

# ASC X12C COMMUNICATIONS AND CONTROLS SUBCOMMITTEE

## Meeting Minutes

**JUNE 13, 2019, 12 Noon — 1 PM EST**

**ATTENDANCE—11 people, 8 members**

Staff: Skip Sailors

### 1. Thursday, June 13, 12 Noon — 1 PM EST

#### 1.1. Administrative Issues

1.1.1. Summer Standing Meeting minutes and this meetings minutes will be posted in a week or two. They will then be available for review for ten days before being automatically approved if there are no corrections.

#### 1.2. Pending Actions of Other Groups

1.2.1. Waiting on other subcommittee decisions for the pending RFIs.

#### 1.3. Active Items

1.3.1. MR 018117 Creates a Clarification Paper (TR4) entitled “The ISX in Operation”

1.3.1.1. X12I said that they’d approve this MR if X12C changed the MR reason.

1.3.1.2. Approved without objection changing the MR reason from: "This DM was originally for a Type 4 Technical Report (TR4). It has become a new standard for a master code list referred to as X12.3C." to "This MR is for a Clarification Paper (TR4) entitled The ISX in Operation."

1.3.1.3. The Chair has received some minor change suggestions from X12N and X12F.

1.3.1.4. ISX03 name will be changed after the approval of this Clarification Paper to remove the reference to “Subrelease.”

1.3.1.5. ISX04 is currently undefined. It is used to indicate if there is an industry implementation. We may need to redefine that data element. The Chair will work with Steve Rosenberg to review it.

1.3.2. MR 004119 Modify the definition of I11

1.3.2.1. Approved without objection this revised definition: “Code specifying the version number of the interchange control segments, the version of the data elements within the control segments, and the code values within those data elements.”

- 1.3.3. New X12C MR, about how to report on bad data when it would cause a syntax error in a 999 or a TA1. Tina Martinez is going to draft a Clarification Paper, and then the Chair will create an MR for it.
- 1.3.4. [MR 008318](#) Modify the LS and LE segments Using a New Composite
  - 1.3.4.1. The solution has been revised to have the first data element in the LE and LS segments continue to be 447 Loop Identifier Code with the new composite, C072, being added as the second data element. Both fields would be conditional and mutually exclusive. An optional C072 data element has also been added to the AK3, CTX, and IK3 segments with a syntax note that 447 and C072 are mutually exclusive.
  - 1.3.4.2. The revised 447 description would now read: “The loop ID number given on the transaction set diagram or in an implementation guide is the value for this data element.”
- 1.3.5. X12C Constitution revisions.
  - 1.3.5.1. The Chair has updated the revised constitution based on comments received.
  - 1.3.5.2. The Maintaining Constituent Status section now reads: “X12C constituents who are absent from three consecutive X12C meetings will lose their constituent status at the conclusion of the third consecutive meeting for which they are absent.”
  - 1.3.5.3. Approved without objections to be sent to Policies and Procedures.

Meeting adjourned at 12:30 PM EST
