
07 MSS07 indicates that the safety characteristics or hazard name is included in the name of the MSDS section or subsection.

MTX - Text

To specify textual data

TRANSACTION SETS USED IN

105 113 150 155 179 194 251 274 284 500 620 625 650 754 805 806 810 814 832 836 840 843 850 855 857 860 864 865 880 890 892 894 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	363	Note Reference Code	1	O	ID	3/3
02	1551	Textual Data	1	X	AN	1/4096
03	1551	Textual Data	1	O	AN	1/4096
04	934	Printer Carriage Control Code	1	X	ID	2/2
05	1470	Number	1	O/Z	N0	1/9
06	819	Language Code	1	O	ID	2/3

Syntax Notes

01	C0102
03	C0302
05	C0504

Semantic Notes

05	MTX05 is the number of lines to advance before printing.

Comments

05	If MTX04 is "AA - Advance the specific number of lines before print", then MTX05 is required.

N1 - Party Identification

To identify a party by type of organization, name, and code

TRANSACTION SETS USED IN

100 101 103 104 106 107 108 110 113 120 128 130 131 132 133 135 138 140 141 142 143 146 147 149

200 201 202 203 204 206 210 211 212 213 214 215 216 217 219 220 222 223 227 228 240 242 244 249
250 251 252 256 259 260 261 263 264 265 266 267 268 269 274 277 280 283 288 290 300 301 304 309
310 311 312 313 317 322 325 355 357 361 362 404 410 412 417 418 421 422 423 424 426 431 433 434
452 453 455 456 470 501 503 504 511 517 521 527 536 540 561 567 568 601 603 620 625 650 753 754
805 806 810 811 812 813 814 816 819 820 821 822 823 824 826 828 830 832 833 834 835 836 838 839
840 841 842 843 844 845 846 847 848 849 850 851 852 853 854 855 856 857 858 859 860 861 862 863
864 865 866 867 869 870 872 873 874 875 876 877 878 879 880 881 882 883 884 885 886 887 888 889
890 891 892 893 896 897 920 940 943 944 945 947

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	98	Entity Identifier Code	1	M	ID	2/3
02	93	Name	1	X	AN	1/60
03	66	Identification Code Qualifier	1	X	ID	1/2
04	67	Identification Code	1	X	AN	2/80
05	706	Entity Relationship Code	1	O	ID	2/2
06	98	Entity Identifier Code	1	O	ID	2/3
07	C076	Composite Identification Codes	1	O		

Syntax Notes

02	R0203
03	P0304
07	C0703

Comments

04	This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
05	N105 and N106 further define the type of entity in N101.

N10 - Quantity and Description

To indicate line item quantity, description, marks and numbers, commodity code, weight, and customs value

TRANSACTION SETS USED IN

200 201 215 309 355 404 417 833 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	O	R	1/15
02	369	Free-form Description	1	O	AN	1/45
03	87	Marks and Numbers	1	O	AN	1/80
04	23	Commodity Code Qualifier	1	X	ID	1/2
05	22	Commodity Code	1	X	AN	1/30
06	602	Customs Shipment Value	1	X/Z	N0	2/9

12	26	Country Code	1	O/Z	ID	2/3
13	100	Currency Code	1	O/Z	ID	3/3

Syntax Notes

04	P0405
07	P0708
13	C1306

Semantic Notes

06	If N1013 is not used, the default currency of N1006 is USD (US Dollar).
09	N1009 is the U.S. Customs and Border Protection (CBP) bar code number for line release.
11	N1011 is the country of the manufacturer of the goods.
12	N1012 is the country of the final destination of the goods.
13	N1013 is the currency of the value of N1006.

N11 - Store Location

To specify store numbers related to specific addresses for deliveries

TRANSACTION SETS USED IN

812 818

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	614	Store Number	1	M	AN	1/10
02	310	Location Identifier	1	O/Z	AN	1/30
03	127	Reference Identification	1	O/Z	AN	1/80

Semantic Notes

02 N1102 is the area within the selling location.

03 N1103 is the sales commission plan number.

N12 - Equipment Environment

To describe the operating environment of the equipment

TRANSACTION SETS USED IN

285 286 304 310 312

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	829	Fuel Type Code	1	M	ID	1/1

Syntax Notes

04	P0405
06	P0607
08	C080607
09	P0910

Semantic Notes

03	N2103 indicates the high end of an equipment range begun in N2102.
04	N2104 is the maximum load limit of the equipment.
13	N2113 is the outside length of the equipment expressed in FFFII.
14	N2114 is the outside height of the equipment expressed in FFII.
15	N2115 is the outside width of the equipment expressed in FFII.
16	N2116 is the owner of the equipment.
19	N2119 is the operator or carrier of the rights of the equipment.

20 N2120 is the check digit of the equipment number shown in the N2103.
21 N2121 is the location of the refrigeration unit if present.

Comments

01 N2101 is mandatory for rail transactions.
17 N2117 is the ISO Equipment Type.
18 N2118 is the AAR Car Type.

N3 - Party Location

To specify the location of the named party

TRANSACTION SETS USED IN

100 103 104 105 106 107 108 110 111 112 113 120 124 128 130 132 133 135 138 140 141 142 143 144

07	1715	Country Subdivision Code	1	X	ID	1/9
08	1702	Postal Code-Formatted	1	X	AN	3/20

Syntax Notes

02	E0207
03	E0308
06	C0605
07	C0704

Comments

01	A combination of either N401 through N404, or N405 and N406 may be adequate to specify a location.
03	N403 contains the postal code in an unstructured format. N408 contains the postal code in a structured format. When a postal code data field is used, the parties shall agree as to which data element (N403 or N408) shall be used in the transaction set.

N5 - Equipment Ordered

To specify carrier equipment

TRANSACTION SETS USED IN

404 410 417 426 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

23	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
24	301	Car Type Code	1	O	ID	1/4

Syntax Notes

03 P0304
05 P0516
08 P0809

Semantic Notes

12 N712 is the owner of the equipment.
23 N723 is the operator or carrier of the rights of the equipment.

Comments

01 N701 is mandatory for rail transactions.

N720 and N721 are expressed in inches.

N7A - Accessorial Equipment Details

To identify the accessorial equipment required to load or unload product

TRANSACTION SETS USED IN
204 219 220

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1042	Load or Deice Code	1	O	ID	2/2
02	82	Length	1	O/Z	R	1/8
03	1043	Diameter	1	O/Z	R	1/2
04	1044	Hose Type Code	1	O	ID	3/3
05	1043	Diameter	1	O/Z	R	1/2
06	1043	Diameter	1	O/Z	R	1/2

08	1046	Inlet or Outlet Fitting Type Code	1	O	ID	2/2
09	1047	Miscellaneous Equipment Code	1	O	ID	2/2

Semantic Notes

02 N7A02 is the length of the hose in feet.

03 N7A03 is the diameter of the hose in inches. The hose connects the trailer with the storage tank, etc.

05 N7A05 is the diameter of the outlet or inlet in inches.

06 N7A06 is the diameter of the hose in inches. This hose connects the trailer to an unloading device (pump, blower, etc.).

N7B - Additional Equipment Details

To identify additional equipment details

TRANSACTION SETS USED IN
204 219 220

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1024	Number of Tank Compartments	1	O	N0	1/2
02	1025	Loading or Discharge Location Code	1	O	ID	1/1
03	1026	Vessel Material Code	1	O	ID	3/3
04	1030	Gasket Type Code	1	O	ID	3/3
05	1031	Trailer Lining Type Code	1	O	ID	3/3
06	127	Reference Identification	1	O/Z	AN	1/80

Semantic Notes

06 N7B06 is the Department of Transportation or the Interstate Commerce Commission Motor Carrier Cargo Tank Specification.

Comments

06 N7B06 may include but are not limited to MC300 through MC307, MC310 through MC312, MC330, MC331, MC338, DOT 406, DOT 407, and DOT 412.

N8 - Waybill Reference

To identify the waybill and to specify the equipment used and the destination details

TRANSACTION SETS USED IN
410 417 421 426 456 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	186	Waybill Number	1	M	N0	1/6
02	373	Date	1	M/Z	DT	8/8
03	231	Cross Reference Type Code	1	X	ID	1/1
04	206	Equipment Initial	1	X	AN	1/4
05	207	Equipment Number	1	X	AN	1/15
06	186	Waybill Number	1	X	N0	1/6
07	373	Date	1	X	DT	8/8
08	19	City Name	1	X/Z	AN	2/30
09	156	State or Province Code	1	X	ID	2/2
10	140	Standard Carrier Alpha Code	1	X/Z	ID	2/4
11	573	Freight Station Accounting Code	1	X/Z	ID	1/5

Syntax Notes

03	P030405
06	P0607
08	P0809
10	P1011

Semantic Notes

02	N802 is the waybill date.
08	N808 is the destination station of movement.
10	N810 will contain destination railroad initial Standard Carrier Alpha Code (SCAC).
11	N811 will contain railroad destination Freight Station Accounting Code (FSAC).

Comments

00	Waybill type should be transmitted only when the transaction set involves a multiple Car/TOFC/COFC shipment or a conveying flat car. Waybill type should not be sent on a single Car/TOFC/COFC.
07	N807 is the waybill date.

N8A - Additional Reference Information

To identify additional station and waybill or station, or waybill information pertaining to revenue waybill

TRANSACTION SETS USED IN
417 421 426

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1378	Waybill Cross-Reference Code	1	O	ID	2/2
02	186	Waybill Number	1	O	N0	1/6
03	373	Date	1	O/Z	DT	8/8
04	127	Reference Identification	1	O/Z	AN	1/80
05	19	City Name	1	X/Z	AN	2/30
06	156	State or Province Code	1	X	ID	2/2
07	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
08	573	Freight Station Accounting Code	1	O	ID	1/5
09	206	Equipment Initial	1	O	AN	1/4
10	207	Equipment Number	1	O	AN	1/15

Syntax Notes

05 P0506

Semantic Notes

03 N8A03 is the date of the waybill in N8A02.
04 N8A04 is the unique revenue reference waybill identification number (URRWIN).
05 N8A05 and N8A06 identifies the location based on the code in N8A01.
07 N8A07 and N8A08 identify the carrier associated with the N8A01.

N9 - Extended Reference Information

To transmit identifying information as specified by the Reference Identification Qualifier

TRANSACTION SETS USED IN

101 104 109 110 112 113 124 132 140 141 142 143 152 154 155 159 160 161 179 180 194 197 202 206

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	M	ID	2/3
02	127	Reference Identification	1	X	AN	1/80
03	369	Free-form Description	1	X	AN	1/45
04	373	Date	1	O	DT	8/8
05	337	Time	1	X	TM	4/8
06	623	Time Code	1	O/Z	ID	2/2
07	C040	Reference Identifier	1	O/Z		

Syntax Notes

02 R0203
06 C0605

Semantic Notes

06 N906 reflects the time zone which the time reflects.
07 N907 contains data relating to the value cited in N902.

NA - Cross-Reference Equipment

To cross-reference additional equipment to a primary piece of equipment

TRANSACTION SETS USED IN

228 311 322 324 404 451 456 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	O	ID	2/3
02	127	Reference Identification	1	X	AN	1/80
03	206	Equipment Initial	1	M	AN	1/4
04	207	Equipment Number	1	M	AN	1/15
05	231	Cross Reference Type Code	1	O	ID	1/1
06	219	Position	1	O	AN	1/3
07	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
08	567	Equipment Length	1	O	N0	4/5
09	140	Standard Carrier Alpha Code	1	O	ID	2/4
10	845	Chassis Type Code	1	O	ID	2/2
11	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
12	761	Equipment Number Check Digit	1	O/Z	N0	1/1

Syntax Notes

01 C0102

Semantic Notes

07 NA07 is the owner's Standard Carrier Alpha Code (SCAC) code.

11 NA11 indicates the equipment damage status. A "Y" indicates equipment is damaged; an "N" indicates equipment is not damaged.

12 NA12 is the check digit for the equipment number in NA04.

Comments

03 NA03 contains the equipment initial of an associated shipment and is required by rail. If unknown, use NONZ for van or NONU for container.

04 NA04 contains the equipment number of an associated shipment.

09 NA09 is the Standard Carrier Alpha Code (SCAC) code of the operator of the equipment.

NCA - Nonconformance Action

To specify the action that is to be taken in response to a nonconformance condition

TRANSACTION SETS USED IN

842

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	O	AN	1/20
02	887	Nonconformance Resultant Response Code	1	X	ID	1/2
03	352	Description	1	X/Z	AN	1/80
04	380	Quantity	1	X	R	1/15
05	C001	Composite Unit of Measure	1	X		

Syntax Notes

02 R0203
04 P0405

Semantic Notes

03 NCA03 describes the action that is to be undertaken.

Comments

04 NCA04 is used to specify the quantity that is associated with NCA02 or NCA03.

NCD - Nonconformance Description

To describe the nonconformance condition

TRANSACTION SETS USED IN

842

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	936	Measurement Attribute Code	1	X	ID	2/2
02	888	Nonconformance Determination Code	1	X	ID	1/1
03	350	Assigned Identification	1	O	AN	1/20
04	750	Product/Process Characteristic Code	1	O	ID	2/3
05	559	Agency Qualifier Code	1	O	ID	2/2
06	751	Product Description Code	1	O	AN	1/12
07	352	Description	1	O	AN	1/80

Syntax Notes

01	R0102

NF1 - Nutrition Facts Panel

To specify the nutritional fact panel information associated with the product.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1799	Nutrition Facts Table (NFT) Format Type	1	M	ID	1/2
02	380	Quantity	1	M/Z	R	1/15
03	1321	Condition Indicator Code	1	O/Z	ID	2/3

Semantic Notes

02 NF102 is the number of nutrition facts sets

03 NF103 valid codes are WWA and WWB

NF2 - Serving Size Statement

To specify the serving size statement in the nutrition facts panel of the product.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C071	Composite Multiple Language Text Information	1	M/Z		
02	739	Measurement Value	1	X/Z	R	1/20
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2
04	935	Measurement Significance Code	1	O/Z	ID	2/2
05	739	Measurement Value	1	X/Z	R	1/20
06	355	Unit or Basis for Measurement Code	1	X	ID	2/2
07	935	Measurement Significance Code	1	O/Z	ID	2/2

Syntax Notes

02 P0203

05 P0506

Semantic Notes

01 NF201 Provides the product's serving size in a text format. Example 1: 1/2 cup uncooked (40g); Example 2: 1/12 package (44g, about 1/4 cup dry mix)

02 NF202 represents the serving size in metric or imperial measurement as indicated in the serving size statement in NF201

04 NF204 Valid codes are 03, 04, 05, 06 and 07, pertaining to the measurement in NF202

05 NF205 represents an additional serving size in metric or imperial measurement as indicated in the serving size statement in NF201, if present.

07 NF207 Valid codes are 03, 04, 05, 06 and 07, pertaining to the measurement in NF205

Comments

02 This is the numeric representation of the serving size included in the serving size text NF201. Example 1: for 1/2 cup ".5" in NF202 with "CU" in NF203

05 If a second serving size value is present, it is provided in NF205. Example 1: for 1/2 cup "40" in NF205 with "GR" in NF206

NF3 - Servings Per Container Statement

To specify the servings per container statement in the nutrition facts panel of the product and accommodates the servings per container value in metric or imperial measurements.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C071	Composite Multiple Language Text Information	1	M/Z		
02	739	Measurement Value	1	X/Z	R	1/20
03	355	Unit or Basis for Measurement Code	1	X/Z	ID	2/2
04	935	Measurement Significance Code	1	O/Z	ID	2/2

Syntax Notes

02	P0203

Semantic Notes

01	NF301 Provides the product's serving per container in a text format from the top of the nutrition fact panel. Example: Serving Per Container 2
02	NF302 represents the servings per container in metric or imperial measurement as indicated in the servings per container statement in NF301
03	NF303 uses a value of CH Container
04	NF304 Valid codes are 03, 04, 05, 06 and 07, pertaining to the measurement in NF302.

NF4 - Nutrition Facts Panel Calorie

Provides calorie information as it appears on the product's nutritional facts table.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	738	Measurement Qualifier	1	M/Z	ID	1/3
02	739	Measurement Value	1	M	R	1/20
03	355	Unit or Basis for Measurement Code	1	O/Z	ID	2/2

Semantic Notes

01 NF401 valid codes are CAL, CFF, STF.

03 NF403 Valid code is R4 Calorie

NF5 - Nutrition Facts Panel Fats

Provides fat information with the corresponding measurements as they appear on the product's nutritional facts table.

TRANSACTION SETS USED IN
832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	738	Measurement Qualifier	1	M/Z	ID	1/3
02	739	Measurement Value	1	M	R	1/20
03	355	Unit or Basis for Measurement Code	1	M	ID	2/2
04	935	Measurement Significance Code	1	O/Z	ID	2/2
05	739	Measurement Value	1	O/Z	R	1/20
06	C071	Composite Multiple Language Text Information	1	O/Z		

Semantic Notes

01 NF501 are codes identifying fats.
04 NF504 pertains to the measurement in NF503
05 NF505 is the percent daily value (DV) of the code specified in NF501.
06 NF506 provides additional details to support the nutrition information

NF6 - Nutrition Facts Panel Carbohydrates

Provides carbohydrates information with the corresponding measurements as they appear on the product's nutritional facts table.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	738	Measurement Qualifier	1	M/Z	ID	1/3
02	739	Measurement Value	1	M	R	1/20
03	355	Unit or Basis for Measurement Code	1	M	ID	2/2
04	935	Measurement Significance Code	1	O/Z	ID	2/2
05	739	Measurement Value	1	O/Z	R	1/20

Semantic Notes

01	NF601 are codes identifying carbohydrates. Code TTC Total Carbohydrates pertains to all carbohydrates in the product.
04	NF604 Valid codes are 03, 04, 05, 06 and 07, pertaining to the measurement in NF602
05	NF605 is the percent daily value (DV) of the code specified in NF601

NF7 - Nutrition Facts Panel Other Nutrients

Provides other nutrient information with the corresponding measurements as they appear on the product's nutritional facts table.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	738	Measurement Qualifier	1	M	ID	1/3
02	739	Measurement Value	1	M	R	1/20
03	355	Unit or Basis for Measurement Code	1	M	ID	2/2
04	935	Measurement Significance Code	1	O/Z	ID	2/2
05	739	Measurement Value	1	O/Z	R	1/20

Semantic Notes

04	NF704 Valid codes are 03, 04, 05, 06 and 07, pertaining to the measurement in NF702
05	NF705 is the percent daily value (DV) of NF702

NF8 - Nutrition Facts Panel Vitamins and Minerals

Provides vitamin and mineral information with the corresponding measurements as they appear on the product's nutritional facts table.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	738	Measurement Qualifier	1	M	ID	1/3
02	739	Measurement Value	1	M/Z	R	1/20
03	739	Measurement Value	1	X/Z	R	1/20
04	355	Unit or Basis for Measurement Code	1	X	ID	2/2
05	935	Measurement Significance Code	1	O/Z	ID	2/2

Syntax Notes

03	P0304

Semantic Notes

02	NF802 is the percent daily value (DV) of the code specified in NF801
03	NF803 and NF804 is an additional value pertaining to the vitamin or mineral. Example 5 GR.
05	NF805 Valid codes are 03, 04, 05, 06 and 07, pertaining to the measurement in NF802

NFB - Nutrition Facts Panel Footer Calorie Diet

Provides footer statement for a calorie diet quantity as it appears on the product's nutritional facts table.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M/Z	R	1/15

Semantic Notes

01 NFB01 Denotes the calorie counts for the diet as stated in the footer panel. Example 2,000 calorie diet

NFC - Nutrition Facts Panel Footer Calorie Diet Nutrient Amounts

Provides footer statement for a calorie diet nutrient amounts as it appears on the product's nutritional facts table.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	738	Measurement Qualifier	1	M	ID	1/3
02	739	Measurement Value	1	M	R	1/20
03	355	Unit or Basis for Measurement Code	1	O	ID	2/2
04	935	Measurement Significance Code	1	O/Z	ID	2/2

Semantic Notes

04 NFC04 Valid codes are 03, 04, 05, 06 and 07, pertaining to the measurement in NFC02

Comments

00 This segment provides the information from the Footer of the nutrition fact panel relating to the Calorie Diet(s). Example a 2000 or 2500 Calorie Diet, also includes the total Fat, Cholesterol, Sodium, Total Carbohydrates, and Dietary Fiber.

NFD - Nutrition Facts Panel Footer Statement

Provides footer statement(s) for the Nutrient Facts Label.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C071	Composite Multiple Language Text Information	1	O/Z		

Semantic Notes

01 NFD01 is the % Daily Value statement in the footer of the nutrition facts label.

Comments

01 When there is more than one footer statement that is in multiple languages, there is a need to track each statement to its language. NFD01 is used to track a statement that is provided in multiple languages. Examples: Dry Mix*EN*Statement 1 Teneur de poudre*FR*Statement 1 1/2 cup skim milk adds 40 calories*EN*Statement 2 1/2 tasse de lait ecreme ajoute 40 calories*FR* Statement 2

NFE - Nutrition Facts Panel Product Name

Provides the name of the product or product variant as per the nutrition facts table.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C071	Composite Multiple Language Text Information	1	M/Z		
02	C071	Composite Multiple Language Text Information	1	O/Z		
03	C071	Composite Multiple Language Text Information	1	O/Z		

Semantic Notes

01 NFE01 Provides the product name or product variant name.

02 NFE02 Provides the product state statement as it appears on the label. Example: Dry Mix; Prepared

03 NFE03 Provides the product statement pertaining to NFE02. Example: NFE02 = Prepared and NFE03 is the supporting statement for prepared. This statement typically appears in the footer of the nutrition facts label.

NM1 - Individual or Organizational Name

To supply the full name of an individual or organizational entity

TRANSACTION SETS USED IN

100 103 105 111 112 113 124 132 133 148 153 154 155 157 161 175 176 179 186 187 194 197 198 199

823 824 827 828 830 834 835 837 858 861 863 872 890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	98	Entity Identifier Code	1	M	ID	2/3
02	1065	Entity Type Qualifier	1	M/Z	ID	1/1
03	1035	Name Last or Organization Name	1	X	AN	1/80
04	1036	Name First	1	O	AN	1/35
05	1037	Name Middle	1	O	AN	1/25
06	1038	Name Prefix	1	O	AN	1/10
07	1039	Name Suffix	1	O	AN	1/10
08	66	Identification Code Qualifier	1	X	ID	1/2
09	67	Identification Code	1	X	AN	2/80
10	706	Entity Relationship Code	1	X	ID	2/2
11	98	Entity Identifier Code	1	O	ID	2/3
12	1035	Name Last or Organization Name	1	O	AN	1/80

Syntax Notes

08 P0809
11 C1110
12 C1203

Semantic Notes

02 NM102 qualifies NM103.

Comments

10 NM110 and NM111 further define the type of entity in NM101.
12 NM112 can identify a second surname.

NTE - Note/Special Instruction

To transmit information in a free-form format, if necessary, for comment or special instruction

TRANSACTION SETS USED IN

103 104 110 130 133 135 146 147 152 154 179 180 185 189 190 194 195 198 199 200 201 204 206 215
219 220 222 227 228 240 249 251 255 260 261 262 266 285 288 290 410 422 424 426 429 452 463 470
501 503 511 521 527 567 810 811 820 823 824 835 837 841 842 844 845 847 848 849 853 858 859 863
869 875 876 879 880 884 888 889 896 920 940 943 944 945 947

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	363	Note Reference Code	1	O	ID	3/3
02	352	Description	1	M	AN	1/80

Comments

00	The NTE segment permits free-form information/data which, under X12 standard implementations, is not machine processible. The use of the NTE segment should therefore be avoided, if at all possible, in an automated environment.

NUT - Nuts Information

To specify type of nuts and related characteristics.

TRANSACTION SETS USED IN
832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	O/Z	AN	1/20
02	1852	Type of Nuts	1	M	ID	6/6
03	739	Measurement Value	1	M/Z	R	1/20

Semantic Notes

01 Is the sequence number of the nut in the list of nuts.

03 Provides the percentage of nut.

NX1 - Property or Entity Identification

To define the attributes of a property or an entity

TRANSACTION SETS USED IN

105 111 155 194 197 198 199 200 201 202 205 206 245 261 262 265 267 272 274 275 280 285 833 834 872 890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	98	Entity Identifier Code	1	M	ID	2/3
02	98	Entity Identifier Code	1	O	ID	2/3
03	98	Entity Identifier Code	1	O	ID	2/3
04	98	Entity Identifier Code	1	O	ID	2/3
05	98	Entity Identifier Code	1	O	ID	2/3

NX2 - Location ID Component

To define types and values of a geographic location

TRANSACTION SETS USED IN

101 105 113 155 158 187 197 198 199 200 201 202 203 205 206 244 245 255 261 262 265 280 362 620 811 833 850 855 860 865 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1106	Address Component Qualifier	1	M	ID	2/2
02	166	Address Information	1	M	AN	1/55
03	1096	County Designator Code	1	O	ID	5/5
04	1106	Address Component Qualifier	1	X/Z	ID	2/2
05	166	Address Information	1	X	AN	1/55
06	554	Assigned Number	1	O	N0	1/9

Syntax Notes

04 P0405

Semantic Notes

04 NX204 and NX205 are used in conjunction with NX201 and NX202 to convey a range of address components, such as "street address high" and "street address low."

Comments

00 If NX201 codes 15 and 16 are sent for 4 insured properties, a total of 8 records are sent. The first address would carry a value of 1 in NX206 for its two records, the second address would carry a value of 2 for its two records, etc.

00 NX206 links the NX2 records that belong to an individual property address when more than one property address is sent

OBI - Obligation Information

To identify borrower's financial obligation

TRANSACTION SETS USED IN
206

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	811	Obligation Type Code	1	M/Z	ID	2/2
02	93	Name	1	O/Z	AN	1/60
03	782	Monetary Amount	1	O/Z	R	1/18
04	782	Monetary Amount	1	O/Z	R	1/18
05	594	Frequency Code	1	O/Z	ID	1/1
06	380	Quantity	1	O/Z	R	1/15

Semantic Notes

01 OBI01 is the code that identifies the type of financial obligation.
02 OBI02 is the name of the liability holder.
03 OBI03 is the amount of the obligation balance.
04 OBI04 is the amount of the scheduled payments.
05 OBI05 is the frequency of the scheduled payments.
06 OBI06 is the number of delinquent payments.

OD - Origin and Destination

To identify the origin and destination of a shipment

TRANSACTION SETS USED IN

453

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	154	Standard Point Location Code	1	M/Z	ID	6/9
02	154	Standard Point Location Code	1	M/Z	ID	6/9
03	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
04	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4

Semantic Notes

01 OD01 is the Standard Point Location Code corresponding to the origin.

02 OD02 is the Standard Point Location Code of the Destination.

03 OD03 is the Standard Carrier Alpha Code (SCAC) of the carrier serving the Standard Point Location Code identified in OD01.

04 OD04 is the Standard Carrier Alpha Code (SCAC) of the carrier serving the Standard Point Location Code identified in OD02.

OI - Other Health Insurance Information

To specify information associated with other health insurance coverage

TRANSACTION SETS USED IN
837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1032	Claim Filing Indicator Code	1	O	ID	1/2
02	1383	Claim Submission Reason Code	1	O	ID	2/2
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
04	1351	Patient Signature Source Code	1	O	ID	1/1
05	1360	Provider Agreement Code	1	O	ID	1/1
06	1363	Release of Information Code	1	O	ID	1/1
07	1359	Provider Accept Assignment Code	1	O	ID	1/1
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
10	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
11	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

03 OI03 is the assignment of benefits indicator. A "Y" value indicates insured or authorized person authorizes benefits to be assigned to the provider; an "N" value indicates benefits have not been assigned to the provider.

08 OI08 is payer-to-payer adjustment code. A "Y" value indicates a payer-to-payer COB claim is an adjustment. An "N" value indicates payer-to-payer COB claim is not an adjustment.

09 OI09 is payer to data reporting adjustment code. A "Y" value indicates a payer-to-data reporting entity claim is an adjustment. An "N" value indicates payer-to-data reporting entity claim is not an adjustment.

10 OI10 is payer-to-payer void code. A "Y" value indicates a payer-to-payer COB claim is a void. An "N" value indicates payer-to-payer COB claim is not a void.

11 OI11 is payer to data reporting void code. A "Y" value indicates a payer-to-data reporting entity claim is a void. An "N" value indicates payer-to-data reporting entity claim is not a void.

OID - Order Information Detail

To specify order information detail

TRANSACTION SETS USED IN

163 204 210 211 212 214 223 753 754

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	X/Z	AN	1/80
02	324	Purchase Order Number	1	X	AN	1/22
03	127	Reference Identification	1	O/Z	AN	1/80
04	211	Packaging Form Code	1	X	ID	3/3
05	380	Quantity	1	X	R	1/15
06	188	Weight Unit Code	1	X	ID	1/1

10	647	Application Error Condition Code	1	O	ID	1/3
11	127	Reference Identification	1	O/Z	AN	1/80
12	211	Packaging Form Code	1	X	ID	3/3
13	380	Quantity	1	X	R	1/15

Syntax Notes

01	R0102
03	C0302
04	P0405
06	P0607
08	P0809
12	P1213

Semantic Notes

01	OID01 is the seller's order identification number.
03	OID03 is the number assigned by the consignee to further define the purchase order number.
11	OID11 specifies the sorting and/or segregating number for each receiving location (processing area).

Comments

12	OID12 and OID13 allow for a second occurrence of the packaging form for an order, with a different Packaging Form Code. As an example, an order may be comprised of 12 cartons (OID04 and OID05) on 2 pallets (OID12 and OID13).

OOI - Associated Object Type Identification

To identify attributes and status related to the object

TRANSACTION SETS USED IN
102 179 271 274 275 824

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1694	Object Identification Group	1	M	AN	1/2
02	1691	Object Type Qualifier	1	M/Z	ID	1/3
03	1692	Object Attribute Identification	1	M	AN	1/256
04	1693	Controlling Agency Code	1	O	ID	1/3
05	1871	Attachment Format Identifier	1	O	ID	3/4

Syntax Notes

05 C0502

Semantic Notes

02 Object type qualifier (data element 1691) defines the object attribute (either data element 1692 or 1693), instructing the receiving system on how to process and route the object.

OPS - Program Subject Area and Eligibility

To provide the receiving educational institution or agency with information about the student's eligibility and participation in selected subject areas within other programs

TRANSACTION SETS USED IN

130

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	66	Identification Code Qualifier	1	X/Z	ID	1/2
02	67	Identification Code	1	X	AN	2/80
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
04	1132	Instructional Setting Code	1	O	ID	1/2
05	C001	Composite Unit of Measure	1	X/Z		
06	380	Quantity	1	X	R	1/15

Syntax Notes

01	P0102
05	P0506

Semantic Notes

01	OPS01 and OPS02 are the subject area dealt with in the program.
03	OPS03 indicates the eligibility determination of the student for a program. A "Y" indicates that the student is being served; an "N" indicates that the student is eligible, but is not being served.
05	OPS05 and OPS06 together can be used to provide hours per week or other rates related to the instructional setting in OPS04.

OPX - Placement Criteria

To provide receiving educational institution or agency with information concerning the placement criteria or status of the student in a program

TRANSACTION SETS USED IN

130 133

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	1135	Placement Criteria Code	1	O	ID	1/1
03	641	Status Reason Code	1	O	ID	3/3
04	1155	Educational Test or Requirement Code	1	O	ID	1/3
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

01 OPX01 indicates whether this information refers to the student's entry or exit from a program or service. A "Y" indicates entry information; an "N" indicates exit information.

05 OPX05 indicates whether beginning postsecondary freshmen are accepted at the institution. A "Y" indicates that beginning postsecondary freshmen are accepted at the institution; an "N" indicates that beginning postsecondary freshmen are not accepted at the institution.

OQS - Order Quantity Sequence

To specify number assigned to a unit within a multiple unit order

TRANSACTION SETS USED IN

866

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1041	Sequence Value	1	M	R	1/9
02	380	Quantity	1	M/Z	R	1/15

Semantic Notes

02 OQS02 is quantity ordered.

ORI - Object Reference Identification

To identify the object identification reference

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

102

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1690	Associated Object Reference Identification	1	M	AN	1/36

OTI - Original Transaction Identification

To identify the edited transaction set and the level at which the results of the edit are reported, and to indicate the accepted, rejected, or accepted-with-change edit result

TRANSACTION SETS USED IN
824

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	110	Application Acknowledgment Code	1	M	ID	1/2
02	128	Reference Identification Qualifier	1	M	ID	2/3
03	127	Reference Identification	1	M/Z	AN	1/80
04	142	Application Sender's Code	1	O	AN	2/15
05	124	Application Receiver's Code	1	O	AN	2/15

16	305	Transaction Handling Code	1	O/Z	ID	1/2
17	641	Status Reason Code	1	O/Z	ID	3/3

Syntax Notes

09 C0908

Semantic Notes

03 OTI03 is the primary reference identification or number used to uniquely identify the original transaction set.

06 OTI06 is the group date.

07 OTI07 is the group time.

11 If OTI11 is present, it will contain the version/release under which the original electronic transaction was translated by the receiver.

12 OTI12 is the purpose of the original transaction set, and is used to assist in its unique identification.

13 OTI13 is the type of the original transaction set, and is used to assist in its unique identification.

14 OTI14 is the application type of the original transaction set, and is used to assist in its unique identification.

15 OTI15 is the type of action indicated or requested by the original transaction set, and is used to assist in its unique identification.

16 OTI16 is the action requested by the original transaction set, and is used to assist in its unique identification.

17 OTI17 is the status reason of the original transaction set, and is used to assist in its unique identification.

Comments

02 OTI02 contains the qualifier identifying the business transaction from the original business application, and OTI03 will contain the original business application identification.

04 If used, OTI04 through OTI08 will contain values from the original electronic functional group generated by the sender.

09 If used, OTI09 through OTI10 will contain values from the original electronic transaction set generated by the sender.

P1 - Pickup

To specify the pickup details including time, date, and equipment

TRANSACTION SETS USED IN

104 110 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	108	Pickup or Delivery Code	1	O	ID	1/2
02	109	Pickup Date	1	M	DT	8/8
03	374	Date/Time Qualifier	1	M/Z	ID	3/3
04	111	Pickup Time	1	O	TM	4/4
05	206	Equipment Initial	1	O	AN	1/4
06	207	Equipment Number	1	O	AN	1/15
07	21	Number of Shipments	1	O/Z	N0	1/5

Semantic Notes

03 P103 is the pickup date qualifier.

07 P107 is the number of shipments tendered.

P2 - Delivery Date Information

To specify delivery date

TRANSACTION SETS USED IN

859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	108	Pickup or Delivery Code	1	O	ID	1/2
02	32	Delivery Date	1	M	DT	8/8
03	374	Date/Time Qualifier	1	M	ID	3/3

P4 - Port Information

To transmit identifying information for a port

TRANSACTION SETS USED IN
309 350 352 353 354 355 356 357 358

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	310	Location Identifier	1	M/Z	AN	1/30
02	373	Date	1	M/Z	DT	8/8
03	380	Quantity	1	O/Z	R	1/15
04	310	Location Identifier	1	O/Z	AN	1/30
05	337	Time	1	O/Z	TM	4/8
06	373	Date	1	O/Z	DT	8/8
07	337	Time	1	O/Z	TM	4/8

Semantic Notes

01 P401 is used for customs district and port code (census schedule D).
02 P402 is the estimated date of arrival.
03 P403 is used for number of bills of lading.
04 P404 is the Facilities Information and Resources Management System (FIRMS) Code.
05 P405 is the estimated time of arrival for P402.
06 P406 is the date conveyance departed prior port.
07 P407 is the time conveyance departed prior port.

P5 - Port Function

To indicate port-related data

TRANSACTION SETS USED IN

601

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	115	Port or Terminal Function Code	1	M	ID	1/1
02	309	Location Qualifier	1	M	ID	1/2
03	310	Location Identifier	1	M	AN	1/30

PAD - Product Adjustment Detail

To specify the product transfer type, and/or line item number

TRANSACTION SETS USED IN

844 845 849

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	X/Z	AN	1/20
02	521	Product Transfer Type Code	1	X	ID	2/2
03	670	Change or Response Type Code	1	O	ID	2/2
04	648	Price Multiplier Qualifier	1	X	ID	3/3
05	649	Multiplier	1	X	R	1/10

Syntax Notes

01	R0102
04	P0405

Semantic Notes

01	PAD01 is the line item identification.

PAI - Print Advertisement Information

Provides specific information about the date, size, and cost of an advertisement

TRANSACTION SETS USED IN

290

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	O/Z	DT	8/8
02	739	Measurement Value	1	X/Z	R	1/20
03	355	Unit or Basis for Measurement Code	1	X/Z	ID	2/2
04	610	Amount	1	O/Z	N2	1/15
05	610	Amount	1	O/Z	N2	1/15

Syntax Notes

02	P0203

Semantic Notes

01	PAI01 is the date of the ad.
02	PAI02 is the ad size.
03	PAI03 qualifies the ad size (PAI02): inches, lines, etc.
04	PAI04 is the budget amount.
05	PAI05 is the actual cost.

PAL - Pallet Type and Load Characteristics

To identify the type and physical attributes of the pallet, and, gross weight, gross volume, and height of the load and the pallet

TRANSACTION SETS USED IN

304 754 832 850 852 856 857 860 888 897 940 944 945

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	883	Pallet Type Code	1	O	ID	1/2
02	884	Pallet Tiers	1	O	N0	1/3
03	885	Pallet Blocks	1	O	N0	1/3
04	356	Pack	1	O/Z	N0	1/6
05	395	Unit Weight	1	X/Z	R	1/8
06	355	Unit or Basis for Measurement Code	1	X	ID	2/2
07	82	Length	1	X/Z	R	1/8
08	189	Width	1	X	R	1/8
09	65	Height	1	X/Z	R	1/8
10	355	Unit or Basis for Measurement Code	1	X	ID	2/2
11	384	Gross Weight per Pack	1	X/Z	R	1/9
12	355	Unit or Basis for Measurement Code	1	X	ID	2/2
13	385	Gross Volume per Pack	1	X	R	1/9
14	355	Unit or Basis for Measurement Code	1	X	ID	2/2
15	399	Pallet Exchange Code	1	O	ID	1/1
16	810	Inner Pack	1	O	N0	1/6
17	1699	Pallet Structure Code	1	O	ID	1/1
18	380	Quantity	1	O/Z	R	1/15
19	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
20	352	Description	1	O	AN	1/80

Syntax Notes

05	P0506
07	C0710
08	C0810
09	C0910
10	L10070809
11	P1112
13	P1314

Semantic Notes

04	PAL04 (Pack) is the number of pieces on the pallet.
05	PAL05 (Unit Weight) is the weight of the pallet alone, before loading.
07	PAL07 and PAL08 (Length and Width) are the dimensions of the pallet before loading.
09	PAL09 (Height) is the height of the pallet and load.

11 PAL11 and PAL13 (Gross Weight and Gross Volume) are measured after loading and includes the pallet.

18 PAL18 is the maximum quantity of stackable pallets.

19 PAL19 indicates if the block count on at least one pallet tier is not the same as on other tiers. A "Y" indicates the pallet has unequal block counts on one or more tiers. An "N" indicates that the pallet's blocks per tier are uniform (block x tier equals quantity on pallet).

PAM - Period Amount

To indicate a quantity, and/or amount for an identified period

TRANSACTION SETS USED IN

113 152 153 154 175 176 194 202 268 521 540 806 810 832 838 839 840 843 850 851 855 860 865

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	673	Quantity Qualifier	1	X	ID	2/2
02	380	Quantity	1	X	R	1/15
03	C001	Composite Unit of Measure	1	X		
04	522	Amount Qualifier Code	1	X	ID	1/3
05	782	Monetary Amount	1	X	R	1/18
06	344	Unit of Time Period or Interval Code	1	X	ID	2/2
07	374	Date/Time Qualifier	1	X	ID	3/3
08	373	Date	1	X	DT	8/8
09	337	Time	1	X	TM	4/8
10	374	Date/Time Qualifier	1	X/Z	ID	3/3
11	373	Date	1	X	DT	8/8
12	337	Time	1	X	TM	4/8
13	1004	Percent Qualifier	1	X	ID	1/2
14	954	Percentage as Decimal	1	X	R	1/10
15	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

01	P010203
02	R020514
04	P0405
07	L070809
07	C0706
08	C0807
09	C0907
10	L101112
10	C1007
11	C1110
12	C1210
13	P1314
15	C1505

Semantic Notes

10	PAM10, PAM11, or PAM12 are used when two dates are required.
15	PAM15 indicates whether the monetary amount identified in PAM05 is a net or gross value. A "Y" indicates amount is a gross value; an "N" indicates amount is a net value.

PAS - Property Appraisal Summary

To provide high-level information about the property valuation

TRANSACTION SETS USED IN

872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1077	Property Value Estimate Type Code	1	M/Z	ID	1/1
02	522	Amount Qualifier Code	1	M/Z	ID	1/3
03	782	Monetary Amount	1	M/Z	R	1/18
04	782	Monetary Amount	1	X/Z	R	1/18
05	782	Monetary Amount	1	X/Z	R	1/18
06	1090	Improvement Status Code	1	O/Z	ID	1/1
07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
08	1321	Condition Indicator Code	1	O/Z	ID	2/3
09	373	Date	1	O/Z	DT	8/8
10	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

04 P0405

Semantic Notes

01 PAS01 defines the type of property valuation used.

02 PAS02 qualifies the type of appraisal amount given in PAS03.

03 PAS03 is the estimate of the property value.

04 PAS04 is the estimated cost of property improvements.

05 PAS05 is the estimated property value after improvements.

06 PAS06 defines the status of property improvements.

07 PAS07 defines whether the borrower is aware of the FHA valuation statement. A "Y" indicates awareness; an "N" indicates no awareness.

08 PAS08 describes the condition under which the appraised value was determined.

09 PAS09 is the Appraisal Completion Date.

10 PAS10 defines if comparable values are available. A "Y" indicates that comparables are available, an "N" indicates that comparables are not available.

PAT - Patient Information

To supply patient information

TRANSACTION SETS USED IN
276 277 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1069	Individual Relationship Code	1	O	ID	2/2
02	1384	Patient Location Code	1	O	ID	1/1
03	584	Employment Status Code	1	O	ID	2/2
04	1220	Student Status Code	1	O	ID	1/1
05	1250	Date Time Period Format Qualifier	1	X	ID	2/3
06	1251	Date Time Period	1	X/Z	AN	1/35
07	355	Unit or Basis for Measurement Code	1	X	ID	2/2
08	81	Weight	1	X/Z	R	1/10
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

05 P0506
07 P0708

Semantic Notes

06 PAT06 is the date of death.
08 PAT08 is the patient's weight.
09 PAT09 indicates whether the patient is pregnant or not pregnant. Code "Y" indicates the patient is pregnant; code "N" indicates the patient is not pregnant.

PBI - Problem Identification

To identify an error or previously transmitted error

TRANSACTION SETS USED IN
151

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	X/Z	AN	1/80
02	306	Action Code	1	X	ID	1/2
03	933	Free-form Message Text	1	O	AN	1/264
04	817	Tax Information Identification Number	1	O	AN	1/30
05	380	Quantity	1	X/Z	R	1/15
06	449	Fixed Format Information	1	X/Z	AN	1/80
07	380	Quantity	1	X/Z	R	1/15
08	449	Fixed Format Information	1	X/Z	AN	1/80

Syntax Notes

01	R0102
05	E0506
07	E0708

Semantic Notes

01	PBI01 is the error identification number corresponding to a given error.
05	PBI05 is a copy of a bad data element identified by PBI04.
06	PBI06 is a copy of a bad data element identified by PBI04.
07	PBI07 is a copy of the new content for a data element identified by PBI04.
08	PBI08 is a copy of the new content for a data element identified by PBI04.

PCL - Previous College

To provide the receiving educational institution or agency with information concerning the student's previous postsecondary education experience

TRANSACTION SETS USED IN
130 138 189

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	66	Identification Code Qualifier	1	X/Z	ID	1/2
02	67	Identification Code	1	X	AN	2/80
03	1250	Date Time Period Format Qualifier	1	X	ID	2/3
04	1251	Date Time Period	1	X/Z	AN	1/35
05	1126	Academic Degree Code	1	X	ID	3/3
06	1251	Date Time Period	1	O/Z	AN	1/35
07	352	Description	1	X	AN	1/80

Syntax Notes

01	P0102
01	R0107
03	P0304
06	C0605

Semantic Notes

01	PCL01 and PCL02 are the institution or school that the student previously attended.
04	PCL04 indicates the range of dates of attendance at the school previously attended.
06	PCL06 is the year a degree was awarded at the school previously attended.
06	PCL06 is in the format CCYY.

PCR - Payment Cancellation Request

To identify cancellation type and amount

TRANSACTION SETS USED IN

829

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	959	Payment Cancellation Type Code	1	M	ID	3/3
02	782	Monetary Amount	1	M	R	1/18

PCS - Product Claim Status

To convey the status of a product service claim or claims or to supply adjustment reason codes and amounts as needed for an entire claim or for a particular item within the claim

TRANSACTION SETS USED IN

141

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1029	Claim Status Code	1	X/Z	ID	1/2
02	559	Agency Qualifier Code	1	X/Z	ID	2/2
03	822	Source Subqualifier	1	O/Z	AN	1/15
04	1172	Claim Response Reason Code	1	X/Z	ID	1/3
05	782	Monetary Amount	1	O/Z	R	1/18
06	889	Follow-up Action Code	1	O/Z	ID	1/1
07	559	Agency Qualifier Code	1	X	ID	2/2
08	822	Source Subqualifier	1	O/Z	AN	1/15
09	1225	Disposition Code	1	X/Z	AN	3/3
10	352	Description	1	O/Z	AN	1/80
11	553	Authorization Identification	1	O/Z	AN	1/4

Syntax Notes

01	R0104
02	C0204
03	C0302
07	C0709
08	C0807

Semantic Notes

01	PCS01 will be used principally when the entire claim has been approved and no more detail is required or when there is a question about the claim that has to be decided and the claim response is to inform the claimant that the claim is pending and has not been forgotten.
02	PCS02 identifies the source of the code.
03	PCS03 specifies a particular table of codes maintained by the agency identified in PCS02.
04	PCS04 identifies the status of the claim or an individual portion of the claim and the reason for any change in the claimed amount.
05	PCS05 is the value to be paid after the application of any claim adjustment.
06	PCS06 provides instructions to the claim submitter as to the next action to be taken when the claim was not approved as submitted.
08	PCS08 is the source of the code in PCS09. It is a particular table of codes maintained by the organization specified in PCS07 for specifying PCS09.
09	PCS09 is the disposition of the part of subassembly.
10	PCS10 describes why a claim amount was changed when such information cannot be conveyed with a code value.
11	PCS11 can apply to an authorization before a repair action took place.

PCT - Percent Amounts

To qualify percent amounts and supply percent amounts

TRANSACTION SETS USED IN

103 105 112 113 124 132 133 148 149 153 155 159 176 179 185 187 194 196 199 201 202 205 251 259 260 261 262 263 266 267 271 272 285 362 501 503 561 650 806 811 812 820 839 840 843 846 850 860 865 872 887

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1004	Percent Qualifier	1	M	ID	1/2
02	954	Percentage as Decimal	1	M	R	1/10

PCU - Parameter for Clinical Use

To supply various information used in clinical data exchange.

TRANSACTION SETS USED IN

275 278 500 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1883	Clinical Care Parameter Qualifier	1	X/Z	ID	1/80
02	1884	Clinical Care Parameter Code	1	X/Z	ID	1/80

Syntax Notes

01 P0102

Semantic Notes

01 PCU01 is a qualifier identifying the type or category of the clinical parameter transmitted in PCU02.

02 PCU02 identifies a clinical parameter, also described as a biological label based on genetic factors.

PD - Pricing Data

To describe the pricing basic input detail

TRANSACTION SETS USED IN
194 196 251 805 843 865

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	344	Unit of Time Period or Interval Code	1	M/Z	ID	2/2
02	373	Date	1	M/Z	DT	8/8
03	C001	Composite Unit of Measure	1	M		
04	380	Quantity	1	M/Z	R	1/15
05	93	Name	1	M/Z	AN	1/60
06	352	Description	1	O/Z	AN	1/80
07	1196	Breakdown Structure Detail Code	1	O	ID	2/2
08	127	Reference Identification	1	O/Z	AN	1/80
09	352	Description	1	O/Z	AN	1/80
10	1401	Proposal Data Detail Identifier Code	1	O	ID	1/3

Semantic Notes

01 PD01 is the unit of the time period contained in PD02.
02 PD02 is the date of the start of the time period in PD01.
04 PD04 is the quantity of the unit of measurement in PD03.
05 PD05 is the name of the cost element being proposed.
06 PD06 is the description of the name of the cost element being proposed.
08 PD08 is a reference to a specific paragraph number contained in an external document.
09 PD09 is the category of the data being proposed.

PDD - Pricing Data Detail

To provide the rates, direct input, and pricing factors for each element of work, cross-referenced to an applicable request or submission

TRANSACTION SETS USED IN
194 196 251 805 843 865

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	M/Z	AN	1/20
02	380	Quantity	1	X	R	1/15
03	782	Monetary Amount	1	X	R	1/18
04	954	Percentage as Decimal	1	X	R	1/10
05	1401	Proposal Data Detail Identifier Code	1	O	ID	1/3

Syntax Notes

02 R020304

Semantic Notes

01 PDD01 is a sequential number assigned by the initiator.

PDE - Property Metes and Bounds Description

To describe real estate property by boundary lines with their terminal points and angles; this segment defines legal boundaries of real estate property

TRANSACTION SETS USED IN

197 199 201 206 245 261 262 265

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	933	Free-form Message Text	1	O/Z	AN	1/264
02	1280	Direction Identifier Code	1	O/Z	ID	1/1
03	C001	Composite Unit of Measure	1	X/Z		
04	739	Measurement Value	1	X/Z	R	1/20

Syntax Notes

03	P0304

Semantic Notes

01	PDE01 describes a boundary point on a property legal description.
02	PDE02 describes the geographic direction of the first measurement.
03	PDE03 defines type of property measurement, whether a distance or angle.
04	PDE04 defines property angle measurement or distance of property side depending on the value of PDE03.

PDH - Pharmaceutical Drug Information

Specifies information for pharmaceutical drug administration.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1805	Route of Administration for Pharmaceutical Drugs	1	X/Z	ID	2/3
02	C068	Composite Ingredient Information	1	X		
03	1806	Dosage Form for Pharmaceutical Drugs	1	X/Z	ID	4/4
04	C068	Composite Ingredient Information	1	X		
05	1807	Biomedical Hazard	1	X/Z	ID	1/2
06	C068	Composite Ingredient Information	1	X		
07	1808	Trade Item Drug Branding Type	1	O	ID	2/2
08	1585	Shape Code	1	X/Z	ID	1/2
09	C068	Composite Ingredient Information	1	X		

Syntax Notes

01	E0102
03	E0304
05	E0506
08	E0809

Semantic Notes

01	If a route of administration is not present in PDH01 code list then provide the route of administration in PDH02.
03	If a dosage form is not present in PDH03 code list then provide the dosage form in PDH04.
05	If a biomedical hazard is not present in PDH05 code list then provide the biomedical hazard in PDH06.
08	If a shape code is not present in PDH08 code list then provide shape in PDH09.

PDI - Practice Detail Information

To provide detail information on a health care provider's practice

TRANSACTION SETS USED IN

274

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1068	Gender Code	1	O/Z	ID	1/1
02	740	Range Minimum	1	O/Z	R	1/20
03	741	Range Maximum	1	O/Z	R	1/20
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

01 When PDI01 is not present, it is implied that both genders are accepted by the practice.

02 PDI02 indicates the minimum age accepted in this practice.

03 PDI03 indicates the maximum age accepted in this practice.

04 PDI04 indicates whether or not this practice accepts new patients. A "Y" indicates this practice accepts new patients; an "N" indicates this practice does not accept new patients.

PDL - Payment Details

To transmit information required to establish payment or remittance activity

TRANSACTION SETS USED IN

105 111 113 189 267 268 286

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	591	Payment Method Code	1	M	ID	3/3

Syntax Notes

02	P0203
03	E0304
07	P0708
09	P0910
11	P1112

Semantic Notes

04	PDL04 specifies the percentage allocation of an amount to be determined.
07	PDL07 and PDL08 relate to the depository financial institution (DFI) that will receive the future payment order.
09	PDL09 is a code identifying the type of bank account or other financial asset.
10	PDL10 is the account number of the financial asset.
12	PDL12 is the date or the day of the month of the payment.

PDP - Property Description - Personal

To provide a description of personal property

TRANSACTION SETS USED IN

187 270 271 272

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1188	Type of Personal or Business Asset Code	1	M	ID	2/2
02	23	Commodity Code Qualifier	1	X	ID	1/2
03	22	Commodity Code	1	X	AN	1/30

Syntax Notes

02	P0203

PDR - Property Description - Real

To provide a description of real property

TRANSACTION SETS USED IN

187 270 271 272

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1074	Type of Real Estate Asset Code	1	M	ID	2/2

03	1271	Industry Code	1	X	AN	1/30
04	689	Occupancy Code	1	O	ID	2/2

Syntax Notes

02 P0203

PDS - Property Description/Legal Description

To provide specifics on property or legal description; this segment provides for a simple legal description such as lot, blockand subdivision

TRANSACTION SETS USED IN

103 187 197 199 201 202 205 206 245 261 262 265

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1496	Property Description Qualifier	1	M	ID	2/2
02	933	Free-form Message Text	1	O/Z	AN	1/264
03	C040	Reference Identifier	1	O		

Semantic Notes

02 PDS02 is used to supply property description detail.

PEN - Pension Information

To specify financial activity for a pension plan

TRANSACTION SETS USED IN
820 823

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	640	Transaction Type Code	1	M	ID	2/2
02	782	Monetary Amount	1	X/Z	R	1/18

08	1262	Loan Type Code	1	O	ID	1/2
09	875	Maintenance Type Code	1	O	ID	3/3

Syntax Notes

02 R0204

Semantic Notes

02 PEN02 is the total dollar amount for the transaction identified by the transaction type code.
04 PEN04 is the percent of salary an employee elected to contribute to a benefit plan.
05 PEN05 is a code, defined by trading partners, indicating special application processing.
06 PEN06 is the loan identification number.
07 PEN07 is the number of loan repayments represented.

PER - Administrative Communications Contact

To identify a person or office to whom administrative communications should be directed

TRANSACTION SETS USED IN

100 103 104 105 106 107 108 110 111 112 113 124 128 130 135 138 140 141 142 143 146 147 148 149

09	443	Contact Inquiry Reference	1	O	AN	1/20

Syntax Notes

03	P0304
05	P0506
07	P0708

PEX - Property or Housing Expense

To provide housing expense information

TRANSACTION SETS USED IN
198 201 202 261 262 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1071	General Expense Qualifier	1	M/Z	ID	2/2
02	122	Rate/Value Qualifier	1	X/Z	ID	2/2
03	782	Monetary Amount	1	X/Z	R	1/18
04	963	Tax Type Code	1	O	ID	2/2
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	98	Entity Identifier Code	1	O	ID	2/3
07	441	Tax Exempt Code	1	O	ID	1/1
08	C001	Composite Unit of Measure	1	O		

Syntax Notes

02 P0203

Semantic Notes

01 PEX01 defines the type of property or housing expense listed.

01 IF PEX01 equals "TAX", then PEX04 is the detailed tax type.

02 PEX02 is the time period of expense frequency.

03 PEX03 is the amount of the expense.

05 PEX05 defines whether the expense is escrowed or impounded. A "Y" indicates the expense is escrowed or impounded; an "N" indicates the expense is not escrowed or impounded.

Comments

07 If PEX01 = "TAX", then PEX07 defines the existing tax exemptions.

08 PEX08 further qualifies PEX03.

PI - Price Authority Identification

To communicate basis of pricing, such as contract number, quote number, or tariff number

TRANSACTION SETS USED IN

404 410 414 417 422 426 433 453 456 460 466 468 486 490 494 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	M	ID	2/3
02	127	Reference Identification	1	M	AN	1/80
03	436	Primary Publication Authority Code	1	O	ID	2/2
04	930	Regulatory Agency Code	1	O	ID	3/5
05	168	Tariff Agency Code	1	O	ID	1/4
06	965	Issuing Carrier Identifier	1	O	AN	1/10
07	660	Contract Suffix	1	O/Z	AN	1/2
08	169	Tariff Item Number	1	O/Z	AN	1/16
09	173	Tariff Supplement Identifier	1	O/Z	AN	1/4
10	172	Tariff Section Number	1	O/Z	AN	1/2
11	660	Contract Suffix	1	O/Z	AN	1/2
12	373	Date	1	O/Z	DT	8/8
13	373	Date	1	O/Z	DT	8/8
14	629	Alternation Precedence Code	1	O	ID	1/1
15	629	Alternation Precedence Code	1	O	ID	1/1
16	284	Service Level Code	1	O	ID	2/2

Semantic Notes

07 PI07 is the price authority suffix for the contract.

08 PI08 is the price authority item number.

09 PI09 is the price authority supplement.

10 PI10 is the price authority section number.

11 PI11 is the price authority suffix for tariff.

12 PI12 is the effective date.

13 PI13 is the expiration date.

PID - Product/Item Description

To describe a product or process in coded or free-form format

TRANSACTION SETS USED IN

100 124 140 142 143 148 154 180 185 187 196 197 215 244 251 266 267 268 271 275 283 500 503 561 625 754 806 810 811 818 819 820 830 832 836 838 840 841 842 843 844 845 846 847 848 849 850 851 855 856 857 860 861 863 865 866 867 869 870 878 888 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	349	Item Description Type Code	1	M	ID	1/1
02	750	Product/Process Characteristic Code	1	O	ID	2/3
03	559	Agency Qualifier Code	1	X/Z	ID	2/2
04	751	Product Description Code	1	X/Z	AN	1/12
05	352	Description	1	X	AN	1/80
06	752	Surface/Layer/Position Code	1	O	ID	2/2
07	822	Source Subqualifier	1	O	AN	1/15
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	819	Language Code	1	O/Z	ID	2/3
10	286	Product/Service Condition Code	1	X	ID	2/2

Syntax Notes

04	C0403
04	R040510
07	C0703
08	C0804
09	C0905

Semantic Notes

03	Use PID03 to indicate the organization that publishes the code list being referred to.
04	PID04 should be used for industry-specific product description codes.
08	PID08 describes the physical characteristics of the product identified in PID04. A "Y" indicates that the specified attribute applies to this item; an "N" indicates it does not apply. Any other value is indeterminate.
09	PID09 is used to identify the language being used in PID05.

Comments

01	If PID01 equals "F", then PID05 is used. If PID01 equals "S", then PID04 is used. If PID01 equals "X", then both PID04 and PID05 are used.
06	Use PID06 when necessary to refer to the product surface or layer being described in the segment.
07	PID07 specifies the individual code list of the agency specified in PID03.
10	If PID01 = "A", then PID10 is used. PID05 may also be used to further clarify the condition of the product.

PIN - Previous Incident

To identify details of previous insurance losses

TRANSACTION SETS USED IN
272

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	M/Z	N0	1/9
02	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
03	127	Reference Identification	1	O/Z	AN	1/80
04	93	Name	1	O/Z	AN	1/60
05	1250	Date Time Period Format Qualifier	1	X	ID	2/3
06	1251	Date Time Period	1	X/Z	AN	1/35
07	1271	Industry Code	1	O/Z	AN	1/30

Syntax Notes

05 P0506

Semantic Notes

01 PIN01 is used to uniquely identify previous incidents.
02 PIN02 is used to indicate if the loss has been reported to the police.
03 PIN03 is the policy number the claim was made under.
04 PIN04 is the name of the insurance company.
06 PIN06 is the date the loss occurred.
07 PIN07 is the cause of loss code.

PKD - Packaging Description

To specify a package description and other information

TRANSACTION SETS USED IN

271 272 754 832 841 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	103	Packaging Code	1	X	AN	3/5
02	822	Source Subqualifier	1	X	AN	1/15
03	559	Agency Qualifier Code	1	O	ID	2/2
04	754	Packaging Description Code	1	O	AN	1/7
05	102	Ownership Code	1	O	ID	1/1

Syntax Notes

02	C0201
03	C0302

PKG - Marking, Packaging, Loading

To describe marking, packaging, loading, and unloading requirements

TRANSACTION SETS USED IN

180 536 754 810 830 832 840 841 843 846 847 848 850 855 856 857 860 862 865 867 870 888 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	349	Item Description Type Code	1	X	ID	1/1
02	753	Packaging Characteristic Code	1	O	ID	1/5
03	559	Agency Qualifier Code	1	X	ID	2/2
04	754	Packaging Description Code	1	X/Z	AN	1/7
05	352	Description	1	X	AN	1/80
06	400	Unit Load Option Code	1	X	ID	2/2
07	819	Language Code	1	O/Z	ID	2/3

Syntax Notes

04	R040506
04	C0403
05	C0501
07	C0705

Semantic Notes

04	PKG04 should be used for industry-specific packaging description codes.
07	PKG07 is used to identify the language being used in PKG05.

Comments

00	Use the MEA (Measurements) Segment to define dimensions, tolerances, weights, counts, physical restrictions, etc.
01	If PKG01 equals "F", then PKG05 is used. If PKG01 equals "S", then PKG04 is used. If PKG01 equals "X", then both PKG04 and PKG05 are used.
03	Use PKG03 to indicate the organization that publishes the code list being referred to.
05	Special marking or tagging data can be given in PKG05 (description).

PKL - Multi-Pack Configuration

To identify the package level, quantity of stock-keeping units (SKUs), and other basic data related to the configuration of the package being defined

TRANSACTION SETS USED IN
832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	235	Product/Service ID Qualifier	1	M	ID	2/2
02	234	Product/Service ID	1	M	AN	1/80
03	355	Unit or Basis for Measurement Code	1	M	ID	2/2
04	380	Quantity	1	M/Z	R	1/15
05	65	Height	1	X	R	1/8
06	189	Width	1	X	R	1/8
07	677	Item Depth	1	X	R	1/6

10	355	Unit or Basis for Measurement Code	1	X	ID	2/2
11	385	Gross Volume per Pack	1	X	R	1/9
12	355	Unit or Basis for Measurement Code	1	X	ID	2/2
13	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

05	C0508
06	C0608
07	C0708
08	L08050607
09	P0910
11	P1112

Semantic Notes

04	PKL04 is the Stock Keeping Unit (SKU) quantity.
13	PKL13 is used to designate whether the product identified in PKL02 is saleable by the manufacturer at that packaging level. Code "Y" indicates that the product is saleable by the manufacturer at that packaging level, and code "N" indicates that the product in not saleable by the manufacturer at that packaging level.

PL - Proposal Cost Logic

To describe the cost logic used when pricing a particular aspect of a proposal

TRANSACTION SETS USED IN

194 251 805

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	M/Z	N0	1/9
02	C001	Composite Unit of Measure	1	M		
03	93	Name	1	M/Z	AN	1/60
04	1311	Calculation Operation Code	1	M	ID	1/1
05	352	Description	1	O/Z	AN	1/80
06	609	Count	1	O/Z	N0	1/9

Semantic Notes

01 PL01 is the logic sequence number.

03 PL03 is the name of the cost element being proposed.

05 PL05 is a text description of the cost element contained in PL03.

06 PL06 is an occurrence counter that indicates the order of items to appear in a cost summary data display.

PLA - Place or Location

To indicate action to be taken for the location specified and to qualify the location specified

TRANSACTION SETS USED IN
834 838

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	306	Action Code	1	M	ID	1/2
02	98	Entity Identifier Code	1	M	ID	2/3
03	373	Date	1	M/Z	DT	8/8
04	337	Time	1	O/Z	TM	4/8
05	1203	Maintenance Reason Code	1	O	ID	2/3

Semantic Notes

03 PLA03 is the effective date for the action identified in PLA01.

04 When used, PLA04 is the effective time for the action identified in PLA01.

PLB - Provider Level Adjustment

To convey provider level adjustment information for debit or credit transactions such as, accelerated payments, cost report settlements for a fiscal year and timeliness report penalties unrelated to a specific claim or service

TRANSACTION SETS USED IN
835

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	373	Date	1	M/Z	DT	8/8
03	C042	Adjustment Identifier	1	M/Z		
04	782	Monetary Amount	1	M/Z	R	1/18
05	C042	Adjustment Identifier	1	X/Z		
06	782	Monetary Amount	1	X/Z	R	1/18
07	C042	Adjustment Identifier	1	X/Z

10	782	Monetary Amount	1	X/Z	R	1/18
11	C042	Adjustment Identifier	1	X/Z		
12	782	Monetary Amount	1	X/Z	R	1/18
13	C042	Adjustment Identifier	1	X/Z		
14	782	Monetary Amount	1	X/Z	R	1/18

Syntax Notes

05	P0506
07	P0708
09	P0910
11	P1112
13	P1314

Semantic Notes

01	PLB01 is the provider number assigned by the payer.
02	PLB02 is the last day of the provider's fiscal year.
03	PLB03 is the adjustment information as defined by the payer.
04	PLB04 is the adjustment amount.
05	PLB05 is the adjustment information as defined by the payer.
06	PLB06 is the adjustment amount.
07	PLB07 is adjustment information as defined by the payer.
08	PLB08 is the adjustment amount.
09	PLB09 is adjustment information as defined by the payer.
10	PLB10 is the adjustment amount.
11	PLB11 is adjustment information as defined by the payer.
12	PLB12 is the adjustment amount.
13	PLB13 is adjustment information as defined by the payer.

14 PLB14 is the adjustment amount.

PLC - Equipment Placement Information

To specify the placement number and identification

TRANSACTION SETS USED IN

222

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1470	Number	1	M/Z	N0	1/9
02	127	Reference Identification	1	O/Z	AN	1/80

Semantic Notes

01 PLC01 is the placement sequence number.

02 PLC02 is the placement identification.

PLD - Pallet Shipment Information

To specify pallet information including quantity, exchange, and weight

TRANSACTION SETS USED IN

204 222

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	406	Quantity of Pallets Shipped	1	M	N0	1/3
02	399	Pallet Exchange Code	1	O	ID	1/1
03	188	Weight Unit Code	1	X	ID	1/1
04	81	Weight	1	X	R	1/10

Syntax Notes

03 P0304

PLI - Previous Loan Information

To provide information about an existing loan

TRANSACTION SETS USED IN
135

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1262	Loan Type Code	1	M	ID	1/2
02	782	Monetary Amount	1	M/Z	R	1/18
03	953	Interest Rate	1	M	R	1/6
04	1131	Level of Individual, Test, or Course Code	1	O	ID	2/2
05	1250	Date Time Period Format Qualifier	1	X	ID	2/3
06	1251	Date Time Period	1	X/Z	AN	1/35
07	782	Monetary Amount	1	O/Z	R	1/18
08	380	Quantity	1	O/Z	R	1/15
09	1086	Loan Rate Type Code	1	O	ID	1/1

Syntax Notes

05 P0506

Semantic Notes

02 PLI02 is the previous loan amount.
06 PLI06 is the previous loan period date range.
07 PLI07 is the previous loan amount owed.
08 PLI08 is the loan term in months.

PM - Electronic Funds Transfer Information

To supply information on the electronic funds transfer (EFT) method of payment

TRANSACTION SETS USED IN

814 834

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	507	(DFI) Identification Number	1	M/Z	AN	3/12
02	508	Account Number	1	M/Z	AN	1/35
03	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
04	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
05	569	Account Number Qualifier	1	O/Z	ID	1/3
06	506	(DFI) ID Number Qualifier	1	O/Z	ID	2/2
07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

01 PM01 is the transit routing number of the receiving financial institution.

02 PM02 is the electronic fund transfer recipient's account number.

03 PM03 is the authorization for electronic funds transfer indicator. A "Y" value indicates authorization has been granted to allow electronic funds transfer; an "N" value indicates no authorization has been granted for electronic funds transfer.

04 PM04 is the authorization signature for electronic funds transfer on file indicator. A "Y" value indicates that a signature has been obtained and is on file; an "N" value indicates a signature has not been obtained.

05 PM05 qualifies the account number indicated in PM02.

06 PM06 qualifies the Depository Financial Institution (DFI) Identification Number indicated in PM01.

07 PM07 is the authorization for balance and transaction reporting indicator. A "Y" value indicates authorization has been granted to allow balance and transaction reporting. An "N" value indicates no authorization has been granted to allow balance and transaction reporting.

08 PM08 is the debit authorization indicator. A "Y" value indicates authorization has been granted to allow the sender of the transaction to debit the related account. An "N" value indicates no authorization has been granted to allow the sender of the transaction to debit the related account.

PMP - Performance Measures

To identify various performance measures.

TRANSACTION SETS USED IN

892

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1772	Frequency Pattern Code	1	M	ID	2/2
02	1776	Out of StockDetermination Method Code	1	O/Z	ID	2/2
03	738	Measurement Qualifier	1	O/Z	ID	1/3
04	594	Frequency Code	1	O/Z	ID	1/1

Semantic Notes

02 PMP02 is the Out of Stockmeasurement type, specifying the technique used to measure the out of stockpercentage being reported.

03 PMP03 is the Synchronization Calculation type, indicating whether the item synchronization percentage calculation is based on total items or incremental items.

04 PMP04 is the Periodicity parameter, specifying the time unit of measure.

PO1 - Baseline Item Data

To specify basic and most frequently used line item data

TRANSACTION SETS USED IN

100 194 195 251 255 268 511 561 754 832 836 840 843 850 855 870

06	P0607
08	P0809
10	P1011
12	P1213
14	P1415
16	P1617
18	P1819

20 P2021
22 P2223
24 P2425

Semantic Notes

02 PO102 is quantity ordered.

Comments

00 See the Data Element Dictionary for a complete list of IDs.
01 PO101 is the line item identification.
06 PO106 through PO125 provide for ten different product/service IDs per each item. For example: Case, Color, Drawing No., ISBN No., Model No., or SKU.

PO3 - Additional Item Detail

To specify additional item-related data involving variations in normal price/quantity structure

TRANSACTION SETS USED IN

154 830 836 840 843 850 851 855 860 865 867 870

07	355	Unit or Basis for Measurement Code	1	M	ID	2/2
08	352	Description	1	O	AN	1/80

Syntax Notes

04	L040305

Comments

00	Some examples of price/quantity variations are: price in different units from the PO1 segment, price changes by date, or price changes by quantity (break and level).
07	PO307 defines the unit of measure for PO306.

PO4 - Item Physical Details

To specify the physical qualities, packaging, weights, and dimensions relating to the item

TRANSACTION SETS USED IN

219 220 284 304 527 810 812 830 832 840 843 850 852 855 856 857 860 861 862 863 865 867

08	P0809
10	C1013
11	C1113
12	C1213
13	L13101112
17	C1716
18	C1804

Semantic Notes

15 PO415 is used to indicate the relative layer of this package or range of packages within the layers of packaging. Relative Position 1 (value R1) is the innermost package.

16 PO416 is the package identifier or the beginning package identifier in a range of identifiers.

17 PO417 is the ending package identifier in a range of identifiers.

18 PO418 is the number of packages in this layer.

19 Is the Net Content Statement, i.e., the statement corresponding to the net content descriptions as displayed on the product packaging.

Comments

03 PO403 - The "Unit or Basis for Measure Code" in this segment position is for purposes of defining the unit of measure of the "Size" identified in the PO402. For example: If the carton contains 24 12-Ounce packages, it would be described as follows: Data element 356 = "24"; Data element 357 = "12"; Data element 355 = "OZ".

13 PO413 defines the unit of measure for PO410, PO411, and PO412.

PO5 - Expanded Item Physical Details

To specify additional item physical qualities, packaging, weights, and dimensions relating to the item.

TRANSACTION SETS USED IN
897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	356	Pack	1	O	N0	1/6

28 C2824
28 P282930
31 C3124
31 P313233
35 P3536

Semantic Notes

06 PO506 is the length of the product. When length is identified PO512 Item Depth is typically not used.

15 PO515 is used to indicate the relative layer of this package or range of packages within the layers of packaging. Relative Position 1 (value R1) is the innermost package.

16 PO516 is the package identifier or the beginning package identifier in a range of identifiers.

17 PO517 is the ending package identifier in a range of identifiers.

18 PO518 is the number of packages in this layer.

19 PO519 accommodates Gross Weight and Net Weight in imperial and metric measurements.

22 PO522 is the number of peg holes (maximum 3) in the product packaging. The peg holes are 1, 2, 3.

Comments

01 An example: Carton contains 24 12-Ounce packages: DE356 = "24"; DE 357 = "12"; DE 355 = "OZ".

24 Unit or Basis for Measurement code pertains to PO525 through PO533

25 PO525, PO528, PO531 contain the peg hole number. The unique peg hole numbers are 1, 2, or 3, counting from the upper left corner of the front of the package to the bottom right corner of the front (left to right, top to bottom, as you read).

PO6 - Non-Packaged Item Physical Details

Provides dimensions for the non-containered product.

TRANSACTION SETS USED IN

897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C067	Composite Product Weight Basis	1	O		
02	82	Length	1	X/Z	R	1/8

02	E0208
04	P0405
06	P0607
08	P0809

Semantic Notes

02	PO602 is the length of the product. When PO602 is used, PO608 Item Depth is typically not used.

Comments

02	Within an implementation either item length or item depth is provided.

PO7 - Gift Container Physical Details

Provides dimensions of a gift container.

TRANSACTION SETS USED IN
897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	103	Packaging Code	1	O	AN	3/5

16 P1617
18 P1819
20 P2021
22 P2223
24 P2425
26 P2627

Semantic Notes

01 POC01 is the purchase order line item identification.
02 When C063-02 or C063-03 are used, only POC02 value QC may be used.
03 POC03 is Current Order Quantity.
03 POC03 and POC04 values are of the same unit of measure in POC05.

Comments

03 The Current Order Quantity is the order quantity, as of the transaction date and time, and includes any prior Quantity Increases or Quantity Decreases. The Original Order Quantity and Current Order Quantity will have the same value when there are no quantity adjustments.

POD - Proof of Delivery

To provide proof of delivery

TRANSACTION SETS USED IN

05	R0506
05	E0508
05	R0508
06	L060508
07	P0708

Semantic Notes

01	PPA01 is a geographic reference point of the location.
03	PPA03 specifies the longitude of the location.
04	PPA04 may only be "E" or "W".
05	PPA05 specifies the latitude of the location.
06	PPA06 may only be "N" or "S".
07	PPA07 specifies the longitude of the location expressed in degree decimal format.
08	PPA08 specifies the latitude of the location in degree decimal format.

PPD - Payment Pattern Details

To identify the payment pattern of specific, credit-related items

TRANSACTION SETS USED IN

200 202

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	12	Payment Pattern	1	O	AN	1/84

12	1470	Number	1	O/Z	N0	1/9
13	1470	Number	1	O/Z	N0	1/9

Semantic Notes

03 PPD03 identifies the payment pattern start date.

04 PPD04 identifies the credit repository reporting the payment pattern information.

05 PPD05 identifies the credit file identifier or hit level for a particular credit repository.

08 PPD08 states the number of times payments were 30 days late.

09 PPD09 states the number of times payments were 60 days late.

10 PPD10 states the number of times payments were 90 days late.

11 PPD11 states the number of times payments were 120 days late.

12 PPD12 states the number of times payments were 150 days late.

13 PPD13 states the number of times payments were 180+ days late.

PPI - Policy Premium Payment Information

To specify information pertaining to the policy premium payment

TRANSACTION SETS USED IN

266 811

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	98	Entity Identifier Code	1	M/Z	ID	2/3
02	522	Amount Qualifier Code	1	O/Z	ID	1/3

Semantic Notes

01 PPI01 is the entity responsible for payment of the insurance premium.

02 PPI02 is the amount due in relation to the total annual premium

PPL - Price Support Data

To provide information about pricing support

TRANSACTION SETS USED IN
194 251

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1309	Acquisition Data Code	1	O	ID	2/2

04	352	Description	1	O	AN	1/80
05	1401	Proposal Data Detail Identifier Code	1	O	ID	1/3

Semantic Notes

02 PPL02 is the start date.

03 PPL03 is the end date.

PPR - Contract Party Restriction

To identify a party as included or excluded in a contract or program

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	93	Name	1	O	AN	1/60
03	66	Identification Code Qualifier	1	X	ID	1/2
04	67	Identification Code	1	X	AN	2/80
05	98	Entity Identifier Code	1	O	ID	2/3

Syntax Notes

03 P0304

Semantic Notes

01 PPR01 indicates if a contract party is included or excluded from the program. A 'Y' indicates that the party is included in the program. An 'N' indicates that the party is not included in the program.

PPY - Personal Property Description

To provide details of personal property

TRANSACTION SETS USED IN

201 833

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1188	Type of Personal or Business Asset Code	1	M/Z	ID	2/2
02	782	Monetary Amount	1	M/Z	R	1/18
03	352	Description	1	O/Z	AN	1/80
04	352	Description	1	O/Z	AN	1/80
05	352	Description	1	O/Z	AN	1/80
06	1250	Date Time Period Format Qualifier	1	X/Z	ID	2/3
07	1251	Date Time Period	1	X	AN	1/35
08	127	Reference Identification	1	O	AN	1/80

Syntax Notes

06	P0607

Semantic Notes

01	PPY01 defines the type of personal property described in the segment.
02	PPY02 defines the value of the reference personal property.
03	PPY03 is required if PPY01 equals "10", describes personal property not listed in PPY01.
04	PPY04 is required if PPY01 equals "01", records make of vehicle.
05	PPY05 is required if PPY01 equals "01", records model of vehicle.
06	PPY06 is required if PPY01 equals "01", records model year of vehicle, value "CY" equals date format CCYY.

PR - Product (Commodity)

To identify the commodity to which the application of a rate docket is restricted

TRANSACTION SETS USED IN

106 107 433 453 460 490 494

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	699	Commodity/Geographic Logical Connector Code	1	M	ID	1/1
02	23	Commodity Code Qualifier	1	X	ID	1/2
03	22	Commodity Code	1	X/Z	AN	1/30
04	22	Commodity Code	1	O	AN	1/30
05	259	Change Type Code	1	O	ID	1/1
06	140	Standard Carrier Alpha Code	1	X/Z	ID	2/4
07	697	Docket Control Number	1	X	AN	1/7
08	690	Docket Identification	1	X	AN	1/11
09	260	Group Title	1	O	AN	2/30

Syntax Notes

02	E0206
02	P0203
02	R0206
04	C040203
06	P060708
09	C09060708

Semantic Notes

03	If PR03 is present and PR04 is omitted, PR03 indicates actual commodity code. If PR03 and PR04 are present, PR03 indicates the low value of commodity range and PR04 indicates the high value of commodity range.
06	PR06 is the Standard Carrier Alpha Code (SCAC) of the group docket owner.

PR1 - Price Request Parameter List 1

To request price information based on certain parameters such as commodity, origin, and destination

TRANSACTION SETS USED IN
466

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	23	Commodity Code Qualifier	1	M	ID	1/2
02	22	Commodity Code	1	M	AN	1/30
03	22	Commodity Code	1	O/Z	AN	1/30
04	309	Location Qualifier	1	X	ID	1/2

12	156	State or Province Code	1	X	ID	2/2
13	140	Standard Carrier Alpha Code	1	O	ID	2/4

Syntax Notes

04	P0405
05	R0507
06	C060405
09	P0910
10	R1012
11	C110910

Semantic Notes

03	PR103 is the commodity range.
06	PR106 is a geography range.
11	PR111 is a geography range.

PR2 - Price Request Parameter List 2

To request price information based on certain parameters such as date, route, equipment type, and customer

TRANSACTION SETS USED IN
466

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	O/Z	DT	8/8
02	373	Date	1	O/Z	DT	8/8
03	1	Route Code	1	O	AN	1/13
04	301	Car Type Code	1	O	ID	1/4
05	66	Identification Code Qualifier	1	X	ID	1/2
06	67	Identification Code	1	X	AN	2/80
07	127	Reference Identification	1	O/Z	AN	1/80
08	692	Conveyance Code	1	O	ID	1/1
09	127	Reference Identification	1	O/Z	AN	1/80

Syntax Notes

05 P0506

Semantic Notes

01 PR201 is the beginning date.
02 PR202 is the ending date.
07 PR207 is the rate type request number.
09 PR209 is the group definition request number.

PRC - Payment Rate Change

To identify interest rate or payment changes for adjustable rate mortgages

TRANSACTION SETS USED IN

203

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	374	Date/Time Qualifier	1	M	ID	3/3
02	1250	Date Time Period Format Qualifier	1	M	ID	2/3
03	1251	Date Time Period	1	M	AN	1/35
04	953	Interest Rate	1	X/Z	R	1/6
05	953	Interest Rate	1	X/Z	R	1/6
06	953	Interest Rate	1	X/Z	R	1/6
07	522	Amount Qualifier Code	1	X	ID	1/3
08	782	Monetary Amount	1	X	R	1/18
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
10	673	Quantity Qualifier	1	X	ID	2/2
11	380	Quantity	1	X/Z	R	1/15
12	C001	Composite Unit of Measure	1	X		

Syntax Notes

04	R04050608
07	P0708
10	P101112

Semantic Notes

04	PRC04 identifies the index value.
05	PRC05 identifies the new pass through rate.
06	PRC06 identifies the new note rate.
09	PRC09 confirms that the loan has been converted to fixed rate. A "Y" indicates the loan has converted to fixed rate; an "N" indicates the loan has not converted to fixed rate.
11	PRC11 identifies the extended term.

PRD - Mortgage Loan Product Description

To describe terms of a mortgage product

TRANSACTION SETS USED IN
198 265 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1085	Loan Payment Type Code	1	M/Z	ID	2/2
02	380	Quantity	1	O/Z	R	1/15
03	122	Rate/Value Qualifier	1	O/Z	ID	2/2
04	1086	Loan Rate Type Code	1	O/Z	ID	1/1
05	954	Percentage as Decimal	1	O/Z	R	1/10
06	380	Quantity	1	O/Z	R	1/15
07	380	Quantity	1	O/Z	R	1/15
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
10	380	Quantity	1	O/Z	R	1/15
11	782	Monetary Amount	1	O/Z	R	1/18

Semantic Notes

01 PRD01 defines the type of loan payment.

02 PRD02 is the initial (original) term in months.

03 PRD03 is the period type for loan payment frequency.

04 PRD04 defines whether the loan rate is fixed or adjustable.

05 PRD05 is the initial (original) interest accrual rate.

06 PRD06 is the amortization term in months.

07 PRD07 is the maximum loan term in months.

08 PRD08 defines whether there is a prepayment penalty. A "Y" indicates there is a penalty; an "N" indicates there is not a penalty.

09 PRD09 defines whether a loan of this product may be assumed. A "Y" indicates a loan is assumable; an "N" indicates a loan is not assumable.

10 PRD10 is number of months until balloon payment.

11 PRD11 is the amount of the balloon payment.

PRF - Purchase Order Reference

To provide reference to a specific purchase order

TRANSACTION SETS USED IN

180 216 250 325 856 857 861 867 869 870

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	324	Purchase Order Number	1	M	AN	1/22
02	328	Release Number	1	O	AN	1/30
03	327	Change Order Sequence Number	1	O	AN	1/8
04	373	Date	1	O/Z	DT	8/8
05	350	Assigned Identification	1	O	AN	1/20
06	367	Contract Number	1	O	AN	1/30
07	92	Purchase Order Type Code	1	O	ID	2/2

Semantic Notes

04 PRF04 is the date assigned by the purchaser to purchase order.

PRI - External Reference Identifier

To identify an external reference

TRANSACTION SETS USED IN
414 485 492

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	436	Primary Publication Authority Code	1	M	ID	2/2
02	168	Tariff Agency Code	1	M	ID	1/4
03	171	Tariff Number	1	M	AN	1/7
04	493	Tariff Number Suffix	1	O	AN	1/2
05	173	Tariff Supplement Identifier	1	O	AN	1/4
06	172	Tariff Section Number	1	O	AN	1/2
07	169	Tariff Item Number	1	O	AN	1/16
08	128	Reference Identification Qualifier	1	X	ID	2/3
09	127	Reference Identification	1	X	AN	1/80
10	140	Standard Carrier Alpha Code	1	X	ID	2/4
11	697	Docket Control Number	1	X	AN	1/7
12	690	Docket Identification	1	X	AN	1/11
13	691	Revision Number	1	O	N0	1/4
14	260	Group Title	1	O	AN	2/30

Syntax Notes

08	P0809
10	P101112

PRJ - Multifamily Housing Project

To describe attributes of a multifamily housing project

TRANSACTION SETS USED IN

872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	93	Name	1	M/Z	AN	1/60
02	128	Reference Identification Qualifier	1	X/Z	ID	2/3
03	127	Reference Identification	1	X/Z	AN	1/80
04	373	Date	1	O/Z	DT	8/8

Syntax Notes

02 P0203

Semantic Notes

01 PR01 is the housing project name.
02 PR02 is the project ID qualifier.
03 PR03 is the housing project identifier value.
04 PR04 is the housing project approval date.

PRM - Basic Trace Parameters

To provide basic trace parameters

TRANSACTION SETS USED IN
455

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	301	Car Type Code	1	O	ID	1/4
02	322	Load/Empty Status Code	1	O	ID	1/1
03	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
04	154	Standard Point Location Code	1	O/Z	ID	6/9
05	154	Standard Point Location Code	1	O/Z	ID	6/9
06	22	Commodity Code	1	O/Z	AN	1/30
07	140	Standard Carrier Alpha Code	1	X/Z	ID	2/4
08	140	Standard Carrier Alpha Code	1	X/Z	ID	2/4
09	154	Standard Point Location Code	1	O/Z	ID	6/9
10	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
11	1494	Transportation Condition Code	1	O	ID	1/1
12	1490	Association of American Railroads Car Grade Code	1	O	ID	1/1
13	177	Intermodal Service Code	1	O	ID	1/2

Syntax Notes

09 C090708

Semantic Notes

03 PRM03 is the waybilling carrier.
04 PRM04 is the origin.
05 PRM05 is the destination.
06 PRM06 contains a Standard Transportation Commodity Code.
07 PRM07 will contain a Standard Carrier Alpha Code which must appear in the Waybill route.
08 PRM08 will contain a Standard Carrier Alpha Code which must appear in the Waybill route.
09 PRM09 is the junction between the carriers in PRM07 and PRM08.
10 PRM10 is the destination carrier.

PRR - Problem Report

To describe a product condition causing an engineering change or the condition when presented for service, for a recall notice, or for a service bulletin

TRANSACTION SETS USED IN
142 143 841

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	O	AN	1/20
02	559	Agency Qualifier Code	1	X/Z	ID	2/2
03	822	Source Subqualifier	1	O/Z	AN	1/15
04	1229	Complaint Code	1	X/Z	AN	3/6
05	352	Description	1	X	AN	1/80
06	559	Agency Qualifier Code	1	X/Z	ID	2/2
07	822	Source Subqualifier	1	O/Z	AN	1/15
08	1233	Service Classification Code	1	X/Z	AN	1/4
09	559	Agency Qualifier Code	1	X	ID	2/2
10	822	Source Subqualifier	1	O	AN	1/15
11	1234	Severity Condition Code	1	X/Z	AN	1/2

Syntax Notes

02	C0204
03	C0302
04	R0405
06	C0608
07	C0706
09	C0911
10	C1009

Semantic Notes

02	PRR02 identifies the source of the following complaint code contained in PRR04.
03	PRR03 specifies a particular table of codes maintained by the agency identified in PRR02 for specifying the complaint code contained in PRR04.
04	PRR04 is the complaint code as reported by the customer.
06	PRR06 identifies the source of the following service classification code or severity condition code contained in PRR08 and PRR09, respectively.
07	PRR07 specifies a particular table of codes maintained by the agency identified in PRR06 for specifying the service classification codes contained in PRR08.
08	PRR08 identifies the gross reason for the service action.
11	PRR11 identifies the urgency or severity of the condition which results in a service action.

PRS - Part Release Status

To indicate the status of the part being ordered or forecast with respect to this material release or planning document

TRANSACTION SETS USED IN

830 841 842 862

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	682	Part Release Status Code	1	M	ID	1/2
02	352	Description	1	O	AN	1/80

PRT - Part Disposition

To specify the disposition of the removed part, subassembly or assembly

TRANSACTION SETS USED IN

142 143 841

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1225	Disposition Code	1	M/Z	AN	3/3
02	559	Agency Qualifier Code	1	X/Z	ID	2/2
03	822	Source Subqualifier	1	O/Z	AN	1/15
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

03 C0302

Semantic Notes

01 PRT01 specifies what is to be done or what was done with the part that was removed.

02 PRT02 identifies the source of the disposition code contained in PRT01.

03 PRT03 specifies a particular table of codes maintained by the agency identified in PRT02 for specifying the disposition code contained in PRT01.

04 PRT04 indicates whether or not the claimant has specified that the part in question is to be returned to the claimant if the claim is disallowed. A "Y" indicates that the claimant has made such a request; an "N" indicates that the claimant has not made such a request.

PRV - Provider Information

To specify the identifying characteristics of a provider

TRANSACTION SETS USED IN

270 271 275 278 834 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1221	Provider Code	1	M	ID	1/3
02	128	Reference Identification Qualifier	1	X	ID	2/3
03	127	Reference Identification	1	X	AN	1/80
04	156	State or Province Code	1	O	ID	2/2
05	C035	Provider Specialty Information	1	O		
06	1223	Provider Organization Code	1	O	ID	3/3

Syntax Notes

02	P0203

PS - Protective Service Instructions

To specify mechanical protective service and ventilation instructions

TRANSACTION SETS USED IN
404 410 417 418 421 426 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	746	Protective Service Rule Code	1	M	ID	3/9
02	241	Protective Service Code	1	M	ID	1/4
03	355	Unit or Basis for Measurement Code	1	X/Z	ID	2/2
04	408	Temperature	1	X/Z	R	1/4
05	140	Standard Carrier Alpha Code	1	O	ID	2/4
06	573	Freight Station Accounting Code	1	O	ID	1/5
07	19	City Name	1	O	AN	2/30
08	156	State or Province Code	1	O	ID	2/2
09	81	Weight	1	O	R	1/10
10	745	Pre-Cooled (Rule 710) Code	1	O	ID	1/1
11	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
12	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
13	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
14	408	Temperature	1	X/Z	R	1/4

Syntax Notes

03 L030414
04 C0403
14 C1403

Semantic Notes

03 PS03 qualifies the temperature in PS04 and PS14.
04 PS04 is the optimum allowable temperature condition for shipment.
11 PS11 identifies the location of the heater. A "Y" indicates the heater is ceiling-mounted; an "N" indicates the heater is in the body.
12 PS12 identifies whether or not the commodity is a food product. A "Y" indicates the commodity is a food product; an "N" indicates it is a non-food product.
13 PS13 indicates the amount of doorway space for the full width of the car. A "Y" indicates the doorway space is not less than 30 inches for the full width of the car; an "N" indicates it is less than 30 inches.
14 PS14 is the set temperature at service origin.

Comments

05 PS05 through PS08 are used to specify the station to which the temperature applies. PS05 and PS06 are preferred over PS07 and PS08.
09 PS09 is the weight of body ice in hundreds.

PS1 - Purchase Service

To specify the information about services that are purchased

TRANSACTION SETS USED IN

837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	782	Monetary Amount	1	M/Z	R	1/18
03	156	State or Province Code	1	O/Z	ID	2/2

Semantic Notes

01 PS101 is provider identification number.

02 PS102 is cost of the purchased service.

03 PS103 is the state where the service is purchased.

PSA - Partner Share Accounting

To communicate the percentage share of the project that a particular owner has to pay

TRANSACTION SETS USED IN
819 867

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	66	Identification Code Qualifier	1	M	ID	1/2
02	67	Identification Code	1	M	AN	2/80
03	826	Owners Share	1	M	R	1/8
04	782	Monetary Amount	1	X/Z	R	1/18
05	522	Amount Qualifier Code	1	O	ID	1/3

Syntax Notes

05 C0504

Semantic Notes

04 PSA04 is the amount of the total partner's share of gross charges for the property, if PSA05 is not used.

Comments

03 PSA03 is expressed as a decimal amount.

PSC - Product Service Contract

To describe the conditions of a product service contract as in a warranty registration

TRANSACTION SETS USED IN
140 142

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	846	Contract Status Code	1	M	ID	2/2
02	1230	Type of Product Service Code	1	M/Z	ID	2/4

22	352	Description	1	O/Z	AN	1/80
23	212	Unit Price	1	O/Z	R	1/17
24	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
25	1079	Contact Method Code	1	O/Z	ID	1/1

Syntax Notes

07	P0708
12	L12131415
13	C1312
14	C1412
15	C1512
16	L160810
16	C1613
18	C1820
19	C1918

Semantic Notes

02 When used with a claim for service, PSC02 could specify the contractual basis for the claim. If a single product is going to have several contracts in place at the same time, such as five years for parts and one year for labor or, in a different case, five years or 70,000 miles, the PSC segment will have to be invoked the required number of times. The first and required use of the type of contract code identifies its most general category while the second, optional, use is more specific.

04 PSC04 can contain a type of contract that is for an individual manufacturer.

05 PSC05 specifies the party responsible for this portion of the service contract.

06 PSC06 is the number on one individual contract.

07 PSC07 is the unit of measure for PSC08. It normally would be a unit of time, such as months or years, or a service unit, such as miles or operational hours.

08 PSC08 is the length, duration, or period of the contract. It normally would be a unit of time, such as months or years, or a service unit, such as miles or operational hours.

09 PSC09 indicates the event that starts the warranty or service contract.

10 PSC10 is the "Through Date". The through date and the range maximum both refer to the condition at the end of the contract period.

11 PSC11 is the "Beginning Date". The beginning date and the range minimum both refer to the condition at the start of the contract period.

12 PSC12 refers to PSC13, PSC14 and PSC15.

13 PSC13 is the value in terms of the previous unit of measure that specifies the end of the service contract.

14 PSC14 is the value in terms of the previous unit of measure that specifies the value at the beginning of the service contract.

15 PSC15 is the current measurement value.

16 PSC16 describes the relationship between the service life in PSC10 or PSC08 and PSC11 and the measurement in PSC13.

17 PSC17 is used to describe the current percentage of warranted life for use when the claim amount paid is based on this.

18 PSC18 identifies the source of the following operation environment codes.

19 PSC19 specifies a particular table of codes maintained by the organization specified in PSC18 for specifying PSC20.

20 PSC20 can be used to indicate the environment in which this product is to be used.

21 PSC21 can be used to describe where the contract service is to be performed.

22 PSC22 can be used to describe any non-standard conditions regarding this contract.

23 PSC23 is the price of this individual contract.

24 PSC24 is used to indicate whether or not a supplemental inspection of the product is required before a new service contract can be accepted on a product that has been in service. Code "Y" indicates that the inspection is required. Code "N" indicates that the inspection is not required.

25 PSC25 can be used to specify how the service contract was received.

PSD - Physical Sample Description

To define the physical sample parameters associated with a test resulting in discrete measurements

TRANSACTION SETS USED IN

841 842 863

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	939	Sample Process Status Code	1	O	ID	2/2
02	940	Sample Selection Method Code	1	O	ID	2/2
03	942	Sample Frequency Value per Unit of Measurement Code	1	X	N0	1/9
04	C001	Composite Unit of Measure	1	X		
05	943	Sample Description Code	1	O	ID	2/2
06	944	Sample Direction Code	1	O	ID	2/2
07	945	Position Code	1	O	ID	2/2
08	352	Description	1	O	AN	1/80
09	1167	Sample Selection Modulus	1	X	R	1/6

Syntax Notes

03	P0304
03	E0309

Comments

08	PSD08 can provide a more complete description of the physical sampling location.

PSG - Program Spend

To identify the spend type required by a program

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1763	Spend Type Code	1	X	ID	2/2
02	352	Description	1	X/Z	AN	1/80
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

01 R0102

Semantic Notes

02 PSG02 describes the program spend type.

03 PSG03 indicates if residual earnings will roll over to subsequent years. A 'Y' indicates that residual earnings will roll over to subsequent years. An 'N' indicates that residual earnings will not roll over to subsequent years.

PT - Patron

To identify a party involved in a rate docket

TRANSACTION SETS USED IN
460 490 494

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	495	Condition Segment Logical Connector	1	M	AN	1/3
02	98	Entity Identifier Code	1	X	ID	2/3
03	93	Name	1	O	AN	1/60
04	66	Identification Code Qualifier	1	X	ID	1/2
05	67	Identification Code	1	X	AN	2/80

09	690	Docket Identification	1	X	AN	1/11
10	260	Group Title	1	O	AN	2/30
11	706	Entity Relationship Code	1	O	ID	2/2

Syntax Notes

04	P0405
05	C0502
07	P070809
07	E0702
10	C10070809
11	C1102

Semantic Notes

07	PT07 is the Standard Carrier Alpha Code (SCAC) of the group docket owner.

Comments

00	Patron identity is represented by a particular carrier's own patron coding system.

PTD - Product Transfer and Resale Detail

To indicate the start of detail information relating to the transfer/resale of a product and provide identifying data

TRANSACTION SETS USED IN

867

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	521	Product Transfer Type Code	1	M	ID	2/2
02	648	Price Multiplier Qualifier	1	X	ID	3/3
03	649	Multiplier	1	X	R	1/10
04	128	Reference Identification Qualifier	1	X	ID	2/3
05	127	Reference Identification	1	X	AN	1/80
06	486	Product Transfer Movement Type Code	1	O	ID	2/2

Syntax Notes

02	P0203
04	P0405

PTF - Property Transaction Financials

To provide the financial information related to a real estate transaction such as list price, sales price, rent, commissions, fees, sales taxes and closing costs

TRANSACTION SETS USED IN
262

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	522	Amount Qualifier Code	1	M	ID	1/3
02	782	Monetary Amount	1	M	R	1/18
03	594	Frequency Code	1	O	ID	1/1
04	C001	Composite Unit of Measure	1	O		
05	98	Entity Identifier Code	1	O	ID	2/3
06	963	Tax Type Code	1	O	ID	2/2
07	441	Tax Exempt Code	1	O	ID	1/1

Comments

03	PTF03 defines the time period or frequency of the amount in PTF02.
04	PTF04 further qualifies PTF02.
06	If PTF01 = TAX the PTF06 is the detailed tax type.
07	If PTF02 is a tax amount, then PTF07 defines an existing tax exemption, if applicable.

PTS - Property Tax Status

To provide data required for proper notification or determination of applicable taxes applying to the transaction

TRANSACTION SETS USED IN

245

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	546	Status Code	1	M/Z	ID	2/2
02	127	Reference Identification	1	M/Z	AN	1/80
03	1719	Tax Service Payment Code	1	O	ID	1/1
04	1250	Date Time Period Format Qualifier	1	X	ID	2/3
05	1251	Date Time Period	1	X/Z	AN	1/35
06	546	Status Code	1	O/Z	ID	2/2
07	955	Tax Jurisdiction Code Qualifier	1	X/Z	ID	2/2
08	956	Tax Jurisdiction Code	1	X	AN	1/10
09	352	Description	1	X/Z	AN	1/80
10	1721	Type of Taxing Authority Code	1	O	ID	2/2
11	546	Status Code	1	O/Z	ID	2/2

Syntax Notes

04 P0405
07 P0708
08 R0809

Semantic Notes

01 PTS01 contains the property's tax status.
02 PTS02 contains the current year tax bill number.
05 PTS05 is the current tax year.
06 PTS06 is the current Tax Year Payment Status.
07 If PTS07 is not equal to "MB", then PTS09 is required.
09 PTS09 contains the name of the tax agency.
11 PTS11 contains the status of the taxing authority.

PUN - Beginning Segment for Motor Carrier Pickup Notification

To transmit identifying numbers and other basic data relating to the Motor Carrier Pickup Notification transaction set

TRANSACTION SETS USED IN

216

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	373	Date	1	M/Z	DT	8/8
03	337	Time	1	O/Z	TM	4/8
04	127	Reference Identification	1	O/Z	AN	1/80
05	337	Time	1	O/Z	TM	4/8
06	353	Transaction Set Purpose Code	1	M/Z	ID	2/2

Semantic Notes

01 PUN01 is the Standard Carrier Alpha Code (SCAC) of the carrier that is the intended recipient of this transaction set.

02 PUN02 is the date the freight will be available for pickup by the motor carrier identified in PUN01.

03 PUN03 is the time that the freight will be available on the date specified in PUN02.

04 PUN04 is the pickup authorization or reference number. If provided, it is the reference number that the carrier is required to provide in order to pickup the shipment.

05 PUN05 is the time that the pickup location will close on the date specified in the PUN02.

06 If PUN06 is to cancel or correct a pickup notification, the PUN04 is required to contain the original pickup number.

PWK - Paperwork

To identify the type or transmission or both of paperwork or supporting information

TRANSACTION SETS USED IN

105 113 143 147 161 179 186 194 195 198 202 206 252 255 261 262 265 267 272 277 278 280 284 304 310 500 511 536 810 830 832 833 836 837 840 841 842 843 850 855 856 860 865 867 870

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	755	Report Type Code	1	M	ID	2/2
02	756	Report Transmission Code	1	O	ID	1/2
03	757	Report Copies Needed	1	O	N0	1/2
04	98	Entity Identifier Code	1	O	ID	2/3
05	66	Identification Code Qualifier	1	X	ID	1/2
06	67	Identification Code	1	X	AN	2/80
07	933	Free-form Message Text	1	O	AN	1/264
08	C002	Actions Indicated	1	O		
09	1525	Request Category Code	1	O	ID	1/2
10	1270	Code List Qualifier Code	1	X	ID	1/3
11	1271	Industry Code	1	X	AN	1/30

Syntax Notes

05	P0506
10	P1011

Comments

05	PWK05 and PWK06 may be used to identify the addressee by a code number.
07	PWK07 may be used to indicate special information to be shown on the specified report.
08	PWK08 may be used to indicate action pertaining to a report.

PYD - Payroll Deduction

To specify payroll deduction information

TRANSACTION SETS USED IN

820

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	782	Monetary Amount	1	M	R	1/18
02	594	Frequency Code	1	O	ID	1/1
03	1685	Tax Treatment Code	1	O	ID	1/1
04	1688	Deduction Type Code	1	O	ID	1/4
05	352	Description	1	O/Z	AN	1/80

Semantic Notes

05 PYD05 is used to clarify the deduction type to which the amount specified in PYD01 applies.

PYM - Payment Manner and Percentage

To specify manner in which bills are paid either to a specific vendor or overall to all vendors

TRANSACTION SETS USED IN
155

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	263	Rating Code	1	X	ID	2/2
02	344	Unit of Time Period or Interval Code	1	X	ID	2/2
03	616	Number of Periods	1	X/Z	N0	1/3
04	616	Number of Periods	1	O/Z	N0	1/3
05	615	Time Period Qualifier	1	O	ID	1/2
06	650	Rating Remarks Code	1	X	ID	2/2
07	954	Percentage as Decimal	1	O/Z	R	1/10

Syntax Notes

01	R0106
02	P0203
03	C0301
04	C0403
05	C0503

Semantic Notes

03	PYM03 is the low end of the period if a range exists.
04	PYM04 is the high end of the period if a range exists.
07	PYM07 specifies the percentage of the payment manner referenced in PYM01 or PYM06 relative to the total payment.

PYT - Historical Payment Terms

To specify payment terms provided by a vendor to an entity over a historical period

TRANSACTION SETS USED IN
155

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	386	Terms Net Days	1	X	N0	1/3
02	336	Terms Type Code	1	X/Z	ID	2/2
03	765	Day of Month	1	O/Z	N0	1/2
04	338	Terms Discount Percent	1	X/Z	R	1/6
05	338	Terms Discount Percent	1	O/Z	R	1/6
06	336	Terms Type Code	1	O/Z	ID	2/2
07	351	Terms Discount Days Due	1	X/Z	N0	1/3
08	351	Terms Discount Days Due	1	O/Z	N0	1/3

Syntax Notes

01	R0102
03	C0302
05	C0504
06	C0604
08	C0807

Semantic Notes

02	PYT02 further expands terms net days or provides general term comment.
03	PYT03 is day of the month payment is due in the month following the invoice.
04	PYT04 is the low end of terms discount if a range exists.
05	PYT05 is the high end of terms discount if a range exists.
06	PYT06 provides the terms required to obtain discount.
07	PYT07 is the low end of discount days offered if a range exists.
08	PYT08 is the high end of discount days offered if a range exists.

Comments

03	PYT03 is only used when PYT02 is "33".

Q2 - Status Details (Ocean)

To transmit identifying information relative to identification of vessel, transportation dates, lading quantity, weight, and cube

TRANSACTION SETS USED IN
109 315

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	597	Vessel Code	1	O	ID	1/8
02	26	Country Code	1	O/Z	ID	2/3
03	373	Date	1	O/Z	DT	8/8
04	373	Date	1	O/Z	DT	8/8
05	373	Date	1	O/Z	DT	8/8
06	80	Lading Quantity	1	O	N0	1/7
07	81	Weight	1	X	R	1/10
08	187	Weight Qualifier	1	X	ID	1/2
09	55	Flight/Voyage Number	1	O	AN	2/30
10	128	Reference Identification Qualifier	1	O	ID	2/3
11	127	Reference Identification	1	X	AN	1/80
12	897	Vessel Code Qualifier	1	O	ID	1/1
13	182	Vessel Name	1	O	AN	2/50
14	183	Volume	1	X	R	1/8
15	184	Volume Unit Qualifier	1	X	ID	1/1
16	188	Weight Unit Code	1	X	ID	1/1

Syntax Notes

07 P070816
10 C1011
14 P1415

Semantic Notes

02 Q202 is the code identifying the country in which the ship (vessel) is registered.
03 Q203 is the required pier date.
04 Q204 is the date of departure of the vessel.
05 Q205 is the date the shipment was unloaded from the vessel.

Q3 - Arrival Details

To specify estimated arrival date and shipment method of payment

TRANSACTION SETS USED IN

312

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	M/Z	DT	8/8
02	146	Shipment Method of Payment Code	1	M	ID	2/2

Semantic Notes

01 Q301 is the estimated arrival date at the port of discharge.

Q5 - Status Details

To specify the status of the shipment in terms of dates, time, reference numbers, and location

TRANSACTION SETS USED IN
228 322

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	157	Shipment Status Code	1	O	ID	1/2
02	373	Date	1	O/Z	DT	8/8
03	337	Time	1	X/Z	TM	4/8
04	623	Time Code	1	X	ID	2/2
05	641	Status Reason Code	1	O	ID	3/3
06	19	City Name	1	X	AN	2/30
07	156	State or Province Code	1	O	ID	2/2
08	26	Country Code	1	O	ID	2/3
09	206	Equipment Initial	1	O	AN	1/4
10	207	Equipment Number	1	O	AN	1/15
11	128	Reference Identification Qualifier	1	X	ID	2/3
12	127	Reference Identification	1	X	AN	1/80
13	1280	Direction Identifier Code	1	O/Z	ID	1/1
14	128	Reference Identification Qualifier	1	X	ID	2/3
15	127	Reference Identification	1	X	AN	1/80
16	1280	Direction Identifier Code	1	O/Z	ID	1/1
17	954	Percentage as Decimal	1	O/Z	R	1/10
18	108	Pickup or Delivery Code	1	O	ID	1/2

Syntax Notes

03	P0304
07	C0706
11	P1112
13	C1312
14	P1415
16	C1615

Semantic Notes

02	Q502 is the date of the status reported in Q501.
03	Q503 is the time of the status reported in Q501.
13	Q513 is the direction (north or south) of the equator for the latitude given in Q512.
13	If Q513 is not used, north is assumed.
16	If Q516 is not used, west is assumed.
16	Q516 is the direction (east or west) of the Greenwich Meridian for the longitude given in Q515.
17	Q517 is the percent of the capacity of the trailer utilized as identified in Q510.

Q7 - Lading Exception Status

To specify the status of the shipment in terms of lading exception information

TRANSACTION SETS USED IN

212 214 240 920

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	33	Lading Exception Code	1	M	ID	1/1
02	211	Packaging Form Code	1	O	ID	3/3
03	80	Lading Quantity	1	X	N0	1/7

Syntax Notes

02	C0203

Q8 - Detail Delivery Exception Information

To transmit detailed lading data, damage, and disposition information

TRANSACTION SETS USED IN

854

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	33	Lading Exception Code	1	M/Z	ID	1/1
02	211	Packaging Form Code	1	X	ID	3/3
03	80	Lading Quantity	1	X	N0	1/7
04	235	Product/Service ID Qualifier	1	X	ID	2/2
05	234	Product/Service ID	1	X	AN	1/80
06	79	Lading Description	1	O	AN	1/50
07	853	Damage Reason Code	1	O	ID	2/2
08	306	Action Code	1	O	ID	1/2
09	127	Reference Identification	1	O/Z	AN	1/80
10	352	Description	1	O	AN	1/80

Syntax Notes

02 P0203

04 P0405

Semantic Notes

01 If Q801 equals code "D", then Q807 is required.

09 Q809 is the authorization number assigned by the shipper or other responsible party when delivery exception notification is made and disposition is authorized.

QTY - Quantity Information

To specify quantity information

TRANSACTION SETS USED IN

100 103 105 111 112 113 124 131 132 133 135 139 140 141 142 143 148 150 151 152 155 159 160 175

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	673	Quantity Qualifier	1	M	ID	2/2
02	380	Quantity	1	X	R	1/15
03	C001	Composite Unit of Measure	1	O		
04	61	Free-form Information	1	X/Z	AN	1/30

Syntax Notes

02	R0204
02	E0204

Semantic Notes

04	QTY04 is used when the quantity is non-numeric.

R1 - Route Information (Air)

To specify airline and airport routing sequences

TRANSACTION SETS USED IN

110 272 362 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	O	ID	2/4

11	5	Airport Code	1	X	ID	3/5
12	4	Air Carrier Code	1	X	ID	3/3
13	5	Airport Code	1	X	ID	3/5

Syntax Notes

06	P0607
08	P0809
10	P1011
12	P1213

R11 - Beginning Segment for Trailer or Container Repair Billing

To indicate the start of the Trailer or Container Repair Billing Transaction Set and to identify the billing parties and associated information

TRANSACTION SETS USED IN
412

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	640	Transaction Type Code	1	M	ID	2/2
02	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
03	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
04	76	Invoice Number	1	M	AN	1/22
05	1108	Month of the Year Code	1	M/Z	ID	2/2
06	1095	Year	1	O/Z	N0	4/4
07	336	Terms Type Code	1	O	ID	2/2
08	193	Net Amount Due	1	O	N2	1/15

Semantic Notes

02 R1102 is the Standard Carrier Alpha Code of the billing party.
03 R1103 is the Standard Carrier Alpha Code of the receiving party.
05 R1105 is the billing month.
06 R1106 is the billing year.

R12 - Work Order Information

To provide summary information for workorder details for a specific piece of equipment

TRANSACTION SETS USED IN

412

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	354	Number of Line Items	1	M/Z	N0	1/6
02	206	Equipment Initial	1	M/Z	AN	1/4
03	207	Equipment Number	1	M/Z	AN	1/15
04	127	Reference Identification	1	M/Z	AN	1/80
05	373	Date	1	M/Z	DT	8/8
06	310	Location Identifier	1	O/Z	AN	1/30
07	322	Load/Empty Status Code	1	O	ID	1/1
08	206	Equipment Initial	1	X/Z	AN	1/4
09	207	Equipment Number	1	X/Z	AN	1/15
10	761	Equipment Number CheckDigit	1	O/Z	N0	1/1
11	761	Equipment Number CheckDigit	1	O/Z	N0	1/1
12	40	Equipment Description Code	1	M/Z	ID	2/2

Syntax Notes

08	P0809
11	C1109

Semantic Notes

01	R1201 is the total number of Line Item Repairs (R13's) included in the workorder.
02	R1202 is the equipment initial of the equipment serviced on the workorder.
03	R1203 is the equipment number of the equipment serviced on the workorder.
04	R1204 is the workorder number.
05	R1205 is the repair date.
06	R1206 is the location at which the workorder was performed. Standard Point Location Code is preferred.
08	R1208 is the equipment initial of the associated equipment.
09	R1209 is the equipment number of the associated equipment.
10	R1210 is the checkdigit for the equipment number in R1203.
11	R1211 is the checkdigit for the equipment number in R1209.
12	R1212 is the equipment type for the equipment identified in R1202 and R1203.

R13 - Line Item Repair

To provide line item details of the equipment repair

TRANSACTION SETS USED IN

412

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	M	AN	1/20
02	1271	Industry Code	1	M/Z	AN	1/30
03	1271	Industry Code	1	M/Z	AN	1/30
04	1271	Industry Code	1	M/Z	AN	1/30
05	1271	Industry Code	1	M/Z	AN	1/30
06	1271	Industry Code	1	M/Z	AN	1/30
07	355	Unit or Basis for Measurement Code	1	X	ID	2/2
08	380	Quantity	1	X/Z	R	1/15
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
10	352	Description	1	O/Z	AN	1/80
11	352	Description	1	O	AN	1/80
12	380	Quantity	1	O/Z	R	1/15
13	352	Description	1	O/Z	AN	1/80
14	352	Description	1	O	AN	1/80

Syntax Notes

07 P0708

Semantic Notes

02 R1302 is the trailer repair job code (See Code Source 711).

03 R1303 is the trailer repair condition code (See Code Source 711).

04 R1304 is the trailer repair why made code (See Code Source 711).

05 R1305 is the trailer repair responsibility code (See Code Source 711).

06 R1306 is the repair location on trailer (See Code Source 711).

08 R1308 is the quantity of repair items.

09 R1309 is used to indicate if the product is railroad material. If "Y", then it is railroad material. If "N", then it is not railroad material.

10 R1310 and R1311 further describe material used for line item repair.

12 R1312 is the total labor hours.

13 R1313 and R1314 further describe the reason for line item repair.

R2 - Route Information

To specify carrier and routing sequences and details

TRANSACTION SETS USED IN

304 310 312 404 410 417 421 422 423 426 453 456 470 858 859 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	133	Routing Sequence Code	1	M	ID	1/2
03	19	City Name	1	O/Z	AN	2/30
04	154	Standard Point Location Code	1	O	ID	6/9

12	56	Type of Service Code	1	O	ID	2/2
13	742	Route Description	1	O	AN	1/35

Syntax Notes

08 C0807

Semantic Notes

03 R203 is the station or city name at which carriers interchange shipments.

10 R210 is the billing date.

R2A - Route Information with Preference

To specify the responsibilities and carrier preference

TRANSACTION SETS USED IN

300 301 304 310

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	133	Routing Sequence Code	1	M	ID	1/2
02	1431	Preference Code	1	M	ID	1/1
03	91	Transportation Method/Type Code	1	O	ID	1/2
04	140	Standard Carrier Alpha Code	1	O	ID	2/4
05	309	Location Qualifier	1	O/Z	ID	1/2
06	310	Location Identifier	1	X	AN	1/30
07	56	Type of Service Code	1	O	ID	2/2
08	1	Route Code	1	O	AN	1/13
09	742	Route Description	1	O	AN	1/35
10	98	Entity Identifier Code	1	O/Z	ID	2/3

Syntax Notes

05	C0506

Semantic Notes

05	R2A05 and R2A06 identify the origin point.
10	R2A10 identifies the party to receive the invoice for the route segment.

R2B - Junctions and Proportions

To identify routing and proportion detail for carriers participating in the route

TRANSACTION SETS USED IN

426 433 460 494

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	638	Rule 260 Junction Code	1	O	ID	1/5
03	610	Amount	1	O	N2	1/15

R2C - Division Basis

To identify the basis for divisions detail for carriers participating in the route

TRANSACTION SETS USED IN
426 460 494

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	666	Division Type Code	1	M	ID	1/1
02	122	Rate/Value Qualifier	1	O	ID	2/2
03	634	Factor Amount	1	O	R	1/15
04	554	Assigned Number	1	O/Z	N0	1/9

Semantic Notes

04 R2C04 is the column number of the division passed in R2C01.

R2D - Miscellaneous Charge

To identify miscellaneous charge detail for carriers participating in the route

TRANSACTION SETS USED IN

426

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	150	Special Charge or Allowance Code	1	M	ID	3/3
02	610	Amount	1	M	N2	1/15

R3 - Route Information - Motor

To specify carrier and routing sequences and details

TRANSACTION SETS USED IN

210 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	133	Routing Sequence Code	1	M	ID	1/2
03	19	City Name	1	O/Z	AN	2/30
04	91	Transportation Method/Type Code	1	O	ID	1/2
05	154	Standard Point Location Code	1	O	ID	6/9
06	76	Invoice Number	1	O	AN	1/22
07	373	Date	1	O/Z	DT	8/8
08	610	Amount	1	O/Z	N2	1/15
09	369	Free-form Description	1	O	AN	1/45
10	284	Service Level Code	1	X	ID	2/2
11	284	Service Level Code	1	X	ID	2/2
12	284	Service Level Code	1	O	ID	2/2

Syntax Notes

11	C1110
12	C1211

Semantic Notes

03	R303 is the station or city name at which carriers interchange shipments
07	R307 is the carrier's billing date.
08	R308 is the amount due the carrier.

R4 - Port or Terminal

Contractual or operational port or point relevant to the movement of the cargo

TRANSACTION SETS USED IN

109 215 272 300 301 304 309 310 311 312 315 322 323 324 325 326 355 362 511 715 754 810 856 858 945

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	115	Port or Terminal Function Code	1	M	ID	1/1
02	309	Location Qualifier	1	X	ID	1/2
03	310	Location Identifier	1	X	AN	1/30
04	114	Port Name	1	O	AN	2/24
05	26	Country Code	1	O	ID	2/3
06	174	Terminal Name	1	O	AN	2/30
07	113	Pier Number	1	O	AN	1/4
08	156	State or Province Code	1	O	ID	2/2

Syntax Notes

02 P0203

Comments

00 R4 is required for each port to be identified.

R9 - Route Code Identification

To specify the route using a single code

TRANSACTION SETS USED IN

128 404 410 417 426 460 475 494 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1	Route Code	1	M	AN	1/13
02	192	Agent/Shipper Routing Code	1	O	ID	1/1
03	177	Intermodal Service Code	1	O	ID	1/2
04	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
05	306	Action Code	1	X	ID	1/2
06	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
09	1	Route Code	1	O/Z	AN	1/13

Syntax Notes

09 C0905

Semantic Notes

04 R904 is used to identify the Standard Carrier Alpha Code (SCAC) of the delivery switch carrier.

06 R906 is the route source.

07 If R907 is "Y", then this is a pricing (revenue) route. If "N", then this is an operating route.

08 If R908 is "Y", then this is a local move. If "N", then this is an interline move.

09 R909 is the new route code of the expired route code in R901. If used R905 must = "E"

RA - Rate Header

To indicate a route code and other codes which define the use of the RB and FK segments which follow

TRANSACTION SETS USED IN
485

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1	Route Code	1	M	AN	1/13
02	122	Rate/Value Qualifier	1	M/Z	ID	2/2
03	122	Rate/Value Qualifier	1	O/Z	ID	2/2
04	629	Alternation Precedence Code	1	O	ID	1/1
05	631	Number of Rates	1	O	N0	1/1
06	637	Unit Conversion Factor	1	O	N4	1/9
07	856	Rate Level Qualifier Code	1	X	ID	1/1
08	500	Rate Level	1	X	AN	1/5
09	373	Date	1	O/Z	DT	8/8
10	373	Date	1	O/Z	DT	8/8

Syntax Notes

07 P0708

Semantic Notes

02 RA02 qualifies the rate and factor.
03 RA03 qualifies the minima.
09 RA09 is the effective date of RA08.
10 RA10 is the expiration date of RA08.

Comments

01 RA01 is the origin Standard Carrier Alpha Code (SCAC) (four characters), destination SCAC (four characters), and a mutually defined route number (4 characters).
04 RA04 default is "L".

RAB - Rate or Minimum Qualifiers

To indicate codes qualifying rates and the minimums

TRANSACTION SETS USED IN
460 494

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	122	Rate/Value Qualifier	1	O/Z	ID	2/2
02	554	Assigned Number	1	O/Z	N0	1/9
03	629	Alternation Precedence Code	1	O	ID	1/1
04	122	Rate/Value Qualifier	1	X/Z	ID	2/2
05	630	Minimum/Weight Logic	1	O	AN	1/2
06	633	Loading Restriction	1	O	N1	1/7
07	633	Loading Restriction	1	O	N1	1/7
08	488	Percent, Integer Format	1	X/Z	N0	1/3
09	637	Unit Conversion Factor	1	O	N4	1/9
10	554	Assigned Number	1	O/Z	N0	1/9

Syntax Notes

05 L050408

Semantic Notes

01 RAB01 is the code qualifying the rate(s).
02 RAB02 is the column number for the rate or minimum qualifier.
04 RAB04 is the code qualifying the minimum value.
08 RAB08 is the percentage of a marked equipment capacity.
10 RAB10 is the column number for the base rate to which the excess applies.

RAP - Requirement, Attribute, and Proficiency

To identify requirements, attributes, and proficiencies of students and/or courses

TRANSACTION SETS USED IN

130 138

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1155	Educational Test or Requirement Code	1	M	ID	1/3
02	93	Name	1	O/Z	AN	1/60
03	93	Name	1	O/Z	AN	1/60
04	1413	Usage Indicator Code	1	O/Z	ID	1/1
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	1250	Date Time Period Format Qualifier	1	X	ID	2/3
07	1251	Date Time Period	1	X	AN	1/35

Syntax Notes

06 P0607

Semantic Notes

02 RAP02 indicates the major grouping or main category of requirement, attribute, or proficiency.

03 RAP03 indicates the lesser grouping of sub-category of requirement, attribute, or proficiency.

04 RAP04 indicates whether or not this occurrence of the segment is used to indicate satisfaction of requirement or proficiency, or to indicate the presence of an attribute.

05 RAP05 indicates whether or not the student or course meets the requirement, attribute or proficiency. A "Y" indicates that it was met; an "N" indicates that it was not met.

RAS - Reason Adjustment

To supply Claim Adjustment Reason Codes and amounts as needed for an entire claim or for a particular service within the claim being paid

TRANSACTION SETS USED IN

835 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	782	Monetary Amount	1	M/Z	R	1/18
02	1785	Claim Adjustment Group Code	1	M	AN	1/10
03	C058	Adjustment Reason	15	M/Z		
04	380	Quantity	1	O/Z	R	1/15

Semantic Notes

01 RAS01 is the amount of adjustment.

03 Position of data in the repeating composite data element conveys no significance.

04 RAS04 is the units of service being adjusted.

Comments

00 Adjustment information is intended to help the provider balance the remittance information. Adjustment amounts must fully explain the difference between submitted charges and the amount paid.

RC - Root Cause

To specify the specific part responsible for a customer complaint in a request for service of a product and/or to describe the particular failure mechanism in a failing part or assembly

TRANSACTION SETS USED IN

141 142 842

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	235	Product/Service ID Qualifier	1	X	ID	2/2
02	234	Product/Service ID	1	X/Z	AN	1/80
03	93	Name	1	O/Z	AN	1/60
04	559	Agency Qualifier Code	1	X/Z	ID	2/2
05	822	Source Subqualifier	1	O/Z	AN	1/15
06	1228	Causal Part Condition Code	1	X/Z	AN	1/3
07	352	Description	1	X	AN	1/80
08	933	Free-form Message Text	1	O/Z	AN	1/264
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

01	P0102
04	C0406
05	C0504
06	R0607

Semantic Notes

02	RC02 contains the part number of the assembly or part that is the fundamental cause of the customer complaint.
03	RC03 contains the name or identify code of the manufacturer that supplied the part.
04	RC04 identifies the source of the codes in RC05 and RC06.
05	RC05 refers to a specific table belonging to the agency specified by RC04.
06	RC06 or RC07 describes the condition of the part or assembly that is the root cause of the problem being reported or repaired.
08	RC08 can be used to describe a root cause condition. It may only be used in conjunction with either RC06 or RC07.
09	RC09 refers to whether a part was repaired or replaced. A "Y" indicates it was repaired; an "N" indicates it was replaced.

RCD - Receiving Conditions

To report receiving conditions and specify contested quantities

TRANSACTION SETS USED IN
527 536 844 849 861

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	O/Z	AN	1/20
02	663	Quantity Units Received or Accepted	1	X	R	1/9
03	C001	Composite Unit of Measure	1	X		
04	664	Quantity Units Returned	1	X	R	1/9
05	C001	Composite Unit of Measure	1	X		
06	667	Quantity in Question	1	X	R	1/9
07	C001	Composite Unit of Measure	1	X		
08	412	Receiving Condition Code	1	X	ID	2/2
09	667	Quantity in Question	1	X	R	1/9
10	C001	Composite Unit of Measure	1	X		
11	412	Receiving Condition Code	1	X	ID	2/2
12	667	Quantity in Question	1	X	R	1/9
13	C001	Composite Unit of Measure	1	X		
14	412	Receiving Condition Code	1	X	ID	2/2
15	667	Quantity in Question	1	X	R	1/9
16	C001	Composite Unit of Measure	1	X		
17	412	Receiving Condition Code	1	X	ID	2/2
18	667	Quantity in Question	1	X	R	1/9
19	C001	Composite Unit of Measure	1	X		
20	412	Receiving Condition Code	1	X	ID	2/2
21	380	Quantity	1	O/Z	R	1/15

Syntax Notes

02	R020406
02	P0203
04	P0405
06	P060708
09	P091011
12	P121314
15	P151617
18	P181920

Semantic Notes

01	RCD01 is the receiving advice line item identification.
21	RCD21 is the cumulative quantity of goods received for a specific time period.

Comments

00 See the Data Element Dictionary for a complete list of receiving condition IDs.

06 RCD06 through RCD20 provide for five different quantities whose condition upon receipt is under question.

RCR - Reporting Criteria

To specify the criteria for reporting product activity and timing

TRANSACTION SETS USED IN

893

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	681	Timing Qualifier	1	M	ID	1/1
02	859	Activity Code	1	M	ID	2/2

RD - Rate Data

To indicate the through rate

TRANSACTION SETS USED IN
460 494

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	M/Z	N0	1/9
02	632	Rate Application Type Code	1	M	ID	1/1
03	60	Freight Rate	1	M	R	1/15
04	259	Change Type Code	1	M	ID	1/1
05	100	Currency Code	1	M	ID	3/3

Semantic Notes

01 RD01 is the column number.

RDD - Route Description Detail

To identify routing detail for carriers participating in a route

TRANSACTION SETS USED IN
475

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	638	Rule 260 unction Code	1	O	ID	1/5
03	140	Standard Carrier Alpha Code	1	X	ID	2/4
04	638	Rule 260 unction Code	1	O	ID	1/5
05	554	Assigned Number	1	O	N0	1/9

Syntax Notes

04		C0403

RDI - Retail Account Demographic Information

To report demographic information regarding a retail account

TRANSACTION SETS USED IN
885

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	98	Entity Identifier Code	1	M	ID	2/3
02	26	Country Code	1	O/Z	ID	2/3
03	522	Amount Qualifier Code	1	X	ID	1/3
04	610	Amount	1	X	N2	1/15
05	352	Description	1	O	AN	1/80

Syntax Notes

03 P0304

Semantic Notes

02 RDI02 identifies the ethnicity of the entity identified in RDI01.

RDM - Remittance Delivery Method

To identify remittance delivery when remittance is separate from payment

TRANSACTION SETS USED IN

820 835

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	756	Report Transmission Code	1	M	ID	1/2
02	93	Name	1	O	AN	1/60
03	364	Communication Number	1	O	AN	1/2048
04	C040	Reference Identifier	1	O		
05	C040	Reference Identifier	1	O		

Comments

02 RDM02 is used to contain the name of a third party processor if needed, who would be the first recipient of the remittance.

03 RDM03 contains the operative communication number for the delivery method specified in RDM01 (i.e. fax phone number and mail address).

04 RDM04 and RDM05 allow for additional room to convey further routing information beyond what is given in RDM03.

RDR - Return Disposition Reason

To indicate the disposition of the item, the reason for return by the returnee, the response to the reason for return, and whether the item was used

TRANSACTION SETS USED IN
180

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1292	Returns Disposition Code	1	O	ID	2/2
02	1293	Return Request Reason Code	1	X	ID	2/2
03	1294	Return Response Reason Code	1	X	ID	2/2
04	352	Description	1	O	AN	1/80
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

02 E0203

Semantic Notes

05 RDR05 contains code "Y" if the item has been used and code "N" if the item has not been used.

RDT - Revision Date/Time

To specify the revision level of the electronic data item

TRANSACTION SETS USED IN

841

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	795	Revision Level Code	1	O	ID	1/1
02	796	Revision Value	1	X	AN	1/30
03	374	Date/Time Qualifier	1	O	ID	3/3
04	373	Date	1	X	DT	8/8
05	337	Time	1	X	TM	4/8
06	623	Time Code	1	O	ID	2/2

Syntax Notes

01	C0102
03	L030405
06	C0605

REA - Real Estate Property Information

To provide a description of real estate or general property information

TRANSACTION SETS USED IN
201 202 206 261 262 833 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C047	Composite Type of Real Estate Asset Code	1	M/Z		
02	380	Quantity	1	O/Z	R	1/15
03	373	Date	1	O/Z	DT	8/8
04	1078	Property Ownership Rights Code	1	O/Z	ID	1/1
05	373	Date	1	O/Z	DT	8/8
06	1075	Status of Plans for Real Estate Asset Code	1	O	ID	1/1
07	1250	Date Time Period Format Qualifier	1	X/Z	ID	2/3
08	1251	Date Time Period	1	X/Z	AN	1/35
09	C001	Composite Unit of Measure	1	X/Z		
10	380	Quantity	1	X/Z	R	1/15
11	309	Location Qualifier	1	O/Z	ID	1/2
12	127	Reference Identification	1	O/Z	AN	1/80
13	1070	Type of Residence Code	1	O	ID	1/1
14	1321	Condition Indicator Code	1	O/Z	ID	2/3

Syntax Notes

07 P0708
09 P0910

Semantic Notes

01 REA01 defines the type of real estate referenced.
02 REA02 is the number of living units.
03 REA03 is the date the property was acquired.
04 REA04 defines the property ownership (fee simple, leasehold).
05 REA05 is the leasehold expiration date.
07 REA07 defines the date format in REA08.
08 REA08 is the date the property was built.
09 REA09 is the unit of measure for property area.
10 REA10 is the value of the area measure.
11 REA11 further defines the location of the real estate asset defined in REA01.
12 REA12 is used to identify an internal control number.
14 REA14 defines the physical status of the property structure.

Comments

04 If REA04 is "L" (Leasehold) then REA05 is the leasehold expiration date.

REC - Real Estate Condition

To indicate the condition of real estate property and, if applicable, the actions needed to correct damage

TRANSACTION SETS USED IN
206 255 260 261 262 264

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	689	Occupancy Code	1	M/Z	ID	2/2
02	726	Real Estate Property Condition Code	1	X	ID	2/2
03	448	Property Damage Code	1	O/Z	ID	1/2
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
05	380	Quantity	1	O/Z	R	1/15
06	815	Property Inspection Qualifier	1	X	ID	2/2

12	363	Note Reference Code	1	X	ID	3/3
13	3	Free-form Message	1	X	AN	1/60

Syntax Notes

06	C0602
08	P0809
08	L08060709101213
09	C0906
10	C1009
12	C1213

Semantic Notes

01	REC01 specifies the occupancy status of the real estate property.
03	REC03 indicates specified damage types such as fire, flood, earthquake, etc.
04	REC04 indicates whether there was other (nonsurchargeable) damage, i.e., damage which may not be added to the lender's claim for mortgage insurance benefits. A "Y" indicates there was other damage; an "N" indicates there was not.
05	REC05 indicates the number of living units.

RED - Related Data

To provide business data related to an item within a transaction to which a business application editing process has been applied, and an error condition has resulted

TRANSACTION SETS USED IN
824

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	352	Description	1	M/Z	AN	1/80
02	1609	Related Data Identification Code	1	X/Z	ID	2/3
03	559	Agency Qualifier Code	1	X/Z	ID	2/2
04	822	Source Subqualifier	1	O/Z	AN	1/15
05	1270	Code List Qualifier Code	1	X/Z	ID	1/3
06	1271	Industry Code	1	X/Z	AN	1/30

Syntax Notes

02	R0206
02	E0206
03	P030506
04	C0403

Semantic Notes

01	RED01 provides the related business data, whose nature is defined by the code in RED02 or RED06.
02	RED02 is an X12-defined code identifying the specific type of related data in RED01.
03	RED03 identifies the agency maintaining the code list identified in RED05.
04	RED04 provides further qualification of the agency identified in RED03.
05	RED05 identifies the code list containing the code indicated in RED06.
06	RED06 is an industry-defined code identifying the specific type of related data in RED01.

Comments

01	As an example of the use of the RED01 element, an application edit is applied to the Unit Price element within an Invoice (810) transaction set. The result of that edit indicates an invalid unit price. One piece of related business data would be the associated Product or Service Identification (data element #234). In this example, RED01 would be used to convey the associated Product or Service Identification.

REF - Reference Information

To specify identifying information

TRANSACTION SETS USED IN

100 101 102 103 105 111 120 121 124 130 131 132 133 135 138 140 141 142 143 144 146 147 148 149

02	127	Reference Identification	1	X	AN	1/80
03	352	Description	1	X	AN	1/80
04	C040	Reference Identifier	1	O/Z		

Syntax Notes

02 R0203

Semantic Notes

04 REF04 contains data relating to the value cited in REF02.

REG - Regulatory Application

To describe what regulatory requirements are associated with the product.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1812	Regulatory Type	1	M	ID	2/2
02	26	Country Code	1	X/Z	ID	2/3
03	C069	Composite State or Province Code	1	X		
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

02 R0203

Semantic Notes

02 REG02 is recommended, if there is a possibility of confusion when declaring the State or Province code.

04 REG04 declares the relationship of REG01 with REG02 and REG03.

Comments

01 REG01 identifies the regulatory type, REG02 and REG03 identify where the regulation pertains, and REG04 confirms the applicability.

REL - Relationship

To specify relationship and birth order of entity

TRANSACTION SETS USED IN

148 186 273 834 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1069	Individual Relationship Code	1	M	ID	2/2
02	1470	Number	1	O/Z	N0	1/9

Semantic Notes

02 REL02 is an ordinal number indicating birth order.

REN - Rate Request Information

To specify primary identification data for request or information

TRANSACTION SETS USED IN
460 463 466 468 486 490 494

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	635	Rate Request/Response Code	1	M	ID	1/1
02	140	Standard Carrier Alpha Code	1	X/Z	ID	2/4
03	352	Description	1	X/Z	AN	1/80
04	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
05	635	Rate Request/Response Code	1	O	ID	1/1
06	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

02	P0203

Semantic Notes

02	REN02 is the entity assigning the number in REN03.
03	REN03 is the unique number identifying a price request or distribution.
04	REN04 is the Standard Carrier Alpha Code (SCAC) of the entity to which the price request is directed.
06	REN06 is the responding entity.
07	REN07 indicates if this is a test transmission. A "Y" indicates that it is a test transmission; an "N" indicates that it is a production transmission.

REP - Repair Action

To specify the action that was taken or is to be taken in response to a service request

TRANSACTION SETS USED IN
142 143

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	O/Z	AN	1/20
02	235	Product/Service ID Qualifier	1	X	ID	2/2

18	822	Source Subqualifier	1	O	AN	1/15
19	127	Reference Identification	1	X/Z	AN	1/80
20	553	Authorization Identification	1	O/Z	AN	1/4

Syntax Notes

02	P0203
04	P0405
05	C0503
06	C0608
07	C0706
10	C1012
11	C1110
13	P1314
14	L141516
15	P1514
17	C1719
18	C1817

Semantic Notes

01 REP01 is used by other segments to refer to this instance of the REP loop. It also could be used to identify an individual repair within a multiple-repair claim.

03 REP03 refers to the part or assembly.

05 REP05 may be used to further specify a part or assembly.

06 REP06 identifies the source of the code in REP08 and REP15.

07 REP07 specifies a particular table of codes maintained by the agency identified in REP06.

08 REP08 specifies the repair that took place or is to take place on the item referenced in REP03.

09 REP09 is used to allow free-form text for the description of a service action when a coded value is not adequate.

10 REP10 identifies the source for the code in REP12.

12 REP12 describes the total difficulty of completing this individual repair action.

14 REP14 refers to a replacement part or assembly.

15 REP15 specifies the service performed on the replacement part or assembly.

16 REP16 is used to allow free-form text for the description of a service action when a coded value is not adequate.

17 REP17 refers to the source of the code in REP19.

19 REP19 is used to refer to a specific location on the product being serviced.

20 REP20 can be used to provide a preauthorized repair action even though it is not a normal condition.

REQ - Request Information

To identify the requested limitations and the corresponding response actions of an inquiry

TRANSACTION SETS USED IN

155 838

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1397	Inquiry Response Code	1	O	ID	1/2
02	1398	Inquiry Selection Code	1	O	ID	1/2

RES - Real Estate Sales Price Change

To provide the type, source, and amount of real estate sales price changes

TRANSACTION SETS USED IN
201 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1706	Real Estate Sales Price Change Code	1	M	ID	1/1
02	1091	Source of Funds Code	1	O	ID	1/1
03	1083	Type of Funds Code	1	X/Z	ID	2/2
04	782	Monetary Amount	1	O/Z	R	1/18
05	352	Description	1	O/Z	AN	1/80
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
07	373	Date	1	O/Z	DT	8/8

Syntax Notes

06	C0603

Semantic Notes

03	If RES03 is "58 - Other", then RES05 is required.
04	RES04 is the amount of the Real Estate Sales Price Change.
05	RES05 is a free-form description of the Real Estate Sales Price Change Type of Funds.
06	RES06 indicates if the Real Estate Sales Price Change funds are pledged. A "Y" indicates that the funds are pledged, an "N" indicates that the funds are not pledged.
06	If RES06 is "Y - Yes" then RES07 is required.
07	RES07 is the release date of the pledged funds.

RET - Real Estate Transaction

Provides information related to current or historical real estate transactions such as multiple listings, sales and loans

TRANSACTION SETS USED IN

262

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1201	Information Status Code	1	O	ID	1/1

Syntax Notes

07	C0706
08	P0809
11	C1110
12	P1213
15	C1514
16	P1617

Semantic Notes

01	RIC01 indicates the type of return, i.e., ACH, wire, credit card, etc.
02	RIC02 indicates the source of the return reason code in RIC03.
03	RIC03 contains the return reason code.
06	RIC06 contains the account number used for settlement of the return.
07	RIC07 is the code indicating the type of bank account or other financial asset.
09	RIC09 contains the originator of the return's DFI ID (the DFI that received the original transaction).
10	RIC10 contains the account number to where the original transaction had been sent.

13 RIC13 contains the receiver of the return's DFI ID (the DFI that is receiving the return, the entity that originally created the transaction that is being returned).

14 RIC14 contains the account number from which the original transaction had been originated that is now being returned to.

18 RIC18 contains the settlement date of the return.

RLD - Down Payment Data

To provide amount or nature of loan down payment

TRANSACTION SETS USED IN

202

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1083	Type of Funds Code	1	O/Z	ID	2/2
02	782	Monetary Amount	1	X/Z	R	1/18
03	352	Description	1	O/Z	AN	1/80
04	522	Amount Qualifier Code	1	O/Z	ID	1/3

Syntax Notes

04 C0402

Semantic Notes

01 RLD01 defines the type of down payment.

02 RLD02 is the amount of the down payment in dollars, unless qualified by RLD04.

03 RLD03 is the source of the down payment.

04 RLD04 is the type of funding, either closing costs or secondary financing.

RLT - Real Estate Loan Type

Used to identify the agency case number, loan number, real estate loan type, pool type and amortization terms

TRANSACTION SETS USED IN

203 206

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	M	ID	2/3
02	127	Reference Identification	1	M	AN	1/80
03	128	Reference Identification Qualifier	1	X	ID	2/3
04	127	Reference Identification	1	X	AN	1/80
05	1093	Real Estate Loan Type Code	1	O/Z	ID	1/1
06	1085	Loan Payment Type Code	1	O/Z	ID	2/2
07	673	Quantity Qualifier	1	X	ID	2/2
08	380	Quantity	1	X	R	1/15
09	C001	Composite Unit of Measure	1	X		
10	128	Reference Identification Qualifier	1	X	ID	2/3
11	127	Reference Identification	1	O	AN	1/80
12	1193	Program Type Code	1	O/Z	ID	2/2

Syntax Notes

03	P0304
07	P070809
11	C1110

Semantic Notes

05	RLT05 identifies the real estate loan type.
06	RLT06 identifies the product type.
12	RLT12 identifies the pool type.

RMR - Remittance Advice Accounts Receivable Open Item Reference

To specify the accounts receivable open item(s) to be included in the cash application and to convey the appropriate detail

TRANSACTION SETS USED IN
820 823

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	X	ID	2/3
02	127	Reference Identification	1	X	AN	1/80
03	482	Payment Action Code	1	O/Z	ID	2/2
04	782	Monetary Amount	1	O/Z	R	1/18
05	782	Monetary Amount	1	O/Z	R	1/18
06	782	Monetary Amount	1	O/Z	R	1/18
07	426	Adjustment Reason Code	1	X	ID	2/2
08	782	Monetary Amount	1	X/Z	R	1/18

Syntax Notes

01	P0102
07	P0708

Semantic Notes

03	If RMR03 is present, it specifies how the cash is to be applied.
04	RMR04 is the amount paid.
05	RMR05 is the amount of invoice (including charges, less allowance) before terms discount (if discount is applicable) or debit amount or credit amount of referenced items.
06	RMR06 is the amount of discount taken.
08	RMR08, if present, represents an interest penalty payment, amount late interest paid, or amount anticipation.

Comments

01	Parties using this segment should agree on the content of RMR01 and RMR02 prior to initiating communication.
03	If RMR03 is not present, this is a payment for an open item. If paying an open item, RMR02 must be present. If not paying a specific open item, RMR04 must be present.
05	RMR05 may be needed by some payees to distinguish between duplicate reference numbers.

RMT - Remittance Advice

To indicate the detail on items

TRANSACTION SETS USED IN

110

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	M	ID	2/3
02	127	Reference Identification	1	M	AN	1/80
03	782	Monetary Amount	1	O	R	1/18
04	782	Monetary Amount	1	O/Z	R	1/18
05	782	Monetary Amount	1	O/Z	R	1/18
06	782	Monetary Amount	1	O/Z	R	1/18
07	782	Monetary Amount	1	O/Z	R	1/18
08	782	Monetary Amount	1	O/Z	R	1/18
09	426	Adjustment Reason Code	1	O	ID	2/2
10	352	Description	1	O	AN	1/80

Semantic Notes

04 RMT04 is the amount of invoice (including charges, less allowances) before terms discount (if discount is applicable) or debit amount or credit amount of referenced items.

05 RMT05 is the amount upon which the terms discount amount is calculated.

06 RMT06 is the amount of invoice due if paid by terms discount due date (total invoice amount less terms discount amount).

07 RMT07 is the amount of discount taken which may be less than or equal to the amount of discount permitted.

08 RMT08 is any amount being deducted from or added to a particular invoice or line item for reasons other than payment discount (e.g., damaged goods, short shipment, tax, penalty, or late charge payment).

Comments

01 Parties using this segment should agree on the content of RMT01 and RMT02 prior to initiating transaction communication.

03 RMT03 may also be used to specify the amount paid when different from the amount invoiced.

RO - Public Record or Obligation

To provide details of public records or obligations

TRANSACTION SETS USED IN

200

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1185	Public Record or Obligation Code	1	M	ID	2/2

04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
05	352	Description	1	O/Z	AN	1/80

Syntax Notes

01 P0102

02 R0203

Semantic Notes

02 RQS02 contains the codes for questions commonly asked of students on admission applications.

03 RQS03 contains a free-form question when the codified questions are not adequate.

04 RQS04 defines the answer to a question. A "Y" indicates that the answer is yes; an "N" indicates that the answer is no.

05 RQS05 is the free-form answer to either the codified or free-form question.

RRA - Required Response

To indicate information that is required to be included in the response

TRANSACTION SETS USED IN

840

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	701	Information Type Code	1	M	ID	2/2
02	127	Reference Identification	1	O/Z	AN	1/80

Semantic Notes

02 Use RRA02 only to specify applicable regulatory or contractual clause.

RRE - Contract Related Error Reporting

To specify rejection information

TRANSACTION SETS USED IN

561

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	901	Reject Reason Code	1	X	ID	2/2
02	352	Description	1	X	AN	1/80

Syntax Notes

01	R0102

RS - Rate Subset

To indicate effective or expiration dates for rates and divisions

TRANSACTION SETS USED IN
460

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	M/Z	N0	1/9
02	1470	Number	1	M/Z	N0	1/9
03	856	Rate Level Qualifier Code	1	O	ID	1/1
04	500	Rate Level	1	X	AN	1/5
05	373	Date	1	O/Z	DT	8/8
06	373	Date	1	O/Z	DT	8/8

Syntax Notes

03 C0304

Semantic Notes

01 RS01 is the subset sequence number.
02 RS02 is the number of rates.
05 RS05 is the effective date of the subset.
06 RS06 is the expiration date of the subset.

RSC - Resource

To identify resource details for tasks or activities

TRANSACTION SETS USED IN

806

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1180	Resource Code (or Identifier)	1	M	AN	1/20
02	352	Description	1	O	AN	1/80
03	1181	Resource Type Code	1	O	ID	2/2
04	306	Action Code	1	O	ID	1/2

RSD - Residency Information

To provide information for establishing residency within a state for tuition purposes

TRANSACTION SETS USED IN

189

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1270	Code List Qualifier Code	1	X	ID	1/3
02	1271	Industry Code	1	X/Z	AN	1/30
03	1069	Individual Relationship Code	1	O/Z	ID	2/2

Syntax Notes

01 P0102

Semantic Notes

02 RSD02 is a code that indicates the type of residency question being asked of the student.

03 RSD03 indicates the relationship to the student of the individual upon which this residency type is based.

RST - Carrier Restriction

To transmit the carrier's service restrictions

TRANSACTION SETS USED IN

217

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	281	Carrier Restriction Code	1	X	AN	1/10
02	352	Description	1	X	AN	1/80

Syntax Notes

01	E0102

RT - Rate Destination

To provide destination information

TRANSACTION SETS USED IN

129

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	122	Rate/Value Qualifier	1	M	ID	2/2
02	154	Standard Point Location Code	1	O	ID	6/9
03	838	Dealer Code	1	O	AN	2/9
04	1062	Vehicle Service Code	1	O	ID	2/4
05	295	Distance Qualifier	1	X	ID	1/1
06	294	Tariff Distance	1	X/Z	N0	1/5
07	1244	National Motor Freight Transportation Association Location Name	1	O	AN	2/27
08	156	State or Province Code	1	O	ID	2/2
09	93	Name	1	O	AN	1/60
10	166	Address Information	1	O	AN	1/55
11	67	Identification Code	1	X	AN	2/80
12	66	Identification Code Qualifier	1	X	ID	1/2

Syntax Notes

05 P0506

11 P1112

Semantic Notes

06 RT06 is required if the rate is for motor carrier shipment.

RT1 - Rate Detail

To provide rate details

TRANSACTION SETS USED IN
129

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	91	Transportation Method/Type Code	1	M	ID	1/2
02	837	Vehicle Type Code	1	M	ID	1/1
03	60	Freight Rate	1	M	R	1/15
04	377	Rounding Rule Code	1	O	ID	1/1
05	1245	Vehicle Identification Number (VIN) Plant Code	1	O	ID	1/1
06	40	Equipment Description Code	1	O	ID	2/2
07	169	Tariff Item Number	1	O	AN	1/16
08	1246	Special Rate Code	1	O	ID	1/2

RTE - Rate Information

To specify the earnings, rates and multipliers for this account

TRANSACTION SETS USED IN
568 821 822

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1387	Rate Qualifier Code	1	M	ID	1/2
02	953	Interest Rate	1	M	R	1/6
03	782	Monetary Amount	1	O/Z	R	1/18
04	1470	Number	1	O/Z	N0	1/9
05	1470	Number	1	O/Z	N0	1/9

Semantic Notes

03 RTE03 is the analysis month net collected amount per $1.00 service charge, net of reserves.

04 RTE04 is the number of days in the analysis month used in the application of the rate information.

05 RTE05 is the number of days in the analysis year used in the application of the rate information.

RTT - Freight Rate Information

To transmit a rate

TRANSACTION SETS USED IN

106 204

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	122	Rate/Value Qualifier	1	M	ID	2/2
02	60	Freight Rate	1	M	R	1/15

RU1 - Retirement Board Detail

To communicate information (from the United States Railroad Retirement Board to the employing carrier) pertinent to the processing of retirement claims

TRANSACTION SETS USED IN
429

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	535	Rail Retirement Activity Code	1	M/Z	ID	1/1
02	127	Reference Identification	1	M/Z	AN	1/80
03	93	Name	1	M	AN	1/60
04	127	Reference Identification	1	O/Z	AN	1/80
05	373	Date	1	O/Z	DT	8/8
06	537	Employment Code	1	O	ID	1/1
07	545	Unemployed Reason Code	1	O	ID	1/1
08	373	Date	1	O/Z	DT	8/8
09	574	Claim Profile	1	O	AN	14/14

Semantic Notes

01	If RU101 is code "A", then RU105 and RU107 are required. If RU101 is code "C", then RU105, RU106, RU107, RU108, and RU109 are required.
02	RU102 must be a nine-position social security number.
04	RU104 will contain the employee's identifying number assigned by the employing carrier.
05	RU105 is the date the employee last worked (from Retirement Board Records). If RU105 is "S" then RU108 and RU109 are required.
08	RU108 is the beginning date for the claim.

RU2 - Employing Carrier Response

To communicate information (from the employing carrier to the United States Railroad Retirement Board) pertinent to the processing of retirement claims

TRANSACTION SETS USED IN
429

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	535	Rail Retirement Activity Code	1	M	ID	1/1
02	127	Reference Identification	1	M/Z	AN	1/80
03	373	Date	1	X	DT	8/8
04	584	Employment Status Code	1	X	ID	2/2
05	610	Amount	1	O	N2	1/15
06	594	Frequency Code	1	X	ID	1/1
07	373	Date	1	X	DT	8/8
08	373	Date	1	X	DT	8/8

Syntax Notes

03	P0304
05	C05060708

Semantic Notes

02	RU202 must be a nine-position social security number.

Comments

01	RU201 may only contain the following codes: "B", "D", or "T". When RU201 is code "B", then RU205 contains the guarantee amount, RU207 contains the guarantee begin date, and RU208 contains the guarantee end date.
03	RU203 contains the effective date of the status code indicated in RU204.

RU3 - Employing Carrier Claim Profile

To communicate employing carrier response to a sickness or unemployment claim

TRANSACTION SETS USED IN
429

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	M/Z	DT	8/8
02	585	Payroll Status Code	1	X	ID	2/2

20	585	Payroll Status Code	1	X	ID	2/2
21	590	Wages Paid Code	1	X	ID	1/1
22	585	Payroll Status Code	1	X	ID	2/2
23	590	Wages Paid Code	1	X	ID	1/1
24	585	Payroll Status Code	1	X	ID	2/2
25	590	Wages Paid Code	1	X	ID	1/1
26	585	Payroll Status Code	1	X	ID	2/2
27	590	Wages Paid Code	1	X	ID	1/1
28	585	Payroll Status Code	1	X	ID	2/2
29	590	Wages Paid Code	1	X	ID	1/1

Syntax Notes

02	P0203
04	P0405
06	P0607
08	P0809
10	P1011

12 P1213
14 P1415
16 P1617
18 P1819
20 P2021
22 P2223
24 P2425
26 P2627
28 P2829

Semantic Notes

01 RU301 is the beginning date of the claim information corresponding to the original notification from the Railroad Retirement Board.

Comments

02 RU302 through RU329 provide fourteen pairs of data elements 585 and 590. The repetitive occurrence of these data elements denotes the day-to-day payroll status of the employee for the claim period.

RYL - Royalty Payment

To specify remittance information about royalty payments

TRANSACTION SETS USED IN

820

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	M/Z	N0	1/9
02	1035	Name Last or Organization Name	1	O/Z	AN	1/80
03	66	Identification Code Qualifier	1	X	ID	1/2
04	67	Identification Code	1	X	AN	2/80

Syntax Notes

03 P0304

Semantic Notes

01 RYL01 is a unique identifier of a specific occurrence of the RYL loop.

02 RYL02, RYL03, and RYL04 identify the legal entity paying the royalty.

Comments

00 This segment is used to group the data for the payer of a royalty.

S1 - Stop-off Name

To identify a stop-off party

TRANSACTION SETS USED IN
404 410 417 421 426 456

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	165	Stop Sequence Number	1	M	N0	1/3
02	93	Name	1	M	AN	1/60
03	66	Identification Code Qualifier	1	X	ID	1/2
04	67	Identification Code	1	X	AN	2/80
05	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
06	190	Accomplish Code	1	M	ID	1/1

Syntax Notes

03 P0304

Semantic Notes

05 S105 will contain the railroad initial responsible for this stop.

S2 - Stop-off Address

To specify the address of the stop-off party

TRANSACTION SETS USED IN
404 410 417

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	165	Stop Sequence Number	1	M	N0	1/3
02	166	Address Information	1	M	AN	1/55
03	166	Address Information	1	O	AN	1/55

Comments

01 S201 contains the same stop sequence number used on a corresponding S1 Segment.

S3A - Assurance Header Level 1

To allow for multiple assurances at the GS\GE level

CONTROL SEGMENT

TRANSACTION SETS USED IN

None

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

Syntax Notes

02	R0203
03	P0304
06	P0607
09	P0910
11	C1110
14	C1413
16	C1615

Semantic Notes

01	If SAC01 is "A" or "C", then at least one of SAC05, SAC07, or SAC08 is required.
05	SAC05 is the total amount for the service, promotion, allowance, or charge.
05	If SAC05 is present with SAC07 or SAC08, then SAC05 takes precedence.
08	SAC08 is the allowance or charge rate per unit.

10 SAC10 and SAC11 is the quantity basis when the allowance or charge quantity is different from the purchase order or invoice quantity.

10 SAC10 and SAC11 used together indicate a quantity range, which could be a dollar amount, that is applicable to service, promotion, allowance, or charge.

13 SAC13 is used in conjunction with SAC02 or SAC04 to provide a specific reference number as identified by the code used.

14 SAC14 is used in conjunction with SAC13 to identify an option when there is more than one option of the promotion.

16 SAC16 is used to identify the language being used in SAC15.

Comments

04 SAC04 may be used to uniquely identify the service, promotion, allowance, or charge. In addition, it may be used in conjunction with SAC03 to further define SAC02.

10 In some business applications, it is necessary to advise the trading partner of the actual dollar amount that a particular allowance, charge, or promotion was based on to reduce ambiguity. This amount is commonly referred to as "Dollar Basis Amount". It is represented in the SAC segment in SAC10 using the qualifier "DO" - Dollars in SAC09.

SAD - Student Award Detail

To provide detail concerning a student award

TRANSACTION SETS USED IN

135

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	641	Status Reason Code	1	O	ID	3/3

07	373	Date	1	O/Z	DT	8/8

Syntax Notes

02	C0203
03	P030405

Semantic Notes

01	SAL01 contains the code "Y" if prearranged override is in effect for computing salary commissions and code "N" if a prearranged override is not in effect for computing salary commissions.
02	SAL02 is the total amount paid to the employee based on the information sent in SAL03 through SAL05.
06	SAL06 is the reporting period start date.
07	SAL07 is the reporting period end date.

SB - Docket Level

To indicate the docket level

TRANSACTION SETS USED IN

460

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	496	Docket Level Number	1	M	N0	1/2

SBI - Specific Benefit Information

To specify specific benefit scenarios

TRANSACTION SETS USED IN
271

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1390	Eligibility or Benefit Information Code	1	M	ID	1/2

10	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
11	782	Monetary Amount	1	O/Z	R	1/18

Syntax Notes

03 C0302

Semantic Notes

05 SBI05 represents a single benefit amount or minimum benefit amount dependent upon the code sent in SBI01.

06 SBI06 represents a remaining benefit amount or maximum benefit amount dependent upon the code sent in SBI01.

09 SBI09 is the triggering event indicator. A "Y" indicates that a triggering event has occurred, an "N" indicates no triggering event has occurred, a "U" indicates it cannot be determined if a triggering event occurred.

10 SBI10 is the single use benefit indicator. A "Y" indicates that the benefit is a single use per period (one time use), an "N" indicates an exhaustive benefit (used until benefit or benefit amount is '0') a "U" indicates it's unknown if the benefit is of single use or exhaustive type.

11 SBI11 amount represents the tiered benefit dollar amount.

SBR - Subscriber Information

To record information specific to the primary insured and the insurance carrier for that insured

TRANSACTION SETS USED IN
276 277 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1138	Payer Responsibility Sequence Number Code	1	M	ID	1/1
02	1069	Individual Relationship Code	1	O/Z	ID	2/2

09	1032	Claim Filing Indicator Code	1	O	ID	1/2
10	1732	Source of Payment Typology Code	1	O	ID	2/6

Semantic Notes

02 SBR02 specifies the relationship to the person insured.

03 SBR03 is policy or group number.

04 SBR04 is plan name.

07 SBR07 is destination payer code. A "Y" value indicates the payer is the destination payer; an "N" value indicates the payer is not the destination payer.

SBT - Subtest

To provide information about subtests that the student has taken

TRANSACTION SETS USED IN

130 138 189

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1158	Subtest Code	1	M	ID	5/5

07	741	Range Maximum	1	X	R	1/20

Syntax Notes

01	P0102
03	L030407
05	C0504
06	P0607

Semantic Notes

01	SCA01 and SCA02 identify a particular statistical category.
03	SCA03 is the statistical measure being reported.
04	SCA04 is the primary quantity associated with the statistical measure.
05	SCA05 is the secondary quantity associated with the statistical measure.

SCD - Sales Commission Employee Detail

To provide additional detail for an employee participating in a sales commission program

TRANSACTION SETS USED IN
818

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	584	Employment Status Code	1	M	ID	2/2

12	350	Assigned Identification	1	O/Z	AN	1/20

Syntax Notes

03	C0304
08	L080910
09	C0908
10	C1008

Semantic Notes

12	SCH12 is the schedule identification.

Comments

05	SCH05 specifies the interpretation to be used for SCH06 and SCH07.

SCL - Rate Basis/Scales

To identify a scale or rate basis number associated with a particular geographic location or specific set of rates

TRANSACTION SETS USED IN
494

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	969	Rate Basis Qualifier	1	M	ID	1/1
02	119	Rate Basis Number	1	X	AN	1/6
03	119	Rate Basis Number	1	O	AN	1/6
04	309	Location Qualifier	1	X	ID	1/2

Syntax Notes

03	C0302
05	C0504
06	C0605
07	C0704

Comments

09	SCL09 is used to point to less than truckload tables.
10	SCL10 is used to point to truckload tables.

SCM - Credit Score Model

To define the credit score model used and the related score

TRANSACTION SETS USED IN

200 202 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	234	Product/Service ID	1	O/Z	AN	1/80
02	1470	Number	1	O/Z	N0	1/9
03	484	Evaluation Rating Code	1	O	ID	1/1
04	3	Free-form Message	1	O/Z	AN	1/60

Semantic Notes

01 SCM01 identifies the credit score model.

02 SCM02 is the credit score expressed as a number.

04 SCM04 states the credit score model name if not available as a product identifier, or explains the reasons for a missing score.

SCN - Beginning Segment for Cartage Work Assignment

To indicate the beginning of the Cartage WorkAssignment Transaction Set

TRANSACTION SETS USED IN
222

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	127	Reference Identification	1	M/Z	AN	1/80
03	353	Transaction Set Purpose Code	1	M	ID	2/2
04	146	Shipment Method of Payment Code	1	M	ID	2/2
05	610	Amount	1	O/Z	N2	1/15

Semantic Notes

02 SCN02 is the workassignment identification.

05 SCN05 is the charge for the cartage workassignment in U.S. dollars

SCP - Beginning Segment for a Cartage Work Assignment Response

To indicate the beginning of the Cartage Work Assignment Response Transaction Set

TRANSACTION SETS USED IN

225

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	127	Reference Identification	1	M/Z	AN	1/80
03	558	Reservation Action Code	1	M	ID	1/1
04	1658	Shipment or Work Assignment Decline Reason Code	1	O	ID	3/3

Semantic Notes

02 SCP02 is the work assignment identification.

SCR - Shipper's Car Ordered Rail

Indicates the type and quantity of rail equipment being ordered for transportation services

TRANSACTION SETS USED IN

422

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	O/Z	R	1/15

15	708	Rating Summary Value Code	1	O	ID	1/2
16	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
17	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
18	301	Car Type Code	1	O/Z	ID	1/4
19	1011	Association of American Railroads (AAR) Pool Code	1	X	ID	7/7
20	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
21	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
22	206	Equipment Initial	1	X	AN	1/4
23	207	Equipment Number	1	X/Z	AN	1/15
24	207	Equipment Number	1	X/Z	AN	1/15
25	216	Metric Qualifier	1	O	ID	1/1

Syntax Notes

03	R0319
18	C1803
22	P222324
25	L250708

Semantic Notes

01	SCR01 is the quantity of rail cars ordered.
02	SCR02 is the commodity code using the full 7 digit Standard Transportation Commodity Code (STCC).

05 SCR05 is the inside height of the car specified in inches.
06 SCR06 is the inside width of the car in inches.
10 SCR10 is degrees in Fahrenheit.
12 SCR12 is the height of the door in inches.
13 SCR13 is the width of the door in inches.
16 If SCR16 is "Y," then alternate equipment is acceptable. If "N," then alternate equipment is not acceptable.
17 SCR17 is the SCAC of the equipment supplier.
18 SCR18 is the alternate car type.
20 If SCR20 is "Y," then car can be from the shipper's pool assignment. If "N," then car cannot be from shipper's pool assignment.
21 SCR21 is the SCAC of the car owner.
23 SCR23 represents the lowest number for a range of cars.
24 SCR24 represents the highest number for a range of cars.

SCS - Credit Score

To identify evaluation factors used in determining an applicant's credit score

TRANSACTION SETS USED IN
200 202 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	O	AN	1/80
02	933	Free-form Message Text	1	O/Z	AN	1/264

Semantic Notes

02 SCS02 describes the evaluation factors used in determining a credit score.

SCT - School Type

To specify school type and associated information

TRANSACTION SETS USED IN
133 135

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1141	Academic Credit Type Code	1	O	ID	1/1
02	380	Quantity	1	O/Z	R	1/15
03	1139	Session Code	1	O	ID	1/1
04	1250	Date Time Period Format Qualifier	1	X	ID	2/3
05	1251	Date Time Period	1	X/Z	AN	1/35
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
07	1134	Institutional Governance or Funding Source Level Code	1	O	ID	1/1
08	1270	Code List Qualifier Code	1	X/Z	ID	1/3
09	1271	Industry Code	15	X/Z	AN	1/30
10	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
11	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

04 P0405
08 P0809

Semantic Notes

02 SCT02 is the number of credit hours.
05 SCT05 is the date of the school term.
06 SCT06 indicates whether this is a lender of last resort loan. A "Y" means that the loan is an eligible lender of last resort loan; an "N" means the loan is not an eligible lender of last resort loan.
08 SCT08 and SCT09 identify the code source and the industry code(s) for the institutional sector or level classification.
09 All occurrences of SCT09 are codes from the list specified in SCT08. The positionality of the occurrences of SCT09 is not significant.
10 SCT10 indicates if the postsecondary institution's IRS status is public. A "Y" indicates that the institution's IRS status is public; an "N" indicates that the institution's IRS status is not public.
11 SCT11 represents the Title 1 status for elementary/secondary schools. A "Y" indicates that the Title 1 program is school-wide; an "N" indicates that it is not school-wide.

SD1 - Safety Data

To provide safety data information to recipients of the transaction, including identification of the hazard that the material being described represents, and the organization or party which declared this material to be a hazard or established exposure limits or other guidelines for that material

TRANSACTION SETS USED IN
271 272 848

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	349	Item Description Type Code	1	M	ID	1/1
02	821	Safety Characteristic/Hazard Code	1	M	ID	3/3
03	559	Agency Qualifier Code	1	X	ID	2/2
04	822	Source Subqualifier	1	O	AN	1/15
05	751	Product Description Code	1	X	AN	1/12
06	352	Description	1	X/Z	AN	1/80
07	156	State or Province Code	1	O/Z	ID	2/2
08	26	Country Code	1	O/Z	ID	2/3

Syntax Notes

03 L030506
05 R0506
05 C0503

Semantic Notes

06 SD106 is a free-form description of a safety characteristic or hazard.
07 SD107 specifies the state or province issuing the regulation that applies to the safety data included in this segment.
08 SD108 specifies the country issuing the regulation that applies to the safety data included in this segment.

Comments

01 SD101 indicates the format of this safety data information.
03 SD103 identifies the organization responsible for the code used in SD105 or the free-form text in SD106.
04 SD104 is a reference that indicates the table or text maintained by the source qualifier (SD103).
05 SD105 is a code from the organization list which provides specific data about a safety characteristic or hazard.

SDP - Ship/Delivery Pattern

To identify specific ship/delivery requirements

TRANSACTION SETS USED IN
830 862

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	678	Ship/Delivery or Calendar Pattern Code	1	M	ID	1/2
02	679	Ship/Delivery Pattern Time Code	1	M	ID	1/1
03	678	Ship/Delivery or Calendar Pattern Code	1	O	ID	1/2
04	679	Ship/Delivery Pattern Time Code	1	O	ID	1/1
05	678	Ship/Delivery or Calendar Pattern Code	1	O	ID	1/2
06	679	Ship/Delivery Pattern Time Code	1	O	ID	1/1
07	678	Ship/Delivery or Calendar Pattern Code	1	O	ID	1/2
08	679	Ship/Delivery Pattern Time Code	1	O	ID	1/1

Comments

00 The intent of this segment is to define the routine ship or delivery patterns, as required, when order quantities are in "buckets", such as weekly, monthly. Ship/delivery patterns eliminate the need to transmit discrete quantities and dates for each required shipment or delivery. It is assumed that a "bucketed" quantity is to be divided equally by the ship/delivery pattern. For example, a weekly quantity of 100 with a delivery pattern of Monday and Wednesday would result in 50 to be delivered on Monday and 50 to be delivered on Wednesday.

SDQ - Destination Quantity

To specify destination and quantity detail

TRANSACTION SETS USED IN

163 180 210 212 214 223 810 830 840 843 846 850 852 855 856 860 862 865 940

21	67	Identification Code	1	X	AN	2/80
22	380	Quantity	1	X	R	1/15
23	310	Location Identifier	1	O/Z	AN	1/30

Syntax Notes

05	P0506
07	P0708
09	P0910
11	P1112
13	P1314
15	P1516
17	P1718
19	P1920
21	P2122

Semantic Notes

23 SDQ23 identifies the area within the location identified in SDQ03, SDQ05, SDQ07, SDQ09, SDQ11, SDQ13, SDQ15, SDQ17, SDQ19, and SDQ21.

Comments

02 SDQ02 is used only if different than previously defined in the transaction set.

03 SDQ03 is the store number.

23 SDQ23 may be used to identify areas within a store, e.g., front room, back room, selling outpost, end aisle display, etc. The value is agreed to by trading partners or industry conventions.

SE - Transaction Set Trailer

To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments)

CONTROL SEGMENT

TRANSACTION SETS USED IN

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	96	Number of Included Segments	1	M	N0	1/10
02	329	Transaction Set Control Number	1	M	AN	4/9

Comments

00	SE is the last segment of each transaction set.

SEF - Payment Handling

To indicate the frequency and method for which trading partner financial settlement occurs

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1772	Frequency Pattern Code	1	M	ID	2/2
02	352	Description	1	O/Z	AN	1/80
03	1764	Payment Handling Code	1	X	ID	2/2
04	352	Description	1	X/Z	AN	1/80

Syntax Notes

03 R0304

Semantic Notes

02 SEF02 is used to clarify the payment frequency pattern code.

04 SEF04 is used to clarify payment handling.

Comments

00 This segment identifies the settlement frequency, which is tied to the benchmarking, for this program.

SER - Service Charges

To specify the details of the service charges levied

TRANSACTION SETS USED IN

822

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	235	Product/Service ID Qualifier	1	M	ID	2/2
02	234	Product/Service ID	1	M	AN	1/80
03	782	Monetary Amount	1	X/Z	R	1/18
04	782	Monetary Amount	1	X/Z	R	1/18
05	212	Unit Price	1	O	R	1/17
06	380	Quantity	1	O	R	1/15
07	352	Description	1	O	AN	1/80
08	236	Price Identifier Code	1	O/Z	ID	3/3
09	107	Payment Method Type Code	1	O/Z	ID	1/2
10	128	Reference Identification Qualifier	1	X/Z	ID	2/3
11	127	Reference Identification	1	X/Z	AN	1/80

Syntax Notes

03	R0304
10	P1011

Semantic Notes

03	SER03 is collected balance required (Account balance needed to compensate for service charge).
04	SER04 is the service charge.
08	SER08 is the pricing structure.
09	SER09 is the method of compensation.
10	SER10 is the subservice identifier.
11	SER11 is the subservice number.

SES - Academic Session Header

To identify the particular academic session in which the activity which follows took place

TRANSACTION SETS USED IN
130 132 189 190

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1251	Date Time Period	1	M/Z	AN	1/35
02	609	Count	1	O/Z	N0	1/9
03	1251	Date Time Period	1	O/Z	AN	1/35
04	1139	Session Code	1	O	ID	1/1
05	93	Name	1	O	AN	1/60
06	1250	Date Time Period Format Qualifier	1	X	ID	2/3
07	1251	Date Time Period	1	X/Z	AN	1/35
08	1250	Date Time Period Format Qualifier	1	X	ID	2/3
09	1251	Date Time Period	1	X/Z	AN	1/35
10	1131	Level of Individual, Test, or Course Code	1	O/Z	ID	2/2
11	66	Identification Code Qualifier	1	X/Z	ID	1/2
12	67	Identification Code	1	X	AN	2/80
13	93	Name	1	O	AN	1/60
14	641	Status Reason Code	1	O/Z	ID	3/3

Syntax Notes

06	P0607
08	P0809
11	P1112

Semantic Notes

01	SES01 refers in general to the date the overall session began.
01	SES01 is in the format of CCYYMM.
02	SES02 refers to the individual specific session falling within the overall general session.
03	SES03 refers to the school year for prekindergarten through grade 12 records.
03	SES03 is in the format of CCYY-CCYY.
07	SES07 is the exact date the session began.
09	SES09 is the date the session ended.
10	SES10 refers to the grade level of the student during this session.
11	SES11, SES12, and SES13 refer to the major field of study for the student.
14	SES14 indicates if the student received special recognition (honors) or was suspended or put on probation at the end of the session.

SFC - Storage Facility Characteristics

To indicate the physical characteristics of any storage facility or area

TRANSACTION SETS USED IN

127

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1241	Facility Characteristic Code Qualifier	1	M	ID	1/1
02	1240	Facility Characteristic Code	1	M	ID	1/2

SG - Shipment Status

To convey the status of a shipment

TRANSACTION SETS USED IN
109 315

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	157	Shipment Status Code	1	X	ID	1/2
02	641	Status Reason Code	1	X	ID	3/3
03	35	Bill of Lading Disposition Code	1	X	ID	2/3
04	373	Date	1	O	DT	8/8
05	337	Time	1	X	TM	4/8
06	623	Time Code	1	O	ID	2/2

Syntax Notes

01	R010203
06	C0605

SHD - Shipment Detail

To indicate shipment details in terms of quantity, weight, and routing instructions related to credit or debit of returned product

TRANSACTION SETS USED IN
812

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	382	Number of Units Shipped	1	X	R	1/10
02	413	Quantity Received	1	X	R	1/7
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2
04	81	Weight	1	X	R	1/10
05	355	Unit or Basis for Measurement Code	1	X	ID	2/2
06	183	Volume	1	X	R	1/8
07	355	Unit or Basis for Measurement Code	1	X	ID	2/2
08	398	Order Sizing Factor	1	O	R	1/10
09	417	Price Bracket Identifier	1	O	AN	1/3
10	91	Transportation Method/Type Code	1	O	ID	1/2
11	140	Standard Carrier Alpha Code	1	O	ID	2/4
12	368	Shipment/Order Status Code	1	O	ID	2/2
13	128	Reference Identification Qualifier	1	O	ID	2/3
14	127	Reference Identification	1	X	AN	1/80

Syntax Notes

01	R0102
01	C0103
02	C0203
04	P0405
06	P0607
13	C1314

Comments

13	SHD13 and SHD14 are used to identify pertinent numbers associated with shipment detail.

SHI - Security Holding Information

To specify information concerning securities held by an entity

TRANSACTION SETS USED IN

103

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	125	Security Holding Type Code	1	M	ID	1/2
02	93	Name	1	X/Z	AN	1/60
03	127	Reference Identification	1	X/Z	AN	1/80
04	521	Product Transfer Type Code	1	O/Z	ID	2/2
05	546	Status Code	1	O	ID	2/2

Syntax Notes

02 R0203

Semantic Notes

02 SHI02 contains the descriptive name of the security.

03 SHI03 contains the Committee for Uniform Securities Identification Procedures (CUSIP) identifier.

04 SHI04 contains the method that will be used to transfer ownership of the security.

SHP - Shipped/Received Information

To specify shipment and/or receipt information

TRANSACTION SETS USED IN
830 845 847 862

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	673	Quantity Qualifier	1	O	ID	2/2
02	380	Quantity	1	X	R	1/15
03	374	Date/Time Qualifier	1	X	ID	3/3
04	373	Date	1	X/Z	DT	8/8
05	337	Time	1	X	TM	4/8
06	373	Date	1	O/Z	DT	8/8
07	337	Time	1	O	TM	4/8

Syntax Notes

01	C0102
03	L030405
04	C0403
05	C0503

Semantic Notes

04	SHP04 is the date shipped, delivered, received, or the cumulative quantity start date (as qualified by SHP03).
06	SHP06 is the cumulative quantity end date.

Comments

00	The SHP segment is used to communicate shipment, delivery, or receipt information and may include discrete or cumulative quantities, dates, and times.
01	If SHP01 equals "02", "07", "08", "09", or "10" (indicating cumulative quantities), then SHP04 and SHP06 are required to identify the start and end dates of the quantity count.

SHR - Railroad Interline Service Special Handling Restrictions

To identify the special handling codes that apply to a shipment

TRANSACTION SETS USED IN

453

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	152	Special Handling Code	1	O	ID	2/3

Semantic Notes

01 If SHR01 is "Y", special handling is included. If "N", then special handling is excluded.

SI - Service Characteristic Identification

To specify service characteristic data

TRANSACTION SETS USED IN

100 187 206 267 272 811 832 836 840 843 850 855 860 865

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	559	Agency Qualifier Code	1	M	ID	2/2
02	1000	Service Characteristics Qualifier	1	M	AN	2/3
03	234	Product/Service ID	1	M	AN	1/80
04	1000	Service Characteristics Qualifier	1	X	AN	2/3
05	234	Product/Service ID	1	X	AN	1/80
06	1000	Service Characteristics Qualifier	1	X	AN	2/3
07	234	Product/Service ID	1	X	AN	1/80
08	1000	Service Characteristics Qualifier	1	X	AN	2/3
09	234	Product/Service ID	1	X	AN	1/80
10	1000	Service Characteristics Qualifier	1	X	AN	2/3
11	234	Product/Service ID	1	X	AN	1/80
12	1000	Service Characteristics Qualifier	1	X	AN	2/3
13	234	Product/Service ID	1	X	AN	1/80
14	1000	Service Characteristics Qualifier	1	X	AN	2/3
15	234	Product/Service ID	1	X	AN	1/80
16	1000	Service Characteristics Qualifier	1	X	AN	2/3
17	234	Product/Service ID	1	X	AN	1/80
18	1000	Service Characteristics Qualifier	1	X	AN	2/3
19	234	Product/Service ID	1	X	AN	1/80
20	1000	Service Characteristics Qualifier	1	X	AN	2/3
21	234	Product/Service ID	1	X	AN	1/80

Syntax Notes

04	P0405
06	P0607
08	P0809
10	P1011
12	P1213
14	P1415
16	P1617
18	P1819
20	P2021

Comments

01	SI01 defines the source for each of the service characteristics qualifiers.

SID - Standard Transportation Commodity Code Identification

To convey the Standard Transportation Commodity Code (STCC) and associated descriptions

TRANSACTION SETS USED IN
435 437

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	23	Commodity Code Qualifier	1	M	ID	1/2
02	22	Commodity Code	1	M	AN	1/30
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
04	373	Date	1	O/Z	DT	8/8
05	708	Rating Summary Value Code	1	O/Z	ID	1/2
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

03 If SID03 is "Y", then this is a deregulated commodity. If "N" this is not a deregulated commodity.

04 SID04 is the deregulation date.

05 SID05 is the grade to which the car must be downgraded for that commodity.

06 If SID06 is "Y", then this commodity code is valid for a U.S. to Canada move. If "N", then this commodity code is for a Canada to U.S. move.

SII - Sales Item Information

To specify line item information related to a sale of an item

TRANSACTION SETS USED IN
844 867

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	235	Product/Service ID Qualifier	1	M	ID	2/2
02	234	Product/Service ID	1	M	AN	1/80
03	380	Quantity	1	M/Z	R	1/15
04	C001	Composite Unit of Measure	1	M		
05	212	Unit Price	1	O/Z	R	1/17
06	212	Unit Price	1	O/Z	R	1/17
07	782	Monetary Amount	1	O/Z	R	1/18

Semantic Notes

03 SII03 is the amount of the product identified in SII01 and SII02.
05 SII05 is the wholesale acquisition price.
06 SII06 is the contract price.
07 SII07 is the extended rebate amount.

SIN - Substance Use

To report use of tobacco, alcohol, drugs or other substances

TRANSACTION SETS USED IN
186 267

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1201	Information Status Code	1	M	ID	1/1
02	1594	Controlled Substance Type Code	1	X	ID	2/2
03	933	Free-form Message Text	1	X/Z	AN	1/264
04	594	Frequency Code	1	X	ID	1/1
05	380	Quantity	1	X/Z	R	1/15
06	C001	Composite Unit of Measure	1	X		

Syntax Notes

02 R0203
04 P040506

Semantic Notes

03 SIN03 is the actual response to further identify exact substance used.
05 SIN05 indicates the quantity of substance used.

SL1 - Tariff Details

To reference details of the tariff used to arrive at applicable rates or charges for customer-requested service

TRANSACTION SETS USED IN

104 110 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	284	Service Level Code	1	M/Z	ID	2/2
02	171	Tariff Number	1	O	AN	1/7
03	22	Commodity Code	1	X	AN	1/30
04	320	Scale	1	X	AN	1/10
05	373	Date	1	O/Z	DT	8/8
06	284	Service Level Code	1	O/Z	ID	2/2
07	146	Shipment Method of Payment Code	1	O	ID	2/2
08	982	Data Source Code	1	O	ID	2/2
09	210	International/Domestic Code	1	O	ID	1/1

Syntax Notes

03 R0304

Semantic Notes

01 SL101 is the service requested by the customer.

05 SL105 is the effective date.

06 SL106 is the service provided by the carrier.

Comments

00 Scale and commodity codes are proprietary codes maintained by the carrier.

SLA - School Accreditation and Licensing

To provide educational institution accreditation, affiliation, and licensing information

TRANSACTION SETS USED IN

133

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1270	Code List Qualifier Code	1	M/Z	ID	1/3
02	1271	Industry Code	1	M	AN	1/30
03	83	Code For Licensing, Certification, Registration, or Accreditation Agency	1	O	ID	1/2
04	1250	Date Time Period Format Qualifier	1	X/Z	ID	2/3
05	1251	Date Time Period	1	X	AN	1/35
06	1270	Code List Qualifier Code	1	X/Z	ID	1/3
07	1271	Industry Code	1	X	AN	1/30
08	156	State or Province Code	1	X/Z	ID	2/2

Syntax Notes

04 P0405

06 P0607

08 E0806

Semantic Notes

01 SLA01 and SLA02 identify the code source and the industry code for the accreditation, affiliation, or licensing level.

04 SLA04 and SLA05 identify the period of time associated with the accreditation.

06 SLA06 and SLA07 identify the code source and the industry code for the accreditation or licensing type.

08 SLA08 identifies the state that issued the accreditation.

SLI - Specific Loan Information

To provide information for the loan under consideration

TRANSACTION SETS USED IN
191

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1262	Loan Type Code	1	M	ID	1/2
02	782	Monetary Amount	1	M/Z	R	1/18
03	782	Monetary Amount	1	M/Z	R	1/18
04	953	Interest Rate	1	M	R	1/6
05	1086	Loan Rate Type Code	1	M	ID	1/1
06	1250	Date Time Period Format Qualifier	1	M	ID	2/3
07	1251	Date Time Period	1	M/Z	AN	1/35
08	127	Reference Identification	1	O/Z	AN	1/80
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
10	1250	Date Time Period Format Qualifier	1	X	ID	2/3
11	1251	Date Time Period	1	X/Z	AN	1/35
12	1250	Date Time Period Format Qualifier	1	X	ID	2/3
13	1251	Date Time Period	1	X/Z	AN	1/35
14	782	Monetary Amount	1	O/Z	R	1/18
15	380	Quantity	1	O/Z	R	1/15
16	380	Quantity	1	O/Z	R	1/15
17	380	Quantity	1	O/Z	R	1/15
18	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
19	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
20	1250	Date Time Period Format Qualifier	1	X	ID	2/3
21	1251	Date Time Period	1	X/Z	AN	1/35
22	107	Payment Method Type Code	1	O	ID	1/2

Syntax Notes

10 P1011
12 P1213
20 P2021

Semantic Notes

02 SLI02 is the requested loan amount.
03 SLI03 is the total lender loan amount approved.
07 SLI07 is the loan period date range.
08 SLI08 is the lender loan identifier.
09 SLI09 indicates if the loan is subsidized. A "Y" indicates that it is subsidized; an "N" indicates it is not subsidized.
11 SLI11 is the repayment begin date.
13 SLI13 is the first payment date.

14 SLI14 is the first payment amount.

15 SLI15 is the number of monthly payments.

16 SLI16 is the number of grace months.

17 SLI17 is the number of capitalization months.

18 SLI18 indicates whether this loan is to be combined with other loans. A "Y" indicates that it is; an "N" indicates that it is not.

19 SLI19 indicates whether this loan has been authorized for EFT disbursement. A "Y" indicates that it has been authorized for EFT disbursement; an "N" indicates that it has not.

21 SLI21 is the borrower requested loan period.

SLN - Subline Item Detail

To specify product subline detail item data

TRANSACTION SETS USED IN

11	P1112

13 P1314
15 P1516
17 P1718
19 P1920
21 P2122
23 P2324
25 P2526
27 P2728

Semantic Notes

01 SLN01 is the identifying number for the subline item.

02 SLN02 is the identifying number for the subline level. The subline level is analogous to the level code used in a bill of materials.

03 SLN03 is the configuration code indicating the relationship of the subline item to the baseline item.

08 SLN08 is a code indicating the relationship of the price or amount to the associated segment.

Comments

00 See the Data Element Dictionary for a complete list of IDs.

01 SLN01 is related to (but not necessarily equivalent to) the baseline item number. Example: 1.1 or 1A might be used as a subline number to relate to baseline number 1.

09 SLN09 through SLN28 provide for ten different product/service IDs for each item. For example: Case, Color, Drawing No., ISBN No., Model No., or SKU.

SLS - Sales Parameters

To specify parameters pertaining to sales measurements.

TRANSACTION SETS USED IN

892

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	738	Measurement Qualifier	1	M	ID	1/3
02	100	Currency Code	1	X	ID	3/3
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2

Syntax Notes

02	E0203

SLV - Service Level

To identify the parameters related to service level performance measures.

TRANSACTION SETS USED IN

892

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	355	Unit or Basis for Measurement Code	1	M/Z	ID	2/2
02	673	Quantity Qualifier	1	M/Z	ID	2/2

Semantic Notes

01 SLV01 identifies the basis for determining a service level.

02 SLV02 identifies the service level measurement type.

SMA - Station Address

To identify the specific postal address information for each of the various categories of mailing requirements for a station

TRANSACTION SETS USED IN

None

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	852	Address Type Code	1	M	ID	1/1
02	166	Address Information	1	M	AN	1/55
03	19	City Name	1	M	AN	2/30
04	156	State or Province Code	1	M	ID	2/2
05	116	Postal Code	1	M	ID	3/15

SMB - Beginning Segment for Railroad Station Master File

To identify the type of transaction update and type of station

TRANSACTION SETS USED IN
431

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	813	Station Type Code	1	M	ID	1/1
03	154	Standard Point Location Code	1	M	ID	6/9
04	813	Station Type Code	1	O	ID	1/1
05	813	Station Type Code	1	O	ID	1/1
06	813	Station Type Code	1	O	ID	1/1
07	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
08	638	Rule 260 Junction Code	1	O	ID	1/5
09	813	Station Type Code	1	O	ID	1/1
10	546	Status Code	1	O	ID	2/2

Semantic Notes

07 SMB07 indicates if the station is embargoed. A "Y" indicates the station is embargoed; an "N" indicates it is not.

Comments

00 The acceptable code values for DE 353 are "02", "03", and "04".

03 SMB03 is required except when the carrier is adding a new station in the update transaction to the AAR.

04 SMB04, SMB05, SMB06 and SMB09 are needed to support the situations where a station can be more than a single type.

SMD - Consolidated Shipment Manifest Data

To transmit shipment manifest data

TRANSACTION SETS USED IN

215 404 417 754

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	284	Service Level Code	1	M	ID	2/2
02	146	Shipment Method of Payment Code	1	M	ID	2/2
03	108	Pickup or Delivery Code	1	O	ID	1/2

SMO - Operational Services

To identify the specific railroad operating facilities and characteristics for the station in the transaction

TRANSACTION SETS USED IN

431

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	253	Automobile Ramp Facility Code	1	O	ID	1/1
02	321	Intermodal Facility Code	1	O	ID	1/1
03	1073	Yes/No Condition or Response Code	1	O	ID	1/1
04	1073	Yes/No Condition or Response Code	1	O	ID	1/1
05	81	Weight	1	O/Z	R	1/10
06	511	Rail Car Plate Size Code	1	O/Z	ID	1/1
07	512	Import/Export Code	1	O	ID	1/1

Semantic Notes

05 SMO05 is the gross weight of a shipment expressed in pounds, that is, the maximum weight that can be handled at this station.

06 SMO06 is the rail car scale drawing plate identification code that identifies the maximum size dimension of a rail car that can be handled at this station.

Comments

03 SMO03 data content interpretation, "Y" means grain inspection capability does exist and "N" means grain inspection capability no longer exists. Use "Y" to turn the function on and "N" to turn the function off.

04 SMO04 data content interpretation, "Y" means customs inspection capability does exist" and "N" means customs inspection capability no longer exists. Use "Y" to turn the function on and "N" to turn the function off.

SMR - Cross Reference

To identify the specific station that indicates the switching district for a given railroad terminal or the specific station used to identify a geographical location as a rate base location

TRANSACTION SETS USED IN

431

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	309	Location Qualifier	1	M	ID	1/2
02	154	Standard Point Location Code	1	X	ID	6/9
03	19	City Name	1	X	AN	2/30
04	156	State or Province Code	1	X	ID	2/2

Syntax Notes

02	R0203
03	P0304

SMS - Station Codes Segment

To identify the specific railroad carrier codes associated with the station

TRANSACTION SETS USED IN
431 433

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	573	Freight Station Accounting Code	1	M	ID	1/5
03	638	Rule 260 Junction Code	1	O	ID	1/5
04	116	Postal Code	1	O	ID	3/15
05	674	Reciprocal Switch Code	1	O	ID	1/1
06	623	Time Code	1	X/Z	ID	2/2
07	310	Location Identifier	1	X/Z	AN	1/30
08	310	Location Identifier	1	X/Z	AN	1/30
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
10	67	Identification Code	1	O/Z	AN	2/80
11	1073	Yes/No Condition or Response Code	1	X/Z	ID	1/1
12	140	Standard Carrier Alpha Code	1	X/Z	ID	2/4
13	573	Freight Station Accounting Code	1	X/Z	ID	1/5

Syntax Notes

06	P0611
07	P0708
12	P1213

Semantic Notes

06	SMS06 is the time zone of the station.
07	SMS07 is the latitude of the station.
08	SMS08 is the longitude of the station.
09	SMS09 indicates if the station is physically served. A "Y" indicates the station is physically served; an "N" indicates the station is not physically served.
10	SMS10 is the Association of American Railroads 3-3-3 station name code.
11	SMS11 indicates if daylight savings time applies. A "Y" indicates daylight savings time applies; an "N" indicates that daylight savings time does not apply.
12	SMS12 is the new Standard Carrier Alpha Code of the expired Standard Carrier Alpha Code shown in SMS01.
12	When SMS12 and SMS13 are used, SMB01 must be 56 (Expiration Notification).
13	SMS13 is the new Freight Station Accounting Code of the expired Freight Station Accounting Code shown in SMS02.

Comments

04	SMS04 is the zip code assigned to the rail station for rating purposes. It is not meant to be the mailing address postal code.

SN1 - Item Detail (Shipment)

To specify line-item detail relative to shipment

TRANSACTION SETS USED IN
325 754 856 857 861

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	O/Z	AN	1/20
02	382	Number of Units Shipped	1	M	R	1/10
03	355	Unit or Basis for Measurement Code	1	M	ID	2/2
04	646	Quantity Shipped to Date	1	O	R	1/15
05	380	Quantity	1	X/Z	R	1/15
06	355	Unit or Basis for Measurement Code	1	X	ID	2/2
07	728	Returnable Container Load Make-Up Code	1	O	ID	1/2
08	668	Line Item Status Code	1	O	ID	2/2

Syntax Notes

05 P0506

Semantic Notes

01 SN101 is the ship notice line-item identification.
05 SN105 is quantity ordered.

Comments

03 SN103 defines the unit of measurement for both SN102 and SN104.

SOI - Source of Income

To define the source and related information about the income being reported

TRANSACTION SETS USED IN

200 267

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1186	Type of Income Code	1	M	ID	2/2
02	1250	Date Time Period Format Qualifier	1	X	ID	2/3
03	1251	Date Time Period	1	X/Z	AN	1/35
04	1470	Number	1	O/Z	N0	1/9
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

02 P0203

Semantic Notes

03 SOI03 states the dates of the income identified.

04 SOI04 states the number of months of the income identified.

05 SOI05 indicates whether income has been verified. A "Y" indicates the income has been verified; an "N" indicates income has not been verified.

SOM - Status of Mortgage

To provide information on the status of a mortgage and the date actions were taken regarding the loan and the property

TRANSACTION SETS USED IN
201 205 264

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1307	Loan Status Code	1	M/Z	ID	1/2
02	1250	Date Time Period Format Qualifier	1	M/Z	ID	2/3
03	1251	Date Time Period	1	M	AN	1/35
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
05	104	Type of Bankruptcy Code	1	X/Z	ID	1/1
06	373	Date	1	X/Z	DT	8/8
07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
08	1307	Loan Status Code	1	O/Z	ID	1/2
09	1250	Date Time Period Format Qualifier	1	X/Z	ID	2/3
10	1251	Date Time Period	1	X	AN	1/35
11	1307	Loan Status Code	1	O	ID	1/2
12	1250	Date Time Period Format Qualifier	1	X	ID	2/3
13	1251	Date Time Period	1	X	AN	1/35

Syntax Notes

05	P0506
09	P0910
12	P1213

Semantic Notes

01	SOM01 indicates the status of a mortgage. For example, "01" indicates the mortgage is delinquent.
02	SOM02 and SOM03 indicate the date of the action taken towards the mortgage.
04	SOM04 indicates if bankruptcy has been filed by the mortgagor or the co-mortgagor. A "Y" indicates that bankruptcy has been filed; an "N" indicates that it has not been filed.
05	SOM05 indicates the type of bankruptcy that was filed. For example, "2" indicates Chapter 11 bankruptcy has been filed by the principal mortgagor or the co-mortgagor.
06	SOM06 provides the bankruptcy filing date.
07	SOM07 indicates if a forbearance plan has been accepted. A "Y" indicates that a forbearance plan has been accepted; an "N" indicates that is has not been accepted.
07	If SOM07 is "Y", then SOM11 is required.
08	SOM08 and SOM11 indicate the additional actions taken towards the mortgage.
09	SOM09 through SOM10 and SOM12 through SOM13 provide the dates of the additional actions in SOM08 and SOM11.

SP - Special Program

To provide the receiving educational institution or agency with information concerning the student's participation in special education programs or other programs and services

TRANSACTION SETS USED IN

130 133

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1257	Special Program Category Code	1	X/Z	ID	1/2
02	954	Percentage as Decimal	1	O/Z	R	1/10
03	1133	Program Participation and Services Code	1	X	ID	1/2
04	1134	Institutional Governance or Funding Source Level Code	1	O	ID	1/1
05	93	Name	1	O/Z	AN	1/60

Syntax Notes

01	R0103

Semantic Notes

01	SP01 is the type of special program category in which a student may participate.
02	SP02 is defined as the percent of time mainstreamed.
05	SP05 is the name of the specific program or service.

SPA - Status of Product or Activity

To indicate the details and status of a product or product activity

TRANSACTION SETS USED IN
100 101 111 252 267 268 273

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	546	Status Code	1	M	ID	2/2
02	1250	Date Time Period Format Qualifier	1	X	ID	2/3
03	1251	Date Time Period	1	X	AN	1/35
04	522	Amount Qualifier Code	1	X	ID	1/3
05	782	Monetary Amount	1	X	R	1/18

07	641	Status Reason Code	1	O	ID	3/3
08	641	Status Reason Code	1	O	ID	3/3
09	559	Agency Qualifier Code	1	X	ID	2/2
10	751	Product Description Code	1	X/Z	AN	1/12
11	822	Source Subqualifier	1	O/Z	AN	1/15

Syntax Notes

02	P0203
04	P0405
09	P0910

Semantic Notes

10	SPA10 identifies the portion of the product or service being reported.
11	SPA11 specifies the individual code list of the agency specified in SPA09.

SPE - Security Protocol Error

To report security protocol errors in a security structure

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

993

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	824	Security Originator Name	1	M	AN	1/64

14	1401	Proposal Data Detail Identifier Code	1	O	ID	1/3
15	1005	Hierarchical Structure Code	1	O	ID	4/4

Syntax Notes

02 P0203

SPK - Specimen Kit Information

To identify and describe laboratory specimen kit information and handling requirements

TRANSACTION SETS USED IN
186

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1415	Specimen Kit Type Code	1	M/Z	ID	1/4
02	91	Transportation Method/Type Code	1	O/Z	ID	1/2
03	408	Temperature	1	O/Z	R	1/4
04	66	Identification Code Qualifier	1	X	ID	1/2
05	67	Identification Code	1	X	AN	2/80

Syntax Notes

04 P0405

Semantic Notes

01 SPK01 describes the specimen kit or contents.
02 SPK02 is the method of shipment to the lab.
03 SPK03 is the urine specimen temperature at time of collection expressed as Fahrenheit.

SPR - Supplier Rating

To convey a rating value or score of a trading partner

TRANSACTION SETS USED IN
155 285 501 838 885

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	707	Rating Category Code	1	X/Z	ID	2/2
02	739	Measurement Value	1	X	R	1/20
03	740	Range Minimum	1	X	R	1/20
04	741	Range Maximum	1	O	R	1/20
05	708	Rating Summary Value Code	1	X	ID	1/2
06	352	Description	1	O	AN	1/80
07	739	Measurement Value	1	X/Z	R	1/20
08	1201	Information Status Code	1	O	ID	1/1
09	344	Unit of Time Period or Interval Code	1	O/Z	ID	2/2

Syntax Notes

02 R02030507
07 C0701
09 C0901

Semantic Notes

01 SPR01 qualifies the content of both SPR02 and SPR07.
07 SPR07 is the industry average rating for the category indicated in SPR01.
09 SPR09 indicates the time period or interval of the rating category specified in SPR01.

Comments

03 SPR03 is the low end of the scale. SPR04 is the high end of the scale.
06 SPR06 is used to describe the rating company.

SPS - Sampling Parameters for Summary Statistics

To define the sampling parameters associated with summary statistics

TRANSACTION SETS USED IN
841 842 863

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	609	Count	1	O/Z	N0	1/9
02	609	Count	1	O/Z	N0	1/9
03	609	Count	1	O/Z	N0	1/9
04	949	Confidence Limit	1	O	R	1/4
05	C001	Composite Unit of Measure	1	X		
06	942	Sample Frequency Value per Unit of Measurement Code	1	X	N0	1/9

Syntax Notes

05 P0506

Semantic Notes

01 SPS01 is the population size (count) of the class of objects or events to which the statistical generalizations refer.

02 SPS02 is the sample size, which is the number of observations on which the reported summary statistics were based.

03 SPS03 is the subgroup size, which is the number of observations in a subgroup of a sample.

SPT - Spirit and Liqueur Information

To specify spirit type, style and related characteristics

TRANSACTION SETS USED IN
832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1823	Spirit Type Code	1	M	ID	2/3
02	1824	Spirit Style	1	O	ID	2/3
03	1825	Color	1	O/Z	ID	2/3
04	1826	Liqueur Flavor	1	O/Z	ID	2/2
05	C075	Composite Added Flavor	1	O		
06	1828	Distilled From Spirit Type	1	O	ID	2/2
07	1829	Whiskey Production Type	1	O	ID	2/2
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

03 SPT03 indicates the spirit color
04 SPT04 indicates the spirit liqueur flavor
08 SPT08 indicates if the beverage is a Cream Based Liqueur

SPY - Scope of Power of Attorney

To identify the scope of a power of attorney

TRANSACTION SETS USED IN

157

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	306	Action Code	1	M	ID	1/2
02	999	Scope of Power of Attorney Identification Code	1	O	ID	1/2
03	352	Description	1	O/Z	AN	1/80

Semantic Notes

03 SPY03 contains additional information necessary to specify the scope of power of attorney, such as a form number.

SR - Requested Service Schedule

To identify requested service schedules

TRANSACTION SETS USED IN
453 810

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	O/Z	AN	1/20
02	1430	Day Rotation	1	O	AN	1/7
03	337	Time	1	X	TM	4/8
04	337	Time	1	O	TM	4/8
05	3	Free-form Message	1	O	AN	1/60
06	212	Unit Price	1	O	R	1/17
07	380	Quantity	1	O	R	1/15
08	373	Date	1	X	DT	8/8
09	373	Date	1	O	DT	8/8
10	234	Product/Service ID	1	O	AN	1/80
11	234	Product/Service ID	1	O	AN	1/80

Syntax Notes

04 C0403
09 C0908

Semantic Notes

01 SR01 contains the same line number shown in the IT1 segment, to which data contained in the SR segment refers.

Comments

03 SR03 defines the start time of the advertising promotion.
04 SR04 defines the end time of the advertising promotion.
05 SR05 is used to describe the advertising schedule details in literal form.
07 SR07 is used to provide the number of scheduled commercial spots to be run.
08 SR08 defines the start date of the advertising promotion.
09 SR09 defines the end date of the advertising promotion.
10 SR10 defines the seller's plan code.
11 SR11 defines the buyer's advertising package code.

SRE - Test Scores

To provide scores on tests that a student has taken

TRANSACTION SETS USED IN
130 138 189 252 284 285

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1160	Test Score Qualifier Code	1	M	ID	1/1
02	352	Description	1	M/Z	AN	1/80

Semantic Notes

02 SRE02 is the value of the score that the student received on an academic test or subtest.

SS - Docket Control Status

To specify information about rate level and rate docket independence

TRANSACTION SETS USED IN
460 494

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	X/Z	DT	8/8
02	500	Rate Level	1	X/Z	AN	1/5
03	698	Rate Distribution Code	1	M	ID	1/1
04	695	Independence Code	1	O	ID	1/1
05	373	Date	1	O	DT	8/8
06	373	Date	1	O	DT	8/8
07	616	Number of Periods	1	O	N0	1/3
08	373	Date	1	O	DT	8/8
09	437	Rate Maintenance Authority Code	1	O	ID	1/1

Syntax Notes

01 P0102

Semantic Notes

01 SS01 is the effective date of specific rate level.
02 SS02 is the level to which adjustment, if any, will be applied.

Comments

05 SS05 is the independence trigger date.
06 SS06 is the date on or after which applicable RCCR increases shall be applied.
08 SS08 is the date on or after which selective increases can be applied.

SSC - Beginning Segment for Service Commitment Advice

To transmit identifying numbers, dates, and other basic data relating to the transaction set

TRANSACTION SETS USED IN
453

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	127	Reference Identification	1	M/Z	AN	1/80
03	1250	Date Time Period Format Qualifier	1	M	ID	2/3
04	1251	Date Time Period	1	M	AN	1/35
05	67	Identification Code	1	M/Z	AN	2/80
06	1485	Service Commitment Type Code	1	M	ID	1/1
07	322	Load/Empty Status Code	1	M	ID	1/1
08	488	Percent, Integer Format	1	O/Z	N0	1/3

Semantic Notes

02 SSC02 is used to convey the Interline Service Management Service Commitment ID code.

05 SSC05 should contain the sponsor's customer ID number in DUNS format.

08 SSC08 should contain the service goal expressed as a percentage of shipments delivered within committed times of arrival.

SSD - Shipment Sort Segregate Data

To supply shipment sort segregate data and related shipment identification numbers

TRANSACTION SETS USED IN

250

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	O/Z	AN	1/80
02	127	Reference Identification	1	O/Z	AN	1/80
03	324	Purchase Order Number	1	X	AN	1/22
04	647	Application Error Condition Code	1	O/Z	ID	1/3

Syntax Notes

04	C0403

Semantic Notes

01	SSD01 is the PRO number assigned by the carrier.
02	SSD02 is the sort segregate code assigned by the consignee.
04	SSD04 indicates the error associated with the data in SSD03.

SSE - Entry and Exit Information

To provide information concerning the entry into or withdrawal from a school, school program, school district, or postsecondary institution

TRANSACTION SETS USED IN
130 138 146 189

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	O/Z	DT	8/8
02	373	Date	1	O/Z	DT	8/8
03	641	Status Reason Code	1	O/Z	ID	3/3
04	1470	Number	1	O/Z	N0	1/9
05	641	Status Reason Code	1	O/Z	ID	3/3

Semantic Notes

01 SSE01 refers to the entry date of the student in a school, school district, or school program.

02 SSE02 refers to the exit date of the student in a school, school district, or school program.

03 SSE03 refers to the reason why the student entered or left the school, school district, or school program.

04 SSE04 refers to the priority of choice for an intended entry into a school, school program, school district, or postsecondary institution.

05 SES05 refers to the enrollment status of the student.

SSS - Product Special Services

To specify special conditions or services associated with the purchased product

TRANSACTION SETS USED IN
140 142 844 845 849

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	248	Allowance or Charge Indicator Code	1	M	ID	1/1
02	559	Agency Qualifier Code	1	M	ID	2/2
03	560	Special Services Code	1	M	ID	2/10
04	561	Service Marks and Numbers	1	O	AN	1/45
05	359	Allowance or Charge Rate	1	O	R	1/15
06	610	Amount	1	O/Z	N2	1/15
07	352	Description	1	O	AN	1/80
08	380	Quantity	1	O	R	1/15
09	822	Source Subqualifier	1	O	AN	1/15

Semantic Notes

06 SSS06 indicates the total dollar amount for the allowance or charge.

Comments

02 SSS02 identifies the source of the code value in SSS03.
07 SSS07 (description) is normally used to clarify or expand on the services to be provided.
09 SSS09 specifies the individual code list of the agency specified in SSS02.

SST - Student Academic Status

To provide information concerning the student's eligibility to return to the reporting institution, enrollment status, residency for fee purposes, and date and type or status of high school graduation

TRANSACTION SETS USED IN
130 138 146 189 190

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	641	Status Reason Code	1	O/Z	ID	3/3
02	1250	Date Time Period Format Qualifier	1	X	ID	2/3
03	1251	Date Time Period	1	X/Z	AN	1/35
04	641	Status Reason Code	1	O/Z	ID	3/3
05	1250	Date Time Period Format Qualifier	1	X	ID	2/3
06	1251	Date Time Period	1	X/Z	AN	1/35
07	641	Status Reason Code	1	O/Z	ID	3/3
08	1131	Level of Individual, Test, or Course Code	1	O/Z	ID	2/2
09	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

02 P0203
05 P0506

Semantic Notes

01 SST01 refers to the type of high school diploma or certificate the student was awarded, if applicable.
03 SST03 is the date of high school graduation.
04 SST04 indicates if the student is in good standing at the school and is eligible to return. If not eligible to return, the code indicates the reason for this ineligibility to return to this institution.
06 SST06 refers to the date the student is eligible to return.
07 SST07 indicates if the student is currently enrolled at the institution and how the courses for which the student is enrolled are contained in the transaction set.
08 SST08 indicates the grade level of the student at the institution.
09 SST09 refers to the legal residence of the student for fee purposes. A "Y" indicates that the student has been coded as a legal resident of the state for fee purposes; an "N" indicates that the student has been coded as a nonresident of the state for fee purposes.

ST - Transaction Set Header

To indicate the start of a transaction set and to assign a control number

CONTROL SEGMENT

TRANSACTION SETS USED IN

100 101 102 103 104 105 106 107 108 109 110 111 112 113 120 121 124 125 126 127 128 129 130 131

945 947 980 990 993 996 997 998 999

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	143	Transaction Set Identifier Code	1	M/Z	ID	3/3
02	329	Transaction Set Control Number	1	M	AN	4/9
03	1705	Implementation Convention Reference	1	O/Z	AN	1/35

Semantic Notes

01 The transaction set identifier (ST01) is used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).

03 The implementation convention reference (ST03) is used by the translation routines of the interchange partners to select the appropriate implementation convention to match the transaction set definition. When used, this implementation convention reference takes precedence over the implementation reference specified in the GS08.

STA - Statistics

To provide summary statistics related to a specific collection of test result values

TRANSACTION SETS USED IN

285 841 842 848 863

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	950	Statistic Code	1	M	ID	2/2
02	739	Measurement Value	1	M	R	1/20
03	C001	Composite Unit of Measure	1	O		
04	738	Measurement Qualifier	1	O	ID	1/3
05	737	Measurement Reference ID Code	1	O	ID	2/2
06	740	Range Minimum	1	O	R	1/20
07	741	Range Maximum	1	O	R	1/20
08	935	Measurement Significance Code	1	O	ID	2/2

STC - Status Information

To report the status, required action, and paid information of a claim or service line

TRANSACTION SETS USED IN
248 275 277

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C043	Health Care Claim Status	1	M		
02	373	Date	1	O/Z	DT	8/8
03	306	Action Code	1	O	ID	1/2
04	782	Monetary Amount	1	O/Z	R	1/18

09	429	Check Number	1	O	AN	1/16
10	C043	Health Care Claim Status	1	O		
11	C043	Health Care Claim Status	1	O		
12	933	Free-form Message Text	1	O/Z	AN	1/264
13	1383	Claim Submission Reason Code	1	O	ID	2/2

Semantic Notes

02 STC02 is the effective date of the status information.
04 STC04 is the total charge amount.
05 STC05 is the amount paid.
06 STC06 is the paid date.
08 STC08 is the check issue date.
12 STC12 allows additional free-form status information.

STP - Study Parameters

To report study parameters

TRANSACTION SETS USED IN
249

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	M/Z	DT	8/8
02	790	Entity Title	1	M/Z	AN	1/132
03	127	Reference Identification	1	M/Z	AN	1/80
04	127	Reference Identification	1	M/Z	AN	1/80
05	1470	Number	1	M/Z	N0	1/9
06	1470	Number	1	M/Z	N0	1/9
07	1470	Number	1	M/Z	N0	1/9
08	1470	Number	1	O/Z	N0	1/9
09	127	Reference Identification	1	O/Z	AN	1/80

Semantic Notes

01 STP01 is the study date assigned to this study and is the date this data set is considered reported or issued.

02 STP02 contains the study title.

03 STP03 is the identifier assigned to the study by the performing laboratory.

04 STP04 is the identifier assigned to the study by the study submitter.

05 STP05 reports the number of days per week each animal was dosed and must be less than or equal to seven.

06 STP06 reports the number of doses administered per day.

07 STP07 indicates whether the first day on test is reported as day zero or day one.

08 STP08 reports the number of animal(s) housed per cage at the study start.

09 STP09 is the identifier assigned to the study by the receiving party.

STS - Interchange Status Segment

To identify activity taken with an interchange

CONTROL SEGMENT

TRANSACTION SETS USED IN

242

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	I40	Interchange Action Code	1	M	ID	2/2

Syntax Notes

04	C0401
05	C0501
06	C0601
07	P0708
13	P1314

Semantic Notes

03	SUM03 indicates if this is a summary for entire record up to that point in time. A "Y" indicates that this is a cumulative summary of the academic record up to that point; an "N" indicates that this is not a cumulative summary, but is a session.
04	SUM04 refers to credits used to compute grade point average.
05	SUM05 refers to credits attempted.
06	SUM06 refers to credits earned.
07	SUM07 and SUM08 are the lowest and highest, respectively, grade point averages possible under normal conditions.

10 SUM10 indicates if it is possible to have a grade point average higher than the maximum range. A "Y" indicates that it is possible to have a grade point average higher than the maximum range; an "N" indicates that it is not possible.

11 SUM11 refers to the student's position or rank in the class, while SUM12 refers to the total number in the class.

14 SUM14 refers to the date of the class ranking.

15 SUM15 is the days attended.

16 SUM16 is the days absent.

17 SUM17 indicates quality points used to compute the student's grade point average.

SUP - Supplementary Information

To provide processible supplementary information

TRANSACTION SETS USED IN

112 124 187 304

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	749	Supplementary Information Qualifier	1	M	ID	3/3

04	72	Type of Service Offered Code	1	O	ID	1/1

Syntax Notes

02	C0201
03	C0301

Comments

01	SV01 is the service standard qualifier.
02	SV02 is less than truckload service.
03	SV03 is truckload service.

SV1 - Professional Service

To specify the service line item detail for a health care professional

TRANSACTION SETS USED IN
278 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C003	Composite Medical Procedure Identifier	1	M

20	1337	Level of Care Code	1	O	ID	1/1
21	1360	Provider Agreement Code	1	O	ID	1/1

Syntax Notes

03 P0304

Semantic Notes

02 SV102 is the submitted service line item amount.

05 SV105 is the place of service.

06 SV106 is the Service Type (Code Source 958).

07 The first pointer designates the primary diagnosis and remaining diagnosis pointers indicate declining level of importance.

08 SV108 is the independent lab charges.

09 SV109 is the emergency-related indicator; a "Y" value indicates service provided was emergency related; an "N" value indicates service provided was not emergency related.

11 SV111 is early and periodic screen for diagnosis and treatment of children (EPSDT) involvement; a "Y" value indicates EPSDT involvement; an "N" value indicates no EPSDT involvement.

12 SV112 is the family planning involvement indicator. A "Y" value indicates family planning services involvement; an "N" value indicates no family planning services involvement.

17 SV117 is the health care manpower shortage area (HMSA) facility identification.

18 SV118 is the health care manpower shortage area (HMSA) zip code.

19 SV119 is a non-covered service amount.

Comments

13 If SV113 is equal to "L" or "N", then SV114 is required.

SV2 - Institutional Service

To specify the service line item detail for a health care institution

TRANSACTION SETS USED IN
278 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	234	Product/Service ID	1	X/Z	AN	1/80

09	1345	Nursing Home Residential Status Code	1	O	ID	1/1
10	1337	Level of Care Code	1	O	ID	1/1

Syntax Notes

01	R0102
04	P0405

Semantic Notes

01	SV201 is the revenue code.
03	SV203 is the submitted service line item amount.
07	SV207 is a non-covered service amount.
08	SV208 is the detail service line indicator. A "Y" value indicates a detail service line; an "N" value indicates a summary service line.

SV3 - Dental Service

To specify the service line item detail for dental work

TRANSACTION SETS USED IN
278 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C003	Composite Medical Procedure Identifier	1	M

08	1327	Copay Status Code	1	O	ID	1/1
09	1360	Provider Agreement Code	1	O	ID	1/1
10	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
11	1328	Diagnosis Code Pointer	99	O/Z	N0	1/2

Semantic Notes

02 SV302 is the submitted service line item amount.

03 SV303 is the place of service code representing the location where the dental treatment was rendered.

06 SV306 is the number of procedures.

07 SV307 is the reason for replacement.

10 SV310 is the predetermination of benefits indicator. A "Y" value indicates that this service is being submitted for predetermination of benefits.

11 The first pointer designates the primary diagnosis and remaining diagnosis pointers indicate declining level of importance.

SV4 - Drug Service

To specify the claim service detail for prescription drugs

TRANSACTION SETS USED IN
837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	C003	Composite Medical Procedure Identifier	1	O		
03	127	Reference Identification	1	O/Z	AN	1/80

22	1737	Submitted Drug Tax Code	1	O	ID	2/2
23	954	Percentage as Decimal	1	O/Z	R	1/10
24	782	Monetary Amount	1	O/Z	R	1/18
25	1885	Special Packaging Indicator Code	1	O	ID	1/2

Semantic Notes

01 SV401 is a prescription number.

03 SV403 indicates whether the prescription is an original or a subsequent fill. A value of zero indicates an original prescription fill; any other value is the subsequent fill number of an existing prescription.

04 SV404 is the generic indicator. A "Y" value indicates a generic drug; an "N" value indicates a branded drug.

08 SV408 is the drug name.

09 SV409 is the multisource indicator. A "Y" indicates drug is available from more than one manufacturer; an "N" value indicates drug is available from one manufacturer.

10 SV410 is the compound indicator. A "Y" indicates a compound drug; an "N" value indicates a noncompound drug. A "U" value indicates a nonspecified drug compound.

23 SV423 is the submitted drug tax rate used to calculate the submitted drug tax amount.

24 SV424 is the submitted drug tax amount.

SV5 - Durable Medical Equipment Service

To specify the claim service detail for durable medical equipment

TRANSACTION SETS USED IN

837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C003	Composite Medical Procedure Identifier	1	M		
02	355	Unit or Basis for Measurement Code	1	M	ID	2/2
03	380	Quantity	1	M/Z	R	1/15
04	782	Monetary Amount	1	X/Z	R	1/18
05	782	Monetary Amount	1	X/Z	R	1/18
06	594	Frequency Code	1	O/Z	ID	1/1
07	923	Prognosis Code	1	O	ID	1/1

Syntax Notes

04	R0405
06	C0604

Semantic Notes

03	SV503 is the length of medical treatment required.
04	SV504 is the rental price.
05	SV505 is the purchase price.
06	SV506 is the frequency at which the rental equipment is billed.

SV6 - Anesthesia Service

To specify the claim service detail for anesthesia

TRANSACTION SETS USED IN
837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C003	Composite Medical Procedure Identifier	1	M		
02	1332	Facility Code Qualifier	1	X	ID	1/2
03	1331	Facility Code Value	1	X	AN	1/3
04	782	Monetary Amount	1	O/Z	R	1/18
05	1328	Diagnosis Code Pointer	99	O/Z	N0	1/2
06	380	Quantity	1	O/Z	R	1/15
07	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

02 P0203

Semantic Notes

04 SV604 is the submitted charge.

05 The first pointer designates the primary diagnosis and remaining diagnosis pointers indicate declining level of importance.

06 SV606 is the number of anesthesia minutes.

07 SV607 is the Certified Registered Nurse Anesthetist (CRNA) supervision indicator. A "Y" value indicates that services were performed personally by a CRNA who was medically directed by a physician other than the operating surgeon, assistant surgeon, or attending physician; an "N" value indicates that the services were performed personally by a CRNA who was medically directed by the operating surgeon, assistant surgeon, or attending physician.

SV7 - Drug Adjudication

To specify the claim service detail for drug services that have been adjudicated

TRANSACTION SETS USED IN

837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	O/Z	AN	1/80
02	127	Reference Identification	1	O/Z	AN	1/80
03	1355	Prescription Denial Override Code	1	O	ID	2/2
04	1207	Coverage Level Code	1	M/Z	ID	3/3
05	750	Product/Process Characteristic Code	1	M/Z	ID	2/3
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
07	C059	Drug Use Review (DUR)	6	O/Z		

Semantic Notes

01 SV701 is an internal processing identification number.

02 SV702 is the number assigned to the doctor who wrote the prescription.

04 This code is used to indicate or verify the patient's benefit coverage level at the time the claim was adjudicated.

05 SV705 describes the legal status (characteristic) of the drug being dispensed.

06 SV706 is the Drug Utilization Review (DUR) alert indicator. A "Y" indicates a DUR alert was issued; an "N" indicates DUR processing occurred but no alert was issued.

07 Position of data in the repeating data element conveys no significance.

SVA - Security Value

To provide the encoded output of a cryptographic algorithm

CONTROL SEGMENT

TRANSACTION SETS USED IN

993

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1570	Filter ID Code	1	M	ID	3/3
02	799	Version Identifier	1	M	AN	1/30
03	C033	Security Token Value	1	M		

SVC - Service Information

To supply payment and control information to a provider for a particular service

TRANSACTION SETS USED IN
269 275 276 277 835

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C003	Composite Medical Procedure Identifier	1	M/Z		
02	782	Monetary Amount	1	O/Z	R	1/18
03	782	Monetary Amount	1	O/Z	R	1/18
04	234	Product/Service ID	1	O/Z	AN	1/80
05	380	Quantity	1	O/Z	R	1/15
06	C003	Composite Medical Procedure Identifier	1	O/Z		
07	380	Quantity	1	O/Z	R	1/15

Semantic Notes

01 SVC01 is the medical procedure upon which adjudication is based.
02 SVC02 is the submitted service charge.
03 SVC03 is the amount paid this service.
04 SVC04 is the National Uniform Billing Committee Revenue Code.
05 SVC05 is the paid units of service.
06 SVC06 is the original submitted medical procedure.
07 SVC07 is the original submitted units of service.

Comments

01 For Medicare Part A claims, SVC01 would be the Healthcare Common Procedure Coding System (HCPCS) Code (see code source 130) and SVC04 would be the Revenue Code (see code source 132).

SVD - Service Line Adjudication

To convey service line adjudication information for coordination of benefits between the initial payers of a health care claim and all subsequent payers

TRANSACTION SETS USED IN

837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1138	Payer Responsibility Sequence Number Code	1	M/Z	ID	1/1
02	782	Monetary Amount	1	M/Z	R	1/18
03	C003	Composite Medical Procedure Identifier	1	O		
04	234	Product/Service ID	1	O/Z	AN	1/80
05	380	Quantity	1	O/Z	R	1/15
06	554	Assigned Number	1	O	N0	1/9

Semantic Notes

01 SVD01 is the payer identification code.

02 SVD02 is the amount paid for this service line.

04 SVD04 is the revenue code.

05 SVD05 is the paid units of service.

Comments

03 SVD03 represents the medical procedure code upon which adjudication of this service line was based. This may be different than the submitted medical procedure code.

06 SVD06 is only used for bundling of service lines. It references the LX Assigned Number of the service line into which this service line was bundled.

SW - Switching Charges

To transmit codes, descriptions, and values for switching performed

TRANSACTION SETS USED IN

485

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	257	Tariff Application Code	1	M	ID	1/1
02	495	Condition Segment Logical Connector	1	M	AN	1/3
03	498	Condition Code	1	M	ID	4/4
04	499	Condition Value	1	M	AN	1/10
05	140	Standard Carrier Alpha Code	1	O	ID	2/4
06	122	Rate/Value Qualifier	1	O	ID	2/2
07	118	Rate	1	O	R	1/9
08	638	Rule 260 Junction Code	1	O	ID	1/5
09	554	Assigned Number	1	O	N0	1/9

SWC - Switching Conditions

To transmit data relating to the switching service being performed.

TRANSACTION SETS USED IN
424 433

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	405	Switching Settlement Code	1	M	ID	2/2
02	154	Standard Point Location Code	1	M/Z	ID	6/9
03	58	Amount Charged	1	O	N2	1/15
04	154	Standard Point Location Code	1	X/Z	ID	6/9
05	140	Standard Carrier Alpha Code	1	X/Z	ID	2/4

Syntax Notes

04 P0405

Semantic Notes

02 SWC02 is the Standard Point Location Code of the primary received from or delivered to switch location.

04 SWC04 s the Standard Point Location Code of the intermediate received from or delivered to switch location.

05 SWC05 s the Standard Carrier Alpha Code of the carrier the equipment is delivered to or received from in intermediate switch service at the location shown in SWC04.

Comments

03 SWC03 is the total charges for switching services performed at the Standard Point Location Code shown at SWC02.

SWD - Switching Details

To transmit data relating to the details of the switching service being performed.

TRANSACTION SETS USED IN
424

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	76	Invoice Number	1	O	AN	1/22
02	81	Weight	1	O	R	1/10
03	257	Tariff Application Code	1	O	ID	1/1
04	647	Application Error Condition Code	1	O	ID	1/3
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
07	1271	Industry Code	1	O/Z	AN	1/30
08	1470	Number	1	O/Z	N0	1/9
09	1470	Number	1	O/Z	N0	1/9

Semantic Notes

05 If SWD05 is 'Y', then this is a direct switch. If 'N', this is an indirect switch.
06 If SWD06 is 'Y', then 60 or more cars were interchanged at the same time.
07 SWD07 is the AAR Flag Code.
08 SWD08 is the sheet number.
09 SWD09 is the line number.

SWR - Switching Rates

To transmit data relating to the rates for the switching service being performed.

TRANSACTION SETS USED IN
424 433

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	122	Rate/Value Qualifier	1	M	ID	2/2
02	118	Rate	1	M/Z	R	1/9
03	118	Rate	1	M/Z	R	1/9
04	58	Amount Charged	1	M/Z	N2	1/15
05	522	Amount Qualifier Code	1	M	ID	1/3
06	150	Special Charge or Allowance Code	1	M	ID	3/3
07	122	Rate/Value Qualifier	1	O	ID	2/2
08	58	Amount Charged	1	O/Z	N2	1/15

Semantic Notes

02 SWR02 is the minimum charge.
03 SWR03 is the maximum charge.
04 SWR04 is the base charge.
08 SWR08 is the additional charge.

T1 - Transit Inbound Origin

To specify origin point and waybill references of movement to transit waybill point

TRANSACTION SETS USED IN

404 410 417 426

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	M	N0	1/9
02	186	Waybill Number	1	O/Z	N0	1/6
03	373	Date	1	O/Z	DT	8/8
04	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
05	19	City Name	1	X/Z	AN	2/30
06	156	State or Province Code	1	X	ID	2/2
07	154	Standard Point Location Code	1	O	ID	6/9
08	229	Transit Registration Number	1	O	AN	1/6
09	461	Transit Level Code	1	O	ID	1/3
10	128	Reference Identification Qualifier	1	X/Z	ID	2/3
11	127	Reference Identification	1	X	AN	1/80

Syntax Notes

05	P0506
10	P1011

Semantic Notes

00	Related T1, T2, and T3 segments have the same transit sequence number value in the first data element.
02	T102 will contain the inbound shipment waybill numbers.
03	T103 will contain the inbound shipment waybill date.
04	T104 is the Standard Carrier Alpha Code (SCAC) of the origin carrier.
05	T105 is the origin station for movement.
10	T110 and T111 are used on local transit only, to convey the previous Inbound Transit Bill of Lading Number or Shipment Identification Number.

T2 - Transit Inbound Lading

To specify lading description, including weight and rate details applying to the associated T1 segment

TRANSACTION SETS USED IN
404 410 417 426

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	M	N0	1/9
02	79	Lading Description	1	O	AN	1/50
03	81	Weight	1	O/Z	R	1/10
04	187	Weight Qualifier	1	O	ID	1/2
05	60	Freight Rate	1	X	R	1/15
06	122	Rate/Value Qualifier	1	X	ID	2/2
07	60	Freight Rate	1	X	R	1/15
08	122	Rate/Value Qualifier	1	X	ID	2/2
09	19	City Name	1	O/Z	AN	2/30
10	19	City Name	1	O/Z	AN	2/30
11	462	Through Surcharge Percent	1	O	N2	2/4
12	463	Paid-In Surcharge Percent	1	O	N2	2/4

Syntax Notes

05 P0506
07 P0708

Semantic Notes

03 T203 is the transit portion weight from inbound movement.
09 In T209, "City" is used for the combination through-rate city.
10 In T210, "City" is used for the combination paid-in city.

Comments

00 Related T1, T2, and T3 segments have the same transit sequence number value in the first data element.
05 T205 is the through-freight-rate that applies to the shipment from the point of origin inland movement to the point of destination of the current movement.
07 T207 is the paid-in-rate basis of the paid-in portion of the shipment.

T3 - Transit Inbound Route

To specify transit inbound routing, including equipment identifications for associated T1 and T2 segments

TRANSACTION SETS USED IN
404 410 417 426

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	M	N0	1/9
02	140	Standard Carrier Alpha Code	1	M	ID	2/4
03	133	Routing Sequence Code	1	O	ID	1/2
04	19	City Name	1	O	AN	2/30
05	154	Standard Point Location Code	1	O	ID	6/9
06	206	Equipment Initial	1	X/Z	AN	1/4
07	207	Equipment Number	1	X/Z	AN	1/15

Syntax Notes

06 P0607

Semantic Notes

06 T306 will contain the equipment initial of the inbound car.

07 T307 will contain the equipment number of the inbound car.

Comments

00 Related T1, T2, and T3 segments have the same transit sequence number value in the first data element.

04 T304 is the station or city name at which carriers interchange shipments. T304 will contain the Association of American Railroads (AAR) Accounting Rule 260 junction rule.

T6 - Transit Inbound Rates

To identify the transit inbound prior origin point and waybill reference of movement to the point specified in T1 segment

TRANSACTION SETS USED IN
404 410 417 426

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	M	N0	1/9
02	60	Freight Rate	1	X/Z	R	1/15
03	122	Rate/Value Qualifier	1	X	ID	2/2
04	19	City Name	1	O/Z	AN	2/30
05	60	Freight Rate	1	X/Z	R	1/15
06	122	Rate/Value Qualifier	1	X	ID	2/2
07	19	City Name	1	O	AN	2/30

Syntax Notes

02	P0203
05	P0506

Semantic Notes

02	T602 is the through-freight-rate that applies to the shipment from the point of origin of the inland movement to the point of destination of the current billing movement.
04	In T604, "City" is used for the combination through-rate city.
05	T605 is the paid-in-rate basis of the paid-in portion of the shipment.

Comments

01	T601 must contain the same number that is on the corresponding T1 segment.
07	In T607, "City" is used for the combination paid-in rate city.

T8 - Free-form Transit Data

To transmit information in a free-form format relating to a specified transit sequence number

TRANSACTION SETS USED IN
404 410 417 426

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	M	N0	1/9
02	299	Transit Free-form Data	1	M	AN	1/80

Comments

01 T801 must contain the same transit sequence number that is on the corresponding T1.

TA - Tax Authority

To identify a jurisdiction's taxing authority

TRANSACTION SETS USED IN
158 245

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	955	Tax Jurisdiction Code Qualifier	1	X/Z	ID	2/2
02	956	Tax Jurisdiction Code	1	X	AN	1/10
03	352	Description	1	X/Z	AN	1/80
04	1721	Type of Taxing Authority Code	1	X	ID	2/2
05	352	Description	1	X/Z	AN	1/80
06	1719	Tax Service Payment Code	1	O	ID	1/1
07	546	Status Code	1	O/Z	ID	2/2

Syntax Notes

01	P0102
02	R0203
04	P0405

Semantic Notes

01	TA01 defines the source of the Tax Agency code. If TA01 is not equal to "MB," "VE," or "ST," then TA03, TA04 and TA05 are required.
03	TA03 contains the name of the tax agency.
05	TA05 contains the name of the tax agency type and defines the type of entity in TA04.
07	TA07 contains the status of the taxing authority.

TA1 - Interchange Acknowledgment

To report the status of the processing of an interchange header, trailer, and other interchange-level service request structures by the addressed receiver, or the non-delivery by a network provider. It may also be used to report an error processing the GS segment.

CONTROL SEGMENT

TRANSACTION SETS USED IN

None

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	I12	Interchange Control Number	1	M	N0	9/9
02	I08	Interchange Date	1	M	DT	6/6
03	I09	Interchange Time	1	M	TM	4/4
04	I17	Interchange Acknowledgment Code	1	M	ID	1/1
05	I18	Interchange Note Code	1	M	ID	3/3

TA3 - Interchange Delivery Notice Segment

To provide a notice from the receiving service request handler to the sending service request handler that an interchange was delivered or not delivered to the interchange receiver's mailbox, or some other ancillary service was performed, and that the interchange receiver retrieved, refused, or purged the interchange; TA3 is exchanged only between service request handlers; use of the TA3 segment is optional

CONTROL SEGMENT

TRANSACTION SETS USED IN
None

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

26	I56	Reference Code Qualifier	1	X	ID	2/2
27	I57	Reference Code	1	X	AN	1/35

Syntax Notes

22	P2223
24	P2425
26	P2627

Semantic Notes

01 TA301 and TA302 identify the service request handlers processing the interchange being reported.

04 TA304 through TA311 and TA318 through TA321 are used to identify the interchange whose status is being reported.

12 TA312 through TA314 identify the action being reported and the date and time that action was performed. TA315 through TA317 provide a second set of interchange action code, date and time that can be included if a given TA3 is reporting on more than one event.

22 TA322 through TA327 contain optional information exchanged by service request handlers to supply additional information concerning actions taken upon the interchange being reported.

TAR - Target Market

To specify the intended geographic market for the product or service.

TRANSACTION SETS USED IN

897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	19	City Name	1	O	AN	2/30

Syntax Notes

05		L050607

TAX - Tax Reference

To provide data required for proper notification/determination of applicable taxes applying to the transaction or business described in the transaction

TRANSACTION SETS USED IN

154 830 838 840 843 850 851 855 860 865

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	325	Tax Identification Number	1	X	AN	1/20
02	309	Location Qualifier	1	X	ID	1/2
03	310	Location Identifier	1	X	AN	1/30
04	309	Location Qualifier	1	X	ID	1/2
05	310	Location Identifier	1	X	AN	1/30
06	309	Location Qualifier	1	X	ID	1/2
07	310	Location Identifier	1	X	AN	1/30
08	309	Location Qualifier	1	X	ID	1/2
09	310	Location Identifier	1	X	AN	1/30
10	309	Location Qualifier	1	X	ID	1/2
11	310	Location Identifier	1	X	AN	1/30
12	441	Tax Exempt Code	1	O	ID	1/1
13	1179	Customs Entry Type Group Code	1	O	ID	1/1

Syntax Notes

01	R0103
02	P0203
04	P0405
06	P0607
08	P0809
10	P1011

Comments

00	Tax ID number is, in many instances, referred to as a Tax Exemption Number. The paired (combined) use of data elements 309 and 310 provides for the designation of five taxing jurisdictions.
01	TAX01 is required if tax exemption is being claimed.

TBI - Trade Line Bureau Identifier

To identify the credit repository and the associated credit files or hit levels for a particular item

TRANSACTION SETS USED IN

200

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	67	Identification Code	1	O/Z	AN	2/80
02	127	Reference Identification	1	O/Z	AN	1/80
03	127	Reference Identification	1	O/Z	AN	1/80
04	127	Reference Identification	1	O	AN	1/80
05	127	Reference Identification	1	O	AN	1/80
06	127	Reference Identification	1	O	AN	1/80
07	127	Reference Identification	1	O	AN	1/80
08	127	Reference Identification	1	O	AN	1/80

Semantic Notes

01 TBI01 identifies the credit repository reporting the credit related information.

02 TBI02 identifies the repository subscriber number related to the information reported.

03 TBI03 through TBI08 identify the credit file identifiers or hit levels for the particular credit repository.

TBP - Frequency Basis

To specify a frequency period for a product or process in which a change may occur

TRANSACTION SETS USED IN

890

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	750	Product/Process Characteristic Code	1	M	ID	2/3
02	594	Frequency Code	1	X	ID	1/1
03	352	Description	1	X/Z	AN	1/80

Syntax Notes

02 R0203

Semantic Notes

03 TBP03 may be used to provide information about the period frequency.

TC2 - Commodity

To identify a commodity or a group of commodities or a tariff page commodity

TRANSACTION SETS USED IN

103 283 284 285 286 810 832 850 857 860 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	23	Commodity Code Qualifier	1	M	ID	1/2
02	22	Commodity Code	1	M	AN	1/30

TCD - Itemized Call Detail

To specify detail information for itemized calls

TRANSACTION SETS USED IN

811

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	O	AN	1/20
02	373	Date	1	O	DT	8/8
03	337	Time	1	O	TM	4/8
04	309	Location Qualifier	1	X	ID	1/2
05	310	Location Identifier	1	X	AN	1/30
06	156	State or Province Code	1	O	ID	2/2
07	309	Location Qualifier	1	X	ID	1/2
08	310	Location Identifier	1	X	AN	1/30
09	156	State or Province Code	1	O	ID	2/2
10	739	Measurement Value	1	O	R	1/20
11	739	Measurement Value	1	O	R	1/20
12	782	Monetary Amount	1	O/Z	R	1/18
13	782	Monetary Amount	1	O/Z	R	1/18
14	782	Monetary Amount	1	O/Z	R	1/18
15	782	Monetary Amount	1	O/Z	R	1/18
16	662	Relationship Code	1	O/Z	ID	1/1

Syntax Notes

04	P0405
07	P0708

Semantic Notes

12	TCD12 is an undiscounted amount.
13	TCD13 is a net amount after the discount has been applied to the amount in TCD12.
14	TCD14 is an undiscounted amount.
15	TCD15 is a net amount after the discount has been applied to the amount in TCD14.
16	TCD16 is a code indicating the relationship of the price or amount to the associated segment.

Comments

01	TCD01 is the detail information.
02	TCD02 is the date of the call.
03	TCD03 is the connect time of the call.
04	TCD04, TCD05, and TCD06 are the 'to' location of the call.
07	TCD07, TCD08, and TCD09 are the 'from' location of the call.

10 TCD10 and TCD11 are the total duration of the call. TCD10 is the time measured in minutes or minutes and tenths of minutes. TCD11 is time measured in seconds or seconds and tenths of seconds.

TD1 - Carrier Details (Quantity and Weight)

To specify the transportation details relative to commodity, weight, and quantity

TRANSACTION SETS USED IN

180 325 754 830 832 840 843 850 855 856 857 860 861 862 865 870 888 944 945

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	103	Packaging Code	1	O	AN	3/5
02	80	Lading Quantity	1	X	N0	1/7
03	23	Commodity Code Qualifier	1	O	ID	1/2
04	22	Commodity Code	1	X	AN	1/30
05	79	Lading Description	1	O	AN	1/50
06	187	Weight Qualifier	1	O	ID	1/2
07	81	Weight	1	X	R	1/10
08	355	Unit or Basis for Measurement Code	1	X	ID	2/2
09	183	Volume	1	X	R	1/8
10	355	Unit or Basis for Measurement Code	1	X	ID	2/2

Syntax Notes

01	C0102
03	C0304
06	C0607
07	P0708
09	P0910

TD3 - Carrier Details (Equipment)

To specify transportation details relating to the equipment used by the carrier

TRANSACTION SETS USED IN

830 832 840 843 850 853 855 856 857 860 861 862 865 870 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	40	Equipment Description Code	1	X	ID	2/2
02	206	Equipment Initial	1	O	AN	1/4
03	207	Equipment Number	1	X	AN	1/15
04	187	Weight Qualifier	1	O	ID	1/2
05	81	Weight	1	X	R	1/10
06	355	Unit or Basis for Measurement Code	1	X	ID	2/2
07	102	Ownership Code	1	O	ID	1/1
08	407	Seal Status Code	1	O	ID	2/2
09	225	Seal Number	1	O	AN	1/15
10	24	Equipment Type Code	1	X	ID	4/4

Syntax Notes

01	E0110
02	C0203
04	C0405
05	P0506

TD4 - Carrier Details (Special Handling, or Hazardous Materials, or Both)

To specify transportation special handling requirements, or hazardous materials information, or both

TRANSACTION SETS USED IN

104 830 832 840 843 848 850 853 855 856 857 860 861 865 870 888 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	152	Special Handling Code	1	X	ID	2/3
02	208	Hazardous Material Code Qualifier	1	X	ID	1/1
03	209	Hazardous Material Class Code	1	X	AN	1/4
04	352	Description	1	X	AN	1/80
05	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
06	224	Hazardous Material Shipping Name	1	O	AN	1/25
07	228	Dangerous Goods Primary Classification Code	1	O	ID	1/6
08	C078	Composite Dangerous Goods Subsidiary Classification Codes	1	O		

Syntax Notes

01	R010204
02	C0203
08	C0807

Semantic Notes

05	TD405 identifies if a Material Safety Data Sheet (MSDS) exists for this product. A "Y" indicates an MSDS exists for this product; an "N" indicates an MSDS does not exist for this product.

Comments

07	The primary classification number is the first classification shown in column 3 of Schedule 1 of Transportation of Dangerous Goods Regulations (TDGR). Example: Primary Classification for Aerosols containing compressed oxygen is 2.2
08	When printed or displayed, the subsidiary code is shown in parenthesis (). Example: When UN Number 1950 Aerosols contain compressed oxygen, the primary code is 2.2 with the subsidiary code as (6.1).

TD5 - Carrier Details (Routing Sequence/Transit Time)

To specify the carrier and sequence of routing and provide transit time information

TRANSACTION SETS USED IN

180 286 317 830 832 838 840 843 850 852 853 855 856 857 860 861 862 865 870

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	133	Routing Sequence Code	1	O	ID	1/2
02	66	Identification Code Qualifier	1	X	ID	1/2
03	67	Identification Code	1	X	AN	2/80
04	91	Transportation Method/Type Code	1	X	ID	1/2
05	387	Routing	1	X	AN	1/35
06	368	Shipment/Order Status Code	1	X	ID	2/2
07	309	Location Qualifier	1	O	ID	1/2
08	310	Location Identifier	1	X	AN	1/30
09	731	Transit Direction Code	1	O	ID	2/2
10	732	Transit Time Direction Qualifier	1	O	ID	2/2
11	733	Transit Time	1	X	R	1/4
12	284	Service Level Code	1	X	ID	2/2
13	284	Service Level Code	1	X	ID	2/2
14	284	Service Level Code	1	O	ID	2/2
15	26	Country Code	1	O/Z	ID	2/3

Syntax Notes

02	R0204050612
02	C0203
07	C0708
10	C1011
13	C1312
14	C1413
15	C1512

Semantic Notes

15 TD515 is the country where the service is to be performed.

Comments

02 When specifying a routing sequence to be used for the shipment movement in lieu of specifying each carrier within the movement, use TD502 to identify the party responsible for defining the routing sequence, and use TD503 to identify the actual routing sequence, specified by the party identified in TD502.

TDS - Total Monetary Value Summary

To specify the total invoice discounts and amounts

TRANSACTION SETS USED IN

141 142 149 187 304 810 811 819 857

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	610	Amount	1	M/Z	N2	1/15
02	610	Amount	1	O/Z	N2	1/15
03	610	Amount	1	O/Z	N2	1/15
04	610	Amount	1	O/Z	N2	1/15

Semantic Notes

01 TDS01 is the total amount of invoice (including charges, less allowances) before terms discount (if discount is applicable).

02 TDS02 indicates the amount upon which the terms discount amount is calculated.

03 TDS03 is the amount of invoice due if paid by terms discount due date (total invoice or installment amount less cash discount).

04 TDS04 indicates the total amount of terms discount.

Comments

02 TDS02 is required if the dollar value subject to discount is not equal to the dollar value of TDS01.

TDT - Tax Delinquency Status

To specify the tax delinquency status on real property

TRANSACTION SETS USED IN

245

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1722	Real Estate Tax Delinquency Type Code	1	M	ID	1/2
02	127	Reference Identification	1	M/Z	AN	1/80
03	546	Status Code	1	O/Z	ID	2/2
04	306	Action Code	1	O/Z	ID	1/2

Semantic Notes

02 TDT02 is the original tax bill identification number.

03 TDT03 is the status of the delinquency.

04 TDT04 is the delinquency handling code.

TED - Technical Error Description

To identify the error and, if feasible, the erroneous segment, or data element, or both

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

824

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	647	Application Error Condition Code	1	M	ID	1/3
02	3	Free-form Message	1	O	AN	1/60
03	721	Segment ID Code	1	O	ID	2/3
04	719	Segment Position in Transaction Set	1	O	N0	1/10
05	C030	Position in Segment	1	O		
06	C999	Reference in Segment	1	O		
07	724	Copy of Bad Data Element	1	O	AN	1/99
08	961	Data Element New Content	1	O	AN	1/99

Comments

02	If used, TED02 will contain a generic description of the data in error (e.g., part number, date, reference number, etc.).

TEM - Pickup Totals

To provide minimal lading data relative to a pickup

TRANSACTION SETS USED IN
216

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	X/Z	R	1/15
02	380	Quantity	1	X/Z	R	1/15
03	188	Weight Unit Code	1	X	ID	1/1
04	81	Weight	1	X/Z	R	1/10
05	1703	Commodity Characteristic Codes	1	O/Z	ID	2/2

Syntax Notes

01	R0102
03	P0304

Semantic Notes

01	TEM01 is the quantity of handling units that are not unitized (for example cartons). When added to the quantity in TEM02, it is the total quantity of handling units to be tendered to the carrier at the time of pickup.
02	TEM02 is the quantity of handling units that are unitized (for example pallet, slip sheet). When added to the quantity in TEM01 it is the total quantity of handling units to be tendered to the carrier at the time of pickup.
04	TEM04 is the weight of the shipment.
05	TEM05 is used by the carrier to restrict the type of equipment provided at pickup.

TER - Territory

To specify a territory or country, and products or services, related to a specific class of trade

TRANSACTION SETS USED IN

155

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	687	Class of Trade Code	1	M	ID	2/2
02	1632	General Territory Code	1	X	ID	1/2
03	933	Free-form Message Text	1	X/Z	AN	1/264
04	26	Country Code	1	X	ID	2/3
05	954	Percentage as Decimal	1	O/Z	R	1/10
06	933	Free-form Message Text	1	O/Z	AN	1/264

Syntax Notes

02	R020304
02	E020304

Semantic Notes

03	TER03 contains a free-form description of the territory.
05	TER05 is the percentage of the total volume specified in TER01 made to or from the country or territory referenced in TER02, TER03 or TER04.
06	TER06 is used to provide a description of the products or services for the territory or country referenced in TER02, TER03 or TER04.

TF - Tariff Information

To identify agency tariff

TRANSACTION SETS USED IN

106

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	168	Tariff Agency Code	1	M	ID	1/4
02	171	Tariff Number	1	M	AN	1/7
03	493	Tariff Number Suffix	1	O	AN	1/2
04	173	Tariff Supplement Identifier	1	O	AN	1/4

TFR - Tariff Restrictions

To define tariff restrictions values such as charges, mileage and weight

TRANSACTION SETS USED IN

106

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	976	Tariff Restriction ID Code	1	M	ID	1/2
02	975	Tariff Restriction Description	1	O	AN	1/10
03	977	Tariff Restriction Value	1	O	R	1/9
04	977	Tariff Restriction Value	1	O	R	1/9

TFS - Tax Form

To indicate the tax form or the type of tax form being reported

TRANSACTION SETS USED IN

149 150 151 813 826

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	128	Reference Identification Qualifier	1	M/Z	ID	2/3
02	127	Reference Identification	1	M	AN	1/80
03	128	Reference Identification Qualifier	1	X/Z	ID	2/3
04	127	Reference Identification	1	X	AN	1/80
05	66	Identification Code Qualifier	1	X/Z	ID	1/2
06	67	Identification Code	1	X	AN	2/80
07	373	Date	1	O/Z	DT	8/8
08	818	Name Control Identifier	1	O	AN	1/4

Syntax Notes

03	P0304
05	P0506

Semantic Notes

01	TFS01 and TFS02 define the tax form.
03	TFS03 and TFS04 define the tax schedule.
05	TFS05 and TFS06 provide further identification of the tax form or schedule within the tax return filing.
07	TFS07 defines the tax period end date.

THE - Screen Theater Identification

To identify the theater and screen for accompanying detail

TRANSACTION SETS USED IN
159 170

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	67	Identification Code	1	M/Z	AN	2/80
02	93	Name	1	M/Z	AN	1/60
03	127	Reference Identification	1	X/Z	AN	1/80
04	380	Quantity	1	X/Z	R	1/15
05	380	Quantity	1	O/Z	R	1/15

Syntax Notes

03 R0304

Semantic Notes

01 THE01 is the identifier for the theater site.
02 THE02 is the exhibition site.
03 THE03 is the screen number being reported.
04 THE04 is the total number of screens being reported (combined).
05 THE05 is the total number of pictures being reported.

TI - Transport Information

To identify origin and destination carriers, equipment carrying shipment, date shipped, seal status, and equipment type

TRANSACTION SETS USED IN
928

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	O	ID	2/4
02	140	Standard Carrier Alpha Code	1	O	ID	2/4
03	206	Equipment Initial	1	O	AN	1/4
04	207	Equipment Number	1	O	AN	1/15
05	373	Date	1	O	DT	8/8
06	407	Seal Status Code	1	O	ID	2/2
07	301	Car Type Code	1	O	ID	1/4

Comments

05	TI05 is the railroad waybill date.

TIA - Tax Information and Amount

To specify the tax information and/or amount and to be used for tax information only as established by taxing authorities

TRANSACTION SETS USED IN

149 151 245 813 826

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C037	Tax Field Identification	1	M		
02	782	Monetary Amount	1	X	R	1/18
03	449	Fixed Format Information	1	X/Z	AN	1/80
04	380	Quantity	1	X	R	1/15
05	C001	Composite Unit of Measure	1	O		
06	954	Percentage as Decimal	1	X	R	1/10
07	782	Monetary Amount	1	X/Z	R	1/18

Syntax Notes

02	R0203040607
05	C0504
06	E0607

Semantic Notes

03	TIA03 is tax data as defined by taxing authorities established by the code in TIA01.
07	TIA07 is a tax rate expressed as a flat fee.

TID - Task Identification

To identify the work task and activity, what type of task it is, and related information

TRANSACTION SETS USED IN

806

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1173	Task ID Qualifier	1	M	ID	2/2
02	1174	Task Identifier	1	O	AN	1/20
03	1175	Relationship Task Identifier	1	O	AN	1/20
04	352	Description	1	O	AN	1/80
05	1297	Work Status Code	1	O	ID	1/2
06	306	Action Code	1	O	ID	1/2
07	127	Reference Identification	1	O/Z	AN	1/80
08	127	Reference Identification	1	O/Z	AN	1/80
09	1178	Reporting Structure Identifier	1	O	AN	1/3

Semantic Notes

07 TID07 is the calendar number identification.

08 TID08 is the shift number identification.

TII - Tax Installment Information

To provide the information on real estate taxes, including amounts

TRANSACTION SETS USED IN

245

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
02	380	Quantity	1	M/Z	R	1/15
03	782	Monetary Amount	1	M/Z	R	1/18
04	782	Monetary Amount	1	O/Z	R	1/18
05	1720	Tax Service Non-payment Code	1	O	ID	1/3

Semantic Notes

01 TII01 indicates if this installment information is for a delinquency. A "Y" indicates it is for a delinquency. A "N" indicates it is not a delinquency.

02 TII02 is the number of tax payment installments.

03 TII03 is the total tax amount due.

04 TII04 is the total tax discount amount.

TIS - Title Insurance Services

To provide the type, extent, and dates for title insurance service

TRANSACTION SETS USED IN
265

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1420	Title Insurance Services Code	1	M/Z	ID	2/2
02	373	Date	1	O/Z	DT	8/8
03	235	Product/Service ID Qualifier	1	X	ID	2/2
04	234	Product/Service ID	1	X/Z	AN	1/80

Syntax Notes

03 P0304

Semantic Notes

01 TIS01 defines the title services requested.
02 TIS02 defines the date by which the service is desired or required.
04 TIS04 identifies the title services requested.

TLN - Tradeline

To report specific details on a tradeline or credit-related item

TRANSACTION SETS USED IN

200

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	508	Account Number	1	M	AN	1/35
02	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
04	1187	Type of Account Code	1	O	ID	2/2
05	1187	Type of Account Code	1	O	ID	2/2
06	1189	Type of Credit Account Code	1	O	ID	1/1
07	1470	Number	1	O/Z	N0	1/9
08	1262	Loan Type Code	1	O	ID	1/2
09	263	Rating Code	1	O	ID	2/2

16	1250	Date Time Period Format Qualifier	1	X	ID	2/3
17	1251	Date Time Period	1	X/Z	AN	1/35
18	782	Monetary Amount	1	O/Z	R	1/18
19	263	Rating Code	1	O	ID	2/2
20	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
21	1470	Number	1	O/Z	N0	1/9
22	352	Description	1	O/Z	AN	1/80

Syntax Notes

12 P1213

16 P1617

Semantic Notes

02 TLN02 indicates whether or not adverse information is included in the tradeline summary. A "Y" indicates adverse information is included; an "N" indicates adverse information is not included.

03 TLN03 indicates whether or not the minimum payment is estimated. A "Y" indicates that the minimum payment is estimated; an "N" indicates the payment is not estimated.

07 TLN07 is the number of months the account has been reviewed.

13 TLN13 is the last known past-due date.

14 TLN14 is the last known past-due amount.

17 TLN17 is the date of the highest delinquency.

18 TLN18 is the highest delinquency amount.

20 TLN20 indicates whether this is a primary tradeline. A "Y" indicates the tradeline is primary; an "N" indicates the tradeline is not primary.

21 TLN21 is the number of months in the original term of the tradeline.

22 TLN22 describes the term of the tradeline in text if a number is not available.

TMD - Test Method

To describe the nature of the test performed

TRANSACTION SETS USED IN
142 841 842 848 863

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	750	Product/Process Characteristic Code	1	O	ID	2/3
02	559	Agency Qualifier Code	1	X	ID	2/2
03	751	Product Description Code	1	X	AN	1/12

08	127	Reference Identification	1	O/Z	AN	1/80
09	822	Source Subqualifier	1	O	AN	1/15

Syntax Notes

02 P0203
09 C0902

Semantic Notes

07 TMD07 is the date of the test method as assigned by the issuing organization.
08 TMD08 is the document revision number.

Comments

09 TMD09 specifies the individual code list of the agency specified in TMD02.

TOA - Type of Activity

To specify type of activity information

TRANSACTION SETS USED IN
186 267

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1591	Type of Activity Code	1	M	ID	2/2
02	1553	License Type Code	1	X	ID	2/2
03	546	Status Code	1	X/Z	ID	2/2
04	1592	Type of Rating Code	1	O/Z	ID	2/2
05	1592	Type of Rating Code	1	O/Z	ID	2/2

Syntax Notes

02 P0203

Semantic Notes

03 TOA03 describes the status of the license in TOA02.
04 TOA04 indicates the participant's level of activity.
05 TOA05 indicates the sanctioning body or organization of activity.

TOO - Tooth Identification

To identify a tooth by number and, if applicable, one or more tooth surfaces

TRANSACTION SETS USED IN

270 271 276 277 278 835 837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1270	Code List Qualifier Code	1	X	ID	1/3
02	1271	Industry Code	1	X	AN	1/30
03	C005	Tooth Surface	1	O		

Syntax Notes

01	P0102

TOV - Vehicle Use Information

To report usage of a vehicle

TRANSACTION SETS USED IN
186 267

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1599	Hazardous Vehicle Type Code	1	M	ID	2/2
02	374	Date/Time Qualifier	1	X/Z	ID	3/3
03	1250	Date Time Period Format Qualifier	1	X	ID	2/3
04	1251	Date Time Period	1	X	AN	1/35
05	673	Quantity Qualifier	1	X/Z	ID	2/2
06	380	Quantity	1	X	R	1/15

Syntax Notes

02	P020304
05	P0506

Semantic Notes

02	TOV02, TOV03, and TOV04 represent a time span.
05	TOV05 and TOV06 represent the amount of activity in the time span above.

TPB - Business Professional Title

To identify title of an individual within a company

TRANSACTION SETS USED IN

105 113 148 155 179 274

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1634	Business Professional Title Code	1	X	ID	1/3

03	559	Agency Qualifier Code	1	X	ID	2/2
04	822	Source Subqualifier	1	O	AN	1/15

Syntax Notes

01	R0102
03	C0301
04	C0403

Semantic Notes

02	TPB02 is free-form description of the title.

TPD - Trading Partner Detail

To describe attribute of a trading partner

TRANSACTION SETS USED IN

838

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	349	Item Description Type Code	1	M	ID	1/1
02	23	Commodity Code Qualifier	1	X	ID	1/2
03	22	Commodity Code	1	X	AN	1/30
04	352	Description	1	O	AN	1/80

Syntax Notes

02	P0203

TPP - Third Party Payment

To transmit data for third party payments, identifying the third party payer as well as the taxpayer on whose behalf the payment is being made. Third party payments include employment taxes paid by payroll service providers on behalf of employers, payments from employers in response to tax agency orders to garnish employee wages for tax liability, etc.

TRANSACTION SETS USED IN

820

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1049	Tax Payment Type Code	1	M/Z	ID	1/5
02	127	Reference Identification	1	M/Z	AN	1/80
03	373	Date	1	M/Z	DT	8/8
04	1051	Tax Amount	1	M/Z	N2	1/10
05	127	Reference Identification	1	M/Z	AN	1/80
06	93	Name	1	M/Z	AN	1/60
07	127	Reference Identification	1	O/Z	AN	1/80

Semantic Notes

01 TPP01 is the state assigned tax type, based on tax type code table maintained by the Federation of Tax Administrators, code source 153.

02 TPP02 is the identification or registration number of the third party originating the payment.

03 TPP03 is a date applicable to this payment, such as a payroll date, account debit date, or tax period end date.

04 TPP04 is the amount of the payment.

05 TPP05 is the identification number of the taxpayer on whose behalf the payment is being made.

06 TPP06 is the name of the taxpayer on whose behalf the payment is being made.

07 TPP07 is an optional second identification number for the taxpayer on whose behalf the payment is being made, such as a case number.

TRD - Trade Item Ingredient Details

To specify the ingredients, product strength and unit of measure information and specifies what type of substance or drug category the ingredients is identified with.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	738	Measurement Qualifier	1	M/Z	ID	1/3
02	128	Reference Identification Qualifier	1	O	ID	2/3
03	C068	Composite Ingredient Information	1	X/Z		
04	739	Measurement Value	1	X/Z	R	1/20
05	C001	Composite Unit of Measure	1	X		
06	1814	Precursor Status	1	O/Z	ID	2/2
07	559	Agency Qualifier Code	1	X	ID	2/2
08	751	Product Description Code	1	X	AN	1/12
09	739	Measurement Value	1	X	R	1/20
10	C001	Composite Unit of Measure	1	X		
11	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
12	739	Measurement Value	1	O/Z	R	1/20
13	1815	Controlled Drug	1	O/Z	ID	4/4
14	739	Measurement Value	1	X	R	1/20
15	C001	Composite Unit of Measure	1	X		
16	1816	Narcotic	1	O/Z	ID	4/4
17	739	Measurement Value	1	X	R	1/20
18	C001	Composite Unit of Measure	1	X		

Syntax Notes

03	P030405
07	P07080910
14	P1415
17	P1718

Semantic Notes

01	If TRD01 is PAA, PAB or PAC, then TRD03 is required
03	TRD03 is the name of the ingredient identified by TRD01
04	TRD04 is the common chemical name for the ingredient identified in TRD03. Only provided if different than TRD03.
06	If TRD06 equals PA or PB, TRD07 is required
11	When TRD11 equals Y the Drug Product Contains Targeted Substance, when TRD11 equals N the Drug Product DOES NOT Contain Targeted Substance
11	When TRD11 equals Y TRD12 is required
12	TRD12 measurement value is always the Pure Base Ratio with 4 digit decimal
13	When TRD13 equals CON1, CON2 or CON3 then TRD14 is required

16 When TRD16 equals NAR1, NAR2 or NAR3 then TRD17 is required

Comments

01 When TRD01 equals BQP Base Quantity Per Package, then TRD04 equals Ratio Value, and TRD05 equals grams

04 TRD04 is value of measure for the ingredient identified in TRD03

06 TRD06, TRD07, TRD08, TRD09 and TRD10 further describe the ingredient identified by TRD01

TRF - Rating Factors

To specify rating information used to calculate usage-sensitive charges

TRANSACTION SETS USED IN

811

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	673	Quantity Qualifier	1	M	ID	2/2
02	C001	Composite Unit of Measure	1	M		
03	380	Quantity	1	M	R	1/15
04	C001	Composite Unit of Measure	1	M		
05	380	Quantity	1	M	R	1/15

Comments

01	TRF01 defines the rating basis (e.g., acknowledged calls, minimum period, etc.) for the segment.
02	TRF02 and TRF03 define equivalent units per standard unit.
04	TRF04 and TRF05 define the standard unit.

TRL - Equipment Usage Information

To provide relevant data regarding equipment usage

TRANSACTION SETS USED IN
227

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	578	Equipment Status Code	1	M	ID	1/2
02	373	Date	1	X/Z	DT	8/8
03	337	Time	1	O/Z	TM	4/8
04	145	Shipment Identification Number	1	O	AN	1/30
05	901	Reject Reason Code	1	O	ID	2/2

Syntax Notes

03 C0302

Semantic Notes

02 TRL02 represents the date the status in TRL01 occurred .
03 TRL03 represents the time the status in TRL01 occurred.

TRN - Trace

To uniquely identify a transaction to an application

TRANSACTION SETS USED IN

103 202 205 261 262 269 270 271 274 275 276 277 278 500 521 813 820 821 823 827 829 831 835 926

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	481	Trace Type Code	1	M	ID	1/2
02	127	Reference Identification	1	M/Z	AN	1/80
03	509	Originating Company Identifier	1	O/Z	AN	10/10
04	127	Reference Identification	1	O/Z	AN	1/80

Semantic Notes

02 TRN02 provides unique identification for the transaction.

03 TRN03 identifies an organization.

04 TRN04 identifies a further subdivision within the organization.

TRP - Terpenes Information

To specify a product's terpenes information and related characteristics

TRANSACTION SETS USED IN

832

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1870	Terpenes Type	1	X	ID	3/3
02	C079	Composite Multiple Language Extended Text Information	1	X/Z		
03	C081	Composite Multi-UOM Range Minimum and Maximum	1	O/Z		

Syntax Notes

01 R0102

Semantic Notes

02 Specify the "other" terpene type

03 Specify the anticipated amount of all terpenes per 1g of product.

Comments

03 The anticipated total amount of all terpenes per 1g of product. Example: A Premium Milled Flower Cannabis product has terpenes minimum amount of 0.5 mg/g (5 %) and maximum amount of 1 mg/g (10%).

TRS - Tax Rate

To provide information for a change in filing requirements for a particular tax type

TRANSACTION SETS USED IN

150

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	306	Action Code	1	M	ID	1/2
02	369	Free-form Description	1	O	AN	1/45
03	954	Percentage as Decimal	1	O	R	1/10
04	1073	Yes/No Condition or Response Code	1	O	ID	1/1
05	1499	Rate Application Code	1	O	ID	2/2

Comments

02 TRS02 is used for class of goods or services.

03 TRS03 is used for the tax rate.

04 TRS04 is used to indicate that the tax rate applies within jurisdiction (resident) (Y) or outside of jurisdiction (non-resident) (N).

TRT - Trade Item Type

To identify and provide information about a healthcare regulated product including ingredients with measurement values.

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	687	Class of Trade Code	1	M	ID	2/2
02	128	Reference Identification Qualifier	1	M	ID	2/3
03	127	Reference Identification	1	M	AN	1/80
04	C068	Composite Ingredient Information	1	O/Z		
05	128	Reference Identification Qualifier	1	X	ID	2/3
06	127	Reference Identification	1	X	AN	1/80
07	739	Measurement Value	1	X/Z	R	1/20
08	C001	Composite Unit of Measure	1	X		

Syntax Notes

05 P0506

07 P0708

Semantic Notes

04 To identify and provide information about a healthcare regulated product including ingredients with measurement values.

07 The TRT07 is the strength/measurement value of the ingredient specified in TRT04 with the unit of measurement provided in TRT08. (Example: 500 mg)

Comments

02 If TRT02 is present with code DIN (Drug Identification Number), NPN (Natural Health Product Number), MDL (Medical Device License Number), TC2 must be used.

05 When TRT02 equals DIN or NPN TRT05 equals code AIG with TRT06 providing the Active Ingredient Group Number

TS - Tariff Section

To define the beginning of a section that contains specific tariff information; it will define tariff information that follows

TRANSACTION SETS USED IN

106

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	978	Tariff Section Identifier	1	O	AN	1/4
02	169	Tariff Item Number	1	O	AN	1/16
03	973	Tariff Item Suffix	1	O	AN	1/4
04	980	Tariff Section ID Code	1	O	ID	2/2
05	122	Rate/Value Qualifier	1	O	ID	2/2
06	40	Equipment Description Code	1	O	ID	2/2
07	352	Description	1	O/Z	AN	1/80

Semantic Notes

07 TS07 is the free-form description of tariff section information that follows.

TS2 - Transaction Supplemental Statistics

To provide supplemental summary control information by provider fiscal year and bill type

TRANSACTION SETS USED IN
835

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	782	Monetary Amount	1	O/Z	R	1/18
02	782	Monetary Amount	1	O/Z	R	1/18
03	782	Monetary Amount	1	O/Z	R	1/18
04	782	Monetary Amount	1	O/Z	R	1/18
05	782	Monetary Amount	1	O/Z	R	1/18
06	782	Monetary Amount	1	O/Z	R	1/18
07	380	Quantity	1	O/Z	R	1/15
08	782	Monetary Amount	1	O/Z	R	1/18
09	782	Monetary Amount	1	O/Z	R	1/18
10	380	Quantity	1	O/Z	R	1/15
11	380	Quantity	1	O/Z	R	1/15
12	380	Quantity	1	O/Z	R	1/15
13	380	Quantity	1	O/Z	R	1/15
14	380	Quantity	1	O/Z	R	1/15
15	782	Monetary Amount	1	O/Z	R	1/18
16	380	Quantity	1	O/Z	R	1/15
17	782	Monetary Amount	1	O/Z	R	1/18
18	782	Monetary Amount	1	O/Z	R	1/18
19	782	Monetary Amount	1	O/Z	R	1/18

Semantic Notes

01 TS201 is the total diagnosis related group (DRG) amount.
02 TS202 is the total federal specific amount.
03 TS203 is the total hospital specific amount.
04 TS204 is the total disproportionate share amount.
05 TS205 is the total capital amount.
06 TS206 is the total indirect medical education amount.
07 TS207 is the total number of outlier days.
08 TS208 is the total day outlier amount.
09 TS209 is the total cost outlier amount.
10 TS210 is the diagnosis related group (DRG) average length of stay.
11 TS211 is the total number of discharges.
12 TS212 is the total number of cost report days.
13 TS213 is the total number of covered days.
14 TS214 is total number of non-covered days.

15 TS215 is the total Medicare Secondary Payer (MSP) pass- through amount calculated for a non-Medicare payer.

16 TS216 is the average diagnosis-related group (DRG) weight.

17 TS217 is the total prospective payment system (PPS) capital, federal-specific portion, diagnosis-related group (DRG) amount.

18 TS218 is the total prospective payment system (PPS) capital, hospital-specific portion, diagnosis-related group (DRG) amount.

19 TS219 is the total prospective payment system (PPS) disproportionate share, hospital diagnosis-related group (DRG) amount.

TS3 - Transaction Statistics

To supply provider-level control information

TRANSACTION SETS USED IN
835

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	1331	Facility Code Value	1	M	AN	1/3

23	380	Quantity	1	O/Z	R	1/15
24	782	Monetary Amount	1	O/Z	R	1/18

Semantic Notes

01 TS301 is the provider number.
03 TS303 is the last day of the provider's fiscal year.
04 TS304 is the total number of claims.
05 TS305 is the total of reported charges.
06 TS306 is the total of covered charges.
07 TS307 is the total of noncovered charges.
08 TS308 is the total of denied charges.
09 TS309 is the total provider payment.
10 TS310 is the total amount of interest paid.
11 TS311 is the total contractual adjustment.

TS312 is the total Gramm-Rudman Reduction.
TS313 is the total Medicare Secondary Payer (MSP) primary payer amount.
TS314 is the total blood deductible amount in dollars.
TS315 is the summary of non-lab charges.
TS316 is the total coinsurance amount.
TS317 is the Healthcare Common Procedure Coding System (HCPCS) reported charges.
TS318 is the total Healthcare Common Procedure Coding System (HCPCS) payable amount.
TS319 is the total deductible amount.
TS320 is the total professional component amount.
TS321 is the total Medicare Secondary Payer (MSP) patient liability met.
TS322 is the total patient reimbursement.
TS323 is the total periodic interim payment (PIP) number of claims.
TS324 is total periodic interim payment (PIP) adjustment.

TSD - Trailer Shipment Details

To specify details of shipments on a trailer

TRANSACTION SETS USED IN

212 856

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	O/Z	AN	1/20
02	219	Position	1	O	AN	1/3

Semantic Notes

01 TSD01 indicates the loading sequence and relative shipment position on the trailer.

TSI - Automatic Equipment Tag Status Information

To indicate the status of an automatic equipment identification tag and associated information

TRANSACTION SETS USED IN

160

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1554	Tag Status Code	1	O	ID	1/1
02	1271	Industry Code	1	O/Z	AN	1/30
03	380	Quantity	1	O/Z	R	1/15
04	380	Quantity	1	O/Z	R	1/15

Semantic Notes

02 TSI02 is the Association of American Railroads Tag Type Code.

03 TSI03 is the number of handshakes on Antenna '0'.

04 TSI04 is the number of handshakes on Antenna '1'.

TSP - Test Period or Interval

To describe a specific period or interval at which tests are performed

TRANSACTION SETS USED IN
863

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1312	Test Period or Interval Qualifier	1	M	ID	2/2
02	350	Assigned Identification	1	O	AN	1/20
03	1313	Test Period or Interval Value	1	X	N0	1/6
04	344	Unit of Time Period or Interval Code	1	X	ID	2/2

Syntax Notes

03 P0304

Comments

02 TSP02 is used to further expand TSP01 as a qualifier.

TST - Test Score Record

To provide information about national, regional, state, or local tests that a student has taken

TRANSACTION SETS USED IN
130 138 189 252

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1155	Educational Test or Requirement Code	1	M	ID	1/3
02	93	Name	1	O	AN	1/60
03	1250	Date Time Period Format Qualifier	1	X	ID	2/3
04	1251	Date Time Period	1	X/Z	AN	1/35
05	127	Reference Identification	1	O/Z	AN	1/80
06	127	Reference Identification	1	O	AN	1/80
07	1131	Level of Individual, Test, or Course Code	1	O/Z	ID	2/2

14	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
15	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
16	1159	Test Score Interpretation Code	1	O	ID	1/1
17	1558	Academic Summary Source Code	1	O	ID	1/1

Syntax Notes

03 P0304

Semantic Notes

04 TST04 refers to the date the test was administered.

05 TST05 and TST06 refer to the form and the level of the test, respectively.

07 TST07 refers to the grade level of the student at the time the test was taken.

08 TST08 refers to the typical grade level at which the test is given.

09 TST09 refers to the year the test was normed.

09 TST09 has the format CCYY.

13 TST13 has the format CCYY.

13 TST13 refers to the date associated with the test.

14 TST14 indicates whether the test information is revised. A "Y" indicates that the test information is revised; an "N" indicates that the test information is not revised.

15 TST15 indicates whether the test administration referred to is invalidated. A "Y" indicates that the test administration referred to is invalidated; an "N" indicates that the test administration is not invalidated.

TSU - Transaction Summary

To provide specific transaction summary information

TRANSACTION SETS USED IN

821

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1270	Code List Qualifier Code	1	M	ID	1/3
02	1271	Industry Code	1	M	AN	1/30
03	782	Monetary Amount	1	M/Z	R	1/18
04	380	Quantity	1	O/Z	R	1/15
05	380	Quantity	1	O/Z	R	1/15
06	373	Date	1	O/Z	DT	8/8
07	337	Time	1	X	TM	4/8
08	623	Time Code	1	O	ID	2/2

Syntax Notes

08 C0807

Semantic Notes

03 TSU03 is a monetary amount which summarizes a group of detailed transactions.

04 TSU04 is the summary number of financial transactions identified in TSU02.

05 TSU05 allows for detailed identification of the number of transactions identified in TSU04. As an example, when summarizing a checklist which contains several batches of checks, TSU04 would contain the summary number of batches, and TSU05 would contain the detailed number of checks.

06 TSU06 is the date on which the group of detailed transactions was processed by the financial institution.

TT - Term Text

To specify general term text in a rate docket

TRANSACTION SETS USED IN

490

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	554	Assigned Number	1	M	N0	1/9
02	449	Fixed Format Information	1	M	AN	1/80

Comments

01	TT01 is the number indicating the line sequence.

TTI - Texture and Thickness Information

To specify the textures, thickness, and test method of a product, for example, texture of food and thickness of drink

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1856	Product Texture and Thickness	1	M	ID	3/3
02	C080	Composite Multiple Language Textural Data Information 4096 Characters	1	M/Z		

Semantic Notes

02 Specify testing method by the brand owner as noted on the product packaging. Describe and confirm the flow or textural characteristics of a particular product at the time of testing.

TUD - Trade Union Data

To allow for the identification of trade union data related to a specific location or product line

TRANSACTION SETS USED IN

838

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	705	Trade Union Code	1	M	ID	2/2
02	66	Identification Code Qualifier	1	X	ID	1/2
03	67	Identification Code	1	X	AN	2/80

Syntax Notes

02	P0203

TXI - Tax Information

To specify tax information

TRANSACTION SETS USED IN

112 124 140 142 148 154 187 215 263 283 810 811 812 820 823 832 850 851 855 857 860 865 894 895

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	963	Tax Type Code	1	M	ID	2/2
02	782	Monetary Amount	1	X/Z	R	1/18
03	954	Percentage as Decimal	1	X/Z	R	1/10
04	955	Tax Jurisdiction Code Qualifier	1	X	ID	2/2
05	956	Tax Jurisdiction Code	1	X	AN	1/10
06	441	Tax Exempt Code	1	X	ID	1/1
07	662	Relationship Code	1	O/Z	ID	1/1
08	828	Dollar Basis For Percent	1	O	R	1/9
09	325	Tax Identification Number	1	O	AN	1/20
10	350	Assigned Identification	1	O	AN	1/20
11	352	Description	1	O/Z	AN	1/80
12	380	Quantity	1	O/Z	R	1/15
13	1035	Name Last or Organization Name	1	O/Z	AN	1/80

Syntax Notes

02 R020306
04 P0405
08 C0803

Semantic Notes

02 TXI02 is the monetary amount of the tax.
03 TXI03 is the tax percent expressed as a decimal.
07 TXI07 is a code indicating the relationship of the price or amount to the associated segment.
11 TXI11 describes the tax type listed in TXI01.
12 TXI12 is the quantity of trade items subject to the tax in TXI01.
13 TXI13 is the name of the taxing authority.

Comments

01 If the TXI01 code does not sufficiently describe the tax type, use of TXI11 is recommended.

TXN - Transaction Capabilities

To indicate EDI transaction capabilities

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

838

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	306	Action Code	1	M	ID	1/2
02	455	Responsible Agency Code	1	X	ID	1/2
03	143	Transaction Set Identifier Code	1	X	ID	3/3
04	480	Version / Release / Industry Identifier Code	1	X/Z	AN	1/12
05	306	Action Code	1	M	ID	1/2
06	124	Application Receiver's Code	1	O	AN	2/15
07	142	Application Sender's Code	1	O	AN	2/15
08	373	Date	1	O/Z	DT	8/8
09	337	Time	1	O	TM	4/8
10	C053	Standards Information	1	X		

Syntax Notes

02	P020304
04	E0410

Semantic Notes

04	Use either TXN04 or TXN10 to identify the EDI standard and implementation guideline for which a capability is being reported.
08	If used, TXN08 and TXN09 indicate the effective date and time.

TXP - Tax Payment

To identify tax payment data

TRANSACTION SETS USED IN
820 823

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	325	Tax Identification Number	1	M	AN	1/20
02	1049	Tax Payment Type Code	1	M	ID	1/5
03	373	Date	1	M	DT	8/8
04	817	Tax Information Identification Number	1	M	AN	1/30
05	1051	Tax Amount	1	M	N2	1/10
06	817	Tax Information Identification Number	1	X	AN	1/30
07	1051	Tax Amount	1	X	N2	1/10
08	817	Tax Information Identification Number	1	X	AN	1/30
09	1051	Tax Amount	1	X	N2	1/10
10	1050	Taxpayer Verification	1	O	AN	1/6

Syntax Notes

06 P0607
08 P0809

Comments

02 The tax type code TXP02 is a code from a code list maintained by the Federation of Tax Administrators (FTA).

UC - Underwriting Category

To identify the category of underwriting data being transmitted

TRANSACTION SETS USED IN
186 252 267

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1136	Code Category	1	M	ID	2/2
02	127	Reference Identification	1	O/Z	AN	1/80
03	127	Reference Identification	1	X/Z	AN	1/80
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

04 C0403

Semantic Notes

02 UC02 is the form number used by the information provider.

03 UC03 is the question number used by the information provider.

04 UC04 indicates the answer to the question defined in UC03. A "Y" indicates answer is a positive response; an "N" indicates a negative response.

UCS - Underwriting Considerations

To report personal health and medical history data

TRANSACTION SETS USED IN
186 267

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1136	Code Category	1	O	ID	2/2
02	352	Description	1	O/Z	AN	1/80
03	349	Item Description Type Code	1	X	ID	1/1
04	352	Description	1	X/Z	AN	1/80
05	235	Product/Service ID Qualifier	1	X	ID	2/2
06	234	Product/Service ID	1	X	AN	1/80
07	1470	Number	1	X/Z	N0	1/9
08	C001	Composite Unit of Measure	1	X		

Syntax Notes

03	P0304
05	P0506
07	P0708

Semantic Notes

02	UCS02 is the actual response regarding health details.
04	UCS04 describes the interpreted health details.
07	UCS07 is the age at onset of health condition.

UD - Underwriting Status

To identify and describe underwriting status of submitted applications

TRANSACTION SETS USED IN
186 267 273

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	546	Status Code	1	M	ID	2/2
02	546	Status Code	1	O	ID	2/2
03	1209	Underwriting Decision Code	1	O	ID	1/1
04	373	Date	1	O/Z	DT	8/8
05	352	Description	1	O/Z	AN	1/80
06	1123	Offer Basis Code	1	O	ID	2/3
07	554	Assigned Number	1	O/Z	N0	1/9
08	1123	Offer Basis Code	1	O	ID	2/3
09	554	Assigned Number	1	O	N0	1/9
10	352	Description	1	O/Z	AN	1/80
11	954	Percentage as Decimal	1	X/Z	R	1/10
12	610	Amount	1	X	N2	1/15
13	1470	Number	1	O/Z	N0	1/9
14	156	State or Province Code	1	O/Z	ID	2/2
15	26	Country Code	1	O	ID	2/3
16	156	State or Province Code	1	O/Z	ID	2/2
17	26	Country Code	1	O	ID	2/3

Syntax Notes

10 L101112

Semantic Notes

04 UD04 is the date of the underwriting decision.
05 UD05 is the reason for the underwriting decision.
07 UD07 and UD09 are used to indicate the underwriting level.
10 UD10 is used to describe the reason for the flat extra.
11 UD11 is used to describe the percentage of a rating.
13 UD13 describes the number of years special rating conditions are applicable.
14 UD14 and UD15 are used to indicate the place where the application was signed.
16 UD16 and UD17 are used to indicate the location of the delivery of the policy.

UDA - Underwriting Condition

To specify the condition under which insurance coverage is offered

TRANSACTION SETS USED IN

111 273

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1123	Offer Basis Code	1	M	ID	2/3
02	352	Description	1	O/Z	AN	1/80
03	673	Quantity Qualifier	1	X	ID	2/2
04	380	Quantity	1	X	R	1/15
05	355	Unit or Basis for Measurement Code	1	O/Z	ID	2/2
06	610	Amount	1	O/Z	N2	1/15
07	954	Percentage as Decimal	1	O/Z	R	1/10

Syntax Notes

03	P0304
05	C050304
06	C060304

Semantic Notes

02	UDA02 is the reason for the condition under which the coverage is offered.
05	UDA05 is the length of time, such as years, months, or days, for which the condition applies.
06	UDA06 is the amount of a flat extra rating.
07	UDA07 is a table rating expressed as a percentage.

UIT - Unit Detail

To specify item unit data

TRANSACTION SETS USED IN

325 830 841 844 845 846 849 862 863 866 867 883 888

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C001	Composite Unit of Measure	1	M		
02	212	Unit Price	1	X	R	1/17
03	639	Basis of Unit Price Code	1	O	ID	2/2

Syntax Notes

03		C0302

UM - Health Care Services Review Information

To specify health care services review information

TRANSACTION SETS USED IN

278

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1525	Request Category Code	1	M	ID	1/2
02	1322	Certification Type Code	1	O	ID	1/1
03	1271	Industry Code	1	O/Z	AN	1/30
04	C023	Health Care Service Location Information	1	O		
05	C024	Related Causes Information	1	O		
06	1338	Level of Service Code	1	O	ID	1/3
07	1213	Current Health Condition Code	1	O	ID	1/1
08	923	Prognosis Code	1	O	ID	1/1
09	1363	Release of Information Code	1	O	ID	1/1
10	1514	Delay Reason Code	1	O	ID	1/2

Semantic Notes

03 UM03 is the Service Type (Code Source 958).

UPI - Universal Product Identification

To specify trade item characteristic information.

TRANSACTION SETS USED IN

897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	1	O	AN	1/20
02	235	Product/Service ID Qualifier	1	M	ID	2/2
03	234	Product/Service ID	1	M	AN	1/80
04	355	Unit or Basis for Measurement Code	1	M/Z	ID	2/2
05	1800	Display Type Code	1	O	ID	3/3
06	C065	Product Unit Indicator	1	O		
07	1803	StockIndicator Code	1	O	ID	1/1
08	306	Action Code	1	O	ID	1/2
09	1802	Production Type	1	O	ID	2/2
10	380	Quantity	1	O/Z	R	1/15
11	1804	Life Cycle Status Code	1	O	ID	1/1
12	C066	Selling or Ordering Product Basis Code	1	O		

Semantic Notes

04	UPI04 describes the hierarchical level of the trade item. Examples: "CASE", "PALLET" etc.
10	UPI10 identifies the number of components in the "Case or Each" of UPI04.
10	The number of components when the product is a Kit identified in UPI06

UQS - Underwriting Question

To report information provider underwriting data in a question and answer format

TRANSACTION SETS USED IN
186 267

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	127	Reference Identification	1	M/Z	AN	1/80
02	127	Reference Identification	1	O/Z	AN	1/80
03	933	Free-form Message Text	1	O/Z	AN	1/264
04	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

01 UQS01 indicates the question number used by the information provider.

02 UQS02 is the form number used by the information provider.

03 UQS03 provides the text version of the answer.

04 UQS04 indicates the answer to the question defined in UQS01. A "Y" indicates a positive response; an "N" indicates a negative response.

UR - Peer Review Organization or Utilization Review

To specify the results of the utilization review

TRANSACTION SETS USED IN
837

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1318	Approval Code	1	M	ID	1/1
02	380	Quantity	1	O/Z	R	1/15

Semantic Notes

02 UR02 is the number of grace days.

USD - Usage-Sensitive Detail

To specify usage-sensitive details which qualify for discounts or are subject to special rates

TRANSACTION SETS USED IN
811

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	662	Relationship Code	1	M/Z	ID	1/1
02	350	Assigned Identification	1	O	AN	1/20
03	118	Rate	1	X/Z	R	1/9
04	954	Percentage as Decimal	1	X/Z	R	1/10
05	C001	Composite Unit of Measure	1	X		
06	380	Quantity	1	X/Z	R	1/15
07	380	Quantity	1	X/Z	R	1/15
08	782	Monetary Amount	1	X	R	1/18
09	610	Amount	1	X/Z	N2	1/15
10	C001	Composite Unit of Measure	1	X		
11	740	Range Minimum	1	X	R	1/20
12	741	Range Maximum	1	X	R	1/20

Syntax Notes

03	E0304
03	L03060708
04	L040809
05	P0506
07	C070506
10	L101112
11	C1110
12	C1210

Semantic Notes

01	USD01 is a code indicating the relationship of the price or amount to the associated segment.
03	USD03 is the allowance or charge rate per unit.
04	USD04 is the discount percentage.
06	USD06 is the quantity of usage.
07	USD07 is a quantity of usage different than the quantity in USD06. When USD07 is present, it is used in conjunction with USD06, and then the rate USD03 is applied.
09	USD09 is the total amount of terms discount.

Comments

03	If both USD03 and USD08 are present, then USD08 takes precedence.
11	If USD11 is present and USD12 is not present, then the range is open ended.
12	If USD12 is present and USD11 is not present, then the minimum is zero.

USI - Unitized Shipment Information

To specify the quantity, number of pallet spaces and stackability of unitized units

TRANSACTION SETS USED IN
753 888

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M	R	1/15
02	211	Packaging Form Code	1	M/Z	ID	3/3
03	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Semantic Notes

02 USI02 defines the quantity in USI01.

03 USI03 identifies whether the unitized handling units are stackable. A "Y" indicates the unitized handling units are stackable; an "N" indicates the unitized handling units are not stackable.

UWI - Underwriting Information

To identify the type of underwriting used to underwrite a mortgage loan

TRANSACTION SETS USED IN
202

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1627	Underwriting Method Code	1	M	ID	1/1
02	93	Name	1	O/Z	AN	1/60
03	611	Disposition Status Code	1	O	ID	2/2
04	127	Reference Identification	1	O/Z	AN	1/80

Semantic Notes

02 UWI02 names the automated underwriting system used.

04 UWI04 is used to identify the version of the underwriting system.

V1 - Vessel Identification

To provide vessel details and voyage number

TRANSACTION SETS USED IN

121 126 272 300 301 304 310 311 312 322 323 324 325 326 353 362 715 810 856

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	597	Vessel Code	1	X	ID	1/8
02	182	Vessel Name	1	X	AN	2/50
03	26	Country Code	1	O/Z	ID	2/3
04	55	Flight/Voyage Number	1	O	AN	2/30
05	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
06	249	Vessel Requirement Code	1	O	ID	1/1
07	854	Vessel Type Code	1	O	ID	2/2
08	897	Vessel Code Qualifier	1	O	ID	1/1
09	91	Transportation Method/Type Code	1	O	ID	1/2

Syntax Notes

01	R0102
08	C0801

Semantic Notes

03	V103 is the code identifying the country in which the ship (vessel) is registered.
05	V105 identifies the ocean carrier.

V2 - Vessel Information

To provide vessel details

TRANSACTION SETS USED IN
311 353

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	310	Location Identifier	1	O/Z	AN	1/30
02	127	Reference Identification	1	O	AN	1/80
03	81	Weight	1	X	R	1/10
04	188	Weight Unit Code	1	X	ID	1/1
05	81	Weight	1	X	R	1/10
06	188	Weight Unit Code	1	X	ID	1/1
07	81	Weight	1	X	R	1/10
08	188	Weight Unit Code	1	X	ID	1/1
09	81	Weight	1	X	R	1/10
10	188	Weight Unit Code	1	X	ID	1/1
11	81	Weight	1	X	R	1/10
12	188	Weight Unit Code	1	X	ID	1/1
13	93	Name	1	O	AN	1/60
14	82	Length	1	O	R	1/8
15	355	Unit or Basis for Measurement Code	1	O	ID	2/2
16	380	Quantity	1	O/Z	R	1/15
17	380	Quantity	1	O/Z	R	1/15

Syntax Notes

03 P0304
05 P0506
07 P0708
09 P0910
11 P1112

Semantic Notes

01 V201 is the place of vessel registry.
16 V216 is the number of crew members.
17 V217 is the number of passengers.

Comments

02 V202 is the vessel registry number.
03 V203 is the vessel net registry tonnage.
05 V205 is the vessel gross registry tonnage.
07 V207 is the vessel containerized cargo tonnage.
09 V209 is the vessel noncontainerized cargo tonnage.
11 V211 is the vessel summer dead weight tonnage.

13 V213 is the name of the master of the vessel.
14 V214 is the length of the vessel.

V3 - Vessel Schedule

To transmit vessel scheduling information

TRANSACTION SETS USED IN

304 311

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	318	Current Port of Loading	1	M	AN	2/24
02	373	Date	1	M/Z	DT	8/8
03	316	Next Port of Discharge	1	O	AN	2/24
04	373	Date	1	O/Z	DT	8/8

Semantic Notes

02 V302 is the date of departure of the vessel.

04 V304 is the estimated arrival date at the port of discharge.

V4 - Cargo Location Reference

To specify the cargo location on board the vessel

TRANSACTION SETS USED IN

310 322 324 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	877	Vessel Stowage Location	1	M	AN	1/12

V5 - Vessel Identification

To specify vessel code

TRANSACTION SETS USED IN

601 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	897	Vessel Code Qualifier	1	M	ID	1/1
02	597	Vessel Code	1	M	ID	1/8
03	26	Country Code	1	M	ID	2/3

V9 - Event Detail

To specify information about a specific event

TRANSACTION SETS USED IN

109 110 161 273 300 301 303 304 310 312 315 323 325 350 417 426 455 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	304	Event Code	1	M	ID	3/3
02	106	Event	1	O	AN	1/25
03	373	Date	1	O/Z	DT	8/8
04	337	Time	1	X/Z	TM	4/8
05	19	City Name	1	X	AN	2/30
06	156	State or Province Code	1	O	ID	2/2

19	81	Weight	1	O/Z	R	1/10
20	82	Length	1	O/Z	R	1/8

Syntax Notes

06 C0605
10 P1011
13 C1304
15 C1509

Semantic Notes

03 V903 is the event date.
04 V904 is the event time.
09 V909 is the Standard Point Location Code (SPLC) of the event shown in the V901.
10 V910 is the length of the time delay expressed in hours.
13 V913 reflects the time zone which the event time reflects.
14 V914 is the quantity of the fuel in gallons.
15 V915 is the Standard Point Location Code (SPLC) of the secondary point of the delay indicated in the V911.
16 V916 is the total number of rail cars associated with the event code in V901.

V917 is the total number of loaded cars associated with the event code in V901.

V918 is the total number of empty cars associated with the event code in V901.

V919 is the total Gross Tons of the cars identified in V916. Includes the gross weight of the loads and the tare weight of the empties.

V920 is the total outside foot length of the cars identified in V916, rounded off to the nearest foot.

VAD - Vehicle Advice Detail

To provide detail for vehicle application edit results

TRANSACTION SETS USED IN
126

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	539	Vehicle Identification Number	1	M	AN	1/30

Syntax Notes

10 P1011

Semantic Notes

06 VAD06 is the shipper's authorization number for nonstandard move.

Comments

08 Use VAD08 and VAD09 when more than one application error exists.

VAR - Credit File Variation

To identify variations discovered in credit items or tradelines

TRANSACTION SETS USED IN

200

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	67	Identification Code	1	M/Z	AN	2/80

Syntax Notes

02	P0203
06	P060708
08	C0805
11	C1110

Semantic Notes

01	VAT01 is used to specify the vehicle equipment type code.
05	VAT05 is used to identify the characteristic being defined.
08	VAT08 is the specific value that further identifies the product characteristic code.
10	VAT10 and VAT11 are used to further describe the equipment being identified.
10	VAT10 is used to indicate the number of units. (To specify six cylinders, VAT10 would specify a quantity of six and VAT11 would indicate cylinders.)
12	VAT12 is the location of the attribute on the vehicle.

VC - Motor Vehicle Control

To define motor vehicle identification and logistics

TRANSACTION SETS USED IN

15	310	Location Identifier	1	O/Z	AN	1/30

Syntax Notes

06	C0605
13	P1314

Semantic Notes

01	VC101 is the primary or upper color of the vehicle.
02	VC102 is the lower color of the vehicle.
06	VC106 is the vehicle invoice amount to be collected from consignee by carrier upon delivery.
15	VC115 indicates the location at which an in-transit vehicle will be tested for emissions.

VDI - Value Description or Information

To provide detailed description of a financial value

TRANSACTION SETS USED IN
205 872

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

07	C0706
08	P0809
10	C1011

Semantic Notes

02	VDI02 describes the value detail that qualifies the quantity in VDI03, the percent value in VDI04, and the monetary amount in VDI05.
06	VDI06 indicates the sequential number of the payment at which a value detail option can occur or a value detail option period begins.
07	VDI07 indicates the sequential number of the payment at which a value detail option period ends.
09	VDI09 contains the date or time associated with the value detail.
11	VDI11 contains the term associated with the value detail.
12	VDI12 indicates the multiplier to be used in rounding the value.

VEH - Vehicle Information

To provide descriptions that identify a specific vehicle

TRANSACTION SETS USED IN

10	C1017
18	P1819
20	L200221

21 P2122
26 C2617

Semantic Notes

04 VEH04 applies to VEH05, VEH06, and VEH07.
05 VEH05 is the vehicle make.
06 VEH06 is the vehicle model.
07 VEH07 is the vehicle style.
08 VEH08 is the length of a vehicle measured in feet.
09 VEH09 is the vehicle reference number.
10 VEH10 is the vehicle registration state or province.
11 VEH11 is used to identify a territory as defined by trading partners.
12 VEH12 is the used car indicator. A "Y" indicates the vehicle is a used vehicle; an "N" indicates the vehicle is a new vehicle. A value of "U" indicating 'unknown' cannot be used.
13 VEH13 is the original cost of the vehicle when it was new (i.e., OCN - original cost new).
14 VEH14 is the vehicle altered indicator. A "Y" indicates the vehicle was altered; an "N" indicates the vehicle was not altered. A value of "U" indicating 'unknown' cannot be used.
15 VEH15 is the value of alterations for a vehicle.
17 VEH17 is the Country of the State in VEH10 or the country subdivision in VEH26.
18 VEH18 is the Name of the Vehicle Owner.
19 VEH19 is the Residence Country of the Vehicle Owner in VEH18.
24 VEH24 is the transponder number of the vehicle.
25 VEH25 is the Department of Transportation (DOT) Number of the vehicle.

VID - Conveyance Identification

To identify a conveyance and its attributes

TRANSACTION SETS USED IN
309 350 355 358 359 601

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX

Syntax Notes

14	L141518
15	E1518
15	C1516
16	L161518
18	C1816

Semantic Notes

12	VID12 is the Census Schedule K code for the foreign port of loading on a vessel.
13	VID13 is the Standard Carrier Alpha Code (SCAC) of the Haulage Rights Carrier.
14	VID14 is the license plate of the equipment.
15	VID15 is the state or province of the license in the VID14.
16	VID16 is the country of the license in the VID15 or VID18.
17	VID17 is the ACE (Automated Commercial Environment) ID of the equipment identified in the VID03.
18	VID18 is the country subdivision of the license in the VID14.

VIT - Manufacturer Mineral, Vitamin, and Nutrient Declaration

Specifying the mineral, vitamin, nutrient, or other ingredient claims as declared on the product packaging

TRANSACTION SETS USED IN

832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1321	Condition Indicator Code	1	M	ID	2/3
02	738	Measurement Qualifier	1	M	ID	1/3

VR - Rate Origin

To provide rate-origin information

TRANSACTION SETS USED IN

129

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	353	Transaction Set Purpose Code	1	M	ID	2/2
02	171	Tariff Number	1	M	AN	1/7
03	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4

05	234	Product/Service ID	1	X	AN	1/80
06	235	Product/Service ID Qualifier	1	X	ID	2/2
07	234	Product/Service ID	1	X	AN	1/80
08	451	Warehouse Lot Number	1	O	AN	1/12
09	893	Warehouse Detail Adjustment Identifier Code	1	O	ID	1/1
10	235	Product/Service ID Qualifier	1	X	ID	2/2
11	234	Product/Service ID	1	X	AN	1/80

Syntax Notes

03	R0304
04	P0405
06	P0607
10	P1011

Semantic Notes

01	Quantity received.

W08 - Receipt Carrier Information

To identify carrier equipment and condition

TRANSACTION SETS USED IN

944

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	91	Transportation Method/Type Code	1	M/Z	ID	1/2
02	140	Standard Carrier Alpha Code	1	X	ID	2/4
03	387	Routing	1	O	AN	1/35
04	206	Equipment Initial	1	X/Z	AN	1/4
05	207	Equipment Number	1	X	AN	1/15
06	225	Seal Number	1	O	AN	1/15
07	225	Seal Number	1	O	AN	1/15
08	407	Seal Status Code	1	O	ID	2/2
09	400	Unit Load Option Code	1	O	ID	2/2

Syntax Notes

02 R0204

04 P0405

Semantic Notes

01 If W0801 equals "B", "E", "H", "I", "K", "L", "M", "P", or "T", then W0802 must be present.

04 W0804 is required when W0801 equals "G" or "R".

Comments

02 W0802 is required for motor shipments, and W0803 and W0804 are required for rail shipments.

W09 - Equipment and Temperature

To relate equipment type and required temperatures

TRANSACTION SETS USED IN

300 301 304 310 312 322 324 325 940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	40	Equipment Description Code	1	M	ID	2/2
02	408	Temperature	1	X/Z	R	1/4
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2
04	408	Temperature	1	X/Z	R	1/4
05	355	Unit or Basis for Measurement Code	1	X	ID	2/2
06	3	Free-form Message	1	O/Z	AN	1/60
07	1122	Vent Setting Code	1	O	ID	1/1
08	488	Percent, Integer Format	1	O/Z	N0	1/3
09	380	Quantity	1	O/Z	R	1/15

Syntax Notes

02	P0203
04	P0405

Semantic Notes

02	W0902 is the minimum allowable temperature condition for shipment; (the qualifying temperature scale is specified in W0903).
04	W0904 is the maximum allowable temperature condition for shipment; (the qualifying temperature scale is specified in W0905).
06	W0906 is used to describe the environment required within an ocean-type, refrigerated container when other than normal air is required.
08	W0908 is the humidity percentage.
09	W0909 is the number of air exchanges per hour.

W1 - Block Identification

To identify the block identification of a specific cut of cars relating to this interchange report

TRANSACTION SETS USED IN

418

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	42	Block Identifier	1	M	AN	1/12

W10 - Warehouse Additional Carrier Information

To transmit shipping information and requirements

TRANSACTION SETS USED IN
943 945

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	400	Unit Load Option Code	1	O	ID	2/2
02	406	Quantity of Pallets Shipped	1	O	N0	1/3
03	399	Pallet Exchange Code	1	O	ID	1/1
04	225	Seal Number	1	O	AN	1/15
05	225	Seal Number	1	O	AN	1/15
06	408	Temperature	1	X/Z	R	1/4
07	355	Unit or Basis for Measurement Code	1	X	ID	2/2
08	408	Temperature	1	X/Z	R	1/4
09	355	Unit or Basis for Measurement Code	1	X	ID	2/2

Syntax Notes

06 P0607
08 P0809

Semantic Notes

06 W1006 is the minimum allowable temperature condition for shipment (degrees Fahrenheit).
08 W1008 is the maximum allowable temperature condition for shipment (degrees Fahrenheit).

W12 - Warehouse Item Detail

To designate those line items that were shipped

TRANSACTION SETS USED IN

945

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	368	Shipment/Order Status Code	1	M/Z	ID	2/2
02	380	Quantity	1	O/Z	R	1/15
03	382	Number of Units Shipped	1	O	R	1/10
04	383	Quantity Difference	1	O	R	1/9
05	355	Unit or Basis for Measurement Code	1	O	ID	2/2
06	438	U.P.C. Case Code	1	X	AN	12/12
07	235	Product/Service ID Qualifier	1	X	ID	2/2
08	234	Product/Service ID	1	X	AN	1/80
09	451	Warehouse Lot Number	1	O	AN	1/12
10	81	Weight	1	X	R	1/10
11	187	Weight Qualifier	1	X	ID	1/2
12	188	Weight Unit Code	1	X	ID	1/1
13	81	Weight	1	X	R	1/10
14	187	Weight Qualifier	1	X	ID	1/2
15	188	Weight Unit Code	1	X	ID	1/1
16	438	U.P.C. Case Code	1	O	AN	12/12
17	235	Product/Service ID Qualifier	1	X	ID	2/2
18	234	Product/Service ID	1	X	AN	1/80
19	892	Line Item Change Reason Code	1	O	ID	2/2
20	893	Warehouse Detail Adjustment Identifier Code	1	O	ID	1/1
21	235	Product/Service ID Qualifier	1	X	ID	2/2
22	234	Product/Service ID	1	X	AN	1/80

Syntax Notes

06	R0607
07	P0708
10	P101112
13	P131415
17	P1718
21	P2122

Semantic Notes

01	Whenever W1201 contains "IS", W1216, W1217, and W1218 refer to the original item ordered.
02	W1202 is quantity ordered.

W13 - Item Detail Exception

To indicate exceptions to quantities and receiving condition for a specific product

TRANSACTION SETS USED IN

944

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M	R	1/15
02	355	Unit or Basis for Measurement Code	1	M	ID	2/2
03	412	Receiving Condition Code	1	M	ID	2/2
04	451	Warehouse Lot Number	1	O	AN	1/12
05	853	Damage Reason Code	1	O/Z	ID	2/2

Semantic Notes

05 W1305 is required when W1303 equals "01" indicating damaged product.

W14 - Total Receipt Information

To indicate total received quantity

TRANSACTION SETS USED IN

944

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M/Z	R	1/15
02	380	Quantity	1	O/Z	R	1/15
03	380	Quantity	1	O/Z	R	1/15
04	380	Quantity	1	O/Z	R	1/15
05	380	Quantity	1	O/Z	R	1/15

Semantic Notes

01	Quantity received.
02	Number of units shipped.
03	Quantity damaged/On-Hold.
04	Lading quantity received.
05	Lading quantity.

W15 - Warehouse Adjustment Identification

To provide identifying numbers and dates and other basic data for this transaction set

TRANSACTION SETS USED IN

947

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	373	Date	1	M	DT	8/8
02	31	Adjustment Number	1	X/Z	AN	1/22
03	31	Adjustment Number	1	X/Z	AN	1/22
04	353	Transaction Set Purpose Code	1	O	ID	2/2
05	640	Transaction Type Code	1	O	ID	2/2
06	306	Action Code	1	O	ID	1/2

Syntax Notes

02	R0203

Semantic Notes

02	W1502 is the identification assigned to an inventory level or status adjustment by the warehouse.
03	W1503 is the identification assigned to an inventory level or status adjustment by the depositor.

W17 - Warehouse Receipt Identification

To provide identifying numbers and date

TRANSACTION SETS USED IN

944

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	514	Reporting Code	1	M	ID	1/1
02	373	Date	1	M/Z	DT	8/8
03	394	Warehouse Receipt Number	1	M	AN	1/12
04	285	Depositor Order Number	1	O	AN	1/22
05	145	Shipment Identification Number	1	O	AN	1/30
06	176	Time Qualifier	1	X	ID	1/2
07	337	Time	1	X	TM	4/8
08	474	Master Reference (Link) Number	1	X	AN	1/22
09	472	Link Sequence Number	1	X	N0	6/6

Syntax Notes

06	P0607
08	P0809

Semantic Notes

02	W1702 is the date indicating the receipt of a delivery.

W18 - Probe Temperatures

To indicate receipt temperature by location

TRANSACTION SETS USED IN

944

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	456	Temperature Probe Location Code	1	M	ID	2/2
02	408	Temperature	1	M/Z	R	1/4
03	355	Unit or Basis for Measurement Code	1	O	ID	2/2

Semantic Notes

02 W1802 is the temperature of shipment at receipt.

W19 - Warehouse Adjustment Item Detail

To designate those items that were adjusted

TRANSACTION SETS USED IN

947

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	181	Quantity or Status Adjustment Reason Code	1	M	ID	2/2
02	477	Credit/Debit Quantity	1	M	R	1/10
03	355	Unit or Basis for Measurement Code	1	M	ID	2/2
04	438	U.P.C. Case Code	1	X	AN	12/12
05	235	Product/Service ID Qualifier	1	X	ID	2/2
06	234	Product/Service ID	1	X	AN	1/80
07	235	Product/Service ID Qualifier	1	X	ID	2/2
08	234	Product/Service ID	1	X	AN	1/80
09	451	Warehouse Lot Number	1	O	AN	1/12
10	81	Weight	1	O	R	1/10
11	187	Weight Qualifier	1	X	ID	1/2
12	188	Weight Unit Code	1	X	ID	1/1
13	81	Weight	1	O	R	1/10
14	187	Weight Qualifier	1	X	ID	1/2
15	188	Weight Unit Code	1	X	ID	1/1
16	529	Inventory Transaction Type Code	1	O	ID	1/2
17	235	Product/Service ID Qualifier	1	X	ID	2/2
18	234	Product/Service ID	1	X	AN	1/80

Syntax Notes

04	R0405
05	P0506
07	P0708
10	C101112
13	C131415
17	P1718

W2 - Equipment Identification

To identify equipment and the commodity being carried

TRANSACTION SETS USED IN
228 322 418

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	206	Equipment Initial	1	M	AN	1/4
02	207	Equipment Number	1	M	AN	1/15
03	22	Commodity Code	1	O/Z	AN	1/30
04	40	Equipment Description Code	1	M	ID	2/2
05	578	Equipment Status Code	1	M	ID	1/2
06	577	Net Tons	1	O	N0	1/3
07	177	Intermodal Service Code	1	O	ID	1/2
08	240	Car Service Order Code	1	O	ID	3/5
09	373	Date	1	X/Z	DT	8/8
10	502	Type of Locomotive Maintenance Code	1	X	AN	2/2
11	206	Equipment Initial	1	X	AN	1/4
12	207	Equipment Number	1	X/Z	AN	1/15
13	761	Equipment Number Check Digit	1	O	N0	1/1
14	219	Position	1	O	AN	1/3
15	301	Car Type Code	1	O	ID	1/4
16	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1
17	1554	Tag Status Code	1	O	ID	1/1
18	1543	Equipment Orientation Code	1	O	ID	1/1

Syntax Notes

09 P0910
11 P1112

Semantic Notes

03 Commodity code (W203) is STCC.
09 W209 is the event date.
12 W212 (when available) is the chassis number if W204 equals "CC".
16 W216 indicates if equipment needs repair. A "Y" indicates equipment needs repair; an "N" indicates equipment does not need repair.

Comments

08 W208 is to contain the proper code when an empty car is being returned per ex parte 346, sub. 8. If proper code is unknown, default to 34617.
11 W211 (when available) is the chassis initial if W204 equals "CC". If unknown, use NONZ for chassis initial.

W20 - Line Item Detail - Packing

To specify packing details of the items shipped

TRANSACTION SETS USED IN

940 943 944

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	356	Pack	1	O	N0	1/6
02	357	Size	1	X	R	1/8
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2
04	81	Weight	1	X	R	1/10
05	187	Weight Qualifier	1	X	ID	1/2
06	188	Weight Unit Code	1	X	ID	1/1
07	395	Unit Weight	1	O	R	1/8
08	183	Volume	1	X	R	1/8
09	355	Unit or Basis for Measurement Code	1	X	ID	2/2
10	397	Color	1	O	AN	1/10

Syntax Notes

02	P0203
04	P040506
08	P0809

W27 - Carrier Details (Warehouse)

To specify details of the transportation equipment and carrier routing details

TRANSACTION SETS USED IN
943 945

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	91	Transportation Method/Type Code	1	M	ID	1/2
02	140	Standard Carrier Alpha Code	1	X/Z	ID	2/4
03	387	Routing	1	X	AN	1/35
04	146	Shipment Method of Payment Code	1	O	ID	2/2
05	40	Equipment Description Code	1	O	ID	2/2
06	206	Equipment Initial	1	O/Z	AN	1/4
07	207	Equipment Number	1	O	AN	1/15
08	368	Shipment/Order Status Code	1	O	ID	2/2
09	152	Special Handling Code	1	O	ID	2/3
10	890	Carrier/Route Change Reason Code	1	O	ID	2/2

Syntax Notes

02 R0203

Semantic Notes

02 W2702 is required when W2701 equals "B", "E", "H", "I", "K", "L", "M", "P" or "T".

06 W2706 is required when W2701 equals "R".

Comments

00 Shipment/Order Status Code is used at the total-invoice level only when differences cannot be provided at the line-item level or when the entire order has been shipped complete.

W28 - Consolidation Information

To transmit freight consolidation information

TRANSACTION SETS USED IN
943 945

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	604	Consolidation Code	1	M	ID	1/1
02	81	Weight	1	X	R	1/10
03	187	Weight Qualifier	1	X	ID	1/2
04	188	Weight Unit Code	1	X	ID	1/1
05	466	Total Stop-offs	1	O	N0	1/2
06	310	Location Identifier	1	X	AN	1/30
07	309	Location Qualifier	1	X	ID	1/2
08	598	Bill of Lading/Waybill Number	1	O/Z	AN	1/50

Syntax Notes

02	P020304
06	P0607

Semantic Notes

08	W2808 is the master bill of lading number, the identification number assigned to a consolidated shipment of orders by the consolidator.

W3 - Consignee Information

To provide sufficient waybill information for delivery of shipment

TRANSACTION SETS USED IN
418 419

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	186	Waybill Number	1	X	N0	1/6
02	373	Date	1	X	DT	8/8
03	576	Abbreviated Customer Name	1	O	AN	2/12
04	19	City Name	1	X	AN	2/30
05	156	State or Province Code	1	X	ID	2/2
06	575	City Name Qualifier Code	1	O	ID	1/1

Syntax Notes

01	P0102
04	P0405
06	C0604

Comments

02	W302 is the waybill date.

W4 - Consignor Information

To provide sufficient information to identify the origin of shipment

TRANSACTION SETS USED IN

418

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	576	Abbreviated Customer Name	1	O	AN	2/12
02	140	Standard Carrier Alpha Code	1	X	ID	2/4
03	573	Freight Station Accounting Code	1	X	ID	1/5
04	19	City Name	1	X	AN	2/30
05	156	State or Province Code	1	X	ID	2/2

Syntax Notes

02	P0203
02	R0204
04	P0405

Comments

04	W404 and W405 are not required if W402 and W403 are supplied.

W5 - Carrier and Route Information

To specify carrier and routing sequences and details

TRANSACTION SETS USED IN
418 419

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M	ID	2/4
02	19	City Name	1	O	AN	2/30
03	140	Standard Carrier Alpha Code	1	O	ID	2/4
04	19	City Name	1	O	AN	2/30
05	140	Standard Carrier Alpha Code	1	O	ID	2/4
06	19	City Name	1	O	AN	2/30

Comments

02	W502, W504, and W506 is the station or city name at which carriers interchange shipments.

W6 - Special Handling Information

To provide special handling information that may be necessary for safe handling of shipment

TRANSACTION SETS USED IN

418 897 940 945

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	152	Special Handling Code	1	M	ID	2/3
02	152	Special Handling Code	1	O	ID	2/3
03	152	Special Handling Code	1	O	ID	2/3
04	152	Special Handling Code	1	O	ID	2/3

W66 - Warehouse Carrier Information

To specify transportation instructions relating to shipment

TRANSACTION SETS USED IN

940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	146	Shipment Method of Payment Code	1	M	ID	2/2
02	91	Transportation Method/Type Code	1	M	ID	1/2
03	399	Pallet Exchange Code	1	O	ID	1/1
04	400	Unit Load Option Code	1	O	ID	2/2
05	387	Routing	1	O	AN	1/35
06	433	F.O.B. Point Code	1	O	ID	2/2
07	434	F.O.B. Point	1	O	AN	1/30
08	625	COD Method of Payment Code	1	X	ID	1/1
09	610	Amount	1	X/Z	N2	1/15
10	140	Standard Carrier Alpha Code	1	O	ID	2/4

Syntax Notes

08 P0809

Semantic Notes

09 W6609 is the monetary amount of the charges to be collected on delivery of order.

W76 - Total Shipping Order

To specify summary details of total items shipped in terms of quantity, weight, and volume

TRANSACTION SETS USED IN

940

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	380	Quantity	1	M/Z	R	1/15
02	81	Weight	1	X	R	1/10
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2
04	183	Volume	1	X	R	1/8
05	355	Unit or Basis for Measurement Code	1	X	ID	2/2
06	398	Order Sizing Factor	1	O	R	1/10

Syntax Notes

02 P0203
04 P0405
06 C0603

Semantic Notes

01 W7601 is quantity ordered.

Comments

01 Quantity ordered (W7601) is a hash total and the unit of measure is not required.

WIN - Wine Information

To specify wine composition and related characteristics

TRANSACTION SETS USED IN
832 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	C073	Composite Grape Varietal Sequence	1	O		
02	1825	Color	1	O/Z	ID	2/3
03	C074	Composite Date Time Period	1	O/Z		
04	1831	Wine Quality Designation	1	O	ID	2/3

Semantic Notes

02 WIN02 indicates the color of the wine

03 WIN03 indicates one or more grape harvest years, as part of a particular wine composition

WLD - Workload Detail

To provide information on a workload task

TRANSACTION SETS USED IN
132

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	66	Identification Code Qualifier	1	X/Z	ID	1/2
02	67	Identification Code	1	X	AN	2/80
03	1142	Academic Grade or Course Level Code	1	O	ID	1/2
04	1131	Level of Individual, Test, or Course Code	10	O	ID	2/2
05	609	Count	1	O/Z	N0	1/9
06	1430	Day Rotation	1	O/Z	AN	1/7
07	609	Count	5	O/Z	N0	1/9
08	93	Name	1	O/Z	AN	1/60
09	1132	Instructional Setting Code	1	O	ID	1/2
10	954	Percentage as Decimal	1	O/Z	R	1/10

Syntax Notes

01	P0102

Semantic Notes

01	WLD01 and WLD02 identify the workload task, e.g. a course, assignment, or other activity.
05	WLD05 indicates the period occurrence number for the workload task.
06	WLD06 indicates the days of the week on which the workload task is performed.
07	WLD07 indicates the weeks of the month in which the workload task is performed. Positionality of occurrences of WLD07 is not significant.
08	WLD08 indicates the name of the workload task.
10	WLD10 indicates the percent of time spent on the workload task.

WS - Work Schedule

To specify an individual's work schedule

TRANSACTION SETS USED IN
148 274

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	678	Ship/Delivery or Calendar Pattern Code	1	M/Z	ID	1/2
02	337	Time	1	O/Z	TM	4/8
03	337	Time	1	O/Z	TM	4/8

Semantic Notes

01 WS01 is the work schedule day(s) of week.
02 WS02 is the work start time using local time zone of the work place.
03 WS03 is the work end time using local time zone of the work place.

X01 - Automated Manifest Archive Status Details

To specify the automated manifest in the U.S. Customs and Border Protection (CBP) system that is pending archive or actually archived

TRANSACTION SETS USED IN
354

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	309	Location Qualifier	1	M	ID	1/2
03	310	Location Identifier	1	M/Z	AN	1/30
04	897	Vessel Code Qualifier	1	X	ID	1/1
05	597	Vessel Code	1	X	ID	1/8
06	182	Vessel Name	1	O	AN	2/50
07	55	Flight/Voyage Number	1	O	AN	2/30
08	374	Date/Time Qualifier	1	O	ID	3/3
09	373	Date	1	O	DT	8/8
10	380	Quantity	1	O/Z	R	1/15

Syntax Notes

04 P0405

Semantic Notes

01 X0101 is the carrier's Standard Carrier Alpha Code (SCAC) code

03 X0103 is used for Customs District port of unlading

10 X0110 is the number of open bills remaining on the manifest

Comments

08 When X0108 is "162" it designates the pending archive date. When X0108 is "163" it designates the actual date archived.

09 X0109 use pending archive date or actual date archived

X02 - Automated Manifest Bills Eligible/Overdue Archive Details

To specify bills of lading overdue archive

TRANSACTION SETS USED IN

354

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
02	140	Standard Carrier Alpha Code	1	M/Z	ID	2/4
03	598	Bill of Lading/Waybill Number	1	M/Z	AN	1/50
04	140	Standard Carrier Alpha Code	1	X/Z	ID	2/4
05	598	Bill of Lading/Waybill Number	1	X/Z	AN	1/50

Syntax Notes

04 P0405

Semantic Notes

01 X0201 is the carrier's Standard Carrier Alpha Code (SCAC).
02 X0202 is the unique bill of lading issuer code.
03 X0203 is the unique bill of lading number.
04 X0204 is the issuer code for the consolidated shipment.
05 X0205 is the consolidated bill number.

X1 - Export License

To transmit information contained on an export license

TRANSACTION SETS USED IN

104 215 304 309 310 311 355 358 404 417 601 841 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	83	Code For Licensing, Certification, Registration, or Accreditation Agency	1	O	ID	1/2
02	50	Export License Number	1	O	AN	6/35
03	51	Export License Status Code	1	O	ID	1/1
04	373	Date	1	O/Z	DT	8/8
05	52	Export License Symbol Code	1	O	ID	1/2
06	48	Export License Control Code	1	O	ID	1/1
07	26	Country Code	1	O	ID	2/3
08	141	Schedule B Code	1	O	ID	7/10
09	210	International/Domestic Code	1	O	ID	1/1
10	80	Lading Quantity	1	O	N0	1/7
11	148	Lading Value	1	O	R	2/9

14	212	Unit Price	1	O	R	1/17
15	1306	U.S. Government License Type	1	O	AN	1/1
16	67	Identification Code	1	O/Z	AN	2/80
17	310	Location Identifier	1	O/Z	AN	1/30

Semantic Notes

04 X104 is the export license expiration date.

16 X116 is the export classification code number (ECCN).

17 X117 is the Schedule D designation for the central location where the Shipper Export Declarations (SEDs) have been batch filed.

X2 - Import License

To transmit import license number and effective dates

TRANSACTION SETS USED IN
104 215 304 310 311 841 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	70	Import License Number	1	M	AN	6/30
02	373	Date	1	O/Z	DT	8/8
03	373	Date	1	O/Z	DT	8/8
04	70	Import License Number	1	X	AN	6/30
05	373	Date	1	O/Z	DT	8/8
06	373	Date	1	O/Z	DT	8/8

Syntax Notes

05 C0504
06 C0604

Semantic Notes

02 X202 is the date the import license was issued.
03 X203 is the date the import license expires.
05 X205 is the date the import license was issued.
06 X206 is the date the import license expires.

Comments

04 X204 through X206 are used to transmit letter of credit amendment or addendum information.

X4 - Customs Release Information

To identify items for release

TRANSACTION SETS USED IN
350

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	598	Bill of Lading/Waybill Number	1	O/Z	AN	1/50
02	380	Quantity	1	O/Z	R	1/15
03	581	Customs Entry Type Code	1	X	ID	2/3
04	601	Customs Entry Number	1	X	AN	1/50
05	373	Date	1	M/Z	DT	8/8
06	337	Time	1	X/Z	TM	4/8
07	35	Bill of Lading Disposition Code	1	M	ID	2/3
08	598	Bill of Lading/Waybill Number	1	X	AN	1/50
09	140	Standard Carrier Alpha Code	1	M	ID	2/4
10	140	Standard Carrier Alpha Code	1	X	ID	2/4
11	206	Equipment Initial	1	O	AN	1/4
12	207	Equipment Number	1	O	AN	1/15
13	310	Location Identifier	1	O	AN	1/30
14	310	Location Identifier	1	O/Z	AN	1/30
15	128	Reference Identification Qualifier	1	X	ID	2/3
16	127	Reference Identification	1	X	AN	1/80
17	623	Time Code	1	O/Z	ID	2/2
18	310	Location Identifier	1	O/Z	AN	1/30
19	310	Location Identifier	1	O/Z	AN	1/30
20	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

03	P0304
08	P0810
15	P1516
17	C1706
18	C1803
19	C1903

Semantic Notes

01	X401 is the unique bill of lading number.
02	X402 is used for quantity released.
05	X405 is the date that the disposition code was posted to Customs file.
06	X406 is the time for the disposition specified in X407.
14	X414 is the U.S. Customs and Border Protection (CBP) Facilities Information and Resource Management System (FIRMS) code or the Canadian Customs Sub-Location code.
17	X417 reflects the time zone which the time reflects.

18 X418 is the Customs port of final destination.

19 X419 is the first foreign port of destination.

20 X420 is the disposition code re-sent indicator. A 'Y' value indicates the disposition code is being resent due to a Port of Discharge or Vessel Name change. An 'N' value indicates there was no disposition code re-send required.

Comments

08 X408 is the unique bill of lading number for consolidated shipments.

09 X409 is the unique bill of lading issuer code.

10 X410 is the issuer code for the consolidated shipment.

13 X413 is the Customs district port of transaction.

18 X418 is a 4 digit numeric Census Schedule D. It is the port of destination if X403 is 61. It is the port of export if X403 is 62 or 63.

19 X419 is a 5 digit numeric Census Schedule K if X403 is 62 or 63.

X7 - Customs Information

To indicate customs information

TRANSACTION SETS USED IN

404 410 417 841

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	61	Free-form Information	1	M	AN	1/30
02	61	Free-form Information	1	O	AN	1/30

XD - Placement/Pull Data

To define the status and positioning of cars within the location

TRANSACTION SETS USED IN
423 433

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	617	Switch Type Code	1	O	ID	2/2
02	310	Location Identifier	1	O/Z	AN	1/30
03	310	Location Identifier	1	O/Z	AN	1/30
04	322	Load/Empty Status Code	1	O	ID	1/1
05	901	Reject Reason Code	1	O	ID	2/2

Semantic Notes

02 XD02 is the Zone, Track, Spot (ZTS) number for the FROM location of the move.

03 XD03 is the Zone, Track, Spot (ZTS) number for the TO location of the move.

XH - Pro Forma - B13 Information

To specify a pro forma invoice and B13 Canada Customs Export Declaration information, required by U.S. Customs and Border Protection (CBP) and Canada Customs

TRANSACTION SETS USED IN
404 417 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	100	Currency Code	1	M	ID	3/3
02	645	Related Company Indication Code	1	O	ID	1/1
03	150	Special Charge or Allowance Code	1	O	ID	3/3
04	610	Amount	1	O/Z	N2	1/15
05	503	Block 20 Code	1	O	ID	1/1
06	504	Chemical Analysis Percentage	1	O/Z	N2	2/9
07	212	Unit Price	1	O/Z	R	1/17

Semantic Notes

04 XH04 for a line item: is the freight or special charge; for the total invoice: the total charges -- expressed in the standard monetary denomination for the currency specified.

06 XH06 will contain percentage of a component of a product which is required by customs to be reported.

07 XH07 will contain unit price of the item being shipped.

Comments

00 This segment is to be used for shipments originating in Canada only.

XPO - Preassigned Purchase Order Numbers

To transmit preassigned purchase order numbers

TRANSACTION SETS USED IN

830 852

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	324	Purchase Order Number	1	M/Z	AN	1/22
02	324	Purchase Order Number	1	O	AN	1/22
03	66	Identification Code Qualifier	1	X	ID	1/2
04	67	Identification Code	1	X	AN	2/80

Syntax Notes

03 P0304

Semantic Notes

01 XPO01 is the preassigned purchase order number. If a range of purchase order numbers is to be transmitted, use XPO01 for the first number and XPO02 as the ending number.

Comments

03 XPO03 and XPO04 specify the location to which the purchase order numbers apply.

XQ - Reporting Date/Action

To specify reporting dates, actions to be taken and an identifying number

TRANSACTION SETS USED IN

852

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	305	Transaction Handling Code	1	M	ID	1/2
02	373	Date	1	M/Z	DT	8/8
03	373	Date	1	O	DT	8/8
04	127	Reference Identification	1	O/Z	AN	1/80
05	353	Transaction Set Purpose Code	1	O	ID	2/2

Semantic Notes

02 XQ02 is the reporting date. If reporting a date range, then XQ02 is the start date and XQ03 is the end date.

04 XQ04 is a unique report identifier assigned by the sender.

Y1 - Space Reservation Request

To specify information used to make a reservation for space on an ocean vessel

TRANSACTION SETS USED IN

300

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	135	Sailing/Flight Date Estimated	1	O	DT	8/8
02	373	Date	1	X/Z	DT	8/8
03	140	Standard Carrier Alpha Code	1	O	ID	2/4
04	91	Transportation Method/Type Code	1	O	ID	1/2
05	98	Entity Identifier Code	1	O	ID	2/3
06	19	City Name	1	O	AN	2/30
07	156	State or Province Code	1	O	ID	2/2
08	375	Tariff Service Code	1	O	ID	2/2
09	374	Date/Time Qualifier	1	X	ID	3/3

Syntax Notes

02 P0209

Semantic Notes

02 Y102 is the date the shipment for which space reservation is requested to be available at the origin.

Y2 - Container Details

To specify container information and transportation service to be used

TRANSACTION SETS USED IN

300 304 310 311

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	95	Number of Containers	1	M	N0	1/4
02	78	Container Type Request Code	1	O	ID	1/1
03	56	Type of Service Code	1	O	ID	2/2
04	24	Equipment Type Code	1	M	ID	4/4
05	91	Transportation Method/Type Code	1	O	ID	1/2
06	177	Intermodal Service Code	1	O	ID	1/2
07	140	Standard Carrier Alpha Code	1	O	ID	2/4
08	464	Container Terms Code	1	O	ID	3/3
09	465	Container Terms Code Qualifier	1	O	ID	1/1
10	466	Total Stop-offs	1	O	N0	1/2

Y3 - Space Confirmation

To specify confirmation information for space booking including numbers, dates, and load time

TRANSACTION SETS USED IN

301

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	13	Booking Number	1	M	AN	1/17
02	140	Standard Carrier Alpha Code	1	O	ID	2/4
03	373	Date	1	O/Z	DT	8/8
04	373	Date	1	O/Z	DT	8/8
05	154	Standard Point Location Code	1	O	ID	6/9
06	112	Pier Name	1	O	AN	2/14
07	373	Date	1	O/Z	DT	8/8
08	337	Time	1	X/Z	TM	4/8
09	91	Transportation Method/Type Code	1	O	ID	1/2
10	375	Tariff Service Code	1	O	ID	2/2
11	623	Time Code	1	O/Z	ID	2/2

Syntax Notes

11 C1108

Semantic Notes

03 Y303 is the date of departure of the vessel.
