

**X12 Registered Standards Committee X12-04 Business to Anything (B2X)**  
**Virtual Meeting Minutes / Notes**  
**Thursday April 16,2020**  
**2:00 PM Eastern**

- Welcome, Introductions, Announcements
- B2X notice on supply chain
- X12 – Ransomware attack – March 29<sup>th</sup>
  - What happened
    - Web servers went offline. Three were hit and virtual data was not accessible.
    - Has not happened before.
  - Where it stands now
    - X12 is not going to pay ransom and validate their business module. FBI suspects that it came from an organized crime syndicate in eastern Europe. Netwalker?
    - X12 is rebuilding currently with new applications, AWS, structure, and security. Has been a long time coming and this made it fast track.
    - Single sign-on is working well. There are 5000-6000 new visitors a day.
    - Might be targeted because of the Healthcare business.
- Round Table discussion – COVID-19
  - What are you seeing?
    - Rise in documents for Grocery, fall in documents for Retail is possible
    - New York is bad right now but Pennsylvania is doing ok
    - Rise in cyber-attacks and phishing
      - Training and real-life simulations within the company helps reduce risks
      - What happened with Zoom was bad considering most people are home
    - Mars Wrigley worried about Halloween Candy Sales
      - Uncle Ben's Rice sales are high
    - Household staples are off the shelves so fast
  - Anything B2X can do to help?
    - Keep communications going because it is critical to Supply Chain especially for critical food and medicine.
- New Business
  - Draft coming
    - Must float through appropriate channels
  - Use of B2X Standards = Not talking about Ransomware incident
  - List of companies involved in B2X
    - Invitation to join us/support us
    - Working behind the scenes
    - Recruiting opportunity
- Wrap up
