04 Y304 is the estimated arrival date at the port of discharge.

07 Y307 is the required pier date.

08 Y308 is the load time.

11 Y311 is the time zone which the time reflects.

Comments

01 If space is available, all of the conditional data elements in segment Y3 are required. If the requested space is not available, Y301 is the booking number 'decline'.

Y4 - Container Release

To transmit information relative to containers available for release

TRANSACTION SETS USED IN

301

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	13	Booking Number	1	O/Z	AN	1/17
02	13	Booking Number	1	O	AN	1/17
03	373	Date	1	O/Z	DT	8/8
04	154	Standard Point Location Code	1	O/Z	ID	6/9
05	95	Number of Containers	1	O	N0	1/4
06	24	Equipment Type Code	1	O	ID	4/4
07	140	Standard Carrier Alpha Code	1	O/Z	ID	2/4
08	309	Location Qualifier	1	X	ID	1/2
09	310	Location Identifier	1	X	AN	1/30
10	56	Type of Service Code	1	O	ID	2/2

Syntax Notes

08 P0809

Semantic Notes

01 Y401 is used for the first booking number and Y402 for the last booking number in a range of numbers. If only one booking number is used, Y402 is omitted.

03 Y403 is the date of container availability for pickup.

04 Y404 is the Standard Point Location Code (SPLC) of the container pickup location.

07 Y407 identifies the carrier to whom containers will be released, if known.

Y5 - Space Booking Cancellation

To specify booking number for cancellation

TRANSACTION SETS USED IN

303

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	13	Booking Number	1	M	AN	1/17

Y6 - Authentication

To specify the authority for authorizing an action and the date authentication is made

TRANSACTION SETS USED IN

135 300 301 303 304 310 311 312 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	313	Authority Identifier Code	1	O	ID	2/2
02	151	Authority	1	M	AN	1/20
03	275	Authorization Date	1	M	DT	8/8

Y7 - Cargo Booking Priority

To assign a priority to a booking which would increase the possibility that this cargo would be booked on said voyage and not be shut out

TRANSACTION SETS USED IN

300 322 858 859

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	467	Priority	1	O	N0	1/1
02	470	Priority Code	1	X	N0	1/1
03	471	Priority Code Qualifier	1	X	AN	1/1
04	468	Port Call File Number	1	O	N0	4/4
05	373	Date	1	O/Z	DT	8/8

Syntax Notes

02 P0203

Semantic Notes

05 Y705 is the date specified by the shipper indicating when the shipment is required at the consignee's location.

YNQ - Yes/No Question

To identify and answer yes and no questions, including the date, time, and comments further qualifying the condition

TRANSACTION SETS USED IN

103 124 132 133 135 155 160 179 186 191 194 198 199 200 201 202 203 205 206 252 255 261 262 264 267 272 274 283 284 285 286 304 422 423 540 601 603 625 650 753 810 811 826 832 833 842 850 855 856 872 897

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	1321	Condition Indicator Code	1	X	ID	2/3
02	1073	Yes/No Condition or Response Code	1	M/Z	ID	1/1
03	1250	Date Time Period Format Qualifier	1	X	ID	2/3
04	1251	Date Time Period	1	X	AN	1/35
05	933	Free-form Message Text	1	O	AN	1/264
06	933	Free-form Message Text	1	O	AN	1/264
07	933	Free-form Message Text	1	O	AN	1/264
08	1270	Code List Qualifier Code	1	X	ID	1/3
09	1271	Industry Code	1	X	AN	1/30
10	933	Free-form Message Text	1	X/Z	AN	1/264

Syntax Notes

01	E010910
03	P0304
09	C0908

Semantic Notes

02	YNQ02 confirms or denies the statement made in YNQ01, YNQ09 or YNQ10. A "Y" indicates the statement is confirmed; an "N" indicates the statement is denied.
10	YNQ10 contains a free-form question when codified questions are not available.

ZA - Product Activity Reporting

To provide activity details concerning product being reported

TRANSACTION SETS USED IN
852

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	859	Activity Code	1	M	ID	2/2
02	380	Quantity	1	X	R	1/15
03	355	Unit or Basis for Measurement Code	1	X	ID	2/2
04	374	Date/Time Qualifier	1	X	ID	3/3
05	373	Date	1	X	DT	8/8
06	128	Reference Identification Qualifier	1	X	ID	2/3
07	127	Reference Identification	1	X	AN	1/80
08	1073	Yes/No Condition or Response Code	1	O/Z	ID	1/1

Syntax Notes

02	P0203
04	P0405
06	P0607

Semantic Notes

08 ZA08 determines if the product activity code in ZA01 refers to a product that is categorized as In-bond merchandise. A "Y" indicates that the activity code applies to a product that is In-bond; an "N" indicates that the activity code does not refer to a product that is In-bond.

ZC1 - Beginning Segment for Data Correction or Change

To transmit identifying numbers, dates, and other basic data relating to the transaction set

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN
322 404 417 858

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	145	Shipment Identification Number	1	O	AN	1/30
02	206	Equipment Initial	1	O	AN	1/4
03	207	Equipment Number	1	M	AN	1/15
04	244	Transaction Reference Number	1	M	AN	1/50
05	243	Transaction Reference Date	1	M	DT	8/8
06	202	Correction Indicator Code	1	M	ID	2/2
07	140	Standard Carrier Alpha Code	1	M	ID	2/4
08	91	Transportation Method/Type Code	1	M/Z	ID	1/2
09	761	Equipment Number Check Digit	1	O/Z	N0	1/1

Semantic Notes

08 If ZC108 is "R" (Rail), then ZC102 is required.

09 ZC109 is the equipment check digit for the equipment number in ZC103.

Comments

02 For any rail shipment, ZC102 is required.

ZD - Transaction Set Deletion - ID, Reason, and Source

This segment is used to specify the transaction set to be canceled

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN

998

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	143	Transaction Set Identifier Code	1	M	ID	3/3
02	145	Shipment Identification Number	1	O	AN	1/30

09	1127	Interline Settlement System Status Action or Dispute Code	1	O	ID	2/2
10	1127	Interline Settlement System Status Action or Dispute Code	1	O	ID	2/2
11	127	Reference Identification	1	O/Z	AN	1/80
12	127	Reference Identification	1	O/Z	AN	1/80
13	202	Correction Indicator Code	1	O	ID	2/2
14	761	Equipment Number CheckDigit	1	O/Z	N0	1/1
15	206	Equipment Initial	1	X/Z	AN	1/4
16	207	Equipment Number	1	X/Z	AN	1/15

Syntax Notes

04 P0405
15 P1516

Semantic Notes

05 ZR05 is waybill date for the number in ZR04.
11 ZR11 is the Unique Revenue Reference Waybill Identification Number (URRWIN).
12 ZR12 is the Unique Revenue Reference Waybill Identification Number (URRWIN) Version Number.
14 ZR14 is the equipment checkdigit for the equipment number in ZR03.
15 ZR15 is the car initial of the lead car of a multi-car waybill.
16 ZR16 is the car number of the lead car of a multi-car waybill.

ZT - Waybill Request Information

To transmit identity and reference information of the waybill being requested

TRANSACTION SETS USED IN
425

REF	ID	NAME	REPEAT	REQ	TYPE	MIN/MAX
01	214	Waybill Request Code	1	M	ID	1/1
02	206	Equipment Initial	1	M	AN	1/4
03	207	Equipment Number	1	M	AN	1/15
04	186	Waybill Number	1	X	N0	1/6
05	373	Date	1	X/Z	DT	8/8
06	761	Equipment Number CheckDigit	1	O	N0	1/1

Syntax Notes

04 P0405

Semantic Notes

05 ZT05 is waybill date for the number in ZT04.

Introduction to Composite Data Structures

This introduction is not part of this standard and is provided for information only.

Scope

This section provides the specifications of the composite data structures used in the construction of the segments that comprise the transaction sets developed by ASC X12.

Terms and Definitions

X12.6 Application Control Structure contains the formal definitions of terms related to electronic data interchange and ASC X12 Standards. The following definitions are consistent with those formal definitions and are provided in shortened form to aid in the understanding of this section.

Composite Data Structure

A composite data structure consists of two or more logically related component data elements in a defined sequence.

Composite Data Structure Identifier

Each composite data structure has a unique four-character reference identifier, used to locate it in the composite data structure directory. The first character is a "C" and the remaining characters contain digits.

Composite Data Structure Name

This section specifies each composite data structure's name.

Composite Data Structure Description

Each composite data structure is named and defined in a description statement that specifies the purpose of the composite. Where reference is made to a Figures Appendix, refer to the Figures section of this publication.

Used In Reference

The segments in which the composite data structure is used are listed under the heading "Segments Used In," referenced by segment ID. The transaction sets in which the composite data structure is used is listed under the heading "Transaction Sets Used In," referenced by transaction set ID.

Component Data Elements

When component data elements are combined to form a composite data structure, their relationship to the composite data structure is defined by a component data element sequence and a component data element condition designator.

Component Data Element Sequence Number

The sequence number ("C001-01," "C001-02," and so on.) indicates a component data element's position in the composite data structure.

Component Data Element Condition Designator

A component data element is assigned one of three condition designators ("M", "O", or "X") specifying its need to appear within the segment. Relational conditions may also exist between component data elements. See the introduction to Segment Directory for the definitions of these condition designators and relational conditions.

Notes and Comments

Notes and comments are provided to clarify or aid in understanding the intended use of the composite data structure. Notes are part of the standard. Comments are not part of the standard. Comments that are general in nature are identified by the number "00" to the left of the comment.

Deletions

Composite data structures approved for deletion effective for this release appear as flagged entities until the next annual release and will subsequently be removed at that version release.

Composite Data Structures

C001 - Composite Unit of Measure
C002 - Actions Indicated
C003 - Composite Medical Procedure Identifier
C005 - Tooth Surface
C006 - Oral Cavity Designation
C007 - Amount Qualifying Description
C022 - Health Care Code Information
C023 - Health Care Service Location Information
C024 - Related Causes Information
C028 - Assurance Token Parameters
C030 - Position in Segment
C031 - Encryption Key Information
C032 - Encryption Service Information
C033 - Security Token Value
C034 - Computation Methods
C035 - Provider Specialty Information
C036 - Index Identification
C037 - Tax Field Identification
C040 - Reference Identifier
C042 - Adjustment Identifier
C043 - Health Care Claim Status
C045 - Conditions Indicated
C046 - Composite Qualifier Identifier
C047 - Composite Type of Real Estate Asset Code
C048 - Composite Use of Proceeds
C050 - Certificate Look-up Information

C052 - Medicare Status Code
C053 - Standards Information
C055 - Tax Service Non-payment Exception Code
C056 - Composite Race or Ethnicity Information
C057 - Communication Number Component
C058 - Adjustment Reason
C059 - Drug Use Review (DUR)
C060 - Question and Answer
C061 - Member Health and Treatment Information
C062 - Tax Advantage Account Information
C063 - Change Quantities
C064 - Service Type
C065 - Product Unit Indicator
C066 - Selling or Ordering Product Basis Code
C067 - Composite Product Weight Basis
C068 - Composite Ingredient Information
C069 - Composite State or Province Code
C070 - Composite Channel of Distribution
C071 - Composite Multiple Language Text Information
C073 - Composite Grape Varietal Sequence
C074 - Composite Date Time Period
C075 - Composite Added Flavor
C076 - Composite Identification Codes
C077 - Composite Currency
C078 - Composite Dangerous Goods Subsidiary Classification Codes
C079 - Composite Multiple Language Extended Text Information
C080 - Composite Multiple Language Textural Data Information 4096 Characters

C081 - Composite Multi-UOM Range Minimum and Maximum.....
C082 - Sexual Orientation.....
C083 - Gender Identity Information.....
C084 - Pronoun Information.....
C085 - Recorded Sex or Gender.....
C998 - Context Identification.....
C999 - Reference in Segment.....

C001 - Composite Unit of Measure

To identify a composite unit of measure

(See X12 EDI Standard Figures, https://figures.x12.org, for examples of use)

Semantic Notes

01	C003-01 qualifies C003-02 and C003-08.
02	If C003-08 is used, then C003-02 represents the beginning value in the range in which the code occurs.
03	C003-03 modifies the value in C003-02 and C003-08.
04	C003-04 modifies the value in C003-02 and C003-08.
05	C003-05 modifies the value in C003-02 and C003-08.
06	C003-06 modifies the value in C003-02 and C003-08.
07	C003-07 is the description of the procedure identified in C003-02.
08	C003-08 represents the ending value in the range in which the code occurs.
09	C003-09 modifies the value in C003-02 and C003-08.
10	C003-10 modifies the value in C003-02 and C003-08.
11	C003-11 modifies the value in C003-02 and C003-08.
12	C003-12 modifies the value in C003-02 and C003-08.

Syntax Notes

09 P0910

Semantic Notes

01 C007-01 is the primary Amount Qualifier Code.

02 C007-02 is used when a compound Amount Qualifier Code is required.

03 C007-03 qualifies the Amount Qualifier Code referenced in C007-01 and C007-02.

04 C007-04 qualifies the Amount Qualifier Code referenced in C007-01 and C007-02.

05 C007-05 defines the time period of the Amount Qualifier Code referenced in C007-01 and C007-02.

06 C007-06 specifies whether the Amount Qualifier Code referenced in C007-01 and C007-02 is net or gross.

07 C007-07 qualifies the amount when an exact amount is not available.

08 C007-08 is used for free-form description of an amount.

09 C007-09 is an industry code from the code list identified in C007-10 that further provides additional information related to the Amount Qualifier Code referenced in C007-01 and C007-02.

Comments

00 This composite data element can be used to break apart the Amount Qualifier Code into its individual components.

08 C007-08 is only used when C007-01 is "FK" (other).

C022 - Health Care Code Information

To send health care codes and their associated dates, amounts and quantities

SEGMENTS USED IN
CLP EB HI

TRANSACTION SETS USED IN
269 270 271 275 278 834 835 837

REF	ID	NAME	REQ	TYPE	MIN/MAX

10	1271	Industry Code	O/Z	AN	1/30

Syntax Notes

03	P0304
08	E0809

Semantic Notes

01	C022-01 qualifies C022-02, C022-04, C022-05, C022-06, C022-08 and C022-10.
02	If C022-08 is used, then C022-02 represents the beginning value in a range of codes.
03	C022-03 is the date format that will appear in C022-04.
07	C022-07 qualifies C022-01.
08	C022-08 represents the ending value in a range of codes.
09	C022-09 is a value from Code Source 959 for the Present on Admission Indicator.
10	C022-10 is the attribute of the code in C022-02 from the same code list.

Comments

09	C022-09 would only need to be reported when C022-02 is a Diagnosis Code and range of diagnosis codes were NOT given in C022-08.

C023 - Health Care Service Location Information

To provide information that identifies the place of service or the type of bill related to the location at which a health care service was rendered

SEGMENTS USED IN

03	127	Reference Identification	X/Z	AN	1/80
04	863	X-Peg	X	R	1/6
05	864	Y-Peg	X	R	1/6

Syntax Notes

02 P0203
02 R0204
04 P0405

Semantic Notes

02 C036-02 is the beginning range sequence number. It is the first cell included in either an absolute or relative load pattern.

03 C036-03 is the ending range sequence number. It is the last cell in an array identified by an absolute load pattern. In a relative load pattern, it is the count of the number of cells included in the array range inclusive of the beginning range sequence number.

Comments

01 Use C036-01 to identify the array loading sequence or pattern.

02 Use C036-02 and C036-03 to express a range of array cell identifiers for which data is to be loaded to the array in an absolute reference or the beginning and total number of cells, inclusive, in a relative load pattern.

04 Use C036-04 and C036-05 to express the cell coordinates for an individual array cell value to be loaded to the array.

03	98	Entity Identifier Code	O/Z	ID	2/3
04	1270	Code List Qualifier Code	O/Z	ID	1/3

Semantic Notes

01 C043-01 (Claim Status Category Codes, Code Source 507) is used to specify the logical groupings of codes used in C043-02.

02 C043-02 is used to identify the status of an entire claim or a service line. Code Source 508 is referenced unless qualified by C043-04.

03 C043-03 identifies the entity associated with the Health Care Claim Status Code.

04 C043-04 is used to identify the Code Source referenced in C043-02.

C045 - Conditions Indicated

To identify one or more conditions qualifying an option or event

SEGMENTS USED IN

CDI

TRANSACTION SETS USED IN

04	1074	Type of Real Estate Asset Code	X/Z	ID	2/2
05	1074	Type of Real Estate Asset Code	O/Z	ID	2/2

Syntax Notes

05 C0504

Semantic Notes

01 C047-01 is used to identify the type of property structure (i.e., Attached, Detached) or a summary level type of real estate description.

02 C047-02 is used to identify the type of property construction (i.e., Site Built, Manufactured, Mobile Home).

03 C047-03 is used to further describe property structure, the unit relationship to the structure, or its site or other structures (i.e., High Rise, Zero Lot Line, Stacked).

04 C047-04 is used to describe the real estate development project.

05 C047-05 is used to describe the master or umbrella real estate development project if any.

C048 - Composite Use of Proceeds

To identify one or more uses of loan proceeds

SEGMENTS USED IN

LRQ LUC

TRANSACTION SETS USED IN

04	C0403
05	C0504
06	C0605
07	C0706

Semantic Notes

02	C05802 qualifies C05803, C05804, C05805, C05806 and C05807.

C059 - Drug Use Review (DUR)

To identify the components of a Drug Use Review (DUR) alert

SEGMENTS USED IN
SV7

TRANSACTION SETS USED IN
837

REF	ID	NAME	REQ	TYPE	MIN/MAX
01	1738	Reason for Service Code	M/Z	ID	2/2
02	1739	Professional Service Code	M/Z	ID	2/2
03	1740	Result of Service Code	M/Z	ID	2/2

Semantic Notes

01 C059-01 is a code identifying the type of utilization conflict detected.

02 C059-02 is a code identifying the intervention when a conflict code has been identified.

03 C059-03 is a code identifying the action taken in response to a conflict.

C060 - Question and Answer

Used to supply the answers to pre-defined questions

SEGMENTS USED IN

DRA

TRANSACTION SETS USED IN

REF	ID	NAME	REQ	TYPE	MIN/MAX
01	350	Assigned Identification	M/Z	AN	1/20
02	1073	Yes/No Condition or Response Code	M/Z	ID	1/1

Semantic Notes

01 C060-01 is the question number from a pre-defined questionnaire.

02 C060-02 is the answer to the pre-defined question. A "Y" value indicates the answer to the question is yes. A "N" value indicates the answer to the question is no.

C061 - Member Health and Treatment Information

To identify member health and treatment information

SEGMENTS USED IN
HLH

TRANSACTION SETS USED IN
834

REF	ID	NAME	REQ	TYPE	MIN/MAX
01	1212	Health-Related Code	O	ID	1/1

05	380	Quantity	O/Z	R	1/15
06	380	Quantity	O/Z	R	1/15

Syntax Notes

02 E0203

Semantic Notes

01 C063-01 is the Original Order Quantity.
02 C063-02 is the Quantity (+) Increase.
02 When C063-02 or C063-03 are used, only POC02 value QC may be used.
03 C063-03 is the Quantity (-) Decrease.
04 C063-04 is the Revised Order Quantity.
05 C063-05 is the Quantity Received.
06 C063-06 is the Quantity Left to Receive.

Comments

01 The Original Order Quantity is the original purchase order quantity ordered.
02 The Quantity Increase identifies an addition to the Current Order Quantity - (POC03).
03 The Quantity Decrease identifies a reduction to the Current Order Quantity (POC03).
04 The Revised Order Quantity is either (1) the Original Order Quantity including all Quantity Increases and Quantity Decreases or (2) the Current Order Quantity including the Quantity Increase or Quantity Decrease in this segment.
05 The Quantity Received is the quantity of product received to date.
06 The Quantity Left to Receive is based on the Current Order Quantity before any quantity changes are applied.

C064 - Service Type

To specify a service type and, optionally, a service type descriptor.

SEGMENTS USED IN

EB EQ

TRANSACTION SETS USED IN

270 271

REF	ID	NAME	REQ	TYPE	MIN/MAX

09	1073	Yes/No Condition or Response Code	O/Z	ID	1/1
10	1073	Yes/No Condition or Response Code	O/Z	ID	1/1

Semantic Notes

01 C065-01 identifies the trade item as the Base Unit.
02 C065-02 identifies the trade item as the Consumer Unit.
03 C065-03 identifies the trade item as the Orderable Unit.
04 C065-04 identifies the trade item as the Shipping Unit.
05 C065-05 identifies the trade item as the Invoice Unit.
06 C065-06 identifies the trade item as the Variable Measure Unit.
07 C065-07 identifies the trade item as the non-physical.
08 C065-08 identifies the trade item is a service.
09 C065-09 identifies the trade item is made up of multiple components.
10 C065-10 identifies the trade item is a kit.

Comments

01 Identifies the bottom or base unit of a product which is the lowest level of the item hierarchy intended or labelled for individual retail sale.
02 Identifies an item which is either consumable or usable by a patient or consumer.
03 The product a supplier identifies as a purchasable unit such as a case or pallet.
04 Identifies a logistic unit that is transported from one trading partner to another.
05 Identifies the product that is billed or invoiced.
06 A trade item that is sold by a non-fixed measure or dimension. Examples: Meat sold by the pound or a chain can be measured by the meter etc.
07 An indicator that the trade item is not a physical item and as such has no dimensional manifestation. For example a computer download of software, movies or music, a service agreement, or prepaid cellular time.

08	An indicator that the trade item is a service. Examples: A receipt that can be used for upgrading a pre-paid phone balance, an entrance ticket to an amusement park, sporting event, theatre, service maintenance, installation service, repairs.

C066 - Selling or Ordering Product Basis Code

Identifies the product's selling, ordering or invoicing basis between the trading partners.

SEGMENTS USED IN
UPI

TRANSACTION SETS USED IN
897

REF	ID	NAME	REQ	TYPE	MIN/MAX
01	1813	Product Procurement Basis Code	M	ID	1/1
02	355	Unit or Basis for Measurement Code	M/Z	ID	2/2
03	1813	Product Procurement Basis Code	X	ID	1/1
04	355	Unit or Basis for Measurement Code	X	ID	2/2
05	1813	Product Procurement Basis Code	X	ID	1/1
06	355	Unit or Basis for Measurement Code	X	ID	2/2

Syntax Notes

03	P0304
05	P0506

Semantic Notes

02	When C066-01 equals 9, C066-02 equals "EA"

Comments

00	This composite is used to inform the trading partner about the selling unit, ordering unit and invoicing unit product basis.

C067 - Composite Product Weight Basis

Provides multiple weight measurement types of a product.

SEGMENTS USED IN
P05 P06 P07 P08

TRANSACTION SETS USED IN
897

REF	ID	NAME	REQ	TYPE	MIN/MAX
01	395	Unit Weight	M	R	1/8
02	187	Weight Qualifier	M	ID	1/2
03	188	Weight Unit Code	M	ID	1/1

10	395	Unit Weight	X	R	1/8
11	187	Weight Qualifier	X	ID	1/2
12	188	Weight Unit Code	X	ID	1/1

Syntax Notes

04	P040506
07	P070809
10	P101112

Comments

00	C067 allows for multiple weight types using multiple measurement systems eg: net and gross weights presented in metric and imperial measurements. Example: A Product weighs 3.561 KG Gross Weight Metric = 7.850 LB Gross Weight Imperial; 3 KG Net Weight Metric = 6.613 LB Net Weight Imperial

C068 - Composite Ingredient Information

To identify the name of a single ingredient. A single ingredient may be conveyed in one or more languages.

03	1251	Date Time Period	X/Z	AN	1/35

Syntax Notes

02	P0203

Semantic Notes

01	C082-01 is a code that represents an individual's sexual orientation in relation to the pattern of emotional, sexual, and romantic attraction.
02	C082-02 indicates the format of the date that appears in C082-03.
03	C082-03 is the date or date range noting the period that an individual identified with the sexual orientation code specified in C082-01.

C083 - Gender Identity Information

Conveys an individual's personal sense of being a man, woman, boy, girl, nonbinary, or something else

03	1251	Date Time Period	X/Z	AN	1/35

Syntax Notes

02 P0203

Semantic Notes

01 C084-01 is a code that represents an individual's preferred pronouns.

02 C084-02 indicates the format of the date that appears in C084-03.

03 C084-03 is the date or date range noting the period that an individual identified with the pronoun code specified in C084-01.

C085 - Recorded Sex or Gender

Conveys an individual's recorded sex or gender and associated attribute

SEGMENTS USED IN

DMH

TRANSACTION SETS USED IN

111 148 186 187 252 255 256 267 268 270 271 273 274 275 276 277 278 500 820 834 837

01	1880	Recorded Sex or Gender Code	M/Z	ID	1/80
02	1881	Source Document Code	X/Z	ID	1/80
03	1882	Issuer Code	X/Z	ID	1/80
04	1250	Date Time Period Format Qualifier	X/Z	ID	2/3
05	1251	Date Time Period	X/Z	AN	1/35

Syntax Notes

02	P0203
04	P0405

Semantic Notes

01	C085-01 is a code that represents an individual's sex or gender as recorded on the document identified in C085-02.
02	C085-02 is a code identifying the source document that recorded the value in C085-01.
03	C085-03 is a code identifying the issuer of the document that recorded the value in C085-01.
04	C085-04 indicates the format of the date that appears in C085-05.
05	C085-05 is a date or date range noting when the code identified in C085-01 was recorded or effective.

C998 - Context Identification

Holds information to identify a context

MANAGEMENT COMPOSITE DATA STRUCTURE - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN

CTX

02	725	Data Element Reference Code	O/Z	AN	1/4

Semantic Notes

01 This data element holds the reference number of the simple or composite data element at segment level.

02 This data element holds the reference number of the simple data element within a composite.

Introduction to Simple Data Elements

This introduction is not part of this standard and is provided for information only.

Scope

This section provides the specifications of the data elements used in the construction of the segments that comprise the transaction sets developed by ASC X12.

Terms and Definitions

X12.6 Application Control Structure contains the formal definitions of terms related to electronic data interchange and ASC X12 Standards. The following definitions are consistent with those formal definitions and are provided in shortened form to aid in the understanding of this section.

Data Element

A data element can represent a qualifier, a value, or text, such as a description. Each data element is assigned an identifier used for reference.

Data Element Identifier

Each data element has a unique identifier composed of a combination of one to four digits for simple data elements as assigned in this section. If the identifier begins with a "C," this indicates that the data element is a composite data structure.

Data Element Name

This section specifies each data element's name.

Data Element Description

Each data element is defined in a description statement that specifies the purpose of the data element. Where reference is made to a Figures Appendix, refer to the Figures section of this publication.

Data Element Type

A data element may be one of seven types: numeric, decimal, identifier, string, date, time, binary. The symbols used to designate the data element types are as follows.

1. Numeric (Nn)

The numeric type of data element is symbolized by the two-position representation Nn. N indicates a numeric, and n indicates the decimal places to the right of a fixed, implied decimal point. The decimal point is not transmitted in the character stream. For negative values, the leading minus sign (-) is used. Absence of a sign indicates a positive value. The plus sign (+) should not be transmitted.

Leading zeros should be suppressed unless necessary to satisfy a minimum length requirement. The length of the data element is the number of digits used. The minus sign (-) is not counted when determining the length of the data element value.

2. Decimal Number (R)

The decimal type of data element is symbolized by the representation R. The decimal point is optional for integer values, but required for fractional values. For negative values the leading minus (-) sign is used. Absence of a sign indicates a positive value. The plus sign (+) should not be transmitted. Leading zeros should be suppressed unless necessary to satisfy a minimum length requirement. The minus sign and the decimal point are not counted when determining the length of the data element value.

3. Identifier (ID)

The identifier type of data element is symbolized by the representation ID. An identifier data element must always contain a value from a predefined list of values that is maintained by ASC X12 or by other bodies that are recognized by ASC X12 and identified by reference in the Code Source Directory .

For any code maintained by ASC X12, the Data Element Dictionary provides the code and its description. An "extended code description" (additional information to help explain the meaning of the code) may also be supplied; if so, it is displayed in italics following the code description. Extended code descriptions are not considered to be part of the standard.

The intent of the identifier type of data element is to allow the use of computer tables to validate data element values. Where mutually defined codes such as "ZZ" are allowed in accordance with this standard, interchange partners shall agree on the meaning of this code prior to the interchange. Mutually defined codes are intended only for temporary use pending assignment of a specific code value by ASC X12. ASC X12-approved codes appear following the definition of each data element of this type.

The code source appendix contains sources for code lists not maintained by ASC X12. Sources are numbered for reference purposes. References to this appendix are provided either under the heading "Code Sources," where it applies to the data element, or under the individual code definition where it applies to a specific code. For convenience, code sources are listed alphabetically by name in an index at the end of the code source section. The index also shows the page number where the code source can be found.

4. String (AN)

The string type of data element is symbolized by the representation AN. Contents of string-type data elements are a sequence of any letters, digits, spaces, and/or special characters.

5. Date (DT)

The date type of data element is symbolized by the representation DT. Format for the date type is either YYMMDD or CCYYMMDD in which CC is the first two digits of the calendar year, YY is the last two digits of calendar year, MM is the month (01 to 12), and DD is the day in the month (01 to 31).

6. Time (TM)

The time type of data element is symbolized by the representation TM. Format for this type is expressed in 24-hour clock format, HHMMSSd..d. HH is the numeric expression of the hour (00-23), MM is the numeric expression of the minute (00-59), SS is the numeric expression of the second (00-59), and d..d is the numeric expression of decimal seconds.

7. Binary (B)

The binary type of data element is symbolized by the representation B. The binary type is any sequence of octets ranging in value from binary 00000000 to binary 11111111. This data element type has no defined maximum length; actual length is specified by the immediately preceding data element. The B type may only exist in the BIN or BDS segments.

Data Element Length

This is the range, minimum to maximum, of the number of character positions available to represent the data element value. A data element may be of variable length with range from minimum to maximum, or it may be of fixed length in which the minimum is equal to the maximum. The range length is shown in the standard as MIN and MAX (minimum and maximum, respectively). Length may be defined differently for different types of data elements.

Restricted Data Elements

Restricted data elements are used for managing electronic data interchange and are not used in business application transaction sets. These data elements are indicated in this section by a shaded notation identifying them as "Restricted" and not be used in business applications.

Deletions

Data elements approved for deletion effective for this release, appear as flagged entities until the next annual release and will subsequently be removed at that version release.

Simple Data Elements

1 - Route Code
2 - Number of Accepted Transaction Sets
3 - Free-form Message
4 - Air Carrier Code
5 - Airport Code
7 - Bank Account Number
8 - Bank Client Code
9 - Late Reason Code
11 - Billing Code
12 - Payment Pattern
13 - Booking Number
14 - Carriage Value
16 - Charge Method of Payment Code
19 - City Name
20 - Client Bank Number
21 - Number of Shipments
22 - Commodity Code
23 - Commodity Code Qualifier
24 - Equipment Type Code
26 - Country Code
28 - Group Control Number
31 - Adjustment Number
32 - Delivery Date
33 - Lading Exception Code
34 - Service Standard
35 - Bill of Lading Disposition Code

39 - Entitlement Code
40 - Equipment Description Code
41 - Interchange Train Identification
42 - Block Identifier
46 - Ex Parte
47 - Export Filing Key Code
48 - Export License Control Code
50 - Export License Number
51 - Export License Status Code
52 - Export License Symbol Code
54 - Risk of Loss Code
55 - Flight/Voyage Number
56 - Type of Service Code
58 - Amount Charged
59 - Freight Class Code
60 - Freight Rate
61 - Free-form Information
62 - Hazardous Material Code
63 - Hazardous Material Contact
64 - Hazardous Material Description
65 - Height
66 - Identification Code Qualifier
67 - Identification Code
70 - Import License Number
71 - Inquiry Request Number
72 - Type of Service Offered Code
73 - Compensation Qualifier

74 - Declared Value
76 - Invoice Number
77 - Flashpoint Temperature
78 - Container Type Request Code
79 - Lading Description
80 - Lading Quantity
81 - Weight
82 - Length
83 - Code For Licensing, Certification, Registration, or Accreditation Agency
86 - Total Equipment
87 - Marks and Numbers
88 - Marks and Numbers Qualifier
90 - Measurement Unit Qualifier
91 - Transportation Method/Type Code
92 - Purchase Order Type Code
93 - Name
95 - Number of Containers
96 - Number of Included Segments
97 - Number of Transaction Sets Included
98 - Entity Identifier Code
100 - Currency Code
102 - Ownership Code
103 - Packaging Code
104 - Type of Bankruptcy Code
106 - Event
107 - Payment Method Type Code
108 - Pickup or Delivery Code

109 - Pickup Date
110 - Application Acknowledgment Code
111 - Pickup Time
112 - Pier Name
113 - Pier Number
114 - Port Name
115 - Port or Terminal Function Code
116 - Postal Code
117 - Prepaid Amount
118 - Rate
119 - Rate Basis Number
120 - Rate Combination Point Code
121 - Rate Class Code
122 - Rate/Value Qualifier
123 - Number of Received Transaction Sets
124 - Application Receiver's Code
125 - Security Holding Type Code
127 - Reference Identification
128 - Reference Identification Qualifier
129 - Referenced Pattern Identifier
132 - Release Code
133 - Routing Sequence Code
135 - Sailing/Flight Date Estimated
136 - Sales Comment
137 - Sales Reference Date
138 - Sales Reference Number
139 - Sales Terms Code

140 - Standard Carrier Alpha Code
141 - Schedule B Code
142 - Application Sender's Code
143 - Transaction Set Identifier Code
145 - Shipment Identification Number
146 - Shipment Method of Payment Code
147 - Shipment Qualifier
148 - Lading Value
150 - Special Charge or Allowance Code
151 - Authority
152 - Special Handling Code
153 - Special Handling Description
154 - Standard Point Location Code
156 - State or Province Code
157 - Shipment Status Code
159 - Status Location
160 - Status Report Request Code
163 - Stop Reason Code
165 - Stop Sequence Number
166 - Address Information
167 - Tare Weight
168 - Tariff Agency Code
169 - Tariff Item Number
170 - Tariff Item Part
171 - Tariff Number
172 - Tariff Section Number
173 - Tariff Supplement Identifier

174 - Terminal Name
176 - Time Qualifier
177 - Intermodal Service Code
181 - Quantity or Status Adjustment Reason Code
182 - Vessel Name
183 - Volume
184 - Volume Unit Qualifier
186 - Waybill Number
187 - Weight Qualifier
188 - Weight Unit Code
189 - Width
190 - Accomplish Code
191 - Advances
192 - Agent/Shipper Routing Code
193 - Net Amount Due
195 - Capacity Load Code
196 - Mortgagor Response Code
197 - Mortgagee Information Status Code
199 - Confidential Billing Request Code
200 - Hazardous Materials Page
201 - Business Transaction Status Code
202 - Correction Indicator Code
203 - Cubic Capacity
204 - Direct Store Delivery Sequence Number
205 - Dunnage
206 - Equipment Initial
207 - Equipment Number

208 - Hazardous Material Code Qualifier
209 - Hazardous Material Class Code
210 - International/Domestic Code
211 - Packaging Form Code
212 - Unit Price
213 - Lading Line Item Number
214 - Waybill Request Code
215 - Hazardous Classification Code
216 - Metric Qualifier
218 - Hazardous Placard Notation Code
219 - Position
220 - Billed/Rated-as Quantity
221 - Billed/Rated-as Qualifier
222 - Hazardous Endorsement Code
223 - Repetitive Pattern Number
224 - Hazardous Material Shipping Name
225 - Seal Number
226 - Section Seven Code
227 - Tariff Column
228 - Dangerous Goods Primary Classification Code
229 - Transit Registration Number
230 - Subsidiary Classification Code
231 - Cross Reference Type Code
232 - Weight Allowance
233 - Weight Capacity
234 - Product/Service ID
235 - Product/Service ID Qualifier

236 - Price Identifier Code
237 - Item List Cost
238 - Emergency Response Plan Number
240 - Car Service Order Code
241 - Protective Service Code
242 - Vent Instruction Code

AA	Air Ride Van
AC	Closed Container
AD	Flatbed Sliding Tandem
AF	Air Freight (Break Bulk)
AL	Container, Aluminum *Container must be made of aluminum*
AP	Aircraft
AT	Closed Container (Controlled Temperature)
BC	Covered Barge
BE	Bilevel Railcar Fully Open
BF	Bilevel Railcar Fully Enclosed
BG	Bogie

BH Bilevel Railcar Screened With Roof
BJ Bilevel Railcar Screened, No Roof
BK Container, Bulk
BO Barge Open
BR Barge
BU Buffer Car
BX Boxcar
CA Caboose
CB Chassis, Gooseneck
CC Container resting on a Chassis
CD Container with Bag Hangers
Rings or bars located in upper part of container walls to suspend bulk bags within the ocean container
CG Container, Tank (Gas)
CH Chassis
CI Container, Insulated
CJ Container, Insulated/Ventilated
CK Container, Heated/Insulated/Ventilated
CL Container (Closed Top - Length Unspecified)
CM Container, Open-Sided
CN Container
CP Coil Car Open
CQ Container, Tank (Food Grade-Liquid)
CR Coil-Car Covered
CS Container-Low Side Open Top
CT Container-High Side Open Top
CU Container (Open Top - Length Unspecified)
CV Closed Van
CW Container, Tank (Chemicals)
CX Container, Tank
CZ Refrigerated Container
DD Double-Drop Trailer
A flatbed with two drop decks
DF Container with Flush Doors
Container doors must be flush with the inside walls of the ocean-type containers
DT Drop Back Trailer
DX Boxcar, Damage Free Equipped
ET End of Train Device
FF Frozen Food Trailer
FH Flat Bed Trailer with Headboards
FN Flat Bed Trailer with No Headboards
FP Flatcar With Pedestal
FR Flat Bed Trailer - Removable Sides

FS Container with Floor Securing Rings
Appliances at floor level that can be used to secure cargo

FT Flat Bed Trailer

FX Boxcar Cushion Under Frame OF

GS Generator Set

HB Container with Hangar Bars
Container must be equipped with hangar beams/bars for garment shipments

HC Hopper Car (Covered)

HO Hopper Car (Open)

HP Hopper Car (Covered; Pneumatic Discharge)

HT Head of Train Device

HV High Cube Van

HY Hydrant-Cart
Used at large airports with installed distribution systems to make into-plane deliveries; distinguished from other types of fueling vehicles

ID Idler Car

IX Boxcar (Insulated)

LO Locomotive

LS Half Height Flat Rack

LU Load/unload Device on Equipment

M1 Motorcycle

NC Non Containerized Equipment

NX Boxcar (Interior Bulkheads)

OB Ocean Vessel (Break Bulk)

OT Open-top/flatbed trailer

OV Open Top Van

PL Container, Platform

PM Flat Bed Trailer, Pneumatic

PP Power Pack
A container holding a motor, generator, and fuel tank, used to provide power for refrigerated containers on a double stack train

PT Protected Trailer

PU Pickup Truck

RA Fixed-Rack, Flat-Bed Trailer
A flatbed trailer with an A-frame

RC Refrigerated (Reefer) Car

RD Fixed-Rack, Double Drop Trailer
A double-drop, flatbed with an A-frame

RE Flat Car (End Bulkheads)

RF Flat Car

RG Gondola Covered

RI Gondola Car (Covered - Interior Bulkheads)

RO Gondola Car (Open)

RR Rail Car

RS Fixed-Rack, Single-Drop Trailer
A single-drop, flatbed with an A-frame

RT Controlled Temperature Trailer (Reefer)

SA Saddle
Device to stack containers on a rail car

SC Service Car

SD Single-Drop Trailer
A flatbed trailer with one drop deck

SK Stack Car

SL Container, Steel
Container must be made of steel

SR STAK-RAK
A device upon which empty chassis may be stacked for movement "en bloc" on a railcar, stacktrain, trailer, or water-borne vessel

SS Container with Smooth Sides
Walls in ocean container must be flat/smooth

ST Removable Side Trailer

SV Van - Special Inside Length, Width or Height Requirements

TA Trailer, Heated/Insulated/Ventilated

TB Trailer, Boat

TC Trailer, Car

TD Tender Car

TF Trailer, Dry Freight

TG Trailer, Tank (Gas)

TH Truck, Open Top High Side

TI Trailer, Insulated

TJ Trailer, Tank (Chemicals)

TK Trailer, Tank (Food Grade-Liquid)

TL Trailer (not otherwise specified)

TM Trailer, Insulated/Ventilated

TN Tank Car

TO Truck, Open Top

TP Trailer, Pneumatic
A specialized trailer with a pneumatic device for loading or unloading

TQ Trailer, Electric Heat
A trailer with electric heat to keep product from freezing

TR Tractor

TT Telescoping Trailer

TU Truck, Open Top Low Side

TV Truck, Van

TW Trailer, Refrigerated
A refrigerated trailer capable of keeping product cold. Different from a temperature controlled trailer which is able to keep product at a constant temperature

UA Trilevel Railcar 20 Feet

UB Trilevel Railcar Screened, Fully Enclosed

UC Trilevel Railcar Screened, With Roof
UD Trilevel Railcar Screened, No Roof
UE Trilevel Railcar Screened, With Doors, No Roof
UL Unit Load Device (ULD)
UP Container, Upgraded
Container must be upgraded for higher weights
V1 Small Van
V2 Medium Van
V3 Long Wheelbase Van
V4 Extra Long Wheelbase Van
V5 Luton Van
V6 7.5 Ton Vehicle
V7 17.5 Ton Vehicle
VA Container, Vented
Dry container must have vent openings for air exchange
VE Vessel, Ocean
VL Vessel, Lake
VR Vessel, Ocean, Rollon-Rolloff
VS Vessel, Ocean, Lash
VT Vessel, Ocean, Containership
WR Container with Wavy or Ripple Sides
Walls must be wavy or ripple type
WY Railroad Maintenance of Way Car

41 - Interchange Train Identification

AC Air Charter

AE Air Express

AF Air Freight

AH Air Taxi
FAA approved carrier utilizing a 1 or 2 engine aircraft for on demand service

AP Air (Package Carrier)

AR Armed Forces Courier Service (ARFCOS)
A military organization whose mission involves the receipt, movement, and delivery of special categories of material

BB Breakbulk Ocean

BP Book Postal

BU Bus

CC Commingled Ocean

CE Customer Pickup / Customer's Expense

DA Driveaway Service
Movement of wheeled vehicle, wheeled equipment, or wheeled chassis of which is powered by a self-contained power unit (includes tractor/trailer combination)

DW Driveaway, Truckaway, Towaway
DoD policy includes all three terms in one. They mean collectively , a transportation method whereby a vehicle is moved under its own power by a driver, or loaded into or upon a carrier's equipment, or towed by carrier's equipment

ED Air Mobility Command (AMC) Channel and Special Assignment Airlift Mission

FA Air Freight Forwarder
A firm other than a railroad, motor, or water carrier, which represents itself as a common carrier and undertakes to assemble and consolidate shipments or provide for same and assumes responsibility for the air transportation of such property from point of receipt to its destination. Delivery is "Held in Bond"

FL Motor (Flatbed)

GG Geographic Receiving/Shipping
A collection of shipments that involve multiple origins, multiple destinations, and a single trailer, and are paid under a single freight bill

GR Geographic Receiving
A collection of shipments that involve a single origin, multiple destinations, and a single trailer, and are paid under a single freight bill

GS Geographic Shipping
A collection of shipments that involve multiple origins, a single destination, and a single trailer, and are paid under a single freight bill

HH Household Goods Truck

IP Intermodal (Personal Property)

LA Military Air

LD Local Delivery

LT Less Than Trailer Load (LTL)

MB Motor (Bulk Carrier)

MP Motor (Package Carrier)

MS Military Sealift Command (MSC)

PA Pooled Air
Outbound shipment from an airport consolidation point to a final destination via an air mover

PG Pooled Piggyback
Outbound shipment consisting of a trailer on a railcar from a consolidation point to a final destination in a rail move

PL Pipeline

PP Pool to Pool
Shipment moves from one consolidation point to another consolidation point before final delivery

PR Pooled Rail

PT Pooled Truck

RC Rail, Less than Carload
Movement by rail of a quantity of freight less than that required for the application of a carload rate

RO Ocean (Roll on - Roll off)

RR Roadrailer
Used for shipments that travel by roadrailer, i.e., a multimodal rail/highway trailer

SB Shipper Agent
Agent for piggyback code consolidation

SC Shipper Agent (Truck)
Motor carrier agent for piggyback trailer consolidators

SD Shipper Association
Non-profit cooperative consolidator or distributors of shipments by member firms

SE Sea/Air

SF Surface Freight Forwarder

SR Supplier Truck

SS Steamship

ST Stack Train

TA Towaway Service
Movement of shipper owned trailers or semi-trailers loaded and/or pulled by carrier furnished power unit

TC Cab (Taxi)

TT Tank Truck

VA Motor (Van)

VE Vessel, Ocean

VL Vessel, Lake

WP Water or Pipeline Intermodal Movement
A water move by barge or tanker followed by a pipeline move to the destination

XE Intermodal Expedited

Y1 Ocean Conference Carrier

Y2 Ocean Non-Conference Carrier

ZZ Mutually defined

CODE	DEFINITION & EXPLANATION
AAA	Pallet, Returnable
AAB	Splash Blend *Splash blending is the mixing of two gasoline products, of different octane levels, in a tank on the delivery vehicle to produce a third blended grade of motor fuel for resale*
AMM	Ammo Pack
AMP	Ampoule
ARS	Aerosol *A gas-tight, pressure-resistant container with a valve and propellant.*
ATH	Attachment *In containers and shipping devices, a component that can be added to provide additional functionality or security as required by the contents or method of transportation/handling*
BAG	Bag
BAL	Bale
BBL	Barrel
BDG	Banding *Something that binds, ties, or encircles the package/container to secure and maintain unit integrity*
BDL	Bundle
BEM	Beam
BIB	Bag-In-Box (BIB)
BIC	Bing Chest
BIN	Bin
BLK	Bulk
BLS	Blister Pack *A type of packaging in which the item is secured between a preformed (usually transparent plastic) dome or "bubble" and a paperboard surface or "carrier."*
BLT	Belting *As pertains to containers and shipping devices, a method of securing the contents to the conveyance device (or securing components of the shipping device to each other) using one or more bands of flexible material having high-tensile strength and a buckle or ratchet device for removing slack and maintaining tension*
BOB	Bobbin

BOT Bottle

BOX Box

BRC Bracing
Material or devices used to hold articles or sections of loads in position to prevent shifting during transportation

BRG Barge

BRK Brick Pack
A closed flat top container may form spout or has recloseable cap on side, or has straw and hole system

BSK Basket or hamper

BXI Box, with inner container

BXT Bucket

CAB Cabinet

CAG Cage

CAN Can

CAR Carrier

CAS Case

CBC Containers of Bulk Cargo

CBY Carboy

CCS Can Case

CHE Cheeses

CHS Chest

CLD Car Load, Rail

CNA Household Goods Container, Wood

CNB Container, MAC-ISO, LT. WGT. 8x8x20 Foot Air

CNC Container, Navy Cargo Transporter

CND Container, Commercial Highway Lift

CNE Container, Engine

CNF Container, Multi-walled, Secured to Warehouse Pallet

CNT Container

COL Coil

CON Cones

COR Core

CRD Cradle

CRF Corner Reinforcement
Usually in boxes or crates, additional material or components attached to adjacent panels to add support or prevent crushing or separation

CRT Crate

CSK Cask

CTN Carton

CX2 CONEX
A reusable container for shipment of cargo

CYL Cylinder

DBK Dry Bulk

DCN Decanter
A vessel with a stopper.

DIB Drink Box - Tetra Pak

DRK Double-length Rack

DRM Drum

DSK Double-length Skid

DTB Double-length Tote Bin

DUF Duffelbag

EGG Egg Crating
In containers and shipping devices, usually describes a type of interior dunnage which allows the contents to be individually segregated, horizontally and vertically, to provide protection during transportation and storage

ENV Envelope

EPR Edge Protection
A right-angle piece placed over the outermost perimeter edges of a container to distribute pressure and prevent collapse or cutting from banding, strapping, or handling

FIR Firkin

FLO Flo-bin

FRM Frame

FSK Flask

FWR Forward Reel

GAB Gable Top
An "A" shaped top container may form spout or has recloseable cap on side, or has straw and hole system

GRL Growler
A growler is a large glass, ceramic, or stainless-steel jug.

HED Heads of Beef

HGH Hogshead

HLR Howler
A small glass jug.

HPR Hamper

HPT Hopper Truck

HRB On Hanger or Rack in Boxes

HRK Half-Standard Rack

HTB Half-Standard Tote Bin

INT Intermediate Container

JAR Jar

JUG Jug

KEG Keg

KIT Kit

KRK Knockdown Rack

KTB Knockdown Tote Bin

LBK Liquid Bulk

LID Lip/Top
In packaging, the top or bottom of a container, usually the part that closes the opening; may

also be known as cap, over, or top

LIF Lifts

LNR Liners
Any material that separates a product within a container from the basic walls of the container

LOG Log

LSE Loose

LUG Lug

LVN Lift Van

MIX Mixed Container Types
More than one type of container is included in a shipment (shipment could consist of 3 pieces that include 1 box, 1 crate, and 1 basket)

ML2 MILVAN
A military owned demountable container that conforms to US and international standards and operates in a centrally controlled fleet for movement of military cargo

MRP Multi-Roll Pack

MS2 MSCVAN
A commercial (leased) or Government-owned shipping container controlled by the Military Sealift Command

MTR Miniature
A small bottle.

MUL Multipack
A bundle of products held together for ease of carrying by the consumer.

MXD Mixed

NOL Noil

PAB Pallet Box
A three-dimensional container which either has a pallet platform permanently attached at its base or alternatively requires a platform for its handling and storage as due to its constitution it cannot be handled without it.

PAF Pallet - 4 Way
A pallet that permits entry of handling equipment on each of its four sides

PAL Pail

PAT Pallet - 2 Way
A pallet that permits entry of handling equipment on opposing two of its four sides

PCK Packed - not otherwise specified

PCS Pieces

PIR Pirns

PKG Package

PLC Primary Lift Container
The largest (outermost) unitized package or articles secured together that can be handled (usually mechanically) in common shop floor/warehouse applications as a single entity; "primary" indicates preferred or mandatory

PLF Platform

PLN Pipeline

PLT Pallet

POU Pouch

POV Private Vehicle

PRK Pipe Rack

PRT Partitioning
The proceeds of applying separators or dividers

PWT Plastic-Wrapped Tray

QTR Quarter of Beef

RAL Rail (Semiconductor)

RCK Rack

REL Reel

RFT Reinforcement
In containers and shipping devices, a component (usually temporary) added to a container for a particular application to lend additional support under severe applications

ROL Roll

RVR Reverse Reel

SAH Sachet

SAK Sack

SCS Suitcase

SHA Shaker

SHK Shook

SHT Sheet
A thin layer of material usually used as a pad for extra protection by isolating/separating tiers or layers of parts within the package

SID Side of Beef

SKD Skid

SKE Skid, elevating or lift truck

SLP Slip Sheet
Shipping containers utilizing slip sheets, which are cardboard platforms used to hold product for storage or transportation

SLV Sleeve

SPI Spin Cylinders

SPL Spool

SPR Separator/Divider
In packaging, any material inserted between tiers or layers of articles to prevent contact and provide protection

SRW Shrink Wrap
In packaging, a method of securing a unit load by placing a large "bag" of plastic film over the components and applying heat to induce shrinkage and cause the bag to tighten around the contents

SSC Single Serving Cup

SSS Single Serve Shot
An alcoholic beverage container that is a spirit offering one serve one use.

STW Stretch Wrap
In packaging, a high-tensile plastic film, stretched and wrapped repeatedly around a unitized load to secure and maintain unit integrity

SV2 SEAVAN
A commercial or government-owned (or leased) shipping container which is moved via ocean transportation without wheels attached and is lifted on and off a ship

TBE Tube
TBN Tote Bin
TKR Tank Car
TKT Tank Truck
TLD Intermodal Trailer/Container Load (Rail)
TNK Tank
TRC Tierce
TRK Trunk and Chest
TRU Truck
TRY Tray
TSS Trunk, Salesmen Sample
TUB Tub
UNP Unpacked
UNT Unit
VEH Vehicles
VIL Vial
VOC Vehicle in Operating Condition
VPK Van Pack
WHE On Own Wheel
WLC Wheeled Carrier
WRP Wrapped
01 Aluminum
02 Tin
03 Hard Wood
04 As Specified by the DOT
05 Soft Wood
06 Polypropylene
07 Burlap
10 Chemically Hardened Fibre
11 High Density Polyethylene (HDPE)
12 Low Density Polyethylene (LDPE) Film
13 Cloth
14 Bi-Metal
15 Ceramic
A non-specific material made from clay and hardened by firing at a high temperature. Examples can include Terra-cotta, Earthenware, Stoneware, Porcelain, and High-Tech Ceramics.
16 Cloth Top
19 Cloth or Fabric
22 Compressed
25 Corrugated or Solid
28 Double-wall Paper
31 Fibre
34 Fibre (Paperboard)

37 Fiberboard
40 Fiberboard Metal
43 Glass
46 In Inner Containers
48 Wire/Cord
Something that binds, ties, or encircles the package/container to secure and maintain unit integrity
49 Insulated
50 Steel - Vinyl Coated
Steel that has been covered with a plastic material
51 Wire Mesh
52 Iron or Steel
53 Jumbo
54 Special Jumbo
55 Lead
58 Metal
59 Metal Cans
61 Moisture Resistant
64 Molded Plastic
67 Multiple-wall Paper (2 or more walls)
70 Multiple-wall Paper (3 or more walls)
71 Not Otherwise Specified
72 Paper - VCI
Water-resistant paper that is treated by the addition of materials to provide resistance to damage or deterioration by water in liquid form
73 Other than Glass
74 Other than Metal or Plastic Tubes, or Glass
75 Plastic - Vacuum Formed
Packaging material that is formed by heating plastic sheet and drawing it against the mold surface by evacuating the air between the sheet and the mold
76 Paper
77 Plastic - Structural Foam
A method of manufacturing containers and shipping devices by mixing plastic resins with a foaming agent, heating it and injecting the mix into a two-piece machined aluminum mold
78 Plastic - Injection Molded
Packaging material that is formed by melting the material and then forcing it under pressure into a cavity of a closed mold
79 Plastic
80 Polyethylene Lined
81 Plastic - Virgin
Plastic in the form of pellets, granules, powder, floc, or liquid that has not been subjected to use or processing other than for its initial manufacture
82 Pulpboard
83 Plastic - Regrind
A plastic prepared from discarded articles that have been reprocessed, often changing some of its original properties

84 Polystyrene
A polymer prepared by the polymerization of styrene as the sole monomer

85 Rubber

86 Foam
In packaging, a cushioning material used to reduce shock and vibration or abrasion

87 Polycoated

88 Rubber and Fabric

89 Special

90 Standard

91 Stainless Steel

92 Tubes, Metal or Plastic

94 Wood

95 Single Wall Corrugated Board
The structure formed by one corrugated inner member between two flat facings; also known as double face

96 Double Wall Corrugated Board
The structure formed by three flat facings and two intermediate corrugated members

97 Triple Wall Corrugated Board
The structure formed by four flat facings and three intermediate corrugated members

98 Polyvinyl Chloride (PVC)
Polyvinyl chloride, (IUPAC Poly (chloroethanediyl) commonly abbreviated PVC, is a thermoplastic polymer. It is a vinyl polymer constructed of repeating vinyl groups (ethenyls) having one of their hydrogens replaced with a chloride group

99 Polyethylene Terephthalate (PET)
Polyethylene terephthalate (sometimes written poly(ethylene terephthalate)), commonly abbreviated PET, PETE, or the obsolete PETP or PET-P, is a thermoplastic polymer resin of the polyester family and is used in synthetic fibers; beverage, food and other liquid containers; thermoforming applications; and engineering resins often in combination with glass fiber

CODE	DEFINITION & EXPLANATION
1	Final Port of Discharge (Operational) *Last port at which cargo is unloaded from vessel*
2	Collect Charge Location (Operational) *Place at which collect charges are paid*
3	Customs Office of Manifest Origin
4	Customs Office of Manifest Destination
5	Activity Location (Operational) *Place at which the activity being reported is occurring*
6	Origin Rail Intermodal Terminal
7	Destination Rail Intermodal Terminal
8	First Optional Port of Discharge
9	Second Optional Port of Discharge
A	Place of Acceptance (Operational) *Place at which carrier actually accepts cargo from shipper or his agent*
B	Reconsolidation Point (Operational) *Place at which loose or other noncontainerized cargo is regrouped for further carriage*
C	De-Consolidation Point (Operational) *Place at which loose or other noncontainerized cargo is ungrouped for delivery*
D	Port of Discharge (Operational) *Port at which cargo is unloaded from vessel*
E	Place of Delivery (Contractual) *Place at which cargo leaves its care and custody of carrier*
F	Freight Payable At (Contractual) *Carrier's location of collection of freight*
G	Port of Entry (Operational) *Place at which cargo actually enters a country where the cargo is not part of its commerce*
H	Port of Exit (Operational) *Place at which cargo actually leaves a country where the cargo is not part of its commerce*
I	Interim Point (Operational) *Place at which cargo is transferred from one inland means of transport to another*
J	Bill of Lading Port of Loading (Contractual) *Place at which cargo is loaded on board the means of transport*
K	Bill of Lading Port of Discharge (Contractual) *Place at which cargo is discharged from means of transport*

L Port of Loading (Operational)
Port at which cargo is loaded on vessel

M Destination (Operational)
Place at which carrier actually turns cargo to consignee or his agent

N Final Destination (Operational)
Consignee's facility at which shipment ends its movement at cargo's expense

O Origin (Operational)
Shipper's facility at which shipment begins its movement at cargo's expense

P Dispatching Pool (Operational)
Place from which equipment is dispatched

Q Bill of Lading Origin of Goods (Contractual)
Origin of goods or shipments, or both as denoted on bill of lading

R Place of Receipt (Contractual)
Place at which cargo enters the care and custody of carrier

S Return Pool (Operational)
Place at which equipment is returned

T Transshipment Port (Contractual)
Place at which cargo is transferred to another carrier

V Prepaid Charge Location (Operational)
Place at which prepaid charges are paid

W Bill of Lading Release Office (Operational)
Place at which original bills of lading are released to the shipper or his agent

X Third Optional Port of Discharge

Y Relay Port (Operational)
Port at which cargo is transferred from one vessel to another

116 - Postal Code

Code specifying international postal zone code excluding punctuation and blanks (zip code for United States)

TYPE=**ID** MIN=**3** MAX=**15**

TB Per 2 Trailers Same Day
TC Per 3 Trailers Same Day
TD Per 4 Trailers Same Day
TM Per Mile Per Ton
TN Per Train Rate
TP Per Tag
TR Per Trailer (Per Train)
VA Per Vehicle Moved
Describes a transportation rate that applies to every vehicle conveyed in an individual shipment
VH Per Vehicle Used
Describes a transportation rate that applies to each vehicle used for the movement of an individual shipment
VM Volume
VP Maximum Per Vehicle
VR Per Rail Car Used
Describes a transportation rate that applies to each rail car used for the movement of an individual shipment
VS Various
VT Per Mile per Vehicle
Describes a rate that applies to the distance a conveying vehicle is used
VU Per Mile Per Vehicle (Rail Car) Used
VV Per Vehicle per State
Describes a rate that applies to the number of security vehicles per state needed to surveil a shipment
WK Per Week
WM Weight or Measurement
XP Maximum Per Person
YR Per Year
ZZ Mutually Defined

CODE	DEFINITION & EXPLANATION
00	Contracting District Number
01	American Bankers Assoc. (ABA) Transit/Routing Number (Including Check Digit, 9 Digits)
02	Society for Worldwide Interbank Financial Telecommunication (S.W.I.F.T.) Identification (8 or 11 Characters)
03	Clearing House Interbank Payment System (CHIPS) Participant Number (3 or 4 Digits)
04	Canadian Financial Institution Branch and Institution Number SEE CODE SOURCE 91
05	Clearing House Interbank Payment System (CHIPS) User Identification (6 digits)
06	System Number
07	Add-On System Number *A unique number assigned by the manufacturer to identify additional products added to or used by the customer in the initial system*
08	Carrier Assigned Package Identification Number *A reference number assigned by a carrier to uniquely identify a single package*
09	Customs Bar Code Number
0A	Supervisory Appraiser Certification Number
0B	State License Number
0C	Linking Identifier
0D	Subject Property Verification Source

0E Subject Property Reference Number
0F Subscriber Number
0G Reviewer File Number
0H Comparable Property Pending Sale Reference Number
0I Comparable Property Sale Reference Number
0J Subject Property Non-Sale Reference Number
0K Policy Form Identifying Number
0L Referenced By
0M Mortgage Identification Number
0N Attached To
0P Real Estate Owned Property Identifier
0Q Accountable Care Organization (ACO)
10 Account Managers Code
Identifies the telecommunications manager assigned to this account
11 Account Number
12 Billing Account
Account number under which billing is rendered
13 Horizontal Coordinate
Positional address, horizontal component. The assigned address is based upon a grid mapping scheme
14 Master Account Number
Account number used to represent individual billing accounts which have been consolidated and/or summarized
15 Vertical Coordinate
Positional Address, Vertical component. The assigned address is based upon a grid mapping scheme
16 Military Interdepartmental Purchase Request (MIPR) Number
A specific form used to transmit obligation authority (dollars) and requirements between a service or agency requiring a purchase and a military service or agency responsible for procuring the requirement
17 Client Reporting Category
Code assigned by the client to categorize participants for reporting requirements
18 Plan Number
The unique identification number assigned for a defined contribution plan
19 Division Identifier
1A Blue Cross Provider Number
1B Blue Shield Provider Number
1C Medicare Provider Number
1D Medicaid Provider Number
1E Dentist License Number
1F Anesthesia License Number
1G Provider UPIN Number
1H TRICARE Identification Number
1I Department of Defense Identification Code (DoDIC)
Qualifies a code that uniquely identifies a type of explosive or ammunition
SEE CODE SOURCE 196

1J Facility ID Number

1K Payer's Claim Number

1L Group or Policy Number

1M Preferred Provider Organization Site Number
An identification number used to identify the Preferred Provider Organization (PPO) and/or its office location

1N Diagnosis Related Group (DRG) Number

1O Consolidation Shipment Number
Qualifies a single number that is a key to a group of individual shipment numbers

1P Accessorial Status Code
Qualifies a single number that describes the status of an accessorial transportation service

1Q Error Identification Code
Qualifies a single number that describes an error found in application-level data

1R Storage Information Code
Qualifies text data that describes a storage facility used for transportation services

1S Ambulatory Patient Group (APG) Number

1T Resource Utilization Group (RUG) Number

1U Pay Grade

1V Related Vendor Order Number
A vendor's order number that is in addition to a primary order number

1W Member Identification Number

1X Credit or Debit Adjustment Number

1Y Repair Action Number

1Z Financial Detail Code

20 Repair Part Number

21 American Gas Association Equation Number
Indicates which American Gas Association (AGA) equation was used to calculate the volumes reported

22 Special Charge or Allowance Code

23 Client Number

24 Short-term Disability Policy Number

25 Reason Not Lowest Cost Code
Qualifies a code that identifies why a service/rate other than the least costly service/rate was used
SEE CODE SOURCE 350

26 Union Number

27 Insuror Pool Identification Number

28 Employee Identification Number

29 Foreclosure Account Number

2A Import License Number

2B Terminal Release Order Number
Cargo number assigned to staged material

2C Long-term Disability Policy Number

2D Aeronautical Equipment Reference Number (AERNO)
A unique number assigned to a particular piece of government-furnished aeronautical equipment

2E Foreign Military Sales Case Number
A reference number designating the foreign military sale records

2F Consolidated Invoice Number

2G Amendment

2H Assigned by transaction set sender

2I Tracking Number

2J Floor Number

2K Food and Drug Administration (FDA) Product Type

2L Association of American Railroads (AAR) Railway Accounting Rules
SEE CODE SOURCE 449

2N Federal Communications Commission (FCC) Trade/Brand Identifier

2O Occupational Safety and Health Administration (OSHA) Claim Number

2P Subdivision Identifier

2Q Food and Drug Administration (FDA) Accession Number

2R Coupon Redemption Number

2S Catalog

2T Sub-subhouse Bill of Lading

2U Payer Identification Number

2V Special Government Accounting Classification Reference Number (ACRN)

2W Change Order Authority

2X Supplemental Agreement Authority

2Y Wage Determination

2Z U.S. Customs and Border Protection (CBP) Anti-dumping Duty Case Number

30 Visa Immigrant

31 Docket Number

32 Credit Repository Code

33 Lender Case Number

34 Loan Request Number

35 Multifamily Project Number

36 Underwriter Identification Number

37 Condominium Identification Number

38 Master Policy Number

39 Proposal Number

3A Section of the National Housing Act Code
A code taken from the Mortgage Insurance Certificate indicating the specific National Housing Act Program under which the mortgage is insured

3B Supplemental Claim Number
Number assigned by claimant to a supplemental claim for benefits

3C Payee Loan Number
Number assigned by payee to insured loan; used only when payee is different from insured lender

3D Servicer Loan Number
The loan number assigned by the servicer to the mortgage when the servicer is not the insured entity

3E Investor Loan Number
The number assigned by the investor to the mortgage when the investor is different from the insured or payee

3F Show Identification
Identification of a broadcast program

3G Catastrophe Number

3H Case Number

3I Precinct Number

3J Office Number

3K Petroleum Pool Code
A code which identifies a common source of underground oil or gas supply whose vertical and horizontal limits are defined by a state regulatory agency

3L Branch Identifier

3M Federal Communications Commission (FCC) Condition Code

3N Gas Custodian Identification
Identification number for custodian from whom gas was received or to whom gas was delivered

3O U.S. Customs and Border Protection (CBP) Pre-approval Ruling Number

3P Third Party Originator Number
Number identifying the organization acting as a correspondent in originating a loan

3Q Food and Drug Administration (FDA) Product Code

3R U.S. Customs and Border Protection (CBP) Binding Ruling Number

3S Provincial (Canadian) Sales Tax Exemption Number

3T U.S. Customs and Border Protection (CBP) Pre-classification Ruling Number

3U Protraction Number
The identifier of an official protraction diagram, either an official protraction diagram or a leasing map

3V Formation Identifier
A code or name identifying a subsurface formation

3W U.S. Customs and Border Protection (CBP) Commercial Description

3X Subcontract Number

3Y Receiver Assigned Drop Zone

3Z Customs Broker Reference Number

40 Lease Schedule Number - Replacement

41 Lease Schedule Number - Prior

42 Phone Calls

43 Supporting Document Number
Supports or clarifies information and values represented in a document

44 End Use Number
Represents the final use or form of the material being manufactured or sold

45 Old Account Number
Identifies accounts being changed

46 Old Meter Number
Identifies meters being removed

47 Plate Number

48 Agency's Student Number
Student number assigned by an agency other than the institution sending or receiving the record

49 Family Unit Number
An identification number assigned to siblings within the same family

4A Personal Identification Number (PIN)
A number that uniquely identifies an individual

4B Shipment Origin Code

4C Shipment Destination Code

4D Shipping Zone

4E Carrier-assigned Consignee Number

4F Carrier-assigned Shipper Number

4G Provincial Tax Identification

4H Commercial Invoice Number

4I Balance-due Reference Number

4J Vehicle-related Services Reference Number

4K Accessorial Rail Diversion Reference Number

4L Location-specific Services Reference Number

4M Special Move Reference Number

4N Special Payment Reference Number

4O Canadian Goods & Services or Quebec Sales Tax Reference Number

4P Affiliation Number

4Q Call Sign
An alphanumeric name assigned by the Federal Communications Commission (FCC) to uniquely identify a radio system or transmitter

4R Rule Section
SEE CODE SOURCE 360

4S Preferred Call Sign
A call sign requested by an applicant for a radio license

4T North American Datum Standard (NADS)

4U Market Area

4V Emission Designator
SEE CODE SOURCE 360

4W Study
Radio Engineering Study

4X Log
Federal Communications Commission (FCC) License Application File Number

4Y Subhouse Bill of Lading

4Z U.S. Customs and Border Protection (CBP) Countervailing Duty Case Number

50 State Student Identification Number
A student identification number assigned by the state education agency to students enrolled in state schools

51 Picture Number

52 SWIFT (MT 100)

53 SWIFT (MT 202)

54 FEDWIRE (Federal Wire Transfer)

6R Provider Control Number
Number assigned by information provider company for tracking and billing purposes

6S Provider Order Ticket Number
Number assigned by information provider company for work order tracking

6T Pilot License Number

6U Question Number

6V Reissue Cession Number
Unique identifier assigned to the individual record by the reinsurer

6W Enhanced Driver's License

6X Specimen Identifier

6Y Equipment Initial

6Z Secretaria de Comercia y Famenta Industrial (SECOFI) Number
The Secretaria de Comercia y Famenta Industrial (SECOFI) Number is assigned by the Mexican Government and is used to identify the producer of goods

70 Calendar Number
Identifies a working calendar (for example, Monday through Friday) for a company, division, or labor group

71 (Working) Shift Number
Identifies a working shift for a company with multiple working shifts per day

72 Schedule Reference Number

73 Statement of Work (SOW)
Description of a product or service to be procured under a contract; statement of requirements

74 Work Breakdown Structure (WBS)
A product-oriented family tree composed of hardware, software, services, and data that completely defines the project or program

75 Organization Breakdown Structure
A functionally oriented family tree that shows organization relationships and is used as the framework for assigning work responsibilities

76 Milestone
A specific event that can be identified as occurring at a specific time

77 Work Package
A detailed, short span task or material item identified by a contractor for doing the work required to complete the contract

78 Planning Package
A logical aggregation of work within a cost account (see code 79) that can be identified and budgeted, but not yet defined into work packages

79 Cost Account
A management control point for cost and schedule planning and control; it represents that work assigned to one responsible organization element and to one work breakdown structure element

7A Purchase Order Number Included in On-Order Position

7B Purchase Order Number of Shipment Received since Last Reporting Date

7C Purchase Order Number of Order Received since Last Reporting Date

80 Charge Number
A number used by financial systems to identify accounts for costs incurred on a contract

81 Symbol Number (for Milestone or LOB reports)
Symbols are used for graphical representation on Milestone schedule reports and Line of

Balance reports; the various symbols indicate planned, revised, completed, and slipped events; symbols used are mutually agreed upon between supplier and customer

82 Data Item Description (DID) Reference
Specific data elements that the government will ask a contractor to provide and are spelled out in specific requirement documents

83 Extended (or Exhibit) Line Item Number (ELIN)
Identifies specific line items to be delivered for a contract

84 Contractor Data Requirements List (CDRL)
Government or customer specific deliverables identified by line item; referenced on shipping details, etc

85 Subcontractor Data Requirements (SDRL)
Line item deliverables that a subcontractor is responsible for

86 Operation Number
Identifies a specific operation number as part of the manufacturing process for a part or product

87 Functional Category
An organization or groups of organizations with a common operational orientation such as Quality Control Engineering, etc

88 Work Center
Identifies a specific work area in a manufacturing process

89 Assembly Number
Identifies specific assemblies in the manufacturing process

DW Deposit Sequence Number

DX Department/Agency Number

DY Department of Defense Transportation Service Code Number (Household Goods)
SEE CODE SOURCE 124

DZ Certified Registered Nurse Anesthetist (CRNA) Provider Identification Number
Provider number of the physician that is supervising the registered nurse anesthetist

E1 Emergency Order Number

E2 Part Causing Repair Number

E3 Expansion on Effect of Change Number
Description of additional effects on test or operating procedures as a result of the change to the product

E4 Charge Card Number

E5 Claimant's Claim Number
Unique number assigned to the claim by the claimant

E6 Backout Procedure Code
Description of the procedures required to remove the change to the product in case the change just made causes an unwanted result

E7 Service Bulletin Number

E8 Service Contract (Coverage) Number
Number or code identifying length and terms of the coverage

E9 Attachment Code
Supplementary reference information

EA Medical Record Identification Number
A unique number assigned to each patient by the provider of service (hospital) to assist in retrieval of medical records

EB Embargo Permit Number

EC Circular

ED Export Declaration

EE Election District

EF Electronic Funds Transfer ID Number

EG Ending Serial Number

EH Financial Classification Code

EI Employer's Identification Number

EJ Patient Account Number
A unique number assigned to each patient by the provider of service to facilitate retrieval of individual case records tracking of claims submitted to a payer and posting of payment

EK Healthcare Manpower Shortage Area (HMSA) Facility Identification Number
A unique number assigned to facility located in a Health Manpower Shortage Area

EL Electronic device pin number

EM Electronic Payment Reference Number

EN Embargo Number

EO Submitter Identification Number
A unique number identifying the submitter of the transaction set

EP Export Permit Number

EQ Equipment Number

ER Container or Equipment Receipt Number

ES Employer's Social Security Number

ET Excess Transportation

EU End User's Purchase Order Number

EV Receiver Identification Number
A unique number identifying the organization/site location designated to receive the current transmitted transaction set

EW Mammography Certification Number
Centers for Medicare & Medicaid Services assigned certification number of the certified

mammography screening center

EX Estimate Number

EY Receiver Sub-identification Number
A unique code identifying the receiver's specific department or office location for internal routing of electronic claims

EZ Electronic Data Interchange Agreement Number

F1 Version Code - National
Identifies the release of a set of information or requirements to distinguish from the previous or future sets that may differ; the release in question is on the national level

F2 Version Code - Local
Identifies the release of a set of information or requirements to distinguish from the previous or future sets that may differ; the release in question is on the local level

F3 Submission Number
A unique number assigned to the submitted transaction set; this number is used by the payer to track every file submitted

F4 Facility Certification Number
A unique number assigned to qualifying facilities to perform services

F5 Medicare Version Code
Identifies the release of a set of information or requirements to distinguish from previous or future sets that may differ; the version in question is that which is being used by Medicare

F6 Medicare Beneficiary Identifier (MBI)

F7 New Medicare Beneficiary Identifier (MBI)

F8 Original Reference Number

F9 Freight Payer Reference Number

FA Federal Acquisition Regulations (FAR)
SEE CODE SOURCE 80

FB File Transfer Form Number

FC Filer Code Issued by Customs

FD Filer Code Issued by Bureau of Census

FE Failure mechanism number

FF Film Number
Number assigned by the film distribution company

FG Fund Identification Number

FH Clinic Number
A unique number identifying the clinic location that rendered services

FI File Identifier

FJ Line Item Control Number
A unique number assigned to each charge line used for tracking purposes

FK Finish Lot Number

FL Fine Line Classification
Fine Line Classifications are used to group related items so that retail stores can perform analyses of sales and shelf space allocation by groups of products

FM Federal Maritime Commission (FMC) Forwarders Number

FN Forwarder's/Agent's Reference Number

FO Drug Formulary Number

FP Forestry Permit Number

FQ Form Number

FR Freight Bill Number

FS Final Sequence Number

FT Foreign Trade Zone

FU Fund Code
Defense Fuel Supply Center to bill back fuel purchases to the appropriate service or agency account fund

FV Health Maintenance Organization (HMO) Reference Number
A unique number assigned to each referral or authorization when a claimant visits a provider other than the primary care provider

FW State License Identification Number
A unique number assigned to each provider of service; this number is assigned by state governments and is the provider's legal identification number in the state that is assigned

FX Failure Analysis Report Number

FY Claim Office Number
The identification of the specific payer's location designated as responsible for the submitted claim

FZ Processor's Invoice Number
The invoice number of the third-party outside processor

G1 Prior Authorization Number
An authorization number acquired prior to the submission of a claim

G2 Provider Commercial Number
A unique number assigned to a provider by a commercial insurer

G3 Predetermination of Benefits Identification Number
A number assigned by a third-party payer identifying the pre-treatment estimate

G4 Peer Review Organization (PRO) Approval Number
An authorization number for certain surgical procedures and for an assistant at cataract surgery

G5 Provider Site Number

G6 Payer Assigned Resubmission Reference Number

G7 Resubmission Reason Code
A code identifying the reason that the claim was resubmitted

G8 Resubmission Number

G9 Secondary Employee Identification Number

GA Government Advance Progress

GB Grain Block Number

GC Government Contract Number

GD Return Goods Bill of Lading Number
Bill of lading number for returned goods en route

GE Geographic Number

GF Specialty License Number
A unique number assigned to each provider of service by specialty

GG Gauge Ticket Number

GH Identification Card Serial Number

GI Secondary Provider Number

GJ Cornbore Certification Number
Certificate stating that shipment is free of cornbores

GK Third Party Reference Number
A unique number assigned to a claim after it has been entered into the third party payer's adjudication system; this number is used by the payer to track claims internally

GL Geographic Destination Zone Number

GM Loan Acquisition Number
Number assigned to a loan during the acquisition process

GN Folder Number
Number used to identify the folder in which the loan is located

GO Exhibit Identifier

GP Government Priority Number

GQ Internal Purchase Order Release Number
The release number associated with the internal purchase order number

GR Grain Order Reference Number

GS General Services Administration Regulations (GSAR)
SEE CODE SOURCE 80

GT Goods and Service Tax Registration Number

GU Internal Purchase Order Item Number
The item number associated with the internal purchase order

GV Third Party Purchase Order Number
The purchase order number from a manufacturer to a third-party which provides value added to the manufactured product

GW Third Party Purchase Order Release Number
The release number associated with a third-party purchase order number

GX Third Party Purchase Order Item Number
The item number associated with the third-party purchase order number

GY Empty Repositioning Number
Number used to authorize and track an empty container or bare chassis or generator set being repositioned for later use

GZ General Ledger Account

H1 High Fabrication Authorization Number
The purchaser's program number that authorizes the highest amount of material production

H2 High Raw Material Authorization Number
The purchaser's program number that authorizes the highest amount of raw material or purchased components in their original state to be secured for production

H3 Gravity Source Meter Number

H5 Special Clause

H6 Quality Clause

H7 Standard Clause

H8 Home Mortgage Disclosure Act (HMDA) Census Tract

JZ Governing Class Code
SEE CODE SOURCE 299
K0 Approval Code
SEE CODE SOURCE 329
K1 Foreign Military Sales Notice Number
Number assigned to control a foreign military sales shipment from shipper to consignee
K2 Certified Mail Number
Number assigned by U.S. Postal Service (USPS) to monitor the movement of certified mail from point of acceptance by USPS to point of delivery
K3 Registered Mail Number
Number assigned by U.S. Postal Service (USPS) to monitor the movement of mail from point of acceptance by USPS to point of delivery
K4 Criticality Designator
A number assigned to a contract or order that expresses the relative importance of that contract or order and thereby assists the contractor in making performance decisions and assists in making production surveillance decisions
SEE CODE SOURCE 188
K5 Task Order
K6 Purchase Description
K7 Paragraph Number
K8 Project Paragraph Number
A number for a nested part of a project
K9 Inquiry Request Number
KA Distribution List
Qualifies a list of addresses to which the distribution of something should be made
KB Beginning Kanban Serial Number
KC Exhibit Distribution List
Qualifies a list of addressees to which the distribution of a cited contract exhibit must be made
KD Special Instructions Number
KE Ending Kanban Serial Number
KG Foreclosing Status

KH Type of Law Suit

KI Type of Outstanding Judgment

KJ Tax Lien Jurisdiction

KK Delivery Reference

KL Contract Reference

KM Rental Account Number

KN Census Automated Files ID
An ID given by the U.S. Bureau of the Census to those parties having fulfilled the necessary requirements to be able to file shipper's export declaration data directly with the Census through automated means

KO Customs Drawback Entry Number
A number given to importers by U.S. Customs and Border Protection (CBP) which have filed for "drawbacks," of certain import duties

KP Health Certificate Number
A certificate given by the veterinary authorities regarding the health of animals being shipped

KQ Procuring Agency

KR Response to a Request for Quotation Reference
A discrete number assigned for identification purpose to a response to a request for quotation

KS Solicitation
A discreet number assigned by the purchasing activity to differentiate between different solicitations

KT Request for Quotation Reference
A discrete number assigned for identification purposes to a request for quotation

KU Office Symbol
A number assigned for reference to a specific office within an organization

KV Distribution Statement Code
SEE CODE SOURCE 329

KW Certification
A number, taken from an acquisition regulation, which represents a specific certification that must be made by a prospective vendor before a contract or order can be placed with that vendor

KX Representation
A number, taken from an acquisition regulation, which represents a specific representation that must be made by a prospective vendor before a contract or order can be placed with that vendor

KY Site Specific Procedures, Terms, and Conditions
A set of procedures, terms, and conditions, applicable to a category of procurement emanating from a specific location, which will be incorporated into all procurement actions in that category by referencing its unique number rather than by incorporating the lengthy details it represents

KZ Master Solicitation Procedures, Terms, and Conditions
A set of standard procedures, terms, and conditions, applicable to a category of procurement, which will be incorporated into all procurement actions in that category by referencing its unique number rather than by incorporating the lengthy details it represents

L0 Collision Industry Electronic Commerce Association (CIECA)
SEE CODE SOURCE 880

L1 Letters or Notes

L2 Location on Product Code

L3 Labor Operation Number
Uniquely identifies the repair actions performed

L4 Proposal Paragraph Number
The place in a proposal where additional information can be found

L5 Subexhibit Line Item Number
A further subdivision of a contract exhibit line item

L6 Subcontract Line Item Number
A further subdivision of a contract line item number

L7 Customer's Release Number
A number which uniquely identifies a release against the customer's purchase order

L8 Consignee's Release Number
A number which uniquely identifies a release against the consignee's purchase order

L9 Customer's Part Number
A unique number assigned by a customer to identify a purchased material

LA Shipping Label Serial Number

LB Lockbox

LC Lease Number

LD Loan Number

LE Lender Entity Number

LF Assembly Line Feed Location

MP Multiple P.O.s of an Invoice

MQ Meter Proving Report Number

MR Merchandise Type Code

MS Manufacturer's Material Safety Data Sheet Number

MT Meter Ticket Number

MU Military Specification (MILSPEC) Number

MV Migrant Number
Number assigned by the National Migrant Records Transfer System

MW Military Call Number
Assigned by the military to identify a billing period

MX Material Change Notice Number

MY Model year number

MZ Maintenance Request Number

N0 Nomination Number
Shipper-assigned bulk product number identifying a request for pipeline transportation services which is used to relate an into-plane delivery to the bulk fuel movement from which it was derived

N1 Local School Course Number

N2 Local School District Course Number

N3 Statewide Course Number
A course number assigned by the state education agency to courses taught in public schools

N4 United States Department of Education, National Center for Education Statistics (NCES) Course Number
A proposed course number to be assigned by NCES to identify a common grouping of subject area content and sequence

N5 Provider Plan Network Identification Number
A number assigned to identify a specific provider in a health care plan network

N6 Plan Network Identification Number
A number assigned to identify a specific health care network that provides health care services to insured members

N7 Facility Network Identification Number
A number assigned to identify a specific facility in a health care plan network

N8 Secondary Health Insurance Identification Number

N9 Data Authentication Number

NA North American Hazardous Classification Number

NB Letter of Credit Number

NC Secondary Coverage Company Number

ND Letter of Credit Draft Number

NE Lease Rider Number
Qualifies a code that identifies the authorizing documentation for a household goods shipment

MDL Medical Device License Number
SEE CODE SOURCE 955

MEI MEID - Mobile Equipment Identifier
A number that uniquely identifies a mobile device on a CDMA (Code Division Multiple Access) network

MDN Hazardous Waste Manifest Document Number

MHC Mexico Servicio de Administración Tributaria (SAT) Hazardous Code

MHP Mexico Hazardous Packaging Code (Tipo Embalaje)

MII Importer's Bond Number Covering Merchandise Shipment and Instruments of International Traffic (IIT)

MIN MORNETPlus Institution Number
MORNETPlus is a Fannie Mae Trade Mark name

MMT Mexico Material Type (Tipo Materia)

MPC Mexico Unit Packaging Code (Clave Unidad)

MPN Marketing Plan Identification Number

MRC Eligibility Category
SEE CODE SOURCE 844

MRN Mother's Medical Record Identification Number

MSI Message ID
Allows the source to identify the list identifier of a list of drugs that have message limitations for the associated patient

MSL Mail Slot

MTC Mexico Tariff Rate Code (Fracción Arancelaria)

MUI MORNETPlus User Identification
MORNETPlus is a Fannie Mae Trade Mark name

MXC Mexican Harmonized Alphanumeric Carrier (CAAT) Code
MXE Mexican Export Bonded Warehouse Number
MXI Mexican Import Bonded Warehouse Number
MZO Multiple Zone Order Number
NAS National Aeronautics and Space Administration FAR Supplement (NFS)
SEE CODE SOURCE 80
NDA Abbreviated New Drug Application Number
NDB New Drug Application Number
NDC National Drug Code (NDC)
SEE CODE SOURCE 240
NFC National Flood Insurance Program Community Name
NFD National Flood Insurance Program County
NFM National Flood Insurance Program Map Number
NFN National Flood Insurance Program Community Number
NFS National Flood Insurance Program State
NIN National Item Identification Number
A number assigned to each approved item identification under the Federal Cataloging Program
SEE CODE SOURCE 148
NMT Nomination Model Type
NPN Natural Product Number
SEE CODE SOURCE 954
NTP Non-originating Third Party Number
OCN Organic Certification Number
A number assigned by an accredited organic certifying agency which certifies that the organic production and handling practices meet legislative standards
OEI Healthcare Other Entity ID (OEID)
Number defined in 45 CFR part 162.524 Other entity identifier and enumerated by the system defined in 162.508 Enumeration System
SEE CODE SOURCE 540
OFF Offer Identifier
OIC Object Identifier
OOS Out of Service Number
OPE National Center for Education Statistics Office of Postsecondary Education (OPE) Code
OPF National Center for Education Statistics Integrated Postsecondary Education Data System (IPEDS) Athletic Conference Code
SEE CODE SOURCE 872
OPN Original Part Number
A number assigned to all instances of a class of items that have the same form, fit, function, and interface at the time of their creation by the enterprise responsible for the manufacture, production, or creation of the items
OVF Overflow Indicator Code
PAC Patent Cooperation Treaty Application Number
PAI Prior Authorization ID
Allows the source to identify the list identifier of a list of drugs that have prior authorization requirements for the associated patient
PAN Nonprovisional Patent Application Number
PAP Provisional Patent Application Number

PCC Pool Contract Code

PCI Pharmacy Chain ID
Allows the source to identify the list identifier of a list of drugs that have pharmacy chain limitations for the associated patient

PCJ State of Jurisdiction
SEE CODE SOURCE 22

PCN Protocol Number
A number identifying a detailed record of a procedure and its results

PCS ICD-10-PCS (International Classification of Diseases, 10th Revision, Procedure Coding System)
SEE CODE SOURCE 896

PCT ICD-11-PCS (International Classification of Diseases, 11th Revision, Procedure Coding System)

PDF Census Post Departure Filing Number

PDI Partial Denial Indicator
SEE CODE SOURCE 890

PDL Previous Driver's License

PDR Partial Denial Reason Identifier
SEE CODE SOURCE 889

PEI Product Exclusion ID
Allows the source to identify the list identifier of a list of drugs that have product exclusion limitations for the associated patient

PGC Packing Group Code

PGD Downstream Package Identifier

PGN Plug Number

PGS Proposed Group Work Candidate Sequence Number

PHC Process Handling Code

PHY Physician State License Number

PLI Department of Defense Provisioning Line Item Sequence Number

PLN Proposed Contract Number

PMA Packaging Marking Indicator
SEE CODE SOURCE 350

PMN Premarket Application Number

PNI Pharmacy Network ID
Allows the source to identify the list identifier of a list of drugs that have pharmacy network ID limitations for the associated patient

PNL Pharmacy Network
Code indicating which pharmacy network list(s) should be used for pharmacy network status.

PNN Patent Number

POD Port of Destination Location Number

POL Policy Number
POS Position Title Number
PPJ Certificate of Purchase Number
PPK Tax Bill Identification Number
PPL Current Year Tax Bill Number
PPM Past Year Tax Bill Number
PPN Payment Plan Number
PRK Path Rank
The rank (priority) assigned to the quantity for a contract path. Priority 1 means the highest priority. Priorities 2, 3, etc. are in descending order of priority. Quantities assigned the same rank will be applied on a pro-rata basis.
PRL Previous Loan Number
PRS Previously Reported Social Security Number
PRT Product Type
PSC Portal Submission Code
Identifies the type entity submitting the discrepancy report
SEE CODE SOURCE 350
PSI Previous Shipment Identification Number - Continuous Move
PSL Next Shipment Identification Number - Continuous Move
PSM Credit Card
PSN Proposed Sequence Number
PTC Patent Type
PUA Pickup Appointment Number
PVC Payment Validation Code
A unique code generated by a payment originator verifying payment validity and facilitating settlement.
PVS Provisioning Control Code
PWC Preliminary Work Candidate Number
PWS Proposed Work Candidate Sequence Number
PXC Health Care Provider Taxonomy Code
SEE CODE SOURCE 682
PYA Payroll Activity Code
PYR Pay Range
QLI Quantity Limits ID
Allows the source to identify the list identifier of a list of drugs that have quantity limitations for the associated patient
QNA Quantity Not Available Reason
RAA Restricted Availability Authorization
RAN Restricted Availability Number
REB Reimbursable Code
SEE CODE SOURCE 529
REC Related Case
REP DHS (Department of Homeland Security) Re-entry Permit
RGI Regulatory Guideline Identifier
Indicates the federal or state regulatory guideline number
RIG Rig Number

RLI Role Identification Number
RPP Relative Priority
RPS Regulation Primary Number
RPT Report Number
RRB Railroad Board (RRB) Number
Used when reporting eligibility of Retired Railroad workers for Medicare Discount Card Program. Used until National Identifier is mandated for use
RRC Routing Request Control Number
RRS Reconciliation Report Section Identification Code
RSN Reservation Number
RSS Regulation Secondary Number
RTN Department of Transportation Retread Tire Identification Number
Seven-character retread tire identification number stamped on a retread tire

CODE	DEFINITION & EXPLANATION
2	Returned to Carrier's Terminal *Delivery attempted by the carrier; shipment was returned to the carrier's terminal*
3	Returned to Shipper *Shipment was returned to the shipper per the instructions of the consignee*
A	Arrived *Shipment has arrived at the location specified*
B	Bad Order (Inoperative or Damaged) *Shipment was on a piece of equipment that failed*
C	Estimated To Depart Terminal Location
D	Completed Unloading at Delivery Location *Shipment was delivered to the consignee or receiver*
E	Estimated to Arrive (En Route) *Shipment is estimated to arrive at the location specified*
F	In Flight
G	Repaired and/or Released from Bad Order
H	Equipment Shopped for Heavy Repair *Shipment is delayed due to equipment failure*
I	In-Gate
J	Delivered to Connecting Line *Shipment has been delivered to an interline carrier*
K	Arrived at Customs *Customs delay; shipment is being processed at the customs location*
L	Loading *Shipment is being loaded at a carrier's terminal or facility*
N	No Paperwork Received with Shipment or Equipment
O	Paperwork Received- Did Not Receive Shipment or Equipment
P	Departed Terminal Location *Shipment has left the carrier's terminal or other control point*
R	Received from Prior Carrier *Shipment has been received from an interline carrier*
S	Spotted at Consignee's Location *Shipment in a trailer has been spotted at the consignee or receiver's premises*
T	At Terminal; Intra-Terminal Movement
U	Unloading *Shipment being unloaded*
V	Vessel Rehandle

CODE	DEFINITION & EXPLANATION
03	Shipment Greater Than Previously Reported
04	Receipt Less Than Previously Reported
05	Product Put on Hold
06	Book Adjustment Decrease
07	Product Dumped or Destroyed
08	Product Put in Quality Inspection Inventory
51	Unable-to-Locate (UTL) Product Located
52	Recoup/Rework of Damaged Product
53	Shipment Less Than Previously Reported
54	Receipt Greater Than Previously Reported
55	Product Taken Off Hold
56	Book Adjustment Increase
88	Product Removed from Quality Inspection Inventory
AA	Physical Count
AB	Accounting Error
AC	Condition Change *An adjustment to inventory is required due to a change in the condition classification of the material*
AD	Purpose Change
AE	Reidentification
AF	Stock Number Change
AG	Ownership Change
AH	Other
AI	Disaster
AJ	Survey
AK	Transfer
AL	Capitalization *An adjustment to inventory resulting from reassignment between different funds or chartered subdivisions of a fund*
AM	Missing Unique Item Identifier (UII)/Serial number
AN	Unit of Issue Change
AP	Product/Formula Evaluation and Testing
AQ	Unique Item Identifier / Serial Number mismatch
AR	Order Shipment Error

AS Recouping

AT Prepack Preparation

AU Damaged in Facility

AV Damaged in Transit

AW Product Recall

AX Shelf-life Obsolescence

AY Receipt Error

BA Operating Variance
An adjustment to inventory resulting from gain or loss occurring under routine operating conditions, e.g. temperature, handling, etc

BD Nonrecoverable
An adjustment to inventory resulting from unretrievable/unusable liquid product located in the bottom of a storage tank (nonrecoverable tank bottoms)

BK Off Specification
An adjustment to inventory resulting from gain of slop fuel, i.e., off-specification fuel not meeting deterioration limits and not to be blended or downgraded to a usable product

BM Replacement
An adjustment to inventory resulting from a replacement of a previously recorded loss (e.g., loss due to linebreak) at no cost to the owner per agreement with the storage facility operator

BN Tariff Deduction
An adjustment to inventory resulting from a loss due to the change in volume after receipt of product via a pipeline operation as covered in a tariff agreement

BR Regrade
An adjustment to inventory resulting from regrading of product, i.e., redesignating a product from one grade to another when the product meets specifications for both

BS Downgrade

BT Additive
An adjustment to inventory resulting from injection of an additive, e.g., fuel system icing inhibitor, into a petroleum product

BU Missing DoD Unique Item Identifier or Serial Number
Used to identify gain, loss or adjustment resulting solely from a missing DoD Unique Item Identifier (UII) or Serial Number

BV DoD Unique Item Identifier / Serial Number Mismatch
Used to identify gain, loss or adjustment resulting solely from a DoD Unique Item Identifier / Serial Number mismatch

BW Found/Recovered
Provides the means to identify an inventory gain associated to a completed investigation

BX Suspected Loss/Stolen
Provides the means to identify an inventory loss associated to an investigation

CD Product Donations

CO Consignment

CR Customer Returned Inventory

CS Product Samples

PC Product Reserved for Customer

TC Tax Conversion

UD Unauthorized Destruction

182 - Vessel Name

Name of ship as documented in "Lloyd's Register of Ships" TYPE=**AN** MIN=**2** MAX=**50**

CODE	DEFINITION & EXPLANATION
AMM	Ammo Pack
BAG	Bag
BAL	Bale
BBL	Barrel
BDL	Bundle
BEM	Beam
BIC	Bing Chest
BIN	Bin
BKG	Bulk Bag *A large sized flexible, intermediate bulk container; the side walls are flexible; it's made of fabric; when filled, it takes on the shape of what you put inside*
BLK	Bulk
BOB	Bobbin
BOT	Bottle *A container having a round neck of relatively smaller diameter than the body with an opening that can be fitted with lid; it does not have a handle*
BOX	Box
BRG	Barge
BSK	Basket or hamper
BXI	Box, with inner container
BXT	Bucket
CAB	Cabinet
CAG	Cage
CAN	Can
CAR	Carrier
CAS	Case
CBC	Containers of Bulk Cargo
CBY	Carboy
CCS	Can Case
CHE	Cheeses
CHS	Chest
CLD	Car Load, Rail
CNA	Household Goods Containers, Wood

CNB Container, MAC-ISO (Military Airlift Container - International Standards Organization) Light Weight 8x8x20 Foot Air
An air container conforming to ISO standards

CNC Container, Navy Cargo Transporter

CND Container, Commercial Highway Lift

CNE Engine Container

CNF Multiwall Container Secured to Warehouse Pallet

CNT Container

CNX CONEX - Container Express
An 8x8x8-foot container used for packaging and shipping military material

COL Coil

CON Cones

COR Core

CRD Cradle

CRT Crate

CSK Cask

CTN Carton

CUB Cube
A box that has a "bladder" (poly-formed bladder) inside; it has an opening similar to bottle; the interior bladder is flexible not rigid

CYL Cylinder

DBK Dry Bulk

DRK Double-length Rack

DRM Drum
A large container with a cylindrical shape; top may have removable or sealed top sides may be fiberboard or metal

DSK Double-length Skid

DTB Double-length Tote Bin

DUF Duffle Bag

ENV Envelope

FIR Firkin

FLO Flo-bin

FLX Liner Bag Liquid
A rubber liner used in a standard container for liquid material

FRM Frame

FSK Flask

FWR Forward Reel

GOH Garments on Hangers

HED Heads of Beef

HGH Hogshead

HPR Hamper

HPT Hopper Truck

HRB On Hanger or Rack in Boxes

HRK Half-standard Rack

HTB Half-Standard Tote Bin

JAR Jar

JUG Jug
A bottle (usually 1/2 gallon or larger) fitted with a handle

KEG Keg

KIT Kit

KRK Knockdown Rack

KTB Knockdown Tote Bin

LBK Liquid Bulk

LIF Lifts

LOG Log

LSE Loose

LUG Lug

LVN Lift Van

MLV MILVAN - Military Van
A 20-foot transportation van that conforms to ISO standards

MRP Multi-Roll Pack

MSV MSCVAN - Military Sealift Command Van
A 35-foot transportation van

MXD Mixed Type Pack

NOL Noil

OVW Overwrap
A cardboard bottom is put down on a pallet; the bags are stacked in layers; the top of the cardboard slides down over the bags to meet the bottom; if any of the bags tear, the product always stays inside the cardboard

PAL Pail

PCK Packed - not otherwise specified

PCS Pieces

PIR Pims

PKG Package

PLF Platform

PLL 463L Air Pallet

PLN Pipeline

PLT Pallet

POV Private Vehicle

PRK Pipe Rack

QTR Quarter of Beef

RAL Rail (Semiconductor)

RCK Rack

REL Reel

ROL Roll

RVR Reverse Reel

SAK Sack

SBC Liner Bag Dry
A plastic liner used in container designed for the carriage of dry free-flowing material

SCS Suitcase

SHK Shook
SHT Sheet
SID Side of Beef
SKD Skid
SKE Skid, elevating or lift truck
SLP Slip Sheet
Shipping containers utilizing slip sheets, which are cardboard platforms used to hold product for storage or transportation
SLV Sleeve
SPI Spin Cylinders
SPL Spool
SVN SEAVAN - Sea Van
A commercial or military 40-foot transportation container that conforms to ISO standards
TBE Tube
TBN Tote Bin
TKR Tank Car
TKT Tank Truck
TLD Intermodal Trailer/Container Load (Rail)
TNK Tank
TRC Tierce
TRI Triwall Box
A sturdy box made of three-ply cardboard
TRK Trunk and Chest
TRU Truck
TRY Tray
TSS Trunk, Salesmen Sample
TTC Tote Can
A reusable stainless steel container with handles; used for liquid material
TUB Tub
UNP Unpacked
UNT Unit
VEH Vehicles
VPK Van Pack
WHE On Own Wheel
WLC Wheeled Carrier
WRP Wrapped

212 - Unit Price

Price per unit of product, service, commodity, etc. TYPE=**R** MIN=**1** MAX=**17**

CODE	DEFINITION & EXPLANATION
00	Credit Card
01	Country Subdivision of cultivation *Province or state where the product was cultivated. ISO code list 3266-2 character* SEE CODE SOURCE 5
02	Next Higher Assembly Serial Number *Identifies the Next Higher Serial Number for the item that is discrepant*
03	Military Articles and Services List *Identifies the Military Articles and Services List which is used by Foreign Military Sales. This list is a specialized government contract list specific to the DoD.*
04	End Item National Stock Number *Identifies the NSN for the End Item. (Note that in the DoD an NSN and an end item NSN are two distinct things.)*
05	Used to indicate the DoD hazardous waste disposition document control number *According to DoD Policy, supports processing of hazardous waste disposal*
A1	Plant Equipment Number *Item identifier is a plant equipment number*
A2	Department of Defense Identification Code (DoDIC) *Qualifies a code that uniquely identifies a type of explosive or ammunition* SEE CODE SOURCE 196
A3	Locally Assigned Control Number *Item identifier is a locally assigned control number used to catalog and manage material*
A4	Subsistence Identification Number *Item identifier is a brand-name resale subsistence item*
A5	Application State or Province SEE CODE SOURCE 22

A6 Document Identification Code
Item identifier subclassifies the intended use of the transaction

A7 Subline Item Number
A further subdivision of a contract or exhibit line item that identifies a specific part of that contract or exhibit line item

A8 Exhibit Line Item Number
The line item of a document referenced in and appended to a procurement instrument which establishes a delivery requirement

A9 Activity

AA Assembly Level Code, Vehicle Maintenance Reporting Standards (VMRS) 2000 Code Key 32
Assembly within the vehicle system that contains the causal component
SEE CODE SOURCE 95

BB Print Color Standard Reference
Customer decides after trial run of a print on a pre-dyed fabric a point of reference for the shade of the print color, light or darkness of the print; this reference then becomes a standard for the finisher to go by - as a customer orders fabric this code is used to identify to finisher the shade of the print on the fabric

BC Supplier Brand Code

BD Buyer Ground Shade Identifier
For each color there are various degrees of the color red for instance has degrees chinese red, fire engine red, etc; to each degree a symbol called ground shade is established by both the buyer and seller; to the buyer it might be fire engine red, whereas to the seller the same classification might have a different symbol; need to identify both in a purchase order

BE Buyer's Engineering Change Level Number

BF Vendor Ground Shade Identifier
For each color there are various degrees of the color red for instance has degrees chinese red, fire engine red, etc; to each degree a symbol called ground shade is established by both the buyer and seller; to the buyer it might be fire engine red, whereas to the seller the same classification might have a different symbol; need to identify both in a purchase order

BG Ground Shade Standard Reference
Buyer established shade reference at time first lot was dyed; this refers seller (dyer) backto a previous lot to match the shade

BH Finish/Hand Standard Reference
Fabrics can be finished in many types of finish: water repellent, Scotch Guard, etc.; within each finish a mill can create a degree of softness or hardness depending on how fabric should feel to the customer; this degree is assigned a reference number for reordering purposes

WJ Telecom Service Type
SEE CODE SOURCE 46

WK Advanced Billing Concepts (ABC) Codes
SEE CODE SOURCE 843

WL Wafer Lot Identifier
A serialization number identifying the manufacturer of integrated circuit wafers

WR Yarn Count Worsted
System for numbering spun yarn of long staple fibers

WS Wheel Chair Lift Serial Number

WT DoD Reportable Commodity Type
Identifies a DoD specific commodity type within an accountable property system for equipment or materiel to be issued to a unit or individual.

WU DoD Security Commodity Type
Used to limit access to certain types of commodity within an accountable property system for equipment or materiel to be issued to a unit or individual

WV DoD Asset Sub-Category
Used to identify an asset subcategory in an accountable property system based on depreciation rules

WW Line Item Number/Table of Authorized Material Control Number
Combining the two items - line item number and table of authorized material control number -creates a unique tracking number used by the DoD

XA Preferred Part Number

XC Expendable Container Identification

XN Export Control Classification Number (ECCN)
SEE CODE SOURCE 957

XP Preferred National Stock Number

XQ Preferred Manufacturer

XZ Contractor Establishment Code

Y1 Child GTIN-13
A Child GTIN (Global Trade Item Number) is a reference to the GTIN-13 of the next lower level of trade item that is contained in the item hierarchy.

Y3 Child GTIN-14
A Child GTIN (Global Trade Item Number) is a reference to the GTIN-14 of the next lower level of trade item that is contained in the item hierarchy.

Y4 Child GTIN-12
A Child GTIN (Global Trade Item Number) is a reference to the GTIN-12 of the next lower level of trade item that is contained in the item hierarchy.

YM Map Edition Number
A code identifying the edition number for the map being identified
SEE CODE SOURCE 350

YP Publication Number

ZB Commercial and Government Entity (CAGE) Code
A code that identifies a commercial contractor authorized to do business with the U.S. government

ZR Service Control Identification

ZZ Mutually Defined

236 - Price Identifier Code

CODE	DEFINITION & EXPLANATION
01	Good *A used item in good condition. The item shows wear from consistent use, but it remains in good condition and is usable. It may be marked, have identifying markings on it, or show other signs of previous use. Item instructions may be available.*
02	Damaged *A new, unused item that is damaged. The item meets manufacturer specifications and is usable. The item may be in its original packaging. Original manufacturer's warranty , if any, applies, with warranty details available. Item instructions, if any, may be available.*
03	Recouped
04	New Material
05	Suitable for Reuse without Reconditioning
06	Suitable for Reuse After Reconditioning
07	No longer useful for original purpose but still of some use *Includes items that may be sold for parts*
08	Unknown Material *Item or item components are recycled for purposes other than original use. Includes scrap materials*
09	Hold or Reserve Stock *Stock held in reserve due to depositor instructions*
10	New *A new, unused, unopened item in its original packaging, with all original packaging materials included. Original protective wrapping, if any, is intact. Original manufacturer's warranty, if any, applies, with warranty details available. Item instructions, if any, are available*
11	Refurbished *A refurbished item has been professionally restored to working order. Typically this means that the product has been inspected, cleaned, and repaired to meet manufacturer specifications. The item may be in its original packaging. A manufacturer's or refurbisher's warranty may apply. Refurbished items are sometimes referred to as "remanufactured." Item instructions may be included*
12	Like New *An item in-original condition. The original protective wrapping may be missing. There are no signs of wear on the item. Item instructions, if any, are available. Includes out-of-box items*
13	Used - Very Good *A well-cared-for item that has seen limited use but remains in great condition. The item is complete and undamaged, but may show some limited signs of wear. Item works perfectly. Item instructions may be available. Typically no warranty applies*

14 Unknown
The condition of the item is not known or is not available

15 Used-Damaged
A used, damaged item that is in acceptable condition. The item is worn but continues to work. Signs of wear can include aesthetic issues such as scratches, dents, and worn corners. Item instructions may be available.

CODE	DEFINITION & EXPLANATION
CFR	Cost and Freight *Seller pays cost and freight to named port of destination; buyer assumes all risks of loss and damage and additional costs incurred once goods are delivered on board the vessel; these are assumed by the buyer when the goods pass over the rail of the ship at the port of shipment*
CIF	Cost, Insurance, and Freight *Seller pays cost and freight to named port of destination; buyer assumes all risks of loss and damage and additional costs incurred once goods are delivered onboard the vessel; risks are assumed by the buyer when the goods pass over the rail of the ship at the port of shipment; seller must in addition procure (i.e. contract and pay for) marine insurance against the buyer's riskof loss or damage during shipment*
CIP	Carriage and Insurance Paid To *Seller pays cost and freight to named port of destination; buyer assumes all riskof damage or loss and additional costs incurred once goods are delivered on board the vessel; these risks are assumed by the buyer when the goods pass over the rail of the ship at the port of shipment; seller must procure (i.e. contract and pay for) marine insurance against the buyer's riskof loss or damage during carriage; seller must in addition procure (i.e. contract and pay for) cargo insurance against the buyer's riskof loss or damage to the goods during carriage*
CPT	Carriage Paid To *Seller pays freight charges named to destination; the riskof loss or damage to the goods, as well as any additional costs due to events occurring after the time the goods have been delivered to other carrier, is transferred from the seller to the buyer when the goods have been delivered into the custody of the carrier*
DAF	Delivered at Frontier *Seller fulfills obligation to deliver when goods have been made available, cleared for export, at the named point and place at the frontier, but before the border of the adjoining country*
DAP	Delivered At Place *Seller delivers the goods when they are placed at the disposal of the buyer on the arriving means of transport ready for unloading at the named place of destination. An Incoterm rule*
DAT	Delivered At Terminal *Seller delivers when the goods, once unloaded from the arriving means of transport, are placed at the disposal of the buyer at a named terminal at the named port or place of destination. Terminal includes quay, warehouse, container yard or road, rail or air terminal. An Incoterm rule*
DDP	Delivered Duty Paid *Seller bears costs and risks involved in bringing goods to the named place in the country of*

importation including duties, taxes, and other official charges payable upon import

DDU Deliver Duty Unpaid
Seller bears costs and risks involved in bringing goods to the named place in country of importation exclusive of duties, taxes, or other official charges payable upon import, and the costs and risks of carrying out import formalities

DEQ Delivered Ex Quay
Seller bears all costs and risks involved, including duties, taxes, and other charges involved in delivering the goods to the quay (wharf) at the named port of destination, cleared for import; seller's obligation ends when the goods are available to the buyer on the quay (this term used only for sea or inland waterway shipments)

DES Delivered Ex Ship
Seller bears all costs and risks involved in bringing goods to the named port of destination; seller's obligation ends when goods are available to buyer on board the ship uncleared for import at named port of destination (this term used only for sea or inland waterway shipments)

DOM Domestically Supplied
Duty paid at the border, making the material equivalent to being supplied by a domestic source

DUP Delivered; Duty Unpaid
Seller bears costs and risks involved in bringing goods to a named place in the country of importation as well as risks and costs of carrying out customs formalities, but excluding duties, taxes, and other official changes payable upon importation

EXQ Ex Quay

EXS Ex Ship

EXW Ex Works
Buyer bears all costs and risks in taking the goods from the seller's premises to the desired location

FAS Free Alongside Ship
Seller's obligation ends when goods have been placed alongside the vessel on the quay or in lighters at the named port of shipment; buyer bears all costs and risks thereafter

FCA Free Carrier
Seller fulfills his obligation when goods are handed over, cleared for export, and into the charge of the carrier named by the buyer at the named place or location

FCI Freight Carriage and Insurance Paid To

FCP Freight Carriage Paid To

FOB Free on Board

FOR Free on Rail

FOT Free on Truck

NPF Non-privileged Foreign
Duty not paid at the border and in the U. S. Customs and Border Protection (CBP) category of "non-privileged foreign"

PPF Privileged Foreign
Duty not paid at the border and in the U. S. Customs and Border Protection (CBP) category of "privileged foreign"

22	Cash Discount Terms Apply *Contract terms specify that a cash discount is applicable*
23	Payment Due Upon Receipt of Invoice
24	Anticipation *A discount allowance given when an invoice is paid before its due date (anticipation = (agreed rate/365) x invoice amount x number of days early)*

25 Cash Account
26 Cash on Advance
27 Cash on Arrival
Open account of short duration (usually 10 days)
28 Cash per Vendor Request
29 Cash by State Law
30 Cash with Order
31 Cash on Delivery (COD)
32 Lease Agreement
33 Net Month Following Invoice (MFI)
34 Sell by Note
Credit instrument in which debtor promises to pay a definite sum of money on demand or at a definite time in the future, at a stated place
35 Supplier Floor Plan
Type of financing used often by auto and furniture dealers where merchandise is owned by financing institution
36 Contract Basis
Terms are based on contract with vendor
37 Credit Controlled
Terms are monitored by creditor
38 Dating Given
In industries where principal sales may occur in one season, suppliers may extend seasonal dating (usually due after main selling season)
39 Trade Acceptance
Special from of draft that arises out a merchandise transaction; it is a written acknowledgment of the sale of goods and promise to pay at a definite date and place
40 Bill to Bill
Term indicating payment for one bill must be paid prior to the next
41 Letter of Credit

55 Installment Payments are Due Semi-annually
56 Installment Payments are Due Monthly
57 Installment Payments are Due Quarterly
58 Irrevocable Letters of Credit
61 Payment Order Through Bank

63 Promissory Notes
64 Secured Account
65 Letters of Credit at Sight
Bank accepts Letter of Credit and makes funds immediately available
67 Deposit Required
68 Documents against Acceptance
When an importer accepts liability for imported goods, shipping documents can be released; actual payment is based on terms on draft which is signed when documents are picked up
70 Documents against Payment
Documents are released upon payment
71 Inter-company Account
Used to signify that the vendor and customer are affiliated companies
72 Unknown
73 Partial Advance
Partial Payment is required to be paid in advance
74 Payment Upon Completion
75 United States Funds Required
76 Usance Bill
Type of Letter of Credit for which a percentage is paid up front
77 Progressive Discount
Discount varies based on monetary amount of order and/or speed in which payments are made
CA Cancellation Option
CO Consignment
CT Commercial Item Finance
NC No Charge
PP Prepayment
RO Redemption Options
TC Continuous
The policy is in force until cancellation.
TN Noncontinuous
The policy will be terminated unless renewal is distributed.
ZZ Mutually Defined

337 - Time

Time expressed in 24-hour clocktime as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)

347 - Hash Total

Sum of values of the specified data element. All values in the data element will be summed without regard to decimal points (explicit or implicit) or signs. Truncation will occur on the left most digits if the sum is greater than the maximum size of the hash total of the data element. Example: -.0018 First occurrence of value being hashed. .18 Second occurrence of value being hashed. 1.8 Third occurrence of value being hashed. 18.01 Fourth occurrence of value being hashed. 18E2 Fifth occurrence of value being hashed. -------- 1873 Hash Total

33 Request for Payment
34 Payment Declined
35 Request Authority
36 Authority to Deduct (Reply)
37 Authority Declined (Reply)
38 No Financial Value
39 Response to Proposed Trip Plan
40 Commitment Advice
41 Corrected and Verified
42 Temporary Record
Preliminary data that will be replaced with permanent information once verification of accuracy and completeness has been performed
43 Request Permission to Service
44 Rejection
45 Follow-up
A second or subsequent transmission of the transaction set when an expected response has not yet been received
46 Cancellation with Refund
47 Transfer
48 Suspended
49 Original - No Response Necessary
50 Register
To provide such trading partner profile information as may be necessary to request registration as a trading partner in a system (e.g., be authorized to render quotes to the government)
51 Historical Inquiry
52 Response to Historical Inquiry
53 Completion
54 Approval
55 Excavation
56 Expiration Notification
57 Initial
5C Chargeable Resubmission
77 Simulation Exercise
CN Completion Notification
Signifies that the order is complete and the information contained within is final for the service request purchase order
CO Corrected

DA Delegate to Alternative
Used by the currently responsible support point to delegate "ownership" of a Product Quality Deficiency Report (PQDR) to an alternate support point

DE DEMIL Identification Code
Used to indicate Demilitarization (DEMIL) Identification Code

DJ DEMIL Justification
Used to indicate Demilitarization (DEMIL) Justification

DT Demand Transaction
Used to indicate Demand Transaction

ED Exhibit Disposition
Used by the receiver of the transaction to indicate compliance with instructions for exhibit disposition confirmation

ER Exhibit Receipt
Used by the receiver of the transaction to indicate an exhibit receipt

EX Final Loading Configuration

FA Forward to Action Point
Used by the initial screening point to forward the Product Quality Deficiency Report (PQDR) from the screening point to an action point; i.e., assign a PQDR to an Action Point

FC Forward to Contractor
Used by the initial screening point to forward ownership of a Product Quality Deficiency Report (PQDR) to a contractor

FS Forward to Support Point
Used by an action point to forward ownership of a Product Quality Deficiency Report (PQDR) to a support point; i.e., assigns ownership of a PQDR to a support point

GR Granted

MD Materiel Disposition
Used by a support point or action point after the investigation has been completed to provide materiel disposition

PR Proposed Loading Configuration

RH Release Hold

RO Re-open
Product Quality Deficiency Report (PQDR) has been re-opened by the system sending the transaction, and needs to be re-opened in the receiving system. Typically used when a PQDR is re-opened by a screening point in one system and needs to be opened in another system. Also, treated as a request to re-open a PQDR when sent by an originator, action point, or support point to a screening point

RP Reply
Used to identify that the transaction is a reply transaction

RR Reply Rebuttal
Used to provide a reply rebuttal to a previously received final reply

RV Revised Loading Configuration

SB Scan Based Trading

SU Status Update

ZZ Mutually Defined

354 - Number of Line Items

Total number of line items in the transaction set TYPE=**N0** MIN=**1** MAX=**6**

CODE	DEFINITION & EXPLANATION
01	Actual Pounds
02	Statute Mile
03	Seconds
04	Small Spray
05	Lifts
06	Digits *Expresses a value using total number of digits, e.g., 6 digits*
07	Strand
08	Heat Lots
09	Tire
10	Group
11	Outfit
12	Packet
13	Ration
14	Shot
15	Stick

16 115 Kilogram Drum
A cylindrical container whose contents weigh 115 kilograms when full

17 100 Pound Drum
A cylindrical container whose contents weigh 100 pounds when full

18 55 Gallon Drum
A cylindrical container whose volume is equal to 55 gallons

19 Tank Truck
A liquid-carrying highway vehicle whose volume is variable according to the customer's needs and which is used as a measure of goods ordered, sold, and delivered; differs from a tankcar which transports liquids by rail

1A Car Mile
One freight car moving one mile

1B Car Count
The number of freight cars moving over a specified track

1C Locomotive Count
The number of locomotives moved over a specified track

1D Caboose Count
The number of cabooses moved over a specified track

1E Empty Car
Unloaded or empty cars moving over a specified track

1F Train Mile
The first locomotive in a train moving one mile

1G Fuel Usage (Gallons)
The number of gallons of diesel fuel used to move a train or all trains over specified trackage

1H Caboose Mile
One caboose moving one mile

1I Fixed Rate
Indicates a predetermined or set rate for usage of a facility

1J Ton Miles
Tons of freight multiplied by the number of times moved; includes non-revenue freight such as material used to maintain trackage and right-of-way

1K Locomotive Mile
One locomotive moving one mile

1L Total Car Count
The sum of cars, locomotives, and cabooses moving over a specified track; the conversion rate for locomotives and cabooses is set by contract

1M Total Car Mile
The sum of car miles, locomotive miles, and caboose miles moved over a specified track; the conversion rate for locomotives and cabooses is set by contract

1N Count

1O Season

1P Tank Car

1Q Frames

1R Transactions

1S Millimole
Millimole is 1/1000 part of a mole (measure of the concentration of a solute)

1T Terabecquerel

1U Dose

1V Slab
A large thickpiece of stone, concrete, wood or similar material, typically rectangular

1X Quarter Mile

1Z Base Unit

20 20 Foot Container
A sea-land rectangular container box whose capacity is defined by its longest dimension and by which product shipments are measured and billed.

21 40 Foot Container
A sea-land rectangular container box whose capacity is defined by its longest dimension and by which product shipments are measured and billed

22 Deciliter per Gram
Represents viscosity, Cuene intrinsic viscosity, and limit intrinsic viscosity

23 Grams per Cubic Centimeter
Represents product density

24 Theoretical Pounds

25 Grams per Square Centimeter
Represents product basis weight

26 Actual Tons

27 Theoretical Tons

28 Kilograms per Square Meter
Represents product basis weight

29 Pounds per 1000 Square Feet
Represents product basis weight

2A Radians Per Second
Measure of angular velocity

2B Radians Per Second Squared
Measure of angular acceleration

2C Roentgen
Unit of X-radiation or gamma radiation equal to the amount of radiation that produces in one cubic centimeter of dry air at 0 degrees Celsius and standard atmospheric pressure ionization of either sign equal to one electrostatic unit of charge

2D Ship Set

2F Volts Per Meter
Measure of electrical field strength

2G Volts (Alternating Current)
Measure of electrical potential

2H Volts (Direct Current)
Measure of electrical potential

2I British Thermal Units (BTUs) Per Hour
British thermal units per hour

2J Cubic Centimeters Per Second
Rate of flow

2K Cubic Feet Per Hour
Rate of flow

2L Cubic Feet Per Minute
Rate of flow

2M Centimeters Per Second
Rate of speed

2N Decibels
A unit for expressing the relative intensity of sounds on a scale of 0 for the least perceptible sound to about 130 for the average pain level

2P Kilobyte
Unit of computer storage capacity equal to 1000 bytes

2Q Kilobecquerel
Unit of radiation

2R Kilocurie
Unit of radiation

2U Megagram
Unit of mass

2V Megagrams Per Hour

2W Bin
Storage container used as a unit of measurement

2X Meters Per Minute
Measure of linear speed

2Y Milliroentgen
Unit of radiation

2Z Millivolts
Unit of electrical potential

30 Horsepower Days per Air Dry Metric Tons
Represents the energy requirements for processing a product

31 Catchweight

32 Kilograms per Air Dry Metric Tons
Represents chemical addition rate during product manufacture or chemical addition within the finished product

33 Kilopascal Square Meters per Gram
Represents burst index measurement for pulp products

34 Kilopascals per Millimeter
Represents hardness index of pulp products

35 Milliliters per Square Centimeter Second
Represents porosity of a sheet of material

36 Cubic Feet per Minute per Square Foot
Represents porosity of a sheet of material

37 Ounces per Square Foot
Represents sheet weight

38 Ounces per Square Foot per 0.01 Inch
Represents sheet density

39 Basis Points

3A Degrees Lovibond

3B Megajoule
Unit of energy or heat

3C Manmonth
Measure of workoutput by a single person during a typical workmonth

3D Pieces per 100 Grams

3E Pounds Per Pound of Product
3F Kilograms Per Liter of Product
3G Pounds Per Piece of Product
3H Kilograms Per Kilogram of Product
3I Kilograms Per Piece of Product
3J Pieces per 10 Pounds
3K Proof
3L Scoville Units
3M Water Activity
3Z Terabytes
40 Milliliter per Second
Represents rate of absorbency
41 Milliliter per Minute
Represents rate of absorbency
42 Centesimal Hahnemannian Dilution (CH)
Centesimal Hahnemannian Scale Attenuation - One milliliter (1.0 ml) of the first centesimal liquid attenuation (1C), or one gram (1.0 g) of the first centesimal trituration (1C) represents 0.01 gram (10.0 mg) of the dry crude medicinal substance
43 Super Bulk Bag
A cloth, plastic, or paper-based bag having the dimensions of the pallet on which it is constructed and varying in height according to the weight and density of product contained; typically transports dry, loose materials in bulkform
44 500 Kilogram Bulk Bag
A flexible container for bulkgoods whose contents weigh 500 kilograms when full
45 300 Kilogram Bulk Bag
A flexible container for bulkgoods whose contents weigh 300 kilograms when full
46 25 Kilogram Bulk Bag
A flexible container for bulkgoods whose contents weigh 25 kilograms when full
47 50 Pound Bag
A flexible container whose contents weigh 50 pounds when full
48 Bulk Car Load
A fully loaded rail car containing dry bulkloose materials
49 Decimal Hahnemannian Dilution (DH)
Decimal Scale of Attenuation - One gram (1.0 g) of tincture, one milliliter of 1X aqueous solution, or one gram (1.0 g) of 1X trituration represents 0.10 gram of dry crude medicinal substance
4A Bobbin
A cylinder or spindle on which yarn or thread is wound
4B Cap
Designates that the cap of a container is manufactured to dimensions that enable it to be used as a measuring device when mixing the contents of the container with another substance
4C Centistokes
*1 * 10/-6 square meters/second*
4D Curie
*A unit of radioactivity equal to 3.7 * 10/10 disintegrations per second*

4E 20-Pack
Packcontaining 20 units

4F 100-Pack
Packcontaining 100 units

4G Microliter
1/1,000,000 liter

4I Meters Per Second
Measure of linear speed

4J Meters Per Second Per Second
Measure of acceleration

4K Milliamperes
Unit of electrical current

4L Megabyte
Unit of computer storage capacity

4M Milligrams Per Hour
Unit of flow

4N Megabecquerel
Unit of radiation

4O Microfarad
Unit of electrical capacitance

4P Newtons Per Meter
Unit of measure for surface tension

4Q Ounce Inch
Unit of torque

4R Ounce Foot
Unit of torque

4S Pascal
Unit of pressure

4T Picofarad
Unit of electrical capacitance

4U Pounds Per Hour
Rate of flow

4V Cubic Meter Per Hour
Rate of flow

4W Ton Per Hour
Rate of flow

4X Kiloliter Per Hour
Rate of flow

50 Actual Kilograms

51 Actual Tonnes

52 Credits

53 Theoretical Kilograms

54 Theoretical Tonnes

55 Korsakovian (K)
Centesimal Korsakovian Scale of Attenuation - One milliliter (1.0 ml) of the first centesimal liquid attenuation (1C), or one gram (1.0 g) of the first centesimal trituration (1C). represents 0.01 gram (10.0 mg) of the dry crude medicinal substance

56 Sitas

57 Mesh
Linear measurement of the open area of screen, net, weave, or similarly constructed item

58 Net Kilograms

59 Parts Per Million

5A Barrels per Minute
The number of 42 gallon barrels pumped or mixed in a time period of one minute

5B Batch
The quantity of material produced at one operation

5C Gallons per Thousand
The number of gallons of a component material used per one thousand gallons of a process made

5D Proof Gallons

5E MMSCF/Day
One million standard cubic feet of gas per day

5F Pounds per Thousand
The number of pounds of solid material used in each 1000 gallons of fluid, mixed or pumped

5G Pump
The number of pumps used on a specific job

5H Stage
A period or step in a process or development

5I Standard Cubic Foot
One cubic foot of gas measured at a fixed temperature and pressure; the value used for the temperature and pressure varies depending on the type of gas being measured

5J Hydraulic Horse Power
A calculated measure of Horse Power using the formula rate (barrels per minute) times pressure (pounds per square inch) divided by 40.8

5K Count per Minute

5P Seismic Level

5Q Seismic Line

60 Percent Weight

61 Parts Per Billion

62 Percent Per 1000 Hours

63 Failure Rate In Time

64 Pounds Per Square Inch Gauge

65 Coulomb
Unit of charge

66 Oersteds

67 Siemens
Unit of admittance

68 Ampere

69 Test Specific Scale

6A Milliampere-hour (mAh)
A unit of measurement commonly used to describe the energy charge that a battery can hold and how long a device will run before the battery's charge is depleted.

70 Volt

71 Volt-Ampere Per Pound
72 Watts Per Pound
73 Ampere Turn Per Centimeter
74 Milli Pascals
75 Fifty Millesimal (LM)
Fifty Millesimal Scale of Attenuation - One milliliter (1.0 ml) of the first fifty millesimal attenuation
76 Gauss
77 Mil
78 Kilogauss
79 Electron Volt
7A Landings
Landing events an aircraft has completed.
7C Flight Hours
80 Pounds Per Square Inch Absolute
81 Henry
Unit of inductance
82 Ohm
Unit of resistance
83 Farad
Unit of capacitance
84 Kilo Pounds Per Square Inch (KSI)
85 Foot Pounds
86 Joules
87 Pounds per Cubic Foot
89 Poise
8C Cord
8D Duty
8P Project
8R Program
8S Session
8U Square Kilometer
90 Saybold Universal Second
A measure of kinematic viscosity, usually of oil
91 Stokes
92 Calories per Cubic Centimeter
93 Calories per Gram
94 Curl Units
95 20,000 Gallon Tankcar
A 20,000 gallon liquid capacity enclosed rail car
96 10,000 Gallon Tankcar
A 10,000 gallon liquid capacity enclosed rail car
97 10 Kilogram Drum
A cylindrical container whose contents weigh 10 kilograms when full

98 15 Kilogram Drum
A cylindrical container whose contents weigh 15 kilograms when full

99 Watt

9A Apothecary Pound

9B Briquet

9F Fold
The number of folds as a measure of overlays

9O Apothecary Ounce

9P Pillow
The number of pillows issued to a medical facility per hospital bed

9S Seat

9Y Family Unit

9Z United States Pharmacopoeia (USP) Unit
A unit used in the United States to measure the mass of a vitamin or drug based on its expected biological effects

A1 Absorbance

A2 Bloom Units

A3 Brabender Units

A4 Count per Ounce

A5 Count per Pound

A6 Count per Pouch

A7 Milligrams per Gram

A8 Dollars per Hours
A rate expressed in dollars per hour to be charged for each hour worked

A9 Millipoises

AA Ball

AB Bulk Pack

AC Acre

AD Bytes
A computer string of data that consists of a quantity of bits, treated as a unit; a bit is a binary digit

AE Amperes per Meter

AF Centigram
A unit of metric weight equal to 0.01 gram or 0.000035 ounce

AG Angstrom

AH Additional Minutes
The minutes, usually associated with usage-sensitive pricing of telecommunication services, which are above the minutes allowed for that particular service

AI Average Minutes Per Call
The total number of minutes of a category of calls divided by the total number of calls within the category for telephone services calculated to provide call summary details

AJ Cop
A cylindrical or conical mass of thread, yarn, or cable on a quill or a tube

AK Fathom
A unit of length equal to 6.0 feet or 1.829 meters

AL Access Lines
Number of lines subject to Carrier Access Line Charges

AM Ampoule

AN Minutes or Messages
Number of minutes or messages contracted or used in telephone services where either the number of minutes or messages are the unit of measure for the calculation of charges

AO Ampere-turn

AP Aluminum Pounds Only

AQ Anti-hemophilic Factor (AHF) Units
Intravenous administering of blood products that have been tested for potency against the U.S. medical unit of measure

AR Suppository

AS Assortment

AT Atmosphere
Equal to the pressure of the air at sea level, or approximately 14.7 pounds per square inch

AU Ocular Insert System
A drug delivery system which is placed in the lower conjunctival formix from which the drug diffuses through a membrane at a constant rate over a seven-day period

AV Capsule
A compact metallic or plastic container for liquids or solids

AW Powder-Filled Vials
Standard unit of intravenous blood product that has to be reconstituted with a liquid before being administered

AX Twenty
20 each of an item of supply

AY Assembly

AZ British Thermal Units (BTUs) per Pound

B0 British Thermal Units (BTUs) per Cubic Foot

B1 Barrels per Day

B2 Bunks

B3 Batting Pound

B4 Barrel, Imperial

B5 Billet

B6 Bun

B7 Cycles

B8 Board

B9 Batt

BA Bale

BB Base Box

BC Bucket

BD Bundle

BE Beam

BF Board Feet

BG Bag

BH Brush

BI Bar
A centimeter-gram-second unit of pressure, equal to one million dynes per square centimeter
BJ Band
BK Book
BL Block
BM Bolt
BN Bulk
BO Bottle
BP 100 Board Feet
BQ Brake horse power
The horsepower made available by an engine or turbine for driving machinery other then itself
BR Barrel
BS Basket
BT Belt
BU Bushel
32 dry quarts
BV Bushel, Dry Imperial
BW Base Weight
BX Box
BY British Thermal Unit (BTU)
BZ Million BTUs/Dekatherm
C0 Calls
Number of calls handled
C1 Composite Product Pounds (Total Weight)
C2 Carset
C3 Centiliter
C4 Carload
C5 Cost
C6 Cell
C7 Centipoise (CPS)

CZ Combo
D0 Mexican Peso
D1 Dollars, Canadian
D2 Shares
D3 Square Decimeter
Metric unit of area
D4 Degrees Brix
D5 Kilogram Per Square Centimeter
Unit of pressure
D6 Degrees Lintner
D8 Draize Score
D9 Dyne per Square Centimeter
DA Days
DB Dry Pounds
DC Disk (Disc)
DD Degree
DE Deal
DF Dram
DG Decigram
DH Miles
DI Dispenser
DJ Decagram
DK Kilometers
DL Deciliter
DM Decimeter
DN Deci Newton-Meter
One tenth of a Newton-meter, representing torque. A Newton-meter represents force times distance
DO Dollars, U.S.

DP Dozen Pair

DQ Data Records
Number of Data Records handled

DR Drum

DS Display

DT Dry Ton

DU Dyne
The unit of force in the cgs system equal to the force that would give a free mass of one gram an acceleration of one centimeter per second

DV Display Shipper
A display shipper is a self-contained unit shipped from the supplier to the retailer and used directly to feature products for sale.

DW Calendar Days

DX Dynes per Centimeter
Unit of surface tension

DY Directory Books
Number of directory books delivered to customer

DZ Dozen

E1 Hectometer
A unit of metric length equal to 109.36 yards or 0.062 mile

E2 Daily Value (DV)

E3 Inches, Fraction--Average

E4 Inches, Fraction--Minimum

E5 Inches, Fraction--Actual

E7 Inches, Decimal--Average

E8 Inches, Decimal--Actual

E9 English, (Feet, Inches)

EA Each

EB Electronic Mail Boxes
Number of Electronic Mail Boxes established for an account

EC Each per Month

ED Inches, Decimal--Nominal

EE Employees

EF Inches, Fraction-Nominal

EG Double-time Hours

EH Knots

EJ Locations

EK Mixed Module

EL Multipack

EM Inches, Decimal-Minimum

EP Eleven pack

EQ Equivalent Gallons
Represents number of gallons that syrup and concentrate make of product

ES Prepack Assortment

ET Order

EV Envelope
EX Feet, Inches and Fraction
EY Feet, Inches and Decimal
EZ Feet and Decimal
F0 International Units per Gram
F1 Thousand Cubic Feet Per Day
The unit of measure of the rate of production of a gas
F2 International Unit
A unit accepted by an international agency; potency of a drug/vitamin based on a specific weight of that drug/vitamin
F3 Equivalent
Weight of a substance which combines with or replaces one gram atomic weight of hydrogen
F4 Minim
An apothecary's fluid measure; 60 minims = 1 fluid gram (approx. 5 cc)
F5 MOL
Gram-molecular weight of a gas
F6 Price Per Share
F9 Fibers per Cubic Centimeter of Air
FA Fahrenheit
FB Fields
FC Blister Pak
FD Million Particles per Cubic Foot
FE Track Foot
Represents rails, all ties and fittings, and subgrade
FF Hundred Cubic Meters
A unit of metric volume equal to 131.0 cubic yards
FG Transdermal Patch
A drug delivery system which is placed on the skin and releases a drug at a constant rate through the skin
FH Micromolar
One millionth of a mole; a mole is a standard chemical unit
FJ Sizing Factor
FK Fibers
FL Flake Ton
FM Million Cubic Feet
FN Clamshell Package
FO Fluid Ounce
FP Pounds per Sq. Ft.
FR Feet Per Minute
Measure of linear speed
FS Feet Per Second
Measure of linear speed
FT Foot
FU Furlong
A unit of distance equal to 220 yards (about 201 meters)

FV Grams per 100 Cubic Inches

FZ Fluid Ounce (Imperial)
A liquid unit of measure equal to 1/20 (.05) pint (Imperial), 28.416 cubic centimeters, or 28.416 milliliters

G1 Gallons Capacity

G2 U.S. Gallons Per Minute
Rate of flow

G3 Imperial Gallons Per Minute
Rate of flow

G4 Gigabecquerel
Unit of radiation equal to 27 millicuries

G5 Gill (Imperial)
A unit of liquid or dry measure equal to 5 fluid ounces, 8.669 cubic inches, or 142.066 cubic centimeters

G6 Bit

G7 Microfiche Sheet
A film that contains photographed documents greatly reduced in size

G8 Gigacalories

G9 Gigabyte

GA Gallon

GB Gallons/Day

GC Grams per 100 Grams

GD Gross Barrels

GE Pounds per Gallon

GF Grams per 100 Centimeters

GG Great Gross (Dozen Gross)

GH Half Gallon

GI Imperial Gallons

GJ Grams per Milliliter

GK Grams per Kilogram

GL Grams per Liter

GM Grams per Sq. Meter

GN Gross Gallons

GO Milligrams per Square Meter

GP Milligrams per Cubic Meter

GQ Micrograms per Cubic Meter

GR Gram

GS Gross

GT Gross Kilogram
Represents kilograms of product and package or container

GU Gauss per Oersteds

GV Gigajoules
One billion joules; standard method of expressing absolute heating value of natural gas regardless of volume in the Canadian oil and gas industries

GW Gallons Per Thousand Cubic Feet

GX Grain
A small unit of weight equal to 1/480 (.002083) troy ounce, or 0.0648 gram

GY Gross Yard

GZ Gage Systems

H1 Half Pages - Electronic
Number of electronic half pages of data delivered

H2 Half Liter
Unit of capacity equal to 1/2 liter

H3 18-Pack

H4 Hectoliter
Metric measure for 100 liters

H5 22-Pack

H6 30-Pack

H7 38-Pack

H8 62-Pack

H9 75-Pack

HA Hank
One hundred feet of rope

HB Hundred Boxes

HC Hundred Count

HD Half Dozen

HE Hundredth of a Carat

HF Hundred Feet

HG Hectogram

HH Hundred Cubic Feet

HI Hundred Sheets

HJ Horsepower

HK Hundred Kilograms

HL Hundred Feet - Linear

HM Miles Per Hour

HN Millimeters of Mercury

HO Hundred Troy Ounces

HP Millimeter H20
Unit of pressure

HQ Hectare

HR Hours

HS Hundred Square Feet

HT Half Hour

HU Hundred

HV Hundred Weight (Short)

HW Hundred Weight (Long)

HX Hospital Beds
The number of hospital beds issued to a medical facility

HY Hundred Yards

HZ Hertz

I1 Persons, Capacity
Human occupant capacity

I2 Pellet
A small rounded or spherical globule/globoid of medicine

IA Inch Pound
Unit of torque

IB Inches Per Second (Vibration Velocity)
Measure of vibration velocity

IC Counts per Inch

IE Person

IF Inches of Water
The maximum differential pressure for which a given meter will measure accurately and is expressed in inches of water

IG Inner Package

IH Inhaler
Metered-dose pressurized method of getting medication into the lungs or nasal passages

II Column-Inches
A unit of area one column wide and one inch high

IK Peaks per Inch (PPI)

IL Inches per Minute

IM Impressions

IN Inch

IP Insurance Policy
An individual insurance contract

IS Stops

IT Counts per Centimeter

IU Inches Per Second (Linear Speed)
Measure of linear speed

IV Inches Per Second Per Second (Acceleration)
Measure of acceleration

IW Inches Per Second Per Second (Vibration Acceleration)
Measure of vibration acceleration

J1 80-Pack

J2 Joule Per Kilogram
Measure of specific energy

J3 81-Pack

J4 82-Pack

J5 84-Pack

J6 85-Pack

J7 96-Pack

J8 5000-Pack

J9 Left Unit

JA Job

JB Jumbo

JC Caplet
To denote items in caplet form

JE Joule Per Kelvin
Measure of heat capacity

JG Joule per Gram
Joule is unit of energy and gram is unit of mass

JK Mega Joule per Kilogram
"Mega" means "millions" and "kilo" means "thousands"

JL Refill
Refers to the number of refill units in a package

JM Megajoule/Cubic Meter
A megajoule is one million joules; conventional measurements for expressing the heating value available in a given volume of gas

JN Pan
Refers to items in a pan (such as eye shadow) and would be associated with the number of different colors

JO Joint

JP Prepack
To indicate this is "n" assortment product with different UPC codes on it

JR Jar

JS Use
Refers to the number of uses from a product (such as a box of laundry detergent that provides sixty washes)

JT Tin
Refers to giftware products in a tin

JU Jug

JV Ovule
Refers to products which come in "ovule" form

JX Exposure
To be used to indicate the number of exposures on a roll of film

K0 Kilovolt Potential
Refers to the intensity of the radiographic beam and the resulting image on the film.

K1 Kilowatt Demand
Represents potential power load measured at predetermined intervals

K2 Kilovolt Amperes Reactive Demand
Reactive power that must be supplied for specific types of customer's equipment; billable when kilowatt demand usage meets or exceeds a defined parameter

K3 Kilovolt Amperes Reactive Hour
Represents actual electricity equivalent to kilowatt hours; billable when usage meets or exceeds defined parameters

K4 Kilovolt Amperes
Measure of electrical power

K5 Kilovolt Amperes Reactive
Measure of electrical power

K6 Kiloliter
One thousand liters

K7 Kilowatt
Measure of electrical power

K8 Kilovolt

K9 Kilograms per Millimeter Squared (KG/MM2)

KA Cake

KB Kilocharacters
Kilocharacters of data transmitted

KC Kilograms per Cubic Meter

KD Kilograms Decimal

KE Keg
A unit of weight equal to 100 pounds, used for nails

KF Kilopackets
Kilopackets of data transmitted

KG Kilogram

KH Kilowatt Hour

KI Kilograms/Millimeter Width

KJ Kilosegments
Kilosegments of data transmitted

KK 100 Kilograms

KL Kilograms/Meter

KM Kilograms per Square Meter, Kilograms, Decimal

KN Kilocalorie

KO Millequivalence Caustic Potash per Gram of Product
Acid number and saponification number test results have a unit of measure of Millequivalence KOH per Gram

KP Kilometers Per Hour

KQ Kilopascal
Represents pressure

KR Kiloroentgen
Measure of radiation

KT Kit

KU Task

KV Kelvin

KW Kilograms per Millimeter

KX Milliliters per Kilogram

L1 Right Unit

L2 Liters Per Minute
Measure of the rate of flow

L5 Liters at 15 Degrees Celsius

LA Pounds Per Cubic Inch

LB Pound

LC Linear Centimeter

LE Lite

LF Linear Foot

LG Long Ton
2240 pounds as used in the U.K.

LH Labor Hours

LI Linear Inch

LJ Large Spray

LK Link
LL Lifetime
A duration ending with the death of the individual
LM Linear Meter
LN Length
LO Lot
LP Liquid Pounds
LQ Liters Per Day
Measure of liquid flow over a given time period
LR Layer(s)
LS Lump Sum
LT Liter
LU Order Line
LX Linear Yards Per Pound
LY Linear Yard
M0 Magnetic Tapes
Number of Magnetic Tapes delivered with data
M1 Milligrams per Liter
M2 Millimeter-Actual
M3 Mat
M4 Monetary Value
M5 Microcurie
M6 Millibar
M7 Micro Inch
M8 Mega Pascals
M9 Million British Thermal Units per One Thousand Cubic Feet
Represents conversion from a volume of gas to the heat value of the gas
MA Machine/Unit
MB Millimeter-Nominal
MC Microgram
MD Air Dry Metric Ton
ME Milligram
MF Milligram per Sq. Ft. per Side
MG Metric Gross Ton
MH Microns (Micrometers)
1/1,000,000 meter
MI Metric
MJ Minutes
MK Milligrams Per Square Inch
ML Milliliter
MM Millimeter
MN Metric Net Ton
MO Months
MP Metric Ton

MQ 1000 Meters
MR Meter
MS Square Millimeter
MT Metric Long Ton
MU Millicurie
MV Number of Mults
MW Metric Ton Kilograms
MX Mixed
MY Millimeter-Average
MZ Millimeter-minimum
N1 Pen Calories
Daily calories prescribed to be taken for parenteral/enteral therapy
N2 Number of Lines
N3 Print Point
A print point is approximately .0138"
N4 Pen Grams (Protein)
Grams of amino acids prescribed to be taken for parenteral/enteral therapy
N6 Megahertz
One million cycles per second
N7 Parts
N9 Cartridge Needle
Used with auto-injector units only, a disposable, filled cartridge that includes a needle
NA Milligrams per Kilogram
NB Barge
NC Car
ND Net Barrels
NE Net Liters
NF Messages
Number of Messages transmitted, or delivered
NG Net Gallons
NH Message Hours
Number of hours used, calculated at some rate basis such as Minutes/message carried
NI Net Imperial Gallons
NJ Number of Screens
Number of data screens handled, or transmitted
NK Nights
NL Load
NM Nautical Mile
NN Train
NQ Mho
The basic unit of electrical conductivity, having a unity value when one ampere of current flows through a conductor to which a one volt difference in electrical potential is applied
NR Micro Mho
The typical unit of electrical conductivity measurement - one millionth of a Mho

NS Short Ton
Two thousand pounds

NT Trailer

NU Newton-Meter
Unit of energy or torque

NV Vehicle

NW Newton
Represents force in the International Metric System (SI); equal to the force that produces an acceleration of 1 meter per second on a mass of 1 kilogram

NX Parts Per Thousand

NY Pounds Per Air-Dry Metric Ton
A measure of chemical addition rate during manufacture and product constituent analysis

NZ Thousand Gallons Per Day

O1 Cubic Millimeter
A metric measure of volume or capacity equal to a cube 1 millimeter on each edge

OA Panel

OB Outlet

OC Billboard

OG Apothecary Grain

ON Ounces per Square Yard

OP Two pack

OT Overtime Hours

OU Operating Unit
SEE CODE SOURCE 350

OZ Ounce - Av

PM Pounds-Percentage
PN Pounds Net
PO Pounds per Inch of Length
PP Plate
PQ Pages per Inch
PR Pair
PS Pounds per Sq. Inch
PT Pint
PU Mass Pounds
PV Half Pint
PW Pounds per Inch of Width
PX Pint, Imperial
PY Peck, Dry U.S.
PZ Peck, Dry Imperial
Q1 Quarter (Time)
Q2 Pint U.S. Dry
Volume equal to 33.6003125 cubic inches
Q3 Meal
A group of food items packaged together for human consumption
Q4 Fifty
A unit of issue in which a group of 50 items are consolidated and measured as a single entity
Q5 Twenty-Five
A unit of issue in which a group of 25 items are consolidated and measured as a single entity
Q6 Thirty-Six
A unit of issue in which a group of 36 items are consolidated and measured as a single entity
Q7 Twenty-Four
A unit of issue in which a group of 24 items are consolidated and measured as a single entity
Q9 Five
A unit of issue in which a group of five items are consolidated and measured as a single entity
QA Pages - Facsimile
Number of FAX pages transmitted
QB Pages - Hardcopy
Number of printed pages delivered
QC Channel
QD Quarter Dozen
QE Photographs
QF Quarter
One of four divisions of a human body
QH Quarter Hours
Number of 15 minute increments of usage handled
QK Quarter Kilogram
A unit of metric weight equal to 250 grams

QR Quire
QS Quart, Dry U.S.
QT Quart
QU Quart, Imperial
R1 Pica
Approximately .166 inches measured from the top of the ascender (the upward stroke in a lowercase letter, such as "t") to the bottom of the descender (the downward stroke in a lowercase letter, such as "p"); twelve points equal one pica; six picas equal approximately one inch (.996)
R2 Becquerel
*Unit of radiation equal to 3.7 * 10/10 of a curie*
R3 Revolutions Per Minute
R4 Calorie
The amount of heat it takes to raise the temperature of one gram of water one degree Centigrade at a pressure of one atmosphere
R5 Thousands of Dollars
R6 Millions of Dollars
R7 Billions of Dollars
R8 Roentgen Equivalent in Man (REM)
R9 Thousand Cubic Meters
RA Rack
RB Radian
RC Rod (area) - 16.25 Square Yards
RD Rod (length) - 5.5 Yards
RE Reel
RG Ring
RH Running or Operating Hours
Measure of accumulated time of machine or piece of equipment has been running
RJ Retinol Activity Equivalents
RK Roll-Metric Measure
RL Roll
RM Ream
RN Ream-Metric Measure
RO Round
RP Pounds per Ream
RS Resets
Number of times a transmission is reset due to line drop, interrupt, etc.
RT Revenue Ton Miles
One ton of revenue-generating freight moving one mile
RU Run
RV Mixed Module
A "mixed mod" or "display ready pallet" that is not the normal 'term' for ordering.
RW Retinol Equivalents
A unit used for quantifying the vitamin A value of sources of vitamin A, including both preformed retinoids and precursor carotenoids. Examples include: One Retinol Equivalents is equivalent to 1 mcg of retinol, 6 mcg of Beta-carotene, or 12 mcg of other pro-vitamin A

carotenoids. One RE is equivalent to 0.3 International Units of retinol or 0.1 International Units of Beta-carotene.

RX Thousand Rounds
Number of a series of professional calls on hospital patients made by a doctor or nurse in thousands

S1 Semester

S2 Trimester

S3 Square Feet per Second

S4 Square Meters per Second

S5 Sixty-fourths of an Inch

S6 Sessions
Number of interactive sessions handled

S7 Storage Units
Number of storage increments used

S8 Standard Advertising Units (SAUs)
A predefined partition of advertising page consisting of column-inch multiples

S9 Slip Sheet
A cardboard platform used for holding product for storage or transportation

SA Sandwich

SB Square Mile

SC Square Centimeter

SD Solid Pounds

SE Section
640 acres or one square mile

SF Square Foot

SG Segment

SH Sheet

SI Square Inch

SJ Sack

SK Split Tanktruck

SL Sleeve

SM Square Meter

SN Square Rod

SO Spool

SP Shelf Package

SQ Square
A unit of measure for roofing materials equal to 100 square feet

SR Strip

SS Sheet-Metric Measure

ST Set

SU Single Unit

SV Skid

SW Skein

SX Shipment

SY Square Yard

SZ Syringe
Glass or plastic barrels used to administer fluid medication under the skin, into a vein artery , or into a muscle

T0 Telecommunications Lines in Service
Snapshot sample of lines in service

T1 Thousand pounds gross

T2 Thousandths of an Inch

T3 Thousand Pieces

T4 Thousand Bags

TZ Thousand Cubic Feet

U1 Treatments

U2 Tablet
A compressed or molded blockof solid material; a collection of sheet paper glued together at one edge

U3 Ten
10 each of an item of supply

U5 Two Hundred Fifty
250 each of an item of supply

U6 U.S Gallons at 60 Degrees Fahrenheit

UA Torr
Pressure

UB Telecommunications Lines in Service - Average
Average number of lines in service specific to equal access requirements

UC Telecommunications Ports
Number of networkaccess ports

UD Tenth Minutes
Number of 6 second increments of usage

UE Tenth Hours
Number of 6 minute increments of usage

UF Usage per Telecommunications Line - Average

UH Ten Thousand Yards

UL Unitless
Unit of Measure for properties or test results without units of measure

UM Million Units
Measure used to indicate large quantities in multiples of one million

UN Unit

UP Troche
A flat, round, tablet made of a medicinal substance

UQ Wafer
A light, thin, crisp, cake

UR Application
An action of putting something into material contact

US Dosage Form

UT Inhalation

UU Lozenge

UV Percent Topical Only
A measure of medication intended only for external use

UW Milliequivalent

UX Dram (Minim)

UY Fifty Square Feet

UZ Fifty Count

V1 Flat
A shallow rectangular container frequently used for fruits and vegetables

V2 Pouch

V3 Mixed Module
A specially configured orderable product module

V4 Multipack
A group of trade items that are intended to be sold as a single consumer unit at the Point-of-Sale checkout

V5 Setpack
An orderable assortment of trade items, each of which may be sold individually at the Point-

of-Sale checkout. The Setpackmay also be sold.

V6 Prepack Assortment
An orderable standard assortment of trade items - each of which may be sold individually at the Point-of-Sale checkout. The PrepackAssortment itself is not sold at the Point-of-Sale checkout.

V7 International Bittering Units (IBU)
The International Bittering Units (IBU) scale, is used to approximately quantify the bitterness of beer. This scale measures the amount of iso-alpha acids

VA Volt-ampere per Kilogram

VC Five Hundred
500 each of an item of supply

VI Vial

VL Volume

VP Percent Volume

VR Volt-ampere-reactive

VS Visit
A quantitative measure of the number of visits to a provider by the patient

VV Percent volume per volume (v/v)
Identifies the percent volume per volume of drug concentration where both chemicals are liquids

W2 Wet Kilo
Weight of product plus liquid solution

W7 Thimble Full

WA Watts per Kilogram

WB Wet Pound

WD Work Days

WE Wet Ton

WG Wine Gallon

WH Wheel

WI Weight per Square Inch

WK Week

WM Working Months

WP Pennyweight

WR Wrap

WV Percent weight per volume (w/v)
Identifies the percent weight per volume of drug concentration where a solid chemical is dissolved in liquid

WW Milliliters of Water

WX Percent weight per weight (w/w)
Identifies the percent weight per weight of drug concentration where the weight of each chemical is used.

X1 Chains (Land Survey)

X2 Bunch
A measure used to identify a group of like items grown or fastened together

X3 Clove
A measure used to identify a section of a separate bulb

X4 Drop
The smallest quantity of liquid heavy enough to form a spherical mass

X5 Head
A measure used for a rounded, compact mass of leaves, buds or flowers

X6 Heart
A measure used to identify the central or innermost physical part

X7 Leaf
A measure used to identify a usually green flattened structure of vascular plants processed for a particular purpose

X8 Loaf
A shaped mass of food cooked or prepared in one piece

X9 Portion
A measure used to identify a section or quantity within a larger thing

XP Base Box per Pound

Y1 Slice
A measure used to identify a thin broad piece cut from a larger object

Y2 Tablespoon
A measure equal to three teaspoons or a half fluid ounce

Y3 Teaspoon
A measure equal to five milliliters or one third tablespoon

Y4 Tub
A measure used to identify a storage container

Y5 Transport Load
One or more transport packages or other items contained on a platform making them suitable for transport, stacking, and storage as a unit. The trade item above the pallet level used for transporting trade items for example TruckLoad, Container, Rail Car, Ship, Etc.

YD Yard

YL 100 Lineal Yards

ZT Per Annum
ZU Mother Tincture (TM)
Mother tincture is for homeopathic preparation and is a liquid preparation obtained by the solvent action of a suitable vehicle upon raw materials. The raw materials are usually in the fresh form but may be dried. Mother tinctures for homeopathic preparations may also be obtained from plant juices, with, or without the addition of a vehicle.
ZV Nanogram
Nanogram is one billionth (1/1,000,000,000) of a gram
ZW Barrel, Dry
ZX Barrel, Liquid
ZY Apothecary Scruple
ZZ Mutually Defined

356 - Pack

AS	Available Now - Scheduled to Ship (date)
AU	Available to Ship - Unbilled Quantity
AV	Available
BK	Back Ordered from Previous Order
BM	Backordered, Manufacturer, Out-of-Stock
BO	Back Ordered
BP	Shipment Partial, Back Order to Ship on (Date)
BT	Billed total
BW	Billed week-to-date
CA	Customer Inquiry - All Items
CB	Components Missing *A shipment made minus components that should have been shipped in order for the shipment to be in compliance with the terms and conditions of a contract*
CC	Shipment Complete on (Date)
CD	Consolidated Freight
CE	Shipment Includes Extra Items to Meet Price Break
CF	Consolidated Load
CI	Customer Inquiry - Shipped Items Only
CK	Cancelled from Previous Order
CL	Complete *Material on the load is for one producer*
CM	Shipment Complete with Additional Quantity
CN	Next Carrier Move on (Date)
CO	Customer Inquiry - Unshipped Items Only
CP	Partial Shipment on (Date), Considered No Backorder
CS	Shipment Complete with Substitution
CT	Combination *Shipment contains material for more than one producer.*

CU Cancelled Line Item

DA Due for Assortment
Quantity of a product which has been ordered by a buyer in an unfinished state that is available for instructions for the final manufacturing process to complete for delivery to the customer

DD Delivered to Destination on (Date)

DE Deleted Order

DI Discontinued

DO Diverted Order

DP Dispose

DR Dating Requirements

DS Out Of Stock Condition

EC Equipment Capacity

ED Expect to Ship By (Date)

EW Expect To Ship Week of (Date)

EX Expect to Deliver by

FS Units Not Shipped By Agent - To Be Shipped From Factory

HQ Held Awaiting Qualification

IC Item Canceled

ID Insufficient Information

IN In Process

IP Inquiry by Purchase Order

IS Item Represents Substitution from Original Order

LM Shipment late

LS Last Shipment on (Date)

LW Number of Late Weeks

MC Missing Components Furnished
A shipment which contains components earlier reported as missing from a prior shipment

NF Not Yet Published

NN Not in Process - No Shipping Schedule

NS Not In Process, Scheduled to Ship on (Date)

NY No Shipping Schedule

OB Out of Bill & Hold Goods

OF Order Sent to Factory for Production on (Date)

OP Out of Print

OR Temporarily Out of Stock - Reorder

PA Purchase Order Inquiry - All Items

PC Production

PD Purchase Order Complete

PH Product On Hold

PI Purchase Order Inquiry - Shipped Items Only

PK Packed-to-Date as of (Date)

PL Part Lot, Stop Off
Shipment contains material for more than one producer and indicates a drop off of material

PN In Process - No Shipping Schedule
PO Purchase Order Inquiry - Unshipped Items Only
PP Purchase Order Inquiry - Specific Items
PR Partial Shipment
PS In Process, Scheduled to Ship On (Date)
PT Part Lot
Material in a shipment for one producer which is part of a multi-producer shipment
QN Quantity Net Due
QP Quantity Past Due
RC Released to Carrier (Date)
Code indicating that material was given to a carrier for shipment
RD Revised Expect to Ship By (Date)
RI Recall
RT Received Total
RW Revised Expect to Ship Week of (Date)
SA Shipment Quantity Increase
A shipment which contains a quantity of items greater than the quantity called for by contract
SB Seconds Available to Ship - Billed Quantity
SC Shipment Quantity Decrease
A shipment which contains a quantity of items less than the quantity called for by contract
SD Shipped Damaged
SE Replacement Shipment
A shipment of items replacing a previous shipment of items
SF Shipped and Held in Bond at Contractor's Plant
A technical "shipment" so that an invoice can be processed for payment, but the goods actually remain in bond at a facility awaiting further use or movement
SG Shipped and Held as Government-Furnished Property
A technical "shipment" so that an invoice can be processed for payment, but the goods actually remain at a facility for incorporation, a government-furnished property, into a further work product
SH Shipped (Date)
SI Shipment Late, Scheduled to Ship on (Date)
SJ Shipped or Performed as Indicated
A shipment or performance made according to the terms and conditions of a contract
SK Shipment Underrun Quantity
A shipment which contains a quantity of items less than the expected quantity of items but the contract allows for the lesser (unknown) quantity to be accepted in satisfaction of the contract requirement
SL Shipped - to - Date through (Date)
SP Scheduled for Production at Factory on (Date)
SQ Scheduled to ship (Summary quantity)
SS Split Shipment
ST Stop Off
Intermediate stops will be made by the carrier to drop off material
SU Seconds Available to Ship - Unbilled Quantity
UB Unbilled Quantity Balance

UN Unavailable
UR Unsolicited Report
WS Item Invoiced - Shipment to Follow
ZZ Mutually Defined

234 Settlement Date

235 Delayed Billing (Not Delayed Payment)

236 Lender Credit Check

237 Student Signed

238 Schedule Release
Planned release date for an item or product

239 Baseline
The baseline or original plan that progress is measured against

240 Baseline Start
The start date of baseline or original plan

241 Baseline Complete
The complete date of the baseline or original plan

242 Actual Start
The actual start date for a task or activity

243 Actual Complete
The actual complete date for a task or activity

244 Estimated Start
The revised plan or estimate of the start date for a task or activity

245 Estimated Completion
The revised plan or estimate of the complete date for a task or activity

246 Start no earlier than
Fixed start date for a task or activity - cannot begin before this date

247 Start no later than
Fixed start date for a task or activity - cannot begin after this date

248 Finish no later than
Fixed finish date for a task or activity - cannot end after this date

249 Finish no earlier than
Fixed finish date for a task or activity - cannot end before this date

250 Mandatory (or Target) Start
Fixed start date - must begin on this date

251 Mandatory (or Target) Finish
Fixed finish date - must finish on this date

252 Early Start
The earliest date a task or activity can begin

253 Early Finish
The earliest date a task or activity can end

254 Late Start
The latest date a task or activity can begin

255 Late Finish
The latest date a task or activity can end

256 Scheduled Start
The scheduled start for a task or activity based on resource needs

257 Scheduled Finish
The scheduled finish for a task or activity based on resource needs

258 Original Early Start
The saved baseline or planned early start before current changes

259 Original Early Finish
The saved baseline or planned early finish before current changes

260 Rest Day
A non-working day such a Saturday or Sunday

261 Rest Start
The beginning of a range for rest days (from)

262 Rest Finish
The end of a range of rest days (to)

263 Holiday
A non-working day reserved for a company or national holiday

264 Holiday Start
The beginning of a range for holidays (from)

265 Holiday Finish
The end of a range of holidays (to)

266 Base
The start of base date for a calendar reference - all dates fall after it

267 Timenow
The current reporting period reference, or current status

268 End Date of Support

269 Date Account Matures

270 Date Filed

271 Penalty End
Date on which penalty period ends

272 Exit Plant Date
Date at which the product leaves the manufacturing site

273 Latest On Board Carrier Date
Latest date on which the cargo must be on board the carrier

274 Requested Departure Date

275 Approved
Date report was approved by contractor representative

276 Contract Start
The start date for a contract

277 Contract Definition
The date the contract was definitized

278 Last Item Delivery
The date the last item will be delivered to the customer

279 Contract Completion
The finish date for a contract

280 Date Course of Orthodontics Treatment Began or is Expected to Begin

281 Over Target Baseline Month
The date a budget baseline went over the target budget amount

282 Previous Report
The date a previous report was submitted

283 Funds Appropriation - Start
The date that funds appropriation begins

284 Funds Appropriation - End
The date that funds appropriation ends

285 Employment or Hire
Date on which the subscriber or dependent is hired

286 Retirement
Date on which the subscriber became retired

287 Medicare
Range of dates when the subscriber or dependent is eligible to receive Medicare benefits

288 Consolidated Omnibus Budget Reconciliation Act (COBRA)
Range of COBRA coverage

289 Premium Paid to Date
Range of dates for which premium has been paid

290 Coordination of Benefits
Range for which coordination of benefits between insurers applies

291 Plan
Range of dates for which the plan is in effect

292 Benefit
Range of benefit coverage

293 Education
Range of dates when the subscriber or dependent is a student

294 Earnings Effective Date
Date on which earnings become effective for applicable benefits

295 Primary Care Provider
Range of dates for which the services of the primary care provider are in effect

296 Initial Disability Period Return To Work

297 Initial Disability Period Last Day Worked

298 Latest Absence
Latest occurrence of which the subscriber did not report to work

299 Illness

300 Enrollment Signature Date
Date subscriber or dependent signed policy enrollment card

301 Consolidated Omnibus Budget Reconciliation Act (COBRA) Qualifying Event
Date of the qualifying event which initiated COBRA benefits

302 Maintenance
Date on which the maintenance was performed

303 Maintenance Effective
Date on which the maintenance is effective

304 Latest Visit or Consultation
Date subscriber or dependent last visited or consulted with a physician

305 Net Credit Service Date
Date assigned by the employer to an employee who previously worked for them

306 Adjustment Effective Date
Date on which the adjustment went into effect

307 Eligibility
Range of dates when the subscriber or dependent were eligible for benefits

308 Pre-Award Survey

309 Plan Termination
Date on which the plan terminated

310 Date of Closing
The date a property is sold

311 Latest Receiving Date/Cutoff Date

312 Salary Deferral
Date on which the subscriber begins to defer a portion of their salary

313 Cycle
Range of dates as they pertain to a period of time

314 Disability
Range of dates on which the physical or mental condition rendered the subscriber or dependent disabled

315 Offset
Range of dates for which the subscriber or dependent will be receiving other income

316 Prior Incorrect Date of Birth
The incorrect date of birth that was previously transmitted

317 Corrected Date of Birth
Replaces previously transmitted incorrect date of birth

318 Added

319 Failed

320 Date Foreclosure Proceedings Instituted
The date the first legal action is taken to terminate an owner's interest in realty begins

321 Purchased
Date product/extended coverage was purchased

322 Put into Service
Date product, subassembly, or replacement part was put in-service

323 Replaced

324 Returned

325 Disbursement Date

326 Guarantee Date

327 Quarter Ending

328 Changed

329 Terminated
Any condition previously reported by the carrier as preventing the completion of a move or service has been terminated

330 Referral Date
The date when an educational official or teacher recommends that a student be evaluated for placement in a special education or other program

331 Evaluation Date
The date on which a student was assessed for placement in a special education or other program

332 Placement Date
The date which identifies when a student was enrolled in a special education or other program

333 Individual Education Plan (IEP)
The date on which the plan specifying the special education instruction and services which a student is to receive was approved

334 Re-evaluation Date
The date on which the student's placement in special education or other programs will be re-assessed

335 Dismissal Date
The date on which the student exited from a special education or other program

336 Employment Begin
Date on which the subscriber or dependent became employed

337 Employment End
Date on which the subscriber or dependent ceased to be employed

338 Medicare Begin
Date on which Medicare benefits went into effect

339 Medicare End
Date on which Medicare benefits ceased to be in effect

340 Consolidated Omnibus Budget Reconciliation Act (COBRA) Begin
Date on which COBRA benefits begin

341 Consolidated Omnibus Budget Reconciliation Act (COBRA) End
Date on which COBRA benefits end

342 Premium Paid to Date Begin
Date for which premium began to be applied

343 Premium Paid to Date End
Date for which premium is paid through

344 Coordination of Benefits Begin
Date on which Coordination of Benefits begin

345 Coordination of Benefits End
Date on which Coordination of Benefits end

346 Plan Begin
Date on which the plan begins

347 Plan End
Date on which plan ends

348 Benefit Begin
Date on which the subscriber's or dependent's benefit begin

349 Benefit End
Date on which the subscriber's or dependent's benefit ends

350 Education Begin
Date on which the subscriber or dependent became a student

351 Education End
Date on which the subscriber or dependent ceased to be a student

352 Primary Care Provider Begin
Date on which the subscriber's or dependent's primary care provider became effective

353 Primary Care Provider End
Date on which the primary care provider's service ended

354 Illness Begin
Date on which illness began

355 Illness End
Date on which illness ended

356 Eligibility Begin
Date on which eligibility begins

357 Eligibility End
Date on which eligibility ends

358 Cycle Begin
Date on which the cycle begins

359 Cycle End
Date on which the cycle ends

360 Initial Disability Period Start
Date on which the disability begins

361 Initial Disability Period End
Date on which the disability ends

362 Offset Begin
Date subscriber or dependent begins receiving other income

363 Offset End
Date other income benefits cease

364 Plan Period Election Begin
Date on which the pledged contribution begins

365 Plan Period Election End
Date on which the pledged contribution ended

366 Plan Period Election
Range of dates for which the subscriber has pledged to contribute toward a benefit

367 Due to Customer
Date an item is due to a customer

368 Submittal
Date an item was submitted to a customer

369 Estimated Departure Date

370 Actual Departure Date

371 Estimated Arrival Date

372 Actual Arrival Date

373 Order Start

374 Order End
Point after which data can no longer be used (or becomes invalid for use)

375 Delivery Start
The date that deliveries will begin

376 Delivery End
The date that deliveries will end

377 Contract Costs Through
Date through which the costs reported in the contractor's request for progress payment are current

378 Financial Information Submission
Date of the submission of contractor financial information

379 Business Termination

380 Applicant Signed

381 Cosigner Signed

382 Enrollment

383 Adjusted Hire
Date of rehire is adjusted to give an employee credit for prior years of service, after a break in service has occurred

384 Credited Service
Range of employment service used to determine the amount of plan benefits due the employee

385 Credited Service Begin
The start date from which an employee's length of service, as defined in the plan document, will be calculated

386 Credited Service End
The end date to be used in the calculation of an employee's length of service, as defined in the plan document

387 Deferred Distribution
Date to which the participant has elected to defer the distribution of plan benefits (for lump sum payments)

388 Payment Commencement
Date of the initial benefit payment (for installment payments)

389 Payroll Period
The applicable payroll date for the financial transaction

390 Payroll Period Begin
The start date of the payroll cycle for the financial transaction

391 Payroll Period End
The end date of the payroll cycle for the financial transaction

392 Plan Entry
Date the employee's participation in the plan is effective

393 Plan Participation Suspension
Date the participant is suspended from the plan

394 Rehire
Date the participant is rehired, after termination

395 Retermination
Date the participant ends employment, after being rehired

396 Termination
Date the participant ends employment

397 Valuation
The date when the participant's total account balance is calculated

398 Vesting Service
Range of employment service used to determine vesting for distribution of plan benefits

399 Vesting Service Begin
The start date from which an employee's vesting percentage, as defined in the plan document, will be calculated

400 Vesting Service End

401 Duplicate Bill

402 Adjustment Promised

403 Adjustment Processed

404 Year Ending

405 Production
Used to identify dates and times that operations or processes were performed

406 Material Classification
Used to identify dates and times materials were classified or reclassified

408 Weighed

409 Date of Deed in Lieu
The date a voluntary conveyance of a property by deed in lieu is recorded

410 Date of Firm Commitment
The date an obligation to ensure the mortgage is issued

411 Expiration Date of Extension to Foreclose
The last day of a given time limit to commence foreclosure

412 Date of Notice to Convey
The date of the authorization to assign the contractual rights of a mortgage

413 Date of Release of Bankruptcy
The date of release from bankruptcy status

414 Optimistic Early Start
Best case earliest date a task or activity can begin

415 Optimistic Early Finish
Best case earliest date a task or activity can end

416 Optimistic Late Start
Best case latest date a task or activity can begin

417 Optimistic Late Finish
Best case latest date a task or activity can end

418 Most Likely Early Start
Most likely earliest date a task or activity can begin

419 Most Likely Early Finish
Most likely earliest date a task or activity can end

420 Most Likely Late Start
Most likely latest date a task or activity can begin

421 Most Likely Late Finish
Most likely latest date a task or activity can end

422 Pessimistic Early Start
Worst case earliest date a task or activity can begin

423 Pessimistic Early Finish
Worst case earliest date a task or activity can end

424 Pessimistic Late Start
Worst case latest date a task or activity can begin

425 Pessimistic Late Finish
Worst case latest date a task or activity can end

426 First Payment Due

427 First Interest Payment Due

428 Subsequent Interest Payment Due

429 Irregular Interest Payment Due

430 Guarantor Received

431 Onset of Current Symptoms or Illness
Date first symptoms appeared

432 Submission
Date on which claim billing information was sent to payer

433 Removed

434 Statement
Date on which billing document was created

435 Admission
Date of entrance to a health care establishment

436 Insurance Card

437 Spouse Retirement
Date on which patient's husband or wife has retired from his or her place of employment

438 Onset of Similar Symptoms or Illness
Date symptoms related to current illness first appeared

439 Accident
Date mishap occurred

440 Release of Information
Date patient signified it was acceptable to distribute pertinent information to other parties

441 Prior Placement
Date medical device was last placed or arranged

442 Date of Death
Date life terminated

443 Peer Review Organization (PRO) Approved Stay
Start and end date of approved confinement

444 First Visit or Consultation
Date patient first sought medical assistance

445 Initial Placement
Date medical device was positioned or arranged

446 Replacement
Date medical device was reinstalled or rearranged

447 Occurrence
Date on which an event happened

448 Occurrence Span
Start and end date on which a span of events happened

449 Occurrence Span From
Date on which span of events started

450 Occurrence Span To
Date on which span of events ended

451 Initial Fee Due
Date the first of one or more payments is due

452 Appliance Placement
Date orthodontic devices were arranged

453 Acute Manifestation of a Chronic Condition
Date serious symptoms were exhibited for a long term illness

454 Initial Treatment
Date medical treatment first began

455 Last X-Ray
Date of the most recent x-ray

456 Surgery
Date on which operation was performed

457 Continuous Passive Motion (CPM)
Date patient began using a device to provide uninterrupted motion not produced by active efforts

458 Certification
Date of a document attesting to a fact

459 Nursing Home From
Date on which patient entered nursing home

460 Nursing Home To
Date on which patient was released from nursing home

461 Last Certification
Date of the most recent document attesting to a fact

462 Date of Local Office Approval of Conveyance of Occupied Real Estate Property
The date local office approves of the transfer of an occupied property

463 Begin Therapy
Date treatment of physical or mental disorder started

464 Oxygen Therapy From
Date treatment with oxygen started

465 Oxygen Therapy To
Date treatment with oxygen ceased

466 Oxygen Therapy
Begin and end dates of treatment with oxygen

467 Signature
Date on which the accompanying signature was received

468 Prescription Fill
Date on which drug order was filled

469 Provider Signature
Date supplier of medical service signified the service in question was, in fact, provided

470 Date of Local Office Certification of Conveyance of Damaged Real Estate Property
The date local office approves of the transfer of a damaged property or the date of the mortgagee's certification that adequate fire insurance was not obtainable

471 Prescription
Date on which prescription was written

472 Service

473 Medicaid Begin
Date patient became eligible for Medicaid benefits

474 Medicaid End
Date patient no longer eligible for Medicaid benefits

475 Medicaid
Start and end of effective period for Medicaid

476 Peer Review Organization (PRO) Approved Stay From
Date start of confinement was approved

477 Peer Review Organization (PRO) Approved Stay To
Date confinement approval ceased

478 Prescription From
Start of prescription period

479 Prescription To
End of prescription period

480 Arterial Blood Gas Test
Date of test to determine gas content in blood circulating from the heart, at rest, breathing room air

481 Oxygen Saturation Test
Date on which oxygen saturation testing occurred

482 Pregnancy Begin
Date pregnancy estimated to begin

483 Pregnancy End
Date pregnancy end, whether normal or abnormal delivery

484 Last Menstrual Period

485 Injury Begin
Date damage was inflicted to the body by an external source

486 Injury End
Date damage inflicted to the body by an external source ceased

487 Nursing Home
Facility for those unable to care for themselves

488 Collateral Dependent
Range of collateral dependent coverage

489 Collateral Dependent Begin
Date on which collateral dependent coverage begins

490 Collateral Dependent End
Date on which collateral dependent coverage ends

491 Sponsored Dependent
Range of sponsoring dependent coverage

492 Sponsored Dependent Begin
Date on which sponsored dependent coverage begins

493 Sponsored Dependent End
Date on which sponsored dependent coverage ends

494 Deductible
Date for which deductible is applied

495 Out-of-Pocket
Date for which out of pocket is applied

496 Contract Audit Date

497 Latest Delivery Date at Pier

498 Mortgagee Reported Curtailment Date
The date the mortgagee failed to meet a mandatory time requirement

499 Mortgagee Official Signature Date
The date the mortgagee's representative signs the claim for mortgage insurance benefits form

500 Resubmission
Date when original transaction should be resubmitted for further consideration

501 Expected Reply
Date when response may be expected

502 Dropped to Less than Half Time
Date on which the student ceased to be enrolled at least half time

503 Repayment Begin
Date on which repayment of the loan begins

504 Loan Servicing Transfer
Date on which the loan is transferred from one servicer to another servicer

505 Loan Purchase
Date on which the ownership of the loan changes

506 Last Notification
Date on which the lender was last notified of the less-than-half time information

507 Extract
Date on which the file was extracted from the database

508 Extended
The extended date for a performance requirement

509 Servicer Signature Date
The date an authorized representative of the lender servicing the mortgage signs the claim for mortgage insurance benefits form

510 Date Packed

511 Shelf Life Expiration

512 Warranty Expiration

513 Overhauled

514 Transferred

515 Notified

516 Discovered

517 Inspected

518 Voucher (Date of)

519 Date Bankruptcy Filed
Date of last bankruptcy action

520 Date of Damage
The date that the property became damaged

521 Date Hazard Insurance Policy Cancelled
The date the hazard insurance policy was cancelled

522 Expiration Date to Submit Title Evidence
The last day of an approved extension to submit title evidence without penalty

523 Date of Claim
The date the claim form is prepared

524 Date of Notice of Referral for Assignment
The date mortgagors are notified in writing that it is their lender's opinion that they are qualified for an assignment program and that their defaulted mortgage should be assigned

525 Date of Notice of Probable Ineligibility for Assignment
The date mortgagors are notified in writing that it is their lender's opinion that they are not qualified for an assignment program but they may apply directly to the program sponsor for consideration

526 Date of Foreclosure Notice
The date the mortgagee notifies the mortgage insurer that foreclosure has been initiated

527 Expiration of Foreclosure Timeframe
The last day of an extension of the time requirement to institute foreclosure proceedings on an insured mortgage

528 Date Possessory Action Initiated
The date the mortgagee initiates action to take possession of a property secured by a mortgage in default

529 Date of Possession
The date a mortgagee acquires possession of a property secured by a mortgage in default

530 Date of Last Installment Received

531 Date of Acquisition of Title
The date the mortgagee acquires good and marketable title to a property secured by a mortgage in default

532 Expiration of Extension to Convey
The last day of an extension of the time requirement to convey a property

533 Date of Assignment Approval
The date approval is given to assign the contract rights of a mortgage

534 Date of Assignment Rejection
The date a request to assign the contract rights of a mortgage is rejected

535 Curtailment Date from Advice of Payment
The date to which interest was curtailed

536 Expiration of Extension to Submit Fiscal Data
The date of the expiration of extension given to submit fiscal data

537 Date Documentation, or Paperwork, or Both Was Sent

538 Makegood Commercial Date

539 Policy Effective

540 Policy Expiration

541 Employee Effective Date of Coverage

542 Claim Administrator Notified of Employee Legal Representation

543 Last Premium Paid Date

544 Employer Knowledge of the Injury

545 Claim Administrator Knowledge of the Injury

546 Date of Maximum Medical Improvement

547 Date of Loan

548 Date of Advance

549 Beginning Lay Date
First date a vessel may call at the port

550 Certificate Effective

551 Benefit Application Date

552 Actual Return to Work

553 Released Return to Work

554 Ending Lay Date
Date by which the vessel will call at the port

555 Employee Wages Ceased

556 Last Salary Increase

557 Employee Laid Off

558 Injury or Illness

559 Oldest Unpaid Installment
The due date of the oldest complete mortgage payment that has not been paid

560 Preforeclosure Acceptance Date
The date that the mortgagor and the mortgagee accept a preforeclosure acceptance plan

561 Preforeclosure Sale Closing Date
The date that the mortgagor and the mortgagee accept a preforeclosure sales closing plan

562 Date of First Uncured Default

563 Date Default Was Cured

564 Date of First Mortgage Payment

565 Date of Property Inspection

566 Date Total Amount of Delinquency Reported

567 Date Outstanding Loan Balance Reported

568 Date Foreclosure Sale Scheduled

569 Date Foreclosure Held

570 Date Redemption Period Ends

571 Date Voluntary Conveyance Accepted
The date voluntary conveyance of the property by the mortgagee holding the defaulted mortgage is accepted by the Federal Housing Commissioner

572 Date Property Sold

573 Date Claim Paid

574 Action Begin Date
The date a resolution action such as scheduling a repayment plan or a delay action such as Chapter 7 bankruptcy filing begins

575 Projected Action End Date

576 Action End Date

577 Original Maturity Date

578 Date Referred to Attorney for Foreclosure

579 Planned Release

580 Actual Release

581 Contract Period

582 Report Period

583 Suspension

584 Reinstatement

585 Report

586 First Contact

587 Projected Foreclosure Sale Date

589 Date Assignment Filed for Record
The date the transfer of the contract right to real estate is filed for record with the recording authority

XX1 Order Day
Day of week when an order may be placed
XX2 Delivery Day
Day of week when an order delivery will occur

XX3 Order Cut-Off Time
Latest time-of-day when an order may be placed

XX5 Active Item
Date item is available for sale

XX6 Mature Item
The date an active product becomes reclassified as mature. The product is still available for sale. This informs the trading partner a newer product or version is available.

XX7 Introductory Item
The date a new item is introduced to the supply chain.

XX8 Obsolete Item
The date the Item is no longer available to order.

Y11 Best Before Date
The date up to which a product's quality--including taste, texture, aroma and appearance--should be at its best assuming it is handled and stored according to package guidelines; the food is considered safe to eat after the 'best before' date but might not be at its best quality

Y12 Harvest Date
The date the crop was cut, picked or removed from the soil or other growing media

Y13 Rebuttal Date
Identifies the Rebuttal Date

Y14 Support to Action Date
Date by which a Support Point is expected to forward information or complete tasks related to a PQDR

Y15 Inpatient Stay
Date range of inpatient stay at a health care facility

YXX Programmed Fiscal Year

YXY Programmed Calendar Year

ZZZ Mutually Defined

HF Household Goods for International Commercial Air Transport

HG Household Goods for International Military Air Transport

HH House-to-House
Rate applies for cargo shipped in containers where the stuffing and stripping thereof is performed by or for the account of the shipper and/or consignee at their respective locations beyond ocean carrier's port terminals

HK Household Goods for Intertheater Military Water Transport

HL Household Goods for Intertheater Commercial Air Transport

HM Household Goods for Intertheater Military Air Transport

HN Household Goods for Intertheater Transport Not Otherwise Identified

HP House-to-Pier
Rate applies for cargo shipped in containers where the stuffing is performed by or for the account of the shipper at its facility beyond the ocean carriers' origin port terminal and the stripping thereof is performed by or for the account of the ocean carrier at the destination port terminal

HR Household Goods for Intratheater Commercial Motor Transport

HW Household Goods for Intratheater Commercial Air Transport

HX Household Goods for Intratheater Military Air Transport

HY Household Goods for Intratheater Transport Not Otherwise Identified

MB Motor-to-Barge
Rate applies for shipments in motor carrier terminal-to-barge carrier terminal service

MD Motor-to-Door
Rate applies for shipments in motor carrier terminal-to-door service

ML Rate applies for Mini-Landbridge

MM Motor-to-Motor
Rate applies for shipments in motor carrier terminal-to-ocean carrier's port/terminal service

MO Motor-to-Terminal
Rate applies for shipments in motor carrier terminal-to-ocean carriers port/terminal service

MP Motor-to-Pier
Rate applies for shipments in motor carrier terminal-to-ocean carrier's port/terminal pier service

MR Motor-to-Rail
Rate applies for shipments in motor carrier terminal-to-rail carrier terminal service

ND Rate Applies for Next Day Transportation Service

OC Rate applies for Overland Common Point

OD Terminal-to-Door
Rate applies for shipments in ocean carrier's terminal-to-door service

OM Terminal-to-Motor
Rate applies for shipments in ocean carrier's terminal-to-motor carrier's terminal service

OR Terminal-to-Rail
Rate applies for shipments in ocean carrier's-to-rail carrier service

OT Terminal-to-Inland
Rate applies for shipments in ocean carrier's terminal to an inland terminal point of the ocean carrier

OV Rate Applies for Overnight Transportation Service

PB Pier-to-Barge
Rate applies for shipments in pier-to-barge carrier terminal service

PD Pier-to-Door
Rate applies for shipments in pier-to-door service

PH Pier-to-House
Rate applies for cargo shipped in containers where the stuffing thereof is performed by or for the account of the ocean carrier at the origin port terminal and the stripping thereof is performed by or for the account of the consignee at its facility beyond the ocean carriers' port terminal

PM Pier-to-Motor
Rate applies for shipments in pier-to-motor terminal service

PP Pier-to-Pier
All cargo other than that specified in codes HH, HP, or PH whether shipped in containers or otherwise

PR Pier-to-Rail
Rate applies for shipments in pier-to-rail terminal service

RB Rail-to-Barge
Rate applies for shipments in rail carrier terminal-to-barge terminal service

RD Rail-to-Door
Rate applies for shipments in rail carrier terminal-to-door service

RM Rail-to-Motor
Rate applies for shipments in rail carrier terminal-to-motor carrier terminal service

RO Rail-to-Terminal
Rate applies for shipments in rail carrier terminal-to-ocean carrier's port/terminal service

RP Rail-to-Pier
Rate applies for shipments in rail carrier terminal-to-ocean carrier's port/terminal pier service

RR Rail-to-Rail
Rate applies for shipments in rail carrier terminal-to-rail carrier terminal service

AA Store Inventory Stock
AB Warehouse Inventory Stock
BB Transaction Control Date
The date when a transaction was prepared
BC Publication Date
The date when a document was published
BD Required By
The date when material is required to be on a site available for use
BE Validated
The date when material obligations were verified
BF Pack Date
The date when requested material was packaged
BG Backorder Release Date
The date when backordered material was made available for issue
BH Offered for Delivery
The date when material was offered for delivery by a carrier
BI Inspection
The date when material was inspected
BJ Shelf-Life Expiration
The date when material will become unusable

BK Warranty Expiration
The date when a manufacturer's warranty expires

BL Manufacture
The date when equipment or material was manufactured

BM Contract Physically Completed
Date contractor made final delivery or performed last service

BN Contract Final Payment
Date final payment on contract was made

BO Estimated Contract Completion
Estimated date when contract will be completed

BP Contract Closed
Date contract was administratively completed and closed

BQ Extended Closeout
New date, beyond the required closeout date, when contract is authorized to be closed

BR Date Delivery Commenced
Date that delivery process is initiated

BS Product Receipt Date
Date that receipt takes place

BT Acceptance
Date material delivery is accepted

BU Rejection
Date that rejection action takes place

BV Recorded
Date action is recorded against accountable records

BW Signature
The date on which a document (e.g., a contract) was signed

BX Action
The date when next required action is to be completed

BY Expected Reply
The date when response may be expected

BZ Demand Receipt Date
Date of receipt of the demand document as recorded in that document by the initial recipient in the supply distribution system

C1 Consumer Product Variant Start Effective Date
The start effective date for Consumer Product Variants, which the supplier determines. Includes time.

C2 Consumer Product Variant End Effective Date
The end effective date for Consumer Product Variants, which the supplier determines. Include time.

C3 Consumer Product Variant Discontinued Date
The date on which the consumer product variant of the trade item, which has been manufactured, is no longer being manufactured. Includes time.

C4 Consumer Product Variant Cancelled Date
The date on which the cancellation of the consumer product variant launch of a trade item that was never, and will never be manufactured, occurs.

CA Cutoff Date
The date defining the last day of record for the current processing cycle

CB Beginning Date of Customer Plant Shutdown

CE Ending Date of Customer Plant Shutdown
CL Date Loading Completed
EP Earliest Pickup Date
ES Estimated Shipping Date
FD Freshness Date
FE Future Effective Date
Used to identify the Future Effective Date
KA Scheduled Service Completion
The date on which a service is scheduled to be completed
LA Last Acquisition
The date of the last acquisition for production services
LC Date Loading Commenced
LD Last Demand
The date when the last request for material was recorded
LP Latest Pickup Date
MP Mapping Product Effective Date
OS On-Sale Date
Date an item will go on-sale
PE Period End
RS Ready to Ship
SE Date Shipped to Port of Embarkation (POE)
TA Original Transaction
TR Transfer
Y1 Harvest Date
The date the crop was cut, picked or removed from the soil or other growing media
Y2 Production Date
The date that operations or processes were performed
Y3 Last Depreciation
Identifies the last depreciation date
Y4 Depreciation Start
Identifies the depreciation start date
Y5 Extract Date
Identifies the date that the data was extracted from the Losing Information Manager's files
Y6 Used to indicate the validation request date
According to DoD Policy, supports government supply transactions

CODE	DEFINITION & EXPLANATION
AJ	Adjustment
ER	Evaluated Receipts Settlement
FL	Final
NS	Not Specified (Unknown as to Type of Payment)
PA	Payment in Advance
PI	Pay Item
PO	Payment on Account
PP	Partial Payment
PR	Progress Payment

483 - Counseling Status Code

Code identifying the status of the counseling offered TYPE=ID MIN=1 MAX=1

SEGMENTS USED IN (AS SIMPLE)
CCI

TRANSACTION SETS USED IN
200

CODE	DEFINITION & EXPLANATION
I	Involuntary Withdrawal from Plan
S	Satisfied - Plan Complete
T	Terminated - Not Complete
U	Unknown
V	Voluntary Withdrawal

484 - Evaluation Rating Code

Code identifying the evaluation rating applied to the credit rating score TYPE=ID MIN=1 MAX=1

SEGMENTS USED IN (AS SIMPLE)
SCM

TRANSACTION SETS USED IN
200 202 872

CODE	DEFINITION & EXPLANATION
A	Not Scored
B	Not Reported
C	Unscoreable
N	Negative
P	Positive

485 - Results Code

Code identifying the results of an applicant's inquiry TYPE=**ID** MIN=**1** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)
INQ

TRANSACTION SETS USED IN
155 200

CODE	DEFINITION & EXPLANATION
1	Declined
2	Open Discovered
3	Unknown
4	Did Not Inquire
5	Not a Lender
6	No Open Account
7	Reporting Agency Inquiry
8	Application Pending
9	Open, Account Number Not Issued
10	Account Closed
11	Open, Primary Account

486 - Product Transfer Movement Type Code

Code indicating the type of product transfer movement TYPE=**ID** MIN=**2** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)
PTD

TRANSACTION SETS USED IN
867

CODE	DEFINITION & EXPLANATION
AI	Adjustment In
AO	Adjustment Out
CD	Customer to Distributor
DC	Distributor to Customer
DM	Distributor to Manufacturer
MD	Manufacturer to Distributor
TI	Transfer In
TO	Transfer Out

487 - Maintenance Operation Code

Code indicating the type maintenance operation TYPE=ID MIN=1 MAX=1

MANAGEMENT SIMPLE DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE)

DAI DMI E01 E03 E10 E13 E20 E22 E24 E30 E34 E40 E41

30 Contract Ceiling
The ceiling price applicable to defined effort
31 Estimated Contract Ceiling
The estimated ceiling price applicable to all authorized contract effort (both defined and undefined)
32 Target Fee or Profit Amount
The fee (can also be percent) of profit that will apply to defined contract effort

33 Original Contract Target Cost
Value of the original negotiated contract

34 Negotiated Contract Changes
The cumulative cost (excludes fee and profit) applicable to defined contract changes that have occurred since the beginning of the contract

35 Current Target Cost
Sum of Original Contract Target Cost and Negotiated Contract Changes

36 Contract Budget Base (CBB)
Sum of Current Target Cost and Estimated Cost of Authorized, Unpriced Work

37 Current Budgeted Cost for Work Scheduled (BCWS)
The planned cost for a defined scope of workor portion of workthat is scheduled to be done during a given period

38 Current Budgeted Cost for Work Performed (BCWP)
The sum of budgets for completed workpackages and completed portions of open work packages, plus the applicable portion of the budgets for level of effort and apportioned effort; also known as earned value

39 Current Actual Cost of Work Performed (ACWP)
The costs incurred and recorded for workperformed in a given period

3A Accounting

3B Accounts Payable

3C Accounts Receivable

3D Advanced Dividends

3E Advertising Expenses

3F Amortization

3G Amortization Costs

3H Amount of Decree

3I Asset Investment

3J Authorized Capital

3K Available Reserves

3L Bad Debt Allowance

3M Bad Debts

3N Bank Account(s)

3O Long Term Assets

3P Long Term Liabilities

3Q Long Term Tangible Assets

3R Losses on Capital

3S Machines and Tools

3T Member Risk Capital

3U Miscellaneous After Tax Exempt

3V Mortgage

3W Nominal Capital

3X Nominal Damages

3Y Non-operational Fixed Assets

3Z Excess Amount Requested

40 Current Schedule Variance (SV)
The difference between the Budgeted Cost for WorkPerformed and the Budgeted Cost for WorkScheduled

41 Current Cost Variance (CV)
The difference between the Budgeted Cost for WorkPerformed and the Actual Cost of Work Performed

42 Cumulative Budgeted Cost for Work Scheduled (BCWS)
The cumulative planned cost for a defined scope of workor portion of workthat is scheduled to be done during a given period

43 Cumulative Budgeted Cost for Work Performed (BCWP)
The cumulative sum of budgets for completed workpackage and completed portions of open workpackages, plus the applicable portion of the budgets for level of effort and apportioned effort; also known as earned value

44 Cumulative Actual Cost of Work Performed (ACWP)
The cumulative cost incurred and recorded for workperformed in a given period

45 Cumulative Schedule Variance (SV)
The cumulative difference between the cumulative Budgeted Cost for WorkPerformed and the cumulative Budgeted Cost for WorkScheduled

46 Cumulative Cost Variance (CV)
The cumulative difference between the cumulative Budgeted Cost for WorkPerformed and the cumulative Actual Cost for WorkPerformed

47 Reprogram Cost Variance
Adjustments to previously reported variances due to reprogramming efforts

48 Reprogram Budget
Adjustments to the budget due to reprogramming efforts

49 At Complete Budget (BAC)
The total budget assigned to a workpackage or task, also, the total budget of any summary of these worktasks

4A Nonissued Capital

4B Notes Payable

4C Notes Receivable

4D Bank Debentures

4E Bank Obligations

4F Buildings

4G Buildings Under Construction

4H Capital

4I Capital Associated with Principal

4J Capital of Other Subsidiaries

4K Capital Stock

4L Cash

4M Capital Subsidies Received

4N Commercial Debt

4O Commercial Expenses

4P Common Stock

4Q Consequential Damages

4R Compensatory Damages

4S Convertible Debentures

4T Cost of Goods Sold
4U Cost of Sales
4V Cost(s)
4W Current Assets
4X Current Liabilities
4Y Damages
4Z Deferred Cost
50 At Complete Latest Revised Estimate (LRE)
Latest estimate of cost at completion including over or under runs for all authorized work; it is the sum or the actuals to date plus the estimate of remaining work(Estimate to Complete or ETC)
51 At Complete Variance
The difference between the Budget at Complete and the Estimate at Complete
52 Total Allocated Budget
Sum of all budgets allocated to the performance of a contract
53 Difference (Contract Budget Base - Total Allocated Budget)
The difference between the Contract Budget Base and the Total Allocated Budget
54 Forecast
Alternate term for Estimate to Complete (amount of workremaining); or a number to compare to an Estimate to Complete
55 At Complete Forecast
Alternate term for Estimate at Complete (actual costs plus estimate of remaining workETC); or to compare to an Estimate at Complete
56 Current Cost Performance Index (CPIe) - Efficiency (BCWP/ACWP)
An indication of cost efficiency for workthat has been done
57 Current Cost Performance Index (CPIp) - Planned (ACWP/BCWP)
Alternate calculation for Code 56
58 Current Schedule Performance Index (SPI)
A cumulative indication of schedule efficiency for workthat has been done
59 Cumulative Cost Performance Index (CPIe) - Efficiency (BCWP/ACWP)
A cumulative indication of cost efficiency for workthat has been done
5A Deferred Credit or Income
5B Deferred Taxation
5C Deposits
5D Depreciation
5E Depreciation of Fixed Assets
5F Depreciation of Revaluation of Fixed Assets
5G Director's Remuneration
5H Dividends
5I Doubtful Receivables
5J Equipment
5K Equipment Subsidies
5L Equities, Stocks
5M Equity

5O Exports

5P External Charge
5Q Extraordinary Charge
5R Extraordinary Current Asset Write Downs
5S Extraordinary Result
5T Financial Assets
5U Financial Charges
5V Financial Debt
5W Financial Expenses
5X Financial Income
5Y Finished Goods
5Z Fixed Asset Debts
60 Cumulative Cost Performance Index (CPIp) - Planned (ACWP/BCWP)
Alternate calculation for Code 59
61 Cumulative Schedule Performance Index (SPI)
An indication of schedule efficiency for workthat has been done
62 To Complete Performance Index (TCPI) for Budget at Complete (BAC)
An indication of the efficiency level necessary to meet the budget target
63 To Complete Performance Index (TCPI) for Estimate At Complete (EAC)
An indication of the efficiency level necessary to meet the estimate target
64 Initial Contract Price Target
Value of initial negotiated contract target price
65 Initial Contract Price Ceiling
Value of initial negotiated contract ceiling price
66 Adjusted Contract Price Target
Value of initial contract plus supplemental agreements
67 Adjusted Contract Price Ceiling
Value of adjusted ceiling price
68 Funds Authorized to Date
Value of contract fund authorized from the beginning through the current reporting period
69 Accrued Expenditures
Actual cost to date
6A Fixed Assets
6B Fixed Assets for Sale
6C Fixtures
6D Fixtures and Equipment
6E Franchise
6F Franchise Tax Balance
6G Franchise Tax Paid
6H Free Reserves
6I Furniture
6J Future Loan
6K General Accounts
6L General Expenses
6M Goodwill
6N Grants for Operating Costs

6O Group Related Financial Income
6P Income Stated in Advance
6Q Income Tax
6R Income Tax, Corporate
6S Income Tax, Noncorporate
6T Injunction
6U Intangible Depreciation
6V Intangibles
6W Interest of Third Party
6X Interest on Loans
6Y Operating Income (Loss)
6Z Optional Reserves
70 Open Commitments
Value of supplies or other items committed to for payment (such as on delivery of products)
71 Forecast of Billings
This is a forecast of billings to the government; includes cumulative amounts already billed (including progress or advance payments) and a forecast of amounts that will be billed to the government
72 Estimated Termination Costs
Cost that would be necessary to liquidate all government obligations if the contract were to be ended in that reporting period
73 Accrued Expenditures plus Open Commitments
Sum of actual costs and committed costs
74 Contract Work Authorized - Definitized
The estimated price for the authorized workincluding profit or fee, and incentive and cost sharing associated with projected over or under runs
75 Contract Work Authorized - Not Definitized
The estimate of the fund requirements for performing required workthat firm contract prices have not yet been agreed to
76 Contract Work Authorized - Total
Sum of Contract WorkAuthorized - Definitized and Contract WorkAuthorized - Not Definitized
77 Forecast of Work - Not Yet Authorized
An estimate of fund requirements including fee or profit for changes proposed, but not yet directed by the customer
78 Forecast of Work - All Other
An estimate of fund requirements for additional workthat the contractor expects to do
79 Forecast of Work - Total
Sum of Forecast Work- Not Yet Authorized and Forecast of Work- All Other
7A Organizational Expenses
7B Outside Share in Profit or Loss
7C Outstanding Debts against Board of Directors/Managers
7D Owing
7E Owing from Affiliates
7F Owing from Participants
7G Owing to Affiliates

7H Owing to Fiscal Office
7I Owing to National Social Security Office
7J Owing to Participants
7K Own Work Capitalized
7L Paid in Capital
7M Par Value
7N Participating Interest
7O Patents
7P Pension Debts
7Q Pensions Provision
7R Preferred Stock
7S Prepaid Orders in Progress
7T Prior Results Carried Forward
7U Profit or Loss
7V Profit or Loss after Taxes
7W Profit or Loss before Taxes
7X Profit or Loss on Ordinary Activities after Tax
7Y Progress Payments
7Z Proposed Dividend
80 Funding - Total Requirements
The estimate of total fund requirements for contract workauthorized and forecast
81 Funds Carryover
For incrementally funded contract, this is the amount that the prior Federal fiscal year funding was in excess of the prior year's requirement
82 Net Funds Required
An estimate of net funds required, less funds carryover
83 Contract Work Authorized (with fee/profit) Actual or Projected
These are the cumulative and projected values for the contract
84 Contract Work Authorized (with fee/profit) Actual or Projected - At Complete
The cumulative value from the start to the end of the contract
85 Best Case Estimate
86 Worst Case Estimate
87 Most Likely Estimate
88 "As Is" Appraisal Amount
89 "Subject To" Appraisal Amount
8A Provision for Depreciation of Stock or Inventory
8B Provision for Future Purchases
8C Provision for Risks
8D Punitive Damages
8E Purchase Price

8W Share Capital
8X Share in Profit or Loss of Minority Interest
8Y Share Premium Capital
8Z Shares in Affiliated Companies
90 "Completion Per Plans" Appraisal Amount
91 Site Value Amount
92 Compensation
All eligible monies paid to the employee, as defined in the plan document
93 Contribution
94 Death Benefit
Total benefit amount to be distributed to the employee's beneficiaries
95 Death Benefit Decrement
Periodic benefit amount to be distributed to the employee's beneficiaries, until the account balance is exhausted
96 Employee Account Balance
Total benefit amount owed to an employee from a defined contribution plan
97 Loan Repayment
Amount of loan repayment made to the plan
98 Prior W2
Taxable compensation, as reported on the IRS W2 form, for the prior tax year
99 Single Premium
9A Social Charges
9B Social Security (FICA)
9C Special Reserves
9D Specially Secured Creditors
9E Specific Performance
9F Starting Capital
9G Statutory Reserves
9H Subscribed Capital
9I Suit Amount
9J Supplies
9K Surplus of Revaluation

9L Tangible Net Worth
9M Tax Adjustments
9N Tax Balance
9O Tax Capital Amount
9P Tax on Extraordinary Items
9Q Tax Recoverable
9R Taxed Reserves
9S Trade Creditors
9T Inventory (Stock)
9U Inventory (Stock) Depreciation
9V Inventory (Stock) Purchases
9W Investment in Own Shares
9X Investments
9Y Issued Capital
9Z Labor Costs
A0 Assistantship from Admitting Educational Institution
A1 Average Negative Ledger Balance
Aggregate amount of overdrafts divided by number of days overdrawn in analysis period
A2 Average Positive Collected Balance
Aggregate amount of positive daily collected balances divided by number of days in analysis period that collected balances were positive
A3 Average Negative Collected Balance
Aggregate amount of negative daily collected balances divided by number of days in analysis period that collected balances were negative
A4 Average Positive Ledger Balance
Aggregate amount of positive daily ledger balances divided by number of days in analysis period that ledger balances were positive
A5 Disallowed - Estimated
Approximate value rejected to the individual
A6 Disallowed - Actual
Calculated value rejected to the individual
A7 Noncovered Charges - Estimated
Approximate value not covered by the benefit plan
A8 Noncovered Charges - Actual
Calculated value not covered by the benefit plan
A9 Allowed - Estimated
Approximate amount considered for payment under the provisions of the contract prior to determination of actual amount
AA Allocated
AB Adjusted Collected Balance
AC Average Collected Balance
AD Adjusted Total
AE Arrearage
AF Average Float
AG Adjusted Gross Income

AH Loan Balance Difference
The difference between the unpaid loan balance due as originally claimed and the correct unpaid loan balance

AI Sale Amount
The amount for which the property was sold

AJ Funds Held by Mortgagee
Cash amount held or deposited in the account of a borrower by a lender of a mortgage

AK Attorney Fees

AL Average Ledger Balance

AM Amount Financed

AN Bankruptcy Fee
Fee paid to attorney for bankruptcy procedure

AO Amount Override
Used when the commission payment is not based on sales and is an agreed upon flat dollar amount

AP Amount Prior to Fractionalization
Full charge amount for the service per service period, prior to pro-rated fractionalization due to partial period billing

AQ Average Price Per Call
The total amount of money associated with a category of calls divided by the total number of calls within the category calculated to provide call summary details

AR Fees to Public Officials for Foreclosure
The fees paid to public officials for the foreclosure of a property with a defaulted mortgage

AS Average Price Per Minute
The total amount of money associated with a category of calls divided by the total number of minutes within the category calculated to provide call summary details

AT Total Received

AU Coverage Amount
The dollar amount of property coverage provided by a specific policy contract

AV Actual Cash Value
An amount indicating the replacement cost, less depreciation, less prior damage, plus betterment

AW Replacement Cost
The estimate replacement dollar amount of the insured's property

AX Previous Price

AY Title Cost
The costs of obtaining a good and marketable title to a property

AZ Other Foreclosure and Acquisition Expenses
Any additional expense incurred to foreclose on and acquire property with a defaulted mortgage excluding attorney fees and transfer taxes

B0 Bond

B1 Benefit Amount

B2 Bonuses and Commissions Divided Over 12 Months

B3 Bonuses Divided Over 12 Months

B4 Bonuses and Commissions

B5 Budgeted

B6 Allowed - Actual
Amount considered for payment under the provisions of the contract

B7 Deductible - Estimated
Approximate amount, deducted by the payer, from the allowed amount in order to meet the contract deductible provisions

B8 Co-insurance - Estimated
Approximate value still to be paid by the individual under the co-insurance provisions of the benefit contract

B9 Co-insurance - Actual
Calculated value still to be paid by the individual under the co-insurance provisions of the benefit contract

BA Bargain

BB Mortgage Insurance Premiums
The premium paid to an insurer to obtain (and maintain) mortgage insurance on a mortgage

BC Billing Cycle Net Fee Position (Excess/Deficit)

BD Balance Due

BE Disbursements for Authorized Repair

BF Hazard Insurance Premium
Premium paid to an insurer for an insurance policy covering the loss of property and other structures

BG Eviction Attorney Fees
The fees paid to the attorney handling the forcing out of the occupants and their belongings from a property

BH Eviction Expenses
The cost incurred by the landlord or lender of the mortgage to force the occupants and their belongings from the property

BI Property Taxes

BJ Disbursements Not Shown Elsewhere
Monies paid out but not recorded or shown elsewhere

BK Disbursements for Protection and Preservation
Monies paid out for protection and preservation of a property

BL Disbursements for Inspections and Boarding
The funds paid out for inspecting the property and boarding

BM Adjustments

BN Rental Income

BO Rental Expense
Expenses incurred in the management and in the maintenance of rental properties

BP Average Net Collected Balance

BQ Bail

BR Adjusted Insured Loss Amount

BS Mortgage Note Interest

BT Bank Reject Total

BU Overhead Costs

BV Uncollected Interest

BW Amount Due from Buyer at Closing

BX Amount Owed to Buyer at Closing

BY Additional Closing Expenses
Any additional cost incurred at closing in the disposal of real estate property

BZ Deficiency Judgment Expenses
The expenses incurred by a mortgagee in seeking a judgment from the court against a mortgagor to attach the mortgagor's assets for repayment on the defaulted mortgage

C0 Current Expenditures

C1 Co-Payment Amount
Partial payment of medical services' expenses required in group health insurance, in addition to the membership fee; for example, for each visit to a physician a member may be required to pay $5, regardless of the expense of the services rendered; or for each prescription for drugs and medicines, the member may have to pay a flat fee of $2 regardless of the actual cost

C2 Child Rider Coverage

C3 Prior Payment - Estimated
Approximate amount paid at an earlier time

C4 Prior Payment - Actual
Amount paid in reality at an earlier time

C5 Claim Amount Due - Estimated
Approximate value rightfully belonging to the individual

C6 Claim Amount Due - Actual
Amount to be distributed for medical care

C7 Payer Responsibility - Estimated

C8 Payer Responsibility - Actual

C9 Disallowed Cost Containment - Actual
Amount disallowed by the payer due to the failure of either the provider or insured to meet the cost containment provisions of the insurance contract, managed care contract or preferred provider organization contract under which payment has been requested for this claim

CA Contractor Cumulative to Date

CB Collected Balance Required

CC Chargeback Claim Amount

CD Overpaid Section 235 Subsidy
The excess amount of assistance payment paid pursuant to Section 235 of the National Housing Act

CE Summary Amount
The total and condensed amount

CF Appraisal Fees

CG Commission Fees Deducted

CH Change Amount

CI Funds Held for Insured
Funds to which the loan servicer has retained the right of possession as security for a loan

CJ Other Deductions
Funds deductible according to mortgage insurer's guidelines for which no specific categories exist

CK Back End Load

CL Outstanding Balance Current Lender

CM Claimant Requested Total
The total monies requested for a claim

CN Special Assessments
Any additional assessment, other than property taxes, on a property by the local tax jurisdiction for which a lien is or could be attached

CO Taxes on Deed
Taxes imposed on a deed by which a property was acquired by the lender and transferred to the mortgage insurer

CP Statutory Disbursements
Expenses required by state or local statutes, including court cost, filing fees, publication cost, etc.

CQ Net Claim Amount
Total disbursements plus interest minus deductions from the claim

CR Contractor at Complete

CS Commission Sales
Those sales used to calculate commission payments

CT Contract
Indicates the value stated in the contract

CU Subcontractor Cumulative to Date

CV Subcontractor at Complete

CW Earned Value

CX Actual

CY Cumulative Budget

CZ Cumulative Earned Value

D0 Administration and Management Costs

D1 Deferred Compensation Commissions
An income amount comprised of deferred commissions and or bonuses

D2 Deductible Amount
The amount of covered expenses that must be incurred by the insured before benefits become payable to the insurer

D3 Deferred Compensation Commissions and Bonuses
An income amount comprised of deferred commissions and or bonuses

D4 Deferred Compensation

D5 Dependent Care Contribution

D6 Disallowed Cost Containment - Estimated
Approximate amount disallowed by the payer due to the failure of either the provider or insured to meet the cost containment provisions of the insurance contract, managed care contract or preferred provider organization contract under which payment has been requested for this claim

D7 Dispensing Fee
A charge to prepare and distribute medicines to those who are to use them

D8 Discount Amount
A reduction from the usual price

D9 Cumulative Actual

DA Original Mortgage
The original loan obligation amount on a mortgage note before any mortgage payment is made

DB Unapplied Section 235 Funds
The amount of the earned Section 235 assistance payments pursuant to Section 235 of the National Housing Act that have not been applied

DC Unapplied Buydown Fund
The amount of buydown fund (amount of discount in rate a lender gives to a borrower) that has not been applied

DD Direct Deposit

DE Estimate of Damage
The approximation or assessment of damage sustained by a property

DF Authorized Bid
The balance remaining in the escrow account after all appropriate disbursements have been made on the date of the assignment or conveyance

DG Escrow Balance

DH Total Disbursements
The total of all funds disbursed for hazard insurance premiums, taxes, eviction, and other expenses

EU Insurance Proceeds (Primary Settlement)

EV Presale Proceeds

EW Pledged Savings

EX As Is Broker's Opinion
Value, in the opinion of the real estate broker, of the real estate property "as is"

EY Subject To Broker's Opinion
Value, in the opinion of the real estate broker, of the real estate property subject to repairs

EZ Uniform Commercial Code Filing Office Fee

F0 Commercial Staff Labor Costs
Labor Costs for Support Staff for Sales and Marketing

F1 Maximum Allowable Cost (MAC) Penalty Copay
Amount paid by individual purchasing drugs when the maximum allowable cost for the drug as determined by the Centers for Medicare & Medicaid has been exceeded

F2 Patient Responsibility - Actual
Calculated value one receiving medical care is obliged to pay

F3 Patient Responsibility - Estimated
Approximate value one receiving medical care is obliged to pay

F4 Postage Claimed
Monetary amount rightfully deserved for mailing

F5 Patient Amount Paid
Monetary amount value already paid by one receiving medical care

F6 Provider Reserves

F7 Sales Tax
Monetary amount that a taxing entity requires be added on to the cost of an item based upon the sales price of the item

F8 Usual and Customary Charge - Estimated
Approximate charge that is commonly assessed for a service rendered

F9 Usual and Customary - Actual
Charge that is commonly assessed for a service rendered

CODE	DEFINITION & EXPLANATION
A	Indicates Alternation between all Lower Levels
B	Price Application Hierarchy Rules Apply - Do Not Alternate between Levels
L	A rate with this element indicating an "L" value will be applied only in the absence of rate application by any with this element indicating "N" or "S"
N	A rate with this element indicating an "N" value will be applied to the exclusion of all other rates with this data element indicating other values
P	Only Applicable for Contracts - Indicates that Alternation between Levels applies to Contracts and Customer Specific Prices ("CT" and "PR") Only
S	A rate with this element indicating an "S" value will be applied to the exclusion of all other rates except those indicated as "N"

630 - Minimum/Weight Logic

Code indicating the type of minimum weight or units applicable to a specific rate; the code also describes the interpretation and/or relationship of minimum weight and car capacity percentage data elements for a specific rate

TYPE=**AN** MIN=**1** MAX=**2**

Code Sources

A82 Address Specified Does Not Match Account

A83 Unauthorized or Invalid Action

A84 Civil Event Related Delay

A85 Customer-requested Early Delivery

A91 Exceeds Service Limitations

A95 Past Cutoff Time

A96 Insufficient Pickup Time
Load tendered to the carrier late

A98 Missed Pickup
Carrier missed pickup appointment

A99 Alternate Carrier Delivered

ABN Abnormal
A code specifying that health screening results for a student were not in the expected range of findings

ACC Actual Contractor-Caused Delay
Delay actual rather than anticipated; caused by the contractor rather than the government

ACD Anticipated Contractor-Caused Delay
Delay anticipated rather than actual; caused by the contractor rather than the government

AFR Assignment Form Required

AGC Actual Government-Caused Delay
Delay actual rather than anticipated; caused by the government rather than the contractor

AGD Anticipated Government-Caused Delay
Delay anticipated rather than actual; caused by the government rather than the contractor

ANA Agent Not Appointed

ANL Agent Not Licensed

API Application Incomplete

B01 Reconsigned
The shipper or consignee redirected the shipment

B02 Appointment or Pre-Arranged Delivery Date
Shipment is being held pending an appointment or pre-arranged delivery date

B03 Trap for Customer
According to a customer's request, shipment is being held at a terminal before delivery

B04 Held for Payment
Delay caused by required payment not available

B05 Held for Consignee
Customer unable to accept order as specified

B06 Consignee Closed (Inventory, Vacation, Etc.)
Shipment is being held because consignee is closed

B07 Dock Pickup
Shipment is awaiting pickup at carrier's dock

B08 Improper Unloading Facility or Equipment
Shipment is on hold pending correct unloading facility or equipment

B09 Receiving Time Restricted
Shipment is being held, consignee's receiving time is restricted

B10 Order Notify
Shipment is being held pending notification of order

B11 Held for Protective Service
Shipment is being held pending assignment of protective service

B12 Connecting Line or Cartage Pickup
Shipment is awaiting connecting line or cartage company pickup

B13 Held per Shipper
Plant held order for any reason

B14 Missing Documents
Shipment is being held because of missing documents

B15 Border Clearance
Shipment is being held pending clearance at a border point

B16 Road Conditions
Shipment is being delayed due to road conditions

B17 Did not complete secondary school

B18 Standard high school diploma

B19 Advanced or honors diploma

B20 Vocational/Technical Preparatory Diploma

B21 Special education diploma

B22 Certificate of completion or attendance

B23 Special certificate of completion

B24 General Education Development Diploma (GED)
A high school equivalency diploma awarded as a result of successfully passing the American Council on Education General Education Development Tests

B25 Other high school equivalency diploma
A high school equivalency diploma awarded on a basis other than the American Council on

Education General Education Development Tests

B26 International diploma or certificate (such as International Baccalaureate)

B27 Student is eligible to continue or return or both

854 Invalid Hierarchical Level Structure
855 Missing Shipment Identification Code
856 Invalid Transaction Set Purpose Code
857 Missing Transaction Set Purpose Code
858 Duplicate Bill of Lading Number
859 Invalid Bill of Lading Number
Number format is invalid and/or does not match paperwork
860 Missing Bill of Lading Number
861 Invalid Package Carrier Tracking Number
Number format is invalid and/or does not match paperwork
862 Missing Packing Carrier Tracking Number
863 Invalid PRO Number
Number format is invalid and/or does not match paperwork
864 Missing PRO Number
865 Missing SCAC - Standard Carrier Alpha Code
866 Purchase Order Shipped after Purchase Order End Date
867 Purchase Order Shipped before Purchase Order Start Date
868 Invalid Transportation Method/Type Code
869 Missing Transportation Method/Type Code
870 Missing Purchase Order Number
871 SSCC in 856 Ship Notice / Manifest Not in Shipment
872 Invalid Product/Service ID Qualifier
Product/Service ID value does not conform to the Product/Service ID Qualifier .
873 Missing Product/Service ID Qualifier
874 Shipment Not Packed as Ordered
875 Item Quantity in 856 Ship Notice / Manifest Does Not Match Shipment
876 Item Quantity in 856 Ship Notice / Manifest Does Not Match Invoice
877 Item Quantity Shipped Does Not Match Invoice
878 Item Quantity Shipped Does Not Match Purchase Order
879 Invalid Unit of Measure
880 Missing Unit of Measure
881 Damaged Carton
882 Carton Does Not Meet Minimum Size
883 Carton Exceeds Maximum Size
884 Label Not to Retailer Specification
885 Label Covered Up
886 Item Label Information Does Not Match Carton Contents
887 Invalid Purchase Order Number on Label
Number format is invalid and/or does not match Buyer Purchase Order Number .
888 Invalid Store Number on Label
Number format is invalid and/or does not match existing Store Number .
889 Missing Store Number on Label
890 Overpayment

891 Underpayment
892 Payment Not Applied
893 Policy Number Modified Before Update
894 Second or Subsequent Request in Transaction
895 Rejected Due to Monthly Payment Contract
896 Set to Insured Pays Due to Monthly Payment Contract
The insurance policy status indicator is set to 'insured pays'
897 Invalid Lender Loss Payable Company
898 Commercial Rather than Personal Lines Policy
899 Policyholder Name Does Not Match
ASA Associated Authorization
Other vehicles contained on a multilevel railcar have different shipper authorized destinations than this vehicle
ASV Associated Vehicle Identification Number(s) Unknown
Other vehicles contained on a multilevel railcar are unknown to the shipper
AVE Associated Vehicle Identification Number(s) Invalid
Vehicle Identification Numbers (DE539) for other vehicles contained on a multilevel railcar fail check-digit verification
CAL Currency Calculation
The amount calculated using the specified exchange rate exceeds the maximum length of the application data field
CHK Check Being Returned
COV Conflicting Authorizations
Commodities are moving on same Freight Bill which have conflicting contract rates or terms
CUR Invalid Currency Code
Currency Code (DE100) reported is invalid
DBL Duplicate Bill of Lading Number
Carrier has reused a shippers authorization number assigned to another shipment
DDT Departure Date Invalid
The move/service date precedes the authorized date
DRC Duplicate Railcar Departure
The railcar reported has a conflicting previous departure on the same date
DTE Incorrect Date
The reported date is incorrect (e.g. premature date for transaction or non-existent date such as February 30)
DUP Duplicate Transaction
The identical transaction has been transmitted more than once within the same input file
HUG Quantity of Handling Units Shipped Greater Than the Quantity Specified
HUL Quantity of Handling Units Shipped Less Than the Quantity Specified
ICA Invalid Claim Amount
Claim Total does not equal total of claim Line Item Totals
ICG Invalid Charge Allowance Qualifier
The Charge Allowance Qualifier (DE538) reported is invalid
IDC Invalid Decline/Amend Reason Code
The Decline/Amend Reason Code (DE548) reported is invalid
IDN Invalid Department Number
IID Invalid Identification Code

IMD Invalid Railcar Type
The Equipment Description Code (DE40) reported is invalid

INC Incomplete Transaction
Optional Element(s) required by the application are missing

INF Invalid Status Code
The Vehicle Status Code (DE1094) reported is invalid

IPR Status Code Previously Reported
The status code reported has previously been processed by the receiver

IQT Invalid Quantity

IWT Invalid Weight

LOC Invalid Damage Area Code
The Damage Area Code (DE556) reported is invalid

MBL Multiple Bills of Lading
Multiple Bills of Lading have been transmitted for a 3 for 2 shipment (only one bill of lading is required)

MDN Missing Department Number

MID Missing Identification Code

MQT Missing Quantity

MWT Missing Weight

NAU Not Authorized
The move/service reported by the carrier has not been authorized by the shipper

NCL No Clearance Authorization
The vessel clearance reported by the carrier has not been authorized by the shipper

NCR No Clearance Reported
The freight bill submitted by the carrier precedes the vessel clearance

NDP No Departure Reported
The railcar arrival has been received prior to the railcar departure

NDT No Termination Date
The move/service/status change reported requires termination of a previously transmitted Vehicle Status Code (DE1094)

NIF Invalid Status Location
The location reported with the Status Code (DE1094) does not match any move/service locations authorized by the shipper

NOC Automated Clearinghouse (ACH) Notification of Change

NOD Not on Departure
Vehicle Identification Numbers reported on railcar arrival do not match Vehicle Identification Numbers reported on railcar departure

NRA No Railcar Arrival
A subsequent shipper authorized move/service has been reported prior to reported arrival of a railcar

NRS Product is Not in the Receiver's System

OTH Other
Unspecified application error

PND Pending Payment
The freight bill/invoice/waybill has previously been transmitted and is awaiting maturity of credit terms prior to payment

POI Purchase Order Number Invalid

PPD Previously Paid
The freight bill/invoice/waybill has previously been paid

PRM Primary Inspection Not Received
A Motor Vehicle Inspection Details transaction containing a Supplemental Inspection indicator (DE835) has been reported prior to the primary inspection

QTY Quantity
The number of items on the freight bill/invoice/waybill does not equal the number of unique segments which specifically identify those items

RAT No Rate Available
The shipper is unable to determine the rate for the move/service reported by the carrier

RTE Invalid Shipper's Route Code
The shippers route code reported by the carrier is invalid

RTN Automated Clearinghouse (ACH) Return Items

SCA Invalid SCAC
The Standard Carrier Alpha Code (DE140) reported is invalid

SCD Invalid Vehicle Service Code
The Vehicle Service Code (DE1062) reported is invalid

SEV Invalid Damage Severity Code
The Damage Severity Code (DE541) reported is invalid

SPL Invalid SPLC Code
The Standard Point Location Code (DE154) is invalid

STA Shipment Picked Up After the Date Specified by the Ship Window

STP Shipment Picked Up Prior to the Date Specified by the Ship Window

STR Invalid Storage Days Calculation
The number of storage days billed does not equal the difference between arrival date and departure date less grace days

TRN Turnover
The vessel clearance reported was authorized by the consignee rather than by the shipper

TYP Invalid Damage Type Code
The Damage Type Code (DE540) reported is invalid

UAU Used Authorization
The move/service reported has previously been reported as completed

UCN Unknown Claim Number
The claim number reported by the carrier is unknown to the claimant

UKN Unknown Move/Service
The move/service reported has not been mutually defined by the trading partners

UNP Invalid Unit Price

UNV Unknown Vehicle Identification Number
The reported Vehicle Identification Number (DE539) is unknown to the shipper

VIN Invalid Vehicle Identification Number
The reported Vehicle Identification Number (DE53) fails the check-digit calculation

VND Vehicle Not Departed
Storage charges have been billed prior to reported departure of a vehicle from storage

VOS Offsite Storage
Storage charges have been reported for an item known to be at another location

ZDS Zero Storage Days
The arrival and departure dates are equal, per diem storage charges have not accrued

ZZZ Mutually Defined

1A Original Duration (in calendar units)
The initial planned amount of time needed to complete a task or activity

1B Current Duration (in calendar units)
The current amount of time needed to complete a task or activity

1C Remaining Duration (in calendar units)
The remaining amount of time needed to complete a task or activity

1D Total Float (in calendar units)
The amount of time a task or activity can be delayed or expanded before it impacts the project end date

1E Free Float (in calendar units)
The amount of time a task or activity can be delayed or expanded without impacting on a subsequent task or activity

1F Lag (as in Lag Time - in calendar units)
The amount of time delay

1G Lead Time (in calendar units)
The amount of initial lead time

1H Started
The amount started

1I Completed
The amount finished

1J Due
The amount due to the customer

1K Time Units
The number of time units such as 8 (hours)

1L Shifts
The number of shifts for a calendar such as 3 per day

1M Time units per shift
The number of time units per shift - such as 8 (hours)

1N Scrap allowed
Amount of scrap allowed during production

1O Calendar Units
The number of calendar units such as 1 per day or 1 per week

1P Resource (Quantity) available
Resource amount such as labor hours or material dollars available for a task or activity

1Q Total Resource (Quantity)
Total amount of the resources available for the total duration of the task or activity

1R Level Resource (Quantity)
The amount of resources available for each time unit for the duration of the task or activity

1S Late
The amount that is late

1T Number of Delinquent Installments

1U Number of Loans

1V Total Number of Mortgagees

1W Total Number of Loan Detail Records

1X Prescription Effective Period
Length of time that the prescription is effective.

LS Oil Condensate Sold
LT Tariff Loss Allowance
LU Lifetime Reserve Days - Applied to this Claim
Medicare hospital insurance includes extra hospital days to be used if the patient has a long illness and is required to stay in the hospital more than a specified number of days; this is the actual number of days used for this claim
LV Oil/Condensate Volume
Volumes of crude oil and natural gas condensate produced from a well or property for a specific month
LW Lost Work Time Actual
LX Lost Work Time Estimated
LY Length of Residency
LZ Lanes
M1 Matching Equipment
M2 Maximum
M3 Total Federal Points
Points assigned for the expected number of Federal offices on an election ballot which are used to determine the allocation of shared expenses between campaigns for federal and non-federal elected offices
M4 Contributions
M5 Contributors
M6 Endorsers
M7 Functions
M8 Guarantors
M9 Points
MA Miscellaneous Allowance
MB Number of Public Officials
MC Total Non-Federal Points
Points assigned for the expected number of non-Federal offices on an election ballot which are used to determine the allocation of shared expenses between campaigns for federal and non-federal elected offices
MD Million Dollar Roundtable Credits
ME Minimum Number of Employees
MF Manufactured
MG Pledges
MH Total Points
MI Miles
MJ Attendees
MK Tickets Sold
ML Total Number of Manifest Lines
SEE CODE SOURCE 350
MM Maximum Maturity Extension
MN Month
MO Minimum Order Package Level
MP Total Number of Maps in a Pack

MQ Maximum Ship Quantity

MR Quantity of next lower level trade item
The number of units in the trade item. Example: A case of peas (current trade item) has 24 cans = quantity of next lower trade item

MS Measured Quantity

MT Resterilization Maximum

MU Recommended Number of Uses

MV Total Units
Total Units refers to the number of consumer items contained in this packaging level (in the current GTIN); Total Units is required for all product types greater than the consumer item (i.e. inner, case, pallet); also referred to as the retail pack

MX Maximum Number of Employees

MY Stacking Factor
Indicates the number of levels the product may be stacked.

MZ Component Quantity
The quantity of packaging needed for a product.<

N1 Number of Attacks or Occurrences

N2 Number of Dead

N3 Number of Living

N4 Number of Times

N5 Minimum Forecast Quantity

N6 Maximum Forecast Quantity

N7 Requested Receipt Quantity

N8 Requested Delivery Quantity

NA Number of Non-covered Days

NB Number of Units (Housing)

NC Number of Claimants

ND Number of Late Charges

NE Non-Covered - Estimated

NF Number of Full-Time Employees

NG Number of Nonsufficient Fund Items

NH Noncovered - Actual

NL Number of Levels

NN Number of Hospitals

NO Number of Physicians

NP Number of Members

NQ Number of Franchisees

NR Not Replaced Blood Units

NS Number of Stations
Number of stations, or terminating points, which are in use, deleted, added, etc. for service delivery; ports or lines on a computer, for example

NT Reports

NU Since Last Travel

NV Net

NW Until Next Travel

NX Quantity of next lower level trade item
O1 Scheduled Receipt
O2 Scheduled Delivery
O3 Operational Receipt
O4 Operational Delivery
O5 Allocated Receipt
O6 Allocated Delivery
O7 Distributed Confirmed Receipt
O8 Distributed Confirmed Delivery
O9 Scheduling Tolerance Receipt
OA Scheduling Tolerance Delivery
OB Energy
OC Order Count
OD Other Miscellaneous Disposition
OE Number of Weeks Per Year
OF Off Premise Sales Quantity
OG Other Gas Disposition
OH Other Injection Volume
OI Opening Statement Balance
OJ Order Sizing Factor
A trade item specification other than gross, net weight, or cubic feet for a line trade item or a transaction, used for order sizing and pricing purposes. For example, factors may be used to cube a truck, reflecting different weights, and dimensions of trade item.
OL Original Loan Term
ON On Premise Sales Quantity
OO Other Oil Condensate Disposition
OQ Optimum Order Quantity
OR Original
OT Number of Operating Periods at Failure
A measurement of the elapsed time or usage before equipment failure occurred
OU Outlier Days
OV Overage
OW Other Water Disposition
P1 Project Phases
P3 Physical Status III
Anesthesia modifying units requested for Physical Status III patient, as defined by the American Society of Anesthesiologists
P4 Physical Status IV
Anesthesia modifying units requested for Physical Status IV patient, as defined by the American Society of Anesthesiologists
P5 Physical Status V
Anesthesia modifying units requested for Physical Status V, as defined by the American Society of Anesthesiologists
P6 Number of Services or Procedures
P7 Prescription Dosage

PF Gas Used for Plant Fuel
PG Persistency
PH Promotional
PK Parking Spaces
PL Partial Baths
PO Percentage of Ordered Quantity
Owners of fabric that have third parties finish their fabric must have a way to convey on the purchase order the quantities of various levels of quality acceptable; i.e. 80% first, 10% second, 8% off quality, 2% unmerchantable
PP Purchase of Product
PQ Cumulative Quantity Required Prior to the First Scheduled Period
PR Requirement Quantity that was Previously Released
PS Prescription
PT Patients
PW Pitted Water
PX Prior Units Accepted
PY Paid
Q1 Minimum quantity to which tax rate applies
Q2 Maximum quantity to which tax rate applies
Q3 Quantity Earned
Q4 Quantity Carried Forward
Q5 Number of 3 to 4 Year Olds
Q6 Autistic Individuals
Q7 Deaf-blind Individuals
Q8 Hearing Impaired Individuals
Q9 Mentally Retarded Individuals
QA Quantity Approved
Quantity allowed by the company processing the claim
QB Quantity Dispensed
Number of refills given
QC Quantity Disapproved
QD Quantity Delivered
QE Quantity Deferred
Quantity required for orders, but not reserved
QF High Fabrication Authorization Quantity
The highest quantity of material authorized for production
QH Quantity on Hold
Product which cannot be shipped at the present time for any reason, exclusive of damaged

quantity

QI Community Service Duration

QJ Number of Times Deported

QK Quantity of Inner Packs
The quantity of consumer units contained in the unmarked inner pack.

Unsubscribed firm capacity available from the transportation service provider
V9 Shipping Container Quantity
The number of units within the shipping container. Example 24 (cans).
VA Volume Shrinkage Adjustment or Allowance
VB Blank Votes
VC Cumulative Earned Value
The cumulative sum of the value of completed work or completed portions of work effort expressed in quantity units, typically hours
VD Scattered Votes
Write-in votes that receive less than a jurisdictionally specified proportion of the total vote
VE Earned Value
The value of completed work or completed portions of work effort expressed in quantity units, typically hours
VF Federal Votes
Ballots cast pursuant to 42 United States Code (USC) 1973, Paragraph ff-6
VG Gas Vented
VH Schedule Variance
The difference between the budget planned for a task and the earned value (work accomplished for the task), typically represented in hours
VI Cumulative Schedule Variance
The cumulative sum of the difference between the budget planned for a task and the earned value (work accomplished for a task), typically represented in hours

VJ Cumulative Variance
The difference between the actual numbers for a task and the earned value (work accomplished for the task), typically represented in hours

VK Estimate at Complete
Estimate of the effort required to complete a task or project, typically represented in hours

VL At Complete Variance
Difference between the budget at complete and the estimate at complete, typically represented in hours

VM Variance Adjustment
Adjustment made to a variance to reflect other factors in measuring completed work, or estimate of effort needed to complete work, typically represented in hours

VN No Votes

VP Presidential Votes
Ballots cast pursuant to 42 United States Code (USC) 1973, Paragraph aa-1

Y8 On Hand plus Pipeline
YA Total Demand Quantity
Sum total of all demands

YB Total Demand Orders
Total number of demand transactions reflected in total demand quantity

YC First Quarter Recurring Demand
Total quantity of recurring demands received in first past quarter

YD First Quarter Recurring Orders
Total number of recurring demand transactions received in first past quarter

YE First Quarter Non-recurring Demand
Total quantity of non-recurring demands received in first past quarter

YF First Quarter Non-recurring Orders
Total number of non-recurring demand transactions received in first past quarter

YG Second Quarter Recurring Demand
Total quantity of recurring demands received in second past quarter

YH Second Quarter Recurring Orders
Total number of recurring demand transactions received in second past quarter

YJ Second Quarter Non-recurring Demand
Total quantity of non-recurring demands received in second past quarter

YK Second Quarter Non-recurring Orders
Total number of non-recurring demand transactions received in second past quarter

YL Third Quarter Recurring Demand
Total quantity of recurring demands received in third past quarter

YM Third Quarter Recurring Orders
Total number of recurring demand transactions received in third past quarter

YN Third Quarter Non-recurring Demand
Total quantity of non-recurring demands received in third past quarter

YP Third Quarter Non-recurring Orders
Total number of non-recurring demand transactions received in third past quarter

YQ Fourth Quarter Recurring Demand
Total quantity of recurring demands received in fourth past quarter

YR Fourth Quarter Recurring Orders
Total number of recurring demand transactions received in fourth past quarter

YS Fourth Quarter Non-recurring Demand
Total quantity of non-recurring demands received in fourth past quarter

YT Fourth Quarter Non-recurring Orders
Total number of non-recurring demand transactions received in fourth past quarter

YU Trailers

YW Reorder Point Quantity
Quantity at which a reorder should take place

YX Contract Line Item Quantity
The quantity of material cited under a specific contract line item

YY Years

YZ Maximum Quantity of Free Service Calls

Z1 Units Worked Last Day

Z2 Units Worked per Week

Z3 Units Worked per Quarter

Z4 Number Weeks Paid

Z6 Unused Accumulated Sick Days

Z7 Delivery Point Reduction Quantity
The quantity by which the nominated delivery quantity was reduced for the associated reduction reason

Z8 Receipt Point Reduction Quantity
The quantity by which the nominated receipt quantity was reduced for the associated reduction reason

Z9 Reduction Quantity
The quantity by which the nominated quantity was reduced for the associated reduction reason

693 - Docket Type Code

Code indicating the revenue construction of a freight rate TYPE=ID MIN=1 MAX=1

SEGMENTS USED IN (AS SIMPLE)
DK

TRANSACTION SETS USED IN
460 463 466 468 485 490 492 494

CODE	DEFINITION & EXPLANATION
C	Condition Group
D	Multiple Dependent Factor Through Rate
G	Geography Group
M	Multiple Independent Factor through Rate
P	Product (Commodity) Group
S	Single Factor through Rate
T	Patron Group

694 - Percentage Division

A number which indicates the portion of freight revenue to be apportioned to an identified carrier; the number is expressed as a percent; the value of this element shall not exceed 100.00

TYPE=**N2** MIN=**1** MAX=**5**

SEGMENTS USED IN (AS SIMPLE)

FK

TRANSACTION SETS USED IN

460 485 853

695 - Independence Code

Code indicating the capability of a carrier participating in the route of a rate to make independent changes to that rate

TYPE=**ID** MIN=**1** MAX=**1**

SEGMENTS USED IN (AS SIMPLE)

SS

TRANSACTION SETS USED IN

460 494

CODE	DEFINITION & EXPLANATION
A	Expiration date and a carrier's factor may be changed at any time
B	Expiration date may be changed at any time
C	Expiration date and factor may not be changed before the trigger date, but may be changed after the trigger date
D	Expiration date may be changed at any time; carrier may change its factor only prior to the trigger date
E	Expiration date may be changed at any time; carrier may change its factor only after the trigger date
F	Expiration date may not be changed before the trigger date; it may be changed after the trigger date
G	Expiration date may be changed at any time; carrier may change its factor only on number of days advance notice as indicated in the transaction
H	Expiration date may be changed only after the number of days advance notice indicated in the transaction
I	Expiration date may be changed only after 30 days advance notice
L	Date can be changed at any time; the through-rate can be changed at any time by the proposer
M	Rate Proposer Only
N	Expiration Date and Factor may be Changed Only After the Number of Days Advance Notice Indicated in the Transaction

697 - Docket Control Number

A grouping identification which, when combined with elements 140 and 690, provides a unique identity to a parcel of ratemaking activity

TYPE=**AN** MIN=**1** MAX=**7**

SEGMENTS USED IN (AS SIMPLE)

CD DK DR GY PR PRI PT

TRANSACTION SETS USED IN

106 107 217 404 410 414 417 426 433 453 460 463 466 468 485 486 490 492 494 858

698 - Rate Distribution Code

Code indicating the extent to which data intermediaries may distribute rate data (excluding revenue division information) to requesting recipients

TYPE=**ID** MIN=**1** MAX=**1**

SEGMENTS USED IN (AS SIMPLE)

SS

TRANSACTION SETS USED IN

460 494

CODE	DEFINITION & EXPLANATION
P	Rate information is private; Intermediaries may distribute it only to participating line haul carriers
S	Rate information is selectively private; Intermediaries may distribute it to participating line haul carriers and to other parties specifically identified by name in the docket rate distribution set
U	Rate information is public

699 - Commodity/Geographic Logical Connector Code

Code identifying how a specific segment's statement of a rate restriction is evaluated and its relationship to rate restrictions stated within other segments of the same segment definition

TYPE=**ID** MIN=**1** MAX=**1**

SEGMENTS USED IN (AS SIMPLE)

GY PR

TRANSACTION SETS USED IN

106 107 217 433 453 460 490 494

CODE	DEFINITION & EXPLANATION
M	If one or more segments of a given segment definition contain this element indicating a '-' value, rate application is denied upon satisfaction of any one of these segments, so indicated; In the event that rate restrictions on two segments of similar definition are satisfied, one segment containing this element indicating a '+' value and the other segment indicating a '-', rate application is denied. In other words, a minus takes precedence over a plus.
P	If one or more segments of a given segment definition contain this element indicating a '+' value, rate application requires satisfaction of the restriction stated on at least one of those segments, so indicated; In the event that rate restrictions on two segments of similar definition are satisfied, one segment containing this element indicating a '+' value and the other segment indicating a '-', rate application is denied. In other words, a minus takes precedence over a plus.

PD Procedure
PE Person
PH Product Characteristic
PI Property Identification
PK Property Tax
PL Primary Specification - Lift Level
Designates the hierarchical level detailing specifications of the largest unitized configuration to be handled mechanically in warehouse/shop floor applications; "primary" indicates preferred or mandatory, and all subsequent "HL" segments contain specifications of upper or interior levels of the lift level as required
PP Related Parties

PR Principal
An entity granting authority to another to act in its behalf, such as a lobbyist's principal or an entity granting power of attorney.

AF	Actual Total
AG	Compliance Total
AH	Gross Compliance Total
AI	Net Compliance Total
AJ	Effectiveness
AK	Penetration
AL	Exposure
AM	Capacity
AN	Work
AO	Account Opened Period
AP	Apartments
AQ	Amount Owes
AR	Annual Result
AS	Modified Exposure
AT	Pro Rata Factor
AU	Sample
AV	Average Reading
AW	Relative Humidity
AX	Alcohol
BA	Base Point
BB	Bank Balance
BC	Billed Actual
BD	Billed Dimensions
BL	Bundle Limitation

BM Base Metal
Original or base product to which coatings are to be applied

BN Billed Minimum

BO Meter Reading as Billed
Used when billing charges are based on contractual agreements or pre-established usage and not on actual usage

BP Bearing Piece Limitation

BR Billed History

BT Batch Limits
Limits set on test results from all product made for one unit or period of production

BZ Batten Size

C1 Conformance Property Status

CA Coating
Material or product added to another product (base metal) to enhance its characteristics

CB Condominium

CC Cooperative

CF Conversion Factor

CG Average Owing

CV Cumulative Test Period
The total period during which a series of tests are conducted

CW Promissory Notes in Force

CY Secured Amount

DE Defects

DN Dunnage Dimension

DR Per Drop

DS Defect Size

DT Dimensional Tolerance

EA Meter reading-beginning estimated/ending actual

EE Meter reading-beginning estimated/ending estimated

EF Evaluation Factors

EL Electrical Characteristics

EN Environmental Conditions
The data values to be reported reflect the environmental conditions surrounding a situation

including but not limited to test environments

FC First of Campaign Result

FD Finished Dimensions
Dimensions of the final or end-use product

FH Radio Operations

FJ Antenna Characteristics

FV Firing Values

FZ File Size

GC Contractor Delivery Limitations

GL Guidelines

GO Government Ordering Limitations

GP Ordering Period Limitations

HC High Credit Average

HR Historical Result

ID Industrial

IG Ingredient

IN Incrustation

IR Interpolated Result
A test result value calculated by interpolation between two physical tests

LC Limited Weight/Size Coils

LD Load Planning Dimensions

LG Loans Granted

LL Lift Limitation

LM Layer of Multiple Layered Product

LP Last Sold Period

LS Lot Status

LT Lot Limits
Limits set on test results from all product contained in a single shipment (which may involve any multiple or fraction of transportation carrier units) to one customer

SR Surface Roughness

SS Serving Size

ST Surface Treatment

SU Surface

SZ Subject Property

TA Two to Four Family

TD Splice Tape Dimensions

TE Temperature

TI Time

TL Transportation Equipment Limitations

TO Total Dimensions

TP Test Period
The nominal period that a test is conducted

TR Test Results
Indicates that the data to follow are the results test measurements

TS Single Test Limits
Limits set on each measurement of the specified product characteristic or manufacturing process so that any single test whose value falls outside these limits causes the product or process to be declared out-of-specification

TT This Type Property

VD Variant Days
The number of days to be subtracted from the shelf life

VI Vitamin

VT Vacant

WA Waste Amount

WR Warranty

WT Weights

ZA Multi - Family

ZB Allergen

ZP Log Zero Point of Reference
The physical location on the well, measured above or below the ground surface, from which the wireline well log measurements, such as the kelly bushing and casing head flange, are adjusted

738 - Measurement Qualifier

Code identifying a specific product or process characteristic to which a measurement applies

TYPE=**ID** MIN=**1** MAX=**3**

67 Bonus Size Amount
Additional product offered by the manufacturer, also known as a special deal for the purchaser
68 Gross Wage
6F Gain
78 Subcontractor - Labor and Materials
79 Subcontractor - Labor Only
8F Directional Height above Average Terrain
A1 Acids
A value, normally shown as a percent of the total, showing the content of all acidic structures contained in a solution of a known product

A2 Adsorption
A value defining the adhesion in an extremely thin layer of molecules (as of gases, solutes, or liquids) to the surfaces of solid bodies or liquids with which they are in contact

A3 Aging Time
The time taken, once a product has been initially manufactured, to come to a desired quality through undisturbed rest or curing; also, the time taken to bring to a desired use or maturity

A4 Aromatics
A value, normally shown as a percent of the total, showing the content of all molecules in a product containing at least one benzene ring

A5 Average Differential Pressure
Average difference between the upstream and downstream pressure through an orifice plate; expressed in inches of water

A6 Average Static Pressure
Pressure of the flowing gas stream; expressed in pounds per square inch

A7 Flame Projection Distance
The distance that a flame would project from an aerosol can containing the subject material if ignited

A9 Exposure
A measure of the quantity of a specified form of energy or mass coming into contact with another specified object or space

AA Alternating Current

AB Activation Energy

AC Actinium

AD Ambient Temperature

AE Argon

AF Angle of Bend

AG Americium

AH Astatine

AI Acidity

AJ Aim Gage
Physical dimension a producer is to "aim" toward producing or supplying

AK Volatile Organic Compounds (VOCs)
Organic compounds whose existence is calculable or detectable by methods specified by the U.S. Environmental Protection Agency

AL Spine Show

AM Average Speed

AN Flute Test

AO Alcohol
Content of Alcohol for the product based on the serving size provided

AP Average Pressure

AR Beta Carotene
The vitamin Beta Carotene in the product based on the nutritional serving size provided

AS Ash Fusion Temperature

AT Additive

AU Number of Units Projected

AV Age

AW Remaining Economic Life

AX Remaining Physical Life

AY Number of Comparable Sales

AZ Arbor Size

B0 Blemishes

B1 Base Number
A number that identifies the ability of a compound to react with an acid to either take up a proton from the acid or to give up unshared electrons to an acid to form a salt

B2 Number of Comparable Listings

B3 Present Land Use

B4 Subject Phase Dwelling Units

B5 Octanol/Water Partition Coefficient
A scientific measure of the relative solubility of a material in octanol versus its solubility in water

B6 Total Project Dwelling Units

B7 Biotin
The mineral Biotin in the product based on the nutritional serving size provided

B8 Carbohydrates
Carbohydrates in the product based on the nutritional serving size provided

B9 Cholesterol
Cholesterol in the product based on the nutritional serving size provided

BA Barium

BB Beryllium

BC Billet Size

BD Bias

BE Boron Factor

BF Brinell

BG Berkelium

BH Bromine

BI Edible
Indicates what % of the product is edible. The serving size is based on the edible portion of food and not on inedible components, e.g. bone, seed, shell, etc.

BJ Burst Index
The burst pressure of a paper or pulp sheet expressed per unit basis weight

BK Bulk

BL Blisters

BM Energy
Energy in kilojoules for the product based on the nutritional serving size provided

BN Bend
The ability of the product to undergo bending operation in forming

BO Lateral Bow (Camber)

BP Boiling Point

BQ Breaks

BR Brightness

BS Folate
Folate in the product based on the nutritional serving size provided

BT Bursts

BU Buckles

BV Moisture Loss %
The % of moisture loss after cooking the product

BW Basis Weight

BX Blood Alcohol

BY Monounsaturated Fat
Monounsaturated Fat in the product based on the nutritional serving size provided

BZ Niacin-B3
The vitamin Niacin B3 milligrams for the product based on the nutritional serving size provided

C0 Color Grade

C1 Carbonyl
The measurement of the bivalent carbon-oxygen radical occurring in aldehydes, ketones, carboxylic acids, esters, acid halides, and amides; also, the measurement of the compound carbonyl radical with a metal

C2 Catalyst
The measurement of any number of substances used in the production of a final product or retained in the final product that initiates a chemical reaction and enable the product to proceed under milder conditions than otherwise possible

C3 Maximum Contraction
A result from a process that measures the total contraction of a sample

C4 Color Quadrant

C5 Omega 3 Fatty Acids
The Omega 3 Fatty Acids in grams for the product based on the nutritional serving size provided

C6 Omega 6 Fatty Acids
The Omega 6 Fatty Acids in grams for the product based on the nutritional serving size provided

C7 Organic Acids
The content of Organic Acids in milligrams for the product based on the nutritional serving size provided

C8 Pantothenic Acid
Pantothenic Acid in the product based on the nutritional serving size provided

C9 Polyunsaturated Fat
Polyunsaturated Fat in the product based on the nutritional serving size provided

CA Caliper

CB Protein
Protein in grams for the product based on the nutritional serving size provided

CC Celsius

CD Compression

CE Capacitance In

CF Capacitance Out

CG Cadmium

CH Cesium

CI Curium

CJ Cycle Time

CK Californium

CL Cladding Thickness(% of Composite Thickness)
CM Cures
CN Chlorine
CO Core Loss
CP Crimp
CQ Cuts
CR Crosswise Spacing
CS Cross Section
CT Center-to-center
CU Coil Curvature
CV Riboflavin-B2
The vitamin Riboflavin in the product based on the nutritional serving size provided
CW Cuttable Width
CX Calculated Value
CY Contamination
The yellowness of cotton; correlates with the spotted and light spotted part of the classer grade; higher values represent more yellowness
CZ Saturated Fat
Saturated Fat in the product based on the nutritional serving size provided
D0 Diacetyl
D1 Maximum Dilatation
A result from a process that measures the total expansion of a sample
D2 Dispersing Agent
The measurement of the amount of substance that promotes the formation and stabilization of a dispersion of one substance in another
D3 Drying Agent
The measurement of the amount of substance in a product that is used to extract liquid from either the manufacture or use of a product
D4 Dry Point
A temperature measurement used in a distillation process to identify the temperature at which a product becomes dry
D5 Wear
Measure of deterioration
D6 Horizontal
D7 Distillation Fraction
D8 Vertical
D9 Dots per Inch
DA Delta Value A
DB Delta Value B
DC Ductile Class
DD Depth of Dents
DE Defects
DF Distance Across Flats
DG Direct Current
DH Dysprosium

DI Diameter
DJ Dominant Wave Length
DK Color Bits in Palette
DL Delta Value L
DM Dual Amplitude
DN Density
DO Compressed File Size
DP Depth
DQ Soluble Fibre
Soluble Fibre in the product based on the nutritional serving size provided
DR Delta R
Planar variation of r value which is defined by the following equation: (r0 - 2r45 + r90)/2
DS Distance Between Points
DT Distance From Base Point
DU Draw Tension
DV Starch
Total Starch in the product based on the nutritional serving size provided
DW Width, Boxcar Door
DX Sugar
Total Sugar in the product based on the nutritional serving size provided
DY Dyeability
DZ Sugar Alcohol
The Sugar Alcohol content in grams and % of DV/RDI (Daily Value / Recommended Daily Intake) for the product based on the serving size provided
E0 Extraneous Matter
E1 End
Identifies a value measured at the end of a testing process or range of test results
E2 Thiamin-B1
The vitamin Thiamin in the product based on the nutritional serving size provided
E3 Total Dietary Fibre
Total dietary fibre in the product based on the nutritional serving size provided
E4 Total Fat
Total Fat in the product based on the nutritional serving size provided
E5 Transfatty Acids
Transfatty Acids in the product based on the nutritional serving size provided
E6 Vitamin B12
Vitamin B12 in the product based on the nutritional serving size provided
E7 Vitamin B6
The Vitamin B6 in the product based on the nutritional serving size provided
E8 Vitamin C
Vitamin C in the product based on the nutritional serving size provided
E9 Vitamin D
Vitamin D in the product based on the nutritional serving size provided
EA Elongation
EB Edge Burr
EC English Coil Dimensions

ED Eddy
EE Einsteinium
EF Europium
EG Equivalent Temperature
EH Erbium
EI Expansion
EJ Electrical Conductivity
EK Vitamin E
Vitamin E in the product based on the nutritional serving size provided
EL Elasticity
The springiness or rebound of a deformed material
EM Elmendorf Tear
EN Entanglement
EO Vitamin K
Vitamin K in the product based on the nutritional serving size provided
EP Exciting Power
ES Edge
ET End Point
EW Empty Weight
EX Eccentricity
F0 Fat
F1 Fire Point
The measurement of the temperature at which combustion initially begins for any number of substances
F2 Radiated Power
F3 Output Power (Peak Envelope)
F4 Height above Average Terrain
F5 Ground Elevation
F6 Height to Tip
F7 Radius from a Location
F8 Radius from Coordinates
F9 Operating Hours
FA Fluorine
FB Flare
FC Short Cycle Flatness
FD Frequency of Operation
FE Fermium
FF Francium
FG Freezing Point
FH Finish
FI Filament Count
FJ Face Width
The width of the oscillate wound material
FK Fluid Consistency
Descriptor of a fluid expressed as the ratio, by weight, of total suspended solids to liquid

FL Longitudinal Flatness

FM Dietary Folate Equivalents
Folate, Dietary Folate Equivalents in micrograms for the product based on the nutritional serving size provided

FN Flatness

FP Flashpoint

FQ Frequency

FR Flow Rate

FS Fold Strength

FT Flange Thickness

FU Azimuth

FV Transverse Flatness

FW Flange Width

FX Filler

FY Beam

FZ Output Power (Mean RF)

G1 Gutter

G2 Grain Size
The internal grain morphology of a sample

G3 Tilt

G4 G-Force

GA Grain

GB Guided Bends Root

GC Gadolinium

GD Gold

GE Guided Bends Face

GF Guided Bends Side

GG Gauge

GH Gallium

GI Grit, Brushed
The percentage of a sample of TiO2 (water dispersed) which remains on a 325 mesh screen after washing and brushing the screen and surface to break apart soft agglomerates

GJ Grit, Unbrushed
The percentage of a sample of TiO2 (water dispersed) which remains on a 325 mesh screen after washing the screen surface

GK Tinting Strength
A measure of the hiding power of a titanium dioxide sample obtained by comparing the green (Y) reflectance of a tinted waterbased formula against that of a standard

GL Gloss

GM Emulsion Gloss
The 60-degree gloss of a pigment sample in a waterbased paint formula

GN Gross to Net Conversion Factor

GO Particle End Point
The reading on a Hegman gauge, below the fineness line, at which the population of scattered particles stops

GP Group Package Separation

GQ Scattered Particles
The number of scattered particles (visible defects) in a drawdown on a Hegman gauge between the fineness line and the particle end point

GR Gravity

GS Carbon Black Undertone
The blue/amber ratio (Z/X) of the reflectance of a paste made of titanium dioxide and carbon black; a measure of the TiO2 particle size

GT Glass Transition Temperature
Temperature at which an amorphous material changes from a brittle to a plastic state

GW Gross Weight, Maximum

H1 Heavies
A relative term that is used to identify the weight percent of all molecules beyond the peak identified as the molecule being tested for in a gas chromatograph result; also, all molecules that have a boiling point higher than the molecule being tested

H8 Net Explosive Weight

H9 Recommended Exposure Limit
SEE CODE SOURCE 107

HA Hydro Pressure

HB Heavy Aluminas

HC Helium

HD High Propagation Delay Time
The time between the specified reference points on the input and output waveforms, with the output changing from the defined low level to the defined high level

HE Heavy Silicates

HF Hardness

HG Heavy Sulfides

HH Heavy Globular Oxides

HI Hafnium

HJ Holmium

HK Human Factors

HL Heat Loss
Quantity of original thermal energy removed

HM Height, Maximum

HO Holes

HP Height of Tread Plate Pattern

HR Height of Runners

HT Height

HZ Hazepoint

IA Imperfections - Thicks
Thick places in the yarn

IB Impact Energy

IC Incremental Distance

ID Inside Diameter

IE Imperfections - Thins
Thin points in the yarn

IF Input Low Voltage
IG Granulated Ingot Size
IH Input Current
II Input Setup Time
IJ Input Hold Time
IK Indium
IL Imperfections - Neps
Short, broken or immature fibers in the yarn
IM Iridium
IN Input Low Current
The current flowing out of input when a specified low-level voltage is applied to that input
IO Input High Current
The current flowing out of an input when a specified high level voltage is applied to that input
IP Input Leakage Current
The current flowing into an input when the maximum allowed voltage is applied to that input
IQ Input Clamp Diode Voltage
The most negative voltage at an input when the specified current is forced out of that input terminal
IR Ideal Diameter
IS Input High Voltage
IT Interrupt Pulse Period
IU Interrupt Setup Time
IV Iodine
IW Incrustation Factor
IX Inside Diameter, Minimum
IY Induction
Magnetic force
IZ Ingot Pound Size
JA Junction Temperature
KA Knoop
KB Krypton
KN K&N Holdout
L0 Leaf Grade
L1 Lights
A relative term that is used to identify the weight percent of all molecules below the peak identified as the molecule being tested for in a gas chromatograph result; also, all molecules that have a boiling point lower than the molecule being tested
L2 Nucleotides
L3 Polydextrose
L4 Sucralose
L5 Taurine
LA Lanthanum
LB Lithium
LC Low Propagation Delay Time
The time between the specified reference points on the input and output waveforms, with the

output changing from high level to the defined low level

LD Lawrencium

LE Lutetium

LF Long Fibers

LG Leg

LL Long Leg

LM Length, Maximum

LN Length

LO Long Length

LP Camber of Pattern Line

LS Short Leg

LT Lengthwise Spacing

LW Long Width

M1 Melt Range
A range of temperatures used to identify at what point compounds start to transform from a solid to a liquid state

M2 Maximum Differential Pressure
The largest differential pressure reading at which this device will measure the differential pressure accurately

M3 Maximum Static Pressure
Largest flowing gas pressure at which this device will measure volumes accurately

M4 Area

M5 Minimum Speed

M6 Maximum Speed

M7 Linoleic Acid

M8 Linolenic Acid

M9 Aspartame

MA Mean Average

MB Mendelevium

MC Min./Max Cuttable Width

MD Measurement Voltage
The reference voltage level on AC waveforms for determining AC performance

ME Maximum Input Low Voltage
The guaranteed input low threshold

MF Minimum Input High Voltage
The guaranteed input high voltage

MG Mercury

MH Melting Point

MI Minimum

MJ Major Section (Stepped)

MK Microseperometer (MSEP)

MM Management

MN Minimum Average

MO Mottles

MP Mullen Pop

MQ MCQuaid
Austenitic grain morphology of a sample

MR Module R (R Bar)
Ratio of true width strain to true thickness strain; indicates the ability of the material to resist thinning and deform in draw

MS Minor Section (Stepped)

MT Moisture Content

MU Multiplier

MV Maximum Average

MW Molecular Weight

MX Maximum

MY Magnetizing Field

N1 Acesulfame-potassium

N2 Arachidonic Acid (ARA)

N3 Choline

N4 Docosahexanoic Acid (DHA)

N5 Galactooligosaccharides (GOS)

N6 Inositol

N7 L-Carnitine

N8 L-Methionine

N9 Lutein

NA Number per Package

NB Number per Bundle

NC Number per Coil Group

ND Neodymium

NE Niacin Equivalent (NE)
Niacin Equivalents (NE) units are used to express niacin content of food. It represents preformed niacin plus tryptophan equivalents (60 mg tryptophan = 1 mg niacin)

NF Neon

NG Nobelium

NH Number of Items per Package Label

NI Number of Splices per Package Label

NJ Number of Sheets per Package Label

NK Nesting Factor

NL Number per Lift

NM Number Pkgs. per Master Pack

NO Nominal (Target, Aim)

NP Percent of Specified

NS Number per Skid

NU Number per Unit

NV N Value
The work hardening rate capability of material and predicts the ability to deform in stretch, plane strain, and bending

NZ Nutritional Facts Calculation Size

O1 Orifice - Inside Diameter

OA Offset

OB Osmium

OC Output Low Voltage
The maximum guaranteed low voltage at an output terminal sinking the specified load-current output low current

OD Outside Diameter

OE Output Low Current
The current flowing into an output which is in the low state

OF Output High Voltage
The minimum guaranteed high voltage at an output terminal for the specified output current 'output high current' and at the minimum VCC value

OG Output High Current
The leakage current flowing into a turned-off, open-collector output with a specified high output voltage applied

OH Overhead Height, Receiving Door

OI Output Off Current Low
The current flowing out of a disabled three-state output with a specified low output voltage applied

OJ Output Off Current High
The current flowing into a disabled three-state output with a specified high output voltage applied

OK Output Short-Circuit Current
The current flowing out of an output which is in the high state when that output is short circuit to ground

OL Output Disable Time from Low Level of a 3-State Output
The delay time between the specified reference points on the input and output voltage waveforms with the three-state output changing from the low level to a high impedance 'off' state

OM Outside Diameter, Maximum

ON Output Disable Time from High Level of a 3-State Output
The delay time between the specified reference points on the input and output voltage waveforms with three-state output changing from the high level to a high impedance 'off' state

OO Output Enable Time from Low Level of a 3-State Output
The delay time between the specified reference points on the input and output voltage waveforms with the three-state output changing from the high impedance 'off' state to the low level

OP Openness

OQ Output Enable Time from High Level of a 3-State Output
The delay time between the specified reference points on the input and output voltage waveforms with the three-state output changing from high impedance 'off' state to the high level

OR Distance Between Outside Runners

OS Open Circuits

OT Output Delay Time

OV Opacity

OW Overall Width

OX Ownership Share

OY Operating Weight
P1 Price
P2 Percent Daily Value (DV) / Recommended Daily Intake (RDI)
PA Package Separation
PB Pressure
PC Per Hundred Linear Yards
PD Platinum
PE Potassium
PF Promethium
PG Polonium
PH Pulse Setup Time
The interval immediately preceding the active transition of the timing or preceding the transition of the control input to its latching level
PI Pulse Hold Time
The interval immediately following the active transition of the timing pulse or following the transition of control input to its latching level
PJ Pulse Width
The time between the specified reference points on the leading and trailing edges of a pulse
PK Pulse Recovery Time
The time between the reference point on the trailing edge of an asynchronous input control pulse and the reference point on the activating edge of a synchronous pulse input such that the device will respond to the synchronous input
PL Percent Defective
PM Practice
PN Palladium
PO Percent of Order (-, +)
Expression of allowable variance of order expressed either as absolute (for example 92% to 110%) or relative percent (for example - 8% to + 10%)
PP Powder/Paste Package Size
PQ Plutonium
PR Praseodymium
PS Protactinium

XH Side Height, Flat Bed With Removable Sides
XP Specified
XQ Squareness
XZ Spool Size
YA Yttrium
YB Yield
YC Ytterbium
YD Yarn Count
The length per unit mass of yarn
ZB Boron
ZC Carbon
ZD Load Factor
Relationship between watt hours and watt demand necessary to supply electric load
ZF Sulfate Sulfur
An oxidation product present in sulfur
ZG Organic Sulfur
The total sulfur less the percentage sums of sulfate sulfur and pyritic sulfur
ZH Hydrogen
ZN Nitrogen
ZO Oxygen
ZP Phosphorous
ZR Pyritic Sulfur
A heavy mineral (pyrite) found in sulfur
ZS Sulfur
ZV Vanadium
ZW Tungsten
AA1 Storage Temperature After Opening
Specifies the temperature at which the product is to be maintained after the seal has been broken and the product has been exposed to the environment.
AA2 Storage Temperarure After Removing Overwrap
Specifies the temperature at which the product is to be maintained after removing a product's protective overwrap or moisture barrier.
AA3 Storage Temperature After Reconstitution
Specifies the temperature at which the product is to be maintained after adding liquid to dilute or mix the product.
AAA Acetic Acid
AAB Aflatoxin (United States)
AAC Anethole Content
AAO Added Oil
AAP AC-apparent Power
Power measurement of a material subject to a magnetic induction
AAS Acid Solubles
ABO Absorbance
The negative base 10 logarithm of the ratio of the radiant power transmitted by a sample to the radiant power incident upon the sample

ABR Abrasion
The qualitative ability of a surface to wear, grind, and rub away or to be worn away

ABS Absorbency
The rate at which a specimen takes up liquids or the amount of liquid required to saturate the specimen

ACN Acid Number
The quantity of base required to titrate acidic constituents present

ADH Adhesion
The molecular attraction between two or more bodies in contact

ADM Dye Manufacturing Units

AGE Inventory Age
The age of inventory from the date or time of production to the present date or time

AGI Aggressive Index

ALK Alkalinity
The quantitative capacity of aqueous media to react with hydrogen ions

ALN Alkalinity Number
The quantity of acid required to titrate basic constituents present

ALP Alpha-Cellulose
The average molecular chain length of pure long-chain cellulose in pulp

ALT Alternate Measurement

AMI Amines
Content of basic compounds derived from ammonia by replacement of hydrogen by one or more univalent hydrocarbon radicals or other non-acidic organic radicals

AMW Average Molecular Weight
The average of the sums of the weights of molecules' constituent atoms in an object which contains more than one type of molecule

AMY Amylograph

ANT Antibiotics

AOE Ethyl Alcohol

AOX Antioxidant
A substance that increases a product's oxidation resistance

API API Gravity
A special hydrometer scale recommended for exclusive use in the U.S. Petroleum Industry for liquids lighter than water

APP Appearance
The visible impression of an item

ASA Acid Insoluble Ash

ASC Average Servings Per Case

ASH Ash
The inorganic component of product

ASY Assay
The quantitative determination of the amount of the major or active component of an item

ATP Alpha Tocopherol
Alpha Tocopherol in the product based on the nutritional serving size provided. Alpha Tocopherol is a type of vitamin E which is found in a variety of seeds, nuts and leafy green vegetables.

AVT Average Temperature

AXL Axle Length

BBC Broken Cookies

BBF Butterfat

BBX Brix

BDP Perforation Bottom Depth
The deepest depth below surface level for perforations in the well casing

BGL Beta Glucan

BHF Bottomhole Pressure - Flowing
Fluid pressure at the deepest depth in the well bore while production is flowing from the well; measured during well testing and completion operations

BHS Bottomhole Pressure - Shutin
Fluid pressure at the deepest depth in the well bore with the well annulus closed; measured during well testing and completion operations

BIC Bark in Chips
The ratio of tree bark to wood chips; indicates the level of one type of contamination in production of wood pulp

BND Amount Bound in Material
Amount that cannot be removed by volatilization, solvent extraction, or melting

BOR Boiling Range
The temperatures normally used or required to bring a substance to boil at different barometric pressures

BQP Base Quantity per Package
Actual mass of a raw chemical without the salt, contained within a single package. Calculation: Net weight of the package x Pure Base Ratio.

BRS Breaking Strength
The greatest longitudinal stress a substance can bear without tearing apart

BSW Percent Bottom Sediment and Water

BUD Bulk Density

CAA Citric Acid

CAF Caffeine

CAL Calories
A calorie is the amount of heat required to raise the temperature of one kilogram of water one degree Celsius

CAT Catch Weight

CAU Caustic Reaction Severity
The severity of chemical reaction due to caustic present as the primary reactant

CAY Case Yield

CCA Cinnamic Aldehyde

CCF Composite Corrected Factor

CCG Combined Center of Gravity

CCL Chocolate Liquor

CCT Cook Test

CFF Calories from Fat

CFI Crude Fiber

CFS Container Forward Setting
The distance attached appurtenances extend beyond the nose of the container

CGP CO2 Gas Production

CGR Color Grayness RD
Lightness or darkness of cotton

CHA Chemical Addition Rate
The quantity of chemical expressed by weight or volume added to manufacturing or testing process per unit of time

CHB Chlorophyll-a

CHC Concentration of Hazardous Component

CHG Rate of Change
The increase or decrease in polarity and amount of a change per unit of time

CHL Chlorides
Amount of chlorides in the water or brine produced from a well

CIV Cuene Intrinsic Viscosity
The average molecular weight of cellulose molecules in product

CLA Clarity
The clearness or transparency of an item

CLB Calibration

CLN Cleanliness
The impurities remaining in and/or on the product

CLO Chloramphenicol

CLS Calculation Size
Calculation basis used for the nutritional facts panel of a product

COC Canola Oil Coating

COF Coefficient Factor

COH Coercive Force
Magnetizing force at which magnetic induction is zero

COL Color
The aspect of appearance dependent upon the wavelength of incident, reflected or transmitted, and observed light

CON Concentration
The relative amount of a component of a sample of product containing multiple components

COR Corrosiveness
The ability to destroy gradually by chemical reaction

COS Cost

COT Content
The amount of specified material contained

COV Coverage
The statement from a manufacturer or supplier specifying the area that a product will cover. Examples: A statement that a gallon of paint will cover 300 square feet, or a statement that a carton of ceramic tile will cover 5 square meters

CPF Casing Pressure - Flowing
Fluid pressure within the casing, or outermost tubing used to isolate the well from the surrounding geology, while production is flowing from the well; measured during well testing and completion operations

CPP Count per Pound

CPS Casing Pressure - Shutin
Fluid pressure within the casing, or outermost tubing used to isolate the well from the

surrounding geology, with the well annulus closed; measured during well testing and completion operations

CPT Cup Test Adhesion
Quantitative calculation of galvanneal coating loss during cup formation

CRF Free Chlorine Residual

CRL Compression Relaxation

CRN Crown
Increase in the thickness or height of a rolled product at the center compared to the thickness at the edge

CRT Total Chlorine Residual

CSC Choke Size - Casing
The diameter of the orifice in the casing through which liquids flow

CSR Cost Realism

CST Choke Size - Tubing
The diameter of the orifice in the tubing through which liquids flow

CTB Classes that Blend

CTG Coating
Product applied to the top of a substrate or base

CTT Contact Time

CUR Curcumin

CUT Cure Time
The time required to prepare a product by chemical or physical processing for storage or use

CWT Charge Weight

CYB Color Yellowness (+B)

CYC Cyclamate
An artificial sweetener

CYS Cysteine
A semi-essential proteinogenic amino acid that is used as a food additive

DAT Datum Depth
Depth below ground surface at which a measurement is taken within a well

DBL Doubles

DCC Defect Contrasting Classes

DCK Dockage

DCT Dirt Count
The amount of visible contamination

DDW Defect Damaged Wheat

DEM De Minimis Level
A measurable level of significance below which a requirement does not apply

DFS Defect Skins

DHP Defect Hulls
Covers Hulls and Partial Hulls

DHW Defect Heat Damaged Wheat

DIA Diastase

DIK Defect Insect Damaged Kernels

DIL Dilution Factor; An amount by which a quantity is diluted in order to be read on an instrument scale

DIR Distillation Range
The temperature range in which a defined amount of material boils under specified conditions

DIS Dispersion
The ease with which one substance mixes with another

DLC Dial Count

DME Dichloromethane Extract
The volatile components of pulp products

DMF Distributed Meter Factor

DOC Double Olsen Cup
Visual observation rating zinc adherence after a cup forming operation

DOG Defect Other Grains

DPM Degree of Polymerization
The average number of monomer units per polymer molecule in product

DRS Dark Specs

DRW Drained Weight

DRY Dryness
A product specification in pulp, paper, and chemicals

DSK Defect Shrunken and Broken Kernels

DSP Defect Splits

DTO Defect Total

DWC Defect Wheat of Other Classes

DWP Dew Point
The temperature at which a vapor begins to condense

DXE Dextrose Equivalent

DXI Invert Sugar

DYC Dye Content

E90 Vitamin D3

EFC Effective Carbohydrates

EKA Vitamin E Acetate

ELC Exposure Ceiling: Threshold Limit Value

ELE Elevation

ELI Immediately Dangerous to Life and Health
A measurable level beyond which the most stringent safety measures, such as evacuation, must be taken

ELL Explosion Limit

ELO Occupational Safety and Health Administration (OSHA) Permissible Exposure Limit

ELP Occupational Safety and Health Administration (OSHA) Permissible Exposure Limit Ceiling

ELS American Conference of Government Industrial Hygienists (ACGIH) Threshold Limit Value: Short-Term Exposure

ELT American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value: Time Weighted Average

ELV Unshielded Exposure Rate

ELW American Industrial Hygienists Association (AIHA) Work Environment Exposure Level (WEEL)

ELX American Industrial Hygienists Association (AIHA) Work Environment Exposure Level (WEEL): Time Weighted Average

EMB Bones

EMD Ethoxylated Mono & Diglyceride

ENZ Enzyme

EO1 Vitamin K1

EOR Ethylene Oxide Residue

EPA Eicosapentaenoic Acid
Eicosapentaenoic acid (EPA), or icosapentaenoic acid, is an omega-3 fatty acid that is found in cold water fatty fish and used in fish oil supplements.

EPL Expected Product Life

ERY Erythritol
An organic compound, a type of sugar alcohol, used as a food additive and sugar substitute

ESO Essential Oil

EST Esterification

ETH Ethoxyquin

ETV Ethyl Vanillin Content

EVL Evaporation Loss
The amount of material lost under specified conditions

EVR Evaporation Rate

EXC Extractable Color

EXH Exhaust Benzene Emissions
Benzene emissions from the exhaust system

EXT Extractables
Material removed by solvent extraction

FAA Fat Acidity

FAI Fat As Is

FAN Falling Number

FAO Free Fatty Acid As Oleic

FAR Farinograph Arrival Time

FAW Face Weight
Pertaining to the top of a carpet, the ounce weight per square yard

FBP Acetate Break Point
The chemical reactivity of cellulose in the acetylation process

FBU Fat due to Butterfat

FCB Food Drug & Cosmetics (FD&C) Blue

FCM Fat left in Cooked Meat

FCR Food Drug & Cosmetics (FD&C) Red Number 4

FCY Food Drug & Cosmetics (FD&C) Yellow Number 5

FDB Fat on a Dry Basis

FEC Fenchone Content

FFA Free Fatty Acid

FIB Fiber

FIL Filter Number
The filterability of a solution expressed in units combining the porosity of the filter medium

and the time required for a standard volume of solution to pass through the filter at specific pressures

FIM Film Integrity Test

FIN Fineness
Mean fiber width in micrograms per inch

FIT Filterability
The ability of a substance to pass through a given medium under specified conditions

FIV Final Viscosity

FLD Fluid Point
The point at which the fused mass has spread out in a nearly flat layer with a maximum height of 1/16 in. (1.6 mm)

FLN Fiber Length
Instrument method of measuring length in hundredths of an inch

FLP Fluid Level Above Pump
The depth of well liquids above the location of a subsurface pump unit

FLT Fluting
Visual observation of a formed cylinder to determine if fluting is present

FLU Fluoride

FLV Flavor Threshold

FML Flammability Limits

FMP Fat Melting Point

FMZ Flammability

FNL Fines Retained on Screen
Amount of particles in a material that is larger than a defined unit

FNS Fines
The amount of particles in a material that are smaller than a defined limit

FNY Finished Yield
Number of finished portions the product will yield.

FOA Foam
The dispersion of gas in a liquid or solid

FOB Finishing Oil Honey Roasted

FOC Finishing Oil Roasted

FOH Front Over-Hang of Vehicle

FOI Fouling Index
The result of a procedure which represents the accumulation of deposits of ash on superheater, boiler and economizer tubes

FOM Foreign Material

FOR Foreign Matter
The visible contamination in a material

FOS Fructooligosaccharides
Fructooligosaccharides (FOS) (also known as oligofructose or oligofructan) are oligosaccharide fructans, used as an alternative sweetener.

FPV Acetate Plugging Value
The weight of a liquid that passes through a given area of filter at a constant filtration pressure before the filter becomes completely blocked or plugged; denotes the filtration quality of viscose or solutions of cellulose acetate

FRC Fresh Cut

FRM Final Raisin Moisture
FRU Fructose
FSI Free Swelling Index
The result of a procedure regarding the caking properties of coal when burned as fuel
FUD Full Load
FUP Functionality Penetrometer
GEL Gel
Viscous jelly-like material
GES Gel Strength
GGR Gas Gravity
The density of the produced gas relative to the density of air at standard temperature and pressure
GIR Gas Injection Test Rate
Volume of gas injected into the well bore during a 24-hour test period
GLC Glycerol
GLE Ground Level Elevation
GLY Glycerin
GOA Granulation on 3/8 Inch U.S. Standard Sieve (USSS)
GOB Granulation on Number 10 U.S. Standard Sieve (USSS)
GOC Granulation on Number 100 U.S. Standard Sieve (USSS)
GOD Granulation on Number 14 U.S. Standard Sieve (USSS)
GOE Granulation on Number 20 U.S. Standard Sieve (USSS)
GOF Granulation on Number 25 U.S. Standard Sieve (USSS)
GOG Granulation on Number 30 U.S. Standard Sieve (USSS)
GOH Granulation on Number 40 U.S. Standard Sieve (USSS)
GOI Granulation on Number 50 U.S. Standard Sieve (USSS)
GOJ Granulation on Number 6 U.S. Standard Sieve (USSS)
GOK Granulation on Number 60 U.S. Standard Sieve (USSS)
GOL Granulation on Number 80 U.S. Standard Sieve (USSS)
GOM Granulation on 1/2 Inch U.S. Standard Sieve (USSS)
GON Granulation on 1/4 Inch U.S. Standard Sieve (USSS)
GOR Gas-to-Oil Ratio
A measure of the gas produced from a hydrocarbon well relative to the oil produced
GRA Gas Test Rate
Volume of gas produced from a well during a 24-hour test period
GRI Graininess
The crystallinity of a substance
GRN Granulation
GTA Granulation thru Number 100 U.S. Standard Sieve (USSS)
GTB Granulation thru Number 140 U.S. Standard Sieve (USSS)
GTC Granulation thru Number 18 U.S. Standard Sieve (USSS)
GTD Granulation thru Number 20 U.S. Standard Sieve (USSS)
GTE Granulation thru Number 200 U.S. Standard Sieve (USSS)
GTF Granulation thru Number 50 U.S. Standard Sieve (USSS)
GTG Granulation thru Number 60 U.S. Standard Sieve (USSS)

GTH Granulation thru Number 7 U.S. Standard Sieve (USSS)
GTI Granulation thru 3/8 Inch U.S. Standard Sieve (USSS)
GTJ Granulation thru Number 6 U.S. Standard Sieve (USSS)
H2O Water Volume
HAL Total Quantity of Halogens contained in the shipment
HAR Hardening Rate
HAZ Haze
HCG Horizontal Center of Gravity
HCH Distance to Endpoint
HCI Emission Factor
HCJ Heat Content
HCK Pollutant Emission
HCL Population
HCM Release Duration
HCN Released Quantity
HCO Release Rate
HCP Sulfur Content
HCQ Wind Speed
HCR Acute Toxicity
HCS Chronic Toxicity
HCT Discharges
HCU Effectiveness
HCV Fertilization
HCW Samples in Compliance
HCX Toxicity
HEX Hexanal
HHW Hemispherical Point
The point at which the cone has fused down to a hemispherical lump at which point the height is one half the width of the base as shown by the fourth cone
HIB High Boilers
The components of a mixture which boil at a higher temperature than the rest of the mixture
HOC Heat of Combustion
HSH Hydrogenated Starch Hydrolysates
A mixture of several sugar alcohols. A type of sugar substitute.
HTE Heat Equivalency
HVM Heavy Metals
The metals of atomic weight greater than sodium that form soaps of reaction with fatty acids
HWS Softening Point
The point at which the cone has fused down to a spherical lump in which the height is equal to the width at the base
HYD Hydroxyl Number
The alkalinity of oil, fat, wax or other substances
HYP Hydroxyporpylcellulose
HZC Hazardous Component

IDE Identification
The distinguishing characteristics of a material for verification purposes

IGA Autoignition Temperature

IGR Input Gas Rate
Volume of gas input during a 24-hour test period

IHV Inherent Viscosity

IMA Impact Adhesion
Visual observation rating zinc adherence after using a dropped ball

IMP Impurities
The amount of components other than the major or active components in an item

INC Incremental Items
The item synchronization calculation is based upon the items added to the customer's catalog.

IND Initial Deformation Point
The point at which the first rounding of the apex of the cone occurs

INS Insolubles
The residue remaining after dissolving an item in a solvent

INV Invertase

IPI Primary Irritation Index

IRA Inclusion Rating
The internal nonmetallic particles in the product

ISF Insoluble Fiber

ISO Isomalt
A type of sugar alcohol used primarily for its sugar-like physical properties. A type of sugar substitute.

ISP Incubated Spindown

ITD Integrated Differential

IXD Index Differential

JA1 Boot Circumference
Measurement of the inside of the boot at the largest part of the upper calf.

JA2 Boot Shaft
Measurement from the middle of the arch up the outsole to the top of the boot shaft.

JA3 Heel Height
Measurement at the outside of the heel, from the middle of the heel to the sole.

JA4 Pant Inseam
Measurement of the inner-leg length of the pants, from the top of the thigh to the bottom of the cuff.

JA5 Shoe Platform Height
Measurement at the outsole, from the foot bed to the sole.

JA6 Sleeve
Measurement of the sleeve from the base of the neck (middle of shoulder) across the shoulder, and down the arm to the bottom of the cuff.

JA7 Waist
Measurement of the circumference of an item as measured around the waist. Any fasteners should be fastened.

JA8 Watch Case Depth
Measurement of the watch case as measured from the top of the bezel to the watch back.

JB1 Watch Case Height
Measurement of the watch case as measured from the top-most point (above the 12) to the lowest most point (below the 6).

JB2 Watch Case Width
Measurement of the watch case as measured from the left-most (left of the 9) to the right-most point (right of the 3).

JB3 Watch Strap Length
Measurement of the watch band/strap from tip to top as laid flat. If the band/strap is one piece, this is also known as the watch band/strap circumference.

JB4 Watch Strap Width
Measurement of the watch band/strap width from side to side from its widest point, as laid flat.

JB5 Back Rise
Measurement from the top of the waistband to the crotch at the back of the pants.

JB6 Bag Strap Drop
Measurement of bag (handbag) shoulder/handle length from the top of the bag to the peak of the strap/handle.

JB8 Circumference
Measurement of the linear distance around the edge of a closed curve or circular object.

JC1 Extended Depth
Measurement of the expanded depth of an item, for items where the item can be expanded. Example includes a duffle bag with closures, which open to allow more contents inside.

JC2 Eyewear Bridge Width
Measurement of the width of the bridge. Measured as worn from the edge of one lens/frame to the edge of the opposite lens/frame, where the eyewear would rest on the nose of the wearer.

JC3 Eyewear Frame Width
Measurement of the width of the frame. Measured as worn from the wearer's temple to the wearer's other temple.

JC4 Eyewear Lens Height
Measurement of the height of the lens, not including the frame. Measured as worn from the wearer's cheek to the wearer's forehead.

JC5 Eyewear Lens Width
Measurement of the width of the lens, not including the frames. Measured as worn from the wearer's nose to the wearer's temple.

JC6 Eyewear Temple Length
Measurement of the length of the temple. Measured as worn from the wearer's temple to the end of the ear wrap/stem.

JC7 Footsies Shoulder to Toe
One piece garment. Measurement from the top of the shoulder to the base of the heel, as measured along the back of the garment.

JC8 Front Rise
Measurement from the top of the waistband to the crotch, at the front of the pants.

JD1 Handle Length
Measurement of a handle from its attachment to the item, to the tip.

JD2 Hidden Platform Height
Measurement at the outsole, from the foot bed to the sole, where the platform is wrapped with material to hide the platform, making it appear as part of the shoe.

JD3 Leg Opening
Measurement of the diameter of the leg opening at the bottom of the pant leg.

JD4 Running Length
Measurement of the longest measurement for the item which comes in contact with a surface (snow, ground, etc.) during normal use.

JD5 Torso Length
Measurement from the neck line to the bottom hem.

JD6 Waist Width
Measurement of the width at the narrowest part of the item.

JD7 Collar Size
Measurement of inside of the neck hole, with the collar fully buttoned.

JOM Jominy Hardenability
The product's hardness and depth of hardening

JUC Juice Content

KPS King Pin Setting
The longitudinal distance between the forward edge of the equipment and the king pin

KVL Strength Coefficient

LAC Lactitol
A type of sugar alcohol used as a replacement bulk sweetener for low calorie foods.

LAI Langlier Index

LAS Lot Acceptability for Shape

LC5 Lethal Concentration, 50% ("LC-50")
The lowest value of concentration which will result in the death of exactly one half of a given biological test population

LCG Longitudinal Center of Gravity

LCT Lactose
Lactose is a sugar found in milk and milk products.

LD5 Lethal Dose, 50% ("LD-50")
The lowest value of dose which will result in the death of exactly one half of a given biological test population

LDH Limited Dome Height (LDH)
Response to simulated drawing operation

LEA Leakers

LEF Leaf
Percentage of leaf in fiber as determined by trash count and trash area

LIP Lipids

LIR Liquid Injection Test Rate
Volume of liquids, such as oil, mud, and water, which are injected into the well during a 24-hour test period

LIS Listeria

LIV Limit Intrinsic Viscosity
The percent of cellulose in a crystalline rather than amorphous form

LLD Light Load

LOI Loss on Ignition
Loss (of material) that occurs when a sample is ignited

LOS Loss on Drying
The amount of material lost after heating to a constant weight at a specified temperature

LOW Low Boilers
The components of a mixture which boil at a lower temperature than the rest of the mixture

LPG Liquefied Petroleum Gas Factor

LPL Labeled Product Life

LPR Line Pressure
Fluid pressure of the production line between the well and the separator unit or gathering line

LRC Lovibond Red Color

LSA Lock Seam Adhesion
Visual observation rating zinc adherence after a lockforming operation

LSK Length Shrinkage
The amount of shrinkage occurring per linear yard of fabric expressed in percentage

LSS Linear Sheet Swelling
The increased size of a sheet of pulp when immersed in caustic during pulping

LTD Liner Top Depth
Depth below the surface of the top of a liner string; liner is a tube within the casing used to separate different strata but does not extend to the surface

MAL Maltitol
A type of sugar alcohol used as a sugar substitute

MAN Mannitol
A type of sugar alcohol used as a sweetener

MAT Maturity
Swelling and compression of fiber

MCN Magnetic Contamination

MDL Method Detection Limit; Minimum concentration of a substance that can be measured and reported with 99% confidence that analyte concentration is greater than zero

MDP Mettler Dropping Point

MEA Media Depth
Depth to surface of medium (water, sediment, soil) being sampled

MEF Meter Factor

MEL Melt Time
The time between the first appearance of liquid and the total disappearance of solid

MEP Meat Protein

MER Efficient Rate-Reservoir
The maximum daily oil or gas withdrawal rate from a hydrocarbon reservoir

MGL Monoglyceride

MHI Highest Torque
Highest torque attained during specified period of time when no plateau or maximum torque is obtained

MIC Micronaire
Fiber fineness; the higher the value, the courser the fiber

MII Mineral Impurities

MIL Milk Fat

MIP Miscolored Pieces

MIS Milk Solids

MLT Minimum Lifespan From Time of Arrival
The period of days, guaranteed by the manufacturer, before the expiration date of the trade

item, based on arrival to a mutually agreed to point in the buyers distribution system.

MNC C22 Monoenoic
A monounsaturated fatty acid consisting of 22 carbons which belongs to omega-9 family of fatty acids

MNL Monolein

MOI Moisture
The amount of water in an item

MON Monetary

MOR Mortality

MPL Monopalmitin

MPO Moisture Protein Ratio

MPR Production Rate-Well
The maximum daily rate of at which oil or gas may be produced from a hydrocarbon well

MPT Many Press Test
Visual inspection for coating defects using a miniature stamping press

MSA Monounsaturated

MSD Must Sell By Days
Used to designate the number of days open dated product must 'sell by' from date of manufacture.

MST Monostearin

MTD Maximum Total Depth
Total distance along the well bore to the final bottom hole location

MTI Farinograph Mixing Tolerance Index

MUL Mullen
The energy required to burst a sheet with one of several standard pluggers

NBR Number of Batteries Required

NEC Net Content
Net Content is the statement on the label which provides the amount of product in the container or package. Example bottle of water contains 500 ML of water.

NEE Non-volatile Ether Extract

NEF Nesting Increments
Indicates the incremental height when 2 trade items are nested together. Example one garbage can in another, height increment 1/2 inch.

NEO Neotame
A derivative of a dipeptide compound of the amino acids – aspartic acid and phenylalanine. An artificial sweetener.

NES Neutralizing Strength

NEU Neutralization Number
The quantity of acid or base required to neutralize basic or acidic constituents in a substance

NIL Nil Ductility Test
The condition required to initiate brittle fracture

NIT Nitrite

NNW Net Net Weight
The weight of an item exclusive of the weight of any shipping packaging and of any additional packaging or attachments such as cellophane wrapping or hangers

NOB Norbixin

NOC Number of Cosigners

NON Non-Volatile Matter
The amount of residue remaining after an analytical process

NOR Number of References

NOS Suggested Number of Servings

NOX NOx Emissions Performance
Difference in exhaust NOx emissions attributed to a gasoline formulation as compared to the 1990 baseline gasoline

NTS Natural Tomato Soluables

NVO Non-volatile Oil

OAP Observed American Petroleum Institute Gravity

OBT Observed Temperature

OCG Oil/Condensate Gravity
Production fluid density relative to the density of water

OCH Other Carbohydrates

OCO Oil Coating

OCR Oil/Condensate Test Rate
Volume of oil and natural gas condensate produced during a 24-hour test period

OCT Optimum Consumption Temperature
Recommended temperature for product consumption

ODR Odor
The quality of a substance that stimulates the olfactory organ

OIL Oil
Liquid, slippery, viscous, relatively nonvolatile chemical

OLA Oleic Acid

OLE Olefins
Hydrocarbons containing double bonds

ORC Organic Carbon
The amount of carbon which is bonded to another carbon or hydrogen or both

OTE Others Each
Identifies the maximum value of any single metallic element not listed in the chemical composition limits standard

OTH Odor Threshold

OTT Others Total
Identifies the total value of all metallic elements not listed in the chemical composition limits standard

OUM Ordering Unit

OXI Oxidizable Substance
Represents the amount of a substance that can undergo oxidation

OXS Oxidizing Substance
A substance which removes electrons from other substances

OXY Oxyethylene

PAA Active Ingredient in Product

PAB Drug Strength

PAC Drug Concentration

PAL Pattern Length
The length of a pattern that repeats on a product

PAR Particle Size
The diameter of solid and liquid particles

PAT Patulin

PAW Pattern Width
The width of a pattern that repeats on a product

PBD Plug Back Total Depth
Well depth after plug back operations to abandon a lower producing horizon or formation

PBR Pure Base Ratio
The amount of chemical in its base form is over the total amount of the chemical. This is the quantitative relation that describes the amount of the base molecule within its salt (i.e. the amount of pure testosterone within testosterone propionate).

PCB Total quantity of PolyChlorinated Biphenyl contained in the shipment

PCC Post Consumer Content
The material discarded by consumers after a product is consumed.

PCO Piece Count

PDE Casing/Liner Tubing Depth
Depth to the bottom of the casing/liner string

PDG Pump Depth from Ground
The distance from the ground surface to the subsurface pump unit

PDH Pattern Drop Horizontal
The measurement of horizontal distance between repeats of a pattern

PDI Protein Dispersibility Index

PDV Pattern Drop Vertical
The measurement of vertical distance between repeats of a pattern

PDX Polydextrose

PEC Potassium Chloride

PEF Performance

PEO Peroxidase

PER Magnetic Permeability
The ease with which a material can be magnetized and how much better it is as a path for magnetic fields than air

PES Potassium Sorbate

PEV Peak Viscosity

PEX Perioxide Value

PFO Perforation Feet Open
Linear distance of all perforations of the well casing string

PGL Polyethylene Glycol

PGM Propylene Glycol Monoesters

PHA pH

PHE Phenol

PHW Hardwood Fiber
The amount of threadlike, primarily cellulosic material derived from the wood portion of hardwood trees

PIC Pick Off

PIP Piperine

PLM Preliminary Volume

PMW Total Packaging Material Weight
This is the weight of all product packaging, inclusive of component packaging, when present

POC Completion

POD Physical Description - Outer Diameter

POL Polariation

POP Pour Point
The lowest temperature at which an oil is observed to flow when cooled

POR Propylene Oxide Residue

PPS Proprietary Shade
Identifies to customers when a textile company is using the customer's proprietary shade code versus the standard industry shade code

PQL Practical Quantitation Limit; Lowest concentration of a substance which can be consistently determined within +/- 20% of the true concentration by 75% of the laboratories tested in a performance evaluation study

PRA Proportion Alive

PRE Prior Experience

PRF Pressure Factor

PRG Propylene Glycol

PRI Product Index

PRL Product Level

PRN Proportion Normal

PRO Processability
A rating of the ability to process

PRQ Product Reportable Quantity

PRY Porosity

PRZ Proportion Fertilized

PSA Percent Solution Actual

PSP Past Performance

PSR Pesticide Residuals

PSW Softwood Fiber
The amount of threadlike, primarily cellulosic material derived from the wood of softwood trees

PUN Pungency

PWA Processed Waste

PWE Physical Description - Weight

PWF Power Factor

QUR Reportable Quantity

QUS Quick Sog

R10 Relative Fraction of Pure Long-Chain Cellulose
The ratio by weight of pure long-chain and degraded cellulose to pulp where cellulose molecules of various chain lengths occur

R18 Relative Fraction of Total Cellulose
The ratio by weight of total cellulose to pulp

RAD Radius

RAF Roof Adjustment Factor

RAL Residual Alcohol

RCC Recycled Content
The material that is made from recycled content.

RDS Reducing Sugars

REA Reactivity
The rate at which a substance reacts or the amount of substance that reacts

RED Reducing Substance
A substance which donates electrons to other substances

REF Refining
The severity of mechanical processing stage expressed by the amount of energy applied and length of time product is retained within equipment

REH Rehydration

REI Refractive Index
The ratio of the velocity of light in a vacuum to the velocity of light in the liquid

REL Reflectance
The fraction of the total radiant flux incident upon a surface that is reflected and that varies according to the wavelength distribution of the incident variation

REO Residual Ethylene Oxide

RES Resistance
The property of a conductor causing electric energy to be transformed into heat; equal to the voltage across the conductor divided by the electrical current flowing in the conductor; measured in ohms

RNU Recommended Number of Uses

ROH Rear Over-Hang of Vehicle

ROI Residue on Ignition

ROX Oxygen from a Renewable Oxygenate

RSZ Roll Size

RTB Reporting Temperature Base

RUD Usage Deviation (Applies to Kilowatt Hours, Kilowatt Demand and Reactive Demand)

RVP Reid Vapor Pressure

S10 Pulp Impurities
The percent hemicellulose polysaccharides and degraded cellulose in pulp fibers

S11 Salt

S12 Start
Identifies a value measured at the start of a testing process or range of test results

S18 Hemicellulose
The percent hemicellulose polysaccharides in pulp fibers

SAB Sodium Acid Pyrophosphate (SAPP) by Boyd Method

SAC Sodium Ascorbate

SAH Sodium Acid Pyrophosphate (SAPP) by Humidified Boyd Method

SAK Sodium Acid Pyrophosphate (SAPP) by Chittick Method

SAL Salinity; Salt level in a sample of seawater

SAP Saponification Number
The number of milligrams of potassium hydroxide that is consumed by 1 gram of sample

SAS Saturated Fatty Acid as Stearic

SBE Sodium Benzoate

SBI Sodium Bicarbonate
SBR Sodium Bicarbonate Release
SBU Sodium Bisulfite
SCH Schedule
SDC Color Strength
SDV Surface Starch
SER Number of Servings
SEV Severity
SFA Solid Fat Index at 104 F
SFB Solid Fat Index at 50 F
SFC Short Fiber Content
SFD Solid Fat Index at 80 F
SFE Sodium Ferrocyanate
SFG Solid Fat Index at 92 F
SFJ Solid Fat Index at 70 F
SFO Solid Fat Content
SGW Stacking Weight
The maximum admissible weight that can be stacked on the trade item
SHA Shelf Life
SHE Shell
SHU Scoville Heat Units
SHW Shipping Weight per Pricing Unit
SIL Silica (Silicon Dioxide)
SIZ Size
SKF Stacking Factor
Identifies the number of levels the product may be stacked.
SLD Solderability
A measure of the ability of a material or component to be soldered
SLI Slagging Index
The result of a procedure for obtaining information regarding the accumulation of ash deposits on radiant heat exchange surfaces in the furnace
SLL Salmonella
SLU Selling Unit
SMB SAM-B Rating
Measures cleanliness of steel for critical parts as to B-oxide volume in the steel
SMD SAM-D Rating
Measures cleanliness of steel for critical parts as to D-oxide volume in the steel
SOA Soda
SOC Sodium Acid Pyrophosphate
SOD Solids
The non-volatile material remaining after an analytical process
SOF Softening Range
The temperature range in which material without a melting point goes from a rigid to a soft condition

SOR Sorbitol
A type of sugar alcohol with a sweet taste which the human body metabolizes slowly

SPA Saturated Fatty Acid as Palmitic

SPG Specific Gravity

SPH Sphere

SPR Separator Pressure
Operating pressure of the oil/water/gas separating unit

SPS Static Pressure

SQT Serving Quantity
Number of servings and units contained in the package.

SRO Specific Rotation

SSA Sodium Silico Aluminate

SSJ Serving Size

SSK Serving Size Weight

SSS Suggested Serving Size

STA Stability
The property of a chemical compound which is not readily decomposed and does not react with other compounds

STF Calories from Saturated and Trans Fats

STL Short Term Exposure Limit

STO Storage Handling Temperature

STP Staple
Conventional method of measuring fiber length as pulled by hand

SUC Sucrose

SUL Sulfite

SUM Suspended Matter
The mixture of fine, non-settling particles of a solid within a liquid or gas

SUP Suspended Pulp

SUR Surface Roughness

SUS Suspended Solids

SUT Surface Tension
The force acting on the surface of a liquid which tends to minimize the area of the surface

SVL Survival

SXS Sodium Sulfate

SXX S10 Minus S18 Value
The percent degraded cellulose in pulp fibers

T50 T50
Temperature at which 50% of the volume of a mixture being distilled has been evaporated

T90 T90
Temperature at which 90% of the volume of a mixture being distilled has been evaporated

TAC Tartaric Acid

TAS Taste
The chemical sense by which flavors are perceived depending on taste, tactile, and warm and cold receptors in the mouth, as well as smell receptors in the nose

TCL Tire Tread Contact Length

TCR Temperature Control Range

TDD Total Sugar (Dry)

TDP Perforation Top Depth
The depth from the ground surface to the top, or shallowest, portion of the well casing perforations

TEE Autodecomposition Temperature

TES Storage Temperature

TET Transportation Temperature
Specifies the temperature requirement of the product when being moved from one place to another and under the control of the carrier.

TEW Test Weight

TEX Texture
The property of a solid substance which is dependent on the size, form, order, and grouping of the smaller parts of which it is made and the way in which these parts are united

TIA Titratable Acidity

TIC Total Items
The items synchronization calculation is based on the total number of items in the customer's catalogue.

TOA Aquatic Toxicity

TOR Torque
A force that produces rotation or torsion

TOT Total Aldehyde Content

TOX Toxic Emissions Performance
Difference in exhaust toxic emissions attributed to a gasoline formulation as compared to the 1990 baseline gasoline

TPE Farinograph Time to Peak

TPF Temperature Factor

TPL Tubing Pressure - Flowing
Fluid pressure within the inner tubing used to isolate different production streams from the surrounding well while production is flowing from the well; measured during well testing and completion operations

TPP Tryptophan
An alpha-amino acid that is used in the biosynthesis of proteins

TPQ Threshold Planning Quantity

TPS Tubing Pressure - Shutin
Fluid pressure within the casing, the outermost tubing used to isolate the well from the surrounding geology, with the well annulus closed; measured during well testing and completion operations

TRA Trash Area
The number of pixels dotted by trash

TRC Trash Count
Amount of trash in the court fiber

TRD Tire Diameter

TRN Transmittance
The fraction of the emitted light of a given wavelength which is not reflected or absorbed but passes through a substance

TRP Tricalcium Phosphate

TRS Transmissivity; Measure of the quantity of light that passes through a given volume of seawater; also used to measure turbidity and to estimate plant growing zones in the ocean

TRT Transmissivity Pathlength; The length of the path taken to arrive at transmissivity measurements

TSO Total Solids

TSZ Trim Size

TTC Total Carbohydrates
Denotes Total Carbohydrates

TTL Trailer Tongue Length

TTR Tesla Tolerance Rate

TUR Turbidity
The extent of cloudiness in an item in which colloidally dispersed particles are present

TVD Maximum True Vertical Depth
Total vertical distance from a surface location directly above the bottom hole location

TVO Total Volatiles

TWD Tire Width

TYR Tyrosine
Tyrosine, or 4-hydroxyphenylalanine, is one of the 20 standard amino acids that are used by cells to synthesize proteins.

UCB Cube
The external cubic dimensions of a specified product

UNA Unipunch Adhesion
Visual observation rating zinc adherence after a die punch

UNI Uniformity
The degree of uniformity of fibers in a sample

UNK Unknowns
Substances that are quantitated but of unknown identity

UPW Units per Weight

VAD Vapor Density

VAL Vanillin

VAN Vanilla

VAP Vapor Pressure

VBA V-Bend Adhesion
Visual observation rating zinc adherence after peeling tape from a bent coupon

VCG Vertical Center of Gravity

VIA Vitamin A Palimate

VIN Vinyl
A chemical having the vinyl group CH2=CH-

VIS Viscosity

VOA Volatile Oil Ash

VOC VOC Emissions Performance
Difference in exhaust VOC (Volatile Organic Compounds) emissions attributed to a gasoline formulation as compared to the 1990 baseline gasoline

VOI Volatile Oil

VOL Volume

VOM Vomitoxin

VOT Volatiles
The gas or vapor material given off by an item under defined conditions

VOV Volatiles by Volume

VOW Volatiles by Weight

VRE Vitamin A Retinol Equivalent (RE)
The vitamin A content of a food as measured in "micrograms of retinol equivalents," or "micrograms RE"

VSO Volume Split to Others

VWT Volume Weight

WAB Water Absorption

WAC Water Activity

WAT Water
Water is an inorganic, transparent, tasteless, odorless, and nearly colorless substance.

WDE Water Depth
The depth of the water at an offshore location; measured from sea or lake bottom to the mean tidal level

WDR Weight Density Ratio
The ratio of the weight of a body to its volume

WEL Weight Loss
The amount of substance by weight that a material loses when subjected to specified conditions

WHT Whip Test

WIN Water Insolubles

WML Weight of Moisture Loss

WMP Wiley Melting Point

WOD Water-Oil Distribution Coefficient
A measure of the miscibility of oil and water

WPF Wellhead Pressure-Flowing
The pressure as measured at the wellhead of a hydrocarbon well during a flow test

WPL Water/Product Level

WPN Whey Protein Nitrogen

WPP Weight Per Piece

WPS Wellhead Pressure Shutin
The pressure as measured at the wellhead of a hydrocarbon well during a shutin condition

WRA Water Test Rate
The volume of water produced during a 24-hour test period

WSK Width Shrinkage
The amount of shrinkage occurring per yard in the width of fabric expressed in percentage

WSO Water Solubles

WTB Water/Tank Bottom Level

YPE Yield Point Elongation
The amount of extension which occurs between the upper yield point and the point at which the load begins to rise steadily again

XYL Xylitol
A type of sugar alcohol that is used as a food additive and sugar substitute

ZAL Aluminum

ZAS Arsenic
ZBI Bismuth
ZBT N-Butane
Relative concentration of N-Butane in the gas stream being measured
ZBZ Benzene
ZCA Calcium
ZCB Columbium
ZCC Calcium Chloride
ZCD Carbon Dioxide
Relative concentration of carbon dioxide in the gas stream being measured
ZCE Cerium
ZCM Carbon Monoxide
ZCO Cobalt
ZCR Chromium
ZCS Calcium Sulfate
ZCU Copper
ZDA Titanium Dioxide Assay
ZET Ethane
Relative concentration of ethane in the gas stream being measured
ZFE Iron
ZFL Newspaper--Full Page
ZFS Iron plus Silicon
ZGE Germanium
ZHP Heptane
Relative concentration of heptane in the gas stream being measured
ZHS Hydrogen Sulfide
Relative concentration of hydrogen sulfide in the gas stream being measured
ZHX Hexane
Relative concentration of hexane in the gas stream being measured
ZIB I-Butane
Relative concentration of I-Butane in the gas stream being measured
ZIP I-Pentane
Relative concentration of I-Pentane in the gas stream being measured
ZMG Magnesium
ZMN Manganese
ZMO Molybdenum
ZMT Methane
Relative concentration of methane in the gas stream being measured
ZNB Niobium
ZNI Nickel
ZNP Neo-Pentane
Relative concentration of neo-pentane in the gas stream being measured
ZOC Octane
Relative concentration of octane in the gas stream being measured
ZPB Lead

ZPP Propane
Relative concentration of propane in the gas stream being measured

ZPT N-Pentane
Relative concentration of N-Pentane in the gas stream being measured

ZSB Antimony

ZSD Sulfur Dioxide

ZSE Selenium

ZSG Added Sugars

ZSI Silicon

ZSN Tin

ZTA Tantalum

93 Shipping Unit Component
In material handling and containers, any designed component of a fixture or container, typically detachable from the base unit for empty return or cleaning, which provides rigidity, stability, or security when loaded; such components are an integral part of the container or shipping device and are essential to its functionality
94 Type Spinning
Spun yarn can be manufactured on different types of spinning equipment, i.e., Ring Spun, Open End Spun, Air Jet, etc.
95 Wax Code
Yarns are purchased waxed and unwaxed
96 Electronically Cleaned
Real Time manufacturing monitoring process
97 Conditioned Code
Indicates if yarn has been conditioned to hold moisture
99 Precautionary Instructions
9A Manufacturing Method
9B Product Application
9C Engine
9D Transmission
AA Assembly Required
AB Construction
AC Consumer Instructions
AD Shelf Tag
AE Fragrance
AF Editor
Person identified in that capacity (instead of author)
AG Translator
Person identified in that capacity (usually in addition to the author)
AH Material
AI Nutrition
AJ Recycle
AK Silhouette
AL Discharge
AN Anaerobic Spores
AR Allergen
AS Aerobic Spores
AT Process Action Taken
The function performed as a result of a production operation by the sender of the data
B8 Bureau of Alcohol, Tobacco and Firearms Class Code
Categories of broad definitions and characteristics for different compositions or "classes" of

alcoholic beverages (i.e., Whiskey, Brandy, Vodka)
SEE CODE SOURCE 321

BC Behind-the-Counter Drugs

BE Benefits

BF Backflush Item Process

BL Blocked Stock
Non-shippable product classification

BW Basis Weight Size

C2 Controlled Substance - Class 2

C3 Controlled Substance-Class 3 (Narcotic)

C4 Controlled Substance - Class 4

C5 Controlled Substance - Class 5

C6 Controlled Substance-Class 3N (Non-narcotic)

CD Collateral Description

CG Color Grouping
A color grouping that pertains to a product.

CH Chassis

CL Color - Lower Body

CM Compliance Method
Identification of a set of equations used to predict a fuel's emissions performance based on parametric inputs

CN Collection Name
Name of the product collection to which the product belongs

CO Collection Method Code

CP Coupling
In piping, a metal collar with internal threads used to join sections of threaded pipe

CS Coating or Paint System Code
A code established by the coating/paint manufacturer that identifies a procedure used to apply the coating/paint; used in conjunction with a paint manufacturer name or system name

CU Color - Upper Body

CW Coating or Paint System Name

DE Drug Efficacy Study Implementation

DF Dosage Form
A description of the product's physical form, such as caplet, tablet, or capsule

DG Dangerous Goods Packing Group

DI Diet Type

DM Dimensional

DP Drug Product Identification

DR Direct Item Process

DS Drug Schedule
SEE CODE SOURCE 894

DT Dangerous Goods Technical Name

EC Escrow Code
Indicates whether or not a policy is being escrowed by a mortgage
SEE CODE SOURCE 264

EN Engine with Transmission

EQ Equipment

EV Environmental Requirement

FA Failure Analysis Process
Physical construction analysis that typically determines the root cause of a product failure

FC Fold Configurations
The orientation and sequencing of folds

FL Fuel
SEE CODE SOURCE 558

FP Foodservice Program

FQ Quality
The base product that results in a different grade; also known as a product line, e.g., Cognac can be Classico, V.S., VSOP, or XO

GD Grain Direction

GE Genetically Modified Ingredients

GM General Merchandise

GS Goods

HB Health and Beauty Aids

HY Hydraulics

HZ Hazardous Material

IC Individual Component

KI Kit

LA Label Name
Product style name that is printed on the product

LC Lead/Copper Sample Type

LO Coordinate Description Code
An industry code that locates a coordinate upon a surface

LS Local Source
Identifies the name of the local source of the product as marked on its label.

M1 Method of Catch

MA Material Status, Outside Processor
Material status of product assigned by the outside processor

MB Marking

MC Markings Front

MD Markings Back

ME Markings Alternate

MM Multi-Media

MS Medical Supplies

NH Non-Hazardous Material

OC Options
Details value added characteristics of a vehicle
SEE CODE SOURCE 854

OD Odorized

OR Orientation
The relationship of the back printing on a form to the front printing on the same form

OT Over-the-Counter Drug

P6 Percentage of Alcohol
The percentage of alcohol as measured against the total volume of a product such as cordials, liqueurs, cocktails, highballs, bitters and other such specialty alcoholic beverages

PC Product Classification

PD Physical Form: As Diluted

PF Physical Form: Concentrate

PG Program
A set of process conditions used to produce Oxygenated program reformulated gasoline

PL Product Type
Identifies product as custom, branded or private

PP Process/Production Unit

PR Manufacturing Process
Production operations performed on the product being reported

QI Quality Inspection Stock
Products that are managed using a Quality Inspection process

R3 Proof
Strength of a liquor as measured in proof spirit where 50% alcohol by volume is equal to 100 proof

RA Route of Administration
The way a medicine is given to or taken by the patient

RG Return Goods

RM Results Method Code

RR Rejection Reason

RT Returnable

RX Prescription Drug

SB Sub-Brand

SC Source
SEE CODE SOURCE 558

SE Services

SF Service Feature
SEE CODE SOURCE 495

SH Trade Item Shape Description

SS Serving Suggestions
Value add characteristic of the product

ST Sample Type

TC Therapeutic Class
A way of categorizing medicines

TE Therapeutic Equivalency Evaluation
When there is more than one source for a drug that is identical by its active ingredients, the FDA publishes a rating of each source's therapeutic equivalence in order to aid state formularies to choose effective drugs to prescribe at lower costs to the insurer, state and consumers

TF Filtering
Type of filter used in processing

TP Typeface
The design of the characters in a font

TR Trimming

TZ Bureau of Alcohol, Tobacco and Firearms Type Code
A subcategory of the Bureau of Alcohol, Tobacco and Firearms Class Code; it is a more detailed and descriptive term that further defines the class of an alcoholic beverage, i.e. "Irish Whiskey" as opposed to "Whiskey"
SEE CODE SOURCE 321

UN Unscheduled Drug

UR Unrestricted Stock
No restrictions

VA Vehicle

VC Volatile Organic Compound Control
A set of process conditions used to produce VOC controlled reformulated gasoline

VI Vintage
The harvest year of the grapes that are part of the composition of a particular wine

VR Variant
The distinguishing characteristics that differentiate products with the same brand and size

WD Warranty Description
The warranty description for the final consumer, which the retailer needs to keep on file, in case the consumer has a claim against the warranty

WF Wine Fruit
The fruit used as a base to produce a wine, e.g., apple, blackberry

WT Waste
SEE CODE SOURCE 558

ZZ Mutually Defined

AA1 Composition Claim Made With

AA2 Composition Claim Natural Ingredients

AGE Age
The period during which, after distillation and before bottling, distilled spirits have been stored in oak containers

BCC Beverage Contents Characteristics, (e.g., Kosher, No Sulfites, etc. (Industry List)

BES Beverage Segment
A description to designate a grouping of products that are similar in flavor, quality, price, age, proof or any combination, e.g., standard scotch or deluxe scotch

BEV Beverage Category
A description to designate the category the beverage falls into, e.g., blends, bourbons, scotch, vodka, gin

BHZ Biomedical Hazard

BLM Bottomhole Location Method Code

BND Brand Group
Products similar in name only, but of different size, age, proof, quality and flavor

BPI Bottomhole Pressure Method Indicator Code

BRG Brand Group: A grouping of similar brands, (e.g., Johnnie Walker)

BRN Brand Name

BTT Battery Type

CCN Common Chemical Name

CFC Company Field Code

CHF Chemical Family

CLT Casing/Liner/Tubing Type

CMS Commercial Status
Material status assigned by the commercial department

DAC Damage Code
Type of damage

DAF Damage Fault
Party responsible for damage

DIR Directional Indicator
The type of well characterized by the way in which it was drilled; code values contained in the WODEX implementation guide available from the American Petroleum Institute

EBC Description of Goods and Services

FCD Field Code (EIA/DOD)

FDD Forecast Deviation

FLV Flavor
Distinctions from the base product that result in different taste or flavor, e.g., citrus, pepper

FMR Formula

FUN Functional Name
Identifies the functional name which describes the product's generic purpose

GEN General Description

GRM Growing Method

HZR Hazard Rating System
A system for both classifying and measuring hazardous characteristics of materials

IML Image Link

ING Ingredient

INJ Injectables

LSC Label Storage Conditions

MAC Material Classification
Class of material, e.g. prime, secondary, etc.

MBU Minerals Management Service/Bureau of Land Management (Indian Land) Property/Unit Number
Numbers assigned to a property or unit by federal agencies, such as the Minerals Management Service or Bureau of Land Management, if required

MCL Material Color

MSG Market Segment
General market classification for which a product is intended

ODR Odor

PER Program Performance

PFA Physical Form

PFC Perforation Continuity Indicator
Well perforation top and bottom depths

PFG Physical Form: Gas

PFI Perforation Interval(s)
Identification of specific perforations in the well bore; codes assigned by the operating company

PFK Physical Form: Aerosol

PFL Physical Form: Liquid

PFM Physical Form: Emulsion

PFN Physical Form: Semisolid
PFP Physical Form: Powder
PFS Physical Form: Solid
PFT Perforation Type
PKG Packaging Materials
PRC Primary Component
PRI Grape Variety
The grape that comprises the largest percentage of the ingredients used in wine production, e.g., Merlot
PRO Proprietary
PSC Pipeline Stream
PTC Preparation Type
PUB Public Information
PUR Pure Form
QAS Quality Assurance Status
Material status assigned by the quality assurance department
RCC Reservoir Code (Company)
A company-assigned number which identifies the producing formation, or formation into which injection is taking place
RPN Regulated Product Name
The product name provided by the seller in adherence with laws, regulations, or administrative provisions applicable in the country.
RSD Regulatory (State) District
State-assigned code for each producing district
RSE Regulatory (State) Entity Code
State-assigned codes for each producing entity (lease or property)
SEC Secret or Confidential Information
Trade secret information available only to those who have agreed to non-disclosure
SEM Semi-Finished Goods
SIZ Sizing
A material added to yarn prior to weaving strands of yarn into a fabric; sizing improves the weaving ability of yarn
SLM Surface Location Method Code
SOL Solubility
STL State Controlled
SUP Packaging Support Materials
SYN Synonym
THR Threshold
TIF Title Insurance Form
TIR Tire
TIU Trade Item Unit Indicator
TRM Test Remarks
TRN Trade Name
TWF Theoretical Weight Formula
Used to calculate a material weight
WLC Well Classification

WS1 Variable Weight Scale Line 1
The first line description printed on a weight scale generated label.

WS2 Variable Weight Scale Line 2
The second line description printed on a weight scale generated label.

WTT Well Test Type

751 - Product Description Code

A code from an industry code list which provides specific data about a product characteristic

TYPE=**AN** MIN=**1** MAX=**12**

CA Certificate of Analysis
CB Chiropractic Justification
Lists the reasons chiropractic is just and appropriate treatment
CC C.A.A. Certificate of Conformance (British CAA)
CD Customer/Distributor Inventory Report
CE Constable Report
CF Capability
CG Certificate of Origin
Certified document that shows the national origin of goods, is presented to customs authorities upon their importation; in some cases, it is necessary that they be legalized by a consul of the country of destination; in some cases, they may be certified by a stateside organization such as a local chamber of commerce
CH Certificate of Weight
A list itemizing the material in each package; indicates the type of package; shows the individual net, tare, and gross weights for each package; shows the batch number for each package
CI Certificate of Inspection Report
CJ Complications Document
CK Consent Form(s)
CL Cable
Required sometimes to bank advising shipping information and details of invoice; required sometimes to be sent to customer when insurance is covered by buyer; is required usually on China shipments
CM Customer/Manufacturer Inventory Report
CN Customer's Report of Nonconformance
CO Consignment Order
CP Certificate of Compliance (Material Certification)
CQ County Record
CR Letter of Credit
A written undertaking of a bank (issuing bank) acting at the request and on the instruction of its customer (the applicant for the credit) to make payment to, or to the order of, a third party (beneficiary), pay or accept drafts drawn by the beneficiary, or authorize another bank to effect payment or to pay, accept or negotiate drafts against stipulated documents; terms and

conditions of the credit must be complied with before payment, negotiation, or acceptance can be made

CS Consigned Inventory Sales Report

CT Certification

CU Customer Notification Letter

CV Change of Hospice Benefit
Includes revocation

CW Corrective Work Order

CX Cost/Schedule Status Report (C/SSR)
Contract status report showing budget, performance, actual, cost variance, schedule variance, budget at complete, estimate at complete, and variance at complete at specified levels of the work breakdown structure

CY Contract Funds Status Report (CFSR)
Status report for funds appropriation including commitments, actual cost, forecast of billings, and estimated termination costs

CZ Campus Police Report

D2 Drug Profile Document

DA Dental Models
Cast of the teeth; they are usually taken before partial dentures or braces are placed

DB Durable Medical Equipment Prescription
Prescription describing the need for durable medical equipment; it usually includes the diagnosis and possible time period the equipment will be needed

DC Distributor/Customer Inventory Report

DD Distributor Inventory Report

DE Certificate of Quality
Certification, in the form of a letter, that product complies with the quality specifications in the letter of credit; may also state that packing is suitable for long distance travel

DF DA59 Special Customs Invoice for South Africa

DG Diagnostic Report
Report describing the results of lab tests x-rays or radiology films

DH Nitrogen Certificate
A statement that lines were plugged with nitrogen prior to loading and a blanket of nitrogen was placed on top of product after loading to assure that the product stays dry and oxygen free

DI Directory
Reports that provide information about a subject, name, product, etc

DJ Discharge Monitoring Report

DK Drawback Affidavit

DL Draft and Transmittal Letter
Written order by the drawer (exporter or principal) directing the drawee (importer) to make payment at sight or at a determinable future date

DM Distributor/Manufacturer Inventory Report

DN Deviation/Nonconformance Test Results and Request for Action

DQ Delinquency

DR Datalog Report

DS Discharge Summary
Report listing the condition of the patient upon release from the hospital; it usually lists

where the patient is being released to, what medication the patient is taking and when to follow-up with the doctor

DT Department of Transportation

DU Commercial

DV Condominium

DW Drawing(s)

E1 Exporter's Certificate and Agreement

EA Electrical Average Outgoing Quality Report

EB Explanation of Benefits (Coordination of Benefits or Medicare Secondary Payer)
Summary of benefits paid on the claim

EC Engineering Change Order

ED Environmental Exposure Document

EH Election of Hospice Benefit
Includes selection of benefit and physicians' certification of terminal illness

EL Eligibility

EP Experimental Material Purchase Order

ER Engineering Change Request

ES Source Selection Plan

EX Shippers Export Declaration
An official document submitted by a U.S. exporter whenever a shipment of merchandise goes from the U.S. to a foreign destination; joint bureau of the Census-International Trade Administration issues this form used for compiling U.S. export control laws

EY Barrel for Barrel Exchange Contract Status Statement

F1 Cost Performance Report (CPR) Format 1
Detailed contract status report including current reporting month values at specified levels of the work breakdown structure

F2 Cost Performance Report (CPR) Format 2
Detailed contract status report at specified levels of the organization breakdown structure

F3 Cost Performance Report (CPR) Format 3
Contract baseline report that summarizes changes to the contract over a given reporting period with beginning and ending values

F4 Cost Performance Report (CPR) Format 4
Contract resource summary report that forecasts labor requirements for the remainder of a contract

F5 Cost Performance Report (CPR) Format 5
Contract summary or detail report explaining significant cost or schedule variances

F6 Transportation Carrier Inspection Report

F7 Government Inspection Report

F8 Inspection Waiver (Written)

F9 Inspection Waiver (Oral)

FB Federal Bureau of Investigation

FC Fumigation Certificate

FD Federal Specification Compliance

FE Federal Emergency Management Agency

FH Limitation of Heavy Elements

FI Fire Report

G7 License Copy
GP Gas Processor's Report
GT Gas Transporter's Report
HC Health Certificate
HI Hazardous Material Incident
HP History and Physical
HR Health Clinic Records
HW Hazardous Waste Manifest
I2 Consular Invoice
Document required by some foreign countries; describes a shipment of goods and shows other information such as the consignor, consignee, and shipment's value; used by the country's customs officials to verify the value, quantity, and nature of the shipment, and certified by a consular official of the foreign country
I3 Customs Invoice
A few countries require the use of a special invoice form; usually in place of a seller's commercial invoice, this form requires all of the usual data required in a commercial invoice; if the shipment is being made to a customer, a commercial invoice will still be mailed to the customer
I4 Forwarder's Invoice
The invoice the forwarder receives from shipper and completes by adding ocean freight amount, vessel name, sailing date, estimated time of arrival, FOB amount, etc.
I5 Immunization Record
I6 Carrier's Invoice
IA Insurance Attachment
A sheet that states shipments made from one date are covered under an open cover policy, up to $2,500,000
IC Insurance Certificate
Required when the seller provides ocean marine insurance; the certificate is a negotiable document; must be endorsed before it can be submitted to the bank
IM Import License
Some national governments issue and require this document to authorize imports into their countries
IN Inspection Request
IP Inventory Parameter Report
IR State School Immunization Records
IS Index System

IT Certified Inspection and Test Results
IU Inspection Result

MQ Report of Establishment, Modification, or Cancellation of Maintenance Period
MR Material Inspection and Receiving Report
MS Material Safety Data Sheet
MT Models

MV Metered Volumes
The result of measurements of the gas flow through a pipe at a specific physical location

MZ Motor Vehicle Report

NA National Insurance Crime Bureau Assignment

NC Certificate of Quantity
Certification, in the form of a letter, that the quantity invoiced agrees with the quantity shown on the packing list; certificate of quantity may be included with the certificate of quality

ND Commercial Invoice
A bill for goods from the buyer to the seller; should include basic information such as description of the goods, address of shipper and seller, delivery and payment terms, etc.; buyer needs invoice to prove ownership and to arrange payment; used by some governments to assess customs duties; serves as the basis in preparing all other documents covering the shipment

NI National Insurance Crime Bureau

NL National Insurance Crime Bureau Total Loss

NM Monthly Contractor Financial Management Report

NN Nursing Notes
Notes kept by the nurse regarding a patient's physical and mental condition, what medication the patient is on and when it should be given

NO National Insurance Crime Bureau Other than Theft

NQ Quarterly Contractor Financial Management Report

NR NOx Emissions Averaging Report

NT National Insurance Crime Bureau Total Theft

OB Operative Note
Step-by-step notes of exactly what takes place during an operation

OC Oxygen Content Averaging Report

OD Orders and Treatments Document

OE Objective Physical Examination (including vital signs) Document

OL Ocean Bill of Lading

OP Outside Production Operation Sheet

OR Oil Storer's Report

OS Organization Breakdown Structure

OT Oil Transporter's Report

OX Oxygen Therapy Certification

OZ Support Data for Claim
Medical records that would support procedures performed; tests given and necessary for a claim

RF Reliability Fail Rate Report
RG Residential
RH Bid Bond
RM Request for Manufacturing Engineer Appraisal
RN Supplier's Report of Nonconformance
RO Regular Order
RR Radiology Reports
Reports prepared by a radiologist after the films or x-rays have been reviewed
RT Report of Tests and Analysis Report
RV Reid Vapor Pressure (RVP) Averaging Report
RX Renewable Oxygen Content Averaging Report
S1 Supply and Shipment Status Report
Report contains 100 percent status on stockage and shipment
S2 Supply Status Report
Report contains 100 percent status on stockage
S3 Exception Supply Status Report
Report contains exception status on stockage
S4 Exception Supply and Shipment Status Report
Report contains exception status on stockage and shipment
S5 Product Quality Deficiency Report Category I
A report identifying a product deficiency that has the potential to cause death or injury, or severely restricts combat readiness, or results in a production line stoppage
S6 Product Quality Deficiency Report Category II
A report identifying all product deficiencies not covered by a Category I report
S7 "Walsh-Healey Act" Manufacturer or Regular Dealer
A report required to be rendered by a quoting party when the quote exceeds $10,000.00
S8 Report of Findings
S9 Representation
A statement (report) by a prospective contractor that makes a representation about a specific condition
SA State Police Report
SB Sample Approval and Rejection List
A listing of approved and disapproved cotton bales along with a reading of tests done and reasons for rejection sent by a textile mill to a merchant
SC Sanitary Certificate
Certificate of purity usually supplied by a health department

SD Support Data for a Request for Quote
SE Security Police Report
SF Contract Security Classification Specification
SG Symptoms Document
SH Sheriff Report
SI Seller Inventory Report
SJ Statement of Work

T4 Tax Information
T5 Toxics Emissions Performance Averaging Report
T6 Toxics Release Inventory
T7 Therapy Notes
TA Asset Support Inquiry
An inquiry as to the abilities of an organization to support contingency or operational plans or projects
TB Asset Support Advice
A response detailing the capabilities of an organization to support contingency or operational plans or projects
TC Physical Inventory Request
A request for or notification of a physical inventory action
TD Asset Reclassification Response
TE Asset Reclassification Request
TF Transaction History Request
TG Two to Four Family
TH Total Theft Claim Report
TI Asset Status Inquiry
TJ Asset Status Advice

TK Logistics Transfer Inquiry
An inquiry as to the current status of material transfers between inventory managers

TL Logistics Transfer Advice
A response to an inquiry for the current status of material transfers between inventory managers

TM Stock Sale Report

TN Delayed Sale Report
A standard transaction to establish, reverse, or cancel a backorder

TO Demand Report

TP Treatments Certificate
Form required for New Zealand and Australia that states that the container has been cleaned prior to loading shipment and certifies that no straw, rice hulls, or similar plant materials were used as packing materials

TQ Storage Information Advice

TR Transmittal Letter
The section of information attached to a draft which shows the drawee and address (sold to), draft number (seller's order number), tenor, letter of credit amount, and lists the documents that the bank should get; It also shows the U.S. bank name/address to which the forwarder mails the documents indicated

Y1 Appraisal
Y2 Broker Price Opinion
Y3 Real Estate Property Information
YA Finished Goods Inventory Cover
The amount of finished goods inventory at the stocking location(s) in terms of the estimated daily demand.
YB Forecast Accuracy
The mean absolute percent agreement of the forecast with the actual sales, receipt or shipment quantity, expressed in unit volume or monetary terms
YC Invoice Accuracy
The percentage of seller invoices deemed accurate out of all invoices received.

YD Item Data Synchronization
The percentage of items (including applicable trade item hierarchy) published and sold from the seller that are synchronized by the buyer via the Global Data Synchronization Network (GDSN) or other defined electronic commerce interface.

YE Item Master Data Accuracy
The percentage of items with accurate physically measured dimensions and weight attributes (as provided by the seller) of all items that were physically verified.

YF Markdown
The percentage of monetary sales that were sold below the normal retail price. Includes seasonal clearance, discontinuation, employee discount, response to competitive activity or other retailer-initiated price reductions.

YG On Time Delivery
The percentage of shipments that arrived on the receiver's premises within the agreed date and time, out of all shipments that were delivered. The first scheduled appointment date and time is the recommended agreed date and time.

YH On Time Payment
The percentage of payments made within a seller's terms of sale out of all payments received.

YI Order Item Quantity Change
The percentage of orders placed by the customer in the trading relationship that required changes in items or item quantities prior to release.

YJ Order to Delivery Cycle Time
The average length of time between order placement and the time product arrived and was available for unloading at the agreed customer location.

YK Out of Stock
The percentage of items that is not available at their expected stocking locations out of the set of item stocking locatins that were evaluated.

YL Retail Gross Profit Margin
The average percentage amount a retailer will profit per item or group of items sold to a consumer after deducting operating expenses.

YM Sales Growth
The percentage increase in monetary or unit sales compared to an equivalent time period one year prior to the period being measured.

YN Service Level Fill Rate
The percentage of product that a buyer received or the seller shipped compared to the original ordered quantity.

YP Share
The percentage of sales of a subset of items and/or locations in a broader market context, which can be defined in terms of a product category, class of trade or geography.

YQ Unsaleables
The percentage of products that were removed from the primary channel of distribution due to damage, expiration, discontinuation, seasonality, promotion completion or defects.

YR Retail Item Gross Margin
The average percentage amount a Retailer will earn for an item sold to a consumer before deducting operating expenses.

YS Stock Retention Levels Report
Used to report stock retention levels to a DLA storage activity

ZA Flood Determination Report

ZB Conventional Ammunition Suspension Report
An action that suspends or freezes continued use of a specified quantity of conventional ammunition

ZC Self Monitoring Report

ZZ Mutually Defined

756 - Report Transmission Code

Code specifying timing, transmission method or format by which reports are to be sent

CODE	DEFINITION & EXPLANATION
AA	Quantity Stolen
AB	Quantity Shipped
BS	Bailment Sales Quantity
BT	Transportation Sales Quantity
DG	Quantity Damaged *Total product listed as damaged goods*
HL	Quantity on Hold
LS	Lost Sales
MS	Military Sales Quantity *Total sales of product sales to the U.S. Military*
OF	Off Premise Quantity *Total sales of product to restaurants*
OH	Gross Quantity On Hand
OP	On Premise Sales Quantity *Total sales of product to stores*
OQ	Planned Order Quantity
PA	Production Quantity Adjustment
PO	Calculated Reorder Point
Q1	Quantity Sold (Net)
Q2	Quantity Returned
Q3	Quantity Returned (Defective/Damaged)
Q4	Quantity Ordered
QA	Current Inventory Quantity Available for Shipment or Sale *Indicates the quantity currently available to be sold or shipped*
QB	Beginning Balance Quantity *Opening inventory quantity for the current inventory reporting period*
QC	Quantity Committed *Quantity reserved for orders not shipped*
QD	Additional Demand Quantity
QE	Ending Balance Quantity *Closing inventory quantity for the current inventory reporting period*
QF	Quantity In-bond
QH	Quantity Damaged or On Hold *Quantity of inventory received which cannot be shipped in its present form*

QI Quantity in Transit
Quantity of stock replenishment shipped but not received

QK Quantity Not Listed
Total product not listed as saleable

QL Minimum Inventory Quantity
The minimum inventory quantity for replenishment purposes

QM Maximum Inventory Quantity
The maximum inventory quantity for replenishment purposes

QN Planned Inventory Quantity
To define the planned inventory quantity for replenishment purposes

QO Quantity Out of Stock

QP Quantity On Order, Not Yet Received
Total quantity expected to be received from supplier for current reporting period, but not yet received

QR Quantity Received

QS Quantity Sold

QT Adjustment to Inventory Quantity

QU Quantity Returned By Consumer

QW Quantity Withdrawn from Warehouse Inventory
Total quantity withdrawn from the warehouse for sales purposes, purposes of unsaleability, or as a result of an intracompany warehouse transfer, promotions, etc.

QX Quantity Requested (Will Override Replenishment Planning)

QZ Quantity Transferred

RE Retail Sales Quantity
Total sales of product to retailers

RQ Quantity Returned (Sellable/Resellable)

CODE	DEFINITION & EXPLANATION
0	Hard Wood
1	Aluminum
2	As Specified by the Department of Transportation (DOT)
3	Metal
4	Standard
5	Steel
6	Wood
7	Slip sheet *Typically cardboard or plastic sheets used to hold product for storage or transportation*
8	Soft Wood
9	Blue Plastic
10	Red Plastic
11	Euro Pallet
12	Heat Treated
13	Fiberboard
14	White Wood
15	4-Way Pallet
16	Leased Wood Pallet
17	Half Pallet
18	Leased Plastic Pallet
42	Dolly *A portable, horizontal, rigid platform on wheels or rollers, used as a base for assembling, storing, stacking, handling and transporting goods as a unit, suitable for manually positioning*
47	Intermediate Bulk Container (IBC) Pallet *A Rigid Intermediate Bulk Container (RIBC) that is attached to a pallet or has the pallet integrated into the RIBC. The container is used for the transport and storage of fluids and other bulk materials. The construction of the IBC container and the materials used are chosen depending on the application. There are various types available in the market place: Foldable (collapsible) IBC Container, Plastic composite IBC Container, Wire Cage IBC Container, Steel IBC Container, and Stainless steel IBC Container*
49	Skid *A group of parallel wooden runners attached to the undersides of boxes, crates, and machines to allow entry of platform trucks or fork lift tines*
50	Stringer Pallet *A pallet constructed with boards (stringers) on edge to which the top deck and bottom deck*

boards are attached. The stringers may be notched to facilitate four way entries and lifting by a fork lift or other pallet jacking device

52 Block Pallet
A pallet constructed with blocks at the corners and middle to which three stringers boards are attached with top deck boards attached perpendicular to the stringers. Block pallets can have a variety of bottom deck configurations: no bottom boards, boards parallel to the top deck boards or a full parameter base similar to a picture frame

53 Horizontal Drum Pallet
A rigid platform with integrated restraints to prevent horizontally orientated cylindrical containers from slipping. Horizontal Drum Pallets are used for assembling, storing, stacking, handling and transporting cylindrical containers, e.g. drums, barrels, or kegs, as a unit load, suitable for lifting by a forklift, pallet jack, or other jacking device

54 Vertical Drum Pallet
A rigid platform with integrated restraints to prevent vertically orientated cylindrical containers from slipping. Vertical Drum Pallets are used for assembling, storing, stacking, handling and transporting cylindrical containers, e.g. drums, barrels, or kegs, as a unit load, suitable for lifting by a forklift, pallet jack, or other jacking device

C2 Duplicate Program
C3 Duplicate Contract
C4 Not As Negotiated
C5 Product Missing

C6 Quantity Error
C7 Incorrect Allowance
C8 Incorrect Start Date
C9 Incorrect End Date
CA Reject Due to Crank Arm Application
CB Reject Due to Center Bowls, Plates and Pins
CI Certification Information Does Not Match Patient
CL Complete Loading
CM Released as Railroad Company Material
CN Car Not Ordered
CP Put on Constructive Placement
CR Wrong Consignee
CS Release Load Through Bill Connecting Road
CT Release as a Cross-town Load
CU Equipment Not Used
CW Wrong Car Type
DD Reject Due to Doors
DG Reject Due to Draft Gear - Yoke
DM Dismantle
DP Departed
DR Reject Due to Dirty
DS Defective Safety Devices
DU Duplicate Service Type
DV Reject Due to Load Dividers, Side Filters, Special Equipment
E1 Requested Record Will Not Be Sent; Cannot Identify the Record
We cannot identify the record from the information you provided; please provide additional information or have the student contact us directly to make the request
E2 Requested Record Will Not Be Sent; Need Student or Parent Permission
Institutional policy prohibits release without written permission of student or parent; have student or parent request record from us
E3 Requested Record Will Not Be Sent
Requested record will not be sent; have student contact us to resolve a problem
E4 Requested Record Will Not Be Sent; Never Enrolled
Requested record will not be sent; we have no record that the student ever enrolled
E5 Requested Record Will Not Be Sent; No Degree Awarded
Requested record will not be sent; degree or diploma has not been awarded
E6 Requested Record Will Not Be Sent; No Grades Posted
Requested record will not be sent; grades have not been posted for the current or most recent session
E7 Requested Record Cannot Be Sent Electronically; Record Resides in Paper Format only which Will Be Sent by Mail
E8 Requires Medical Review
EA Empty Equipment Available for Loading
ER Reject Due to Spotted in Error
ET Empty Trailer Flat Release

FD Freight Damage Claim
FR Reject Due to Bad Floor
GI Group Number is Invalid
GM Group Number is Missing
GS Release From Demurrage and Start Storage until Waybilled
HB Reject Due to Handbrake
HH Reject Due to Hand Hold, Ladder, Step, Running Boards, Platforms, etc.
HX Reject Due to Hot Journal Box
IA Invalid Authorization Number Format
ID Releases an Idler
II Industrial Interchange
IP Inappropriate Provider Role
J1 Ambulance Certification Segment Information Doesn't Correspond to Transport Address Segment Information
J2 Mileage Cannot Be Computed Based on Data Submitted
J3 Computed Mileage is Inconsistent with Transport Information or Service Units
KR Reject Due to Couplers
LK Reject Due to Leaking Contents
LS Reject Due to Load Shifted
LW Light Weigh and Restencil
MA Missing Authorization Number
MO Move from Current Spot to Next
MU Missing Number of Units
NC No Certification Information Found
OG Reject Due to Outlet Gate/Valve Lo and Open Hopper
OI Released from Industry to be Inspected
OR Ordered for Replacement
OV Reject Due to Overloaded
PM Preventative Maintenance
RB Released from Industry to Custody of Broker
RD To be Reloaded
RF Reject Due to Refrigeration Unit
RH Reject Due to Roof Hatches
RK Reject Due to Racks (Bi or Tri Levels)
RL Released
RM Requesting Provider Contact Information Missing
RN Bad Order Reinitialing and Numbering
RP Released Partially Unloaded
RS Released Loaded for Line Haul Shipment
RT Run Through Equipment not Spotted
SC Released from Demurrage after being Scrapped
ST Released from Shop Track
SU Reject Due to Superstructure - End, Roof and Sides

SW Local Waybill
T1 Cannot Identify Provider as TPO (Third Party Organization) Participant
T2 Cannot Identify Payer as TPO (Third Party Organization) Participant
T3 Cannot Identify Insured as TPO (Third Party Organization) Participant
T4 Payer Name or Identifier Missing
T5 Certification Information Missing
T6 Claim does not contain enough information for re-pricing
TC Bad Order to Transfer Lading
TD Reject Due to Tie Down Devices
TH Reject Due to Trailer Hitch
TL Reject Due to Train Line, Air Hose, Anglecock
TR Reject Due to Truck, S-Frame, Bolster
UC Reject Due to Uncoupling Rod
UF Reject Due to Underframe - Including Sills
UG Bad Order for Upgrading of Car
UN Invalid Number of Units
WA Reject Due to Wheel/Axle
WK Bad Order Due to Wreck
XR Inquiry Response Type Not Supported
XT Responding System Cannot Process Inquiry Type in Real-time
ZZ Mutually Defined

902 - Section Designator Code

Code specifying the section of a transaction set standard TYPE=ID MIN=1 MAX=1

MANAGEMENT SIMPLE DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE)

E13

TRANSACTION SETS USED IN

868

CODE	DEFINITION & EXPLANATION
D	Detail Area
H	Heading Area
N	No Section Designation
S	Summary Area

903 - Envelope Indicator Code

Code specifying the envelope indicator for the control segments in the interchange order table of the electronic form

TYPE=**ID** MIN=**1** MAX=**1**

MANAGEMENT SIMPLE DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE)

E03

TRANSACTION SETS USED IN

868

CODE	DEFINITION & EXPLANATION
H	Header for the Envelope
N	Not Header or Trailer
T	Trailer for the Envelope

904 - Requirement Designator Code

Code specifying the requirement designator as specified in the standard or standards convention

TYPE=**ID** MIN=**1** MAX=**1**

MANAGEMENT SIMPLE DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE)

E03 E13 E24

TRANSACTION SETS USED IN

868

CODE	DEFINITION & EXPLANATION
C	Conditional
F	Floating
M	Mandatory
N	Not Used By Convention
O	Optional
R	Required by Convention

905 - Maximum Use

Number of times a data segment may appear; the use of 9999999 in the electronic form is to be interpreted to mean >1

TYPE=**N0** MIN=**1** MAX=**7**

MANAGEMENT SIMPLE DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE)

E03 E13

TRANSACTION SETS USED IN

868

906 - Level Number Code

Code indicating the level of the control segment in the interchange order table of the electronic form

TYPE=**ID** MIN=**1** MAX=**1**

MANAGEMENT SIMPLE DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE)

E03

TRANSACTION SETS USED IN

868

CODE	DEFINITION & EXPLANATION
0	Application Data Segment
1	Application Control Segment (e.g., ST/SE)
2	Group Control Segment (e.g., GS/GE)
3	Interchange Control Segment (e.g., ISA/TA1/IEA)

909 - Loop Name

The name of the loop

TYPE=**AN** MIN=**2** MAX=**4**

MANAGEMENT SIMPLE DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE)

E13

TRANSACTION SETS USED IN

868

910 - Loop Repeat Count

Loop repeat count as specified in the standard; the use of 9999999 in the electronic form is to be interpreted to mean >1

TYPE=**N0** MIN=**1** MAX=**7**

MANAGEMENT SIMPLE DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE)

E13

TRANSACTION SETS USED IN

868

911 - Position in Segment or Composite

Relative position of the data element in the segment or composite definition; it is 1 for the data element immediately following the segment ID and is incremented by 1 for each succeeding element to the end of the segment or composite

TYPE=**N0** MIN=**1** MAX=**2**

MANAGEMENT SIMPLE DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE)

E22 E24

TRANSACTION SETS USED IN

868

912 - Relation Code

Code specifying the type of relationship between data elements for the electronic form

TYPE=**ID** MIN=**1** MAX=**1**

MANAGEMENT SIMPLE DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE)

E22

TRANSACTION SETS USED IN

868

CODE	DEFINITION & EXPLANATION
C	Conditional *If first data element appears, then all must appear*
E	Exclusive Use *Only one of the data elements may appear*
L	List Conditional *If first data element listed in the relationship appears, then at least one of the following data elements must appear*
P	Paired *If one data element appears, all must appear*
R	Required *At least one of the data elements must appear*

913 - Data Element Data Type Code

Code identifying the data element type as specified in the standard TYPE=**ID** MIN=**1** MAX=**3**

MANAGEMENT SIMPLE DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE)

E30

TRANSACTION SETS USED IN

CODE	DEFINITION & EXPLANATION
01	Where Air = 1
02	Where Butyl Acetate = 1
03	Approximately
04	Equal to
05	Greater than or equal to
06	Greater than
07	Less than
08	Less than or equal to
09	Where H2O = 1 or Water = 1
10	Not equal to
11	Corrected to 60 Degrees Fahrenheit
12	Where Toluene = 1
13	Vapor in Air
14	Vapor in Other Than Air
15	Standard Temperature and Pressure
16	Conditions Other Than Standard Temperature and Pressure
17	In Ethyl Alcohol
18	In Ethyl Ether
19	In Water
20	At 1 Atmosphere Pressure
21	Where Ether = 1
22	Actual
23	Predicted
24	Air-dried Basis *A condition representative of a partially dried sample*
25	As-received Basis *A condition representative of a sample as it arrived at a laboratory, before any processing or*

conditioning

26 Dry Basis
A condition representative of no moisture in the sample

27 Equilibrium Basis
A condition representative of material in its natural state

28 Moisture and Ash-Free Basis
A condition representative of no moisture and no ash in the sample

29 Oxidizing Atmosphere
The presence of oxidizing gases during testing

30 Reducing Atmosphere
The presence of reducing gases during testing

31 Calculated

32 Scaled Weight
A weight that is taken from a scale rather than calculated

34 Ratchet
Highest previously attained value

35 Saturated Vapor
Measurement applies to the maximum amount of product material that can be held in vapor form without condensing

36 Unconditional
Measurement applies with no further conditions beyond those already specified

37 Short-term
Measurement applies only over the short-term specified

38 Time-weighted
Measurement signifies that the measurement for each event is weighted by the time duration of that event

an American Indian reservation

CA City Tax
Service Tax imposed by City

CB Threshold Tax

CG Federal Value-added Tax (GST) on Goods

CI City Rental Tax
Levied by a city government against the periodic fee paid by a customer in return for the right to use the property of another party

CP County/Parish Sales Tax

CR County Rental Tax
Levied by a county government against the periodic fee paid by a customer in return for the right to use the property of another party

CS City Sales Tax

CT County Tax

CV Federal Value-added Tax (GST) on Services

DL Default Labor Tax

EQ Equipment Tax

ET Energy Tax
Tax applied to the utility and petroleum industries

EV Environmental Tax

F1 FICA Tax

F2 FICA Medicare Tax

F3 FICA Social Security Tax

FD Federal Tax
Usage tax imposed by federal (US and Canadian) government

FF Fuel Super Fund Tax

FI Federal Income Tax Withholding

FL Fuel L.U.S.T. Tax (Leaking Underground Storage Tank)

FR Franchise Tax
Tax imposed by municipality for the right to provide service

FS Fuel Spill Tax

FT Federal Excise Tax

GR Gross Receipts Tax

GS Goods and Services Tax
Canadian value-added tax

HS Public Health and Education Tax
Canadian tax levied to fund public care and education

HT Handicap Tax
Tax assessed to assist the handicapped

HZ Hazardous Waste Tax

LB Labor By Trade Tax

LO Local Tax (Not Sales Tax)
Service tax imposed on a local level

LS State and Local Sales Tax

LT Local Sales Tax (All Applicable Sales Taxes by Taxing Authority Below the State Level)

LU Leaky Underground Storage Tank (LUST) Tax (federal)
Leaky Underground Storage Tank (LUST) Tax (federal); tax imposed in the U.S., at the federal level, for clean-up of leaky underground storage tanks

LV Leaky Underground Storage Tank (LUST) Tax (state)
Leaky Underground Storage Tank (LUST) Tax (state); tax imposed in the U.S., at the state level, for clean-up of leaky underground storage tanks

MA Material Tax

MD Medical Device Tax

MN Minimum Tax

MP Municipal Tax
Service tax imposed by a municipality

MS Miscellaneous State Tax

MT Metropolitan Transit Tax

OH Other Taxes

OT Occupational Tax
Tax imposed on telecommunication companies for the right to provide service

PG State or Provincial Tax on Goods

PS State or Provincial Tax on Services

SA State or Provincial Fuel Tax

SB Secondary Percentage Tax

SC School Tax
Tax collection by taxing authority for schools

SE State Excise Tax
Usage tax imposed by state of provincial government

SF Superfund Tax
Superfund is a U.S. government fund created for the cleanup or eradication of sites at which toxic waste, hazardous to the environment, has been dumped

SL State and Local Tax
State and Local tax funds, exclusive of State and Local Sales tax

SP State/Provincial Tax
State tax levied which excludes sales or excise taxes

SR State Rental Tax
Levied by a state government against the periodic fee paid by a customer in return for the right to use the property of another party

SS State Tax on Specific Labor

ST State Sales Tax

SU Sales and Use Tax
Tax on Equipment and Service provided

SX Enhanced 911 - State Excise Tax
A tax imposed to pay for enhanced 911 services such as automatic call identification

T1 Pre-threshold Tax

T2 Post Threshold Tax

TD Telecommunications Device for the Deaf (TDD) Service Excise Tax
Tax imposed to recover the cost of providing TDD equipment

TT Telecommunications Tax
Tax imposed on telecommunications companies for the right to provide service or usage tax imposed. (This could be an excise tax)

TX All Taxes
Total of all applicable taxes

UL License Tax
Tax used to report the amount of license tax which is passed to the consumer

UT Utility Users' Tax
City or county tax for natural gas usage that is imposed upon customers

VA Value Added Tax

WS Well Service

ZA 911-City Tax
Tax levied to recover the cost of providing 911 emergency services within a city

ZB 911-County Tax
Tax levied to recover the cost of providing 911 emergency service within a county

ZC 911-Excise Tax
Usage tax imposed to recover the cost of 911 service

ZD 911-State Tax
Tax levied to recover the cost of providing 911 emergency service within a State

ZE 911-Tax
Tax to recover the cost of 911 service

ZF Beverage Tax

CODE	DEFINITION & EXPLANATION
S	Positive Indicator

987 - Cryptographic Service Message (CSM) Message Class Code

Code specifying the Message class (MCL) TYPE=**ID** MIN=**3** MAX=**4**

RESTRICTED TO USE IN SECURITY STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

CSM

TRANSACTION SETS USED IN

815

CODE	DEFINITION & EXPLANATION
DSM	Disconnect Service Message
ERS	Error Recovery Service Message
ESM	Error Service Message
KSM	Key Service Message
PKS	Public Key Service Message
RFS	Request for Service Message
RSI	Request for Service Initiation Message
RSM	Response Service Message
RTR	Response to Request Message

988 - Cryptographic Service Message (CSM) Field Tag Code

Code indicating the field tag of a field contained in a cryptographic service message; the field tag identifies the contents of the accompanying Field Contents

TYPE=**ID** MIN=**2** MAX=**4**

RESTRICTED TO USE IN SECURITY STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

CSB

TRANSACTION SETS USED IN

815

CODE	DEFINITION & EXPLANATION
KD	Data Key
KK	Key - Encrypting Key
CTA	Count, "A"
CTB	Count, "B"
CTP	Count, Pair
CTR	Count, "R"
EDC	Error Detection Code
ERF	Error Field
IDA	Identity of Key for Authentication
IDC	Identity of Key Distribution Center (CKD) or Key Translation Center (CKT)
IDD	Discontinued Key Name
IDU	Identity of Ultimate Recipient (the Security Recipient)
KDU	Data Key, Notarized
KKU	Key - Encrypting Key Notarized
MAC	Message Authentication Code
NOS	Notarization Flag
PKK	Key - Encrypting Key Pair (*KK)
SVR	Service Request
TID	Transaction Identification Number
PKKU	Key - Encrypting Key Pair, Notarized (*KKU)
SUBF	Subfield of Previous Field Tag *Indicates that the previous field tag (other than SUBF) has a subfield and the accompanying field content is the subfield value without the ANSI X9.17 subfield delimiter*

989 - Cryptographic Service Message (CSM) Field Contents

This data element contains a field or subfield of a cryptographic service message

TYPE=**AN** MIN=**1** MAX=**32**

RESTRICTED TO USE IN SECURITY STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

CSB

TRANSACTION SETS USED IN

CODE	DEFINITION & EXPLANATION
1	ANSI X9.9 Authentication, Binary Data
2	ANSI X9.9 Authentication, "Coded Character Set, Entire Message, No Editing" (Standard Value for X9.17 Authentication) *Standard value for ANSI X9.17 authentication, with the data element separator expressed as an asterisk and the segment terminator expressed as a linefeed character for the calculation of the message authentication code (MAC)*
3	MD4 Hash
4	MD5 Hash
5	SHA Hash
6	ANSI X9.71 Authentication
Z	Mutually Defined

993 - Encryption Key Name

Name of the key used for encryption; this name is mutually known to the security originator and the security recipient, is unique for this relationship, and is intended to allow the changing of the key from time to time. Note: If any of the optional fields are present, the Key Name should contain either "PUBLIC" if a public key is being used to encrypt the one-time key or the actual name of the asymmetric key-encrypting-key used to encrypt the one-time key.

4Z	ANSI X9.23 CFB-8 (Cipher Feedback), Mutually Defined Filter
AA	Parameters Defined Individually
ZZ	Mutually Defined

995 - Length of Data

Length of data is the number of character positions of the compressed or encrypted/filtered text; when data is plain text, this field shall be absent

TYPE=**N** MIN=**1** MAX=**18**

RESTRICTED TO USE IN SECURITY STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

CSC S3S S4S

TRANSACTION SETS USED IN

815

997 - Hash or Authentication Code

The message authentication code or hash/digest generated by the authentication process; when the Data Encryption Standard (DES) algorithm is used, the field consists of 4 hexadecimal coded characters (i.e., characters from the set 0..9, A..F), a separator character (space, "-", or other), and 4 hexadecimally coded characters; when non-DES hashes are used, the result of the hash is expressed as hexadecimally coded characters without spaces; when authentication or hash is not used, this field should be filled with a non-blankcharacter other than the set (0..9, A..F) for the minimum length

TYPE=**AN** MIN=**1** MAX=**64**

130 132 133 135 189 190

CODE	DEFINITION & EXPLANATION
1	Full year *The prescribed length of instruction upon which credit is awarded based on the total number of days in a school year*
2	Semester *Usually about 15 to 17 weeks in length; there are usually two semesters per academic year and perhaps other shorter sessions*
3	Trimester *Usually about 13 to 15 weeks in length; normally there are three trimesters and perhaps other shorter sessions in an academic year*
4	Quarter *Usually about 10 to 14 weeks in length; normally there are four quarter sessions and perhaps other shorter sessions in an academic year*
5	Quinmester *Usually about 8 to 10 weeks in length; normally there are five quinmester sessions per academic year*
6	Mini-term *A session whose length is less than the regular session; usually but not always contained wholly within the regular session*
7	Summer Session *A session or combination of sessions conducted after the last regular session of the school year and prior to the first regular session of the next school year*
8	Intersession (Year Round Schools) *The days of optional attendance (equivalent to a summer session) for a student enrolled in a school offering a year-round program which provides three time blocks of 60 days of instruction followed by 15 of intersession*
9	Long session which is longer than a semester or quarter or trimester, but shorter than a full year
A	Fall Session
B	Four-One-Four Plan *A school year consisting of a four-month semester of academic work, followed by a month of special activity, followed by another four-month semester of academic work*
C	Continuous
D	Differs by Program
E	Other
T	Twelve Month

SEGMENTS USED IN (AS SIMPLE)
CRS CSE CSU SCT SUM

TRANSACTION SETS USED IN
130 131 132 133 135 138 188 189 190

CODE	DEFINITION & EXPLANATION
3	Trimester Hour Credit
5	Quinmester Hour Credit
A	Adult Credits
C	Continuing Education Unit *Uniform unit of measurement used in the U.S. reflecting participation in organized continuing (non-credit) education programs under responsible sponsorship, capable direction, and qualified instruction; one unit equals ten contact hours*
G	Carnegie Units *One year's study time (at least 120 hours) of any one subject in secondary school as defined by the Carnegie Foundation for the Advancement of Teaching to help clarify college entrance requirements; a standard of measurement that represents one credit for the completion of a one-year course; 16 to 30 Carnegie units completed in a four-year period is the typical requirement for a standard high school diploma in the U.S*
I	Intersession Hour Credit
L	Long Session Hour Credit
M	Mini-term Hour Credit
N	No Credit *A remedial course or other course that is offered without academic credit*
Q	Quarter Hour Credit *The numerical credit value awarded for a course by an institution following the quarter calendar; one quarter credit hour usually represents one classroom hour per week in a standard quarter session; a baccalaureate degree normally requires completion of about 180 quarter credit hours*
R	Summer Term Hour Credit
S	Semester Hour Credit *The numerical credit value awarded for a course by an institution following a semester calendar; one semester credit hour normally represents one classroom hour per week in a standard semester session; a baccalaureate degree normally requires completion of 120 semester credit hours*
T	Twelve-month Hour Credit
U	Units *The amount of credit offered for a course; in secondary schools, one hour in class per day, five days a week, for a subject normally counts as one course unit of that subject*
V	Vocational Credits *Credits offered by vocational and technical institutions; certain states or institutions may have a formula for equating vocational credits to other units or credits*

X Other Type of Credit
Credits offered by institutions outside the United States

1142 - Academic Grade or Course Level Code

Code indicating the level or type, or both, of academic work TYPE=**ID** MIN=**1** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)
CRS CSE SUM WLD

TRANSACTION SETS USED IN
130 131 132 138 188 189 190

CODE	DEFINITION & EXPLANATION
1	Remedial *Supplementary instruction in the basic skills of reading, writing, mathematics, or other regular subjects provided to elementary or secondary school students who are assessed as performing below expectations*
2	Basic *Instruction provided to elementary and secondary students in the regular classroom subjects including language arts, mathematics, social studies, sciences, and foreign languages*
3	Teacher's Aide

8	Specialized Topics
9	Advanced
A	Summary of all courses taken at all institutions
B	Summary of all courses taken at sending institution
D	Dual Level (Upper Division and Graduate) *The level of a course which may be applicable to a baccalaureate degree or a graduate degree or both*
E	Summary of All Courses Taken at All Institutions, Excluding Repeated and/or Forgiven Courses
F	Summary of All Courses Taken at the Sending Institution, Excluding Repeated and/or Forgiven Courses
G	Graduate (postsecondary) *Course offerings at a level of comprehension usually associated with postbaccalaureate students*
H	Higher or Upper division (postsecondary) *Course offerings at a level of comprehension usually associated with third or fourth year baccalaureate students*
I	Institutional Credit *Credit awarded by a postsecondary institution which may or may not be applicable to an associate or baccalaureate degree; typically awarded for purposes of determining the level of participation or success of a student in a course not applicable to a postsecondary degree*
L	Lower division (postsecondary) *Course offerings at a level of comprehension usually associated with first and second year postsecondary students*

M Work in the Major or Program
Course offerings that deal specifically with the program of the student; courses of a general nature or outside of the student's specific program would not be included

P Professional
Course offerings at a level of comprehension usually associated with postbaccalaureate students and recognized by state certification laws and regulations as courses that distinguish professional education from other professions and occupations

R Remedial (postsecondary)
Specialized or additional instruction to correct deficiencies in learner accomplishments or achievements with the expectation that the student will ultimately master the regular curriculum through regular channels

T Summary of Transfer Work Only
Credit granted to a student at the sending institution that was earned or attempted at another institution the student previously attended in recognition of work done there

U Undergraduate (postsecondary)
College level courses of study that may lead to the customary baccalaureate degree; includes both lower and upper division courses

AP	Paid Up Life *Employee's contributions received by the employer to purchase insurance which continues in force until the death of the employee or until the case value of the insurance is returned to the employee*
AR	Dependent Life
AU	Acupuncture
BC	Death and Dismemberment
BE	Supplemental Death and Dismemberment
BH	Weekly Indemnity *That form of short-term disability income that provides for the payment of a weekly benefit for disability due to an accident or illness*
BK	Weekly Indemnity - New York Employees
CC	Chiropractic Care
CV	Employee Comprehensive
HE	Hearing
LL	Lifestyle Life (Individualized Basic Life)
MM	Major Medical
NQ	Non-Qualified *Any plan under which the employer and employees are not entitled to favorable tax benefits*
UL	Universal Life *A plan that offers life insurance at low-term rates with a death benefit that increases over time with the addition of growing cash values in an interest-earning cash accumulation account*

UR Utilization Review
A committee of professionals in the medical field who review cases involving extended duration of hospitalization and patterns of care in order to establish guidelines in terms of actual medical necessity; their review will also include the efficiency of institutional use, the appropriateness of admission, services ordered and provided, length of stay, and discharge practices

403 403(B) Tax Sheltered Annuity
A section of the IRS regulations which allows a category of employees, such as teachers and educational staff, to contribute a portion of their salary (pretax) for the purchase of an annuity

AAA Durable Medical Equipment

AAB Foot Care

AAC Substance Abuse

ADD Accidental Death or Dismemberment
A form of health and accident insurance that provides payment to an insured's beneficiary or to the insured in the event of death or specific bodily losses resulting from an accident

ANC Ancillary

CDV Combined Dental and Vision

CHU 403(C) Church Exempt Annuity Plans Covered by ERISA

CLF Contributory Life
A term used to describe a life insurance plan under which the insured shares in the cost of the plan with the policyholder

COM Combined other than Dental and Vision
A product with combined insurance lines other than dental and vision only; products that include mandated Essential Health Benefits are not a combined product.

DCP Dental Capitation

DEN Dental

EMP 408(K) Employer Sponsored Qualified Defined Distribution Plans Funded with Individual IRA's

EPO Exclusive Provider Organization

FAC Facility

FSA Flexible Spending
An amount specified by an employee to be allocated towards health, legal, dependent, or educational expenses in compliance with government regulations

GDC 457(B) Government Deferred Compensation
A plan for employees of a State or Municipality which allows them to contribute a portion of their salary (pretax) to be invested and paid out at the time of their retirement or severance

HLT Health

HMO Health Maintenance Organization
An organization that provides a wide range of comprehensive health care services for a specified group at a fixed periodic payment

IRA Group Individual Retirement Account
A defined benefits retirement plan established by organizations for their employees

IRC 408(B) Individual Retirement Account (IRA) Annuity Contract
A section of the IRS regulations which allows an individual to purchase an annuity and defer taxation on the principal and interest until distribution

LTC Long-Term Care
A plan that provides a specified dollar benefit or more commonly a percent of expenses

charged if a covered person suffers a loss of functional capacity due to an accidental injury or sickness

LTD Long-Term Disability
A plan that provides a source of monthly income for covered employees who are unable to work because of total disability; benefits are payable for a period of 5 to 10 years, or more commonly to the employee's normal age of retirement

MOD Mail Order Drug

NGD 457(F) Non-Government Deferred Compensation
A plan for employees of an organization, such as a religious, non-profit, or fraternal group, which allows them to contribute a portion of their salary (pretax) to be invested and paid out at the time of their retirement or severance

PDG Prescription Drug

POS Point of Service

PPO Preferred Provider Organization

PRA Practitioners

PSP Profit-Sharing Plan
A plan established and maintained by an employer to provide for the participation in his profits by his employees or their beneficiaries

QDA 401(K) Qualified Cash or Deferred Arrangement
A section of the IRS regulations which allows an employee to contribute a portion of their salary (pretax) to be invested in a defined contribution plan; the taxation is deferred until the time of withdrawal

QDC 401(A) Qualified Defined Contribution
A section of the IRS regulations which allows an employee to contribute a portion of their salary (after-tax) to be invested in a defined contribution plan; the taxation on the earnings of these contributions will be deferred until the time of withdrawal

STD Short-Term Disability
A plan that provides a source of income for covered employees who are unable to work because of disability; benefits are payable for a period of 13, 26, or 52 weeks

VIS Vision

EC	Employee Post-Tax Basic *Regular occurring employee post-tax contributions*
ED	Employer Discretionary (Profit Sharing)
EI	Employee Pretax Individual Retirement Account *Employee pretax contributions to the employee's IRA*
EM	Employer Discretionary *Optional employer contributions usually based upon the employee account balance or a flat or fixed amount to all employees*
EP	Employee Pretax
ER	Employee Post-Tax Individual Retirement Account *Employee post-tax contributions to the employee's IRA*
ES	Employee Pretax Supplemental *Special occurring employee pretax contributions*
ET	Employee Post-Tax
EU	Employee Post-Tax Supplemental *Special occurring employee post-tax contributions*
IC	Claimant Contribution Amount
MB	Employer Pretax Match Basic *Regular occurring employer matching contributions based upon employee pretax contributions; regular occurring means that they happen based upon some predetermined frequency (i.e., with every deposit, quarterly, etc.)*
MS	Employer Pretax Match Supplemental *Special occurring employer matching contributions based upon employee pretax contributions; special occurring means that they happen based upon some event such as quarterly profits, annual bonus, etc.*
MT	Employer Post-Tax Match Basic *Regular occurring employer matching contributions based upon employee post-tax contributions*
MU	Employer Post-Tax Match Supplemental *Special occurring employer matching contributions based upon employee post-tax contributions*
NC	Nonqualified Matching Contribution

NQ Non-Qualified Voluntary Employee Contribution

PB Prior Plan Employee Pretax Basic
The amount contributed by an employee under the original plan; these contributions may have been subject to company match; the original plan has been superseded by a new plan; the current plan requires different handling of pretax basic contributions

PS Prior Plan Employee Post-Tax Supplemental
The amount contributed by an employee under the original plan; these contributions would not have been subject to company match; the original plan has been superseded by a new plan; the current plan requires different handling of post-tax supplemental contributions

PT Prior Plan Employee Post-Tax Basic
The amount contributed by an employee under the original plan; these contributions may have been subject to company match; the original plan has been superseded by a new plan; the current plan requires different handling of post-tax basic contributions

QC Employer Qualified Nonelective Contribution

QE Qualified Voluntary Employee Contribution

QM Qualified Matching Contribution

QP Qualified Employee Stock Option Plan
A plan where the company purchases stock for the employees

RA Rollover 401(A)
The employee's post-tax account balance which is transferred from one qualified 401A plan to another; a rollover avoids the tax liability for plan distributions

RK Rollover 401(K)
The employee's pretax account balance which is transferred from one qualified 401K plan to another; a rollover avoids the tax liability for plan distributions

RO Rollover

RP Employer Pretax

RS Prior Plan Employee Pretax Supplemental
The amount contributed by an employee under the original plan; these contributions would not have been subject to company match; the original plan has been superseded by a new plan; the current plan requires different handling of pretax supplemental contributions

RT Employer Post-Tax

SD Salary Deferral
An amount deferred from an employee's salary towards a vehicle specified by the employee

SP Spousal Individual Retirement Account
Employee contributions direct to the IRA of a spouse

ZZ Mutually Defined
Category of contributions defined by the trading partners

1225 - Disposition Code

Code specifying the disposition of removed part, subassembly, or assembly

DTS Range of Date and Time Expressed in Format CCYYMMDDHHMMSS-CCYYMMDDHHMMSS

DTT Date and Time Expressed in Format CCYYMMDDHHMMSSFFF
A date expressed in the format CCYYMMDDHHMMSSFFF where CC is the first two digits of the calendar year, YY is the last two digits of the calendar year, MM is the month (01 to 12), DD is the day in the month (01 to 31), HH is the hours in the day based on a twenty-four-hour clock (01-24), MM is the minutes in the hour (01-60), SS is the seconds in the minute (01-60), and FFF is the milliseconds in a second (001-999).

MCY MMCCYY

RD2 Range of Years Expressed in Format YY-YY

RD4 Range of Years Expressed in Format CCYY-CCYY

RD5 Range of Years and Months Expressed in Format CCYYMM-CCYYMM

RD6 Range of Dates Expressed in Format YYMMDD-YYMMDD

RD8 Range of Dates Expressed in Format CCYYMMDD-CCYYMMDD
A range of dates expressed in the format CCYYMMDD-CCYYMMDD where CC is the first two digits of the calendar year, YY is the last two digits of the calendar year, MM is the month (01 to 12), and DD is the day in the month (01 to 31); the first occurrence of CCYYMMDD is the beginning date and the second occurrence is the ending date

RDM Range of Dates Expressed in Format YYMMDD-MMDD

RDT Range of Date and Time, Expressed in Format CCYYMMDDHHMM-CCYYMMDDHHMM
A range of dates and times expressed in the format CCYYMMDDHHMM-CCYYMMDDHHMM where CCYY is the numerical expression of the century CC and year YY, MM is the numerical expression of the month within the year, DD is the numerical expression of the day within the month, HH is the numerical expression of hours in the day based on a twenty-four hour clock, and MM is the numerical expression of minutes within an hour; the first occurrence of CCYYMMDDHHMM is the starting time and the second is the ending time

RMD Range of Months and Days Expressed in Format MMDD-MMDD

RMY Range of Years and Months Expressed in Format YYMM-YYMM

RTM Range of Time Expressed in Format HHMM-HHMM
A range of times expressed in the form HHMM-HHMM where HH is the numerical expression of hours in the day based on a twenty-four hour clock and MM is the numerical expression of minutes within an hour; the first occurrence of HHMM is the starting time and the second is the ending time

RTS Date and Time Expressed in Format CCYYMMDDHHMMSS

YMM Range of Year and Months, Expressed in CCYYMMM-MMM Format

1251 - Date Time Period

Expression of a date, a time, or range of dates, times or dates and times

10 Transaction Status Indicator Code
A transaction other than normal and therefore requiring special handling
SEE CODE SOURCE 350

11 Contract Delivery Date Revision Agent Code
The kind of organization that caused an item to be undeliverable within the contract time schedule
SEE CODE SOURCE 350

12 Reason for Contract Delivery Date Revision Code
The reason why delivery of an item will not be made by the contract delivery date
SEE CODE SOURCE 350

13 Recommendations Regarding Delayed Deliveries Code
Describes which actions should be taken on delayed deliveries from contractors
SEE CODE SOURCE 350

14 Contract Shipment Advice Code
Information about a shipment of material from a contractor to the government
SEE CODE SOURCE 350

15 Individual Insurance Financial Detail
SEE CODE SOURCE 667

16 Cash Discount Stipulation Code
When cash discount terms for prompt payment apply to the contract
SEE CODE SOURCE 350

17 Shipment Acceptance Discrepancy Explanation Code
Either the reason for a difference between the quantity shipped and accepted, or why documentation is missing or incomplete
SEE CODE SOURCE 350

18 Insurance Plan Description Characteristics
SEE CODE SOURCE 556

19 Contract Close-out Group Code
Classifies contracts to evaluate the closing of physically complete contracts against the established time standard
SEE CODE SOURCE 350

20 Payment Type Code
Type of payment made to a contractor in anticipation of performance, actual performance, or partial performance of a contract
SEE CODE SOURCE 350

21 Contract Fund Reporting Transaction Code
Type of cash record specified in a notice of contract payment
SEE CODE SOURCE 350

22 Contract Payment Deduction or Collection Code
Authorized deduction and collection conditions that can be used to adjust gross amounts or reflect monies collected
SEE CODE SOURCE 350

23 Obligation Variance Code
Codes that indicate a difference that changes the gross amount to be paid to the contractor from those amounts recorded as payable by the contract
SEE CODE SOURCE 350

24 Plus or Minus Indicator Code
Codes that signify whether a data field is to be considered algebraically positive or negative
SEE CODE SOURCE 350

25 Reason for Delayed Closing of Contract File Code
Factors that contribute to the delay in closing a contract file within the time period established as the norm
SEE CODE SOURCE 350

26 Contract Payment Line Item Status Code
Status of a contract line item after a particular payment or collection has been applied
SEE CODE SOURCE 350

27 Special Reimbursable Provisions Code
Requirements expressing contractor responsibilities not directly involving performance for which the contractor may be reimbursed
SEE CODE SOURCE 350

28 Kind of Modification Code
Specific conditions concerning the modification of header records
SEE CODE SOURCE 350

29 Purchasing Contract Officer (PCO) Instructions Code
Instructions in response to recommended actions regarding actual or anticipated changes to contract line item delivery dates
SEE CODE SOURCE 350

30 Type of Delay Code
Identifies the nature of a delay in delivery
SEE CODE SOURCE 350

31 Healthcare Provider Characteristics and Resources
SEE CODE SOURCE 683

32 Container and Roll-on/Roll-off Number Code
Specific containers, unitized pallets, or roll-on/roll-off trailers
SEE CODE SOURCE 350

33 Air Commodity and Special Handling Code
An air commodity and its special handling requirements
SEE CODE SOURCE 350

34 Water Commodity and Special Handling Code
A water commodity and its special handling requirements
SEE CODE SOURCE 350

35 Air Dimension Code
A shipment has one or more outsized dimensions, or is consolidated, or both
SEE CODE SOURCE 350

36 Air Terminal Identifier Code
Identifies the name and location of air terminals worldwide
SEE CODE SOURCE 350

37 Water Terminal Identifier Code
Identifies water ports worldwide
SEE CODE SOURCE 350

38 Consolidation and Containerization Point Code
Activities that consolidate cargo for overseas movement
SEE CODE SOURCE 350

39 Transportation Mode or Method Code
The mode used for each segment of movement within the transportation system
SEE CODE SOURCE 350

40 Type Pack Code
The type of packaging, a conex container, who loaded it, and to what capacity
SEE CODE SOURCE 350

41 Date Shipped or Received Code
Dates and times of a shipment
SEE CODE SOURCE 350

42 Estimated Time of Arrival Code
The number of days a shipment will be in transit
SEE CODE SOURCE 350

43 Military and Civilian Grade Code
The grade of the owners of personal property shipments
SEE CODE SOURCE 350

44 Seavan Ownership Code
The owner of a seavan
SEE CODE SOURCE 350

45 Ocean Carrier Code
An ocean carrier
SEE CODE SOURCE 350

46 Voyage Document Number Code
Identifies the booking office and assigns an area subdivision serial number
SEE CODE SOURCE 350

47 Voyage Manifest Reference Code
The sequence in which manifests were issued
SEE CODE SOURCE 350

48 Vessel Status and Terms of Carriage Code
Specifies the type of shipping and payment and who loads and unloads the vessel
SEE CODE SOURCE 350

49 Vessel Sustaining Code
The physical capability of the ship's gear to load and unload cargo
SEE CODE SOURCE 350

50 Subrogation Action Code
SEE CODE SOURCE 580

52 Billing Advice Code
The nature of the request or problem
SEE CODE SOURCE 350

53 Billing Status Code
Codes that reply to requests for billing adjustments
SEE CODE SOURCE 350

54 Type of Bill Code
The purpose of the billing
SEE CODE SOURCE 350

55 Recipient of Billing Status Code
The organization to receive the billing reply and status
SEE CODE SOURCE 350

56 Sales Price Condition Code
The amount of the billing record does not equal the unit price extension
SEE CODE SOURCE 350

57 Delivery Source Code
Codes that provide an audit trail between performance and pricing requirements
SEE CODE SOURCE 184

58 Transportation Bill Code
Earnings for "below-the-line" transportation of material
SEE CODE SOURCE 184

59 Stock Fund or Non-stock Fund Code
The financing appropriation or a stock fund
SEE CODE SOURCE 184

60 General Services Administration (GSA) Customer Supply Center Number Code
GSA customer supply centers
SEE CODE SOURCE 350

61 Information Indicator Code
Codes that convey special information to offices receiving an interfund bill
SEE CODE SOURCE 350

62 Communications Routing Identifier Code
Organizations involved in the communications process
SEE CODE SOURCE 181

63 Content Indicator Code
The content of communication messages
SEE CODE SOURCE 182
SEE CODE SOURCE 694

65 Health Care Claim Status Code
SEE CODE SOURCE 508

66 Suffix or Limit Code
Components that receive allocations under defense agency appropriations
SEE CODE SOURCE 185

67 Type of Assistance Code
Codes that distinguish between types of military assistance transactions
SEE CODE SOURCE 180

68 Healthcare Provider Taxonomy
SEE CODE SOURCE 682

69 Foreign Military Sales Country Code
Foreign countries
SEE CODE SOURCE 180

71 Service and Agency Code
Military services, defense agencies, and certain civilian agencies of the United States Government
SEE CODE SOURCE 350

72 Disbursement Status Code
SEE CODE SOURCE 709

73 Aid Type Code
SEE CODE SOURCE 710

74 Demand Code
Identifies whether or not a material demand is recurring
SEE CODE SOURCE 350

75 Suffix Code
Differentiates partial actions of the same transaction
SEE CODE SOURCE 350

78 Project Code
Codes that relate a transaction to special programs, exercises, projects, operations, or other purposes
SEE CODE SOURCE 350

79 Priority Designator Code
The priority of a transaction
SEE CODE SOURCE 350

80 Advice Code
Instructions to transaction recipients when narratives cannot be transmitted
SEE CODE SOURCE 350

81 Status Code
Informs appropriate recipients about the status of a transaction or excess report
SEE CODE SOURCE 350

82 Shipment Hold Code
Explains why a shipping organization is delaying material after it has been picked, packed, marked, and prepared for shipment
SEE CODE SOURCE 350

83 Supply Condition Code
Classifies material by readiness for issue and use, describes actions underway to change

the status of material, or identifies material as excess or not serviceable
SEE CODE SOURCE 350

84 Management Code
Supplemental information not covered by the transaction coding structure
SEE CODE SOURCE 350

85 Country and Activity Code
Countries, international organizations, and accounts that could receive material or services under the Foreign Military Sales System and through Military Assistance Program Grant Aid
SEE CODE SOURCE 350

87 Subsistence Type of Pack Code
A certain level of protection from the packing or outside shipping container for perishable and nonperishable subsistence items
SEE CODE SOURCE 350

88 Disposal Authority Code
Material being transferred to a Defense Reutilization and Marketing Office is authorized for disposal because of instructions from an item manager or inventory control point
SEE CODE SOURCE 350

89 Cooperative Logistics Program Support Code
Indicates whether or not a Foreign Military Sales transaction is a programmed or unprogrammed requirement
SEE CODE SOURCE 350

90 Precious Metals Indicator Code
Material containing precious metals and the content value of the metal
SEE CODE SOURCE 350

91 Automated Data Processing Equipment Identification Code
Automated data processing equipment
SEE CODE SOURCE 350

92 Reason for Disposal Code
Explains why material is being transferred for disposal
SEE CODE SOURCE 350

93 Type of Storage Code
The storage requirements for material
SEE CODE SOURCE 402

94 Identification Code
Parties or organizations not covered by other codes
SEE CODE SOURCE 350

95 Offer and Release Option Code
Allows countries participating in the Foreign Military Sales Program to advise supply sources whether or not prior notice to country representatives or freight forwarders is required before shipment
SEE CODE SOURCE 180

96 Shipment Release Code
Information about shipment release instructions
SEE CODE SOURCE 350

97 Ultimate Recipient Code
The ultimate receiver or buyer of material for reimbursement purposes
SEE CODE SOURCE 350

98 Reason for Requisitioning Code
Explains why material is needed
SEE CODE SOURCE 350

99 Purpose Code
Codes that inform the material owner why an inventory balance is being reserved
SEE CODE SOURCE 350

A1 Ownership Code
Items included in the inventory records of an organization that is not the owner of the items
SEE CODE SOURCE 350

A2 Customer Within Country Code
The receiving country and place of discharge within the country for Military Assistance Program Grant Aid or the country's mark-for or ship-to addresses in Foreign Military Sales transactions
SEE CODE SOURCE 350

A3 Delivery Term Code
The delivery term for a Foreign Military Sales shipment
SEE CODE SOURCE 180

A4 Case Designator Number
The case that a Foreign Military Sales transaction supports
SEE CODE SOURCE 180

A5 Subcase Number
The line item or subcase that a Foreign Military Sales transaction supports
SEE CODE SOURCE 180

A6 Freight Forwarder Number
Representatives designated by a country to accomplish or control shipments of Foreign Military Sales material

A7 Record Control Number
A line item of the International Logistics Program
SEE CODE SOURCE 180

A8 Program Year Code
Number defining the fiscal year in which the International Logistics Program Item is to be planned
SEE CODE SOURCE 180

A9 Supplemental Data
Identifies the originating organization's unique logistics information
SEE CODE SOURCE 350

AA Country Code (Finance and Acquisition)
Countries in international balance of payment transactions
SEE CODE SOURCE 187

AB Defense Priorities and Allocations System Code
Identifies and prioritizes defense orders
SEE CODE SOURCE 186

AC Account Characteristics Code
Identifies characteristics of an establishment that holds a license to sell or serve alcohol beverages
SEE CODE SOURCE 320

AD Acquisition Advice Code
Denotes how and under what restrictions an item will be acquired
SEE CODE SOURCE 148

AE Beneficiary Type
SEE CODE SOURCE 548

AF Class of Pitch
SEE CODE SOURCE 560

AG Grade of Difficulty
SEE CODE SOURCE 561

AH Acquisition Method Suffix Code
Supplements the acquisition method code description
SEE CODE SOURCE 188

AI Acquisition Method Code
Describes the method of acquisition used in obtaining material
SEE CODE SOURCE 188

AJ Utilization Code
Code identifying the purpose of the transaction
SEE CODE SOURCE 350

AK Distribution Code
Code identifying activities eligible to receive additional status
SEE CODE SOURCE 350

AL Special Requirements Code
Identifies special requirements impacting the processing of the transaction
SEE CODE SOURCE 350

AM Locale of Activity
SEE CODE SOURCE 549

AN Nature of Event Code

Commodities in Federal Supply Groups 13 and 14
SEE CODE SOURCE 196

ES Extension Reason
SEE CODE SOURCE 840

ET Reject Advice Code
Indicates the reason a transaction was rejected
SEE CODE SOURCE 350

EU Request Code
The type of data requested and furnished on an asset support request
SEE CODE SOURCE 350

EV Review Period Indicator Code
Review period relative to decapitalization date
SEE CODE SOURCE 350

EW Small Arms Error Transaction Reject Code
The type of small-arms transaction error
SEE CODE SOURCE 350

EX Small Arms Transaction Code
Changes in small-arms status in the master file
SEE CODE SOURCE 350

EY Special Program Requirement Status Code
Informs of forecasting activities of action taken
SEE CODE SOURCE 350

EZ Type Inspection Code
The level of quality control
SEE CODE SOURCE 350

FA Type of Contractor Code
The type of contractor
SEE CODE SOURCE 350

FB Type of Media Code
The media for transmittal of transaction history
SEE CODE SOURCE 350

FC Type Physical Inventory or Transaction History Code
Identifies the type of inventory being conducted or requested, or identifies requests for transmission of custodial balances and history
SEE CODE SOURCE 350

FD Demilitarization Code
Identifies the action necessary to prevent the further use of equipment and material for its originally intended purpose
SEE CODE SOURCE 191

FE Shelf Life Code
The storage time period or perishability of an item
SEE CODE SOURCE 192

FF Essentiality Code
The essentiality of an item
SEE CODE SOURCE 193

CODE	DEFINITION & EXPLANATION
BC	Beyond Code Date
CO	Customer Ordering Error *Purchaser made error*
CV	Color Variance *Color not as expected or described*
DA	Damaged Product
DI	Discontinued Product
DM	Defective Merchandise or Store Inspection *Goods are defective as found by selling unit inspection*
DP	Defective Packaging *Packaging does not meet specifications*
DR	Defective Merchandise or Returned by Consumer *Consumer found goods to be defective*
DT	Damaged In Transit
EI	Excess Inventory *Seller requests authorization to return excess goods*
EO	End of Season *Seller requests authorization to return carryover of seasonal goods*
EW	Excessive Wear *Goods have been worn more than expected with use*
LP	Label Problem *Label not as specified*
MD	Mark Downs
NA	Not as Expected *Goods not as specified or described*
OP	Outdated Packaging *Packaging is not as currently specified*
PE	Price Error *Price charged not as expected or quoted*
PF	Poor Fit *Goods do not meet size specifications*
PR	Product Recall
PS	Product Spoiled
PW	Poor Workmanship *Goods are of poor or haphazard workmanship*

RE Recall

SD Short-Dated Product
Not enough time before product expiration

SM Samples

SP Shipped past Cancel Date
Supplier shipped goods after order cancel date

SR Stock Reduction Agreement
Per prior agreement, seller wishes to return surplus goods

ST Style Problem
Style does not meet current specifications or order

TE Termination

WG Wrong Goods or Not Ordered
Supplier shipped wrong goods without an order

1294 - Return Response Reason Code

Code indicating the response to a request to return items TYPE=**ID** MIN=**2** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)
RDR

TRANSACTION SETS USED IN
180

CODE	DEFINITION & EXPLANATION
EW	Excessive Wear and Tear *Supplier has determined goods were not used as intended*
FR	Freight or Retailer Damage *Damage to goods occurred after shipment*
IN	Item not Defective *Supplier finds goods in working condition*
IO	Item as Ordered *Goods as described or ordered*
MI	More Information Requested *Supplier cannot make authorization without additional information*
NR	No Record of Original Sale *Supplier will not authorize return of goods it did not sell*
OS	Out of Season or Discontinued Line Item *Supplier refuses return of or inactive goods*
PC	Pricing or Cost Difference *Supplier disallows return due to price or cost discrepancy*
PR	Picture Requested *Supplier requests a photograph of goods prior to authorization to determine condition of goods*
QD	Quantity Difference *Supplier indicates order or invoice quantity was different than quantity to be returned*
RR	Repair or Refurbish *Supplier is authorizing seller to keep goods, and supplier will pay an agreed upon amount to repair or refurbish*
RT	Return Time Limit Exceeded or Beyond Warranty Period *Supplier declines return based upon a specific date or window of time*
SR	Sample Requested *Supplier is pending authorization until a sample has been sent*
UI	Unidentifiable Item *Supplier does not recognize the goods in question*

1295 - Participant Status Code

Code indicating the status of an individual in a benefit plan TYPE=**ID** MIN=**1** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)
RP

TRANSACTION SETS USED IN
834

CODE	DEFINITION & EXPLANATION
A	Active *Participant has an account balance*
C	Death Not Processed *Participant's vested account balance has not been distributed to the beneficiaries*
D	Disabled *Participant is not contributing to the plan due to disability*
N	New *New enrollment with no account balance*
R	Reinstated *Participant may now contribute to the plan, after having fulfilled the suspension period*
S	Suspended *Employee is restricted from participating in the plan*
AN	Active Non-Vested *Participant has an account balance and is not fully vested (as defined by the plan document)*
AV	Active Vested *Participant has an account balance and is fully vested (as defined by the plan document)*
CD	Contract Discontinuance *The client has terminated their contract with the service provider*
DB	Termination - Death *Participant's account balance has been distributed to the beneficiaries*
DN	Deferral - Not Vested *Participant has ended employment and elected to defer distribution of plan benefits; the participant is not fully vested (as defined in the plan document)*
DP	Delete or Pending Purge *Participant has no account balance, and all tax information has been processed; the participant's information will be deleted from the database*
DR	Distribution Restricted *Distribution of plan benefits has been restricted by the client*
DV	Deferral - Vested *Participant has ended employment and elected to defer distribution of plan benefits; the participant is fully vested (as defined in the plan document)*
EL	Eligible, Not Participating
GA	Golden Age *Participant has reached the age of 55*
KP	Keep Participant *Participant has no account balance, and all tax information has been processed; however, the client does not want the participant's information deleted from the database*

PD Plan Discontinuance
The client has terminated their defined contribution plan

PF Potentially Forfeitable
Participant has terminated employment and received the vested portion of his account balance; the non-vested portion may be forfeited at the client's discretion

RT Retired
Participant has retired from the company, but has not received his plan benefits

S1 Suspended From Contributing For 1 Year
Participant may not contribute to the plan for one year

S2 Suspended From Contributing For 2 Years
Participant may not contribute to the plan for two years

TD Termination - Disability
Participant has ended employment due to disability, and has received his plan benefits

TN Terminated Non-Vested
Participant has ended employment, and has received only the vested portion of his account balance

TR Termination - Retirement
Participant has retired from the company and has received his plan benefits

TS Termination - Severance
Participant has ended employment and has received his plan benefits

TV Terminated Vested
Participant has ended employment, was 100% vested (as defined in the plan document), and has received his entire account balance

US Unit Sale
The client company has sold one of its subsidiaries, and all participants under that location have received their plan benefits

0Z Main Assignment
10 Patient is ambulatory
11 Ambulation is Impaired and Walking Aid is Used for Therapy or Mobility
12 Patient is confined to a bed or chair
13 Patient is Confined to a Room or an Area Without Bathroom Facilities
14 Ambulation is Impaired and Walking Aid is Used for Mobility
15 Patient Condition Requires Positioning of the Body or Attachments Which Would Not be Feasible With the Use of an Ordinary Bed
16 Patient needs a trapeze bar to sit up due to respiratory condition or change body positions for other medical reasons
17 Patient's Ability to Breathe is Severely Impaired
18 Patient condition requires frequent and/or immediate changes in body positions
19 Patient can operate controls
1A Patient is receiving anti-fungal therapy
1B Property is occupied by owner
1C Property is occupied by tenant
1D Property is vacant
1E Location is urban
1F Location is suburban
1G Location is rural
1H Built-up over 75%
1I Built-up 25 - 75%
1J Built-up under 25%
1K Growth rate is rapid
1L Class I-Left
Normal relationship of the left side of the mouth by correct interdigitation of the upper and lower molars
1M Growth rate is stable
1N Growth rate is slow
1O Property values are increasing
1P Property values are stable

1Q Property values are declining

1R Class I-Right
Normal relationship of the right side of the mouth by correct interdigitation of the upper and lower molars

1S Demand or supply is in shortage

1T Demand or supply is in balance

1U Demand or supply is over supply

1V Marketing time is under 3 months

1W Marketing time is 3 to 6 months

1X Marketing time is over 6 months

1Y Predominant occupancy is the owner

1Z Predominant occupancy is the tenant

20 Siderails Are to be Attached to a Hospital Bed Owned by the Beneficiary

21 Patient owns equipment

22 Mattress or Siderails are Being Used with Prescribed Medically Necessary Hospital Bed Owned by the Beneficiary

23 Patient Needs Lift to Get In or Out of Bed or to Assist in Transfer from Bed to Wheelchair

24 Patient has an orthopedic impairment requiring traction equipment which prevents ambulation during period of use

25 Item has been prescribed as part of a planned regimen of treatment in patient home

26 Patient is highly susceptible to decubitus ulcers

27 Patient or a care-giver has been instructed in use of equipment

28 Patient has poor diabetic control

29 A 6-7 hour nocturnal study documents 30 episodes of apnea, each lasting more than 10 seconds

2A Patient is receiving oral anti-fungal therapy

2B Predominant occupancy is vacant (0-5%)

2C Predominant occupancy is vacant (over 5%)

2D Developer or builder is in control of the Home Owners Association

2E Site is a corner lot

2F Zoning compliance is legal

2G Zoning compliance is legal nonconforming (grandfather use)

2H Zoning compliance is illegal

2I There is no zoning

2J Highest and best use as improved is the present use

2K Highest and best use as improved is other use

2L Class II-Left
The lower left first molar is posterior to the upper left first molar

2M Property is located in a Federal Emergency Management Administration special flood hazard area

2N Appraisal is made "as is"

2O Appraisal is made subject to the repairs, alterations, inspections, or conditions listed

2P Appraisal is made subject to the completion per plans and specifications

2Q Project type is planned unit development (PUD)

2R Class II-Right
The lower right first molar is posterior to the upper right first molar
2S Project type is condominium
2T Property rights are fee simple
2U Property rights are leasehold
2V Supervisor appraiser inspected the property per supervisory appraiser's certification
2W Property was sold within last 12 months
2X Appraiser signed statement of limiting conditions and disclaimer
2Y Ownership interest in a property
2Z Termination
30 Without the equipment, the patient would require surgery
31 Patient has had a total knee replacement

L2	Lumbar 2 *Adjustment of the second vertebrae between the thorax and the pelvis*
L3	Lumbar 3 *Adjustment of the third vertebrae between the thorax and the pelvis*
L4	Lumbar 4 *Adjustment of the fourth vertebrae between the thorax and the pelvis*
L5	Lumbar 5 *Adjustment to the fifth vertebrae between the thorax and the pelvis*
OC	Occiput *Adjustment of the back part of the neck*
SA	Sacrum *Adjustment of the triangular bone just below the lumbar vertebrae*
T1	Thoracic 1 *Adjustment of the first vertebrae located between the neck and the respiratory diaphragm*
T2	Thoracic 2 *Adjustment of the second vertebrae located between the neck and the respiratory diaphragm*

T3 Thoracic 3
Adjustment of the third vertebrae located between the neck and the respiratory diaphragm

T4 Thoracic 4
Adjustment of the fourth vertebrae located between the neck and the respiratory diaphragm

T5 Thoracic 5
Adjustment of the fifth vertebrae located between the neck and the respiratory diaphragm

T6 Thoracic 6
Adjustment of the sixth vertebrae located between the neck and the respiratory diaphragm

T7 Thoracic 7
Adjustment of the seventh vertebrae located between the neck and the respiratory diaphragm

T8 Thoracic 8
Adjustment of the eighth vertebrae located between the neck and the respiratory diaphragm

T9 Thoracic 9
Adjustment of the ninth vertebrae located between the neck and the respiratory diaphragm

T10 Thoracic 10
Adjustment of the tenth vertebrae located between the neck and the respiratory diaphragm

T11 Thoracic 11
Adjustment of the eleventh vertebrae located between the neck and the respiratory diaphragm

T12 Thoracic 12
Adjustment of the twelfth vertebrae located between the neck and the respiratory diaphragm

1368 - Tooth Status Code

Code specifying the status of the tooth TYPE=**ID** MIN=**1** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)
DN2

TRANSACTION SETS USED IN
278 837

CODE	DEFINITION & EXPLANATION
E	To Be Extracted *Tooth which has been identified to be removed*
I	Impacted *An unerupted or partially erupted tooth that is firmly lodged against another tooth, bone or tissue so that complete eruption is unlikely*
M	Missing *Tooth which was lost or never present in the mouth*
X	Extracted

1369 - Tooth Surface Code

Code identifying the area of the tooth that was treated TYPE=**ID** MIN=**1** MAX=**2**

COMPOSITE DATA STRUCTURES USED IN
C005

SEGMENTS USED IN (AS COMPONENT)
TOO

TRANSACTION SETS USED IN
270 271 276 277 278 835 837

CODE	DEFINITION & EXPLANATION
B	Buccal *The surface of the tooth which is closest to the cheek*
D	Distal *The surface of the tooth facing away from an invisible line drawn vertically through the center of the face*
F	Facial *The surface of a tooth that is directed towards the face*
I	Incisal *The cutting edges of the anterior teeth*
L	Lingual *The surface of the tooth that is directed towards the tongue*
M	Mesial *The surface of a tooth which faces toward an invisible line drawn vertically through the center of the face*
O	Occlusal *The surfaces of the posterior (back) teeth which provides the chewing function*

1370 - Unit Dose Code

Code indicating the type of unit dose dispensing done TYPE=ID MIN=1 MAX=1

SEGMENTS USED IN (AS SIMPLE)

CODE	DEFINITION & EXPLANATION
BM	Bellows Meter *A type recording instrument which employs flexible vessels that expand when pressure is applied; the movement or expansion of the vessels is an indicator of the pressure applied; bellows meters are commonly used in low pressure or differential pressure measurement; "Bellows Meter" terminology is used to indicate that corrections in volume calculations are applied with respect to Bellows recorder characteristics*
BO	Based on 120 Days List to Contract
DM	Displacement Meter *A metering instrument in which mechanical displacement of known volume chambers are repeatedly filled and emptied; the volume of the chambers times the cycles of displacement is equal to the measure of volume; "Displacement Meter" terminology may also be used to define the application of volume calculation*
FT	Flange Tap *A critical parameter of design for orifice measurement where the pressure ports for the sensing of static and differential pressure are located one inch upstream and one inch downstream of the orifice plate; "Flange Tap" terminology is used to define the tap configuration employed*
HN	Hubometer *An axle mounted device to measure distance traveled by a motor vehicle*
MA	Measured Over Six Months
MM	Mercury Meter *A type of recording instrument which employs mercury displacement in a fixed chamber when pressure is applied; the displacement is an indicator of the pressure applied; the mercury recorder is primarily used in low pressure differential pressure measurement; "Mercury Meter" terminology is used to indicate that corrections in volume calculations are applied with respect to mercury recorder characteristics*
OM	Orifice Meter *A metering instrument used to measure flowing fluid through a pipe by velocity displacement and employing orifice technologies; the orifice meter is an inferential device which senses the pressure differential created by the passage of a fluid through an orifice of critical diameter placed in the pipe; a rate of flow is calculated from the fluid flowing and instrument parameters to determine the measure of volume; "Orifice Meter" terminology may also be used to define the application of volume calculation*
OU	Odometer
PT	Pipe Tap *A critical parameter of design for orifice measurement where the pressure ports for the*

sensing of static and differential pressure are located in a distance of two and one-half times the published inside diameter of the meter upstream of the orifice place and a distance of eight times the published inside diameter of the meter downstream of the orifice plate; "Pipe Tap" terminology is used to define the tap configuration employed

TM Turbine Meter
A type of metering instrument used to measure flowing fluid through a pipe by velocity displacement and employing turbine senses the rotation of a rotor axis turbine which is parallel to the axis of flow and proportional to the rate; the measure of volume is determined by counting the revolutions of the rotor; "Turbine Meter" terminology may also be used to define the application of volume calculation

Y Spend Down

10 Inactive - Premium Payment Not Received
Indicates that the payer has deemed the member inactive; based on the inquiry date submitted on the request, the eligibility status is returned as inactive because the date is either (1) after the due date of the initial premium payment or (2) after end of the 3 month grace period and the member is not eligible for benefits but whose membership may be effectuated

11 Active - Pending Receipt of Premium Payment
Indicates that the payer has deemed the member active, but, based on the inquiry date submitted on the request, the eligibility status is returned as Active because the date is either (1) prior to the due date of the initial premium payment or (2) within the 3 month grace period and the member is in the first month of the grace period, and any delinquent payment has not yet been received.

12 Inactive - Pending Receipt of Premium Payment
Indicates that the payer has deemed the member inactive, based on the inquiry date submitted on the request, the eligibility status is returned as inactive because the date is either (1) after the due date of the initial premium payment or (2) the member is in the 2nd or 3rd month of the grace period and any delinquent payment has not yet been received by the payer.

CLE	Clean Exterior *Exterior of container is to be cleaned*
DHT	Door Height Requirement *The height of the door opening of the container must be greater than or equal to a specified value*
DWI	Door Width Requirement *The width of the door opening of the container must be greater than or equal to a specified value.*
FAP	Use Flatrack as Platform *A flatrackmay be used in place of a platform*
GEN	Genset Required *A motor-generator set is to be mounted on a container or chassis prior to use*
LIN	Liner Attached *Interior of container is to be covered by a plastic or rubber liner*
MCP	Moisture Content Requirement *The moisture content of the interior of the container must be less than or equal to a specified value.*
MOI	Moisture Free *Interior of container is to be free of detectable moisture*
NDO	Door Off *Door(s) are to be removed from container*
NOI	Oil Stain Free *Interior or container is to be free of oil stains*
ODF	Odor Free *Interior of container is to have no detectable odor*
PCO	Pre-cooled *The interior of the container is to be cooled to the specified temperature prior to use*
PRE	Pre-mount Required *Container is to be mounted on a chassis prior to use*
PSE	Pre-set Temperature *The attached motor-generator set is to be set to the specified temperature prior to use*

RAD Reefer Used As Dry
A refrigerated container is to be used without a motor-generator set

RUS Rust Free
Interior of container is to be free of rust

SLI Slider Chassis
A slider chassis must be used

SMO Smoke Test
Air-tightness of container is to be tested by use of a smoke pot

STE Steam Cleaned
Interior of container is to be cleaned by use of high pressure steam

SUB Substitution Allowed
A type of container similar to the one requested may be used

SUR Survey Required
Container is to be inspected to ensure proper loading of cargo, or to ensure that an empty container meets the shipper's specifications

TBT Timber Treated
All wood in the container must be treated per Australian government regulations

TEC Tectrol Gas
The use of tectrol gas to retard the maturation of fruits and vegetables

VOD Dual Voltage Required
The refrigerated container must be capable of operating at both 220 and 440 volts

VOS Single Voltage Required
The refrigerated container must be capable of operating at only 220 volts

YEA Year of Manufacture Requirement
The year of manufacture of the container must be less than a specified date

TSO	Time Stamp Only (No Responsibility for Contents)
ZZR	Mutually Defined, Receipt Requested
ZZZ	Mutually Defined

1434 - Domain of Computation of Assurance Code

Code specifying the bounds of the text, whether contiguous or not, over which the computation of the Assurance Token is computed using the defined methodology of computation and any relevant Assurance Token parameters The "body" is defined as a transaction set, beginning with the first byte of the segment immediately following the ST segment terminator and including all segments up to but not including the "S" in the first SVA segment; DO NOT include any S4A segments The "body" can also be defined as a functional group, beginning with the first byte of the segment immediately following the GS segment terminator and including all transaction sets up to but not including the "S" in the first SVA segment at the functional group level; DO NOT include any S3A segments "This Assurance" is defined as from the "S" in S3A or S4A up to and including the segment terminator of that segment "Previous Assurance(s)" is defined as including the entire S3A or S4A segment and the entire corresponding SVA segment that is associated with the S3A or S4A at the same level

TYPE=**ID** MIN=**1** MAX=**2**

RESTRICTED TO USE IN SECURITY STRUCTURES ONLY

CODE	DEFINITION & EXPLANATION
A	Body Only
B	Body Plus This Assurance Header Only
C	Body Plus All Previous Assurances Plus This Assurance Header
D	Body plus All Previous Assurances Only
E	This Assurance Header Only
F	All Previous Assurances Plus This Assurance Header
G	Body Plus All Previous Assurances of Referenced Document

1435 - Assurance Originator

Unique designation (identity) of the cryptographic process that performs the stated assurance on data to be interchanged Note: X9 has a required minimum length of 4 characters for a security originator; no mechanism, or registration method, is provided by X9 or X12 to guarantee uniqueness of the identifier

TYPE=**AN** MIN=**1** MAX=**64**

RESTRICTED TO USE IN SECURITY STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

APE S3A S4A

TRANSACTION SETS USED IN

993

1436 - Assurance Recipient

Unique designation (identity) of the cryptographic process that performs validation of the stated assurance on received data. In the absence of an Assurance Recipient all potential receivers will often be able to validate the assurance because the cryptographic technique is based on a "public" (as opposed to "secret") technology Note: X9 has required minimum length of 4 characters for a security recipient; no mechanism, or registration method, is provided by X9 or X12 to guarantee uniqueness of the identifier

TYPE=**AN** MIN=**1** MAX=**64**

RESTRICTED TO USE IN SECURITY STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

APE S3A S4A

TRANSACTION SETS USED IN

993

1437 - Date Time Stamp

TYPE=**AN** MIN=**17** MAX=**25**

Date and time stamp in format as follows: YYYYMMDDHHNNSSTTTZZZ+XXXX, where YYYY = 4 digit year (with leading century), MM = month of year (01..12), DD = day of month (01..31), HH = hour of day in 24-hour format (00..23), NN = minutes of the hour (00-59), SS = second of hour (00..59), TTT = [optional] milli-seconds (000..999), ZZZ = [optional] three character, nominal timezone indicator (including daylight savings time indicator) and XXXXX = 3-5 digit (including leading + or - sign) offset of time to universal time, with three position format indicating hours-offset for whole hours, and five position format indicating hours and minutes offset where this is necessary. For example: 19930615221330CDT+0930 which represents 15 June 1993, 22:13 (10:13pm), Central Daylight Time (Nominal Value "CDT"), in a timezone that is offset + 9:30 from Universal Time (Australia)

SEGMENTS USED IN (AS SIMPLE)

S3A S4A

TRANSACTION SETS USED IN

993

1438 - Assurance Text

Any text needed to convey the name of a signatory, registration number, certification number, or other assurance-originator defined or mutually agreed business text related to the specific assurance; this text is not defined for X12 purposes and thus functions technically as "free-form text" though it may have structure that is defined by the assurance originator, an industry group, a governmental agency, or bi-laterally between assurance originator and assurance recipient

1497 - Notification Entity Qualifier

Code indicating type of notifications TYPE=**AN** MIN=**1** MAX=**2**

Code Sources

357

SEGMENTS USED IN (AS SIMPLE)

M15

TRANSACTION SETS USED IN

353 355

1499 - Rate Application Code

Code identifying the location at which the tax rate is applied TYPE=**ID** MIN=**2** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)
TRS

TRANSACTION SETS USED IN
150

CODE	DEFINITION & EXPLANATION
DE	Destination
OR	Origin

1511 - Type of Deduction Code

Code specifying type of deduction being withheld from an employee's pay

TYPE=**ID** MIN=**2** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)

DED

TRANSACTION SETS USED IN

820 823

CODE	DEFINITION & EXPLANATION
CS	Child Support
DP	Non-Custodial Parent or Third-Party Payers
FD	Financial Institution to Financial Institution Funds Transfer Requested by Child Support Agency
IF	Interstate Financial Institution Data Match Collections
II	Interstate Income Withholding - Child Support
IO	Interstate All Others - Child Support
IT	Interstate State Tax Offset - Child Support
RF	Interstate Cost-Recovery Financial Institution Data Match
RI	Interstate Cost-recovery Income Withholding - Child Support
RO	Interstate Cost-recovery All Others - Child Support
RT	Interstate Cost-recovery State Tax Offset - Child Support
UC	Unemployment Compensation - Child Support
UI	Unemployment Insurance Payment - Child Support

1514 - Delay Reason Code

Code indicating the reason why a request was delayed TYPE=ID MIN=1 MAX=2

SEGMENTS USED IN (AS SIMPLE)
CLM UM

TRANSACTION SETS USED IN
278 837

CODE	DEFINITION & EXPLANATION
1	Proof of Eligibility Unknown or Unavailable
2	Litigation
3	Authorization Delays
4	Delay in Certifying Provider
5	Delay in Supplying Billing Forms
6	Delay in Delivery of Custom-made Appliances
7	Third Party Processing Delay
8	Delay in Eligibility Determination
9	Original Claim Rejected or Denied Due to a Reason Unrelated to the Billing Limitation Rules
10	Administration Delay in the Prior Approval Process
11	Other
15	Natural Disaster
16	Lackof Information
17	No response to initial request

1520 - Display Type Code

Code indicating the type of displays

TYPE=**ID** MIN=**1** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)
G29

TRANSACTION SETS USED IN
885 886

CODE	DEFINITION & EXPLANATION
AA	End Cap - Front End
AB	End Cap - Back End
AC	End Cap - Middle
AD	Free Standing
AE	Shipper
AF	Module Ready to Display
AG	Refrigerated Display Case
AH	Gondola (Island)
AI	Sidestack
AJ	Spinner Rack
AK	Clip Strip
AL	J-hook
AM	Checkstand
AN	Wing Display
AO	Pallet
AP	Dump Bin
AQ	Other
AR	Frozen Display Case
AS	In-Aisle
AT	Backroom Shelf
AU	Backroom Cold Box Storage
AV	Backroom Floor Space
AW	Frontroom Shelf Space
AX	Frontroom Cold Box Storage
AY	Frontroom Floor Space

1521 - Marketing Type Code

Code indicating the type of marketing devices or programs TYPE=ID MIN=1 MAX=2

SEGMENTS USED IN (AS SIMPLE)
G30

TRANSACTION SETS USED IN
885

CODE	DEFINITION & EXPLANATION
AA	Checkout Coupons
AB	Video Cart
AC	Frequent Shopper
AD	Shelf Coupon Dispenser
AE	Electronic Shelf Tag
AF	In-Store Broadcast
AG	Front-End Coupon Dispenser (Kiosk)
AH	Newspaper
AI	Television
AJ	Radio
AK	Magazine
AL	Telemarketing
AM	Direct Mail
AN	Flyers

1522 - Coupon Type Code

Code indicating the type of coupon

TYPE=**ID** MIN=**1** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)

G15 G35

TRANSACTION SETS USED IN

886 887

CODE	DEFINITION & EXPLANATION
AA	Checkout
AB	Shelf
AC	Front-end
AD	Demonstration
AE	In-advertising
AF	Instant Redeemable
BA	Without Sample
BB	With Sample
BC	Co-op
BD	On Cart
BE	Kiosk
BF	Military
BG	In Store with Sample
BH	In Store without Sample
BI	Off Location with Sample
BJ	Off Location without Sample
BK	Hospital
BL	Cross-Ruff
BM	On Page
BN	Pop-up
BO	Tip In
BP	Color
BQ	Sunday Comics
BR	Supplement
BS	Split Value

1523 - Labor Activity Code

Code indicating a type of labor activity

TYPE=ID MIN=1 MAX=2

SEGMENTS USED IN (AS SIMPLE)
G37

TRANSACTION SETS USED IN
886

CODE	DEFINITION & EXPLANATION
AA	Shelf Maintenance
AB	Reset
AC	Survey
AD	Product Recall
AE	Spoils Processing
AF	Merchandising
AG	Selling
AH	Product Demonstration

1525 - Request Category Code

Code indicating a type of request

TYPE=**ID** MIN=**1** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)

PWK UM

TRANSACTION SETS USED IN

105 113 143 147 161 179 186 194 195 198 202 206 252 255 261 262 265 267 272 277 278 280 284 304 310 500 511 536 810 830 832 833 836 837 840 841 842 843 850 855 856 860 865 867 870

CODE	DEFINITION & EXPLANATION
AL	All Categories
AR	Admission Review
BA	Batch
HS	Health Services Review
IN	Individual
MR	Medical Reservation
PR	Program Referral
RE	Recurring
SC	Specialty Care Review

1526 - Policy Compliance Code

Code specifying policy compliance

TYPE=**ID** MIN=**1** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)

HCP

TRANSACTION SETS USED IN

837

CODE	DEFINITION & EXPLANATION
1	Procedure Followed (Compliance)
2	Not Followed - Call Not Made (Non-Compliance Call Not Made)
3	Not Medically Necessary (Non-Compliance Non-Medically Necessary)
4	Not Followed Other (Non-Compliance Other)
5	Emergency Admit to Non-Network Hospital

1527 - Exception Code

Code specifying the exception reason for consideration of out-of-network health care services

TYPE=**ID** MIN=**1** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)

HCP

TRANSACTION SETS USED IN

837

CODE	DEFINITION & EXPLANATION
1	Non-Network Professional Provider in Network Hospital
2	Emergency Care
3	Services or Specialist not in Network
4	Out-of-Service Area
5	State Mandates
6	Other

1528 - Component Data Element Position in Composite

To identify the component data element position within the composite that is in error

TYPE=**N0** MIN=**1** MAX=**2**

COMPOSITE DATA STRUCTURES USED IN

C030

SEGMENTS USED IN (AS COMPONENT)

AK4 CTX IK4 TED

TRANSACTION SETS USED IN

824 997 999

1540 - Net Cost Code

Code indicating the net cost formula

TYPE=**ID** MIN=**1** MAX=**2**

TRANSACTION SETS USED IN

None

CODE	DEFINITION & EXPLANATION
1	Net Cost Formula 1
2	Net Cost Formula 2
3	Net Cost Formula 3
4	Net Cost Formula 4

1543 - Equipment Orientation Code

Code indicating the direction the equipment is entrained or the lading is loaded; When used to indicate the lading orientation, direction is defined relative to the equipment on which it is loaded

TYPE=**ID** MIN=**1** MAX=**1**

SEGMENTS USED IN (AS SIMPLE)

EI VC W2

TRANSACTION SETS USED IN

120 121 125 127 160 228 309 322 326 355 404 410 417 418 426 456 858 859 928

CODE	DEFINITION & EXPLANATION
A	Opposite End of Car from Brake
B	Brake End of Car

1546 - Preferential Duty Criteria Code

Code indicating the rule that was used to claim duty preference TYPE=**ID** MIN=**1** MAX=**2**

TRANSACTION SETS USED IN

None

CODE	DEFINITION & EXPLANATION
A	Wholly Obtained *The good is "wholly obtained or produced entirely" in the territory of one or more of the North American Free Trade Agreement (NAFTA) countries*
B	Produced Entirely *The good is produced entirely in the territory of one or more of the North American Free Trade Agreement (NAFTA) countries and satisfies the specific rule of origin that applies to its tariff classification*
C	Exclusive Originating *The good is produced entirely in the territory of one or more of the North American Free Trade Agreement (NAFTA) countries exclusively from originating material*
D	Unassemble classified *The good was imported into the territory of a North American Free Trade Agreement (NAFTA) country in an unassembled or disassembled form but was classified as an assembled good*
E	Tariff Change *The good incorporated one or more non-originating materials, provided for as parts under the Harmonized System, which could not undergo a change in tariff classification*

1549 - Convertibility Rate Type Code

Code indicating the type of rate used in a convertibility option TYPE=ID MIN=1 MAX=2

SEGMENTS USED IN (AS SIMPLE)
CDI

TRANSACTION SETS USED IN
205 872

CODE	DEFINITION & EXPLANATION
1	Adjustable to Fixed
2	Adjustable to Adjustable
3	Balloon to Adjustable
4	Balloon to Fixed
5	Fixed to Fixed
6	Fixed to Adjustable
ZZ	Mutually Defined

1550 - Index Qualifier

Code identifying an index

TYPE=**ID** MIN=**1** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)

INX

TRANSACTION SETS USED IN

194

CODE	DEFINITION & EXPLANATION
1	Matrix Start - Absolute Reference
2	Matrix Start - Relative Reference
3	Matrix Continuation - Absolute Reference
4	Matrix Continuation - Relative Reference

1551 - Textual Data

To transmit large volumes of message text TYPE=**AN** MIN=**1** MAX=**4096**

COMPOSITE DATA STRUCTURES USED IN
C080

SEGMENTS USED IN (AS COMPONENT)
PO4 TTI

SEGMENTS USED IN (AS SIMPLE)

1552 - Option Type Code

Code indicating the type of option provided

TYPE=ID MIN=1 MAX=2

SEGMENTS USED IN (AS SIMPLE)

CDI

TRANSACTION SETS USED IN

205 872

CODE	DEFINITION & EXPLANATION
1	Assumability
2	Callability
3	Prepayment
4	Convertibility
5	Limited Payment
6	Adjustability
7	User-defined
8	Negative Amortization
9	Automatic Refinance
10	Modification
11	Construction Phase
12	Permanent Phase
13	Payment Frequency
ZZ	Mutually Defined

1553 - License Type Code

Code specifying the type of license

TYPE=**ID** MIN=**2** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)

TOA

TRANSACTION SETS USED IN

186 267

CODE	DEFINITION & EXPLANATION
A1	Airline Transport Pilot
A2	All Cargo Air Service Certificate
C1	Certificate of Public Convenience and Necessity
C2	Commercial
C3	Competition Driver's License
F1	Flight Instructor
MV	Motor Vehicle Operator License
P1	Private
R1	Recreational
S1	Student
U1	U.S. Parachute Association Class A
U2	U.S. Parachute Association Class B
U3	U.S. Parachute Association Class C
U4	U.S. Parachute Association Class D

1554 - Tag Status Code

Code indicating the status of an Automatic Equipment Identification Tag TYPE=ID MIN=1 MAX=1

SEGMENTS USED IN (AS SIMPLE)
EI TSI W2

TRANSACTION SETS USED IN
160 228 322 418

CODE	DEFINITION & EXPLANATION
A	Axle Error
B	Bearing Error
C	Candidate Platform
D	Disqualification
E	Equipment Group Code Error
F	Length Error
G	Good
H	Performance
I	No Other Problems Flagged
J	Multiple Errors
K	OK - No Other Problems Flagged
L	Left Tag Bad
M	Equipment has Two Tags and the Equipment Initial and Number are not the Same
N	No Tag Read
O	Orientation Error
P	Platform Code Error
R	Right Tag Bad
S	Communication Fault
U	Unknown
W	Window Violation

1555 - Automatic Equipment Identification Consist Confidence Level Code

Code indicating the confidence level of the information being passed by an automatic equipment identification reader

TYPE=**ID** MIN=**1** MAX=**1**

SEGMENTS USED IN (AS SIMPLE)

AES

TRANSACTION SETS USED IN

160

CODE	DEFINITION & EXPLANATION
A	Axle Patterns are Questionable
D	Excessive Disqualifiers
G	Good (All information to follow is good)
M	Multiple Inconsistencies

1556 - Train Termination Status Code

Code indicating the train termination status

TYPE=**ID** MIN=**1** MAX=**1**

SEGMENTS USED IN (AS SIMPLE)

AES

TRANSACTION SETS USED IN

160

CODE	DEFINITION & EXPLANATION
N	Normal
O	Other
T	Time Out

1557 - Movement Type Code

Code indicating the type of movement at the automatic equipment identification reader site

TYPE=**ID** MIN=**1** MAX=**1**

SEGMENTS USED IN (AS SIMPLE)

AES

TRANSACTION SETS USED IN

160

CODE	DEFINITION & EXPLANATION
A	Through Movement Over Five Miles per Hour
B	Through Movement Under Five Miles per Hour
C	Stop and Go
D	Switching
E	Pull-by

1558 - Academic Summary Source Code

Code indicating the source of the summary data TYPE=ID MIN=1 MAX=1

SEGMENTS USED IN (AS SIMPLE)
SUM TST

TRANSACTION SETS USED IN
130 131 138 189 190 252

CODE	DEFINITION & EXPLANATION
A	Self-reported
B	High School Counselor
C	High School Transcript
D	College Transcript

1559 - Automatic Equipment Identification Site Status Code

Code indicating the site status of the automatic equipment identification reader

TYPE=**ID** MIN=**1** MAX=**1**

SEGMENTS USED IN (AS SIMPLE)

AES

TRANSACTION SETS USED IN

160

CODE	DEFINITION & EXPLANATION
A	Antenna Warning
B	Antenna Fatal
C	Communication Warning
D	Communication Fatal
E	Intertrack Communication Failure Warning
F	Intertrack Communication Failure Fatal
G	Good
H	Power Supply Failure
I	Power Supply Fatal
J	Power Supply Off
K	Software Set-up Failure
L	Available
M	Multiple Processor
O	Presence Loop Off
Q	Presence Loop On
R	Reader or Radio Frequency Warning
S	Reader or Radio Frequency Fatal
T	Transducer Warning
U	Transducer Fatal
V	Transducer Off
X	External Detector Warning
Y	External Detector Fatal
Z	Security

1560 - Interchange Type Code

Code indicating the type of description being used in the Junction Master TYPE=ID MIN=1 MAX=1

SEGMENTS USED IN (AS SIMPLE)
JCT

TRANSACTION SETS USED IN
437

CODE	DEFINITION & EXPLANATION
C	Trackage Rights or Haulage Agreement
E	End of Train Device
I	Joint Motor-Rail
J	Joint Industry Only
N	Normal (Rail-to-Rail)
O	Operating
P	Per Diem Relief Point
R	Rubber (Rail to Motor)
S	Shop
T	Truck (rail to Motor to rail)
V	Revenue Only
W	Water

1561 - Rail Junction Settlement Role Code

Code indicating carrier's junction settlement role TYPE=ID MIN=1 MAX=1

SEGMENTS USED IN (AS SIMPLE)
JS

TRANSACTION SETS USED IN
437

CODE	DEFINITION & EXPLANATION
H	Handling Carrier
L	Linehaul Carrier
S	Junction Settlement Carrier

1564 - Protocol ID Code

Code specifying protocol used to encrypt the session key TYPE=ID MIN=3 MAX=3

RESTRICTED TO USE IN SECURITY STRUCTURES ONLY

COMPOSITE DATA STRUCTURES USED IN
C031

SEGMENTS USED IN (AS COMPONENT)
S3S S4S

TRANSACTION SETS USED IN
None

CODE	DEFINITION & EXPLANATION
DE3	Triple Data Encryption Algorithm
DEA	Data Encryption Algorithm
ECE	Elliptic Curve Encryption
KEA	Key Encryption Algorithm
RSA	RSA Algorithm
ZZZ	Mutually Defined

1565 - Look-up Value

Value used to identify a certificate containing a public key

TYPE=**AN** MIN=**1** MAX=**4096**

RESTRICTED TO USE IN SECURITY STRUCTURES ONLY

COMPOSITE DATA STRUCTURES USED IN

C050

SEGMENTS USED IN (AS COMPONENT)

CSC S3A S3S S4A S4S

TRANSACTION SETS USED IN

815 993

1566 - Keying Material

Additional material required for decrypting the one-time key TYPE=**AN** MIN=**1** MAX=**512**

RESTRICTED TO USE IN SECURITY STRUCTURES ONLY

COMPOSITE DATA STRUCTURES USED IN

C031

SEGMENTS USED IN (AS COMPONENT)

S3S S4S

TRANSACTION SETS USED IN

None

1567 - One-time Encryption Key

Hexadecimally filtered encrypted one-time key TYPE=**AN** MIN=**1** MAX=**512**

RESTRICTED TO USE IN SECURITY STRUCTURES ONLY

COMPOSITE DATA STRUCTURES USED IN

C031

SEGMENTS USED IN (AS COMPONENT)

CODE	DEFINITION & EXPLANATION
MD2	MD2
MD4	MD4
MD5	MD5
MDC	MDC2
SHA	Secure hash algorithm
ZZZ	Mutually Defined

1576 - Inspected/Weighed Indicator Code

Code indicating whether product has been inspected and/or weighed TYPE=**ID** MIN=**1** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)

GA

TRANSACTION SETS USED IN

404 410 417 422 426 858 859

CODE	DEFINITION & EXPLANATION
IB	Both Inspected and Weighed
II	Inspected
IW	Weighed

1577 - Hazardous Material Regulations Exception Code

Code indicating if an exception exists for a finished good from the shipping requirements of the hazardous material regulations and what that exception is

TYPE=**ID** MIN=**1** MAX=**1**

SEGMENTS USED IN (AS SIMPLE)

LFG

TRANSACTION SETS USED IN

832

CODE	DEFINITION & EXPLANATION
1	No Exception
2	Excepted, Ground Transport Less than Limited Quantity
3	Excepted, Ground Transport Less than Limited Quantity and Consumer Commodity (Other Regulated Materials - Group D (ORM-D))

1578 - Export Exception Code

Code specifying why a Shipper's Export Declaration (SED) is not required

TYPE=**ID** MIN=**2** MAX=**2**

Code Sources

929

SEGMENTS USED IN (AS SIMPLE)

CODE	DEFINITION & EXPLANATION
1	Additional
2	Cumulative
3	Current
4	Original or Initial
5	Other
6	Prior
7	Summarized
8	Total
9	Earliest
A	Change
B	Decrease
C	Final
D	Consolidated
E	Partial Period
F	Accumulated
G	Accrual Basis
H	Charged
I	Excess
J	Future
K	Given
L	Incurred
M	Itemized
N	On Hand
O	Outstanding
P	Paid
Q	Payable
R	Received
S	Unitemized
T	Last Known
Z	Mutually Defined

1642 - Cryptographic Management Purpose Code

Code identifying the stated business purpose for exchanging public key on certificate information with a trading partner

TYPE=**ID** MIN=**3** MAX=**3**

RESTRICTED TO USE IN SECURITY STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

CSC

TRANSACTION SETS USED IN

815

CODE	DEFINITION & EXPLANATION
CCP	X509 Certificate Compromised
CER	X509 Certification Request
CEX	X509 Certificate Extension
CKL	X.509 Compromised Key List
CRL	X.509 Certificate Revocation List
CRQ	X509 Certificate Request
CRT	X509 Certificate
CRV	X509 Certificate Revocation
CSR	X509 Certificate Status Request
PUB	Public Key

1644 - Service Request Code

Code indicating the type of logistics service requested TYPE=**ID** MIN=**2** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)
B9A

TRANSACTION SETS USED IN
219 220

CODE	DEFINITION & EXPLANATION
CD	Carrier Turn Down
CO	Consolidation
CS	Carrier Selection
CT	Contracted Services
FA	Freight Allocation
FP	Freight Payment
RE	Rate Estimate
ST	Secure Transport

1650 - Shipment Status Indicator Code

Code indicating the status of a shipment TYPE=**ID** MIN=**2** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)
AT7

TRANSACTION SETS USED IN
212 214 240

CODE	DEFINITION & EXPLANATION
A1	Estimated to Arrive for Pick-up
A3	Shipment Returned to Shipper
A7	Refused by Consignee
A9	Shipment Damaged
AF	Carrier Departed Pickup Location with Shipment
AG	Estimated Delivery
AH	Attempted Delivery
AI	Shipment has been Reconsigned
AJ	Tendered for Delivery
AL	Shipment Conveyance Loaded to Rail Car
AM	Loaded on Truck
AN	Diverted to Air Carrier
AP	Delivery Not Completed
AR	Rail Arrival at Destination Intermodal Ramp
AV	Available for Delivery
AW	Shipment Available for Pick-up
B6	Estimated to Arrive at Carrier Terminal
BA	Connecting Line or Cartage Pickup
BC	Storage in Transit
BF	Booking Confirmed
BO	Shipment Conveyance Reported Bad Order
BR	Shipment Conveyance Released From Bad Order
C1	Estimated to Depart Terminal Location
C2	Delivered Empty
C3	Picked-up Empty
CA	Shipment Cancelled
CB	Completed Shipment *The final part of a partial shipment was delivered to the customer*
CD	Carrier Departed Delivery Location
CL	Trailer Closed Out
CP	Completed Loading at Pickup Location
D1	Completed Unloading at Delivery Location
D2	Partial Unload

DE Last Free Day without Demurrage for Shipment
The date of the last day that the shipment will be available for pick-up without demurrage charges

DO Shipment Delivery Order Received
Carrier has received the delivery order from the party responsible for notifying the carrier that the shipment and or container is available for pick-up at the pier

DP Dropped Off for Carrier Pick Up

I1 In-Gate

J1 Delivered to Connecting Line

K1 Arrived at Customs

K2 Customs Released

L1 Loading

LC Shipment Container Loaded to Chassis

NB Shipment Conveyance Received Without Paperwork

OA Out-Gate

OO Paperwork Received - Did not Receive Shipment or Equipment

OP All Paperwork has been Provided to Consignee

P1 Departed Terminal Location

PA Partial Shipment
Only a portion of the handling units for the shipment was delivered to the customer

PD Last Free Day without Per Diem for Shipment
The date of the last day that the shipment is available without a per diem charge

PR U.S. Customs and Border Protection (CBP) Hold at In-Bond Location

PS Rail Passing (Run-Through)

PU Pickup Attempted

R1 Received from Prior Carrier

RA Carrier Arrived at Rail Ramp

RD Carrier Departed Rail Ramp

RH Shipment Conveyance Released from Hold

RL Rail Departure from Origin Intermodal Ramp

S1 Trailer Spotted at Consignee's Location

SD Shipment Delayed

SN Shipment Not Picked Up By Carrier

UC Shipment Container Unloaded from Chassis

UR Shipment Conveyance Unloaded From Rail Car

X1 Arrived at Delivery Location

X2 Estimated Date and/or Time of Arrival at Consignee's Location

X3 Arrived at Pickup Location

X4 Arrived at Terminal Location

X5 Arrived at Delivery Location Loading Dock

X6 En Route to Delivery Location

X8 Arrived at Pickup Location Loading Dock

X9 Arrived at Carrier's Warehouse
The date that the freight arrived at the a warehouse owned by a carrier

XB Shipment Acknowledged

Y1 Arrived at the Multiple Country Consolidation (MCC) Hub
Y2 Departed from the Multiple Country Consolidation (MCC) Hub

1651 - Shipment Status or Appointment Reason Code

Code indicating the reason a shipment status or appointment reason was transmitted

TYPE=**ID** MIN=**2** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)

AT7

TRANSACTION SETS USED IN

212 214 240

CODE	DEFINITION & EXPLANATION
A1	Missed Delivery
A2	Incorrect Address
A3	Indirect Delivery
A5	Unable to Locate
A6	Address Corrected - Delivery Attempted
AA	Mis-sort
AD	Customer Requested Future Delivery
AE	Restricted Articles Unacceptable
AF	Accident
AG	Consignee Related
AH	Driver Related
AI	Mechanical Breakdown
AJ	Other Carrier Related
AK	Damaged, Rewrapped in Hub
AL	Previous Stop
AM	Shipper Related
AN	Holiday - Closed
AO	Weather or Natural Disaster Related
AP	Awaiting Export
AQ	Recipient Unavailable - Delivery Delayed
AR	Improper International Paperwork
AS	Hold Due to Customs Documentation Problems
AT	Unable to Contact Recipient for Broker Information
AU	Civil Event Related Delay
AV	Exceeds Service Limitations
AW	Past Cut-off Time
AX	Insufficient Pickup Time
AY	Missed Pickup
AZ	Alternate Carrier Delivered
B1	Consignee Closed
B2	Trap for Customer
B4	Held for Payment
B5	Held for Consignee

B8 Improper Unloading Facility or Equipment
B9 Receiving Time Restricted
BB Held per Shipper
BC Missing Documents
BD Border Clearance
BE Road Conditions
BF Carrier Keying Error
BG Other
BH Insufficient Time to Complete Delivery
BI Cartage Agent
BJ Customer Wanted Earlier Delivery
BK Prearranged Appointment
BL Held for Protective Service
BM Flatcar Shortage
BN Failed to Release Billing
BO Railroad Failed to Meet Schedule
BP Load Shifted
BQ Shipment Overweight
BR Train Derailment
BS Refused by Customer
BT Returned to Shipper
C1 Waiting for Customer Pickup
C2 Credit Hold
C3 Suspended at Customer Request
C4 Customer Vacation
C5 Customer Strike
C6 Waiting Shipping Instructions
C7 Waiting for Customer Specified Carrier
C8 Collect on Delivery Required
C9 Cash Not Available From Consignee
CA Customs (Import or Export)
CB No Requested Arrival Date Provided by Shipper
CC No Requested Arrival Time Provided by Shipper
CS Customer Cancelled Shipment
D1 Carrier Dispatch Error
D2 Driver Not Available
DU Duplicate Pickup Request
F1 Non-Express Clearance Delay
F2 International Non-carrier Delay
HB Held Pending Appointment
LG Lift Gate Required, Not Requested
MP Missed Pickup - Carrier Was Provided Incorrect Closing Time
MQ Missed Pickup - Dispatcher Error

MR Missed Pickup - Pickup Request Arrived Too Late
MS Missed Pickup - Driver Error
NF No Freight Available At Time Of Pickup

1799 - Nutrition Facts Table (NFT) Format Type

Codes identifying the different formats associated with the nutrition facts panel information.

TYPE=**ID** MIN=**1** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)
NF1

TRANSACTION SETS USED IN
832 897

CODE	DEFINITION & EXPLANATION
AB	Food for Use in Manufacturing Other Foods *Indicates the values of nutrition information elements are stated as unrounded (absolute), with a degree of precision (i.e. appropriate number of significant figures) corresponding to the accuracy of the analytical methodology used to produce the nutrition.*
N1	Nutritional Facts Table (NFT) *The Nutritional Facts Table provides information on energy (Calories) and thirteen nutrients, based on a serving of stated size (Canada).*
N2	Nutritional Facts Table (NFT) Dual *Dual Format is used to declare the nutrient content of (Canada): (a) Food as consumed for: Food requiring preparation prior to consumption. Foods that are customarily served combined with other foods, This is in addition to declaring the nutrients for the food as sold (as required by B.01.406(1)). [B.01.456, FDR] (b) To declare nutrients for different amounts of the food. [B.01.458, FDR]*
N3	Nutritional Facts Table (NFT) Aggregate/ Multiple *Aggregate/ Multiple Format are used either for (Canada): (a) Different kinds of foods. [B.01.457, FDR] (b) Or to declare nutrients for different amounts of the food. [B.01.458, FDR]*
N4	Nutritional Information (NI) *Nutrition Information is used for products specifically prohibited from displaying a nutrition facts table such as Foods for Special Dietary Use (Division 24) or Infant Foods (Division 25) of Canadian Food & Drug Regulations (FDR) (Canada)*
N5	Special Nutritional Facts Table (NFT) *The special NFT is for foods solely for children under two years of age per B.01.462 of FDR. This is applicable for foods that are promoted and sold solely for children under two years of age. Products that are also marketed to young children or adults are not subject to the special provisions in the regulations that apply to food for children under two years of age. (Canada)*
N6	Special Nutritional Facts Table (NFT) Aggregate/Multiple *For Aggregate/multiple, the special NFT is for foods solely for children under two years of age marked with aggregate or multiple special NFTs. - Different kinds of foods. [B.01.463, FDR] - Or to declare nutrients for different amounts of the food. [B.01.464, FDR] (Canada)*
N7	Nutrition Data Exempt *Trade Item Packaging is exempt or usually exempt from displaying Nutrition Facts Table (NFT) for products per Div. B.01.401 FDR other than small package exemption [Available Display Surface ADS (ADS) < 100 cm²].(Canada) See 5.3 list of products exempt from displaying a NFT [B.01.401(2)]*
N8	Nutritional Facts Table (NFT) Simplified Format *A food whose nutrient value is zero (0), as reported in the Nutrition Facts Table (NFT), for six*

or more of the calories or core nutrients, as per Health Canada.

CODE	DEFINITION & EXPLANATION
ZZ	Mutually Defined
CAP	Cap Pressure *Consists of a plastic or ceramic stopper held in place by a set of wires. A device which adheres to plastic or glass bottles with normal application torque. Pressures sensitive liners are supplied pressed into closures and adhere to the bottle finish when the closure is applied.*
CCN	Cork and Cage - Natural *Known as a muselet, a wire cage that fits over the cork of a bottle to prevent the cork from emerging under the pressure of the carbonated contents. Made of natural materials.*
CCP	Cap Crown Pry Off *A cap which requires tools to open. Example: a glass bottle with metal cap.*
CCS	Cork and Cage - Synthetic *Known as a muselet, a wire cage that fits over the cork of a bottle to prevent the cork from emerging under the pressure of the carbonated contents. Made of synthetic materials.*
COA	Cork - Alternative *Cork cylinders made of natural cork granules combined with food grade polymers, resins and binding agents that are molded into shape.*
COC	Cork - Composite *Cork cylinders made of natural cork granules which have been joined together using synthetic or natural binding agents that are molded into shape. Also referred to as Cork Aggolmerate.*
CON	Cork - Natural *Cork of natural materials. Need tools to remove the cork from the bottle*
COS	Cork - Synthetic *Cork made from synthetic material. Need tools to remove the cork from the bottle*
CPM	Cap Roll-on-Pilfer Proof - Metal *Metal cap that screws onto threads on the neck of a bottle, generally with a metal sleeve down the neck to resemble the traditional wine capsule ("foil").*
CPP	Cap Roll-on-Pilfer Proof - Plastic *Plastic cap that screws onto threads on the neck of a bottle, generally with a plastic sleeve down the neck to resemble the traditional wine capsule ("foil").*
CRC	Crown Cap *A type of bottle cap made by pressing a circular piece of metal around the top of the bottle and needs tools to open it.*
CTS	Cap Twist-off Crown Steel *Twist off crown cap that can be screwed off by hand. Example: beer bottle.*

FPO Peel off - Foil
Protective sleeve called a foil (commonly referred to as a "capsule") covering the top of commercially corked wine and protecting the cork.

PBT Push Button Tab
A metal closure with scored tabs when pushed, opens the container without dislodging the tabs.

PTF Pull Tab - Flexible
A flexible cover which can be easily removed in order to open a container.

PTM Pull Tab - Metal
A metal lid closure scored and has a tab when pulled, opens the container without dislodging the closure. The most common seal of aluminium cans.

SPP Spigot - Plastic
A spigot made of plastic which is a protruding edge which allows the lifting and pouring of liquids contained within a container.

SPS Spigot - Steel
A spigot made of steel which is a protruding edge which allows the lifting and pouring of liquids contained within a container.

STF Swing-Top / Flip-Top
Consists of a plastic or ceramic stopper held in place by a set of wires. A device which adheres to plastic or glass bottles with normal application torque. Pressures sensitive liners are supplied pressed into closures and adhere to the bottle finish when the closure is applied.

TCS T-Cork Stopper
Reclosable cork with top. Opened by hand.

ZIP Zip Tab
A metal ring that is pulled off the top of a can to provide an opening for drinking or pouring.

CODE	DEFINITION & EXPLANATION
BR	Beer *A beverage that is made by the fermentation of cereals, usually barley or hops but also maize, wheat, rice and sorghum, by the addition of yeast and water. These products are differentiated by various brewing techniques and include products described as lager, bitter, ale, stout, lambic and specialty beers. Includes beer mixed drinks. Excludes products such as soft drinks that may be labelled as beer, such as ginger beer/ale and root beer.*
CR	Cider *A beverage that is produced by fermenting the pulp of apples or the juice of pears, with or without the addition of water and /or sugar. These products are also called cider (apple) or perry (pear). They can be sweet, dry, cloudy or clear. Includes apple and pear wines. Excludes products such as beers, and non-fermented apple/pear drinks and juices .*
LR	Liqueur *An alcoholic beverage flavored variously by fruits, herbs, spices, flowers, nuts or cream, combined with distilled spirits.*
PD	Pre-mixed drink(Coolers & Cocktails) *An alcoholic beverage that is pre-mixed with another drink, usually a soft drink. Includes soft or milk based drinks which have spirits added during the production process. Also includes pre-mixed cocktails, such as vodka martini and mixed wine drinks such as spritzers.*
ST	Spirits *An alcoholic beverage distilled from fermented fruit juice, fruit, grains or sugar. Products will normally have a high alcohol content of around 35-40%. Includes products such as brandy, schnapps, gin, rum, tequila, vodka and whisky.*
WE	Wine *A beverage made by the fermentation of the juice of the grape, usually having an alcoholic content of 14 percent or less. These products can be white, red or rosÃ© in color and dry, sweet or medium in flavor.*

CODE	DEFINITION & EXPLANATION
AB	Absinthe *It is an anise-flavored spirit derived from botanicals, including the flowers and leaves of Artemisia absinthium ("grand wormwood"), together with green anise, sweet fennel, and other medicinal and culinary herbs. Absinthe traditionally has a natural green color, but may also be colorless.*
AM	Armagnac *Armagnac is a distinctive kind of brandy produced in the Armagnac region in Gascony, southwest France*
AP	Applejack *Applejack is a strong apple-flavored alcoholic drink produced from apples, popular in the American colonial era. The name derives from "jacking," a term for "increasing" (alcohol content) and specifically for "freeze distilling," the traditional method of producing the drink.*
AQ	Aquavit *Aquavit, or Akvavit, is a distilled spirit that is principally produced in Scandinavia. Aquavit is distilled from grain and potatoes, and is flavored with a variety of herbs.*
AR	Arak Raki Ouzo *All three of ouzo, arak and the Turkish raki are distilled from the leftovers of vinication - grape seeds, stems, skins and the like.*
BA	Baijiu *Baijiu, also known as shaojiu, is a category of at least a dozen Chinese liquors made from grain. Baijiu literally means "white (clear) alcohol" or liquor.*
BI	Bitters *A bitters is traditionally an alcoholic preparation flavored with botanical matter so that the end result is characterized by a bitter, sour, or bittersweet flavor.*
BO	Bourbon *Bourbon whiskey is a type of American whiskey, a barrel-aged distilled spirit made primarily from corn.*
BR	Brandy *Brandy is a spirit produced by distilling wine. Brandy generally contains 35-60% alcohol by volume (70-120 US proof) and is typically drunk as an after-dinner digestif.*
CA	Cachaca *Cachaca is a distilled spirit made from fermented sugarcane juice. Also known as aguardente, pinga, caninha, Marvada and other names, it is the most popular spirit among distilled alcoholic beverages in Brazil.*
CL	Calvados *Calvados is an apple or pear brandy from the Normandy region in France.*
CO	Cognac *Cognac is a variety of brandy named after the town of Cognac, France. It is produced in the*

surrounding wine-growing region in the departments of Charente and Charente-Maritime.

FR Fruit Spirit
Fruit Spirit, also known as Eau de Vie (French for spirits), is a clear, colorless fruit brandy that is produced by means of fermentation and double distillation.

GE Genever
Genever is a clear, botanically rich, malted grain-based spirit that can only be made in Holland or Belgium. It is a blend of two or more distillates.

GI Gin
Gin is a distilled alcoholic drink that derives its predominant flavor from juniper berries.

GR Grappa
Grappa is an alcoholic beverage, a fragrant, grape-based pomace brandy of Italian origin that contains 35 to 60 percent alcohol by volume (70 to 120 US proof).

HU Huangjiu
Huangjiu, often translated as yellow wine, is a type of Chinese alcoholic beverage made from water, cereal grains such as rice, sorghum, millet, or wheat, and a qu starter culture.

KO Korn
Korn, also known as Kornbrand or Kornbranntwein, is a German colorless distilled beverage produced from fermented cereal grain.

MA Marc
Marc is distilled from what is left over after pressing the grapes used in wine production, including the skins, pulp, seeds.

ME Mezcal
Mezcal, or mescal, is a distilled alcoholic beverage made from any type of agave.

OR Orujo
Orujo is a pomace brandy from northern Spain. It is a transparent spirit with an alcohol content over 50% (100° proof).

PA Pastis
Pastis is an anise-flavored spirit and aperitif from France, typically containing less than 100 g/l sugar and 40-45% ABV (alcohol by volume).

PI Pisco
A white brandy made in Peru from muscat grapes.

RA Rum Agricole
Rum Agricole, or Rhum Agricole, is the French term for cane juice rum, a style of rum originally distilled in the French Caribbean islands, made from freshly squeezed sugar cane juice.

RK Rakia
Rakia, Rakija, Arak, Raki or Ouzo, is the collective term for fruit brandy popular in the Balkans. It is colorless, unless herbs or other ingredients are added.

RU Rum
Rum is a distilled alcoholic drink made from sugarcane byproducts, such as molasses, or directly from sugarcane juice, by a process of fermentation and distillation. The distillate, a clear liquid, is then usually aged in oak barrels.

SA Sake
Sake, also known as Japanese rice wine, is an alcoholic beverage made by fermenting rice that has been polished to remove the bran.

SC Schnapps
Schnapps is a type of alcoholic beverage that may take several forms, including distilled fruit brandies, herbal liqueurs, infusions, and flavored liqueurs made by adding fruit syrups, spices, or artificial flavorings to neutral grain spirits.

SH Shochu
Shochu is a Japanese distilled beverage less than 45% alcohol by volume. It is typically distilled from rice (kome), barley (mugi), and sweet potatoes.

SM Sambuca
Sambuca is an Italian anise-flavored, usually colorless, liqueur. Its most common variety is often referred to as white sambuca to differentiate it from other varieties that are deep blue in color (black sambuca) or bright red (red sambuca).

SO Soju
Soju is a clear, colorless distilled beverage of Korean origin.

TE Tequila
Tequila is made from the distillation of the juice from the blue agave plant.

TM Tequila Mixto
Mixto tequila is tequila that is not 100% agave, and must first be mixed with sugar or molasses before fermentation begins.

TN Tennessee
Tennessee whiskeys undergo a filtering stage called the Lincoln County Process, in which the whiskey is filtered through (or steeped in) a thick layer of maple charcoal before it is put into new charred oak barrels for aging.

UD Unidentified
Identifies product attributes that are unidentifiable given existing or available product information.

UN Unclassified
This term is used to describe those product attributes that are unidentifiable given existing or available product information.

VO Vodka
Vodka may be distilled from any starch or sugar-rich plant matter. Most vodka today is produced from grains such as sorghum, corn, rye or wheat. Among grain vodkas, rye and wheat vodkas are generally considered superior.

WH Whisky
Whisky, or whiskey, is a type of distilled alcoholic beverage made from fermented grain mash.

WS Wine Spirit
Wine that has had a spirit added to it.

CODE	DEFINITION & EXPLANATION
AN	Anejo *Anejo or aged or vintage refer to the aged process in which youngest teqila is stored for at least one year, but less than three years in small oak barrels.*
BE	Blended *Blended Whiskey is the product of blending different types of whiskeys and sometimes also neutral grain spirits, colorings, and flavorings.*
BG	Blended Grain *Blended Grain Whiskey is the product of blending different types of single grain whiskies.*
BL	Blanco *Blanco (white or plata (silver)) is an unaged spirit and bottled or stored immediately after distillation, or aged less than two months in stainless steel or neutral oak barrels.*
BM	Blended Malt *Blended malt, formerly called a vatted malt, or pure malt, is a blend of different single malt whiskies from different distilleries.*
EA	Extra Anejo *Extra Anejo (ultra-aged) refers to the aged process in which tequila must be aged for a minimum of three years in oak barrels.*
HA	Hors d'age *Beyond Age known as Hors d'age is a designation which Bureau National Interprofessionnel du Cognac (BNIC) states is equal to Extra Old (XO), used by producers to market a high-quality product beyond the official age scale (the storage period in a cask).*
JG	Jonge *Jonge refer to younger or newer style of genever that contains no more than 15% malt wine and 10 grams of sugar per liter.*
JO	Joven *Joven tequila is usually silver tequila with the addition of grain alcohols and caramel color, however, some higher end gold tequilas may be a blend of silver and reposado.*
LD	London Dry *London Dry, or Dry, refers to a Gin that the base spirit is distilled to a completely neutral spirit of 96% alcoholic volume. All flavors must be added through the distillation process, and be from natural plant materials. Nothing more may be added after distillation except for water and a tiny amount of sugar.*
OU	Oude *Oude refers to older style of genever that contains at least 15% malt wine, but no more than 20 grams of sugar per liter.*
RE	Reposado *Resposado, or rested, a type of tequila that has been aged in oak for a period of two to twelve months.*

SG Single Grain
A single-grain scotch whisky contains barley and one or more other cereal grains, usually wheat or corn. It refers to a product made at a single distillery.

SM Single Malt
Single malt whisky is from a single distillery made exclusively from malted barley.

SO Sour Mash
Sour Mash refers to a process used in the distilling industry that uses material from an older batch of mash to start the fermentation of a new batch. Bourbon made using this process can be referred to as sour mash bourbon.

SW Sweet Mash
Sweet Mash refers to a process used in the distilling industry that does not use material from an older batch of mash but rather using yeast to start the fermentation of a new batch of bourbon. Bourbon made using this process can be referred to as sweet mash bourbon.

UD Unidentified
Identifies product attributes that are unidentifiable given existing or available product information.

UN Unclassified
This term is used to describe those product attributes that are unidentifiable given existing or available product information.

VO VSOP
Very Superior Old Pale, known as VSOP or Reserve, designates a blend in which the youngest brandy is stored for at least four years in a cask.

VS VS
Very Special, known as VS, designates a blend in which the youngest brandy has been stored for at least two years in a cask.

XO XO
Extra Old, known as XO or Napoleon, designates a blend in which the youngest brandy is stored for at least six years in a cask.

832 897

CODE	DEFINITION & EXPLANATION
CF	Charcoal Filtered *Carbon filtering is a method of filtering that uses a bed of activated carbon to remove contaminants and impurities, using chemical adsorption.*
CH	Chill Filtered *Chill filtering is a method in whisky making for removing residue. In chill filtering, whisky is cooled to between -10 and 4 degrees Celsius (often roughly 0 degrees) and passed through a fine adsorption filter. This is done mostly for cosmetic reasons - to remove cloudiness - rather than to improve taste or consistency.*
CS	Cask Strength *Cask strength also known as "Barrel Proof" or "Barrel Strength," is a term used by whisky producers to describe a whisky that has not been substantially diluted after its storage in a cask for maturation.*
NC	Non-Chill Filtered *Non-chill filtering is a method in whisky making to preserve peat particles that contribute to the smokiness and aroma of whiskey. Non-chill-filtered whisky is often advertised as being more "natural," "authentic," or "old-fashioned."*
SB	Small Batch *Small batch whiskey is whiskey produced by mixing the contents of a relatively small number of selected barrels. Small batch whiskeys are commercially positioned for the upper-premium market.*
SI	Single Barrel *Single barrel whiskey (or single cask whiskey) is a premium class of whiskey in which each bottle comes from an individual aging barrel, instead of coming from blending together the contents of various barrels to provide uniformity of color and taste.*
SP	Single Pot *Single pot still whiskey is a style of Irish whiskey made by a single distillery from a mixed mash of malted and unmalted barley distilled in a pot still.*
SW	Straight Whisky *Straight whiskey or straight whisky, as defined in United States law, is whiskey created by distilling a fermented (malted or unmalted) cereal grain mash to create a spirit not exceeding 80% alcohol content by volume (abv) and then aging the spirit for at least two years at an abv concentration not exceeding 62.5% at the start of the aging process.*

TYPE=**ID** MIN=**2** MAX=**3**

SEGMENTS USED IN (AS SIMPLE)

BER

TRANSACTION SETS USED IN

832 897

CODE	DEFINITION & EXPLANATION
01	Standard American Beer-American Light Lager *Light Lager is a very low in malt flavor with a light and dry body. The hop character is low and should only balance with no signs of flavor or aroma. European versions are about half the alcohol (2.5-3.5% abv) as their regular beer yet show more flavor (some use 100% malt) then the American counterparts.*
02	Standard American Beer-American Lager *American lager or North American lager is pale lager that is produced in The United States. A very pale, highly-carbonated, light-bodied, well-attenuated lager with a very neutral flavor profile and low bitterness. Served very cold, it can be a very refreshing and thirst quenching drink.*
03	Standard American Beer-Cream Ale *A cream ale is related to pale lager. They are generally brewed to be light and refreshing with a straw to pale golden color.*
04	Standard American Beer-American Wheat Beer *Color is pale to light amber. This beer can be made using either ale or lager yeast. American wheat beer is generally brewed with at least 30 percent malted wheat. These beers are typically served with the yeast in the bottle, and pour cloudy. Traditionally more hoppy than a German hefeweizen, American wheat beer differs in that it should not offer flavors of banana or clove. It is a refreshing summer style. Darker versions of this style also exist but are not as common.*
05	International Lager-International Pale Lager *A highly-attenuated pale lager without strong flavors, typically well-balanced and highly carbonated. Served cold, it is refreshing and thirst-quenching.*
06	International Lager-International Amber Lager *A well-attenuated malty amber lager with an interesting caramel or toast quality and restrained bitterness. Usually fairly well-attenuated, often with an adjunct quality. Smooth, easily-drinkable lager character.*
07	International Lager-International Dark Lager *A darker and somewhat sweeter version of international pale lager with a little more body and flavor, but equally restrained in bitterness. The low bitterness leaves the malt as the primary flavor element, and the low hop levels provide very little in the way of balance.*
08	Czech Lager-Czech Pale Lager *A lighter-bodied, rich, refreshing, hoppy, bitter pale Czech lager having the familiar flavors of the stronger Czech Premium Pale Lager (Pilsner-type) beer but in a lower alcohol, lighter-bodied, and slightly less intense format.*
09	Czech Lager-Czech Premium Pale Lager *Rich, characterful, pale Czech lager, with considerable malt and hop character and a long,*

rounded finish. Complex yet well-balanced and refreshing. The malt flavors are complex for a Pilsner-type beer, and the bitterness is strong but clean and without harshness, which gives a rounded impression that enhances drinkability.

10 Czech Lager-Czech Amber Lager
Malt-driven amber Czech lager with hop character that can vary from low to quite significant. The malt flavors can vary quite a bit, leading to different interpretations ranging from drier, bready, and slight biscuit to sweeter and somewhat caramelly.

11 Czech Lager-Czech Dark Lager
A rich, dark, malty Czech lager with a roast character that can vary from almost absent to quite prominent. Malty with an interesting and complex flavor profile, with variable levels of hopping providing a range of possible interpretations.

12 Pale Malty European Lager-Munich Helles
A clean, malty, gold-colored German lager with a smooth grainy-sweet malty flavor and a soft, dry finish. Subtle spicy, floral, or herbal hops and restrained bitterness help keep the balance malty but not sweet, which helps make this beer a refreshing, everyday drink.

13 Pale Malty European Lager-Festbier
A smooth, clean, pale German lager with a moderately strong malty flavor and a light hop character. Deftly balances strength and drinkability, with a palate impression and finish that encourages drinking. Showcases elegant German malt flavors without becoming too heavy or filling.

14 Pale Malty European Lager-Helles Bock
A relatively pale, strong, malty German lager beer with a nicely attenuated finish that enhances drinkability. The hop character is generally more apparent than in other bocks.

15 Pale Bitter European beer-German Leichtbier
A pale, highly-attenuated, light-bodied German lager with lower alcohol and calories than normal-strength beers. Moderately bitter with noticeable malt and hop flavors, the beer is still interesting to drink.

16 Pale Bitter European beer-Kolsch
A clean, crisp, delicately-balanced beer usually with a very subtle fruit and hop character. Subdued maltiness throughout leads into a pleasantly well-attenuated and refreshing finish. Freshness makes a huge difference with this beer, as the delicate character can fade quickly with age. Brilliant clarity is characteristic.

17 Pale Bitter European beer-German Helles Exportbier
A pale, well-balanced, smooth German lager that is slightly stronger than the average beer with a moderate body and a mild, aromatic hop and malt character.

18 Pale Bitter European beer-German Pils
A light-bodied, highly-attenuated, gold-colored, bottom-fermented bitter German beer showing excellent head retention and an elegant, floral hop aroma. Crisp, clean, and refreshing, a German Pils showcases the finest quality German malt and hops.

19 Amber Malty European Lager-MÃ¤rzen
An elegant, malty German amber lager with a clean, rich, toasty and bready malt flavor, restrained bitterness, and a dry finish that encourages another drink. The overall malt impression is soft, elegant, and complex, with a rich aftertaste that is never cloying or heavy.

20 Amber Malty European Lager-Rauchbier
An elegant, malty German amber lager with a balanced, complementary beechwood smoke character. Toasty-rich malt in aroma and flavor, restrained bitterness, low to high smoke flavor, clean fermentation profile, and an attenuated finish are characteristic.

21 Amber Malty European Lager-Dunkles Bock
A dark, strong, malty German lager beer that emphasizes the malty-rich and somewhat toasty qualities of continental malts without being sweet in the finish.

22 Amber Bitter European Beer-Vienna Lager
A moderate-strength amber lager with a soft, smooth maltiness and moderate bitterness, yet finishing relatively dry. The malt flavor is clean, bready-rich, and somewhat toasty, with an elegant impression derived from quality base malts and process, not specialty malts and adjuncts.

23 Amber Bitter European Beer-Altbier
A well-balanced, well-attenuated, bitter yet malty, clean, and smooth, amber- to copper-colored German beer. The bitterness is balanced by the malt richness, but the malt intensity and character can range from moderate to high (the bitterness increases with the malt richness).

24 Amber Bitter European Beer-Pale Kellerbier
A young, fresh Helles, so while still a malty, fully-attenuated Pils malt showcase, the hop character (aroma, flavor and bitterness) is more pronounced, and the beer is cloudy, often with some level of diacetyl, and possibly has some green apple and/or other yeast-derived notes. As with the traditional Helles, the Keller version is still a beer intended to be drunk by the liter, so overall it should remain a light, refreshing, easy drinking golden lager.

25 Amber Bitter European Beer-Amber Kellerbier
A young, unfiltered, and unpasteurized beer that is between a Helles and Marzen in color, spicier in the hops with greater attenuation. Interpretations range in color and balance, but remain in the drinkable 4.8% ABV neighborhood. Balance ranges from the dry, spicy and pale-colored interpretations by St. Georgen and LÃ¶wenbrÃ¤u of Buttenheim, to darker and maltier interpretations in the Frankische Schweiz. This style is above all a method of producing simple drinkable beers for neighbors out of local ingredients to be served fresh. Balance with a focus on drinkability and digestibility is important.

26 Dark European Lager-Munich Dunkel
Characterized by depth, richness and complexity typical of darker Munich malts with the accompanying Maillard products. Deeply bready-toasty, often with chocolate-like flavors in the freshest examples, but never harsh, roasty, or astringent; a decidedly malt-balanced beer, yet still easily drinkable.

27 Dark European Lager-Schwarzbier
A dark German lager that balances roasted yet smooth malt flavors with moderate hop bitterness. The lighter body, dryness, and lack of a harsh, burnt, or heavy aftertaste helps make this beer quite drinkable.

28 Strong European Beer-Doppelbock
A strong, rich, and very malty German lager that can have both pale and dark variants. The darker versions have more richly-developed, deeper malt flavors, while the paler versions have slightly more hops and dryness.

29 Strong European Beer-Eisbock
A strong, full-bodied, rich, and malty dark German lager often with a viscous quality and strong flavors. Even though flavors are concentrated, the alcohol should be smooth and warming, not burning.

30 Strong European Beer-Baltic Porter
Baltic Porter often has the malt flavors reminiscent of an English porter and the restrained roast of a schwarzbier, but with a higher OG and alcohol content than either. Very complex, with multi-layered malt and dark fruit flavors.

31 German Wheat Beer-Weissbier
A pale, refreshing German wheat beer with high carbonation, dry finish, a fluffy mouthfeel, and a distinctive banana-and-clove yeast character.

32 German Wheat Beer-Dunkles Weissbier
A moderately dark German wheat beer with a distinctive banana-and-clove yeast character,

supported by a toasted bread or caramel malt flavor. Highly carbonated and refreshing, with a creamy, fluffy texture and light finish that encourages drinking.

33 German Wheat Beer-Weizenbock
A strong, malty, fruity, wheat-based ale combining the best malt and yeast flavors of a Weissbier (pale or dark) with the malty-rich flavor, strength, and body of a Dunkles Bock or Doppelbock.

34 British Bitter-Ordinary Bitter
Low gravity, low alcohol levels, and low carbonation make this an easy-drinking session beer. The malt profile can vary in flavor and intensity, but should never override the overall bitter impression. Drinkability is a critical component of the style.

35 British Bitter-Best Bitter
A flavorful, yet refreshing, session beer. Some examples can be more malt balanced, but this should not override the overall bitter impression. Drinkability is a critical component of the style.

36 British Bitter-Strong Bitter
An average-strength to moderately-strong British bitter ale. The balance may be fairly even between malt and hops to somewhat bitter. Drinkability is a critical component of the style. A rather broad style that allows for considerable interpretation by the brewer.

37 Pale Commonwealth Beer-British Golden Ale
A hop-forward, average-strength to moderately-strong pale bitter. Drinkability and a refreshing quality are critical components of the style.

38 Pale Commonwealth Beer-Australian Sparkling Ale
Smooth and balanced, all components merge together with similar intensities. Moderate flavors showcasing Australian ingredients. Large flavor dimension. Very drinkable, suited to a hot climate. Relies on yeast character.

39 Pale Commonwealth Beer-English IPA
A hoppy, moderately-strong, very well-attenuated pale British ale with a dry finish and a hoppy aroma and flavor. Classic British ingredients provide the best flavor profile.

40 Brown British Beer-Dark Mild
A dark, low-gravity, malt-focused British session ale readily suited to drinking in quantity. Refreshing, yet flavorful, with a wide range of dark malt or dark sugar expression.

41 Brown British Beer-British Brown Ale
A malty, brown caramel-centric British ale without the roasted flavors of a Porter.

42 Brown British Beer-English Porter
A moderate-strength brown beer with a restrained roasty character and bitterness. May have a range of roasted flavors, generally without burnt qualities, and often has a chocolate-caramel-malty profile.

43 Scottish Ale-Scottish Light
A malt-focused, generally caramelly beer with perhaps a few esters and occasionally a butterscotch aftertaste. Hops only to balance and support the malt. The malt character can range from dry and grainy to rich, toasty, and caramelly, but is never roasty and especially never has a peat smoke character. Traditionally the darkest of the Scottish ales, sometimes nearly black but lacking any burnt, overtly roasted character.

44 Scottish Ale-Scottish Heavy
A malt-focused, generally caramelly beer with perhaps a few esters and occasionally a butterscotch aftertaste. Hops only to balance and support the malt. The malt character can range from dry and grainy to rich, toasty, and caramelly, but is never roasty and especially never has a peat smoke character.

45 Scottish Ale-Scottish Export
The Scottish Export is the strongest of the three lower-ABV ales in the family. A malt-

forward, low-ABV, toasty-not-roasty beer with minimal hops, but at the 80 shilling level we're expecting a more pronounced set of flavors.

46 Irish Beer-Irish Red Ale
An easy-drinking pint, often with subtle flavors. Slightly malty in the balance sometimes with an initial soft toffee/caramel sweetness, a slightly grainy-biscuity palate, and a touch of roasted dryness in the finish. Some versions can emphasize the caramel and sweetness more, while others will favor the grainy palate and roasted dryness.

47 Irish Beer-Irish Stout
A black beer with a pronounced roasted flavor, often similar to coffee. The balance can range from fairly even to quite bitter, with the more balanced versions having a little malty sweetness and the bitter versions being quite dry. Draught versions typically are creamy from a nitro pour, but bottled versions will not have this dispense-derived character. The roasted flavor can be dry and coffee-like to somewhat chocolaty.

48 Irish Beer-Irish Extra Stout
A fuller-bodied black beer with a pronounced roasted flavor, often similar to coffee and dark chocolate with some malty complexity. The balance can range from moderately bittersweet to bitter, with the more balanced versions having up to moderate malty richness and the bitter versions being quite dry.

49 Dark British Beer-Sweet Stout
A very dark, sweet, full-bodied, slightly roasty ale that can suggest coffee-and-cream, or sweetened espresso.

50 Dark British Beer-Oatmeal Stout
A very dark, full-bodied, roasty, malty ale with a complementary oatmeal flavor. The sweetness, balance, and oatmeal impression can vary considerably.

51 Dark British Beer-Tropical Stout
A very dark, sweet, fruity, moderately strong ale with smooth roasty flavors without a burnt harshness.

52 Dark British Beer-Foreign Extra Stout
A very dark, moderately strong, fairly dry, stout with prominent roast flavors.

53 Strong British Ale-British Strong Ale
An ale of respectable alcoholic strength, traditionally bottled-conditioned and cellared. Can have a wide range of interpretations, but most will have varying degrees of malty richness, late hops and bitterness, fruity esters, and alcohol warmth. Judges should allow for a significant range in character, as long as the beer is within the alcohol strength range and has an interesting 'British' character, it likely fits the style. The malt and adjunct flavors and intensity can vary widely, but any combination should result in an agreeable palate experience.

54 Strong British Ale-Old Ale
An ale of moderate to fairly significant alcoholic strength, bigger than standard beers, though usually not as strong or rich as barley wine. Often tilted towards a maltier balance.

55 Strong British Ale-Wee Heavy
Rich, malty, dextrinous, and usually caramel-sweet, these beers can give an impression that is suggestive of a dessert. Complex secondary malt and alcohol flavors prevent a one-dimensional quality. Strength and maltiness can vary, but should not be cloying or syrupy.

56 Strong British Ale-English Barleywine
A showcase of malty richness and complex, intense flavors. Chewy and rich in body, with warming alcohol and a pleasant fruity or hoppy interest. When aged, it can take on port-like flavor.

57 Pale American Ale-Blonde Ale
Easy-drinking, approachable, malt-oriented American craft beer, often with interesting fruit,

hop, or character malt notes. Well-balanced and clean, is a refreshing pint without aggressive flavors.

58 Pale American Ale-American Pale Ale
A pale, refreshing and hoppy ale, yet with sufficient supporting malt to make the beer balanced and drinkable. The clean hop presence can reflect classic or modern American or New World hop varieties with a wide range of characteristics. An average-strength hop-forward pale American craft beer, generally balanced to be more accessible than modern American IPAs.

59 Amber and Brown American Beer-American Amber Ale
An amber, hoppy, moderate-strength American craft beer with a caramel malty flavor. The balance can vary quite a bit, with some versions being fairly malty and others being aggressively hoppy. Hoppy and bitter versions should not have clashing flavors with the caramel malt profile.

60 Amber and Brown American Beer-California Common
A lightly fruity beer with firm, grainy maltiness, interesting toasty and caramel flavors, and showcasing rustic, traditional American hop characteristics.

61 Amber and Brown American Beer-American Brown Ale
A malty but hoppy beer frequently with chocolate and caramel flavors. The hop flavor and aroma complements and enhances the malt rather than clashing with it.

62 American Porter and Stout-American Porter
A substantial, malty dark beer with a complex and flavorful dark malt character.

63 American Porter and Stout-American Stout
A fairly strong, highly roasted, bitter, hoppy dark stout. Has the body and dark flavors typical of stouts with a more aggressive American hop character and bitterness.

64 American Porter and Stout-Imperial Stout
An intensely-flavored, big, dark ale with a wide range of flavor balances and regional interpretations. Roasty-burnt malt with deep dark or dried fruit flavors, and a warming, bittersweet finish. Despite the intense flavors, the components need to meld together to create a complex, harmonious beer, not a hot mess.

65 IPA-American IPA
A decidedly hoppy and bitter, moderately strong American pale ale, showcasing modern American or New World hop varieties. The balance is hop-forward, with a clean fermentation profile, dryish finish, and clean, supporting malt allowing a creative range of hop character to shine through.

66 IPA-Specialty IPA - Belgian IPA
An IPA with the fruitiness and spiciness derived from the use of Belgian yeast. The examples from Belgium tend to be lighter in color and more attenuated, similar to a tripel that has been brewed with more hops. This beer has a more complex flavor profile and may be higher in alcohol than a typical IPA.

67 IPA-Specialty IPA - Black IPA
A beer with the dryness, hop-forward balance, and flavor characteristics of an American IPA, only darker in color - but without strongly roasted or burnt flavors. The flavor of darker malts is gentle and supportive, not a major flavor component. Drinkability is a key characteristic.

68 IPA-Specialty IPA - Brown IPA
Hoppy, bitter, and moderately strong like an American IPA, but with some caramel, chocolate, toffee, and/or dark fruit malt character as in an American Brown Ale. Retaining the dryish finish and lean body that makes IPAs so drinkable, a Brown IPA is a little more flavorful and malty than an American IPA without being sweet or heavy.

69 IPA-Specialty IPA - Red IPA
Hoppy, bitter, and moderately strong like an American IPA, but with some caramel, toffee,

and/or dark fruit malt character. Retaining the dryish finish and lean body that makes IPAs so drinkable, a Red IPA is a little more flavorful and malty than an American IPA without being sweet or heavy.

70 IPA-Specialty IPA - Rye IPA
A decidedly hoppy and bitter, moderately strong American pale ale, showcasing modern American and New World hop varieties and rye malt. The balance is hop-forward, with a clean fermentation profile, dry finish, and clean, supporting malt allowing a creative range of hop character to shine through.

71 IPA-Specialty IPA - White IPA
A fruity, spicy, refreshing version of an American IPA, but with a lighter color, less body, and featuring either the distinctive yeast and/or spice additions typical of a Belgian witbier.

72 Strong American Ale-Double IPA
An intensely hoppy, fairly strong pale ale without the big, rich, complex maltiness and residual sweetness and body of an American barleywine. Strongly hopped, but clean, dry, and lacking harshness. Drinkability is an important characteristic; this should not be a heavy, sipping beer.

73 Strong American Ale-American Strong Ale
A strong, full-flavored American ale that challenges and rewards the palate with full malty and hoppy flavors and substantial bitterness. The flavors are bold but complementary, and are stronger and richer than average-strength pale and amber American ales.

74 Strong American Ale-American Barleywine
A well-hopped American interpretation of the richest and strongest of the English ales. The hop character should be evident throughout, but does not have to be unbalanced. The alcohol strength and hop bitterness often combine to leave a very long finish.

75 Strong American Ale-Wheatwine
A richly textured, high alcohol sipping beer with a significant grainy, bready flavor and sleek body. The emphasis is first on the bready, wheaty flavors with interesting complexity from malt, hops, fruity yeast character and alcohol complexity.

76 European Sour Ale-Berliner Weisse
A very pale, refreshing, low-alcohol German wheat beer with a clean lactic sourness and a very high carbonation level. A light bread dough malt flavor supports the sourness, which shouldn't seem artificial. Any Brettanomyces funk is restrained.

77 European Sour Ale-Flanders Red Ale
A sour, fruity, red wine-like Belgian-style ale with interesting supportive malt flavors and fruit complexity. The dry finish and tannin completes the mental image of a fine red wine.

78 European Sour Ale-Oud Bruin
A malty, fruity, aged, somewhat sour Belgian-style brown ale.

79 European Sour Ale-Lambic
A fairly sour, often moderately funky wild Belgian wheat beer with sourness taking the place of hop bitterness in the balance. Traditionally spontaneously fermented in the Brussels area and served uncarbonated, the refreshing acidity makes for a very pleasant cafÃ© drink.

80 European Sour Ale-Gueuze
A complex, pleasantly sour but balanced wild Belgian wheat beer that is highly carbonated and very refreshing. The spontaneous fermentation character can provide a very interesting complexity, with a wide range of wild barnyard, horse blanket, or leather characteristics intermingling with citrusy-fruity flavors and acidity.

81 European Sour Ale-Fruit Lambic
A complex, fruity, pleasantly sour, wild wheat ale fermented by a variety of Belgian microbiota, and showcasing the fruit contributions blended with the wild character. The type

of fruit can sometimes be hard to identify as fermented and aged fruit characteristics can seem different from the more recognizable fresh fruit aromas and flavors.

82 Belgian Ale-Witbier
A refreshing, elegant, tasty, moderate-strength wheat-based ale.

83 Belgian Ale-Belgian Pale Ale
A moderately malty, somewhat fruity, easy-drinking, copper-colored Belgian ale that is somewhat less aggressive in flavor profile than many other Belgian beers. The malt character tends to be a bit biscuity with light toasty, honey-like, or caramelly components; the fruit character is noticeable and complementary to the malt. The bitterness level is generally moderate, but may not seem as high due to the flavorful malt profile.

84 Belgian Ale-Biere de Garde
A fairly strong, malt-accentuated, lagered artisanal beer with a range of malt flavors appropriate for the color. All are malty yet dry, with clean flavors and a smooth character.

85 Strong Belgian Ale-Belgian Blond Ale
A moderate-strength golden ale that has a subtle fruity-spicy Belgian yeast complexity, slightly malty-sweet flavor, and dry finish.

86 Strong Belgian Ale-Saison
Most commonly, a pale, refreshing, highly-attenuated, moderately-bitter, moderate-strength Belgian ale with a very dry finish. Typically highly carbonated, and using non-barley cereal grains and optional spices for complexity, as complements the expressive yeast character that is fruity, spicy, and not overly phenolic. Less common variations include both lower-alcohol and higher-alcohol products, as well as darker versions with additional malt character.

87 Strong Belgian Ale-Belgian Golden Strong Ale
A pale, complex, effervescent, strong Belgian-style ale that is highly attenuated and features fruity and hoppy notes in preference to phenolics.

88 Trappist Ale-Trappist Single
A pale, bitter, highly attenuated and well carbonated Trappist ale, showing a fruity-spicy Trappist yeast character, a spicy-floral hop profile, and a soft, supportive grainy-sweet malt palate.

89 Trappist Ale-Belgian Dubbel
A deep reddish-copper, moderately strong, malty, complex Trappist ale with rich malty flavors, dark or dried fruit esters, and light alcohol blended together in a malty presentation that still finishes fairly dry.

90 Trappist Ale-Belgian Tripel
A pale, somewhat spicy, dry, strong Trappist ale with a pleasant rounded malt flavor and firm bitterness. Quite aromatic, with spicy, fruity, and light alcohol notes combining with the supportive clean malt character to produce a surprisingly drinkable beverage considering the high alcohol level.

91 Trappist Ale-Belgian Dark Strong Ale
A dark, complex, very strong Belgian ale with a delicious blend of malt richness, dark fruit flavors, and spicy elements. Complex, rich, smooth and dangerous.

92 Historical Beer-Gose
A highly-carbonated, tart and fruity wheat ale with a restrained coriander and salt character and low bitterness. Very refreshing, with bright flavors and high attenuation.

93 Historical Beer-Kentucky Common
A darker-colored, light-flavored, malt-accented beer with a dry finish and interesting character malt flavors. Refreshing due to its high carbonation and mild flavors, and highly sessionable due to being served very fresh and with restrained alcohol levels.

94 Historical Beer-Lichtenhainer
A sour, smoked, lower-gravity historical German wheat beer. Complex yet refreshing character due to high attenuation and carbonation, along with low bitterness and moderate sourness.

95 Historical Beer-London Brown Ale
A luscious, sweet, malt-oriented dark brown ale, with caramel and toffee malt complexity and a sweet finish.

96 Historical Beer-Piwo Grodziskie
A low-gravity, highly-carbonated, light-bodied ale combining an oak-smoked flavor with a clean hop bitterness.

97 Historical Beer-Pre-Prohibition Lager
A clean, refreshing, but bitter pale lager, often showcasing a grainy-sweet corn flavor. All malt or rice-based versions have a crisper, more neutral character. The higher bitterness level is the largest differentiator between this style and most modern mass-market pale lagers, but the more robust flavor profile also sets it apart.

98 Historical Beer-Pre-Prohibition Porter
An American adaptation of English Porter using American ingredients, including adjuncts.

99 Historical Beer-Roggenbier
A dunkelweizen made with rye rather than wheat, but with a greater body and light finishing hops.

100 Historical Beer-Sahti
A sweet, heavy, strong traditional Finnish beer with a rye, juniper, and juniper berry flavor and a strong banana-clove yeast character.

101 American Wild Ale-Brett Beer
Most often drier and fruitier than the base style suggests. Funky notes range from low to high, depending on the age of the beer and strain(s) of Brett used. Funkiness is generally restrained in younger 100% Brett examples, but tends to increase with age. May possess a light acidity, although this does not come from Brett.

102 American Wild Ale-Mixed-Fermentation Sour Beer
A sour and/or funky version of a base style of beer.

103 American Wild Ale-Wild Specialty Beer
A sour and/or funky version of a fruit, herb, or spice beer, or a wild beer aged in wood. If wood-aged, the wood should not be the primary or dominant character.

104 Fruit Beer-Fruit Beer
A harmonious marriage of fruit and beer, but still recognizable as a beer. The fruit character should be evident but in balance with the beer, not so forward as to suggest an artificial product.

105 Fruit Beer-Fruit and Spice Beer
A harmonious marriage of fruit, spice, and beer, but still recognizable as a beer. The fruit and spice character should each be evident but in balance with the beer, not so forward as to suggest an artificial product.

106 Fruit Beer-Specialty Fruit Beer
A harmonious marriage of fruit, sugar, and beer, but still recognizable as a beer. The fruit and sugar character should both be evident but in balance with the beer, not so forward as to suggest an artificial product.

107 Spiced Beer-Spice, Herb, or Vegetable Beer
A harmonious marriage of SHV and beer, but still recognizable as a beer. The SHV character should be evident but in balance with the beer, not so forward as to suggest an artificial product.

108 Spiced Beer-Autumn Seasonal Beer
An amber to copper, spiced beer that often has a moderately rich body and slightly warming finish suggesting a good accompaniment for the cool fall season, and often evocative of Thanksgiving traditions.

109 Spiced Beer-Winter Seasonal Beer
A stronger, darker, spiced beer that often has a rich body and warming finish suggesting a good accompaniment for the cold winter season.

110 Alternative Fermentables Beer-Alternative Grain Beer
A base beer enhanced by or featuring the character of additional grain or grains. The specific character depends greatly on the character of the added grains.

111 Alternative Fermentables Beer-Alternative Sugar Beer
A harmonious marriage of sugar and beer, but still recognizable as a beer. The sugar character should both be evident but in balance with the beer, not so forward as to suggest an artificial product.

112 Smoked Beer-Classic Style Smoked Beer
A smoke-enhanced beer showing good balance between the smoke and beer character, while remaining pleasant to drink. Balance in the use of smoke, hops and malt character is exhibited by the better examples.

113 Smoked Beer-Specialty Smoked Beer
A smoke-enhanced beer showing good balance between the smoke, the beer character, and the added ingredients, while remaining pleasant to drink. Balance in the use of smoke, hops and malt character is exhibited by the better examples.

114 Wood Beer-Wood-Aged Beer
A harmonious blend of the base beer style with characteristics from aging in contact with wood. The best examples will be smooth, flavorful, well-balanced and well-aged.

115 Wood Beer-Specialty Wood-Aged Beer
A harmonious blend of the base beer style with characteristics from aging in contact with wood (including alcoholic products previously in contact with the wood). The best examples will be smooth, flavorful, well-balanced and well-aged.

116 Specialty Beer-Clone Beer
Based on declared clone beer.

117 Specialty Beer-Mixed-Style Beer
Based on the declared base styles. As with all Specialty-Type Beers, the resulting combination of beer styles needs to be harmonious and balanced, and be pleasant to drink.

118 Specialty Beer-Experimental Beer
Experimental beer is produced in or as a new style, using a new recipe, or as a type of beer that does not fit within present beer style criteria or definitions.

ALM	Almond *The fruit of the almond is a drupe, consisting of an outer hull and a hard shell with the seed.*
CAS	Cashew *The cashew nut is a tropical evergreen tree that produces the cashew seed and the cashew apple accessory fruit.*
COC	Coconut *The edible fruit of the coconut palm. It is a drupe and not a nut.*
FLX	Flax *A flowering plant, Linum usitatissimum, in the family Linaceae.*
HEM	Hemp *Hemp is a botanical class of Cannabis sativa cultivars grown specifically for industrial or medicinal use.*
HAZ	Hazelnut *The hazelnut is the nut of the hazel tree. Also known as Cobnut or Filbert nut.*
MAC	Macadamia nut *The macadamia nut is the fruit which is a hard, woody, globose follicle with a pointed apex, containing one or two seeds. Also known as: Queensland nut, Bush nut, Maroochi nut, Bauple nut and Hawaii nut.*
OAT	Oat *A cereal grain grown for its edible seed.*
PEA	Peanut *A legume crop grown mainly for its edible seeds. Also known as: Groundnut, Goober, Pindar, Monkey nut.*
POT	Potato *A starchy tuber of the plant Solanum tuberosum and is a root vegetable.*
QUA	Quinoa *A flowering plant in the amaranth family. It is an herbaceous annual plant.*
RIC	Rice *An edible starchy cereal grain is the seed of the grass species.*
SOY	Soybean *A species of legume native to East Asia, widely grown for its edible bean. (Soya)*
SPT	Spelt *Spelt, also known as dinkel wheat or hulled wheat is a species of common wheat.*
SUN	Sunflower *A flowering plant in the daisy family whose round flower heads in combination with the ligules look like the Sun.*

COM Mixed
The combination of two or more plant-based milk types.

UUU Other Plant-Based Milk Source

1841 - Preservation Technique

CODE	DEFINITION & EXPLANATION
ACD	Acidification *A process where acids are used to decrease the pH of food.*
ALC	Alcohol Curing *Treatment of food by adding alcohol in order to preserve the product*
BOI	Boiling *Boiling is the rapid vaporization of a liquid, which occurs when a liquid is heated to its boiling point.*
BRI	Brining *Soaking the food in salty water/brine.*
CAN	Canning *A physical technique of preserving food that is hermetically packaged in a container and subjected to high temperatures for a time to completely destroy its microorganisms, pathogens, and spores.*
CON	Conserve *Fruit that is preserved by being cooked with sugar.*
CSC	Cold Smoke Curing *Smoking food at a temperature ranging from 70 to 90 degrees Fahrenheit.*
DEH	Dehydration *Extracting the moisture from food, which inhibits the growth of microorganisms.*
FER	Fermentation *Fermentation is the conversion of carbohydrates to alcohol or organic acids using microorganisms under anaerobic conditions.*
FFM	Fine-filtered/Microfiltered *A pasteurized product is treated to a very fine filtration process which removes virtually all the spoilage bacteria present in the product.*
FRD	Freeze Drying *Preserving food by freezing and then drying in a vacuum.*
FRE	Freezing *Freeze foods at 0 degrees Fahrenheit or lower.*
FRS	Fresh *Recently made or obtained food in its natural conditions and not altered by any preservation methods.*
HEA	Heated *Exposure of food to heat such as cooking, grilling, etc.*
HPP	High Pressure Pasteurization *High Pressure Pasteurization is a pasteurization process where the product is treated with pressure and heat between 0°C and 120°C.*

HPR High Pressure Processing
High Pressure Processing (HPP) is a pasteurization process where the product is treated with pressure without the use of heat.

HSC Hot Smoke Curing
Smoking the food at temperatures ranging from 100 to 190 degrees Fahrenheit.

HTS High temperature short time (HTST)
High temperature short time (HTST) pasteurization requires fluid milk to be heated to 72°C for 15 seconds (continuous flow pasteurization).

HTT High Temperature Treated
High Temperature Treatment (HTT) pasteurization requires fluid milk to be heated to 127°C for 2 seconds.

IRR Irradiation
Exposing food to ionizing radiation in order to disinfest, sterilize, or preserve food.

PAS Pasteurization
Food is treated with heat ranging from 60°C to 85°C.

PWA Preserved without Artificial Nitrates
A food is treated with natural curing agents and without artificial nitrates, e.g. celery powder.

QFR Quick Freezing
Freezing food rapidly to preserve its qualities.

REF Refrigerated
Chilling and keeping food cold to preserve it.

SGC Sugar Curing
Treatment of food by adding sugar in order to preserve the product.

STC Salt Curing
Treatment of food by adding salt in order to preserve the product.

STR Sterilization
A method of food preservation that effectively kills or eliminates transmissible agents such as fungi, bacteria, viruses, and spore forms.

UAV Under a Vacuum
Low temperature, long time cooking under vacuum. Also known as sous vide.

ULF Ultra-filtered
A pasteurized product that is passed through filters that permit the smaller lactose, water, mineral, and vitamin molecules to pass through the membrane while the larger protein and fat molecules are retained and concentrated.

ULT Ultra High Temperature
Ultra High Temperature (UHT) is a pasteurization process where the product is treated with high heat between 135°C and 155°C.

UMA Under Modified Atmosphere
Modified atmosphere is the practice of modifying the composition of the internal atmosphere of a package in order to improve the shelf life of food products.

VAP Vacuum Packed
Vacuum packing is a preserving process of creating a vacuum that removes the air before sealing, which prevents the growth of microorganisms.

1842 - Cheese Type

Code identifying the cheese type TYPE=**ID** MIN=**1** MAX=**3**

SEGMENTS USED IN (AS SIMPLE)
CHI

TRANSACTION SETS USED IN
832 897

CODE	DEFINITION & EXPLANATION
1	American Cheese *A type of processed cheese that is smooth hard white or yellow cheese similar to a mild cheddar.*
2	Bavarian Blue *Bavarian cheese spread, also known as obatzter, obazda, obazde, obazd'n and obatzda, is a strong cheese spread made with ripe Camembert, cream cheese, butter, onions, spices, and beer.*
3	Beaufort *A firm, raw cow's milk cheese with pale yellow color. It has a smooth and creamy texture and lacks holes like other Gruyère-style cheeses, e.g. Comté, Vacherin Fribourgeois, or Emmental.*
4	Beer Cheese *A cheese spread usually consists of a processed cheese base with a sharp cheddar flavor. To this, enough beer is added to provide flavor and texture, as well as garlic, and a variety of spices including dry mustard, horseradish, and cayenne pepper.*
5	Blue Cheshire *A dense and crumbly cheese that has blue veins like Stilton or Shropshire Blue but is less creamy than Stilton and is not colored orange as Shropshire Blue.*
6	Blue Shropshire *A blue cheese that is made from pasteurized cow's milk and uses vegetable rennet. The orange color comes from the addition of annatto, a natural food coloring. Penicillium roqueforti produces the veining.*
7	Blue Stilton *A blue cheese that is made from pasteurized milk. Penicillium roqueforti is added to generate a characteristic smell and taste.*
8	Brick Cheese *A semisoft, sweet-tasting cheese, made from the whole milk of cows and produced in brick form.*
9	Brie *A soft cow's-milk cheese that is pale in color with a slight grayish tinge under a rind of white mould. The rind is typically eaten.*
10	Brunost Gjetost *A farmhouse and creamery semi-hard cheese, which is made with whey, milk, and/or cream. Also known as Geitost, Mysost, Brown cheese.*
11	Buttercheese *A semi-soft, cow's milk cheese (Butterkäse) that has a buttery flavor and appearance. It is often described as mild, partly due to its brief aging time.*

12 Caboc
A cream cheese made with double cream or cream-enriched milk. This rennet-free cheese is smooth, slightly thicker and grainier than clotted cream, while the color is a pale primrose yellow.

13 Cabrales
A blue cheese that can be made from pure, unpasteurized cow's milk or blended in the traditional manner with goat and/or sheep milk, which lends the cheese a stronger, spicier flavor.

14 Caciocavallo
A type of stretched-curd cheese made out of sheep's or cow's milk. Shaped like a teardrop, it is similar in taste to the aged Southern Italian Provolone cheese with a hard edible rind.

15 Caerphilly
A hard, crumbly white cheese that is made from cow's milk, and generally has a fat content of between 45% and 55%. It has a mild taste, with a tang of lemon.

16 Camembert
A moist, soft, creamy, surface-ripened cow's milk cheese.

17 Cantal
An uncooked firm cheese with a strong, tangy butter taste that grows with age. A well-ripened Cantal has a vigorous nutty and tangy taste, while a young cheese has a hint of the sweet and buttery taste of raw milk.

18 Chaource
A cow's milk cheese, cylindrical in shape. It has a soft-ripened, creamy, and a little bit crumbly, non-elastic texture and is surrounded by a white Penicillium candidum rind.

19 Cheddar
A relatively hard, off-white (or orange if colorings such as annatto are added), sometimes sharp-tasting, natural cheese.

20 Colby
A semi-hard cow's milk cheese with a Hazel-nutty flavor and an orange color. It is often found blended with Manchego cheese.

21 Colby Jack
A cheese that is made from Colby and Monterey Jack. It is classified as semi-hard in texture and is mild due to its two-week aging process.

22 Colwick
A fresh cheese that is soft, curdy, and similar to cream cheese in texture but slightly more sour in flavor. The cheese is produced in such a way that it has a distinctive bowl shape and traditionally locals would fill the bowl with different fillings, both sweet and savory.

23 Cottage Cheese
A simple fresh cheese curd product with a mild flavor and a creamy, non-homogenous, soupy texture. It is also known as curds and whey. It is made from cow's milk by draining the cheese.

24 Coulommiers
A soft-ripened cheese that is made from cow's milk and is usually in the shape of a disc with white, bloomy, edible Penicillium candidum rind.

25 Cream Cheese
A soft, usually mild-tasting, fresh cheese made from milk and cream.

26 Curd Cheese
Curd cheese is the moist pieces of curdled milk that are made from fresh pasteurized milk in the process of creating cheese.

27 Danish Blue
A strong, blue-veined cheese (Danablu). It is a semi-soft creamery cheese typically drum- or block-shaped and has a yellowish, slightly moist, edible rind. Made from full-fat cow's milk and homogenized cream.

28 Dolcelatte
A blue-veined soft cheese that is made from cow's milk and has a sweet taste.

29 Double Gloucester
A traditional, full-fat, hard cheese made from pasteurized or unpasteurized cow's milk.

30 Dunlop
A sweet-milk cheese made from pasteurized cow's milk. When young, the cheese develops a nutty flavor and smooth, close texture. As it matures, the texture becomes firm and builds up sharp flavors.

31 Edam
A semi-hard cheese that is traditionally sold in flat-ended spheres with a pale-yellow interior and a coat, or rind, of red paraffin wax.

32 Emmenthal
A yellow, medium-hard cheese with savory but mild taste that is classified as a Swiss-type or Alpine cheese. Also know as Emmental or Emmentaler.

33 Époisses
Époisses is a pungent, soft-paste cow's milk cheese with a distinctive, soft red-orange color.

34 Esrom
A Trappist-style, pale yellow, semi-soft, cow's milk cheese which has a pungent aroma and a full, sweet flavor. Esrom is a porous cheese with many small holes throughout and is slightly elastic and buttery in texture. It is also known as Danish Port Salut.

35 Farmer Cheese
A pressed cottage cheese that is made by adding rennet and bacterial starter to coagulate and acidify milk. Farmer cheese may be made from the milk of cows, sheep or goats, with each giving its own texture and flavor.

36 Feta
A brined curd, white cheese that is soft with small or no holes, a compact touch, few cuts, and no skin. It is formed into large blocks and aged in brine. Its flavor is tangy and salty, ranging from mild to sharp.

37 Fontina
A semi-soft to hard cheese that is mild to medium-sharp in flavor from cow's milk. The characteristic flavor of Fontina is mild but distinctively nutty and savory.

38 Fourme d'Ambert
A semi-hard, blue cheese that is made from raw cow's milk with a distinct and narrow cylindrical shape. It is inoculated with Penicillium roqueforti spores and aged for at least 28 days.

39 Fromage Blanc
A creamy, soft cheese made with whole or skimmed milk and cream.

40 Fromage de chevre
A cheese made from goat's milk (Goat cheese). It is made in a wide variety of styles, from soft, fresh cheese to hard, aged cheese.

41 Fromage Frais
A type of white cheese, usually made with skim milk, with a variety of textures depending upon how it has been produced. It is often used in combination with other ingredients such as savory spices or sweet berries.

42 Geheimratskäese
A pasteurized, cow's milk cheese that has a light-yellow color with small holes and a mild, aromatic flavor. It has a waxed rind, which is usually red.

43 Gorgonzola
A veined, blue cheese made from unskimmed cow's milk. It can be buttery or firm, crumbly and quite salty, with a "bite" from its blue veining.

44 Gouda
A sweet, creamy, yellow, semi-hard to hard cow's milk cheese.

45 Gruyère
A hard, yellow cheese that is classified as a Swiss-type or Alpine cheese, and is sweet but slightly salty, with a flavor that varies widely with age.

46 Halloumi
A semi-hard, unripened cheese made from a mixture of goat's and sheep's milk, and sometimes also cow's milk.

47 Havarti
A semi-soft, cow's milk cheese. Havarti is a washed-curd cheese, which contributes to the subtle flavor of the cheese. It is an interior-ripened cheese that is rindless, smooth, and slightly bright-surfaced with a cream to yellow color depending on type.

48 Jarlsberg
A mild cheese made from cow's-milk, with large, regular eyes. It has a yellow, wax rind and a semi-firm, yellow interior.

49 Kochkaese
A spreadable, creamy, sour milk cheese (cooked cheese).

50 Lancashire
A cow's milk cheese with a crumbly texture and a mild flavor when the cheese is young, but as it becomes older, the taste matures and becomes sharper.

51 Leyden
A semi-hard, cumin-and-caraway-seed-flavored cheese made from cow's milk.

52 Manchego
A firm and compact sheep's milk cheese with a buttery texture, often containing small, unevenly distributed air pockets. The color of the cheese varies from white to ivory-yellow, and the inedible rind from yellow to brownish-beige.

53 Marbled Cheese
A name given to cheeses with marbled patterns. It is usually hard, processed cow's milk cheese produced by combining either two different colored curds, cheese curds, or processed cheeses.

54 Monterey Jack
A white, semi-hard cheese made using cow's milk. It is noted for its mild flavor and slight sweetness.

55 Mozzarella
A semi-soft, fresh cheese made by the pasta filata (stretched-curd) method.

56 Muenster
A semi-soft cheese that is pale in color and smooth in texture with an orange rind. The cheese is made from pasteurized cow's milk. Also known as Munster.

57 Mycella
A soft, artisan, blue-veined, cow's milk cheese. It is moist and creamy, a little salty but not bitter, and belongs to the blue cheese family. It comes with a blue-green mold and a mild aromatic taste. Also know as Danish Gorgonzola.

58 Neufchatel
A soft, slightly crumbly, mold-ripened, cow's milk cheese.

59 Ossau Iraty
A medium-firm, sheep's milk cheese. Ossau-Iraty cheese crust is yellow-orange to gray, and the body color ranges from white to cream, depending on how it has been matured.

60 Parmesan
A hard, granular cheese produced from unpasteurized cow's milk.

61 Pecorino
A hard cheese made from sheep's milk. Pecorinos are traditional, creamery, hard, drum-shaped cheeses.

62 Petit Munster
A semi-soft, wash-rind cheese that has a strong aroma and slightly sticky outer surface.

63 Pimento Cheese
A cheese spread or relish made with cheese, mayonnaise, and pimentos.

64 Pipo Crem
A soft to semisoft, blue cheese made with cow's milk. It is a smooth, creamy, ivory paste with blue veining and a thin, white, penicillin rind.

65 Processed Cheese
A food product made from cheese and other unfermented dairy ingredients mixed with emulsifiers. Additional ingredients, such as vegetable oils, salt, food coloring, or sugar may be included.

66 Provolone
An aged, pasta filata (stretched-crud) cheese.

67 Queso Quesadilla
A semi-soft, white, string-type, Hispanic-style cheese made from cow's milk.

68 Raclette
A raw, semi-hard, mildly flavored cheese made from cow's milk which is used for melting and grilling.

69 Reblochon
A soft, washed-rind, and smear-ripened cheese made from raw cow's milk.

70 Red Cheshire
A dense and crumbly cheese that is colored with annatto to a shade of deep orange.

71 Red Leicester
A crumbly-textured cheese, typically sold at 6 to 12 months of age. The rind is reddish-orange, with a powdery mold on it. Also known as Leicester or Leicestershire cheese.

72 Ricotta
A whey cheese made from sheep, cow, goat, or water buffalo milk whey left over from the production of other cheeses.

73 Romano
A class of hard, salty cheese suitable primarily for grating, similar to Pecorino Romano. Romano cheese can be made from cow, goat, and/or sheep's milk.

74 Roquefort
A semi-hard, sheep's milk cheese that is white, tangy, crumbly, and slightly moist, with distinctive veins of blue mold.

75 Roule
A cheese with a soft and creamy texture, that is usually flavored with herbs and garlic.

76 Saint Marcellin
A soft, mold-ripened cheese made from unpasteurized cow's milk.

77 Saint Paulin
A creamy, mild, semi-soft cheese made from pasteurized cow's milk. Saint-Paulin is a buttery cheese, but firm enough for slicing.

78 Sapsago
A traditional, hard cheese that is made out of skimmed cow's milk and a special kind of herb, blue fenugreek. Also known as Schabziger.

79 Sbrinz
A very hard cheese made from cow's milk. It is often used instead of Parmesan cheese in Swiss cuisine.

80 Swiss Cheese
A generic name for several varieties of cheese. It is an American version of the Swiss Emmental and is known for being a shiny, pale yellow color. While it has a firmer texture than baby Swiss, its flavor is mild, sweet, and nut-like. It has a savory, but not very sharp taste

81 Taleggio
A semisoft, washed-rind, smear-ripened cheese that has a thin crust and a strong aroma, but its flavor is comparatively mild with an unusual fruity tang.

82 Tilsiter
A pale-yellow, semi-hard, smear-ripened cheese made from unpasteurized/pasteurized cow's milk.

83 Tomme Au Raisin
A variety of Tommee cheese that is pressed, uncooked. Fruity and mellow with a very slight sharpness.

84 Weisskaese White Cheese
Weisskaese or Weichkaese is a soft cheese. It is a generic term for all soft cheeses with a relatively high-water content. Weisskaese white cheese has a velvety white coating of mold.

85 Wensleydale
A historic, mild cheese that is made from pasteurized cow's milk. Wensleydale is a medium cheese that is supple and crumbly and has a slight honey aroma.

86 White Cheshire
A crumbly cheese that is dense and semi-hard, and is defined by its moist, crumbly texture and mild, salty taste.

87 Danbo
Danbo is a ripened firm/semi-hard cheese

88 Samso
Samso is a ripened hard cheese.

89 Other

1843 - Relative Firmness of Cheese

Code identifying the firmness of the cheese relative to the moisture content

TYPE=**ID** MIN=**2** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)

CHI

TRANSACTION SETS USED IN

832 897

CODE	DEFINITION & EXPLANATION
ES	Extra soft *Very high moisture content cheese.*
SF	Soft *High moisture content cheese.*
SS	Semi soft *Moderate moisture content cheese.*
FM	Firm *Low moisture content cheese.*
HD	Hard *Very low moisture content.*
EH	Extra hard *Extremely low moisture content.*

1844 - Surface of Cheese at End of Ripening

Code identifying whether or not a cheese contains a rind at the end of the maturing process

TYPE=**ID** MIN=**2** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)

CHI

TRANSACTION SETS USED IN

832 897

CODE	DEFINITION & EXPLANATION
NR	No Rind *No outside shell of cheese has formed during the cheese making process.*
RD	Rind *Outside shell of cheese that forms during the cheese making process.*
SR	Soft-ripened mold rind *Soft-ripened cheeses begin firm and rather chalky in texture, but are aged from the exterior inwards by exposing them to mold*

1845 - Cheese Ripening Process

Code identifying ripening progress within the cheese TYPE=**ID** MIN=**2** MAX=**2**

SEGMENTS USED IN (AS SIMPLE)
CHI

TRANSACTION SETS USED IN
832 897

CODE	DEFINITION & EXPLANATION
RD	Ripened *The ripening process develops within the whole body of the cheese.*
SR	Surface ripened *The ripening process starts from the surface and moves into the body of the cheese. These cheeses are often one color on the exterior and another on the interior; the interior is usually soft and buttery. The outer 'rind' can be consumed and may be washed prior to packaging.*
BV	Blue veined *The cheese that is exposed to mold is ripened and the veins of mold appears within the body of the cheese.*
FR	Fresh *The cheese has not undergone any ripening. They are 'fresh' and often spreadable.*

1846 - Fish, Seafood, and Marine Life Source

Code identifying the source of fish, seafood, and marine life TYPE=ID MIN=3 MAX=3

SEGMENTS USED IN (AS SIMPLE)
FSH

TRANSACTION SETS USED IN

CODE	DEFINITION & EXPLANATION
ALG	Alligator *A crocodilian in the genus Alligator of the family Alligatoridae.*
ALP	Alpaca *A long-haired domesticated South American mammal related to the llama.*
ANT	Antelope *A common name referring to many species of even-toed ruminants that are indigenous to various regions in Africa and Eurasia.*
APE	Ape *A large primate that lacks a tail, including the gorilla, chimpanzees, orangutan, and gibbons.*
ASS	Ass *A domesticated member of the horse family.*
BER	Bear *Mammals of the family Ursidae.*
BFC	Beefalo/Cattalo *A hybrid animal of a cross between cattle and buffalo.*
BOR	Boar *A wild relative of the domestic pig.*
BUF	Buffalo *A large bovine animal, frequently used as livestock.*
CAF	Calf/Veal *A general term for a juvenile member of any species of domestic cattle which is intentionally raised to be processed at a young age.*
CML	Camel *Even-toed ungulates within the genus Camelus.*
CAP	Capon *A cockerel (rooster) that has been castrated or neutered, either physically or chemically, to improve the quality of its flesh for food.*
CAT	Cat *A small domesticated carnivorous mammal with soft fur, a short snout, and retractable claws.*
CKN	Chicken *A domesticated fowl.*
COK	Cockerel *A male chicken.*
COW	Cow *A domesticated member of the subfamily Bovinae.*
CRC	Crocodile *Any species belonging to the family Crocodylidae.*

DER Deer
Ruminant mammals forming the family Cervidae.

DOG Dog
A domesticated form of the wolf, a member of the Canidae family of the order Carnivora.

DUK Duck
Aquatic birds, mostly smaller than the swans and geese.

DKL Duckling
A young duck.

ELK Elk/Wapiti
A red deer of a large race native to North America, North Asia and North Europe.

EMU Emu
A flightless bird, native to Australia, which looks similar to the ostrich.

ERO European robin
A small thrush related to the chats, typically having a brown back with red on the breast or other colorful markings.

FIN Finch
A seed-eating songbird that typically has a stout bill and colorful plumage in the order Fringillidae.

FOL Fowl
Non-domesticated birds in general, but usually refers to birds belonging to one of two biological orders, namely the game or land fowl and the waterfowl.

FRG Frog
Amphibians in the order Anura.

GNU Gnu
A large, hoofed mammal that lives in Africa. Also known as Wildebeest.

GOT Goat
A member of the Bovidae family and is closely related to the sheep.

GOS Goose
A bird belonging to the family Anatidae.

GRS Grouse
A ground-nesting bird heavily built like other Galliformes such as chickens.

GFL Guinea fowl
An insect- and seed-eating, ground-nesting bird resembling a partridge.

GUP Guinea pig
A tailless South American rodent.

HAR Hare
A herbivorous mammal belonging to the genus Lepus, which is distinguished from rabbits.

HEN Hen
A female bird, especially of a domestic fowl.

HOR Horse
A hoofed mammal, a subspecies of one of seven extant species of the family Equidae.

INV Invertebrate
A paraphyletic group of animals that neither possess nor develop a vertebral column.

KAN Kangaroo
A large, plant-eating marsupial with a long, powerful tail and strongly developed hind limbs.

LAM Lamb
A young domestic sheep.

LDS Land Snail
A member of the molluscan class Gastropoda that have coiled shells in the adult stage and live on land.

LLA Llama
A domesticated South American camelid.

MON Monkey
A common name referring to certain groups or species of simian mammals.

MOS Moose
The largest extant species in the deer family.

MUT Mutton
The flesh of sheep, especially mature sheep, used as food.

OST Ostrich
Large flightless bird native to Africa.

OXX Ox
An adult castrated male of any domesticated species of cattle.

PRT Partridge
A medium-sized bird, intermediate between the larger pheasants and the smaller quails.

PST Pheasant
A bird in the subfamily of Phasianidae in the order Galliformes.

PGN Pigeon
A bird in the family Columbidae.

POK Pork
Meat from the domestic pig.

PSN Poussin
A young chicken, less than 28 days old at slaughter.

QUL Quail
Several genera of mid-sized birds in the pheasant family.

RBB Rabbit
A small mammal in the family Leporidae of the order Lagomorpha.

RAT Rat
A medium-sized, long-tailed rodent of the superfamily Muroidea.

RND Reindeer/Caribou
An Arctic- and Subarctic-dwelling deer, widespread and numerous across the Arctic and Subarctic.

REH Rhea
A large flightless bird of South American grasslands, resembling a small ostrich with grayish-brown plumage.

RSD Roe Deer
A deer species of Europe, Asia Minor, and Caspian coastal regions.

SHP Sheep
A small ruminant, usually with a crimped hair called wool and often with horns forming a lateral spiral.

SHF Shellfish
A colloquial and fisheries term for exoskeleton-bearing aquatic invertebrates used as food, including various species of mollusks, crustaceans, and echinoderms.

SNK Snake
Elongate, legless, carnivorous reptiles of the suborder Serpentes.

SNP Snipe
Any of nearly 20 wading bird species in three genera in the family Scolopacidae.

SPR Sparrow
Small passerine birds in the family Passeridae.

SQB Squab
A culinary term for an immature domestic pigeon, typically under four weeks old.

SQR Squirrel
An agile, tree-dwelling rodent with a bushy tail.

STR Starling
A gregarious songbird with a straight bill, typically with dark lustrous or iridescent plumage but sometimes brightly colored.

TRS Thrush
Plump, soft-plumaged, small to medium-sized passerine bird.

TRK Turkey
A large bird in the genus Meleagris.

TRT Turtle
A reptile characterized by a special bony or cartilaginous shell developed from their ribs that acts as a shield.

VEN Venison
The flesh of the deer family or other animals with antlers.

WBF Water buffalo
A large, black, domesticated buffalo with heavy, swept-back horns, used as a beast of burden throughout the tropics.

WDC Woodcock
The woodcocks are a group of seven or eight very similar living species of wading birds in the genus Scolopax.

YAK Yak
A long-haired bovine found throughout the Himalayan region of south Central Asia, the Tibetan Plateau, and as far north as Mongolia.

ZEB Zebra
An African wild horse with black-and-white stripes and an erect mane.

1852 - Type of Nuts

Code Identifying the type of nuts TYPE=**ID** MIN=**6** MAX=**6**

SEGMENTS USED IN (AS SIMPLE)
NUT

TRANSACTION SETS USED IN
832 897

CODE	DEFINITION & EXPLANATION
TN0660	Almonds *The fruit of the almond is a drupe, consisting of an outer hull and a hard shell with the seed.*
TN0662	Brazil nuts *A large, three-sided nut with an edible kernel, several of which grow inside a large woody capsule.*
TN0295	Cashew nuts *An edible, kidney-shaped nut which is roasted and shelled before it can be eaten.*
TN0664	Chestnuts *A glossy brown nut that may be roasted and eaten. Also known as: Sardian nut, Jupiter's nut, and Spanish chestnut.*
TN0666	Hazelnuts *Hazelnut is the nut of the hazel tree. Also known as Cobnut or Filbert nut.*
TN0669	Macadamia nuts *A hard, woody, globose follicle with a pointed apex, containing one or two seeds. Also known as Queensland nut, Bush nut, Maroochi nut, Bauple nut, and Hawaii nut.*
SO0697	Peanuts *A legume crop grown mainly for its edible seeds. Also known as Groundnut, Goober, Pindar, Monkey nut.*
TN0672	Pecans *A smooth brown nut with an edible kernel similar to a walnut.*
TN0673	Pine nuts *A Pine nut is the edible seed of pines. Also known as Pine seeds.*
TN0675	Pistachio nuts *An edible, pale green seed of an Asian tree.*
TN0678	Walnuts *Walnut is the edible seed of a drupe and thus not a true botanical nut. It is commonly consumed as a nut.*

1853 - Manufacturer Preparation Type Code

Code identifying the preparation methods that a manufacturer has used on the product or a component of the product during the manufacturing process

TYPE=**ID** MIN=**3** MAX=**3**

SEGMENTS USED IN (AS SIMPLE)

MPT

832 897

CODE	DEFINITION & EXPLANATION
BAK	Baked *Cooking food in an oven by dry heat applied evenly throughout the oven.*
BAS	Basted *Basting is a cooking technique that involves cooking meat with either its own juices or some type of preparation such as a sauce or marinade. Similar to Pre-basted, Deep-basted, and Self-basting.*
BBQ	Barbecued *Method of cooking meat with the heat, hot gasses, or flames of a fire*
BLC	Block *A product is formed or shaped into a larger geometric shape than what would be used for a serving or use. It is intended that the user would cut, slice, or otherwise separate portions of the item for individual consumption or use.*
BON	Boneless *The bones (vertebrae) have been removed from the flesh portion.*
BRA	Breaded *A process where a piece of uncooked meat, poultry, fish, or other seafood is coated with a combination of batter and breading or (cracker) crumbs.*
BRE	Breast bone removed *A meat or poultry product that has had the sternum bone removed.*
CHU	Chunk *A product is broken up into medium or larger pieces of irregular shape.*
CON	Contains giblets *The liver, heart, gizzard, and neck of a chicken or fowl.*
COO	Cooked *Subjected to heat for a time sufficient to produce the characteristics of a cooked product. The product must be ready-to-eat. Also referred as fully cooked.*
COR	Corned *The treatment of meat with large-grained rock salt, also called "corns" of salt, together with sodium nitrite, potassium nitrite, or any combination of them.*
CRU	Crumbled *A product is broken up into medium- or smaller-sized pieces of irregular shape.*
CUB	Cubed *A product is cut into small- to medium-sized squares or rectangles.*
CUT	Cultured *Bacterial cultures are added to pasteurized cream to develop flavor before it is churned into butter.*

DRI Dried
The product is dried, a process to remove the moisture of the product. The product must be ready-to-eat.

FIL Fillet
A fleshy boneless piece of meat from near the loins or the ribs of an animal.

FLK Flaked
Flaked is the leftover pieces of meat, poultry, or fish. It consists of small-sized pieces, or "flakes"

FRE Freeze dried
The product is dried by a process of freeze-drying.

FWS Filtered Wood Smoke
The use of smoke derived from burning select (hard) woods, then filtered to remove large particles. The bioactive compounds found in smoke are used to impart color and flavor.

GBB Graded before Basting
Product is graded before basting. It is a cooking technique that involves cooking meat with either its own juices or some type of preparation such as a sauce or marinade.

GBF Graded before Stuffing
Product is graded before stuffing. Stuffing, filling, or dressing is an edible mixture, composed of bread, grain, herbs, fruit, nuts, vegetables, fat or other ingredients, used to fill a cavity in the preparation of another food item.

GBS Graded before Seasoning
Product is graded before Seasoning. Seasoning is the process of adding herbs, salts or spices to food to enhance the flavor.

GRT Grated
A product is reduced into smaller pieces by rubbing or scraping on something rough.

INS In shell
A product is with or in its original shell. Can also be referred to as "with shell" and "shell on."

JEL Jellied
Indicates that a gelling agent (agar, carrageenan, or gelatin) has been used in the product.

LIQ Liquid Smoke
The product is subjected to heat in the presence of a vaporized liquid smoke solution.

LIU Liquid Smoke Flavor
A flavor additive, "flavoring," based on liquid smoke.

MAY May have parts missing
A product that has parts missing. Example: poultry missing a leg.

MCK May contain kidneys
A pair of organs in the abdominal cavity of mammals, birds, and reptiles excreting urine.

MIN Minced
A food preparation technique in which food ingredients are finely divided into uniform pieces.

MSM Mechanically Separated Meat
A process where an edible meat is obtained by removing most of the bone and cartilage from a comminuted meat product from which the bone and cartilage was not previously removed.

MTD Mechanically Tenderized
A process where the integrity of a solid and uncooked meat or poultry surface has been compromised by being pierced by blades, needles, or other similar instruments, or the meat/poultry has been injected with a marinade or other tenderizing solution.

NTJ Natural Juices
The liquid obtained from or present in fruit or vegetables.

PRB Protein Binders
Treatment of meat or poultry products with functionally active proteins such as fibrinogen or transglutaminase to allow the proteins in the meat or poultry to encapsulate fat and hold fat and water together in the final sausage or product.

PUR Purified Smoke
A wood smoke process of the product whereby the unhealthy substances found in unpurified smoke, such as polycyclic aromatic hydrocarbons (PAHs), ash, and tar, have been removed.

ROA Roasted
Cooking method that uses dry heat, whether an open flame, oven, or other heat source.

ROL Rolled
A meat, poultry, or fish product which has been boned, rolled, and tied.

SAL Salted
Indicates salt (sodium chloride) was added during manufacturing process.

SAM Salmon Tips
Fish trimmings, not minced, from the tail and nape sections of a fish.

SEA Seasoned
Seasoning is the process of adding herbs, salts, or spices to food to enhance the flavor.

SEB Semi-boneless
A meat or poultry product which has been at least 45% deboned. Partial removal of bones can facilitate rolling or stuffing the product.

SED Semi-dry
The product is partially dried, a process to reduce the moisture of the product. The product must be ready-to-eat.

SFB Salted Split Fish with Backbone
The backbone is made up of a series of vertebrae that supports the body and also protects the spinal cord.

SHA Shaved
A product is cut into thin layers that are larger than what would be termed shredded, but not as uniform as sliced.

SHK Shankless
A meat or poultry from which the forelimb or foreleg has been removed at the elbow joint, or from which the hind limb of the hind leg has been removed at the knee joint.

SHR Shell Removed
A product is without its shell. It can also be referred to as peeled for shellfish.

SKI Skinless
Refers to the skin being removed, exposing the flesh.

SLC Sliced
A product is cut into thin, flat pieces from a larger portion.

SLD Solid
This term indicates how the meat, poultry, or fish was packaged. Solid means it was packaged as a whole loin piece.

SPR Spreadable
A product is formulated in such a fashion as to be easily smoothed out onto another item.

SRD Shredded
A product is pushed across or through a shredding surface to make long, narrow strips.

SSF Salted Split fish
Split Fish is fish cut open from throat to vent or tail, or from nape to tail. Gills, guts and roe removed. Head may sometimes be removed. The backbone may be left in or removed, except for an inch or two at the tail.

STI Stick
A product is cut or formed into individual strips. Even in the stick state the item is still a solid product.

STR String
Item may appear to be a stick, but it is comprised of multiple string-shaped fibers. When the item is separated, or consumed, it takes on the string state.

STS Slit Shell
A product is within its original shell with one exception that the shell has been slit along the back. Can also be referred to as Easy Peel, EZ peel and Zipperback

STU Stuffed
Stuffing, filling, or dressing is an edible mixture, composed of bread, grain, herbs, fruit, nuts, vegetables, fat or other ingredients, used to fill a cavity in the preparation of another food item.

UNP Unprepared
The initial state of the product.

UNS Unsalted
Unsalted indicates salt (sodium chloride) was NOT added.

WDS Wood Smoke
Process of curing, cooking, or seasoning food by exposing it for long periods of time to the smoke from a wood fire. Smoked

WEG Wedged
A product is cut in triangular shaped pieces. In some cases, one side of the triangle may be an arc, specifically if the wedge was cut from an item which is in the shape of a wheel or circle.

WHE Wheel
A product is formed in a round shape resembling a wheel or circle.

WHP Whipped
Process of beating food with a whisk or mixer to incorporate air and produce volume.

CODE	DEFINITION & EXPLANATION
I01	Liquid 0-Thin *Liquids that flow like water and can flow through a straw or teat/nipple.* SEE CODE SOURCE 996
I02	Liquid 1-Slightly Thick *Liquids that are thicker than water and can flow through a straw.* SEE CODE SOURCE 996
I03	Liquid 2-Mildly Thick *Liquids that are sippable and pour quickly from spoon but slower than thin drinks and slightly thick drinks.* SEE CODE SOURCE 996
I04	Liquid 3-Moderately Thick *Liquids that can be drunk from a cup or taken with a spoon. Need some effort to drink them through a wide diameter straw and have smooth texture with no lumps, fibers, or seeds.* SEE CODE SOURCE 996
I05	Liquid 4-Extermely Thick *Extremely thick liquids that are usually eaten with a spoon and cannot be drunk from a cup or sucked through a straw. Have a smooth texture with no lumps and hold shape on a spoon.* SEE CODE SOURCE 996
I06	Food 3-Liquidized *Liquidized food that can be eaten with a spoon or drunk from a cup. It has a smooth texture with no "bit" (lumps, fibers, husk, bits of shell or skin, particles of gristle or bone).* SEE CODE SOURCE 996
I07	Food 4-Pureed *Foods that are usually eaten with a spoon, don't require chewing, and the liquid (like sauces) must not separate from solids.* SEE CODE SOURCE 996
I08	Food 5-Minced and Moist Minced *Foods that are soft and moist, but no liquid leaking/dripping from the food, biting is not required, and minimal chewing required. Lumps of 4mm in size and can be mashed with the tongue.* SEE CODE SOURCE 996
I09	Food 6-Soft and Bite-Sized *Foods that are soft, tender and moist, but no thin liquid leaking/dripping from the food, ability to "bite off" a piece of food is not required. Bite-sized pieces no bigger than 1.5cm x 1.5cm in size. Food can be mashed/broken down with pressure from fork.* SEE CODE SOURCE 996
I10	Food 7- Easy to Chew *Foods that are normal, everyday food of soft/tender textures that are developmentally and age appropriate. Any method may be used to eat these foods.* SEE CODE SOURCE 996

I11 Food 7- Regular

Foods that are normal, everyday food of various textures that are developmentally and age appropriate. Any method may be used to eat these foods and the food may be hard and crunchy or naturally soft.

CODE	DEFINITION & EXPLANATION
001	Alcohol *Alcohol is an organic compound in which a hydroxyl group is bound to a carbon atom. CAS number: 64-17-5*
002	Butane *Butane is a highly volatile, colorless hydrocarbon gas with an odor similar to petroleum. Also known as n-butane. CAS number: 106-97-8*
003	Carbon dioxide *Carbon dioxide is a chemical compound with the chemical formula CO2. It appears as a colorless odorless gas at atmospheric temperature and pressure. CAS number: 124-38-9*
004	Dry sieve *Dry Sieve is a concentrate free of chemicals and water, created by dry sifting material through a series of screens.*
005	Ethanol *Ethanol is an organic compound, a volatile, flammable, colorless liquid with a characteristic wine-like odor and pungent taste. It is the active ingredient in alcoholic drinks. Also known as ethyl alcohol, grain alcohol, drinking alcohol. CAS number: 64-17-5*
006	Heat *Heat is a form of energy crossing the boundary of a thermodynamic system by virtue of a temperature difference across the boundary.*
007	Hexane *Hexane is an organic compound, a colorless liquid and odorless when pure. It is widely used as solvent. CAS number: 110-54-3*
008	Isopropanol *Isopropanol is a clear, colorless liquid flammable organic compound with a pungent alcoholic odor. Also known as isopropyl alcohol. CAS number: 67-63-0*
009	Water *Water is a substance with the chemical formula H2O. Water is an inorganic, transparent, tasteless, odorless, and nearly colorless substance. CAS number: 7732-18-5*
010	Other

1864 - Cannabinoid Type

Code indicating the type of cannabinoid compounds (chemicals that produce psychoactive effects) found in the cannabis product.

TYPE=**ID** MIN=**3** MAX=**3**

SEGMENTS USED IN (AS SIMPLE)

CTI

TRANSACTION SETS USED IN

832

CODE	DEFINITION & EXPLANATION
001	Cannabichromene (CBC) *Cannabichromene (CBC) is found in the cannabis plant. It is an anti-inflammatory which may contribute to the pain-killing effect of cannabis. It is also called cannabichrome, cannanbichromene, pentylcannabichromene or cannabinochromene. CAS number: 20675-51-8*
002	Cannabidiol (CBD) *Cannabidiol (CBD) is a compound that is one of the main constituents of cannabis, having mild psychoactive effects. CAS number: 13956-29-1*
003	Cannabidiolic acid (CBDA) *Cannabidiolic acid (CBDA) is found in the cannabis plant and it is the chemical precursor to cannabidiol (CBD). Also known as: CRM, β-Resorcylic Acid. CAS number: 1244-58-2*
004	Cannabigerol (CBG) *Cannabigerol (CBG) is a compound found in the cannabis plant. CBG is the decarboxylated form of cannabigerolic acid, the parent molecule from which other cannabinoids are synthesized. CAS number: 25654-31-3*
005	Cannabinol (CBN) *Cannabinol (CBN) is a mildly psychoactive cannabinoid found in trace amounts from cannabis. CAS number: 521-35-7*
006	Delta-10 THC (D10-THC) *Delta-10 -tetrahydrocannabinol (Delta-10 THC) is a psychoactive cannabinoid found in trace amounts in the cannabis plant. CAS number: 95588-87-7*
007	Delta-8 THC (D8-THC) *Delta-8-tetrahydrocannabinol (Delta-8 THC) is a psychoactive cannabinoid found in the cannabis plant. CAS number: 5957-75-5*
008	Tetrahydrocannabinol (THC)/Delta-9 THC *Tetrahydrocannabinol (THC) or Delta-9 THC is the principal psychoactive constituent of cannabis. CAS number: 1972-08-3*
009	Tetrahydrocannabinolic acid (THCA) *Tetrahydrocannabinolic acid (THCA) is a precursor of tetrahydrocannabinol (THC), an active component of cannabis. CAS number: 23978-85-0*
010	Tetrahydrocannabivarin (THCV) *Tetrahydrocannabivarin (THCV) is a homologue of tetrahydrocannabinol (THC) which produces psychoactive effects. CAS number: 31262-37-0*
011	THC-0 acetate (THC-0) *THC-0-acetate (THC-0) is the acetate ester of tetrahydrocannabinol (THC). CAS number: 23132-17-4*
012	Other

CODE	DEFINITION & EXPLANATION
001	Cage-free *Animals able to move without being confined to cages.*
002	Conventional *Foods grown non-organically, either indoors or outdoors without any special processes.*
003	Farm-raised *Animals raised on a farm.*
004	Fly-free *Crops grown in an area certified to be free of all flies.*
005	Free-range *Animals have access to an outdoor area.*
006	Grass-fed *Animals are grass fed.*
007	Greenhouse *Plants grown and cultivated in a structure with wall and roof covered with glass or a transparent material in which crops are grown under controlled environment conditions.*
008	Hybrid greenhouse *A hybrid greenhouse grow is the link between indoor grow's high degree of control and a traditional greenhouse grow's low operation cost.*
009	Hydroponic *Plants grown using mineral nutrient solutions instead of soil.*
010	Indoor *Plants grown indoor.*
011	Integrated pest management *Plants grown using a pest control strategy that uses an array of complimentary methods.*
012	Organic *Animals or plants grown without the use of chemicals, fertilizers, pesticides or other artificial agents.*
013	Outdoor *Plants grown outdoor in a field.*
014	Shade grown *Plant grown under shade of a canopy of trees, typically used in the cultivation of coffee.*
015	Wild *The animal was not inhibited or prohibited from roving, wandering, and not tamed or domesticated or the plant has not been tilled, prepared or planted.*
016	Other

1866 - Growing Medium

The code indicating a medium/material, in which plants are grown. TYPE=**ID** MIN=**3** MAX=**3**

SEGMENTS USED IN (AS SIMPLE)
FPI

TRANSACTION SETS USED IN
832

CODE	DEFINITION & EXPLANATION
001	Aeroponics *Growing plants in the air or mist environment without soil or an aggregate medium.*
002	Aquaponics *A system of aquaculture in which the waste produced by aquatic animals supplies nutrients for plants grown hydroponically.*
003	Cocoa Fiber *A natural fiber extracted from the outer husk of coconut and made from fibrous coconut husks that have been compressed into blocks. Also knows as "Coco Coir".*
004	Coconut Husk *A thick-walled, usually lignified cell, which forms the outer protective covering of coconut.*
005	Rockwool *A lightweight hydroponic substrate made from spinning molten basaltic rock into fine fibers which are then formed into a range of cubes, blocks and growing slabs.*
006	Soil *A mixture of organic matter, mineral, gases, liquids, and organisms that together support life.*
007	Soil Substitute *Soil alternatives are made from a variety of blended materials including and not limited to mosses like peat or sphagnum moss, and rocks and minerals like calcined clay.*
008	Suspended Hydroponics *Plants grow in a small amount of substrate held by a perforated container which is supported by a fixed cover over a tank.*
009	Other

1867 - Growing Light Condition

The code indicating the light conditions where plants are grown. TYPE=**ID** MIN=**3** MAX=**3**

CODE	DEFINITION & EXPLANATION
001	High intensity discharge (HID) *High Intensity Discharge (HID) is an overarching term for a gas-discharge light.*
002	High pressure sodium *High pressure sodium light is a specific type of gas-discharge light. Also known arc light.*
003	High pressure sodium and LED
004	HID Sun Assisted
005	Light Emitting Diode (LED) *Light-emitting diode (LED) is a semiconductor device that emits light when current flows through it.*
006	LED Sun Assisted
007	Metal halide *Metal halide light device produces light by an electric arc through a gaseous mixture of vaporized mercury and metal halides.*
008	Plasma induction *Plasma induction is a type of high temperature plasma generated by electromagnetic induction, usually coupled with argon gas.*
009	Sunlight *Sunlight is solar radiation that is visible at Earth's surface.*
010	Other

1868 - Flowering Trigger

The code indicating the environmental factors that cause a plant to start to flower (also known as the flowering trigger point).

TYPE=**ID** MIN=**3** MAX=**3**

CODE	DEFINITION & EXPLANATION
001	Hanging Dry *Hanging harvested product such as plants, meat or fish on a line or hanger, either whole or pieces/branches.*
002	Rack & Tray Dry *Placing harvested product or trimmed buds or pieces of a product such as plants, meat or fish on a drying rack or tray.*
003	Other

1870 - Terpenes Type

To specify the product's terpenes information and related characteristics TYPE=**ID** MIN=**3** MAX=**3**

SEGMENTS USED IN (AS SIMPLE)
TRP

TRANSACTION SETS USED IN
832

CODE	DEFINITION & EXPLANATION
001	Alpha-pinene *Alpha-pinene is a monoterpene from a wide variety of plants including pine trees, Spanish sage, eucalyptus oils, and oils of aromatic plants such as rosemary. It has a characteristic piney aroma. It is known to possess antimicrobial, apoptotic, antimetastatic, and antibiotic properties. Example: a common terpene found in cannabis. Also known as α-Pinene. CAS number: 80-56-8*
002	Beta-caryophyllene *Beta-caryophyllene is a constituent of many essential oils, especially clove oil, the oil from the stems and flowers of cloves, the essential oil of Cannabis sativa, rosemary, and hops. Beta-caryophyllene is one of the chemical compounds that contributes to the aroma of black pepper. Example: It is the only terpene that acts as a cannabinoid. Also known as -β-caryophyllene or Caryophyllene. CAS number: 87-44-5*
003	Bisabolol *Bisabolol is a viscous oil that is found in plants like German Chamomile or certain types of shrubs. It is slightly woody, floral and a bit on the earthy side aroma. Example: high concentrations of bisabolol can be found in certain medicinal cannabis cultivars. Also known as α-bisabolol and levomenol. CAS number: 23089-26-1*
004	Borneol *Borneol is most commonly found in camphor but can also be found in a multitude of plants around the word such in ginger, rosemary, sage, cinnamon, mint, and thyme. It has a cool, minty, and spicy scent. Example: it can be found in higher concentrations in certain strains of cannabis. CAS number: 507-70-0*
005	Camphene *Camphene is one of the most pervasive monoterpenes. It is found in low concentrations in many essential oils such as cypress, nutmeg, rosemary, camphor, neroli, ginger, and valerian. It has a strong earthy, woody, and musky note. Example: it is a minor terpene found in cannabis. CAS number: 79-92-5*
006	Camphor *Camphor is a waxy, colorless solid with a strong aroma. It is found in certain trees in the laurel family, the camphor tree in Southeast Asia, rosemary leaves, camphorweed, and camphor basil. Camphor is predominantly used for its scent; however, it is also said to have powerful anesthetic and antimicrobial properties. Example: Camphor produces an intense aroma responsible for the minty flavor in cannabis. CAS number: 76-22-2*
007	Carene *Carene is a monoterpene which is a colorless liquid and has sweet and pungent odor. It can be found in plants such as basil, rosemary, and cannabis, and in trees such as pines and cedars. It has a cedar, piney and citrusy aroma. Example: Carene can be inhaled when smoking or vaping cannabis strains with high amounts of it. Also known as 3-Carene. CAS number: 13466-78-9*

008 Cedrene
Cedrene is a sesquiterpene found in the essential oil of cedar. It has a fresh, woody and sweet scent. Example: it is a secondary terpene found in low levels in cannabis and cedar wood. It is also known as -α-cedrene. CAS number: 469-61-4

009 Cymene
Cymene is a monoterpene commonly found in hundreds of different plants including cumin, oregano, thyme, anise, and coriander. It has a hint of citrus, earthy and woody aroma. Example: not a primary compound in cannabis and only shows up in small amounts in some strains. Also know as p-Cymene. CAS number: 99-87-6

010 Eucalyptol
Eucalyptol is a monoterpenoid that is a colorless liquid. It is found in eucalyptus trees, and several other commonly used plants such as bay leaves, cardamom, tea tree, and sage. It has a vibrant fresh scent that is often described as minty and cooling. Example: a common terpene found in cannabis. Also known as cineol. CAS number: 470-82-6

011 Fenchol
Fenchol is a monoterpenoid and an isomer of borneol which is a colorless or white solid. It is commonly found in basil, cannabis, and aster flowers. It has a pine, lemon and camphor smell. Example: Fenchol is only found in high amounts in some cannabis strains. CAS number: 1632-73-1

012 Geraniol
Geraniol is a monoterpenoid which is a primary component of citronella oil, rose oil, palmarosa oil, and lemongrass. It has a rose and fruity aroma. Example: it is found in low amounts in cannabis strains. CAS number: 106-24-1

013 Geranyl acetate
Geranyl acetate is a monoterpene which is a colorless liquid with a pleasant floral or fruity rose aroma. It is a constituent of many essential oils, including Ceylon citronella, palmarosa, lemon grass, petit grain, neroli, geranium, coriander, carrot, Camden woollybutt, and sassafras. Example: Geranyl is present in high levels in cannabis cultivar Zkittlez, known for its fruit-forward aroma. Also known as Geranyl. CAS number: 105-87-3

014 Guaiol
Guaiol is a sesquiterpenoid alcohol found in several plants, especially in the oil of guaiacum and cypress pine. It is known to carry a sharp woody aroma similar to pine. Example: a lesser-known cannabis terpene that tends to appear only in trace amounts. Also known as champacol. CAS number: 489-86-1

015 Humulene
Humulene is a natural sesquiterpene which is found in the essential oils of Humulus lupulus (hops) and other plants such as sage, ginger, and ginseng. Its aroma is described as earthy, woody, with spicy, herbal notes. Example: Humulene typically appearing in lesser abundance in cannabis than other dominant terpenes. Also known as α-humulene or α-caryophyllene. CAS number: 6753-98-6

016 Isoborneol
Isoborneol is an isomer of borneol terpene, which occurs naturally in various plants, including nutmeg, ginger, rosemary, valerian, and fir trees. It has a spicy and woody aroma. Example: Isoborneol found in some strains of cannabis which adds a pleasant spicy-citrus or woody scent and taste to it. CAS number: 124-76-5

017 Isopulegol
Isopulegol, an aromatic compound naturally found in herbs such as mint, geranium, and lemongrass. It acts as the natural precursor for menthol and is renowned for its minty and fresh scent. Example: Isopulegol is one of the secondary terpenes in cannabis. CAS number: 104870-56-6

018 Limonene
Limonene is a monoterpene, and is the major component in the oil of citrus fruit peels such as oranges or lemons. It has a citrusy aroma. Example: Limonene is a prominent terpene found in a number of cannabis strains. CAS number: 138-86-3

019 Linalool
Linalool is a monoterpenoid which is found in many flowers and spice plants. It has a strong floral and woody aroma. Example: Linalool is the most common terpene found in lavender and cannabis. CAS number: 78-70-6

020 Menthol
Menthol is a monoterpenoid which naturally occurs in plants such as peppermint and spearmint. It smells and tastes like mint and it is known for its cooling sensation. Example: Menthol is naturally occurring in trace amounts in cannabis. CAS number: 2216-51-5

021 Myrcene
Myrcene is a monoterpene which occurs widely in essential oils. It exudes a musky herbal aroma. Example: Myrcene is found in large concentrations in the cannabis plant. Also known as beta-myrcene or β-myrcene. CAS number: 123-35-3

022 Nerolidol
Nerolidol is a naturally occurring sesquiterpene alcohol. It is found in the essential oils of many types of plants and flowers including ginger, lavender, and tea tree. It has a woody and floral scent. Example: Nerolidol is found in some cannabis strains. Also known as peruviol and penetrol. CAS number: 7212-44-4

023 Ocimene
Ocimene is a monoterpene found within a variety of plants and fruits including mint, parsley, mangoes, bergamot, kumquats, and orchids. It has a sweet, citrusy and earthy aroma. Example: Ocimene is a common terpene found in some types of cannabis. CAS number: 502-99-8

024 Phellandrene
Phellandrene is a terpene compound which is found in high amounts in eucalyptus plants. It has been also detected in lavender, ginger grass, pine, herbs, and spices such as parsley, cinnamon, black pepper, and mint. It has a minty, citrus and woody smell. Example: Phellandrene is one of the secondary terpenes in cannabis. CAS number: 99-83-2

025 Terpene removed
The terpene(s) has been removed from the product.

I12 - Interchange Control Number

A control number assigned by the interchange sender TYPE=**N0** MIN=**9** MAX=**9**

RESTRICTED TO USE IN INTERCHANGE CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IEA IMC ISA TA1

TRANSACTION SETS USED IN

None

I13 - Acknowledgment Requested Code

Code indicating sender's request for an interchange acknowledgment TYPE=**ID** MIN=**1** MAX=**1**

RESTRICTED TO USE IN INTERCHANGE CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

ISA

TRANSACTION SETS USED IN

None

CODE	DEFINITION & EXPLANATION
0	No Interchange Acknowledgment Requested
1	Interchange Acknowledgment Requested (TA1)
2	Interchange Acknowledgment Requested only when Interchange is "Rejected Because Of Errors"
3	Interchange Acknowledgment Requested only when Interchange is "Rejected Because Of Errors" or "Accepted but Errors are Noted"

I14 - Interchange Usage Indicator Code

Code indicating whether data enclosed by this interchange envelope is test, production or information

TYPE=**ID** MIN=**1** MAX=**1**

RESTRICTED TO USE IN INTERCHANGE CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

ISA

TRANSACTION SETS USED IN

None

CODE	DEFINITION & EXPLANATION
I	Information
P	Production Data
T	Test Data

I15 - Component Data Element Separator

Type is not applicable; the component data element separator is a delimiter and not a data element; this field provides the delimiter used to separate component data elements within a composite data structure; this value must be different than the data element separator and the segment terminator

TYPE= MIN=**1** MAX=**1**

RESTRICTED TO USE IN INTERCHANGE CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

ISA

TRANSACTION SETS USED IN

None

I16 - Number of Included Functional Groups

A count of the number of functional groups included in an interchange TYPE=**N0** MIN=**1** MAX=**5**

RESTRICTED TO USE IN INTERCHANGE CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IEA

TRANSACTION SETS USED IN

None

I17 - Interchange Acknowledgment Code

Code indicating the status of the receipt of the interchange control structure

TYPE=**ID** MIN=**1** MAX=**1**

RESTRICTED TO USE IN INTERCHANGE CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

TA1

TRANSACTION SETS USED IN

None

CODE	DEFINITION & EXPLANATION
A	The Transmitted Interchange Control Structure Header and Trailer Have Been Received and Have No Errors.
E	The Transmitted Interchange Control Structure Header and Trailer Have Been Received and Are Accepted But Errors Are Noted. This Means the Sender Must Not Resend This Data.
R	The Transmitted Interchange Control Structure Header and Trailer are Rejected Because of Errors.

I18 - Interchange Note Code

Code specifying the error found processing the interchange control structure

TYPE=**ID** MIN=**3** MAX=**3**

RESTRICTED TO USE IN INTERCHANGE CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

TA1

TRANSACTION SETS USED IN

None

CODE	DEFINITION & EXPLANATION
000	No error
001	The Interchange Control Number in the Header and Trailer Do Not Match. The Value From the Header is Used in the Acknowledgment.
002	This Standard as Noted in the Control Standards Identifier is Not Supported.
003	This Version of the Controls is Not Supported
004	The Segment Terminator is Invalid
005	Invalid Interchange ID Qualifier for Sender
006	Invalid Interchange Sender ID
007	Invalid Interchange ID Qualifier for Receiver
008	Invalid Interchange Receiver ID
009	Unknown Interchange Receiver ID
010	Invalid Authorization Information Qualifier Value
011	Invalid Authorization Information Value
012	Invalid Security Information Qualifier Value
013	Invalid Security Information Value
014	Invalid Interchange Date Value
015	Invalid Interchange Time Value
016	Invalid Interchange Standards Identifier Value
017	Invalid Interchange Version ID Value
018	Invalid Interchange Control Number Value
019	Invalid Acknowledgment Requested Value
020	Invalid Test Indicator Value
021	Invalid Number of Included Groups Value
022	Invalid Control Structure
023	Improper (Premature) End-of-File (Transmission)
024	Invalid Interchange Content (e.g., Invalid GS Segment)
025	Duplicate Interchange Control Number
026	Invalid Data Element Separator
027	Invalid Component Element Separator
028	Invalid Delivery Date in Deferred Delivery Request
029	Invalid Delivery Time in Deferred Delivery Request
030	Invalid Delivery Time Code in Deferred Delivery Request

031 Invalid Grade of Service Code
032 Invalid Repetition Separator
033 Unexpected Interchange Syntax Extension (ISX) Segment
034 Invalid Release Character
035 Invalid Character Encoding Value
036 Invalid Overriding X12 Version/Release Code
037 Unknown Industry Identifier
038 Overriding X12 Version/Release Code is Not Supported.

I19 - Interconnect Mailbag Version Number Code

Code indicating the version number covering the interconnect mailbag control segments and the interconnect mailbag acknowledgment segment

TYPE=**ID** MIN=**5** MAX=**5**

RESTRICTED TO USE IN INTERCONNECT MAILBAG CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IH

TRANSACTION SETS USED IN

None

CODE	DEFINITION & EXPLANATION
00100	Draft Standards for Trial Use Approved by ASC X12 June 1991
00303	Draft Standards for Trial Use Approved for Publication by ASC X12 Procedures Review Board through October 1992.
00304	Draft Standards for Trial Use Approved for Publication by ASC X12 Procedures Review Board through October 1993

I20 - Interconnect Mailbag Logon ID

Information used for access security identification of the sender of the interconnect mailbag; The content of the logon ID is assigned by the receiving interconnect entity

TYPE=**AN** MIN=**1** MAX=**10**

RESTRICTED TO USE IN INTERCONNECT MAILBAG CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IH

TRANSACTION SETS USED IN

None

I21 - Interconnect Mailbag Password

Information used for additional access security identification of the sender of the interconnect mailbag; The content of the password is assigned by the receiving interconnect entity

TYPE=**AN** MIN=**1** MAX=**10**

RESTRICTED TO USE IN INTERCONNECT MAILBAG CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IH

TRANSACTION SETS USED IN

None

I22 - Interconnect Mailbag ID Qualifier Code

Code identifying the system or method of code structure used to designate the sender or receiver ID element being qualified

TYPE=**ID** MIN=**2** MAX=**2**

RESTRICTED TO USE IN INTERCONNECT MAILBAG CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IH

TRANSACTION SETS USED IN

None

CODE	DEFINITION & EXPLANATION
01	DUNS (Dun and Bradstreet)
02	SCAC (Standard Carrier Alpha Code)
03	FMC (Federal Maritime Commission)
04	IATA (International Air Transport)
08	UCC EDI Communications ID (Comm ID)
09	X.121 (CCITT)
11	DEA (Drug Enforcement Administration)
12	Phone (Telephone Companies)
13	UCS Code (The UCS Code is the Only Code Used for UCS Transmissions; It Includes the Area Code and Telephone Number of a Modem; It Does Not Include Punctuation, Blanks or Access Code)
14	DUNS Plus Suffix
15	Petroleum Accounting Society of Canada
NR	National Retail Merchants Association (NRMA) - Assigned
ZZ	Mutually Defined

I23 - Interconnect Mailbag Sender ID

Identification code published by the interconnect entity sender for use by the other interconnect entity parties who use this identification code as the receiver ID to route data back to them via an interconnect

TYPE=**AN** MIN=**1** MAX=**15**

RESTRICTED TO USE IN INTERCONNECT MAILBAG CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IH

TRANSACTION SETS USED IN

None

I24 - Interconnect Mailbag Receiver ID

Identification code published by a given receiver of a mailbag used as a sending ID by that interconnect entity as their sending ID when sending via an interconnect; Other interconnect entities sending to them will use this as a receiving ID to route a mailbag to them via an interconnect

TYPE=**AN** MIN=**1** MAX=**15**

RESTRICTED TO USE IN INTERCONNECT MAILBAG CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IH

TRANSACTION SETS USED IN

None

I25 - Interconnect Mailbag Date

Date (YYMMDD) the interconnect mailbag was created for initial transmission

TYPE=**DT** MIN=**6** MAX=**6**

RESTRICTED TO USE IN INTERCONNECT MAILBAG CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IH

TRANSACTION SETS USED IN

None

I26 - Interconnect Mailbag Time

Time the interconnect mailbag was created for initial transmission; Time is expressed in 24-hour clock time (HHMMSS, time range: 000000 through 235959)

TYPE=**TM** MIN=**6** MAX=**6**

RESTRICTED TO USE IN INTERCONNECT MAILBAG CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IH

TRANSACTION SETS USED IN

None

I27 - Interconnect Mailbag Time Code

Code identifying the time; In accordance with International Organization for Standardization (ISO) Standard 8601, time can be specified by + or - and an indication in hours in relation to Universal Time Coordinate (UTC) time; Since + is a restricted character, + and - are substituted by P and M, respectively, in the codes that follow

TYPE=**ID** MIN=**2** MAX=**2**

RESTRICTED TO USE IN INTERCONNECT MAILBAG CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IH

TRANSACTION SETS USED IN

None

I28 - Interconnect Mailbag Control Number

This number uniquely identifies the interconnect mailbag to the interconnect entity sender; It is assigned by the interconnect entity sender; Together with the sender ID, it uniquely identifies the interconnect mailbag to the interconnect entity receiver; It is suggested that the interconnect entity sender and the interconnect entity receiver be able to maintain an audit trail of interconnect mailbags using this number; Each interconnect mailbag that is created by the sender should contain a unique control number; Interconnect mailbags that require retransmission should not have their control number changed

TYPE=**N0** MIN=**1** MAX=**9**

RESTRICTED TO USE IN INTERCONNECT MAILBAG CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IA IH IT

TRANSACTION SETS USED IN

I31 - Interconnect Mailbag Interchange Count

A count of the number of interchanges included in the mailbag TYPE=**N0** MIN=**1** MAX=**5**

RESTRICTED TO USE IN INTERCONNECT MAILBAG CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IT

TRANSACTION SETS USED IN

None

I32 - Interconnect Mailbag Acknowledgment Action Code

Code indicating the status of receipt by the interconnect entity receiver of the interconnect mailbag and the actions to be taken, if any

TYPE=**ID** MIN=**1** MAX=**1**

RESTRICTED TO USE IN INTERCONNECT MAILBAG CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IA

TRANSACTION SETS USED IN

None

CODE	DEFINITION & EXPLANATION
A	Accept; the Interconnect Mailbag Containing at Least One Interchange is Received in Full, Safely Stored and Accepted
C	Reject/Contact; One or More Problems Have Been Detected with the Interconnect Mailbag; the Data Contents (If Any) of the Rejected Interconnect Mailbag Will Not Be Processed As Is; the Interconnect Administrator from the Interconnect Entity Issuing the Reject Notice Will Contact the Interconnect Administrator from the Interconnect Entity Receiving the Reject Notice to Resolve the Problems Found in the Interconnect Mailbag
R	Reject/Retransmit; One or More Problems Have Been Detected with the Interconnect Mailbag; the Data Contents of the Rejected Interconnect Mailbag Will Not be Processed; the Interconnect Entity Sender of the Rejected Interconnect Mailbag Should Retransmit the Mailbag

I33 - Interconnect Mailbag Error Code

Code indicating the nature of the error detected in the received interconnect mailbag by the interconnect entity receiver

TYPE=**ID** MIN=**2** MAX=**2**

RESTRICTED TO USE IN INTERCONNECT MAILBAG CONTROL STRUCTURES ONLY

SEGMENTS USED IN (AS SIMPLE)

IA

TRANSACTION SETS USED IN

None

CODE	DEFINITION & EXPLANATION
A1	The Interconnect Mailbag Acknowledgment Count is Not Equal to the Actual Interconnect Mailbag Acknowledgment Count
B1	The Interconnect Mailbag Interchange Count is Not Equal to the Actual Interconnect Mailbag Interchange Count
C1	The IH and IT Mailbag Header and Trailer Control Numbers Are Not Identical
D1	Invalid Interconnect Mailbag Version Number
E1	Invalid Interconnect Mailbag Logon ID
F1	Invalid Interconnect Mailbag Password
G1	Invalid Interconnect Mailbag ID Qualifier Code
H1	Invalid Interconnect Mailbag Sender ID
I1	Invalid Interconnect Mailbag Receiver ID
J1	Invalid Interconnect Mailbag Date
K1	Invalid Interconnect Mailbag Time

CODE	DEFINITION & EXPLANATION
1	US-ASCII *Latin, Swahili, Hawaiian and American English without most typographic frills.*
2	EBCDIC-US *IBM mainframes Extended Binary Coded Decimal Information Code.*
4	ISO 8859-1 *North America, Western Europe, Latin America, the Caribbean, Canada, Africa.*
5	ISO 8859-2 *Eastern Europe.*
6	ISO 8859-5 *The Cyrillic alphabet. Bulgarian, Belarusian, Russian and Macedonian.*
7	ISO 8859-7 *The modern Greek alphabet and mathematical symbols derived from the Greek.*
8	ISO 8859-3 *SE Europe, Esperanto, miscellaneous others.*
9	ISO 8859-4 *Scandinavia/Baltics (and others not in ISO-8859-1).*
10	ISO 8859-6 *The Arabic alphabet.*
11	ISO 8859-8 *The Hebrew alphabet.*
12	ISO 8859-9 *The Turkish alphabet. Same as ISO-8859-1 except Turkish characters replace Icelandic.*
13	ISO 8859-15 *Nordic alphabets. Lappish, Nordic, Eskimo.*
17	GB18030 *Simplified and traditional Chinese characters.*
18	EUC-JP *Japanese character set standards, namely JIS X 0208, JIS X 0212, and JIS X 0201.*
19	ISO-2022-JP *JIS Encodings.*
20	ISO-2022-JP-2 *Multilingual extension of ISO-2022-JP.*
21	ISO-2022-KR *Encodes ASCII and the Korean double-byte.*

22 EUC-KR
Used primarily for Japanese, Korean, and simplified Chinese.

23 ISO-2022-CN-EXT
Extends ISO-2022-CN with additional Guobiao standard.

24 ISO-2022-CN
Support the character sets GB 2312 (for simplified Chinese) and CNS 11643 (for traditional Chinese).

25 Big5
Chinese character encoding method used in Taiwan, Hong Kong, and Macau for Traditional Chinese characters.

26 ISO-10646-UCS-2
Universal Character Set. Fixed-length 16 bits (2 bytes). Replaced by UTF-16.

27 ISO-10646-UCS-4
Universal Character Set coded in 4 octets. It is now treated simply as a synonym for UTF-32.

28 SCSU
Standard Compression Scheme for Unicode. Technical Standard for reducing the number of bytes needed to represent Unicode text.

29 UTF-7
Universal Character Set. 7-bit Unicode Transformation Format.

30 UTF-16BE
Universal Character Set. 16-bit Unicode Transformation Format Big Endian Byte Order.

31 UTF-16LE
Universal Character Set. 16-bit Unicode Transformation Format Little Endian Byte Order.

32 UTF-16
Universal Character Set. 16-bit Unicode Transformation.

33 UTF8/CESU-8
Universal Character Set. 8-bit Unicode Transformation.

34 UTF-32
Universal Character Set. 32-bit Unicode Transformation.

35 UTF-32BE
Universal Character Set. 32-bit Unicode Transformation Format Big Endian Byte Order.

36 UTF-32LE
Universal Character Set. 32-bit Unicode Transformation Format Little Endian Byte Order.

37 BOCU-1
Binary Ordered Compression for Unicode (BOCU) is a MIME compatible Unicode compression scheme. Combines UTF-8 with the compactness of Standard Compression Scheme for Unicode (SCSU).

I71 - Overriding X12 Version / Release Code

This code indicates the version, and release of the value as agreed to by trading partners to override what is in the first six characters in GS08. Used only when code in GS07 is "X."

Interchange Control Structure (X12.5)

1. Purpose and Scope

The purpose of this standard is to define the control structures for the electronic interchange of one or more encoded business transactions including the EDI (electronic data interchange) encoded transactions of Accredited Standards Committee (ASC) X12. This standard provides the interchange envelope of a header and trailer for the electronic interchange through a data transmission, a structure to acknowledge the receipt and processing of this envelope, and optional, interchange-level service request structures.

These service request segments are treated as a logical extension of the basic interchange control header. An interchange delivery notice segment provides a method to report on interchange services requested and indicates status of delivery and retrieval of an interchange.

2. Referenced and Related Standards

This standard is used with the ASC X12 series of standards on electronic data interchange.

The following material is from The Internet Engineering Task Force (IETF®). The mission of the IETF is to make the Internet work better by producing high quality, relevant technical documents that influence the way people design, use, and manage the Internet.

The following verbatim text is from the cited document as noted immediately below.

[RFC2119] Bradner, S., "Key words for use in RFCs to Indicate Requirement Levels", BCP 14, RFC 2119, DOI 10.17487/RFC2119, March 1997, <http://www.rfc-editor.org/info/rfc2119>.

Key words for use in RFCs to Indicate Requirement Levels

In many standards track documents several words are used to signify the requirements in the specification. These words are often capitalized. This document defines these words as they should be interpreted in IETF documents. Authors who follow these guidelines should incorporate this phrase near the beginning of their document:

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in RFC 2119.

Note that the force of these words is modified by the requirement level of the document in which they are used.

1. **MUST This word, or the terms "REQUIRED" or "SHALL", mean that the definition is an absolute requirement of the specification.**
2. **MUST NOT This phrase, or the phrase "SHALL NOT", mean that the definition is an absolute prohibition of the specification.**
3. **SHOULD This word, or the adjective "RECOMMENDED", mean that there may exist valid reasons in particular circumstances to ignore a particular item, but the full implications must be understood and carefully weighed before choosing a different course.**
4. **SHOULD NOT This phrase, or the phrase "NOT RECOMMENDED", mean that there may exist valid reasons in particular circumstances when the particular behavior is acceptable or even useful, but the full implications should be understood and the case carefully weighed before implementing any behavior described with this label.**
5. **MAY This word, or the adjective "OPTIONAL", mean that an item is truly optional. One vendor may choose to include the item because a particular marketplace requires it or because the vendor feels that it enhances the product while another vendor may omit the same item. An implementation which does not include a particular option MUST be prepared to interoperate with another implementation which does include the option, though perhaps with reduced functionality. In the same vein an implementation which does include a particular option MUST be prepared to interoperate with another implementation which does not include the option (except, of course, for the feature the option provides.)**

3. Description of Use

There are six areas of the interchange which appear in the following order.

- Interchange control header
- Interchange service requests
- Interchange delivery notice

- Interchange acknowledgment
- Functional groups
- Interchange control trailer

The interchange control header and the interchange control trailer form the basic interchange. An interchange may contain additional control segments (e.g., service requests, delivery notices, and acknowledgments) and one or more functional groups.

3.1 Definitions and Concepts

The following definitions apply to this description of the interchange control structure. Italicized words indicate these terms are defined elsewhere in this section.

DELIVER: The action whereby the original interchange is made available to the *interchange receiver*. An interchange is considered "delivered" when it has been successfully conveyed to the *mailbox*, or, if a mailbox is not in use, to the *interchange receiver*.

INTERCHANGE RECEIVER: The interchange receiver is the entity that is the intended recipient of the interchange as specified by the *interchange sender* in the interchange header segment. The interchange receiver performs syntactical analysis of the interchange header, trailer, and acknowledgment segments and generates interchange acknowledgments to be returned to the *interchange sender*, if requested.

INTERCHANGE SENDER: The interchange sender is the entity that constructs the interchange header, interchange trailer, and interchange service requests.

INTERCHANGE SERVICE REQUEST: Segment used to specify additional services within the interchange.

MAILBOX: A mailbox is an entity capable of providing protected storage under the control of an *interchange receiver* for an interchange in transit between the *interchange sender* and *interchange receiver*.

RECEIVING SERVICE REQUEST HANDLER: The receiving service request handler is the entity that receives an interchange transferred by other service request handlers and delivers the interchange as specified by the interchange sender. The receiving service request handler also generates interchange delivery notices to be returned to the sending service request handler.

REFUSE: The action taken on an interchange *delivered* to a *mailbox* that cannot, or will not, be *retrieved*.

REJECT: The action taken on an interchange that cannot be *delivered* or *transferred* successfully.

RETRIEVE: The successful conveyance of an interchange from a *mailbox* to the *interchange receiver*.

SENDING SERVICE REQUEST HANDLER: The sending service request handler is the entity that acts upon interchange service requests as specified by the *interchange sender, transferring* the

interchange to the intended *service request handler* of the *interchange receiver*. The sending service request handler also processes interchange delivery notices returned by other *service request handlers*.

SERVICE REQUEST HANDLER: A service request handler is an entity, intermediate to the *interchange sender* and *interchange receiver*, capable of acting upon one or more optional service requests or delivery notifications.

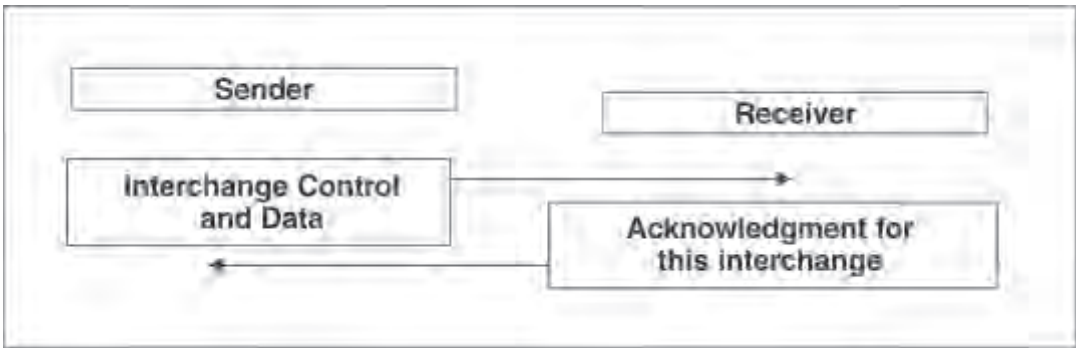
TRANSFER: The action whereby a *sending service request handler* sends an interchange to a *receiving service request handler*.

3.2 Basic Interchange Service

The basic interchange control structure is designed to satisfy the basic requirements for enveloping and routing electronic business data.

3.2.1 Basic Interchange Service Request

The Interchange Control Header (ISA) and Interchange Control Trailer (IEA) segments form the basic interchange service request. This is a basic delivery service request for one or more functional groups or interchange-related control segments, or a combination of functional groups and interchange-related control segments. The basic interchange service request performs the following functions.



- Defines the data element separator, component element separator, and segment terminator
- Identifies the sender and receiver
- Provides control information for the interchange
- Allows for authorization and security information

The basic interchange service is required for delivery of the interchange. The addressing information is located within the interchange header.

3.2.2 Basic Interchange Acknowledgment

An Interchange Acknowledgment segment (TA1) is used to report the receipt of the contents of one interchange control header and trailer envelope where that envelope surrounds one or more functional groups. This acknowledgment is transferred between the interchange receiver and sender as addressed in the interchange header. The TA1 reports the results of the syntactical analysis of the interchange control header and trailer. There is no acknowledgment for the TA1, thereby preventing an endless loop of acknowledgments. The flow of the original interchange and the corresponding acknowledgment are diagrammed in Figure 3.1 - Flow of Original Interchange and Corresponding Acknowledgment.

Figure 3.1 - Flow of Original Interchange and Corresponding Acknowledgment

The interchange control number value in TA1 is the same as for the ISA for which the acknowledgment was prepared. This control number serves as a link between the interchange header and the acknowledgment of that header.

The TA1 reports the status of the interchange envelope only. It is not used to report the status of the functional groups and transaction sets in the interchange.

The preparer of the interchange header and trailer indicates the level of acknowledgment requested in the acknowledgment requested data element. If the value in this data element position indicates no acknowledgment, the interchange receiver shall not return that acknowledgment. A TA1 control segment shall not be generated for an interchange that does not contain any transaction sets, thus preventing an endless loop of TA1 or TA3 acknowledgments.

3.3 Optional Interchange Service Requests

The basic interchange service capability provided by the ISA can be expanded by optional interchange service requests and responses.

The optional interchange service requests accompanying a basic interchange request (ISA) provide the interchange sender with a means to request ancillary services that may be provided by service requests handlers.

The optional interchange service request segment and the service functions they are designed to support are:

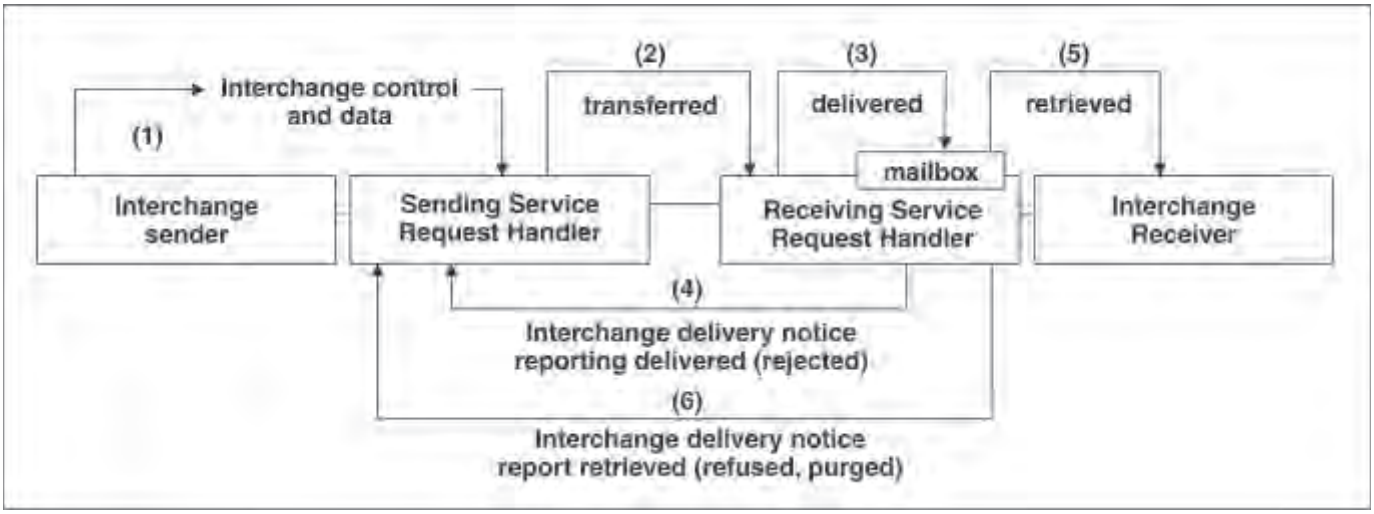
ISB - Grade of Service Request and
ISE - Deferred Delivery Request.

It is the responsibility of the interchange sender to know whether or not their service request handler (SRH) supports the service request.

When the SRH receives a service request from the interchange sender or sending SRH, the SRH will, by default, remove the service request. To override the default, the SRH must establish an agreement with the interchange receiver or receiving SRH to retain the service request.

Although the segments for these services are separate segments, they immediately follow the basic interchange header and must be treated as a logical extension to the ISA. This means that the service request handlers must examine the fully extended header to decide if there are any optional services to perform.

3.4 Interchange Syntax Extension (ISX)



An Interchange Syntax Extension segment is used by the interchange sender to indicate to the interchange receiver additional information required for the correct syntactic processing of the interchange. An Interchange Service Extension is optional and only used by mutual agreement between the interchange sender and interchange receiver.

3.5 Interchange Delivery Notice (TA3)

The Interchange Delivery Notice segment (TA3) is exchanged between service request handlers to inform the sending service request handlers of actions taken on the interchange by the receiving service request handler. The TA3 reports the delivery and the retrieval of the interchange. The TA3 also reports the unsuccessful delivery or retrieval of the interchange and identifies the error condition. Data extracted from the reported interchange for identification purposes and timestamps that identify the time an action has occurred are included. Other optional service request handler actions are also reported.

The flow of the original interchange and the corresponding TA3 segments are diagrammed in Figure 3.2 - Flow of Original Interchange and Corresponding Interchange Delivery Notice (event sequence illustrated as numbered).

Figure 3.2 - Flow of Original Interchange and Corresponding Interchange Delivery Notice (event sequence illustrated as numbered)

The use of TA3 is optional. Its usage should be based on mutual agreement. A TA3 control segment shall not be generated for an interchange that does not contain any transaction sets, thus preventing an endless loop of TA1 or TA3 acknowledgments.

TA3 segments are conveyed in an interchange addressed from the receiving service request handler to the sending service request handler.

3.6 Order of Control Segments

The interchange prepared by the interchange sender shall occur in the order as listed in Table 3.1 - Order of the Interchange Segments for Interchange Sender. (See explanations of field heading that follow figure 3.4.)

Table 3.1 - Order of the Interchange Segments for Interchange Sender

Seg. ID	Name	Req. Des.	Max Use
ISA	Interchange Control Header	M	1
ISB	Grade of Service	O	1
ISE	Deferred Delivery Request	O	1
TA1	Interchange Acknowledgment	O	>1
ISX	Interchange Syntax Extension	O	1
-	Functional Groups (see note)	O	99,999
IEA	Interchange Control Trailer	M	1

NOTE: In the diagram above, the functional group is not an interchange component of this standard but appears in this figure to establish positioning for the functional groups. Zero, one, or more than one interchange acknowledgments may appear in one interchange. Zero, one, or more than one functional groups may appear in one interchange. However, at least one interchange acknowledgment or functional group must appear in an interchange for an interchange sender.

The interchange prepared by the service request handler shall occur in the order as listed in Table 3.2 - Order of the Interchange Segments for Service Request Handler.

Table 3.2 - Order of the Interchange Segments for Service Request Handler

Seg. ID	Name	Req. Des.	Max Use
ISA	Interchange Control Header	M	1
TA3	Interchange Delivery Notice	M	>1
IEA	Interchange Control Trailer	M	1

3.7 Date and Time in the Interchange Segments

3.7.1 Basic Interchange Service - Dates and Times

The dates and times used in the ISA and TA1 segments represent local date and time of the interchange sender.

3.7.2 Optional Interchange Service Requests - Dates and Times

For optional interchange service request segments, a relationship to universal time coordinate (UTC) is provided to allow calculation of the time and date independent of the location of the interchange sender and the service request handler. This is particularly important if the interchange sender and the service request handler do not have the same local time.

3.7.3 Interchange Delivery Notice - Dates and Times

For the TA3, the date and time used to identify an interchange is copied from the interchange header and therefore represent local date and time of the interchange sender. The dates and times used as action dates and times shall be UTC.

4. Syntax

4.1 Basic Structure

A data element corresponds to a data field in data processing terminology. It is the smallest named item in the standard.

A control segment has the same structure as a data segment; the distinction is in the usage. The data segment is used primarily to convey user information, while the control segment is used primarily to convey control information and to group data segments. A data segment corresponds to a record in data processing terminology. The data segment begins with a segment ID and contains related data elements.

Other definitions, such as data element types, may be found in X12.6 Application Control Structure.

4.2 Syntax Notation

The syntax is defined in Backus Naur Form (BNF), which is described below. Other syntax elements may be found in X12.6 Application Control Structure.

- Lower case words denote syntactic constructs which are enclosed in angle brackets. The underscore is included as a valid character, e.g.,

  <transaction_set>
- The defined construct is on the left side of a statement and is separated from the defining right side by the symbol "::=", e.g.,

  <one_construct> **::=** **<another_construct>**
- Uppercase words are predefined labels, e.g.,

  TRM
- Lowercase words not enclosed in angle brackets denote a general class of items which are not further defined in this section of the standard, e.g.,

  data
- Brackets denote optional items, e.g.,

  [<one_construct>]
- When alternative definitions exist, they may be shown separated by a vertical bar "|", e.g.,

  <letter_or_digit> **::=** **<uppercase_letter> | lt;digit>**
- Braces enclose an item which may appear zero or more times, e.g.,

  <unsigned_integer> **::=** **<digit> {<digit>}**

4.3 Delimiter Specifications

The delimiters consist of three separators and a terminator. The delimiters are devised for inclusion within the data stream of the transfer. The delimiters are:

- <tr> segment terminator
- <gs> data element separator
- <us> component element separator
- <rs> repetition separator

The delimiters are assigned by the interchange sender. These characters are disjoint from those of the data elements; if a character is selected for the data element separator, the component element separator, the repetition separator or the segment terminator from those available for the data elements, that character is no longer available during this interchange for use in a data element. The instance of the terminator <tr> must be different from the instance of the data element separator <gs>, the component element separator <us> and the repetition separator <rs>. The data element separator, component element separator and repetition separator must not have the same character assignment.

4.4 Interchange Structure Syntax

The BNF for the syntax of this standard is listed below. Other syntax elements not defined here may be found in X12.6 Application Control Structure.

<interchange_structure>	**::=**	**<inter_header> (<inter_request> | <inter_response>) <inter_trailer>**
<inter_request>	**::=**	**[<grade_of_service>] [<time_delay>] {<inter_ack>} {<functional_group>}**
<inter_response>	**::=**	**<inter_status> {<inter_status>}**

4.4.1 Basic Interchange Segments

The basic interchange segments consist of the ISA, the IEA, and the TA1 segments.

4.4.1.1 Interchange Control Header Segment (ISA)

Table 4.4.1.1 - Interchange Control Header Segment (ISA)

<inter_header>	**::=**	**ISA <gs> <authorization> <gs> <security> <gs> <sender> <gs> <receiver> <gs> <inter_date_time> <gs> <rs> <gs> <version_id> <gs> <inter_control> <gs> <ack_requested> <gs> <test_indicator> <gs> <us> <tr>**
<authorization>	**::=**	**(<authorization_qualifer> <gs> <authorization_info>) | ("00" <gs> <no_information>)**
<authorization_qualifier>	**::=**	**<id>**

<authorization_info>	::=	<string>
<security>	::=	(<security_qualifier> <gs> <security_info>) | ("00" <gs> <no_information>)
<security_qualifier>	::=	<id>
<security_info>	::=	<string>
<sender>	::=	<inter_id_qualifier> <gs> <sender_id>
<receiver>	::=	<inter_id_qualifier> <gs> <receiver_id>

5. Interchange Segment Specifications

5.1 Basic Interchange Segments

5.1.1 Segment Specifications

Specifications for the interchange segments are provided in the segment directory.

5.1.2 Interchange Control Header Segment (ISA)

Purpose:

To start and identify an interchange of zero or more functional groups and interchange-related control segments.

The actual values of the data element separator, component element separator, repetition separator, and segment terminator for this interchange are set by the interchange control header. For a particular interchange, the value at the fourth character position of the interchange control header is the data element separator, and the value of the last character position is the segment terminator. The extent of this particular usage of the data element separator, component element separator, and the segment terminator is from this header to, and including, the next interchange trailer. The interchange control number value in this header must match the value in the same data element in the IEA segment.

In order to provide sufficient discrimination for the acknowledgment process to operate reliably and to ensure that audit trails are unambiguous, the combination of interchange sender's qualifier and ID (ISA05, ISA06), interchange receiver's qualifier and ID (ISA07, ISA08) and the interchange control number value (ISA13) shall by themselves be unique within a reasonably extended time frame whose boundaries shall be defined by trading partner agreement. Because at some point it may be necessary to reuse a sequence of control numbers, the Interchange Date and Time may serve as an additional discriminant only to differentiate interchange identity over the longest possible time frame.

5.1.3 Interchange Control Trailer Segment (IEA)

Purpose:

To define the end of an interchange of zero or more functional groups and interchange-related control segments.

The interchange control number in this trailer must match the value in the same data element in the corresponding ISA segment.

5.1.4 Interchange Acknowledgment Segment (TA1)

Purpose:

To report the status of the processing of an interchange header and trailer by the addressed receiver or the non-delivery by a network provider.

5.2 Optional Interchange Segments

5.2.1 Grade of Service Request Segment (ISB)

Purpose:

To request a delivery priority for this interchange higher or lower than normally provided. The priority request is performed by each service request handler, using each handler's criteria for providing priority delivery service.

5.2.2 Deferred Delivery Request Segment (ISE)

Purpose:

To specify the earliest time when the interchange can be delivered.

The time and date in the ISE segment indicates the earliest time the interchange can be delivered to the interchange receiver.

5.2.3 Interchange Syntax Extension (ISX)

Purpose:

To allow the interchange sender to specify additional information required for the interchange receiver to perform syntax interpretation of the interchange. This segment allows specification of a release character, character encoding, and similar capabilities.

5.3 Interchange Delivery Notice Segment (TA3)

Purpose:
To provide a notice from the receiving service request handler to the sending service request handler that an interchange was delivered or not delivered to the interchange receiver's mailbox, or some other ancillary service was performed, and that the interchange receiver retrieved, refused, or purged the interchange; TA3 is exchanged only between service request handlers; use of the TA3 segment is optional.

6. Data Element Specifications

6.1 Data Element Definitions

Specifications for the data elements of this standard are provided in the Data Element Dictionary. Code Sources for code lists not maintained by ASC X12 appear in the Index to Code Sources at the end of the Data Element Dictionary. Reference to Code Source Identifiers follow Data Element descriptions or Data Element definitions.

Appendix A. Implementation Considerations

This Appendix covers implementation considerations regarding the character sets used in the interchange of the transaction sets with particular emphasis on the delimiters. The basic and extended character sets are defined in X12.6; reference should be made to that standard for a definition of those character sets. Portions of those definitions are repeated here as required for understanding. The BNF used below is defined in X12.6.

A.1 Basic Character Set

The selection that follows is designed to have representation in the common character code schemes of EBCDIC, ASCII, and CCITT International Alphabet 5. The ASC X12 standards are graphic-character-oriented; therefore, common character encoding schemes other than those specified herein may be used as long as a common mapping is available. Since the graphic characters have an implied mapping across character code schemes, those bit patterns are not provided here.

The basic character set of this standard includes those selected from the uppercase letters, digits, space, and special characters as specified below.

<uppercase_letter> ::=	A	...	Z			
<digit> ::=	0	...	9			
<special_char> ::=	“!”	“””	“&”	“’”	“(”	“)”
	“*”	“+”	“,”	“-”	“.”	“/”
	“:”	“;”	“?”	“=”		
<space> ::=	“ ”					

A.2 Extended Character Set

An extended character set may be used by negotiation between the two parties and includes the lowercase letters and other special characters as specified below.

<lower_case_letter> ::=	"a"	...	"z"			
<other_special_char> ::=	"%"	"@"	"["	"]"	"_"	"{"
	"}"	"\"	"|"	"<"	">"	"~"
	"^"	"`"				
<national_char> ::=	"#"	"$"				

It should be noted that

<special_char>
<other_special_char>

and

<national_char>

include several character codes which have multiple graphical representations for a specific bit pattern. The complete list appears in other standards such as CCITT S.5. Use of the USA graphics for these codes presents no problem unless data is exchanged with an international partner. Other problems, such as the translation of item descriptions from English to French, arise when exchanging data with an international partner, but minimizing the use of codes with multiple graphics eliminates one of the more obvious problems.

A.3 Control Characters

Two control character groups are specified which have only restricted usage. The common notation for these is also provided, together with the character coding in three common alphabets represented by their hexadecimal values. In the following table IA5 represents CCITT V.3 International Alphabet 5.

A.3.1 Terminal Control Set

The terminal control set includes characters used to control terminal display characteristics. These characters usually will not have an effect on a transmission system. These are presented by the syntactic entity of <term_control_char>.

SYM	Notation	EBCDIC	ASCII	IA5
BEL	bell	2F	07	07
HT	horizontal tab	05	09	09
LF	line feed	25	0A	0A
VT	vertical tab	0B	0B	0B
FF	form feed	0C	0C	0C
CR	carriage return	0D	0D	0D
NL	new line	15	(See Note)	
FS	file separator	1C	1C	1C
GS	group separator	1D	1D	1D
RS	record separator	1E	1E	1E
US	unit separator	1F	1F	1F

Note: The equivalent representation for the EBCDIC “new line” character is the character pair "carriage return" "line feed" in ASCII or IA5. If mapped in this manner, the superfluous "line feed" is ignored, and the "carriage return" is treated as the delimiter. For historical reasons, many systems support this mapping for use as the <segment_terminator>.

A.3.2 Communication Control Set

The communication control set includes those that may have an effect on a transmission system. These are represented by the syntactic entity of <comm_control_char>.

SYM	Notation	EBCDIC	ASCII	IA5
GS	group separator	1D	1D	1D
RS	record separator	1E	1E	1E
US	unit separator	1F	1F	1F
SOH	start of header	01	01	01
STX	start of text	02	02	02
ETX	end of text	03	03	03
EOT	end of transmission	37	04	04
ENQ	enquiry	2D	05	05
ACK	acknowledge	2E	06	06
DC1	device control 1	11	11	11
DC2	device control 2	12	12	12
DC3	device control 3	13	13	13
DC4	device control 4	3C	14	14
NAK	negative acknowledge	3D	15	15
SYN	synchronous idle	32	16	16
ETB	end of block	26	17	17

A.4 Specification of Delimiters

The delimiters are defined within this standard. This section of this Appendix covers the recommended maximum range of the characters for the delimiters. A series of specific recommendations are provided in Section 5.

A.4.1 Terminator

<tr>	**::=**	**segment_terminator**

A.4.2 Data Element Separator

<gs>	**::=**	**data_element_separator**

A.4.3 Subelement Separator

<us>	**::=**	**sub_element_separator**

A.4.4 Repetition Separator

<rs>	**::=**	**repetition_separator**

A.4.5 Release Character

<rc>	**::=**	**release_character**

A.5 Recommendations for the Delimiters

Because of the potential conflicts with either the data elements or with special uses in transmission and device control, the following recommendations are provided for the delimiter character selection.

The following characters usually occur in data. They should not be used as delimiters:

<uppercase_letter>
<lowercase_letter>
<digit>
<space>
"-" (minus sign)

The following characters often appear in data. Use as delimiter characters with caution.

<special_char>

The following characters sometimes appear in data. Use as delimiter characters with caution.

<other_special_char>

The following characters are used for terminal control. Use as delimiter characters with caution.

<term_control_char>

The following characters may disrupt communications. Use as delimiter characters with caution.

<comm_control_char>

Delimiter characters must be chosen with care, after consideration of data content, limitations of the transmission protocol(s) used, and applicable industry conventions. In the absence of other guidelines, the following recommendations are offered:

<tr> terminator				
<file separator>	<new line>	<carriage return>	<line feed>	<"~">
<Note: the "~" was chosen for its infrequency of use in textual data>				

<gs> data element separator		
<horizontal tab>	"*"	
Note: the "asterisk" has a potential for conflict with the data stream; however, it has been the preferred character historically, and so is explicitly listed in the recommendation.		

<us> component element separator		
<vertical tab>	"\"	
Note: the "\" was chosen for its infrequency of use in textual data.		

<rs> repetition separator		
<record separator>	"^"	
Note: the "^" was chosen for its infrequency of use in textual data.		

<rc> release_character		
<release_character>	"!"	
Note: the "!" was chosen because of its common use in the international community.		

A.6 Encoding Specification

X12 has always used a graphical character set and has been neutral toward the particular encoding used in the data stream of a transfer. However, the ability to specify the specific encoding early in the data stream raises some implementation considerations around being able to properly read the encoding. In the absence of mutual agreement between sender and receiver, if it is desired that the encoding be determined from reading the data stream it is recommended that the interchange up through and including the ISX segment be encoded in a character set compatible with US-ASCII.

Encoding schemes are used to preserve data in digital format for storage and transmission. Each encoding has an association with a defined set of characters and is the method of representing a string of characters with a string of bytes. X12 Encoding applies to the data stream beginning with the Functional Group to the end of the interchange.

Language specific encoding provides the ability to identify the set of characters contained in elements defined as text beyond the ISX. Element level encoding should be used with the language specific character sets and only applies to text elements. Segment identifiers, delimiters, and elements defined with code list values should remain in a character set compatible with US-ASCII.

Universal character sets defined with the Unicode Standard have the capability to represent the characters defined in most all encoding schemes and introduce a difference in how the encoding

should be applied to the X12 data stream. Package level encoding should be used with Unicode encoding schemes such as UTF-8, UTF-16, and UTF-32. Encoding schemes defined in the Unicode Standard represent each character as a binary number in 8, 16, or 32 bits. A Unicode encoding would be applied to all characters following the ISX segment.

X12.6 Application Control Structure

1. Purpose and Scope

This standard defines the structure of business transactions for computer-to-computer interchange. This structure is expressed using a symbolic representation of X12 data independent of the physical representation (e.g., character set encoding). Transformations that affect the physical representation of the data are outside the scope of this standard. The symbolic representation is expressed in terms of both the design and use of X12 structures. This includes the control segments used to bound loops of data segments, transaction sets, and groups of related transaction sets, and the special control segments used to bound transaction sets and groups of transaction sets for security purposes.

This standard does not define any specific transaction set. Data segments are defined in a segment directory; data elements are defined in a data element dictionary; composite data structures are defined in a composite data structure directory; control segments and the binary segment are defined in this standard and fully described in a segment directory.

2. Referenced and Related Standards

This standard is used with the ASC X12 series of standards on electronic data interchange.

The following material is from The Internet Engineering Task Force (IETF®). The mission of the IETF is to make the Internet work better by producing high quality, relevant technical documents that influence the way people design, use, and manage the Internet.

The following verbatim text is from the cited document as noted immediately below.

[RFC2119] Bradner, S., "Key words for use in RFCs to Indicate Requirement Levels", BCP 14, RFC 2119, DOI 10.17487/RFC2119, March 1997, <http://www.rfc-editor.org/info/rfc2119>.

Key words for use in RFCs to Indicate Requirement Levels

In many standards track documents several words are used to signify the requirements in the specification. These words are often capitalized. This document defines these words as they should be interpreted in IETF documents. Authors who follow these guidelines should incorporate this phrase near the beginning of their document:

> **The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in RFC 2119.**

Note that the force of these words is modified by the requirement level of the document in which they are used.

1. **MUST This word, or the terms "REQUIRED" or "SHALL", mean that the definition is an absolute requirement of the specification.**
2. **MUST NOT This phrase, or the phrase "SHALL NOT", mean that the definition is an absolute prohibition of the specification.**
3. **SHOULD This word, or the adjective "RECOMMENDED", mean that there may exist valid reasons in particular circumstances to ignore a particular item, but the full implications must be understood and carefully weighed before choosing a different course.**
4. **SHOULD NOT This phrase, or the phrase "NOT RECOMMENDED", mean that there may exist valid reasons in particular circumstances when the particular behavior is acceptable or even useful, but the full implications should be understood and the case carefully weighed before implementing any behavior described with this label.**
5. **MAY This word, or the adjective "OPTIONAL", mean that an item is truly optional. One vendor may choose to include the item because a particular marketplace requires it or because the vendor feels that it enhances the product while another vendor may omit the same item. An implementation which does not include a particular option MUST be prepared to interoperate with another implementation which does include the option, though perhaps with reduced functionality. In the same vein an implementation which does include a particular option MUST be prepared to interoperate with another implementation which does not include the option (except, of course, for the feature the option provides.)**

3. Definitions and Concepts

3.1 Basic Structure

The X12 standards define commonly used business transactions in a formal, structured manner called transaction sets. A transaction set is composed of a transaction set header control segment, one or more data segments, and a transaction set trailer control segment. Optionally the transaction set may also include a transaction security header control segment and transaction security trailer control segment when it is desirable to send the data within the transaction envelope in an authenticated or encrypted form, or both.

Each segment is composed of: a unique segment ID; one or more logically related simple data elements or composite data structures, or both, each preceded by a data element separator; and a segment terminator. Composite data structures are composed of one or more logically related component data elements, each, except the last, followed by a component element separator. The data segment directory entry referenced by the data segment identifier defines the sequence of simple data elements and composite data structures in the segment and any interdependencies that may exist. The composite data structure directory entry referenced by the composite data structure number defines the sequence of component data elements in the composite data structure.

A data element in the transaction set header identifies the type of transaction set. A functional group contains one or more related transaction sets preceded by a functional group header control segment and terminated by a functional group trailer control segment. Optionally, the functional group may also include a functional security header control segment and functional security trailer control segment when it is desirable to send the data within the functional envelope in an authenticated or encrypted form, or both.

3.2 Syntax Notation

The syntax is defined in a Backus-Naur Form (BNF), which is described in 3.2.1 through 3.2.8. Each definition is accompanied by explanatory text. In some cases actual use (the actual data stream) of an X12 structure may not be the same as the definition. These instances are caused by the optional nature of some structures. Where such structures occur in this document, two representations of the BNF are presented, labeled "definition" and "use" respectively.

3.2.1 Syntactic Entities

Lowercase strings that are enclosed in angle brackets denote syntactic entities. The underscore is included as a valid character for this representation. For example:

```
<transaction_set>
```

3.2.2 Defined Constructs

The defined construct is on the left side of a statement and is separated from the defining right side by two colons and an equal sign (::=). For example:

```
<one_construct>::=<another_construct>
```

3.2.3 Other Inclusions

In the statements, spaces between syntactic entities are not significant and may be included for clarity. Meaningful spaces may be included in the statements by enclosing them in quotation marks. Other symbols may be included in quotation marks for clarity. The right side of the statement may be continued onto lower lines and be divided between syntactical entities. Ellipses (...) are used to represent missing items when a logical progression has been established.

3.2.4 Alternative Definitions

When alternative definitions exist, they may be shown separated by a vertical bar (|). For example:

```
<letter_or_digit>::=<uppercase_letter> | <digit>
```

3.2.5 Predefined Labels

Certain character strings (for example, "ST") are predefined labels and are always to be used as they are given. Punctuation symbols appear as they would in the transfer of data; for example, the decimal point in "1.2" shall be specified as:

```
<digit> . <digit>
```

3.2.6 Optional Items

Square brackets enclose optional items. For example, the optional negative sign is expressed as:

```
[-]
```

3.2.7 Multiple Occurrences

Braces enclose an item which may appear zero or more times. For example:

```
<unsigned_integer>::=<digit> {digit}
```

3.2.8 Minimums/Maximums

The minimum and maximum number of characters that may be used for a syntactic entity is specified by the inclusion of two numbers in parentheses appended to the end of the syntactic construct as (minimum/maximum). This is used to represent the minimum and maximum lengths of a data element in the data element dictionary.

<id>(02/03)	**::=**	**<letter_or_digit> <letter_or_digit> [<letter_or_digit>]**

3.2.9 External Entities

Uppercase strings that are enclosed in angle brackets denote syntactic entities that are defined external to this document. When used they are accompanied by text specifying the entity or entities referenced. The underscore is included as a valid character for this representation. For example:

<ISO_LANGUAGE_CHARACTER>

3.3 Character Set

All data element values, except those of the binary data element, shall be constructed using the character set specified in 3.3.1 through 3.3.3. The character set of this standard is grouped according to common characteristics.

NOTE:
The X12 standards are graphic-character oriented, so any common character encoding schemes may be used as long as a common mapping is available. No collating sequence is to be assumed in any definition used in the standard since no single character code is specified and no other means of specifying a sequence is provided.

3.3.1 Basic Character Set

The basic character set of this standard consists of uppercase letters, digits, special characters, and space.

(1) Uppercase letters from A to Z:

<uppercase_letter>	**::=**	**"A" | ... | "Z"**

Latin Alphabet: Uppercase

A	Latin Capital letter A
B	Latin Capital letter B
C	Latin Capital letter C
D	Latin Capital letter D
E	Latin Capital letter E
F	Latin Capital letter F

G	Latin Capital letter G
H	Latin Capital letter H
I	Latin Capital letter I
J	Latin Capital letter J
K	Latin Capital letter K
L	Latin Capital letter L
M	Latin Capital letter M
N	Latin Capital letter N
O	Latin Capital letter O
P	Latin Capital letter P
Q	Latin Capital letter Q
R	Latin Capital letter R
S	Latin Capital letter S
T	Latin Capital letter T
U	Latin Capital letter U
V	Latin Capital letter V
W	Latin Capital letter W
X	Latin Capital letter X
Y	Latin Capital letter Y
Z	Latin Capital letter Z

(2) Digits from 0 to 9:

<digit>	**::=**	**"0" | ... | "9"**

ASCII Digits

0	Digit Zero

1	Digit One
2	Digit Two
3	Digit Three
4	Digit Four
5	Digit Five
6	Digit Six
7	Digit Seven
8	Digit Eight
9	Digit Nine

(3) Special characters:

<special_char>	**::=**	**"!" | """ | "&" | "'" | "(" | ")" | "*" | "+" | "," | "-" | "." | "/" | ":" | ";" | "?" | "="**

ASCII Punctuation & Symbols

!	Exclamation mark
"	Quotation mark
&	Ampersand
'	Apostrophe
(	Left parenthesis
)	Right parenthesis
*	Asterisk
+	Plus sign
,	Comma
-	Hyphen-minus
.	Full stop

/	Slash (Solidus)
:	Colon
;	Semicolon
?	Question mark
=	Equal sign

NOTE:
Special characters are removed from this category when used as delimiters or release character, unless protected by the release character.

(4) The space character:

<space>	**::=**	**" "**

ASCII Punctuation & Symbols

	Space

3.3.2 Extended Character Set

An extended character set may be used by agreement between communicating parties and includes the lowercase letters, other special characters, national characters, and select language characters, and other language characters.

(1) Lowercase letters from a to z:

<lowercase_letter>	**::=**	**"a" | ... | "z"**

Latin Alphabet: Lowercase

a	Latin Small letter A
b	Latin Small letter B
c	Latin Small letter C
d	Latin Small letter D
e	Latin Small letter E
f	Latin Small letter F
g	Latin Small letter G

h	Latin Small letter H
i	Latin Small letter I
j	Latin Small letter J
k	Latin Small letter K
l	Latin Small letter L
m	Latin Small letter M
n	Latin Small letter N
o	Latin Small letter O
p	Latin Small letter P
q	Latin Small letter Q
r	Latin Small letter R
s	Latin Small letter S
t	Latin Small letter T
u	Latin Small letter U
v	Latin Small letter V
w	Latin Small letter W
x	Latin Small letter X
y	Latin Small letter Y
z	Latin Small letter Z

(2) Other special characters:

<other_special_char>	**::=**	**"%" | "@" | "[" | "]" | "_" | "{" | "}" | "\" | "|" | "<" | ">" | "~" | "^" | "`"**

ASCII Punctuation & Symbols

%	Percent sign

@	At sign
[	Left Square Bracket
]	Right Square Bracket
_	Low line (Underscore)
{	Left Curly Bracket
}	Right Curly Bracket
\	Backslash
|	Vertical bar
<	Less-than sign
>	Greater-than sign
~	Tilde
^	Circumflex accent
`	Grave accent

NOTE:
Special characters are removed from this category when used as delimiters unless protected by the release character.

(3) National characters:

<national_char>	**::=**	**"#" | "$"**

Latin Alphabet: Lowercase

#	Number sign
$	Dollar sign

(4) Select language characters:

<select_language_char>	**::=**	**"À" | "Á" | "Â" | "Ä" | "Å" | "à" | "á" | "â" | "ä" | "ã" | "å" | "æ" | "È" | "É" | "Ê" | "è" | "é" | "ê" | "ë" | "Ì" | "Í" | "Î" | "ì" | "í" | "î" | "ï" | "Ò" | "Ó" | "Ô" | "Ö" | "ò" | "ó" | "ô" | "ö" | "Ù" | "Ú" | "Û" | "Ü" | "ù" | "ú" |**

		"û" | "ü" | "Ç" | "ç" | "Ñ" | "ñ" | "¿" | "¡" | "Ø" | "ø"

Letters

À	Latin Capital Letter A with grave
Á	Latin Capital letter A with acute
Â	Latin Capital letter A with circumflex
Ä	Latin Capital letter A with diaeresis
Å	Latin Capital letter A with ring above
à	Latin Small Letter A with grave
á	Latin Small Letter A with acute
â	Latin Small Letter A with circumflex
ä	Latin Small Letter A with diaeresis
ã	Latin Small Letter A with tilde
å	Latin Small Letter A with ring above
æ	Latin Small Letter Ae
È	Latin Capital letter E with grave
É	Latin Capital letter E with acute
Ê	Latin Capital letter E with circumflex
è	Latin Small Letter E with grave
é	Latin Small Letter E with acute
ê	Latin Small Letter E with circumflex
ë	Latin Small Letter E with diaeresis
Ì	Latin Capital letter I with grave
Í	Latin Capital letter I with acute

Î	Latin Capital letter I with circumflex
ì	Latin Small Letter I with grave
í	Latin Small Letter I with acute
î	Latin Small Letter I with circumflex
ï	Latin Small Letter I with diaeresis
Ò	Latin Capital letter O with grave
Ó	Latin Capital letter O with acute
Ô	Latin Capital letter O with circumflex
Ö	Latin Capital letter O with diaeresis
ò	Latin Small Letter O with grave
ó	Latin Small Letter O with acute
ô	Latin Small Letter O with circumflex
ö	Latin Small Letter O with diaeresis
Ù	Latin Capital letter U with grave
Ú	Latin Capital letter U with acute
Û	Latin Capital Letter U with circumflex
Ü	Latin Capital Letter U with diaeresis
ù	Latin Small Letter U with grave
ú	Latin Small Letter U with acute
û	Latin Small Letter U with circumflex
ü	Latin Small Letter U with diaeresis
Ç	Latin Capital letter C with cedilla
ç	Latin Small Letter C with cedilla
Ñ	Latin Capital letter N with tilde

ñ	Latin Small Letter N with tilde
¿	Inverted Question Mark
¡	Inverted Exclamation Mark
Ø	Latin Capital letter O with stroke
ø	Latin Small Letter O with stroke

NOTE:
See ISO document 8859-1 (Latin-1 Alphabet) for an example of an encoding of select language characters.

(5) Other language characters:

<ISO_LANGUAGE_CHARACTERS>

Any graphical character that is specified in any of the following ISO documents that is not defined in any of the previous BNF productions:

- ISO 646
- ISO 8859-1
- ISO 8859-2
- ISO 8859-5
- ISO 8859-7
- ISO 8859-3
- ISO 8859-4
- ISO 8859-6
- ISO 8859-8
- ISO 8859-9
- ISO 8859-15
- ISO 2022
- ISO 2375
- ISO 10646

3.3.3 Empty Character Set

An empty character set is the absence of data.

<Empty>	**::=**	**""**

3.4 Syntax Objects

Syntax Objects consist of four delimiters, and optionally, a release character.

3.4.1 Delimiters

The delimiters consist of three separators and a terminator. The delimiters are an integral part of the transferred data stream. Delimiters are specified in the interchange header and shall not be used in a data element value elsewhere in the interchange with the exceptions of their possible appearance in the binary data element or when protected by the release character.

The separators and terminator are:

<tr>	**::=**	**segment terminator**
<gs>	**::=**	**data element separator**
<us>	**::=**	**component element separator**
<rs>	**::=**	**repetition separator**

3.4.2 Release Character

When specified in the interchange control structure, the release character prevents the character immediately following its appearance from being treated as a Syntax Object.

3.5 Data Element

The data element is the smallest named unit of information in the standard. Data elements are identified as either simple or component. A data element that occurs as an ordinally positioned member of a composite data structure is identified as a component data element. A data element that occurs in a segment outside the defined boundaries of a composite data structure is identified as a simple data element. The distinction between simple and component data elements is strictly a matter of context since a data element can be used in either capacity. The following definitions apply equally to each class of data element.

<simple_data_element>	**::=**	**<data_element>**
<component_data_element>	**::=**	**<data_element>**
<data_element>	**::=**	**<numeric> | <decimal_number> | <id> | <string> | <date> | <time> | <binary>**

3.5.1 Data Element Types

The data element types and the length characteristics of each of these types are described in 3.5.1.1 through 3.5.2.3.

3.5.1.1 Numeric

A numeric is represented by one or more digits with an optional leading sign representing a value in the normal base of 10.

<numeric>	**::=**	**[-] <unsigned_integer>**
<unsigned_integer>	**::=**	**<digit> {<digit>}**

The value of a numeric data element includes an implied decimal point. It is used when the position of the decimal point within the data is permanently fixed and is not to be transmitted with the data. The data element dictionary defines the number of implied decimal positions. The representation for this data element type is Nn where "N" indicates that it is numeric and "n" indicates the number of decimal positions to the right of the implied decimal point. If n is 0, it need not appear in the specification; N is equivalent to N0. For negative values, the leading minus sign (-) is used. Absence of a sign indicates a positive value. The plus sign (+) shall not be transmitted. Leading zeros should be suppressed unless necessary to satisfy a minimum length requirement. The length of a numeric type data element does not include the optional sign.

FOR EXAMPLE:

Value is -123.4
Numeric type is N2 where the "2" indicates an implied decimal placement two positions from the right
The data stream value is -12340
The length is 5 (note padded zero)

3.5.1.2 Decimal Number

A decimal data element contains an explicit decimal point and is used for numeric values that have a varying number of decimal positions. The representation for this data element type is R. The decimal point always appears in the character stream if the decimal point is at any place other than the right end. If the value is an integer (decimal point at the right end) the decimal point should be omitted. For negative values, the leading minus sign (-) is used. Absence of a sign indicates a positive value. The plus sign (+) shall not be transmitted. Leading zeros shall be suppressed unless necessary to satisfy a minimum length requirement. Trailing zeros following the decimal point should be suppressed unless necessary to indicate precision. A base 10 exponential may be appended to the end of a decimal number. The absolute value of a decimal number with a base 10 exponential is equal to the value of the <unsigned_decimal_number> multiplied by 10 raised to the power of <exponent>. The use of triad separators (for example, the commas in "1,000,000") is expressly prohibited. The length of a decimal type data element does not include the optional minus signs, decimal point, or trailing exponent indicator "E".

<decimal_number>	**::=**	**[-] <unsigned_decimal_number> [<base_10_exponential>]**
<base_10_exponential>	**::=**	**E <exponent>**
<exponent>	**::=**	**[-] <unsigned_integer>**
<unsigned_decimal_number>	**::=**	**<unsigned_integer> | .<unsigned_integer> | <unsigned_integer> . {<digit>}**

EXAMPLE A:

Value is -123.45
Decimal type symbol is R
The data stream value is -123.45
The length is 5

EXAMPLE B:

Value is 12345
Decimal type symbol is R
The data stream value is 12345
The length is 5

EXAMPLE C:

Value is .1250
Decimal type symbol is R
The data stream value is 1250E-4
The length is 5

3.5.1.3 Identifier

An identifier data element always contains a unique value from a single, predefined list of values. That list of values is either enumerated within the data element in X12.3 Data Element Dictionary or the source of the list of values is specified in Appendix A in the X12.3 Data Element Dictionary. Trailing spaces should be suppressed. The representation for this data element type is ID.

<id>	**::=**	**<letter_or_digit> {<letter_or_digit>} {<space>}**
<letter_or_digit>	**::=**	**<uppercase_letter> | <digit>**

3.5.1.4 Identifier 2

An identifier 2 data element always contains a unique value from a single, predefined list of values. That list of values is either enumerated within the data element in X12.3 Data Element Dictionary or the source of the list of values is specified in Appendix A in the X12.3 Data Element Dictionary. Leading and trailing spaces are not permitted. The representation for this data element type is ID2.

<id2>	**::=**	**<id2_character> | <id2x>**
<id2x>	**::=**	**<id2_character> {<id2_character> | <space>} <id2_character>**
<id2_character>	**::=**	**<uppercase_letter> | <digit> | <special_char> | <lowercase_letter> | <other_special_char> | <national_char> | <select_language_character> | <ISO_LANGUAGE_CHARACTER>**

3.5.1.5 String

A string data element is a sequence of any characters from the basic or extended character sets and contains at least one non-space character. The significant characters shall be left justified.

A leading space is a space that is located before the first character (letter, number, punctuation mark) in a string data element. Leading spaces, when they occur, are presumed to be significant characters.

A trailing space is a space that is located after the final character (letter, number, punctuation mark) in a string data element. Trailing spaces shall be suppressed unless either:

- necessary to satisfy a minimum length or
- a single space is necessary when used in conjunction with another data element for example to maintain word separation

The representation for this data element type is AN.

<string>	**::=**	**{<non_space_char> | <space>} <non_space_char> {<non_space_char> | <space>}**
<non_space_char>	**::=**	**<uppercase_letter> | <digit> | <special_char> | <lowercase_letter> | <other_special_char> | <national_char> | <select_language_character> | <ISO_LANGUAGE_CHARACTER>**

3.5.1.6 Date

A date data element is used to express the standard date in either YYMMDD or CCYYMMDD format in which CC is the first two digits of the calendar year, YY is the last two digits of the calendar year, MM is the month (01 to 12), and DD is the day in the month (01 to 31). The representation for this data element type is DT.

<date>	**::=**	**<year> <month> <day> | <hundred_year> <year> <month> <day>**
<hundred_year>	**::=**	**<digit> <digit>**
<year>	**::=**	**<digit> <digit>**
<month>	**::=**	**"01" | "02" | ... | "12"**
<day>	**::=**	**"01" | "02" | ... | "31"**

3.5.1.7 Time

A time data element is used to express the time in HHMMSSd..d format in which HH is the hour for a 24-hour clock (00 to 23), MM is the minute (00 to 59), SS is the second (00 to 59) and d..d is decimal seconds. Seconds and decimal seconds are optional. Trailing zeros in decimal seconds should be suppressed unless necessary to satisfy a minimum length requirement or unless necessary to indicate precision. The representation for this data element type is TM.

<time>	**::=**	**<hour> <minute> [<seconds>]**

<hour>	::=	"00" | "01" | "02" | ... | "23"
<minute>	::=	"00" | "01" | "02" | ... | "59"
<seconds>	::=	<integer_seconds> [<decimal_seconds>]
<integer_seconds>	::=	"00" | ... | "59"
<decimal_seconds>	::=	<digit> {<digit>}

3.5.1.8 Binary

The binary data element is any sequence of octets ranging in value from binary 00000000 to binary 11111111. This data element type has no defined maximum length. Actual length is specified by the immediately preceding data element. The binary data element type may only exist in the Binary and Security header segments (see Section 3.11). The representation for this data element type is B.

<binary>	::=	<octet> {<octet>}
<octet>	::=	"00000000_2" | ... | "11111111_2"

3.5.2 Data Element Dictionary

The data elements in the dictionary are identified through a reference identifier. Data Elements used solely in Interchange Control Segments (fully described in X12.5 & X12.56), shall have a reference identifier beginning with the leading character 'I'. For each data element, the dictionary specifies the name, description, type, minimum length, and maximum length. For ID data elements, the dictionary lists all code values and their descriptions or a reference where the valid code list can be obtained.

3.5.2.1 Data Element Reference Identifier

Data elements that appear in X12.3 Data Element Dictionary are assigned a unique reference identifier from one to four characters.

<data_element_reference_identifier>	::=	["I"] <unsigned_integer>(01/04)

3.5.2.2 Data Element Type

The following types of data elements, as defined in 3.5.1, appear in the dictionary.

Type	Symbol
Numeric	Nn (n indicates decimal positions)
Decimal Number	R

Type	Symbol
Identifier	ID
Identifier 2	ID2
String	AN
Date	DT
Time	TM
Binary	B

3.5.2.3 Data Element Length

Each data element is assigned a minimum and maximum length. The length of the data element value is the number of character positions used except as noted for numeric, decimal, and binary elements.

3.5.2.4 Data Element Name

Data element names shall be unique throughout the X12.3 Data Element Dictionary. A simple data element name shall not duplicate a composite data structure name in the X12.3 Data Element Dictionary or a segment name appearing in the X12.22 Segment Directory.

3.6 Composite Data Structure

The composite data structure is an intermediate unit of information in a segment. By definition, a composite data structure consists of two or more component data elements preceded by a data element separator. In use, in the actual data stream, a composite data structure may appear as only one component data element. Each component data element within the composite data structure, except the last, is followed by a component element separator. The final component data element is followed by the next data element separator or the segment terminator. Trailing component data element separators <us> shall be suppressed. Composite data structures are defined in a composite data structure directory. The directory defines each composite data structure by its name, purpose, reference identifier, and included component data elements in a specified sequence.

A composite data structure is constructed in the following manner:

definition:

<composite_data_structure>	::=	<component_data_element> <us> <component_data_element> {<us> <component_data_element>}

use:

<composite_data_structure>	**::=**	**{[<component_data_element>] <us>} <component_data_element>**

3.6.1 Composite Data Structure Reference Identifier

Each composite data structure has a unique four-character reference identifier. The reference identifier serves as a means of locating the composite data structure in the composite data structure directory. The first character is an "S" when the composite data structure is used in a control segment and is a "C" when the composite data structure is used in a data segment. The remaining character positions will contain digits.

<composite_data_structure_identifier>	**::=**	**<composite_identifier_prefix> <digit> <digit> <digit>**
<composite_identifier_prefix>	**::=**	**"S" | "C"**

3.6.2 Composite Data Structure Name

Composite data structure names shall be unique throughout the X12.3 Data Element Dictionary. A composite data structure name shall not duplicate a simple data element name appearing in the X12.3 Data Element Dictionary or a segment name appearing in the X12.22 Segment Directory.

3.6.3 Component Data Elements in a Composite Data Structure

In defining a composite data structure, each component data element within the composite data structure is further characterized by a condition designator and a data element reference number.

3.6.3.1 Component Data Element Condition Designator

Component data elements shall have a designator that defines their requirement in a composite data structure. These condition designators are represented by a single-character code on the composite data structure diagrams. Refer to Section 3.7.2.2 for the definition of condition designators.

3.6.3.2 Absence of Data

Any component data element that is indicated as mandatory must be included in the composite data structure if the composite data structure is used. Optional component data elements may be omitted if they are not needed. The absence of these component data elements is noted by the occurrence of the component element separators which would have followed them, or, in the case of the last component data element in the composite data structure, by the occurrence of the data element separator or segment terminator. If the optional component data elements being omitted occur at the end of a composite data structure, the structure must be terminated by the occurrence of the next data element separator or the segment terminator following the last used data element value or component data element.

3.7 Data Segment

The data segment is an intermediate unit of information in a transaction set. A data segment consists of a segment identifier; one or more composite data structures or simple data elements, each of which may be permitted to repeat, when so indicated in the segment specification. Adjacent non-repeating simple data elements and composite data structures shall be separated by a data element separator. Adjacent occurrences of the same repeating simple data element or composite data structure in a segment shall be separated by a repetition separator. The data segment shall end with a segment terminator. Trailing data element separators <gs> and trailing repetition separators <rs> shall be suppressed. In use, an instance of a data segment shall contain at least one composite data structure or simple data element, i.e., it shall not consist of only the segment identifier and a segment terminator. Data segments are defined in a data segment directory. The directory defines each segment including the segment's name, purpose, and identifier. The directory also defines composite data structures and data elements that a segment contains in their specified order. A data segment is constructed in the following manner:

definition:

<data_segment>	**::=**	**<seg_id> <gs> <data_segment_unit> {<gs> <data_segment_unit>} <tr>**
<data_segment_unit>	**::=**	**<repeating_simple_data_element> | <repeating_composite_data_structure>**
<repeating_simple_data_element>	**::=**	**<simple_data_element> {<rs> <simple_data_element>}**
<repeating_composite_data_structure>	**::=**	**<composite_data_structure> {<rs> <composite_data_structure>}**

use:

<data_segment>	**::=**	**<seg_id> {<gs> [<data_segment_unit>]} <gs> <data_segment_unit> <tr>**
<repeating_simple_data_element>	**::=**	**{[<simple_data_element>] <rs>} <simple_data_element>**

<repeating_composite_data_structure>	**::=**	**{[<composite_data_structure>] <rs>} <composite_data_structure>**

3.7.1 Data Segment Identifier

Each data segment has a unique two- or three-character identifier. This identifier serves as a label for the data segment.

<seg_id>	**::=**	**<letter_or_digit> <letter_or_digit> [<letter_or_digit>]**

3.7.2 Data Segment Name

Segment names shall be unique throughout the X12.22 Segment Directory. A segment name shall not duplicate a simple data element name or a composite data structure name appearing in the X12.3 Data Element Dictionary.

3.7.3 Data Elements in a Segment

In defining a segment, each simple data element or composite data structure within the data segment is further characterized by a reference designator and a data element reference number or composite data structure reference identifier. Simple data elements and composite data structures have additional attributes. They shall have a reference designator, a condition designator and a repetition designator. They may also have a semantic note designator.

3.7.3.1 Reference Designator

Each simple data element or composite data structure in a segment is provided a structured code that indicates the segment in which it is used and the sequential position within the segment. The code is composed of the segment identifier followed by a two-digit number that defines the position of the simple data element or composite data structure in that segment. For purposes of creating reference designators, the composite data structure is viewed as the hierarchical equal of the simple data element. Each component data element in a composite data structure is identified by a suffix appended to the reference designator for the composite data structure of which it is a member. This suffix is a two-digit number, prefixed with a hyphen, that defines the position of the component data element in the composite data structure. For example, the third simple element of the BEG segment would be identified as BEG03 because the position count does not include the segment identifier, which is a label. If the fourth position in the BEG segment were occupied by a composite data structure that contained three component data elements, the reference designator for the second component data element would be BEG04-02.

definition:

<ref_desig>	**::=**	**<seg_id> <digit> <digit> ["-"<digit> <digit>]**

use:

In use the reference designator does not appear.

3.7.3.2 Condition Designator

Data segment unit or component data element conditions are of three types: mandatory, optional, and relational, and define the circumstances under which a simple data element, composite data structure, or component data element may be required to be present or absent in a particular segment or composite data structure.

3.7.3.2.1 Mandatory Condition

The designation of mandatory is absolute in the sense that there is no dependency on other data segment units or component data elements and may apply to either simple data elements, composite data structures, or component data elements. Mandatory conditions are specified by condition code "M".

Condition	Requirement
(M) Mandatory	The designated simple data element or composite data structure, whether allowed to repeat or not, must be present in the segment, or the designated component data element must be present in the composite data structure (presence means a data element, composite data structure, or component data element shall not be empty; see Section 3.3.3). If the designation applies to a composite data structure, then at least one value of a component data element in that composite data structure shall be included in the data segment. If the designation applies to a repeating simple data element or a repeating composite data structure then at least one data element value shall be present.

3.7.3.2.2 Optional Condition

The designation of optional means that there is no syntactic requirement for a simple data element or composite data structure to be present in the segment or for a component data element to be present in the composite data structure. Optional conditions are specified by condition code "O".

Condition	Requirement
(O) Optional	The presence of a value for a simple data element or the presence of a value for any of the component data elements of a composite data structure is at the option of the sender.

3.7.3.2.3 Relational Conditions

Relational conditions may exist among two or more data segment units within the same data segment, or among two or more component data elements within the same composite data structure, based on the presence or absence of one of those data segment units or component data elements (presence means a data element must not be empty). Relational conditions are specified by a condition code and the identity of the subject elements or structures. Relational conditions may not exist between a component data element and anything outside its parent composite data structure.

<relational_cond>	**::=**	**<relation_code> <subj_elem> <subj_elem> {<subj_elem>}**
<relation_code>	**::=**	**"P" | "R" | "E" | "C" | "L"**
<subj_elem>	**::=**	**<segment_unit_position_in_segment> | <component_element_position_in_composite>**
<segment_unit_position_in_segment>	**::=**	**<digit><digit>**
<component_element_position_in_composite>	**::=**	**<segment_unit_position_in_segment> "-" <digit><digit>**

A data element may be subject to more than one relational condition.

The definitions for each of the <relation_code> values are:

Code	Requirement
(P) Paired or Multiple	If any <subj_elem> specified in the <relational_cond> is present, then all of the <subj_elem> specified must be present.
(R) Required	At least one of the <subj_elem> specified in the <relational_cond> must be present.
(E) Exclusion	Not more than one of the <subj_elem> specified in the <relational_cond> may be present.
(C) Conditional	If the first <subj_elem> specified in the <relational_cond> is present, then all other <subj_elem> must be present. However, any or all of the <subj_elem> NOT specified as the FIRST <subj_elem> in the <relational_cond> may appear when the first <subj_elem> is not present. The order of the <subj_elem> in the <relational_cond> does not have to be the same as the order of the data elements in the data segment.
(L) List Conditional	If the first <subj_elem> specified in the <relational_cond> is present, then at least one of the remaining <subj_elem> must be present. However, any or all of the <subj_elem> NOT specified as the FIRST <subj_elem> in the

Code	Requirement
	<relational_cond> may appear when the first <subj_elem> is not present. The order of the <subj_elem> in the <relational_cond> does not have to be the same as the order of the data elements in the data segment.

3.7.3.3 Repetition Designator

The repetition designator may be one, indicating the simple data element or composite data structure may occur no more than once, or contain a specific value greater than one, indicating the maximum number of occurrences of the simple data element or composite data structure.

3.7.3.4 Semantic Notes

A semantic note provides important additional information regarding the intended use of a standard or portion thereof. These usage notes, while not part of the formal syntax, must be followed in order to be in compliance with the standard. Semantic notes, therefore, are considered to be part of the relevant standard and are appropriately designated to distinguish them from syntax notes (which are part of the standard) and comments (which are not part of the standard).

Semantic notes for transaction sets provide information with respect to the intended use of a segment within the context of a particular transaction set. Semantic notes for segments provide information regarding the intended meaning of a designated data element, particularly a generic type, in the context of its use within a specified data segment. Semantic notes may also define relational conditions among data elements in a segment based on the presence of a specific value (or one of a set of values) in one of the data elements.

3.7.4 Absence of Data

Absence of data is represented by the value <empty>. Any value other than <empty> is an indication that data are present. Optional simple data elements and composite data structures and their preceding data element separators that are not needed shall be omitted if they occur at the end of a segment; or, if they do not occur at the end of the segment, the simple data element values or composite data structure values may be omitted, and their absence is indicated by the occurrence of their preceding data element separators, in order to maintain the element's or structure's position as defined in the data segment.

3.8 Transaction Set

The transaction set is a semantically meaningful unit of information exchanged between trading partners. The transaction set shall consist of a transaction set header segment, optionally one or more transaction security header segments, optionally one or more transaction assurance header

segments, one or more data segments and loop control segments (if bounded loops exist) in a specified order, one transaction security value segment for each assurance header present, one transaction security trailer segment for each security header segment present, and a transaction set trailer segment.

<transaction_set>	**::=**	**<trans_set_header> <trans_block> <trans_set_trailer>**
<trans_block>	**::=**	**<secured_trans_block> | <unsecured_trans_block>**
<secured_trans_block>	**::=**	**<trans_security_header> <trans_block> <trans_security_trailer>**
<unsecured_trans_block>	**::=**	**<assured_trans_block> | <trans_body>**
<assured_trans_block>	**::=**	**<trans_assurance_header> <unsecured_trans_block> <security_value>**
<trans_body>	**::=**	**<data_segment_group> {<data_segment_group>}**

3.8.1 Transaction Set Header and Trailer

The transaction set header and trailer segments are constructed as follows:

<trans_set_header>	**::=**	**ST <gs> <trans_set_id> <gs> <trans_set_control_number> {<gs> <ic_id_string>} <tr>**
<trans_set_trailer>	**::=**	**SE <gs> <number_of_included_segments> <gs> <trans_set_control_number> <tr>**
<trans_set_id>	**::=**	**<id>**
<trans_set_control_number>	**::=**	**<string>**
<ic_id_string>	**::=**	**<string>**
<number_of_included_segments>	**::=**	**<unsigned_integer>**

The transaction set identifier, <trans_set_id>, uniquely identifies the transaction set. This identifier is the first data element of the transaction set header segment.

The value for the transaction set control number, <trans_set_control_number>, in the header and trailer control segments must be identical for any given transaction. The value for the number of included segments, <number_of_included_segments>, is the total number of segments in the transaction set including the ST and SE segments.

The implementation convention identification string, <ic_id_string>, identifies which implementation convention is in use for the transaction set. Its value may be a reference to a repository, or is available for trading partner definition. This identifier is the optional third data element of the transaction set header segment.

In order to provide sufficient discrimination for the acknowledgment process to operate reliably and to ensure that audit trails are unambiguous, the Transaction Set Control Number (ST02, SE02) shall be unique within a given functional group envelope (GS/GE).

3.8.2 Transaction Security Header and Trailer

The X12.58 Security Structures Standard defines the data formats for authentication, encryption, and assurances in order to provide integrity, confidentiality, and verification and non-repudiation of origin for two levels of exchange of Electronic Data Interchange (EDI)-formatted data defined by Accredited Standards Committee (ASC) X12. These security services can be applied at either the functional group level or the transaction set level or both. Please refer to the X12.58 standard for the construction and usage of the security related segments.

3.8.3 Data Segment Groups

The data segments in a transaction set may be repeated as individual data segments or as unbounded or bounded loops.

<data_segment_group>	**::=**	**<data_segment> | <data_segment_repeat> | <data_segment_loop> | <bounded_loop>**

3.8.3.1 Repeated Occurrences of Single Data Segments

When a single data segment is allowed to be repeated, it may have a specified maximum number of occurrences defined at each specified position within a given transaction set standard. Alternatively, a segment may be allowed to repeat an unlimited number of times. The notation for an unlimited number of occurrences is ">1". The ">1" construct is used only if a specific maximum number of occurrences cannot be determined or is unknown. By definition a data segment repeat consists of at least two occurrences. In use, in the actual data stream, it may appear fewer than two times.

definition:

<data_segment_repeat>	**::=**	**<data_segment> <data_segment> {<data_segment>}**

use:

<data_segment_repeat>	**::=**	**{<data_segment>}**

3.8.3.2 Loops of Data Segments

By definition, loops are groups of two or more semantically related segments. In use, in the actual data stream, a loop may appear as only the loop beginning segment. Data segment loops may be unbounded or bounded.

As part of the transaction set definition, each bounded or unbounded loop is given an identifier, <loop_id>. To prevent ambiguity, each <loop_id> value must be unique in the transaction set definition.

<loop_id>(01/06)	**::=**	**<uppercase_letter_or_digit> {<uppercase_letter_or_digit>}**

3.8.3.2.1 Unbounded Loops

In order to establish the start of the loop, the first data segment in the loop shall appear once and only once in each occurrence. The beginning segment of a loop shall not appear elsewhere in the loop. Loops may have a specified maximum number of occurrences. Alternatively, the loop may be specified as having an unlimited number of occurrences. The notation for an unlimited number of repeats is ">1". There is a specified sequence of segments in the loop. Loops themselves are optional or mandatory. The requirement designator of the beginning segment of a loop indicates whether at least one occurrence of the loop is required. Each appearance of the beginning segment defines an occurrence of the loop. The requirement designator of any segment within the loop after the beginning segment applies to that segment for each occurrence of the loop. If there is a mandatory requirement designator for any data segment within the loop after the beginning segment, that data segment is mandatory for each occurrence of the loop.

definition:

<data_segment_loop>	**::=**	**<loop_beg_seg> <loop_body> {<loop_body>}**
<loop_beg_seg>	**::=**	**<data_segment>**
<loop_body>	**::=**	**<data_segment> | <data_segment_group>**

use:

<data_segment_loop>	**::=**	**<loop_beg_seg> {<loop_body>}**

If unbounded loops are nested within loops, the inner loop shall not start at the same ordinal position as any outer loop. The inner loop shall not start with the same segment ID as any outer loop, nor may the nested loop contain a segment that is also the beginning segment of any outer loop in the same nesting structure. The inner loop must end before or on the same segment as its immediate outer loop.

3.8.3.2.2 Bounded Loops

The characteristics of unbounded loops described in 3.8.3.2.1 also apply to bounded loops except that bounded loops have no restriction with respect to the beginning segment ID. In addition, bounded loops require a loop start (LS) segment to appear before the first occurrence and a loop

end (LE) segment to appear after the last occurrence of the loop. If the loop does not occur within an actual transmission, the LS and LE segments shall be suppressed. The requirement designator on the LS and LE segments must match the requirement designator of the beginning segment of the loop. A bounded loop may contain only one loop structure (a single definition of the included segments) at the level bracketed by the LS and LE segments. Subordinate loops are permissible.

<bounded_loop>	**::=**	**<loop_header> <data_segment_loop> {<data_segment_loop>} <loop_trailer>**
<loop_header>	**::=**	**LS <gs> <loop_id> <tr>**
<loop_trailer>	**::=**	**LE <gs> <loop_id> <tr>**

If bounded loops are nested within loops, the inner loop shall not start at the same ordinal position as any outer loop. The inner bounded loop must end before the immediate outer loop.

Each bounded loop within a transaction set shall have a uniquely defined <loop_id> value of one to six uppercase letters or numeric digits. The corresponding LS and LE segments shall contain the same unique <loop_id> value. The specific <loop_id> values shall be defined in the transaction set standard. In use, the actual LS and LE segments shall contain the defined <loop_id> values. In usage, the <loop_id> will in some transaction sets be necessary to convey segment position or loop hierarchy, or both, within the transaction set.

3.8.4 Data Segments in a Transaction Set

When data segments and control segments are combined to form a transaction set, three characteristics shall be applied to each segment in that usage: a requirement designator, a position in the transaction set definition, and a maximum occurrence.

3.8.4.1 Data Segment Requirement Designator

A data segment shall have one of the following requirement designators indicating its appearance in the data stream of a transmission. These requirement designators are represented by a single character code.

Designator	Requirement
(M) Mandatory	This data segment shall be included in the transaction set. (Note that a data segment may be mandatory in a loop of data segments, but the loop itself is optional if the beginning segment of the loop is designated as optional.)
(O) Optional	The presence of this data segment is at the option of the sending party.

3.8.4.2 Data Segment Position

The ordinal positions of the segments in a transaction set definition are explicitly specified for that transaction set. This positioning shall be maintained during transmission.

3.8.4.3 Data Segment Occurrence

A data segment may have a maximum occurrence of one, a finite number greater than one, or an unlimited number. (See also Section 3.8.3.1)

3.8.4.4 Data Segment Order

A transaction set's segment order shall be defined such that sequential processing of any legitimate instance of the transaction set will result in positive identification of each segment in terms of its ordinal position in the standard. Positive identification shall accordingly be made on the basis of the segment identifiers alone, with the exception of the LS and LE segments, where the identification is made using the segment identifier in conjunction with the <loop_id>. Positive identification shall not depend on a segment's requirement designator or maximum occurrences.

3.9 Functional Group

A functional group shall consist of a functional group header segment, optionally one or more functional security header segments, optionally one or more functional assurance header segments, one or similar transaction sets, one functional security value segment for each assurance header present, one functional security trailer segment for each security header segment present, and a functional group trailer segment.The functional identifier (<function_id>) defines the collection of transaction sets that may be included within the functional group.

<functional_group>	**::=**	**<function_header> <function_block> <function_trailer>**
<functional_block>	**::=**	**<secured_function_block> | <unsecured_function_block>**
<secured_function_block>	**::=**	**<function_security_header> <function_block> <function_security_trailer>**
<unsecured_function_block>	**::=**	**<assured_function_block> | <function_body>**
<assured_function_block>	**::=**	**<function_assurance_header> <unsecured_function_block> <security_value>**
<function_body>	**::=**	**<transaction_set> {<transaction_set>}**

3.9.1 Functional Group Header and Trailer

The functional group header and trailer segments are constructed as follows:

<function_header>	**::=**	**GS <gs> <function_id> <gs> <app_sender_id> <gs> <app_receiver_id> <gs> <fg_date> <gs> <fg_time> <gs> <function_control_number> <gs> <standard> <gs> <version> <tr>**
<function_id>	**::=**	**<id>**
<app_receiver_id>	**::=**	**<string>**
<app_sender_id>	**::=**	**<string>**
<fg_date>	**::=**	**<date>**
<fg_time>	**::=**	**<time>**
<function_control_number>	**::=**	**<numeric>**
<standard>	**::=**	**<id>**
<version>	**::=**	**<string>**
<function_trailer>	**::=**	**GE <gs> <no_included_trans_sets> <gs> <function_control_number> <tr>**
<no_included_trans_sets>	**::=**	**<numeric>**

The functional group control number, <function_control_number>, in the header and trailer control segments shall be the same for any given group. The number of included transaction sets, <no_included_trans_sets>, is the total number of transaction sets in the group.

In order to provide sufficient discrimination for the acknowledgment process to operate reliably and to ensure that audit trails are unambiguous, the combination of Functional ID Code (GS01), Application Sender's ID (GS02), Application Receiver's ID (GS03), and Functional Group Control Numbers (GS06, GE02) shall by themselves be unique within a reasonably extended time frame whose boundaries shall be defined by trading partner agreement. Because at some point it may be necessary to reuse a sequence of control numbers, the Functional Group Date and Time may serve as an additional discriminant only to differentiate functional group identity over the longest possible time frame.

3.9.2 Functional Security Header and Trailer

The X12.58 Security Structures Standard defines the data formats for authentication, encryption, and assurances in order to provide integrity, confidentiality, and verification and non-repudiation of origin for two levels of exchange of Electronic Data Interchange (EDI) formatted data defined by Accredited Standards Committee (ASC) X12. These security services can be applied at either the

functional group level or the transaction set level or both. Please refer to the X12.58 standard for the construction and usage of the security-related segments.

3.10 Control Segment

A control segment has the same structure as a data segment but is used for transferring control information rather than application information. Control segments referred to in this standard are fully described in X12.22 Segment Directory.

3.10.1 Loop Control Segments

Loop control segments are used only to delineate bounded loops. Delineation of the loop shall consist of the loop header (LS segment) and the loop trailer (LE segment). The loop header defines the start of a structure that must contain one or more iterations of a loop of data segments and provides the loop identifier for this loop. The loop trailer defines the end of the structure. The LS segment appears only before the first occurrence of the loop, and the LE segment appears only after the last occurrence of the loop.

3.10.2 Transaction Set Control Segments

The transaction set is delineated by the transaction set header (ST segment) and the transaction set trailer (SE segment). The transaction set header starts and identifies the transaction set. The transaction set trailer defines the end of the transaction set and provides a count of the data segments, which includes the ST and SE segments.

3.10.3 Functional Group Control Segments

The functional group is delineated by the functional group header (GS segment) and the functional group trailer (GE segment). The functional group header starts and identifies one or more related transaction sets and provides a control number and application identification information. The functional group trailer defines the end of the functional group of related transaction sets and provides a count of contained transaction sets.

3.10.4 Security Control Segments

The security control segments are used to provide data integrity, confidentiality, verification of origin and non-repudiation of origin by delineating information for authentication, encryption, and compression. The X12.58 Security Structures Standard defines the data formats and business

usage for these security services. Please refer to this standard for the construction and usage of the security-related segments.

3.10.5 Relations among Control Segments

The control segments of this standard shall have a nested relationship as is shown and annotated in this subsection. The letters preceding the control segment name are the segment identifier for that control segment. The indentation of segment identifiers shown below indicates the subordination among control segments. Security segments are optional.

GS Functional Group Header starts a group of related transaction sets.

Functional Group Security and Assurance header segments, if used, shall be inserted here. Please refer to the X12.58 Security Structures Standard for the construction and usage of the security-related segments.

ST Transaction Set Header, starts a transaction set.

Transaction Set Security and Assurance header segments, if used, shall be inserted here. Please refer to the X12.58 Security Structures Standard for the construction and usage of the security-related segments.

LS Loop Header, starts a bounded loop of data segments but is not part of the loop.

LS Loop Header, starts an inner, nested, bounded loop.

LE Loop Trailer, ends an inner, nested, bounded loop.

LE Loop Trailer, ends a bounded loop of data segments but is not part of the loop.

Transaction Set Security and Assurance trailer segments, if used, shall be inserted here. Please refer to the X12.58 Security Structures Standard for the construction and usage of the security-related segments.

SE Transaction Set Trailer, ends a transaction set.

Functional Group Security and Assurance trailer segments, if used, shall be inserted here. Please refer to the X12.58 Security Structures Standard for the construction and usage of the security-related segments.

GE Functional Group Trailer, ends a group of related transaction sets.

More than one ST/SE pair, each representing a transaction set, may be used within one functional group. Also more than one LS/LE pair, each representing a bounded loop, may be used within one transaction set.

3.11 Binary Segment

A binary segment, BIN or BDS, has the same structure as a data segment but is used for transferring binary data with an accompanying length parameter. The BDS segment also contains a filter parameter. The filter parameter specifies the encoding algorithm, if any. Bit patterns normally reserved for other functions may appear in the binary data element. These bit patterns could be misinterpreted. The length of the binary data element is provided in the preceding data element in order to locate the end of the binary data and prevent such misinterpretation. The binary segment may not occur outside the boundaries of a transaction set.

<binary_seg>	**::=**	**BIN <gs> <number_of_octets> <gs> <binary> <tr> | BDS <gs> <filter_id> <gs> <number_of_octets> <gs> <binary> <tr>**
<number_of_octets>	**::=**	**<unsigned_integer>**
<filter_id>	**::=**	**<id>**

The data element that references the number of octets provides a count of all octets contained in the binary data element. This count does not include the preceding data element separator or trailing data segment terminator. The count is provided to enable finding the data segment terminator.

X12.56 Interconnect Mailbag Control Structures

1. Purpose and Scope

This Standard contains the format and establishes the data contents of the Interconnect Mailbag Control Structures for use within the context of an Electronic Data Interchange (EDI) environment. This standard defines the control segments used to start and end a mailbag containing EDI data to be exchanged between two interconnecting entities. The mailbag includes zero or more interconnect acknowledgment segments and zero or more EDI data interchanges. The basic interconnect mailbag consists of an interconnect mailbag header segment (IH), the EDI data to be transmitted from one interconnect entity to another, and the interconnect mailbag trailer segment (IT). In addition, an interconnect mailbag acknowledgment segment (IA) is provided to report complete receipt and safe storage of an interconnect mailbag.

The purpose of this standard is to provide control structures and an audit mechanism to facilitate the exchange and receipt acknowledgment of EDI data between interconnecting entities. The original sender and the ultimate receiver of the data contained in the mailbag have no responsibility for creating, managing, or removing the interconnect mailbag segments. This standard is solely for use between sites acting as interconnect entities.

Delivery of data from the original sender to the ultimate receiver may require several interconnect links. It is recognized that other point-to-point data tracking mechanisms exist. The interconnect mailbag control structures are designed to stand alone in addressing a given interconnect link. The structures are in no way dependent on the types of data tracking mechanisms that may be used in links prior to or following a link that employs the interconnect mailbag control structures.

2. Referenced and Related Standards

This standard is used with the ASC X12 series of standards on electronic data interchange.

The following material is from The Internet Engineering Task Force (IETF®). The mission of the IETF is to make the Internet work better by producing high quality, relevant technical documents that influence the way people design, use, and manage the Internet.

The following verbatim text is from the cited document as noted immediately below.

[RFC2119] Bradner, S., "Key words for use in RFCs to Indicate Requirement Levels", BCP 14, RFC 2119, DOI 10.17487/RFC2119, March 1997, <http://www.rfc-editor.org/info/rfc2119>.

Key words for use in RFCs to Indicate Requirement Levels

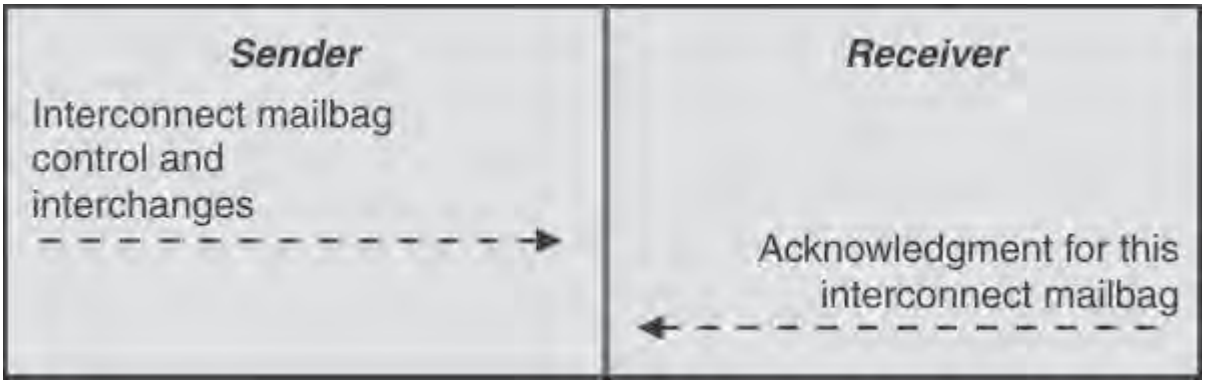
In many standards track documents several words are used to signify the requirements in the specification. These words are often capitalized. This document defines these words as they should be interpreted in IETF documents. Authors who follow these guidelines should incorporate this phrase near the beginning of their document:

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in RFC 2119.

Note that the force of these words is modified by the requirement level of the document in which they are used.

1. **MUST This word, or the terms "REQUIRED" or "SHALL", mean that the definition is an absolute requirement of the specification.**
2. **MUST NOT This phrase, or the phrase "SHALL NOT", mean that the definition is an absolute prohibition of the specification.**
3. **SHOULD This word, or the adjective "RECOMMENDED", mean that there may exist valid reasons in particular circumstances to ignore a particular item, but the full implications must be understood and carefully weighed before choosing a different course.**
4. **SHOULD NOT This phrase, or the phrase "NOT RECOMMENDED", mean that there may exist valid reasons in particular circumstances when the particular behavior is acceptable or even useful, but the full implications should be understood and the case carefully weighed before implementing any behavior described with this label.**
5. **MAY This word, or the adjective "OPTIONAL", mean that an item is truly optional. One vendor may choose to include the item because a particular marketplace requires it or because the vendor feels that it enhances the product while another vendor may omit the same item. An implementation which does not include a particular option MUST be prepared to interoperate with another implementation which does include the option, though perhaps with reduced functionality. In the same vein an implementation which does include a particular option MUST be prepared to interoperate with another implementation which does not include the option (except, of course, for the feature the option provides.)**

3. Description of Use



The interconnect mailbag header and trailer segments envelope zero or more interconnect mailbag-related control segments or interchanges and perform the following functions:

- Identify the interconnect mailbag sender and receiver
- Provide control information for the interconnect mailbag
- Allow for logon and password information

The interconnect mailbag header segment is transmitted first, followed by any optional interconnect mailbag acknowledgments, followed by any interchanges, with the interconnect mailbag trailer segment following as the last segment in the mailbag.

The interconnect mailbag acknowledgment segment is used to acknowledge one interconnect mailbag header and trailer envelope. The interconnect mailbag acknowledgment segment may be used to report the success or failure of the syntactical analysis of the interconnect mailbag segments. There is no acknowledgment for a syntactically correct interconnect mailbag containing only interconnect mailbag acknowledgments, thereby preventing an endless loop of acknowledgments. The flow of the original interconnect mailbag and the corresponding interconnect mailbag acknowledgment are diagrammed in Figure 1 with increasing time down the page.

Figure 3.1 - Flow of Original Interconnect Mailbag and Corresponding Acknowledgment

The interconnect mailbag control number value in the interconnect mailbag acknowledgment segment (IA) is the same as for the interconnect mailbag header segment (IH) for which the interconnect mailbag acknowledgment was prepared. This control number serves as a link between the interconnect mailbag header and trailer and the acknowledgment of that header and trailer.

The interconnect mailbag acknowledgment does not report on the processing or delivery status of the interchange(s) in the interconnect mailbag. The interconnect mailbag acknowledgment segment serves as receipt status notification (positive or negative) from an interconnect mailbag receiver to an interconnect mailbag sender.

The interconnect mailbag acknowledgment control segments (IA) are placed after the interconnect mailbag header segment (IH) and before the first interchange or before the trailer if there are no interchanges. More than one interconnect mailbag acknowledgment segment (IA) may be placed

after the interconnect mailbag header providing the interconnect mailbag sender and receiver ID values in the interconnect mailbag header segment (IH) are appropriate for the proper delivery of the acknowledgment.

Interconnect mailbags and interconnect mailbag acknowledgments are used only between interconnecting entities.

4. Terms and Definitions

X12.6 Application Control Structure contains the formal definitions of all terms related to electronic data interchange. Additional terms used in this standard are defined below.

INTERCONNECT ENTITY
Any organization that communicates EDI data with another organization where neither communicating party is responsible for processing and acting upon the semantic data (business transactions which may be contained in the mailbag).

SERVICE PROVIDER
Any process or set of processes that accepts an interchange from a sender and conveys it to a mailbox that represents the addressed receiver. Direct connections between senders and receivers involve no service providers.

RECEIPT AND SAFE STORAGE
An interconnect mailbag is received and safely stored when: (a) the control numbers in the interconnect mailbag header and trailer match; (b) the control totals listed in the interconnect mailbag trailer are consistent with the number of interconnect mailbag acknowledgments and interchanges in the interconnect mailbag; and (c) the entire interconnect mailbag has been successfully stored such that its contents can be obtained in their entirety at some later time for processing or delivery or both.

DELIVERY
An interchange is delivered when the interchange is placed in the mailbox of the receiver addressed in the interchange header segment.

MAILBOX
A protected receiving location with a unique address such that, once an interchange is placed in the mailbox of the receiver, it may only be retrieved by the receiver.

5. Interconnect Mailbag Concepts

The primary elements of this standard are three control segments intended to be used by interconnect entities for EDI management functions.

5.1 Interconnect Entities

An interconnect entity may be charged to perform some syntactic processing of the data, such as translation or conversion, on behalf of the original sender or ultimate receiver of the data. However, a key element of an entity being considered an interconnect entity is that the entity is not a participating party in any business transaction represented in the EDI data being transferred, and the entity is not transferring the EDI data to or from the original sender or the ultimate receiver. The transaction set originator and ultimate receiver will never see nor use the interconnect mailbag control segments.

An original sender or ultimate receiver whose data center acts as a sending or receiving representative (as opposed to the end processing site) for the end user division or department may elect to have their data center use the interconnect mailbag structure when exchanging EDI data with an entity that is likewise not the original sender or ultimate receiver. For such cases, the user's data center would only use the interconnect mailbag structure when exchanging data with a service provider or the data center of another user whose data center was acting as a sending or receiving representative for an end user. An internal corporate routing or network mechanism is an example of this type of end user representative. In any event, the end user would not see the interconnect mailbag.

An entity may be considered an interconnect entity in some communication exchanges and not an interconnect entity in others, depending on the nature of the party with which the data is being exchanged. For example, a service provider receiving an EDI data transmission from the original sender of the data is not considered to be an interconnect entity and would not receive interconnect mailbag segments from that sender. If, however, that same service provider transmits that EDI data to a second service provider for delivery to the ultimate receiver, both service providers would be considered to be acting as interconnect entities for that transfer.

5.2 Interconnect Mailbag Defined

The interconnect mailbag header and the interconnect mailbag trailer form the basic interconnect mailbag. The interconnect mailbag contains data to be transmitted from one interconnect entity to another interconnect entity. EDI data interchanges contained in a mailbag may be from one or more original senders and to one or more ultimate receivers. The interconnect mailbag acknowledgment provides an interconnect entity with an audit mechanism to acknowledge the complete receipt and safe storage of an interconnect mailbag.

5.2.1 The Interconnect Mailbag Header Segment (IH)

The IH segment indicates the beginning of an interconnect mailbag, establishes the version of the interconnect mailbag control structures, identifies the interconnect mailbag sender and receiver, provides control information for the interconnect mailbag, and allows for the use of a logon ID and password for the interconnect mailbag.

5.2.2 The Interconnect Mailbag Trailer Segment (IT)

The IT segment indicates the end of an interconnect mailbag, provides control information, and reports control totals for the interconnect mailbag.

5.2.3 The Interconnect Mailbag Acknowledgment Segment (IA)

The IA segment is sent by the interconnect mailbag receiver to the interconnect mailbag sender. The interconnect mailbag acknowledgment is used to perform the following functions:

- Acknowledge the complete receipt and safe storage of an interconnect mailbag
- Report the receipt of an interconnect mailbag with incomplete contents received during a communications session that ended normally at a data link protocol level
- Report the receipt of a syntactically invalid interconnect mailbag received during a communications session that ended normally at a data link protocol level

When a complete and syntactically valid interconnect mailbag is received, the following interconnect mailbag content conditions dictate whether an interconnect mailbag acknowledgment is to be returned:

- If the interconnect mailbag contains one or more interchanges, an interconnect mailbag acknowledgment must be returned.
- If the interconnect mailbag contains no interconnect mailbag acknowledgments and no interchanges, an interconnect mailbag acknowledgment may be returned.

NOTE: There is no provision to acknowledge or respond to a complete and syntactically valid interconnect mailbag containing only interconnect mailbag acknowledgments (and no interchanges). This prevents the possibility of an endless cycle of acknowledgments and responses.

When an incomplete or invalid interconnect mailbag is received during a communications session that ended normally at a data link protocol level, a negative interconnect mailbag acknowledgment must be returned regardless of the contents of the incomplete or invalid mailbag.

If a communications session terminates abnormally at a data link protocol level, an interconnect mailbag acknowledgment (IA) is not returned in response to the data received during that failed session. Furthermore, the partial file received during that failed communications session should not be processed.

The interconnect mailbag acknowledgment (IA) must be transmitted in an interconnect mailbag whose sender and receiver IDs are equal to the receiver and sender IDs, respectively, from the mailbag being acknowledged. For example, a mailbag from sender A to receiver B is acknowledged with an interconnect mailbag acknowledgment (IA) in an interconnect mailbag from sender B to receiver A.

5.2.3.1 Timing The Interconnect Mailbag Acknowledgment

When the use of an interconnect mailbag acknowledgment is appropriate, the interconnect entity issuing the interconnect mailbag acknowledgment shall transmit the acknowledgment within two hours from the time the interconnect mailbag being acknowledged was received.

If an interconnect entity transmits an interconnect mailbag containing one or more interchanges to a receiving interconnect entity, and the communications session terminates normally at a data link protocol level, the sending interconnect entity shall expect to receive an interconnect mailbag acknowledgment from the receiving interconnect entity within two hours. Failure to receive an interconnect mailbag acknowledgment for the transmitted mailbag within the agreed upon response

period shall precipitate human intervention on the part of the initial sending interconnect entity to determine the status of the unacknowledged interconnect mailbag.

5.2.3.2 Interconnect Mailbag Acknowledgment Action Codes

The IA segment provides the acknowledging interconnect entity with a mechanism to indicate the action to be taken under various situations. The following defines the intent of each of these action codes:

Action Code A (Accept)
An action code equal to "A" indicates that the interconnect mailbag is received in full, safely stored, and accepted. An accept response means only that the interconnect mailbag header and trailer control numbers match, the interconnect mailbag is syntactically valid, and the interconnect mailbag trailer control totals have been verified as accurate for the received interconnect mailbag. The accept response makes no claims that the receiving interconnect entity can process the mailbag contents, recognize the addressees indicated in any interchanges in the mailbag, or is able to deliver the interchange. The accept response simply indicates the complete receipt and safe storage of the mailbag and its contents (if any).

Action Code R (Reject/Retransmit)
An action code equal to "R" indicates that one or more problems have been detected with the interconnect mailbag. The data contents (if any) of the rejected interconnect mailbag will not be processed. The interconnect entity sender of the rejected interconnect mailbag should retransmit the mailbag.

NOTE: The reject/retransmit response is used only to indicate receipt of an incomplete interconnect mailbag received via a communication session that ended normally. This type of response should not be used to indicate receipt of a partial interconnect mailbag received during a communication session that ended abnormally because the interconnect mailbag sender will be able to detect such failures during the communications session. This response is not intended to indicate the inability or unwillingness of the receiving interconnect entity to process the mailbag contents of a complete mailbag, recognize the addressees, or deliver any interchanges in the mailbag.

Action Code C (Reject/Contact)
An action code equal to "C" indicates that one or more problems have been detected with the interconnect mailbag. The nature of the problem is such that retransmission of the mailbag is unlikely to correct the problem. The data contents (if any) of the rejected interconnect mailbag will not be processed as is. The interconnect administrator from the interconnect entity issuing the reject notice will contact the interconnect administrator from the interconnect entity receiving the reject notice to resolve the problems found in the interconnect mailbag.

NOTE: This response should only be used to indicate the receipt of an invalid interconnect mailbag received via a communication session that ended normally. This response should not be used to indicate receipt of a partial interconnect mailbag received during a communication session that ended abnormally, because the interconnect mailbag sender will be able to detect such failures during the communications session. The reject response is not intended to indicate the inability or unwillingness of the receiving interconnect entity to process the mailbag contents of a complete mailbag, recognize the addressees, or deliver any interchanges in the mailbag.

The interconnect entity that receives a reject/contact response should not retransmit the mailbag in question without first resolving the appropriate issues with the interconnect entity issuing the reject. This code should be used for cases involving multiple errors for a given interconnect mailbag.

5.2.4 The Interconnect Mailbag Client Information Header Segment (IMC)

An IMC segment may precede each client information exchange block within an interconnect mailbag. Optionally, the IMC segment may not be used at all in an interconnect mailbag. When the IMC segment is used in an interconnect mailbag, the count of IMC segments in the mailbag instance must be the same as the count of interchanges specified in the interconnect mailbag trailer, else the interconnect mailbag entity must reject the mailbag.

When one or more IMC segments are present in an interconnect mailbag instance, an interconnect mailbag entity shall determine the extent of the client information exchange block by first skipping as many bytes following the IMC segment terminator as are specified in the exchange block length element found in the IMC segment. The entity will then search for a byte pattern that matches a valid IMC segment or mailbag trailer (IT) segment. The extent of the client data shall extend from the character immediately following the segment terminator of the IMC segment to the character immediately preceding the first character of the next interconnect mailbag control segment. If exchange block length is specified in the IMC segment, it is only used to direct the search for the next interconnect mailbag segment. The specified exchange block length might not specify the extent of the contained client information exchange block.

Client data information exchange blocks need not conform to the X12 or other EDI standards, and may even appear in a ciphered or compressed form, though it should then appear as filtered data represented in the graphical character set of the X12.6 standard. Failure to conform to the graphical character set of the X12.6 standard may introduce transliteration inconsistencies in the path between the original sender and the final recipient.

An interconnect mailbag entity may include IMC segment content in its rules for routing client information exchange blocks. An interconnect mailbag entity may reject individual client information exchange blocks contained in an interconnect mailbag. Rules used to accept or reject individual client information exchange blocks are outside the scope of this standard. Rules for reporting acceptance or rejection of client information exchange blocks are outside the scope of this standard.

The content of the 'block sequence' element in the IMC segment shall be numeric, starting with the value '1' for the first IMC segment, and incrementing by one for each succeeding IMC block. The content of the exchange block length element must not exceed the length of the next client information exchange block. The content of all other elements within the IMC segment is outside the scope of this standard, but may be addressed in a formal X12 guideline or technical report.

6. Interconnect Mailbag Syntax Notation

In this section the syntax for the interconnect mailbag segments is given in Backus Naur Form (BNF), described below. Other syntax elements may be found in X12.6 Application Control Structure.

6.1 Backus Naur Form (BNF) Elements Explained

Lowercase words denote syntactic constructs, which are enclosed in angle brackets. The underscore is included as a valid character. For example:

```
<transaction_set>
```

The defined construct is on the left side of a statement and is separated from the defining right side by the symbol (::=). For example:

```
<one_construct>::=<another_construct>
```

Uppercase words are predefined labels. For example:

```
TRM
```

Lowercase words not enclosed in angle brackets denote a general class of items that are not further defined in this section of the standard. For example:

```
data
```

Brackets denote optional items. For example:

```
[<one_construct>]
```

A repeat count range for a repeatable construct that is appended to that particular construct is added to the BNF syntax of X12.6 Application Control Structure. The range of the repeat count is /minimum:maximum/. The repeatable construct is in braces. For example, a numeric field with one to six digits could be specified as:

```
<a_number>::={<digit>}/1:6/
```

6.2 Interconnect Mailbag Structures

The BNF for the syntax of this standard is given below. Other syntax elements not defined here may be found in X12.6 Application Control Structure.

<interconnect_mailbag_structures>	::=	<interconnect_mailbag_header> {<interconnect_mailbag_acknowledgment>} [{<interchange_header_structure>}] <interconnect_mailbag_trailer>
<interchange_header_structure>	::=	[interconnect_interchange_header] <interchange_structure>

NOTE: <interchange_structure> is defined in X12.5 Interchange Control Structures.

6.3 Interconnect Mailbag Segments

The basic interconnect mailbag segments consist of the IH header segment and the IT trailer segment.

6.3.1 Interconnect Mailbag Header Segment

<interconnect_mailbag_header>	::=	IH <gs> <interconnect_mailbag_version_#> <gs> <interconnect_logon_id> <gs> <interconnect_password> <gs> <interconnect_sender> <gs> <interconnect_receiver> <gs> <interconnect_date_time> <gs> <interconnect_time_code> <gs> <interconnect_control> <gs> <interconnect_test_indicator> <tr>
<interconnect_mailbag_version_#>	::=	<id>
<interconnect_logon_id>	::=	<string>
<interconnect_password>	::=	<string>
<interconnect_sender>	::=	<interconnect_id_qualifier> <gs> <interconnect_sender_id>
<interconnect_receiver>	::=	<interconnect_id_qualifier> <gs> <interconnect_receiver_id>
<interconnect_id_qualifier>	::=	<id>
<interconnect_sender_id>	::=	<string>
<interconnect_receiver_id>	::=	<string>
<interconnect_date_time>	::=	<date> <gs> <time>
<interconnect_time_code>	::=	<id>
<interconnect_control>	::=	<numeric>
<interconnect_test_indicator>	::=	<id>

6.3.2 Interconnect Mailbag Trailer Segment

<interconnect_mailbag_trailer>	::=	IT <gs> <interconnect_control> <gs> <interconnect_ack_count> <gs> <interconnect_intchg_cnt> <tr>
<interconnect_control>	::=	<numeric>
<interconnect_ack_count>	::=	<numeric>

<interconnect_intchg_cnt>	::=	<numeric>

6.3.3 Interconnect Mailbag Acknowledgment Segment

The interconnect mailbag acknowledgment segment consists of the IA segment.

<interconnect_mailbag_ack>	::=	IA <gs> <interconnect_control> <gs> <interconnect_ack_action_code> {<gs> <interconnect_error_code>}/0:5/ <tr>
<interconnect_control>	::=	<numeric>
<interconnect_ack_action_code>	::=	<id>
<interconnect_error_code>	::=	<id>

6.3.4 Interconnect Mailbag Client Exchange Header Segment

The interconnect mailbag client exchange header segment consists of the IMC segment.

<interconnect_interchange_header>	::=	IMC <gs> <exchange_block_sequence> <gs> [<exchange_block_type_identifier>] <gs> [<exchange_block_id_qualifier>] <gs> <exchange_block_sender_id> <gs> [<exchange_block_id_qualifier>] <gs> <Exchange_block_receiver_id> <gs> [<exchange_block_date>] <gs> [<exchange_block_time>] <gs> [<exchange_block_control_number>] <gs> [<exchange_block_length>] <gs> [<filter>] <tr>
<exchange_block_sequence>	::=	<numeric>
<exchange_block_type_identifier>	::=	<id>
<exchange_block_id_qualifier>	::=	<id>

<exchange_block_time>	::=	<time>
<exchange_block_control_number>	::=	<numeric>
<exchange_block_length>	::=	<numeric>

7. Specifications for Interconnect Mailbag Control Structures

7.1 Sequence of Interconnect Mailbag Segments

The interconnect mailbag segments shall occur in the sequence shown in Figure 7.1 - Segment Sequence Diagram.

Figure 7.1 - Segment Sequence Diagram

NOTE	POS NO.	SEG. ID	NAME	REQ. DES.	MAX. USE	LOOP REPEAT
	010	IH	Interconnect Mailbag Header	M	1	
	020	IA	Interconnect Mailbag Acknowledgment	O	>1	
N	030	---	Interchanges (see note)	O	>1	
	040	IT	Interconnect Mailbag Trailer	M	1	

NOTES

030 An interchange is not an interconnect mailbag component of this standard, but appears in this figure to establish positioning for the interchange(s). Zero, one, or more than one interchange may appear in one interconnect mailbag.

7.2 Date and Time in the IH Segment

The dates and times used in the interconnect mailbag header segment represent the point at which the interconnect mailbag was created for initial transmission. An interconnect mailbag time code is used to identify the basis of the time that is given in the interconnect mailbag time element.

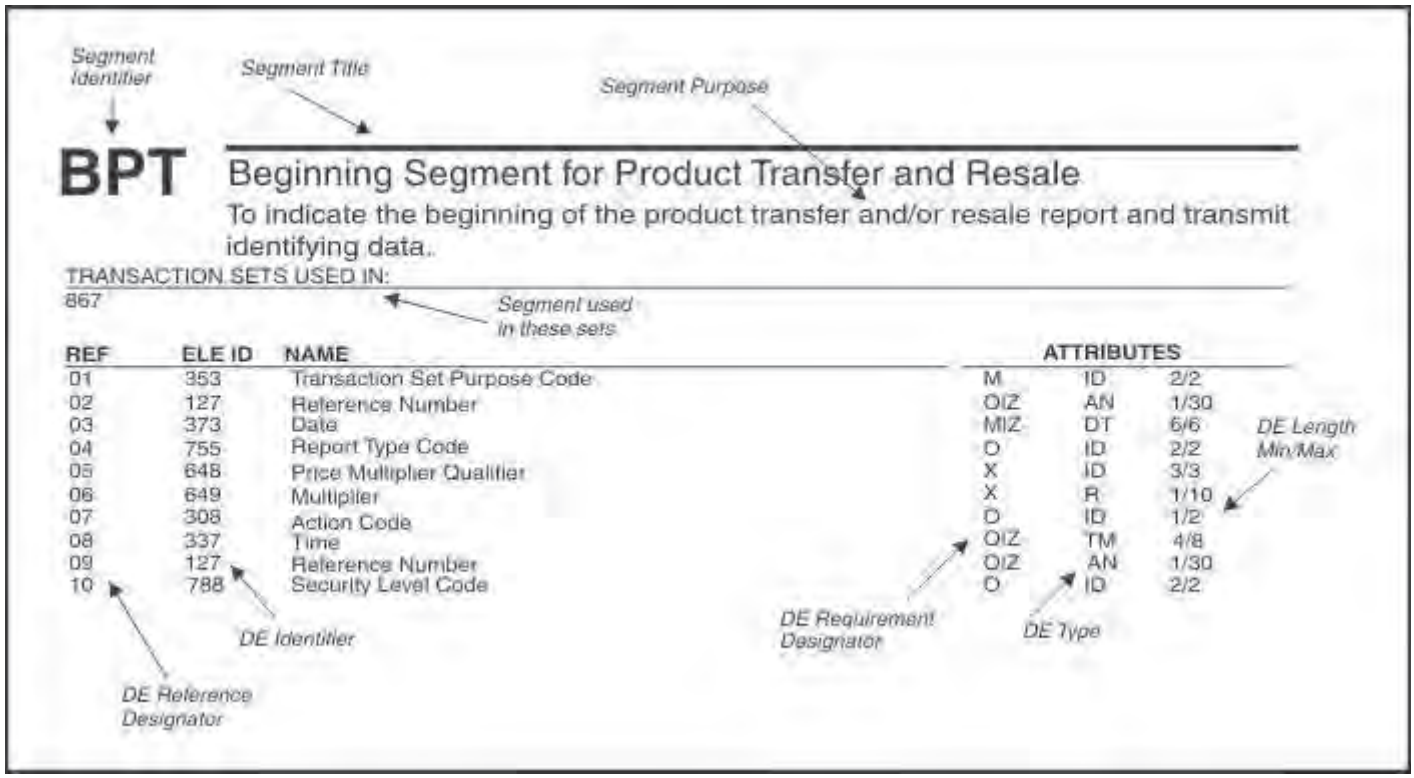
In cases where it is necessary to retransmit an interconnect mailbag, the interconnect mailbag time should not be changed from its original value when the mailbag was created. This aids the receiver in the identification of the mailbag and the determination of the age of the mailbag.

7.3 Delimiter Specifications

The delimiters for the mailbag segments are a data element separator and a segment terminator. The delimiters that shall be used in the segments of the interconnect mailbag structure (IH, IT, and IA) are as follows:

Description	Delimiter	Name	EBCDIC (Hex)	ASCII (Hex)
Segment Terminator	~	Tilde	A1	7E
Data Element Separator	*	Astersk	5C	2A

Although X12.5 Interchange Control Structures discourages the use of these characters because of the likelihood of their inclusion in data element contents, these characters are not needed in the interconnect mailbag data elements. Neither the tilde nor the asterisk conflicts with the reserve characters used by commonly implemented interconnect protocols (2780, 3780, SNA, etc.).



These delimiters apply only to the interconnect mailbag segments, not to any interchanges being transferred in the mailbag, and in no way restrict the values that may be used in the interchanges placed in the mailbag.

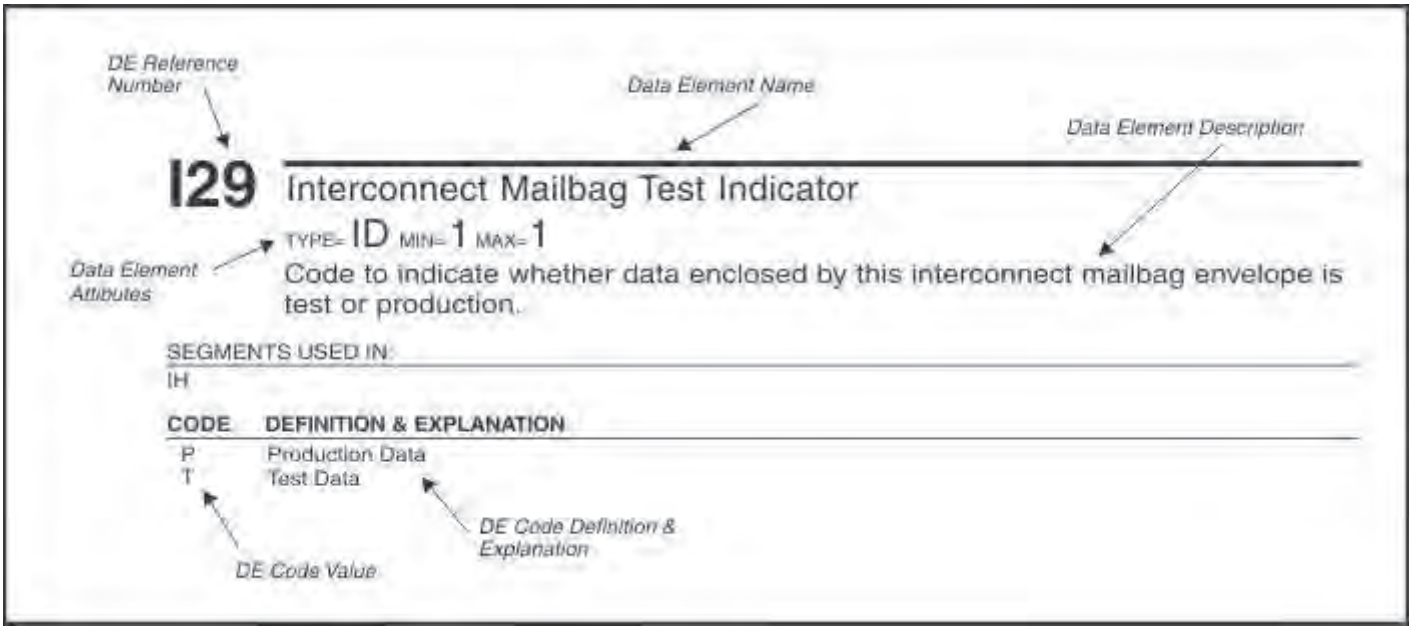
7.4 Interconnect Mailbag Segment Specifications

7.4.1 Data Segment Diagram Key

The format described in Figure 7.2 - Segment Key Diagram shows, in the general case, how interconnect mailbag segments are diagrammed and how reference information is provided in the diagram. It must be noted that the actual transfer of information does not include all of the reference information; only the data segment identifier characters, the delimiters, and the values for each included data element are actually transferred in the interconnect mailbag segments.

Figure 7.2 - Segment Key Diagram

7.4.2 Interconnect Control Segments



The specifications for the control segments of this standard are shown in the Segment Directory.

7.5 Interconnect Mailbag Data Element Specifications

7.5.1 Data Element Diagram Key

The format described in Figure 7.3 - Data Element Key Diagram shows, in the general case, how a data element is diagrammed and how the reference information is provided in the diagram. It must be noted that actual transfer of information does not include all of the reference information; only the values for each included data element are actually transferred in the interconnect mailbag control segments.

Figure 7.3 - Data Element Key Diagram

7.5.2 Data Element Definitions

The specifications for the data elements of this standard are shown in the Data Element Dictionary.

X12.58 Security Structures

1. Purpose and Scope

The purpose of this standard is to define the data formats for authentication, encryption, and assurances in order to provide integrity, confidentiality, and verification and non-repudiation of origin for two levels of exchange of Electronic Data Interchange (EDI) formatted data defined by Accredited Standards Committee (ASC) X12. These security services can be applied at either the functional group level or the transaction set level or both.

This standard defines data formats for the following optional mechanisms:

- Authentication of EDI encoded data
- Compression of EDI encoded data
- Encryption of EDI encoded data
- Assurances applied to EDI encoded data
- Assurances applied to EDI encoded data and passed independent of EDI encoded data
- Non-repudiation of Origin
- Non-repudiation of Receipt
- Security protocol error reporting

The business requirements addressed in this standard for the security of EDI-formatted data encompass:

- Verification of the security originator to the security recipient
- Verification of assurance originator to any interested party ("non repudiation of sender")
- Electronic signatures, including expression of business purpose for applying each of several possible multiple signatures and date-time stamp
- Verification of data integrity ("error detection," "hash totals," "control totals")
- Confidentiality of business data
- Detection of replay (e.g., duplication), insertion/modification/deletion, or impersonation

2. Referenced and Related Standards

This standard is used with the ASC X12 series of standards on electronic data interchange.

The following material is from The Internet Engineering Task Force (IETF®). The mission of the IETF is to make the Internet work better by producing high quality, relevant technical documents that influence the way people design, use, and manage the Internet.

The following verbatim text is from the cited document as noted immediately below.

[RFC2119] Bradner, S., "Key words for use in RFCs to Indicate Requirement Levels", BCP 14, RFC 2119, DOI 10.17487/RFC2119, March 1997, <http://www.rfc-editor.org/info/rfc2119>.

Key words for use in RFCs to Indicate Requirement Levels

In many standards track documents several words are used to signify the requirements in the specification. These words are often capitalized. This document defines these words as they should be interpreted in IETF documents. Authors who follow these guidelines should incorporate this phrase near the beginning of their document:

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in RFC 2119.

Note that the force of these words is modified by the requirement level of the document in which they are used.

1. **MUST This word, or the terms "REQUIRED" or "SHALL", mean that the definition is an absolute requirement of the specification.**
2. **MUST NOT This phrase, or the phrase "SHALL NOT", mean that the definition is an absolute prohibition of the specification.**
3. **SHOULD This word, or the adjective "RECOMMENDED", mean that there may exist valid reasons in particular circumstances to ignore a particular item, but the full implications must be understood and carefully weighed before choosing a different course.**
4. **SHOULD NOT This phrase, or the phrase "NOT RECOMMENDED", mean that there may exist valid reasons in particular circumstances when the particular behavior is acceptable or even useful, but the full implications should be understood and the case carefully weighed before implementing any behavior described with this label.**
5. **MAY This word, or the adjective "OPTIONAL", mean that an item is truly optional. One vendor may choose to include the item because a particular marketplace requires it or because the vendor feels that it enhances the product while another vendor may omit the same item. An implementation which does not include a particular option MUST be prepared to interoperate with another implementation**

which does include the option, though perhaps with reduced functionality. In the same vein an implementation which does include a particular option MUST be prepared to interoperate with another implementation which does not include the option (except, of course, for the feature the option provides.)

3. Definitions and Common Abbreviations

X12.6 Application Control Structure provides formal definition of terminology related to the electronic data interchange standards developed by ASC X12.

3.1 Definitions

Algorithm
A clearly specified mathematical process for computation; a set of rules which, if followed, will give a prescribed result.

Assurance Originator
The entity responsible for generating an assurance.

Assurance Recipient
The entity responsible for verifying an assurance.

Assurances
A generalization of the concept of "electronic signature" which includes similar concepts such as notarization or a secured time stamp.

Authentication
The verification of the source, uniqueness, and integrity of a message (definition used in ANSI X9.9).

Ciphertext
Encrypted (enciphered) data.

Cryptographic Equipment
Hardware or software that performs cryptographic functions (e.g., encryption, authentication, key generation).

Cryptographic Key (also Key)
A parameter that determines the transformation from plaintext to ciphertext or vice versa. For example, a DEA key is a 64-bit parameter consisting of 56 independent bits and eight bits which may be used as odd parity bits.

Cryptographic Service Message
Message used for transporting keys or related information used to control a keying relationship (ANSI X9.17).

Data Compression
Reduction in the size of a data stream by the use of specialized encoding techniques.

Data Key
A key used to encrypt and decrypt or to authenticate data (ANSI X9.17). **NOTE:** this standard requires that different keys be used for authenticating and encrypting the same plaintext.

Decryption
The process of transforming ciphertext into plaintext (ANSI X9.23).

Digital Signature
Electronic signature based on public key technology.

Digest
The output of a hashing algorithm.

Dis-embodied Signature
Electronic signature based on public key technology that is passed independent of the associated document.

Electronic Signature
Generic term covering techniques such as hashing, message authentication codes, or digital signatures.

Encryption
The process of transforming plaintext into ciphertext.

Hash
A (mathematical) function which maps values from a (possibly very) large set of values into a smaller range of values.

Initialization Vector (IV)
A value used as a starting point for the encryption of a data sequence to increase security by introducing additional cryptographic variance and to synchronize cryptographic equipment.

Interchange Partners
Two parties who have previously agreed to exchange data. A party and a key center exchanging cryptographic service messages do not constitute interchange partners.

Interoperability
The ability to exchange EDI data or cryptographic keys, both manually and in an automated environment, with any other party implementing this standard, providing that both implementations use compatible options of the relevant standards and compatible communications facilities.

Key
See *CRYPTOGRAPHIC KEY*.

Keying Material
The data (e.g., keys and IVs) necessary to establish and maintain cryptographic keying relationships (ANSI X9.17).

Keying Relationship
The state existing between interchange partners in which they share at least one data key or key-encrypting pair.

Message Authentication Code (MAC)
A cryptographically derived hash total that can be used to verify the security originator to the security recipient and so protects the integrity of the applicable data.

Non-Repudiation
Ability of a party to a data exchange to obtain irrevocable proof, verifiable that some aspect of the data exchange occurred.

Octet
Eight bits.

Parity
A measure of the number of "1" bits in a group of "0" and "1" bits; either odd, even, or not relevant (i.e., none).

Party
Business entity that controls the application system that originates or receives EDI formatted data.

Plaintext
Unencrypted (unenciphered) data; intelligible data that can be directly acted upon without decryption.

Private Key
One of two keys used with an asymmetric cryptographic algorithm. The private key is known only to one entity.

Pseudo-Random
A value is pseudo-random if it is approximately random.

Public Key
One of two keys used with an asymmetric cryptographic algorithm. The public key is known to everyone.

Random
A value is random if it has an equal probability of being selected from all possible values; hence it is unpredictable.

Replay
The process of recording and repeating a message at a later time.

Secret Key
A key, used with a symmetric cryptographic algorithm, that is shared between the two entities.

Security Originator
The entity responsible for and authorized to apply cryptographic protection to a secured-body.
NOTE: the security originator is logically distinct from the application sender.

Security Recipient
The entity responsible for verifying that the secured-body has not been altered in transit, for decoding encrypted text, or validating the identity of the security originator. **NOTE:** the security recipient is logically distinct from the application receiver.

Symmetric Key
See *SECRET KEY*.

Transformed Data
Transformed data is the encrypted data string resulting from application of an encryption algorithm to the span of characters beginning with the first character of the initialization vector and ending with the character preceding the segment delimiter of the last segment in the range of data to be secured.

3.2 Abbreviations

ASCII: American Standard Code for Information Interchange
CBC: Cipher Block Chaining
CFB: Cipher Feedback
DEA: Data Encryption Algorithm
EBCDIC: Extended Binary Coded Decimal Interchange Code
ECB: Electronic Code Book
IDA: Identity of Key for Authentication
IDE: Identity of Key for Encryption
IV: Initialization Vector
MAC: Message Authentication Code

4. Data Security Related Concepts

4.1 General

This section describes general cryptographic concepts as they apply to authentication, encryption, and assurances.

The models for authentication, encryption, and compression presented in this Section are those of ANSI X9.9, ANSI X9.23, and X9.32. These standards use the Data Encryption Algorithm (DEA) as described in ANSI X3.92 and the Modes of Operation of the DEA as defined in ANSI X3.106. This document makes provision for other standards -- including future ANSI or other standards -- by providing data structures for the use of other cryptographic algorithms, including asymmetric algorithms.

The companion document *Cryptographic Service Message Transaction Set (815)* deals with the management and distribution of symmetric keys, asymmetric keys, and certificates of authority.

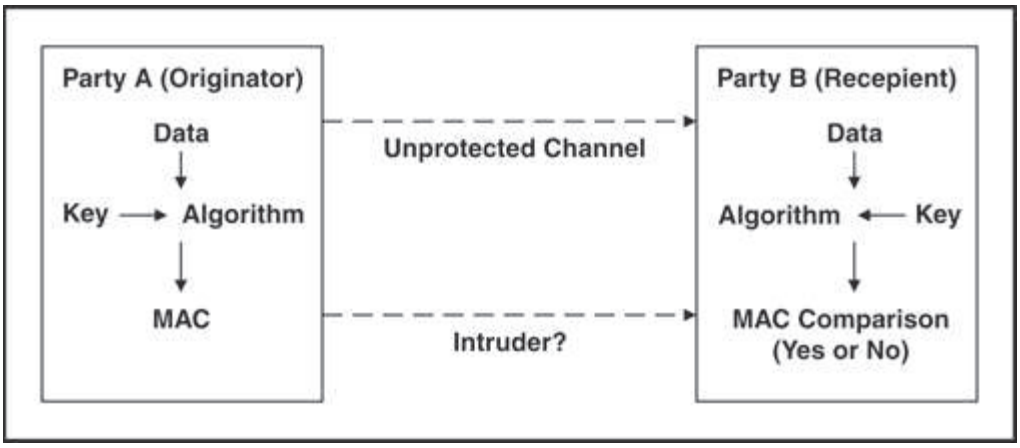
The model for electronic signatures is based on the public key cryptographic standards work of ANSI X9F1, and the Secure Hash Algorithm (SHA) and the Digital Signature Algorithm (DSA) work of

NIST that is contained in Federal Information Processing Standards 186 (FIPS 186). The approach taken is flexible enough to encompass other public key standards and *de facto standards*.

4.2 Authentication

Authentication is a technique used to:

- Verify the identity of the security originator of a message to the security recipient in order to detect spoofing or impersonation
- Verify the integrity of the message by detecting changes (modifications) in a message (including transmission errors) introduced between the security originator and the security recipient
- Protect a unique message identifier which is used to detect attempts at insertion, deletion, or replay of messages



The ANSI X9.9 standard employs ANSI X3.92 to compute a Message Authentication Code (MAC). The MAC is a cryptographically derived hash total that can be used to verify the security originator to the security recipient or protect the integrity of the applicable data.

Authentication is designed to provide protection for a message between the security originator and the security recipient. To provide that protection, the key used to perform the authentication must be known only by those two parties (or their authentication devices), and the message must not be modified in any way after the authentication process is performed by the security originator.

Authentication does not modify the text that is input to the process. The authenticated message can pass through any communications equipment that can handle the unauthenticated message. The receiving process must be able to reconstruct the original message from the data delivered by the communication equipment in order for the message to pass the checking process.

Basic requirements for a secured business interchange include the need to detect attempts at insertion, deletion, and replay of messages. This requirement can be satisfied by having the originating application place a combination of date and message identifier (such as a purchase order number) -- according to the requirements of ANSI X9.9 -- into the authenticated message so that the receiving application can uniquely identify each message sent. Then the security recipient can detect a repeated message by its repeated date and message identifier. Deleted messages can be detected by the originating application by the lack of an authenticated response (when one is used) or by the receiving application by reconciling the messages received against a list sent by the originating application in a separate authenticated message. Text inserted into the secured-body can be detected by the receiving application by the failure of the message to authenticate. The following diagram depicts the authentication model.

Figure 4.1 - Authentication Model

This model shows the computation of the MAC by the security originator (Party A). The computed MAC is appended to the message before transmission to the security recipient (Party B). A similar computation must be performed by the security recipient; the computed MAC must be compared with the received MAC to verify the security originator and to detect changes in the message. If the MACs compare successfully, Party B knows that the message has not been modified (providing data integrity), and knows that the message was authenticated by the security originator (providing verification of the security originator to the security recipient).

4.3 Encryption

The confidentiality of EDI encoded data is protected by the use of encryption. This standard provides a method for protecting the confidentiality of ASC X12 formatted data that is independent of the actual structure and the data content. In all cases, the structures defined in this standard apply.

Use of the encryption option of this standard does not provide detection of alteration of messages between the security originator and the security recipient. If encryption were used without authentication or assurance and an error occurs in transmission, the error may not be detected and the decrypted message may not be usable nor able to be processed. Authentication or assurance can be used to provide integrity while using encryption to provide confidentiality of the same data. When both authentication or assurances and encryption are used, the authentication or assurances are performed before encryption of the original plaintext data.

4.3.1 Assurances

Assurances, as defined in this standard, are a generalization of the concept of "electronic signature." The assurance originator expresses "business intent" by adding an assurance (one SxA segment and one SVA segment) to a transaction set or functional group that codifies the intent and computes a MAC or digital signature based on the text or the secured digest of the transaction set or group. The assurance recipient verifies the digital signature. Since the assurance originator is the only entity that could have generated the digital signature in a public key system, the assurance recipient can have certainty that expressed business intent is valid. The assurance provides for:

- Encoding of "business intent"
- Any text (e.g., signer's name, license number, etc.) desired by the signatorlito accompany the signature

- Date/time stamp
- Non-reputable signature
- Dis-embodied signature

4.3.2 Non-repudiation

Using a private-key/public-key approach, non-repudiation of origin of a message can be established since only the assurance originator can generate the signature. Any recipient that has access to the technology and that can verify the certificate chain, is able to verify the signature.

Non-repudiation of receipt is also supported by this standard. Using a private-key/public-key approach, a message recipient can generate an electronic signature value that will assure the message originator that the message was received by the intended party, without modification.

Non-repudiation is achieved since the process provides irrevocable proof, to a third party, that the security originator has access to the private key component. The strength of public key technology relies on the mathematical insolubility of the reverse process.

4.3.3 Supporting Services

Compression

Data compression takes a contiguous stream of characters and transforms the stream into a series of codes. If the compression algorithm is effective, the resulting stream of codes is smaller than the original text.

The theory of data compression is based on redundancy in the original text. For X12-encoded data, the repetition of segment identifiers in conjunction with separators, the recurrence of alpha and numerical substrings, and the frequency of common codes -- all add up to considerable redundancy in the ASCII encoding stream.

The various common data compression algorithms provide different coding methods for single and multiple character combinations that occur with different probabilities.

Modern compression techniques fall into several families: Shannon-Fano coding, Huffman coding, statistical modeling, and methods based on an adaptive dictionary. These techniques are often used for compressing files on bulletin boards or in modems that are able to perform compression/decompression "on the fly." If compression is used, it must be completed before the encryption process.

Security Error Reporting

While security products and algorithms provide a reliable and stable output, errors can occur. It is imperative that any security-related error be detected and reported immediately. A series of error codes and conditions have been defined to support this reporting requirement. It is possible to communicate these codes in the ASC X12 Functional Acknowledgment (997); however, it is recommended that the ASC X12 Secured Receipt or Acknowledgment (993) be the primary method for reporting security protocol errors.

4.3.4 Filtering of Encrypted or Compressed Data

The result of the encryption process is a pseudo-random binary string. Some communications systems will interpret some of the pseudo-random binary output as control characters or control sequences which may have a detrimental effect on transmission services (e.g., spurious XON/XOFF or EOF characters).

Filtering is a reversible process that converts the binary output from the encryption process to a coded character set output that does not contain control characters or sequences. The receiving process uses the inverse filtering process to convert the data back to the binary data so that it can be decrypted.

Filtering is performed after all other security processes are complete.

This process will normally increase the size of the message. ANSI X9.23 defines several optional filters that provide a tradeoff between character set flexibility and message expansion:

- The hexadecimal filter converts each byte of binary data into two hexadecimal characters (0..9, A..F) expressed in the character set of transmission. This filter works well with nearly all character sets, but it produces an expansion of 100%.
- The ASCII filter converts the binary data to a string of ASCII printable characters and normally produces an expansion of about 23%.
- The ASCII/Baudot filter converts the binary data to a string of characters belonging to both the ASCII and Baudot character sets and normally produces an expansion of about 86%.

This standard also allows the use of no filter or the use of a filter specified by mutual agreement among the options provided by the code set maintained by ASC X12.

4.4 Sequencing of Cryptographic Techniques

In practical situations, the users of this standard will choose combinations of features rather than just a single feature. The supported combinations of features, not including assurances, are specified in the codes for DE 990 - Security Type. All features are designed to be used in isolation or in any combination.

Authentication does not protect the confidentiality of the message because the information is interchanged in its plain text form. Message encryption can be used to provide confidentiality while using authentication to provide integrity protection of the same data. When both authentication and encryption are used, the authentication is performed before encryption of the original plain text data.

Where more than one service is selected at a specific level, the order of processing is:

- Before applying any security services, the data must first be translated into an EDI format
- Addition of one or more assurances
- Authentication
- Compression
- Encryption
- Filtering for data communications

When assurance segments (S4A and SVA) are used, they must be added to unsecured (not authenticated or encrypted) transactions. If a transaction set is received (with or without assurances)

with encryption and/or authentication applied by the originator, the transaction set must be either decrypted or authenticated prior to the addition of any further assurances. Once any assurances have been added, the transaction set can be encrypted or authenticated prior to being forwarded to additional parties.

When applying security services at the functional group level, all security services at the transaction set level must be completed before applying security services at the functional group level.

The receiving organization processes the received message in the reverse order, starting with inverse filtering, followed by decryption, followed by decompression, validation of authentication and validation of the assurances. When processing inbound security services at the transaction set level, all security services except assurances at the functional group level must be removed before processing inbound security services at the transaction set level. (Note that to maintain the validity of the assurances associated with S3A, S4A assurances must not be removed before verification of the S3A assurances.) In this manner the receiving organization unwraps the EDI message by processing the security services and removing the S3S/S3E pairs from the message before processing the next security service.

5. ASC X12 Security Segment Specifications

5.1 General

Security services (authentication, encryption and assurances) are provided at two levels within ASC X12 in conjunction with the following envelopes:

- Functional Group (GS/GE envelope)
- Transaction Set (ST/SE envelope)

The Version/Release of the Security segments is independent of the Version/Release/Sub-release version identified in the Functional Group Header (GS). The Version/Release for the security structures is contained in the first data element of the S3A, S4A, S3S, & S4S segments. This version/release code indicates the specific version/release of the standard that is applicable to that security segment and the associated security trailer or security value segment. The same transaction set or functional group may have different version/releases of the security standard applied to it or there may be different version/releases of the security standard applied to multiple transaction sets or functional groups.

At each of these levels, authentication, encryption and assurances are each optional. Assurances are independent of authentication or encryption. In addition, any service used at one level is independent of a service used at the other level.

Assurances are applied before any other security processes (authentication, encryption, and compression). Therefore, the assurance segment (S3A or S4A) immediately follows the segment initiating the beginning of this level (GS or ST), and precedes any existing assurance segments (S3A or S4A). The Security Value (SVA) segment follows any existing Security Value (SVA) segments and precedes the segment terminating the level (GE or SE).

If encryption and/or authentication is provided, the security header segment (S3S or S4S) immediately follows the segment initiating the beginning of this level (GS or ST); the security trailer segment (S3E or S4E) precedes the segment terminating the level (GE or SE). If encryption and/or authentication at both levels is provided and if assurances are used at both levels, the sequence of segments, illustrating these levels, is:

ISA - Interchange Header
- **GS** - Functional Group Header
- **S3S** - Security Header Level 1
- **S3A** - Assurance Header Level 1
  - **ST** - Transaction Set Header
  - **S4S** - Security Header Level 2
  - **S4A** - Assurance Header Level 2
    - (The Transaction Set Segments)
  - **SVA** - Security Value (Level 2)
  - **S4E** - Security Trailer Level 2
  - **SE** - Transaction Set Trailer
- **SVA** - Security Value (Level 1)
- **S3E** - Security Trailer Level 1
- **GE** - Functional Group Trailer

IEA - Interchange Trailer

There is one exception to the segment placement defined above. The Secured Receipt or Acknowledgment (993) uses a unique sequencing of the assurance segments. The Secured Receipt or Acknowledgment (993) contains assurances for information not contained in the transaction set. The transaction set designers believed that using the S4A/SVA pair standard placement would mislead implementers. Therefore, to provide greater clarity, the S4A/SVA pair were placed together just prior to the SE segment.

5.2 Standard Structures for Security Segments

5.2.1 Segment Constructs in Backus-Naur Form (BNF)

The security related segments are constructed as follows:

S3A - Assurance Header Level 1		
<function_assurance_header>	:: =	S3A <gs> <Security_Version/Release_Identifier_Code> <gs> <Business_Purpose_of_Assurance> <gs> <Computation_Methods> <gs> <Domain_of_Computation_of_Assurance_Digest> <gs> [<Assurance_Originator>] <gs> [<Assurance_Recipient>] <gs> [<Assurance_Reference_Number>] <gs>

5.2.2 General

In this Section, the principles of the standard structures that are implemented at the various levels are established. Thus, in the description of this Section, the generic "SxS", "SxE", and "SxA" segments are referenced. Specifications for the interchange segments are provided in the segment directory.

Security at each potential level is optional and is independent of security at other levels.

The security header (SxS, x = 3 or 4), trailer (SxE), and assurance (SxA) segments are defined for the two levels (functional group and transaction set) using identical formats differing only in the naming of the segments and the reference designators.

The same key shall not be used for more than one function (i.e., authentication or encryption) at any one level. A key used to provide protection at one level shall not intentionally be used at the other level for the same or a different purpose.

When used, the security header segment (generic SxS) is placed immediately after the first segment of the authenticated group of segments. The security header segment identifies which security services are to be used and identifies authentication and encryption keys to be used. The format of the SxS can be found in the segment dictionary.

If the SxS segment is used at the beginning of a functional group or transaction set, the security trailer segment (SxE) precedes the last segment of the same functional group or transaction set.

The security trailer segment is used to end the authentication and encryption process initiated by the corresponding security header segment. SxE01 is the message authentication code (MAC) or hash generated by applying the authentication algorithm against the designated segments.

If one or more assurances are used at either level, one SxA segment and one SVA segment are added. The first Assurance (SxA) and any subsequent Assurances are placed immediately after the first segment of the assured group of segments (GS or ST) and before any previous SxAs.

If the SxA segment is used at the beginning of a functional group or transaction set, the Security Value (SVA) will immediately precede the last segment of the same functional group or transaction set. The SVA for any additional assurances will follow any previous SVAs and precede the last segment of the group or transaction set (GE or SE).

The preparation of ASC X12 text and formatting of security header and trailer segments (see Section 5.1) consists of:

1. Determining whether a transaction set or functional group will be authenticated, encrypted or assured.

2. Inserting an SxA segment after the first segment of the group or transaction set (GS or ST) that will be assured and before the SxA of the last assurance at the same level, if present.

3. Inserting an SVA segment before the last segment of the group or transaction set (GE or SE) and after the SVA of the last assurance at the same level, if present.

4. Inserting the SxS segment after the first segment of the group of transaction set (GS or ST) that will be authenticated or encrypted and before any Assurances (SxA) if present. The SxE segment is inserted after any Security Values (SVA), if present, and before the last segment of the group or transaction set (GE or SE).

When the S4S and S4E segments are added, the segment count in the SE segment is increased by 2. When the S4A and SVA segments are added, the segment count in the SE segment is increased by 2. When S3S, S3E, S3A or SVA segments are added to the functional group, the count of transaction sets in the group is not changed.

The scope of the authentication process is defined as follows:

- Authentication begins with the first character of the segments designated for authentication (i.e., the first Character of the segment preceding the "SxS" segment).
- If encryption is also to be performed, the authentication process is performed through the SxS09 element and then continues with the segment terminator of the SxS segment (i.e., as if the Length of Data segment, the Initialization Vector element, and their preceding segment separators were not present).
- Authentication ends with and includes the data element separator preceding the hash code.

The scope of the compression process is defined as follows:

- Compression starts with the first character of the segment that follows the SxS segment.
- Compression ends with the last character of the segment that precedes the SxE segment (and does not include the segment separator).

The scope of the encryption process is defined as follows:

- Encryption begins with the Initialization Vector field (SxS11).
- The Initialization Vector (IV) is encrypted using Electronic Code Book (ECB). A new IV shall be used for each message and shall not be intentionally reused. Text following the IV is encrypted using the mode specified in the Encryption Service Code (SxS09).
- Encryption ends with the last character before the segment terminator of the segment preceding SxE.
- Filtering is applied to the encrypted IV and, optionally, to the encrypted data.
- When present, the Length of Data data element counts the number of octets in the encrypted and filtered IV and data.
- When certain block ciphers (i.e., CBC mode of DES) are used for encryption, the plaintext data is padded to a multiple of the block size octets by adding text consisting of 0 to 7 ASCII-zeroes followed by a length value consisting of one ASCII character with value ranging from "1" to "8" that specifies the number of octets used in the padding. This padding meets the requirements of ANSI X9.23 and is completely deterministic. Because of the padding, the

pre-encrypted text will always be a multiple of the block size prior to filtering and thus fit any block-oriented encryption mode of operation. The padding is added immediately prior to encryption and is removed by the decryption process; it is not included in the calculation of the hash that is computed prior to encryption.

The scope of the assurance process is defined as follows:

- The scope of each assurance is defined for that assurance by the contents of the Domain of Computation of Assurance Digest (SxA04) data element in the SxA segment.

5.3 Functional Group Security (GS/GE, Level 1)

Assurances are applied before any other security processes (authentication, encryption, and compression). Therefore, the assurance segment (S3A) immediately follows the segment initiating the beginning of this level (GS), and precedes any existing assurance segments (S3A). The Security Value (SVA) segment follows any existing Security Value (SVA) segments and precedes the segment terminating the level (GE).

Encryption and/or authentication is available for individual functional groups through the use of the S3S and S3E segments. Both the S3S and S3E segments can be present or absent for any functional group. Security (authentication and/or encryption) at this level is optional and is independent of security at any other level.

If functional group level security is used, the key used for authentication and the key used for encryption shall be different, and the keys shall not be used for any other security purpose. Separate functional groups, within the same interchange or in separate interchanges, may use the authentication key or the encryption key used for the same purpose in other functional groups.

Definitions of security segments and data elements are given in the segment and data dictionaries.

The placement of security segments is defined below.

- The S3A segment immediately follows the GS segment.
- The S3S segment immediately follows the GS segment and is inserted immediately before any S3A or S3S segments, if present.
- The S3E segment precedes the GE segment and is inserted immediately after any SVA or S3E segments, if present.

The scope of security segments is defined as given below.

- Authentication begins with the first character of the functional group (the "G" of GS*.....).
- Authentication ends with and includes the data element separator preceding the hash code.
- Compression begins with the first character of the segment following the S3S segment (i.e., the first character of the first enclosed transaction set).
- Compression ends with the last character before the segment terminator of the segment preceding the S3E.
- Encryption begins with the first character of the Initialization Vector (S3S11).
- Encryption ends with the last character before the segment terminator of the segment preceding S3E.

- Assurance segments have a scope defined by the code in S3A04.

5.4 Transaction Set Security (ST/SE, Level 2)

Assurances are applied before any other security processes (authentication, encryption, and compression). Therefore, the assurance segment (S4A) immediately follows the segment initiating the beginning of this level (ST), and precedes any existing assurance segments (S4A). The Security Value (SVA) segment follows any existing Security Value (SVA) segments and precedes the segment terminating the level (SE).

Encryption and/or authentication is available for individual transaction sets through the use of the S4S and S4E segments. Both the S4S and S4E segments can be present or absent for any transaction set. Security (authentication and/or encryption) at this level is optional and is independent of security at any other level.

If transaction set level security is used, the key used for authentication and the key used for encryption shall be different, and the keys shall not be used for any other security purpose. Separate transaction sets, within the same functional group or in separate functional groups or interchanges, may use the authentication key or the encryption key used for the same purpose in other transaction sets.

Definitions of security segments and data elements are contained in the segment and data element dictionaries.

The placement of security segments is defined below.

- The S4A segment immediately follows the ST segment, except when used in the Secured Receipt or Acknowledgment (993). In the Secured Receipt or Acknowledgment (993), the S4A will immediately precede the SVA segment.
- The S4S segment immediately follows the ST segment and is inserted immediately before any S4A or S4S segments, if present.
- The S4E segment precedes the SE segment and is inserted immediately after any SVA or S4E segments, if present.

The scope of security segments is defined as given below.

- Authentication begins with the first character of the transaction set (the "S" of ST*.....).
- Authentication ends with and includes the data element separator preceding the hash code.
- Compression begins with the first character of the segment following the S4S segment (i.e., the first character of the transaction set body).
- Compression ends with the last character before the segment terminator of the segment preceding the S4E.
- Encryption begins with the first character of the Initialization Vector (S4S11).
- Encryption ends with and includes the last character before the segment terminator of the segment preceding S4E.
- Assurance segments have a scope defined by the code in S4A04.

6. Auditing and Responding to Secured ASC X12 Data

Since the security structures are embedded in the ASC X12 structures, the responses will be found embedded in the response to a group of transactions, the Functional Acknowledgment Transaction Set (997).

These security structures are an integral part of the management of the ASC X12 EDI environment. When an audit journal is required, it may be required for a variety of EDI management purposes. This Section also attempts to reconcile these disparate purposes.

Only a single 997 response is allowed for a functional group, and it must report on the syntactic integrity of the entire received group of transaction sets.

A. Appendix

This Appendix is not part of the standard but is included for information only.

The example shows authentication and the use of the assurance segment -- with authentication applied at both levels and multiple assurances segments ("signatures") on the first transaction at transaction set level only. The security recipient for the transaction set (shown in the S4S segment) in this example is different from the security recipient of the functional group (shown in the S3S segment). The original transaction was signed by the original preparer of the ASC X12 message (code "PRP" indicates "preparer"), but the second signature was applied by a subsequent handling party (code "ASG" indicates authorizer).

The integrity indicated by the functional group hash would have been calculated after the application of this second signature.

NOTE: Cryptographic values are for explanation purposes only and do not represent real output of the stated cryptographic algorithms.

Many other combinations are possible, including authentication at one level (S3S or S4S) and other combinations of the same or different security originator or security recipient names.

The actual MACs generated by the security originator are dependent on the values of the cryptographic keys corresponding to the key names KEY_ONE and KEY_TWO. The values of the cryptographic keys are known only to the security originator and the security recipient. Only the names of the keys are sent in the above interchange.

If encryption in the CBC mode was applied to the second transaction set in the example above in addition to authentication, the S4S segment would have the following appended to it immediately prior to encryption:

*KEY_THREE*20*192*8 octets of IV

and the TDS segment in the encrypted form only would be:

TDS*511100000008

where "00000008" is the padding (seven ASCII zeroes followed by a total length of padding of eight). This padding is removed after the decryption process.

Following encryption, the length of the ciphertext data is placed in the LOD field. For this example, if filtration is not used, the value placed in the LOD field is "192" consisting of the sum of the following:

- Length of encrypted IV (always eight)
- Length of plain text segments including segment terminator character (176). The count includes the segment terminator of the S4S segment (encrypted) but not the segment terminator of the TDS segment (not encrypted).
- Length of padding (eight, in this example)

If filtration is used, the LOD is the length of the filtered, encrypted text and thus not necessarily a multiple of eight octets. The hash at the transaction set level (in S4S01) is not affected by the encryption of the transaction set. The hash at the functional group level (in S3S01) would be affected since the computation is performed on the transaction set as enveloped, i.e., as both authenticated and encrypted.

X12.59 Implementation of EDI Structures - Semantic Impact

1. Purpose and Scope

While the X12 standards provide a clear distinction between the syntax of X12 structures and the semantics of transaction set usage, there are cases where the relative positioning of segments within those structures provides semantic information in their implementation.

The purpose of this standard is to describe the semantic relationships inherent in the implementation of those X12 structures:

- The meaning that is to be associated with data due to their positioning within the exchange of X12 information, and
- The data relationships that can be inferred from the data structure.

The clearest description of this issue arises from the definition of each individual transaction set. Syntax and semantic notes provide explicit rules to be followed in the creation (for the sender) and decoding (for the receiver) of any use (instance) of that transaction set.

This standard provides the rules inherent in the structure of X12 interchanges that govern such creation and decoding. These rules shall be considered part of the standard, to be followed in using a specific transaction set, unless superseded by syntax or semantic notes for that transaction set. Such rules, if any, that apply to structures at levels higher or lower than the transaction set level will be provided as well.

2. Referenced and Related Standards

This standard is used with the ASC X12 series of standards on electronic data interchange.

The following material is from The Internet Engineering Task Force (IETF®). The mission of the IETF is to make the Internet work better by producing high quality, relevant technical documents that influence the way people design, use, and manage the Internet.

The following verbatim text is from the cited document as noted immediately below.

[RFC2119] Bradner, S., "Key words for use in RFCs to Indicate Requirement Levels", BCP 14, RFC 2119, DOI 10.17487/RFC2119, March 1997, <http://www.rfc-editor.org/info/rfc2119>.

Key words for use in RFCs to Indicate Requirement Levels

In many standards track documents several words are used to signify the requirements in the specification. These words are often capitalized. This document defines these words as they should be interpreted in IETF documents. Authors who follow these guidelines should incorporate this phrase near the beginning of their document:

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in RFC 2119.

Note that the force of these words is modified by the requirement level of the document in which they are used.

1. **MUST This word, or the terms "REQUIRED" or "SHALL", mean that the definition is an absolute requirement of the specification.**
2. **MUST NOT This phrase, or the phrase "SHALL NOT", mean that the definition is an absolute prohibition of the specification.**
3. **SHOULD This word, or the adjective "RECOMMENDED", mean that there may exist valid reasons in particular circumstances to ignore a particular item, but the full implications must be understood and carefully weighed before choosing a different course.**
4. **SHOULD NOT This phrase, or the phrase "NOT RECOMMENDED", mean that there may exist valid reasons in particular circumstances when the particular behavior is acceptable or even useful, but the full implications should be understood and the case carefully weighed before implementing any behavior described with this label.**
5. **MAY This word, or the adjective "OPTIONAL", mean that an item is truly optional. One vendor may choose to include the item because a particular marketplace requires it or because the vendor feels that it enhances the product while another vendor may omit the same item. An implementation which does not include a particular option MUST be prepared to interoperate with another implementation which does include the option, though perhaps with reduced functionality. In the same vein an implementation which does include a particular option MUST be prepared to interoperate with another implementation which does not include the option (except, of course, for the feature the option provides.)**

3. Terms and Definitions

X12.5 Interchange Control Structures provides formal definition of terminology related to the interchange of information formatted as Electronic Data Interchange, as developed by ASC X12. X12.6 Application Control Structure provides formal definition of terminology related to the Electronic Data Interchange standards developed by ASC X12.

The following are terms and definitions for Semantic Structures:

ADDRESSING
"Addressing" is a term used to cover both the naming and semantic address of the logical or physical location of a person or position.

ADJACENT LEVEL
The term "adjacent" is used in a hierarchical sense. Two levels are adjacent to one another by reason of their relative positioning in the hierarchy of levels; one is at an immediately adjacent level to the other within the hierarchy.

AREA
An area is a distinct section of an X12 transaction set definition. The areas of a transaction set are "heading," "detail," and "summary."

BELONGING
The term "belonging" is used to identify the relationship of the data contents of a child structure to its parent structure. For example, line items are said to belong to an order.

CHILD
A child is a semantic entity that has meaning, in a transaction set instance, only through the parent structure to which it belongs. For example, an order line item has relevance only in the context of a total order.

DETAIL AREA
A detail area is any looping structure between the heading area and summary area of a transaction set. Detail areas encompass the actual body of the business transaction.

FUNCTIONAL EQUIVALENCE
Functional equivalence is the determination that the data contents of a segment or loop at one semantic level are meant to convey the same semantic intent as the data contents of a segment or loop at an adjacent level. For example, a line item ship-to address is functionally equivalent to a ship-to address in the order heading area. See the definition of PRECEDENCE below.

HEADING AREA
The heading area is an area at the beginning of a transaction set containing information pertaining to the entire transaction set.

INTERCHANGE
See X12.5 Interchange Control Structures.

NAMING
X12 uses naming structures to allow for the identification of a person or position. See ADDRESSING.

ORDER INDEPENDENCE
Order independence denotes a lack of any semantic significance in the order within the same semantic entity.

PARENT
A parent is a semantic entity that has a scope of applicability over at least one other semantic entity. For example, the data contents of the heading area of a purchase order are valid for all information in the order line items, barring precedence override.

PRECEDENCE
The term "precedence" describes a relationship among semantic levels such that, in the case of conflict between levels, the data contents at one level override (replace) the data contents of the other level. For example, if a line item ship-to address has precedence over a ship-to address in the heading area, it overrides the heading area address.

SEMANTIC ENTITY
A semantic entity is a segment or set of segments that, when taken together, convey meaning with the same scope of applicability. For example, the segments of a heading area of a purchase order provide the data contents that apply over the whole of that purchase order. Similarly, the scope of applicability of a GS segment is over the semantic entities included after it, up to and including its corresponding GE segment.

SEMANTIC ENTITY DEFINITION
The structure of a semantic entity, as published in a standards document, is its definition. The definition includes the sequence of data segments, their requirement for inclusion in any semantic entity instance, their maximum repeat counts, their placement within loops, and the requirement and repeat characteristics of such distinct loops. Segments may also be grouped in distinct areas (heading, detail, summary) to impart additional semantic significance.

SEMANTIC ENTITY INSTANCE
The data contents of a semantic entity, formatted in accordance with the rules of the semantic entity definition, comprises an instance of the semantic entity.

SEMANTIC LEVEL
The identification of semantic level is a designation allowing the description of a hierarchical relationship among semantic entities.

SEMANTICS
The term "semantics" typically pertains to the meaning of the information contained within a data structure, independent of the structure itself, such that the conversion from one structure to another would not change the meaning of the data. In this paper, the discussion focuses on what meaning can be inferred by the placement of information in the structure of EDI data.

SUMMARY AREA
The summary area is an area at the end of a transaction set containing information that addresses the results of summarizations of information in the detail area.

X12 STRUCTURE
An X12 structure is defined both in terms of its design (see SEMANTIC ENTITY DEFINITION) and its use (see SEMANTIC ENTITY INSTANCE). The design of an X12 structure is the sequencing of data elements within segments, and then, if applicable, the combination of segments in a sequence to make up a semantic entity. A use of an X12 structure is the formatting of specific data according to the structure's design, to convey a specific meaning.

4. Introduction

4.1 Syntax and Semantics in EDI Implementations

The terms "syntax" and "semantics," when used in the context of EDI implementations, refer to the structure and meaning of X12-formatted information, respectively.

- *Syntax is the structure of the data.* This includes establishing the method of encoding a piece of data by its attributes and identifying that data in the transfer, and is provided by the following aspects of the following X12 standards:
    - X12.6 Application Control Structure describes the basic structure of the components of an X12 functional group and provides the control segments used to bound loops of data segments, transaction sets, and groups of related transaction sets, and the special control segments used to bound transaction sets and groups of transaction sets for security purposes.
    - X12.3 Data Element Dictionary provides the attributes of type, minimum and maximum length, and if applicable, the relevant code list, of each data element that can be used in an X12 segment.
    - X12.22 Segment Directory provides the segment label, data elements within the segment (in sequence), requirements for use of each element, and syntax notes indicating relationships among data elements, if any.
    - Management transaction sets provide both the format and data content of transactions related to the interoperation of X12 systems. For example, the Functional Acknowledgment Transaction Set (997) describes the syntax-level acknowledgment of the receipt of an X12 functional group. Also, the Electronic Form Structure Transaction Set (868) describes the transfer of the EDI standards, or portions thereof, in electronic form.
    - All other transaction sets (defined as "business application" transaction sets) provide the structure of the segments to be used within each, including a heading area (Table 1, unless otherwise identified in the transaction set definition), detail area (Table 2), summary area (Table 3), looping structures within those areas (and nested within each other), and the segment sequence within the transaction set. In addition, each segment and loop is further defined in terms of requirement for use and maximum use.

- *Semantics relates to the meaning of the data transferred to the business application.* The meaning of X12 data is derived from the descriptions of the components of the standard used in a specific implementation and is provided by the following aspects of the following X12 standards:
    - X12.3 Data Element Dictionary provides the name and definition of each data element that can be used in an X12 segment, and if a code list is included, the description of each code. For ID data elements where the code list is maintained external to the X12 Secretariat, that external source provides the meaning of each code in the list.
    - X12.22 Segment Directory provides the name and definition of each segment that can be used in an X12 transaction set, as well as any semantic notes indicating relationships in the meaning of the use of one or more data elements in any one instance of the segment.
    - Business application transaction sets provide semantics in the name, description of purpose and scope, and transaction set notes and comments.

- *Additional control:* There are additional standardized components of the structure of X12 that control the distribution of X12 information through the enveloping of X12-formatted information, including:
    - X12.58 Security Structures defines the structures used for authentication and encryption of X12 transaction sets and functional groups.
    - X12.5 Interchange Control Structures provides the control structures for the electronic interchange of one or more functional groups.
    - X12.56 Interconnect Mailbag Control Structures defines the control segments used to bound a mailbag containing one or more X12 interchanges.

Taken together, the control components of X12 provide the structure in which the semantics of X12 can be exchanged between trading partners. The question to be addressed in this standard is whether the structure itself, by reason of the positioning of control information, provides any semantic content in the exchange of X12-formatted information.

The positioning of X12 control information is in terms of hierarchical levels of control, which will be described in detail in Section 5. For the purposes of highlighting the focus of this paper on the semantic content of any information provided at a particular control level, these levels will be referred to as "semantic levels." Of course, these semantic levels correspond to the hierarchy of the control levels.

4.2 Issues of Semantic Impact in X12 Syntax

This standard, therefore, will address the semantics implied by positioning within an EDI interchange. The document will address such issues as:

- **Scope of Applicability**
  For example, does the information content present in the heading area of a transaction set have any applicability to the detail area of the transaction set? (See example 2 in Section 6.1.)

- **Precedence of Areas**
  Assuming the answer to the previous question is "yes," how should a transaction set receiver treat the appearance of content in the detail area that is similar to content in the heading area? How can the receiver determine that such a "similarity" is intended? Does such information replace or add to the information content in the heading area? (See Section 6.3.)
- **Intra-interchange and Intra-group Relationships**
  Can a sender imply any relationship among transaction sets within the same functional group, or groups within the same interchange? (See Sections 5.1 and 5.2 for descriptive information, and example 1 in Section 6.2 for a review of the topic.)
- **Order of Segments**
  Is there any meaning in the order of segments within an area? Within a loop? (See example 3 in Section 6.2.)
- **Loops**
  What is the relationship among segments contained in an instance of a loop? (See example 2 in Section 6.2.)
- **The HL Segment**
  What is the meaning in the use of an HL segment to begin a loop? (See Section 5.6 for a description of the handling of loops beginning with the HL segment.)
- **Routing**
  What is the relationship, if any, between addressing information in the ISA and the GS? (See Section 6.4.)

This standard begins with definitions of the concepts and semantic relationships under discussion, followed by detailed descriptions of the rules governing those relationships. Examples are provided where applicable.

5. Semantic Levels of an EDI Interchange

The purpose in this section is to introduce the terms that are relevant to any discussion of the structure of an EDI interchange. A particular interest is to present these terms in such a way that the semantic relationship to their adjacent levels may be defined as well.

Items preceded by an asterisk under each section are the rules for the use of particular semantic levels that would have impact on their relationship to adjacent levels.

5.1 Interchanges Within a Logical Communications Exchange

Logical Communications Exchange
A logical communications exchange is any environment in which EDI information can be exchanged between trading partners in electronic format.

Interchanges
Each interchange between EDI trading partners occurs during a logical communications exchange. Each exchange includes the transfer of one or more EDI interchanges, possibly in both directions.

Each instance of a logical communications exchange shall be considered to be an external, enveloping structure of the interchanges that are transferred within that session. However, the semantic relationship between the interchanges and the logical communications exchange of which they are a part is beyond the scope of this standard.

5.2 Groups within an Interchange

Interchange Control Segments
Each interchange between EDI trading partners may contain interchange-level control segments related to prior interchanges. The only segment defined as an interchange control segment, which can be included within the interchange header and trailer, is the TA1, which references the acceptance or rejection of a prior envelope.

Functional Groups
Each interchange between EDI trading partners may contain functional groups. Each instance of a functional group applies to a specific business function, defined by the specific application to which it applies.

Each instance of an interchange shall be considered the parent structure of the interchange control segments and functional groups that are enclosed within the boundaries of that interchange. An interchange control segment is the parent structure of the data elements defined to be part of that segment.

5.3 Transaction Sets Within a Group

Transaction Set
Each functional group exchanged between EDI trading partners will contain one or more transaction sets. Each instance of a transaction set will identify a separate business transaction within the business function to which that group applies.

Each instance of a functional group shall be considered the parent structure of the transaction sets that are enclosed within the boundaries of that functional group.

5.4 Heading/Summary Areas of a Transaction Set

Areas
Most EDI transaction sets are designed so as to be divided into discrete "areas," which are typically identified in the transaction set definition by distinct tables of segments.

For example, the Price Sales Catalog Transaction Set (832) contains:

- A heading area, composed of reference information for the entire catalog
- A detail area, with individual line item information for each item in the catalog
- A summary area, containing a hash total count for the line items

The split of transaction sets into heading, detail, and summary areas is very common among EDI transaction set definitions. Unless otherwise defined in the publication of a transaction set definition, the heading, detail, and summary areas of a transaction set will be referred to as Tables 1, 2 and 3, respectively, excluding the transaction set header (ST) and trailer (SE) segments. Note that Table 2 would encompass multiple detail areas, if applicable.

The ST and SE segments are considered boundaries of the transaction set itself. However since these segments contain no semantic content (meaning) intended for the business application, they are part of the transaction set, but not part of any area in the transaction set.

Heading Area
Information in the heading area pertains to the entire transaction set:

- Every transaction set definition will have one and only one heading area, composed of at least one segment.
- At a minimum, the heading area of a transaction set definition typically contains data elements that identify each *instance* of a transaction set and its date. These elements are included to prevent replay of transaction set instances in a secure EDI environment.
- The use of any one segment in the heading area in any one *instance* of a transaction set is required only if the segment has been designated as "mandatory." If the transaction set definition does not include a mandatory segment in the heading area, then it is possible for one instance of the transaction set to have no heading area.
- The entire heading area comprises a segment group (see Section 5.6), which is not repeated.

Summary Area
Information in the summary area addresses the results of summarizations of information in the detail area (see the next section), or additional information about the entire transaction that cannot be expressed until the heading and detail areas have been generated. The summary area contains information such as control totals, balance totals, hash totals, etc.

- A summary area is not required in a transaction set *definition*.
- The use of any one segment in the summary area in any one instance of a transaction set is required only if (a) the summary area for the transaction set exists and (b) the segment has been designated as "mandatory" in that area.
- The entire summary area comprises a segment group, which is not repeated.

Each instance of a transaction set shall be considered the parent structure of the heading and summary areas that are enclosed within the boundaries of that transaction set.

5.5 Detail Areas of a Transaction Set

Detail Area
A detail area is any looping structure between the heading area and the summary area (or the SE, if no summary area exists). Detail areas encompass the actual body of the business transaction.

- There can be multiple detail areas in a transaction set definition.
- There is no requirement for a detail area in a transaction set definition.

- The use of any one detail area in any one transaction set instance is required only if the transaction set is designed to require at least one instance of the area.

Each instance of a transaction set, and the contents of its heading area, shall be considered the parent structure of any and all detail areas that follow the last segment of the heading area (or the ST segment if no heading area exists), and precede the first segment of the summary area (or the SE segment, if no summary area exists).

The summary area is NOT defined as a parent structure to the detail area.

5.6 Looping Structures Within an Area

Single Segment Repeat

Each segment in a transaction set is given an ordinal position assignment indicating its sequence within the transaction set relative to the other segments in that transaction set. Any individual segment may be repeated, in that same ordinal position, in a transaction set instance, if permitted by the transaction set design. However, the design should not allow repeat of the first segment in any loop (see below). If an individual segment is repeated in any one instance of a transaction set, and it is the first segment in a loop, a repeated occurrence of the segment indicates a new loop occurrence.

Segment Group

An ordered group of segments (more than one) within a transaction set is identified as a segment group. In the definition of a transaction set, segment groups are identified by the following: the entire transaction set; each area of the transaction set; the segments in an area not inside loops (see below) in that area; all of the segments of a loop or nested loop; and those segments in a loop not inside nested loops within that loop.

Loop

A segment group may be repeated in a transaction set instance, if permitted by the transaction set definition. Such an ordered group is called a loop. Note that each instance of a loop is a segment group.

Nested Loop

A loop may contain a loop. This condition is referred to as "nesting." In a transaction set definition, a loop whose first segment appears after the first segment of an immediately preceding loop, and whose last segment appears no later than the last segment of that preceding loop, is a nested loop within that preceding loop.

HL-initiated Loop

A looping structure in a transaction set definition may begin with an HL ("Hierarchical Level") data segment. When used in any transaction set instance, successive occurrences of the HL structure could indicate a parent-child relationship among the occurrences. The HL segment, therefore, allows the identification of an explicit nested loop in a transaction set. This nesting is not identified in the transaction set definition, but rather in the instance of the loop, in the data content in the HL segment. All semantic relationships that apply to nested loops will, then, apply equally to relationships between an HL-initiated parent loop and its HL-initiated child loops.

Loop Levels

For the purposes of this discussion, a loop which is nested within another loop is defined to be at a higher nesting level than the loop which nests it. The outermost loop is the lowest level loop; the innermost loop is the highest level loop.

- There are no limitations on the placement of loops. Looping structures may exist in any area of any transaction set.
- Transaction sets are defined to include a minimum number of occurrences of the loop. If the requirement designator of the loop's first segment is optional, the minimum number of occurrences of the loop is zero. If the requirement designator is mandatory, the minimum number of occurrences is one.
- Transaction sets are defined to include a specific maximum number of occurrences of the loop, or will be identified as having no maximum (>1).
- There is no limit to the level to which loops may be nested.

Each instance of an area shall be considered the parent structure of any looping structures enclosed within the boundaries (the first and last segments, per the transaction set definition) of that area.

Any loop that contains a nested loop shall be considered the parent structure of that nested loop.

5.7 Segments Within a Loop

Segments

Each instance of a loop (i.e., a segment group; note again that the header and summary areas are segment groups as well) contains one or more segments:

- Each segment within a loop structure is identified by its ordinal positioning within the complete transaction set definition. Each segment's order within the loop, relative to other segments within the loop, is defined by the sequential order of the ordinal positioning identifiers.
- The beginning segment of a loop defines an instance of a loop. For any instance of a transaction set, for any loop within any area of a transaction set, the first occurrence of the beginning segment of the loop (which must be present if any other segments in the loop are present) will identify the first instance of the loop, the second will identify the second instance, etc.

Each instance of a loop shall be considered the parent structure of any segments enclosed within the boundaries of that loop (the first and last segments, inclusive, of the loop, per the transaction set definition).

Each instance of a segment shall be considered the parent structure of any data elements used in that segment, as allowed by the segment definition.

5.8 Hierarchy of Semantic Levels

The following graph is a summary, hierarchical picture of the semantic levels outlined in the previous sections.

Note that "segment" has been identified as the bottom level, even though "data element" is certainly a level under segment. The semantic meaning of a data element or composite in relationship to the segment which contains it, and of data elements in relationship to a composite, is defined by X12.6, and will not be discussed further in this document.

Note also that the hierarchical flow of this graph applies equally to the cases of definition and instance of the standards. However, the level numbering in Figure 1 and the discussion about level numbering following it pertain to instances of EDI communications only.

Figure 5.1 - Semantic Levels in the Structure of EDI

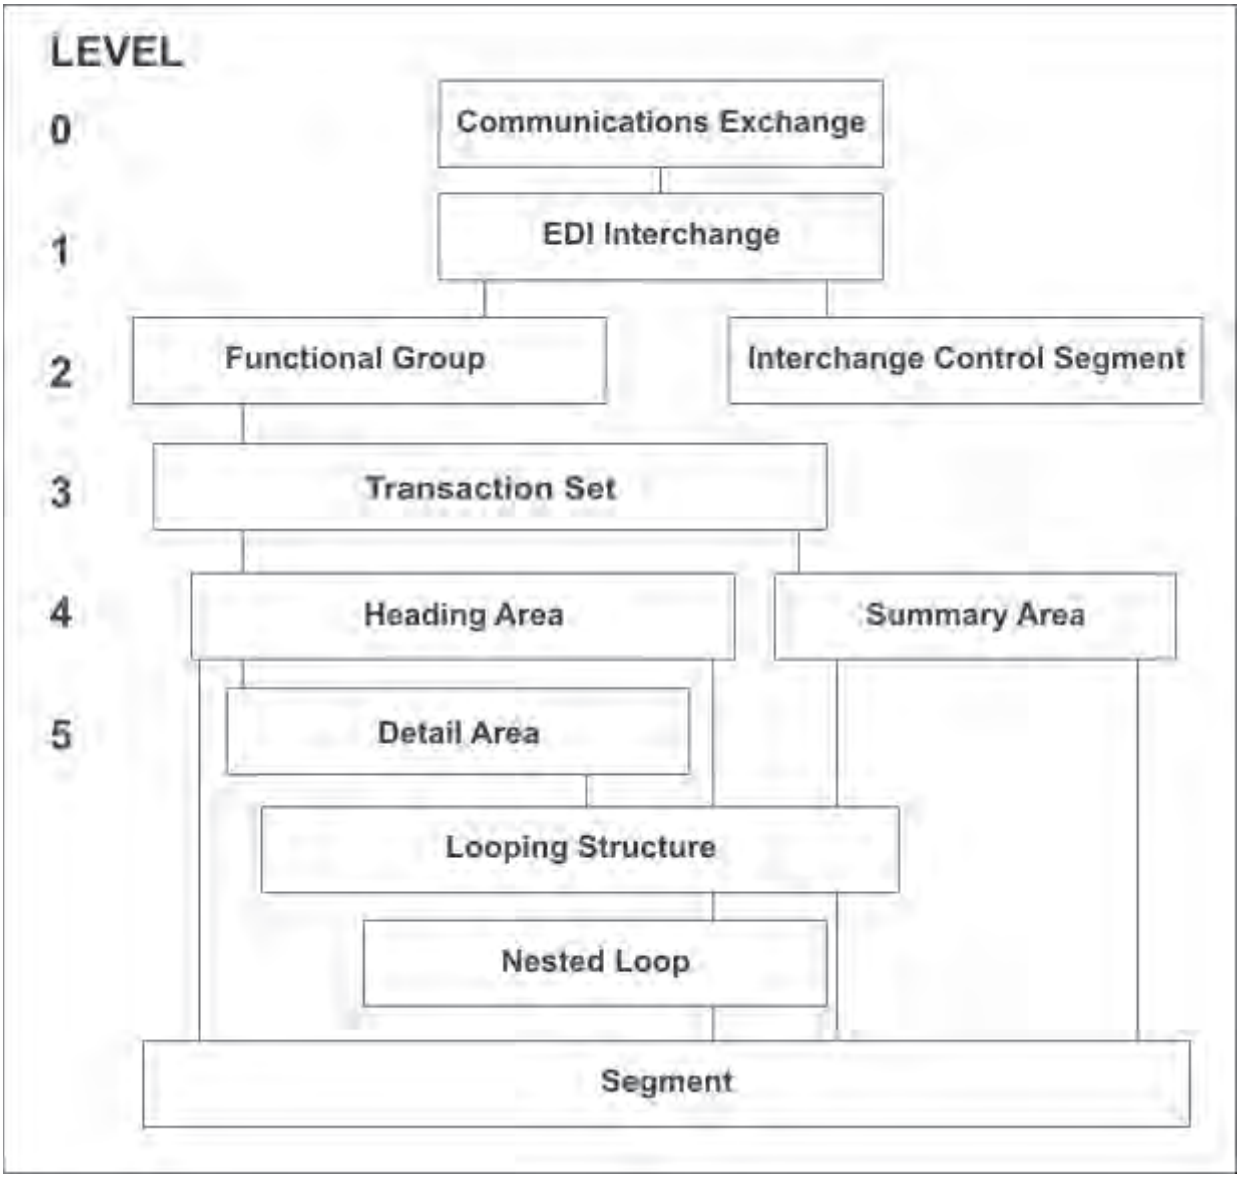

Figure 1 presents a level numbering system that is useful for the determination of parent-child and same-level relationships among semantic entities. Note that outermost layers are identified by lower numbers. While this may be counter-intuitive, it reflects the fact that there is no limit to the nesting of

loops at the innermost layers. So, the hierarchical level of the parent will be numerically lower than that of the child. To complete the numbering system, for any instance of a semantic entity within any one communications exchange, the following is noted:

- From levels 1 through 5, an instance of a semantic entity will be sub-indexed. For example, the first instance of an interchange within a communications exchange can be identified as entity 1.1, the second as 1.2, etc. (the ".1" an ".2" represent the sub-indexes). Similarly, the first instance of a detail area would be 5.1, the second 5.2, etc. Since only one heading area and one summary area are included in any transaction set, these levels are not sub-indexed.
- Below levels 4 and 5, instances of loops are identified by sub-indexing, within the semantic entity to which they belong, to the level at which they are nested. For example, the following level identifiers would pertain:

Figure 5.2 - Semantic Level Numbering Example

Level	Semantic Entity
4.1	**Heading Area**
	Beginning Segment(s)
4.1.1	Loop 1
	Loop 1 Segment(s)
4.1.2	Loop 2
	Loop 2 Segment(s)
5	**Detail Area**
5.1	Loop 1
	Loop 1 Single-Occurrence Segment(s)
5.1.1	Nested Loop 1
	Nested Loop 1 Segment(s)
5.1.2	Nested Loop 2
	Nested Loop 2 Segment(s)
5.2	Loop 2
	Loop 2 Single-Occurrence Segment(s)
5.2.1	Nested Loop 1
	Nested Loop 1 Segment(s)
5.2.2	Nested Loop 2
	Nested Loop 2 Segment(s)
4.2	**Summary Area**
	Summary Area Single-Occurrence Segment(s)
4.2.1	Loop 1
	Loop 1 Segment(s)

Note that, under this numbering scheme, level 4 is the combination of the header and summary areas, which are at the same level but distinct, so that any looping structure in one area is not a child structure to the other area.

The example leads to rules for identifying the hierarchical positioning among levels:

- If one semantic entity is a component of another, and the numerical value of the component entity's level is greater than that of the entity of which it is a component, the latter is a parent of the former. For example, each of the two semantic entities at level 4 (header and summary areas) will be a child of its corresponding semantic entity at level 3 (a transaction set). As another example, note that while the detail area (level 5) is a child of the header area at level 4.1, it is not a child of the summary area at level 4.2, because the detail area is considered a component of the header area, but not of the summary area.
- Two semantic entities are related in a parent-child structure if the numerical value of the subscripting of the two entities is the same, except that the latter has one more digit. For example, loop 5.1.1 is a child of loop 5.1. Conversely, loop 5.2.1 is not a child of loop 5.1.
- Two semantic entities are at the same level in an instance if they share the same subscripting up to the last digit. Thus, loops 5.1.1 and 5.1.2 above are at the same level. Conversely, note that there is no similar semantic level relationship between loops 5.1.1 and 5.2.1.

This, of course, does not apply to loops only. Two transaction sets in the same functional group would be identified as 3.1 and 3.2, for example, and therefore be at the same semantic level.

The discussion that follows identifies the rules governing the definition and instances of parent-child and same-level semantic entity relationships.

6. Relationships Between Semantic Levels

6.1 Belonging

The data contents of each parent structure are relevant to the data contents of the levels to which it is a parent. In this way, the instances of data content at one level belong to its parent structure.

EXAMPLES:

1. Inter-level Referencing

Each level in the EDI structure (other than the communications exchange; see the note above in describing that level) contains a unique referencing component between adjacent levels.

Interchange	Sender/Receiver Codes/IDs and Interchange Control Number
Functional Group	Sender/Receiver and Group Control Number
Transaction Set	Transaction Set Code and Control Number

Area	Table Designator
Loop	Loop Name
Segment	Segment Position Number

Each instance of data content at one level, therefore, can be referenced to its parent structure. Multiple instances at any one level, for the interchange, functional group, and transaction set levels, can be distinguished uniquely by their respective control numbers.

In addition, since the heading and summary areas can be uniquely identified within any one transaction set instance, their contents can share the unique reference of the transaction set.

However, in the case of multiple detail areas, and with respect to loops and segments, the transaction set *definition* must allow a means of uniquely identifying each instance. Examples are:

- The Payment Order/Remittance Advice Transaction Set (820) has two detail areas, which are distinguished by the loop names (ENT and TXP) that start each.
- The N1 loop starts with an N1 segment, the contents of which should be unique for every instance of its use.
- The LIN segment is often used to begin a detail area definition. This segment allows a unique "line item identification."

2. Transaction Set Areas
The definition of the heading area above has indicated that it maintains a scope of applicability over the entire detail area. A discount factor in the heading area would apply to each line item in the detail area. A discount factor for a specific line item in the detail area would apply to that line item only (note the issue on "functional equivalence" below).

6.2 Order Independence

There is no implied relationship among instances at the same level (two functional groups within the same envelope; two transaction sets within the same functional group, etc.).

Each instance of data content at one level is independent of any other instance of data content at the same level.

EXAMPLES:

1. Transaction Set Independence
Each transaction set instance in a functional group is a separate unit. The data contents in one cannot reference the data contents in another, except through explicit application data, such as a reference number. Such references are outside the scope of this standard.

2. Loop Independence
There is no semantic relationship implied in the order of instances of the same loop. Often, in the transmission of multiple detail line items, the sender would like to identify data content (e.g., a

discount factor) in the loop containing the first line item and have it apply to all subsequent line items. This is a violation of "order independence," since the data contents of the second loop are in no way referenced to the data contents of the first.

Note also that the standards are moot on the multiple use of "functionally equivalent" information in loop instances at the same level. For example, there is no specific prohibition for a sender to use the N1 loop twice, and identify a different "bill-to address" in each instance.

Such an occurrence may represent an error in the transaction, but it is also conceivable that there could be a trading partner agreement in which the duplication is understood. If a semantic note is provided that justifies such a duplication, the structure of any instance of the transaction set must reflect the meaning of the semantic note. Unless such an agreement is desirable, the transaction set definition should indicate semantic notes to eliminate or justify such conflicts.

3. Segment Independence in a Loop
All of the segments within a loop are semantically related to one another only in that they are of the same instance at the same level. However, there is no semantic content implied by the order of segments within the same level of a loop. Rearranging the order of segments within the same level does not alter the semantics.

This applies equally to the first segment in a loop, which is often assumed to have special meaning to the loop. This meaning must be explicitly stated in a semantic note to the transaction set for its meaning to be different from that of the other segments in the loop. The exception is when the loop begins with an HL segment, the content of which identifies the nesting level of each instance.

Note, though, that the first segment of a loop, however, is syntactically significant, in that its requirement designator determines the requirement of the loop, and it must be present if any other segments in the loop are present.

4. Multiple Detail Areas in the Transaction Set Definition
Each detail area shall be considered to be at the same semantic level. There is no precedence among detail areas.

6.3 "Functionally Equivalent Data" Override

When the data contents of a parent structure contain information that is perceived to be duplicated in the child structure, the data contents in the two areas are considered to be *functionally* equivalent. There are three distinct possibilities for an instance of functional equivalence.

Unqualified segment functional equivalence
In any transaction set instance, a segment will be considered functionally equivalent to a segment in its parent structure when:

- The two segments have the same segment identifier.
- No qualifier is required to identify the use of that segment uniquely.
- The maximum use of that particular segment is once in each structure.

Qualified segment functional equivalence
When the second requirement above is not the case (e.g., the N1 segment requires the "Entity ID

Code" to identify its use uniquely), the following set of conditions will identify a case of functional equivalence:

- The two segments have the same segment identifier.
- For that segment, a data element must exist that qualifies the entire segment.
- The two instances of the qualifying data element must be equal.
- The maximum use of that particular segment, with that particular qualifying data element, is once in each structure.

Loop functional equivalence
In order for an instance of a loop to be considered functionally equivalent to a loop in its parent structure, the following must be true:

- In the transaction set definition, each loop must have the same beginning segment..
- The instance of that loop in the child structure must begin with a segment that is functionally equivalent to the segment in the parent structure loop, whether qualified or unqualified.

Whenever functionally equivalent data are provided in a child structure instance, the data contents in the child structure will override (i.e., replace) the data contents in the parent structure. The over-ride is in effect for that child instance only.

Functional equivalence can be circumvented in a transaction set instance through the assignment of different code values in the (otherwise) functionally equivalent entities.

Also note, to generalize the point made earlier regarding loop ambiguity (see Section 6.2, example 2), that an instance of functionally equivalent data at the same level creates an ambiguity that cannot be resolved, except possibly by prior trading partner agreement.

EXAMPLES:

1. Heading and Detail Area "Contradiction"
The heading area often contains an N1 looping structure allowing for the identification of, for example, a delivery address to which all of the line items to be described in the detail area are to be delivered (i.e., "ship-to address").

If an N1 loop exists within the detail area, an instance of that loop may specify a delivery address different from that indicated in the heading area. In this case, the information content on that specific line item (to which that N1 loop applies) overrides the delivery address in the heading area. That is, the detail area ship-to address takes precedence.

There is one cautionary note about this example, however. Consider the following two segment instances:

N1*ST*.....
N1*BS*.....

The first of these indicates a "ship-to address" and the latter a "bill-to and ship-to address." The user might then assume that an occurrence of the second segment in a detail area would override an occurrence of the former in the heading area of the same transaction set.

This is NOT true in this case, however, because:

- A unique use of the N1 segment is identifiable only by both the N1 segment name and the first data element, the "Entity ID Code."
- The requirements for functional equivalence include equality in the use of the Entity ID Code, which is not the case here.

2. Summary and Detail Area "Contradiction"
By definition, information in the summary area is intended to summarize the information content in the detail area. As such, incompatibilities between the two areas would indicate an application-related error.

Further, information in the summary area has a semantically different relationship to the detail area from that in the heading area. That is, the scope of applicability of heading area information is on each of the line items (unless overridden at the line item level), while the scope of applicability of the summary area is on the totals derived from the detail area.

3. Heading and Summary Areas "Contradiction"
Therefore, there is no semantic contradiction (and thus there are no precedence rules) for seemingly "equivalent" information in the heading and summary areas. Any functional equivalencies between these two areas would represent an unacceptable transaction set definition.

6.4 Semantic Addressing

The first example in the previous section introduces a topic that is of considerable semantic importance in X12 transfers, that of naming and addressing.

- A *name* may be thought of as a label for a person or position (e.g., John F. Doe, President of XYZ Company, etc.). A name is independent of location.
- A *semantic address* is a set of attributes which usually describes the logical or physical location of the person or position. Examples are the traditional address on an envelope or a telephone number. Addresses are usually structured to provide sufficient information for identifying or locating the person or position (which may or may not be for routing purposes).

Much of the name and address information used in X12 is coded, with no distinction between a name and an address because the code encapsulates both. This standard, therefore, identifies name and semantic address information as a single concept, called *addressing*.

This section will identify and clarify the differences and relationships among four types of addressing within the structures of X12 transfers:

1. Business application
2. Internal identification
3. External routing
4. Data communications

6.4.1 Business Application Type—Within Transaction Sets

A number of different types of addressing can be transferred within instances of X12 transaction sets. Usually this information is provided in a segment group, frequently starting with the N1 data segment.

This segment group has provisions for qualifying the information to follow (e.g., "payer" or "ship-to address"), and a coded or full-text version of the addressing information itself. Through the qualifier, many different types of addressing may be provided, each serving a different business purpose.

All qualifications of business addressing are considered to be the same business application type, with no implied semantic relationship among different qualifications at the same instance level (note the N1 example in the section on functional equivalence).

However, semantic relationships can be inferred from qualifications at different levels. Each of the relationships among transaction set levels defined in the previous sections applies to business application addressing in the same way it applies to all other business information.

Business application information is conveyed from one business application to another (which may or may not be in the same organization).This business information is independent of the transfer method (e.g., printed matter, X12 transfer, voice calls to order entry clerks, etc.).

All business application addressing is included within the boundaries of a transaction set instance. There is no business application information in the addressing information at the functional group, interchange, or communications exchange level.

6.4.2 Internal Identification—Functional Group Level

Internal identification addressing information is carried as codes in the Application Sender's Code and the Application Receiver's Code control elements in the functional group header (GS segment). The values for these codes can be used for any routing internal to the organization, or any other identification purpose providing further information for trading partner record keeping.

There is no universal meaning to the data content of instances of those codes. For example, if an instance of the Application Receiver's Code contains the value "9876543", the internal identification could be a telephone number, a department (e.g., accounts payable), etc.

Because there is no universal meaning for these values, they can only be used for internal identification by the organization that understands their meaning. Meaning for particular values can be established by an individual organization, by trading partner agreements, or by industry groups.

Because of the internal nature of functional group addressing, there is no implied semantic relationship between instances of addressing at this level and that of the interchange and communications exchange levels (which are external routing levels).

Similarly, because this information has no universal meaning, there is no implied semantic relationship between instances of addressing at this level and that at the business application level (i.e., information within transaction sets).

Such relationships, if defined by trading partner agreements or by industry groups, would be outside the scope of the ASC X12 standards.

6.4.3 External Routing—EDI Interchange Level

Addressing information provided in the Interchange Sender ID and the Interchange Receiver ID of the Interchange Control Header (ISA control segment) is used for external routing.

In contrast to the functional group level, the values of instances of these control elements are qualified by the Interchange ID Qualified Code (e.g., a DUNS number, a phone number, the Standard Point Location Code, etc.). The values may then have universal meaning.

To restate the point in the previous section, addressing information provided at the EDI interchange level has no semantic relationship to addressing information at the functional group level.

Such a relationship, if defined by trading partner agreements or by industry groups, is outside the scope of ASC X12.

6.4.4 Data Communications—Communications Exchange Level

Addressing information in the interchange control header is usually not sufficient for delivery.

This information is typically mapped into a communications address for delivery, such as a modem telephone number, a CCITT X.121 address for a public data network, etc. This additional addressing information will depend on the particular data communications method being used.

Because of this close connection between the addressing at the data communications and interchange control levels, there is clearly a relationship that will have impact on proper processing (e.g., distribution, security, etc.).

For example, the receiver of an X12 logical communications exchange may determine that the interchange sender, as identified in the interchange level addressing information, is not authorized to send X12 information through the particular log-in channel that is (was) in use. This might be the case, for instance, when a VAN provides different log-in areas to indicate different distribution service levels.

Even so, such a relationship is not universal (since there are multiple, nonstandard mappings) and not part of the ASC X12 standards in any case. Therefore, there is no semantic content generated at the communications exchange level that is useful at any level inside the interchange.
