ASC X12J TECHNICAL ASSESSMENT SUBCOMMITTEE

Standing Meeting Minutes

AUGUST 5, 1-3 PM EDT

Attendance— 14 people, 13 members

Support: Steve & Kent

AUGUST 6, 1-3 PM EDT

Attendance— 14 people, 13members

1. Monday, August 5

1.1. Call to Order

1.2. Opening Remarks

1.3. Administrative Issues

    1.3.1. Membership Review

    1.3.2. Agenda approved unanimously.

    1.3.3. The "X12J Representative to PRB" Nominating Committee has nothing to report.

    1.3.4. Staff has posted the [rules for updating the Technical Report Library](#) of TR2s and TR3s in iMeet.

    1.3.5. Laurie Burckhardt has been accepted into X12J membership.

    1.3.6. Reviewed revisions to the X12J Constitution

        1.3.6.1. Global changes: Make all of the URLs a full http address, starting with Section 1.1.

        1.3.6.2. Global changes: Require that X12 members register interest as an X12J stakeholder, starting with Section 3.

        1.3.6.3. Re Section 3: Any Category 1 constituent can choose to be a Category 2 constituent temporarily.

        1.3.6.4. Section 3.1: Remove the phrase "In other words" from the sentence "In other words, each subcommittee shall have only one category 1 constituent vote and only one representative speaking for the subcommittee in any matter."

        1.3.6.5. Global changes, beginning with Section 3.2: Motion approved by a 6-5-1 vote. "X12J constituent status resides with the member and not the member representative."

        1.3.6.6. Section 3.3: Clarify the difference between a temporary reassignment and a permanent reassignment. A subcommittee can reassign their primary

representative at the beginning of a meeting by alerting the Chair, and this will be recorded in the minutes.

1.3.6.7. Section 3.4: Motion approved with one abstention: In 3.4 remove the word "representative" wherever it appears in the first sentence and the bullets. And add this sentence: "Prior constituents in good standing who change organizations and lose their constituent privilege may be granted constituent privilege upon a majority vote of the X12J membership."

1.3.6.8. Section 3.5: Note, but not a change to the constitution: If a stakeholder is absent from an interim meeting, X12J will alert the stakeholder that they will lose their constituent status if they miss one more interim meeting.

1.3.6.9. Section 7.3: Remove duty a. "Assuming the duties of the chair in the absence of the chair and vice chair." because the secretary is not a constituent of X12J. As has been previously done, the X12 Chair may appoint a convener of an X12J meeting in the absence of the chair and vice chair.

Meeting recessed at 3:30 p.m. EDT

2. Tuesday, August 6

2.1. Administrative Issues

2.1.1. Resumed review of the revisions to the X12J Constitution

2.1.1.1. Section 8.1.1: Change to read as "A nominating committee may be appointed by the chair to select candidates."

2.1.1.2. Section 8.1.2: Change to read as "Nominations will be opened during the first scheduled interim meeting following the Summer Standing meeting of each odd-numbered year."

2.1.1.3. Section 8.2: Change the first sentence to read: "Officer elections will be held during the first scheduled interim meeting following the Fall Standing meeting of each odd-numbered year and will be conducted in accordance with the provisions of this section."

2.1.1.4. The Constitution draft with the above-mentioned revisions will now go to the Policies & Procedures Committee.

2.1.2. The X12J meeting scheduled for Wednesday, August 7 has been cancelled.

2.2. Reviewed 2019-06 ASC-MR Voting Package

2.2.1. All six ballots receive 100% approval.

2.2.2. X12C will respond to the two approval comments on Ballot 1 MR 017117.

2.2.3. Staff will respond to the approval with comment on Ballot 2 MR 010318.

2.3. Unanimously approved as submitted all 18 of the CRMs in CMR Batch 97.

2.4. Reviewed New MRs

2.4.1. MR 011319 "Modify segment TD4 by adding elements, 1 new, others existing. Add 1 new element and 1 code." X12M is primary.

2.4.2. MR 012319 "Modify Data Element 1314 name and definition." X12N is primary.

2.4.3. MR 013319 "Modify Data Element 1315 name." X12N is primary.

2.4.4. MR 014319 "Modify Data Element 1352 name." X12N is primary.

2.4.5. MR 015319 "Modify code description in DE 1774, value 4." X12N is primary.

2.4.6. MR 016319 "Modify data element 1352 definition." X12N is primary.

2.4.7. MR 017319 "Create a new TR3 for set 897." X12M is primary.

2.4.8. MR 018319 "Modify set 271 adding an STC segment." X12N is primary.

2.5. Reviewed Administrative MRs

2.5.1. ADM 193 "Administrative MR changing Code Source information."

2.6. Reviewed Report Back.

2.6.1. No MR status changes from any subcommittee.

2.6.2. X12C will have new output for MRs 018117 and 008318 after its August meeting.

Meeting adjourned at 3:30 p.m. EDT

2.1 CURRENT MAINTENANCE REQUESTS FOR INITIAL BALLOT

Table 1 lists those MRs included in this report which are approved for ballot to the X12 Committee by the ASC X12 Procedures Review Board at the most recent ASC X12 meeting. MRs are shown in sequential order. The MR number is followed by a page number in Section 3 where the MR can be found.

None

2.2 CURRENT MAINTENANCE REQUESTS FOR SECOND BALLOT

Table 2 lists those items prepared for a Second Ballot included in this report. Only X12 members who voted on the item during its initial ballot period receive this material. The MR number is followed by a page number in Section 3 where the MR can be found.

None

2.3 SUBCOMMITTEE INDEX

Table 3 organizes MRs included in this report according to the X12 subcommittee(s) to which the MR has been referred. All open items are shown. Subcommittees are listed alphabetically by letter designation (X12C, X12F, etc.). A MR may be referred to more than one subcommittee. The MR number is followed by a page number in Section 3 where the MR can be found. Page numbers are consecutive throughout this volume.

MR# **012104**

Create a new TR3 for Health Care Provider Information based on 007030.

Status: DEFERRED
Submitter: GAIL KOCHER
Company: HIGHMARK, INC.
Subcommittees: N

Reason For Change

The Health Care Provider Information Implementation Guide (X206) describes the use of the Provider Information (274) based on 006020 for the following business usages:
- Send an application for membership to a health care entity
- Send registration information to a health care entity
- Send a health care entity's limited response to the health care provider

Trading partners include, but are not limited to:
- Hospitals
- Physicians
- Health care payers, such as insurance companies, HMOs, and PPO's
- State and Federal programs, such as Medicare, Medicaid, and TRICARE (CHAMPUS)

Proposed work: Create a new TR3 for Health Care Provider Information based on 6020.

MR# 014104

Create a new TR3 for Health Care Provider Directory based on 007030.

Status: DEFERRED

Submitter: GAIL KOCHER

Company: HIGHMARK, INC.

Subcommittees: N

Reason For Change

The Health Care Provider Directory Implementation Guide (X207) describes the use of the ANSI ASC X12 Provider Information (274) transaction set, version 006020 for the following business usage:
-Transmit provider directory information.

Trading partners include but are not limited to:
- Hospitals
- Dentists
- Physicians
- National Provider System
- Employers
- Health Care payers, such as insurance companies, HMOs, PPOs
- State and Federal Programs, such as Medicare, Medicaid and TRICARE (CHAMPUS)

Exceptions:
The use of the Health Care Provider Directory Implementation Guide is limited to directory information about a health care provider and does not include all information for use in:
- Provider credentialing
- Provider application
- Other business functions

Proposed work:
Create a new TR3 for Health Care Provider Directory.

Create a new TR3 for Provider Enrollment for EDI Services.

Status: DEFERRED

Submitter: BETTY LENGYEL-GOMEZ

Company: ZIRMED, INC.

Subcommittees: N

Reason For Change

Creates new TR3: Provider Enrollment for EDI Services - 006020X305

The Provider Enrollment for EDI Services Technical Report Type 3 describes the use of the ASC X12 Trading Partner Profile (838) transaction set, version 0006020 for the following business usage:

- Request and respond to requests for enrollment to conduct electronic data interchange services (including but not limited to the exchange of transactions mandated under HIPAA), as well as to update provider or agent information.
- The Provider Enrollment for EDI Services will facilitate the transition when trading partners move from paper to electronic services.

Trading partners may include but are not limited to:
- Providers, e.g. clinicians, laboratories, pharmacies, facilities
- Health Plans
- Agents, e.g. clearinghouses, billing services

Create a new TR3: Payroll Deducted and Other Group Premium Payment for Insurance Products

Status: DEFERRED

Submitter: ASC X12N

Company: ASC X12

Subcommittees: F N

Reason For Change

The Payroll Deducted and Other Group Premium Payment for Insurance Products Implementation Guide describes the use of the ASC X12 Payment Order/Remittance Advice (820) transaction set for the following business usage:
-Transmit payroll deducted premiums for a wide variety of insurance products, to include life, health, property and casualty, and disability.
-This guide was also designed for health care premium payments between federal and state governments, government agencies, and private industry.

This TR3 has been assigned: 007030X334

Trading partners include:
-Insurance companies
-Third-party administrators
-Payroll service providers
-Internal payroll departments

Predecessors
-Payroll Deducted and Other Group Premium Payment for Insurance Products (004010X061)

Create a new TR3: Implementation Acknowledgment for Health Care Insurance

Status: DEFERRED
Submitter: ASC X12N
Company: ASC X12
Subcommittees: C N

Reason For Change

Implementation Acknowledgment for Health Care Insurance is to provide standardized data content and structure to users of the ASC X12 999 Implementation Acknowledgment transaction set for the health care industry. This 999 is not limited to only Implementation Guide (IG) errors. It can report standard syntax errors, as well as IG errors.

This TR3 has been assigned: 007030X335

Trading partners include:
Senders of health care insurance X12 transaction sets. Receivers of health care insurance X12 transaction sets.

Predecessors
-Implementation Acknowledgment for Health Care Insurance (005010X231)
-Implementation Acknowledgment for Health Care Insurance (006020X290)

MR# 041316

Create a new TR2 to provide explanation, and where necessary, identify requirements that must be supported when a conducting transaction set exchanges involving the Health Care Eligibility, Coverage, or Benefit Inquiry (270) and Health Care Eligibility, Coverage, or Benefit Information (271) transaction sets.

Status: DEFERRED
Submitter: DONNA CAMPBELL
Company: HEALTH CARE SERVICE CORPORATION
Subcommittees: I N

Reason For Change

Currently a TR3 contains all codes sets for service type codes, AAA Error reason codes and Insurance Produce codes. Recently these codes have been externalized and therefore a TR2 is needed to provide usage around the code values for each type.

AUGUST 2019
MR 003117 is deferred in X12F and X12M. X12M is Primary.

MR# **004117**

Creates a new TR3 for Application Advice based on 004010.

Status: DEFERRED
Submitter: STEVE ROSENBERG
Company: GS1 US
Subcommittees: F M

Reason For Change

X12 and the Aerospace Industry Association (AIA) are jointly developing X12 technical reports describing aerospace industry use of various ASC X12 transactions.

This TR3 defines consistent requirements for use of the X12 824 transaction set within the aerospace industry for application advice.

This DM supports Project Proposal 2016-09-27:2

MR# **018117**

Create a new Clarification Paper concerning the ISX segment, modify some aspects of the ISX.

Status: DEFERRED
Submitter: JIM TAYLOR
Company: MarineNET, LLC
Subcommittees: C F I M N

Reason For Change

This MR is for a Clarification Paper (TR4) entitled The ISX in Operation, modify the definition of I72 and semantic notes on ISX03 and ISX04.

Action Summary

DATA SEGMENTS

Adds note(s) to segment ISX. Changes note(s) in segment ISX.

SIMPLE DATA ELEMENTS

Changes purpose of simple data element I72.

Impact Summary

ISX   91

SIMPLE DATA ELEMENTS/PAGE NUMBER

I72   115

Development History

OCTOBER 2016

DM 018117 has been deferred in X12C, X12I, X12M and X12N, X12C is primary.

DECEMBER 2016

DM 018117 has been deferred in X12C, X12I, X12M and X12N, X12C is primary.

FEBRUARY 2017

DM 018117 has been deferred in X12C, X12I, X12M and X12N, X12C is primary

APRIL 2017

DM 018117 has been deferred in X12C, X12I, X12M and X12N, X12C is primary

JUNE 2017

DM 018117 has been deferred in X12C, X12I, X12M and X12N, X12C is primary

AUGUST 2017

DM 018117 has been deferred in X12C, X12I, X12M and X12N, X12C is primary

OCTOBER 2017

DM 018117 has been deferred in X12C, X12I, X12M and X12N, X12C is primary.

DECEMBER 2017

DM 018117 has been deferred in X12C, X12I, X12M and X12N, X12C is primary.

JANUARY 2018

DM 018117 has been deferred in X12C, X12I, X12M and X12N, X12C is primary.

APRIL 2018

DM 018117 has been deferred in X12C, X12I, X12M and X12N, X12C is primary.

JUNE 2018

DM 018117 has been deferred in X12I and X12M and approved in X12C and X12N. X12C is primary.

AUGUST 2018

DM 018117 is deferred in X12F, X12I, and X12M and approved in X12C and X12N. X12C is Primary.

OCTOBER 2018

DM 018117 is deferred in X12F and X12I and approved in X12C, X12M and X12N. X12C is Primary.

DECEMBER 2018

DM 018117 is deferred in X12F and X12I and approved in X12C, X12M and X12N. X12C is Primary.

JANUARY 2019

MR 018117 is deferred in X12F and X12I and approved in X12C, X12M and X12N. X12C is Primary.

APRIL 2019

MR 018117 is deferred in X12C, X12F, X12I, X12M, and X12N. X12C is Primary.

JUNE 2019

MR 018117 is deferred in X12F, X12I, and X12M. X12C and X12N are approved. X12I has asked X12C to modify the Reason for Change. X12C is Primary.

AUGUST 2019

MR 018117 is deferred in X12C, X12F, X12I, X12M, and X12N. X12C and X12N were approved, but X12C made changes based on input from other subcommittees. X12C is Primary.

MR# 007218

Creates a new TR3 for Ship Notice/Manifest based on 004010.

Status: DEFERRED

Submitter: STEVE ROSENBERG

Company: GS1 US

Subcommittees: M

Reason For Change

X12 and the Aerospace Industry Association (AIA) are jointly developing X12 technical reports describing aerospace industry use of various ASC X12 transactions.

This TR3 defines consistent requirements for use of the X12 856 transaction set within the aerospace industry for ship notice/manifest..

This DM supports Project Proposal 2016-09-27:11

Development History

AUGUST 2018

DM 007218 has been deferred in X12M and X12I. X12M is Primary.

OCTOBER 2018

DM 007218 has been deferred in X12M. X12I withdrew interest. X12M is Primary.

DECEMBER 2018

DM 007218 has been deferred in X12M. X12M is Primary.

APRIL 2019

DM 007218 has been deferred in X12M. X12M is Primary.

JUNE 2019

DM 007218 has been deferred in X12M. X12M is Primary.

AUGUST 2019

DM 007218 has been deferred in X12M. X12M is Primary.

MR# **008318**

Modify the name and definition of DE 447. This MR supports WR 00928.

Status: DEFERRED
Submitter: ASC X12C
Company: X12C
Subcommittees: C I M N

Reason For Change

The definition for DE 447 reads in part: "in segments LS and LE" but that only applies to bounded loops. The case for unbounded loops also applies. Additionally, the name of the element has the word code at the end, but it isn't really an internal code.

Intended Use:
Segment(s): LS, LE
Data Element(s): 447

Proposed Work:
Change the name of the element to Loop Identifier from Loop Identifier Code. Change the definition from: "The loop ID number given on the transaction set diagram is the value for this data element in segments LS and LE" to "The loop ID number given on the transaction set diagram is the value for this data element."

Action Summary

DATA SEGMENTS

Adds data element(s) to segments AK3, CTX, IK3, LE and LS. Changes requirement designator(s) in segments AK3, CTX, IK3, LE and LS. Adds note(s) to segments AK3, CTX, IK3, LE and LS.

COMPOSITES

Creates composite C072.

SIMPLE DATA ELEMENTS

Creates simple data elements 1817 and 1818. Changes name of simple data element 447. Changes purpose of simple data element 447.

Impact Summary

DATA SEGMENTS/PAGE NUMBER

| AK3 .... 90 | CTX .... 90 | IK3 .... 90 | LE .... 91 | LS .... 91 |

COMPOSITE DATA ELEMENTS/PAGE NUMBER

C072 94

SIMPLE DATA ELEMENTS/PAGE NUMBER

| 447 ..... 97 | 1817 ..... 100 | 1818 ..... 100 |

Development History

OCTOBER 2018

DM 008318 has been deferred in X12C, X12I, X12M and X12N, X12C is primary.

DECEMBER 2018

DM 008318 has been deferred in X12I, X12M, and X12N. X12C is approved. X12C is primary.

JANUARY 2019

DM 008318 has been deferred in X12I, X12M, and X12N. X12C is approved. X12C is primary.
APRIL 2019

DM 008318 has been deferred in X12C, X12I, X12M and X12N, X12C is primary.

JUNE 2019

DM 008318 has been deferred in X12N. X12C and X12M have approved. X12I has disapproved. X12C is primary.

AUGUST 2019

DM 008318 has been deferred in X12N. X12C and X12M have approved. X12I has disapproved. X12C is primary.

MR# **010318**

Modify the code source entry for CS: 51. This MR supports WR 00943.

Status: DM APPROVED FOR PUBLICATION AT SUMMER X12 MEETING

Submitter: X12N INSURANCE

Company: X12N/TGC/WG4

Subcommittees: F I J N

Reason For Change

Referenced zip code list is no longer valid and supported by the postal service

Intended Use: Code Source: 51

Proposed Work:
Change the 'Source' To: ZIP Code Directory

Change the 'Available from' To:
U.S. Postal Service
Washington, DC 20260
https://www.usps.com/

Change 'Abstract' to:
The ZIP Code is a geographic identifier of areas within the United States and its territories for purposes of expediting mail distribution by the U.S. Postal Service.

Action Summary

CODE SOURCE

Changes "source" of code source 51. Changes "available from" of code source 51. Changes "abstract" of code source 51.

Impact Summary

CODE SOURCES/PAGE NUMBER

51 116

Development History

OCTOBER 2018

DM 010318 has been deferred in X12J, X12F, X12I, and X12N. X12J is Primary.

DECEMBER 2018

DM 010318 has been deferred in X12J, X12F, X12I, and X12N. X12J is Primary.

JANUARY 2019

MR 010318 has been deferred in X12F. X12I, X12J, and X12N are approved. X12J is Primary.

APRIL 2019

MR 010318 has been approved for June 30-day ballot.

AUGUST 2019

MR 010318 has been approved for publication.

MR# 011318

Create new TR3 for Transaction Set 274 in version 007030. This MR supports WR 00944..

Status: DEFERRED

Submitter: X12N INSURANCE

Company: X12N/TGC/WG4

Subcommittees: N

Reason For Change

The transaction will be used to support submission of an application to join a provider organization or provider network such as, but not limited to, a hospital, preferred provider organization (PPO) or health maintenance organization (HMO); and/or verification of credentials such as educational/professional qualifications, licenses, and malpractice coverage/history.

Intended Use:
TR3

Proposed Work:
Create new 274 TR3.

Action Summary

Development History

OCTOBER 2018

DM 011318 is deferred in X12N.

DECEMBER 2018

DM 011318 is deferred in X12N.

JANUARY 2019

MR 011318 is deferred in X12N.

APRIL 2019

MR 011318 is deferred in X12N.

JUNE 2019

MR 011318 is deferred in X12N.

AUGUST 2019

MR 011318 is deferred in X12N.

MR# 002119

Create a new Segment, Composite Data Element, Simple Data Element, and Code Sources. This MR supports WR00959.

Status: DM APPROVED FOR PUBLICATION AT SUMMER X12 MEETING

Submitter: ZUBAIR NAZIR

Company: GS1 CANADA

Subcommittees: C I N

Reason For Change

The Beverage Alcohol Industry needs Detailed Alcohol Beverages attributes to support:
- Beverages classification
- Composition description of the alcohol product
- Additional Packaging List of options, or enforcement for some logistics attributes
- Certifications and claims that are applicable to Alcohol products, or to other commodities
- Additional Origin set of attributes to describe the origin of Alcohol Product

The above supports the following processes:
- Listing, data synchronization
- Commerce
- Stewardship
- Customs

As well as assisting customers in their buying decision

Intended Use:
Transaction Set: 832, 897
Segments: TBD
Composites: TBD
Data Elements: TBD
Code Sources: TBD

Action Summary

TRANSACTION SETS

Adds segment(s) to transaction set 832. Deletes segment(s) from transaction set 832.

DATA SEGMENTS

Creates segments BER, BVI, COI, SPT and WIN.

COMPOSITES

Creates composites C073, C074 and C075.

SIMPLE DATA ELEMENTS

Creates simple data elements 1819, 1820, 1821, 1822, 1823, 1824, 1825, 1826, 1827, 1828, 1829, 1830, 1831, 1832 and 1833. Adds code(s) to simple data elements 235, 355, 363, 738, 1321 and 1798. Adds code explanation(s) to simple data elements 235, 355, 363, 1321 and 1798.

CODE SOURCE

Creates code source 987. Adds reference(s) to code source 5.

Impact Summary

DM 002119 has been approved for publication.

MR# C18709

Add code AD meaning Presumptive Medicaid to DE 1390. This MR supports CMR # 001870.

Status: DEFERRED

Submitter: CASEY ISAAC

Company: HEALTHFUND SOLUTIONS

Subcommittees: N

Reason For Change

Looking to adding an Eligibility status for presumptive Medicaid eligibility, since this eligibility is eligible until the complete Medicaid app is completed we need a different eligibility code to go with those accounts.

INTENDED USE:
Transaction Set(s): 271
Segment(s): EB
Composite Data Element(s):
Data Element(s): 1390
Code Source(s):
Other:

PROPOSED WORK:
Data Element 1390
Add code AD, "Presumptive Medicaid "

Action Summary

SIMPLE DATA ELEMENTS
Adds code(s) to simple data element 1390.

Impact Summary

SIMPLE DATA ELEMENTS/PAGE NUMBER

  1390 100

Development History

JANUARY 2019

MR C18709 is deferred in X12N. X12N is Primary.

APRIL 2019

MR C18709 is deferred in X12N. X12N is Primary.

JUNE 2019

MR C18709 is deferred in X12N. X12N is Primary.

AUGUST 2019

MR C18709 is deferred in X12N. X12N is Primary.

MR# 003119

Modify the BNF in section 4.4.4 in X12.5. This MR supports WR00961.

Status: DEFERRED

Submitter: ASC X12C

Company: X12C

Subcommittees: C F I M N

Reason For Change

Recently approved MR 049107 added two elements to the ISX segment. X12.5 needs to have BNF added for those elements.

Intended Use:
X12.5

Proposed Work:
Modify the first row and add two rows to the table in section 4.4.4 Interchange Syntax Extension (ISX) as follows:

First row becomes:
<inter_syntax_extensions> ::= ISX <gs> <rc> <gs> <character_encoding> <gs> <overriding_x12_version> <gs> <industry_identifier> <tr>

Added rows:
<overriding_x12_version> ::= <id>
<industry_identifier> ::= <string>

Development History

APRIL 2019

DM 003119 has been deferred in X12C, X12F, X12I, X12M, and X12N. X12C is primary.

JUNE 2019

DM 003119 has been approved in X12C, X12I, X12N and X12M. It is deferred in X12F. X12C is primary.

AUGUST 2019

DM 003119 has been approved in X12C, X12I, X12N and X12M. It is deferred in X12F. X12C is primary.

MR# 004119

Modify the definition of I11. This MR supports WR00962.

Status: DEFERRED
Submitter: ASC X12C
Company: X12C
Subcommittees: C F I M

Reason For Change

Based on the current definition of I11 it could be interpreted that only the version of the segments is controlled. However, it has been common practice that I11 controls the version of the control segments, the version of the data elements within the control segments, and the code values within those data elements.

Indended Use:
Data Element: I11

Proposed Work:
Modify the definition of I11 to:

Code specifying the version number of the interchange control segments, the version of the data elements within the control segments, and the code values within those data elements.

Action Summary

MR# 008219

Disconnect CS 229 from DE 1270, Code DR.   This MR supports WR 00964.

Status: DM APPROVED FOR PUBLICATION AT SUMMER X12 MEETING

Submitter: KELLY BUTLER

Company: AETNA

Subcommittees: N

Reason For Change

Code Source 229 is obsolete. There are multiple DRG types in existence now with their own code values and code sources.

Intended Use:
Data Element(s): 1270
Code Source(s): 229

Action Summary

CODE SOURCE

Deletes reference(s) to code source 229.

Impact Summary

CODE SOURCES/PAGE NUMBER

  229 117

Development History

JUNE 2019

MR 008219 has been approved with modification for June 30-day ballot.

AUGUST 2019

MR 008219 has been approved for publication.

MR# 009219

Modify the length of DE225. This MR supports WR 00965.

Status: DM APPROVED FOR PUBLICATION AT SUMMER X12 MEETING

Submitter: CHRISTOPHER HIGHT

Company: RAILINC

Subcommittees: I

Reason For Change

Majority of industry participants do not currently enforce the 2 character minimum for DE225. This negatively impacts those that do, and as a result unnecessarily reject some transactions

Intended Use:
Transaction Set(s): Mult.
Segment(s): M7
Data Element(s): 225

Proposed Work:
Proposal is to change DE225 attributes from 2/15 to 1/15.

Action Summary

SIMPLE DATA ELEMENTS

Changes minimum of simple data element 225.

JUNE 2019

MR 009219 has been approved with modification for June 30-day ballot.

AUGUST 2019

MR 009219 has been approved for publication.

MR# 010219

Change the defintion of code HS in DE 1336 and add a new code. This MR supports WR 00965.

Status: DM APPROVED FOR PUBLICATION AT SUMMER X12 MEETING

Submitter: ASC X12J

Company: X12J

Subcommittees: N

Reason For Change

A code was inadvertently overwritten between 007010 and 007020. In 007010, DE 1336, code HS was "Special Low Income Medicare Beneficiary" with this extended definition: "An individual eligible for Medicare for whom Medicaid pays only Medicare premiums". In 007020, DE 1336, code HS became "Health Insurance Exchange (HIX) Silver " with the same extended definition.

CMR 001419 asked for a new code value in DE 1390 of "Eligibility or Benefit Information Code" and requested value HS meaning "Health Insurance Exchange (HIX) Silver." During the CMR discussion this comment was submitted: "This code request is identifying an insurance plan type which is one of the plan levels that is part of the new health care exchange. I think this new code should be added to data element 1336, Insurance Type Code." There was an extended discussion.

Intended Use:
Segment(s): EQ

Change HS in 1336 back to the 007010 definition. Add a new code for the current definition.

Action Summary

SIMPLE DATA ELEMENTS

Adds code(s) to simple data element 1336. Changes code(s) in simple data element 1336.

Modify code description in DE 1774, value 4. This MR supports WR 00978.

Status: DEFERRED
Submitter: JOEL PRATER
Company: BLUE SHIELD OF CALIFORNIA
Subcommittees: N

Reason For Change

Align with UB manual.

Intended use:
Data element: 1774

Proposed work:
Modify Code Description for Code Value 4 on DE 1774 as follows:

From:
Client Has Temporary Medicaid

To:
Subscriber has Temporary Medicaid

Action Summary

Not Applicable

Impact Summary

Not Applicable

Development History

AUGUST 2019

MR 015319 has been deferred in X12N. X12N is primary.

MR# **016319**

Modify data element 1352 definition. This MR supports WR 00981.

Status: DEFERRED
Submitter: JOEL PRATER
Company: BLUE SHIELD OF CALIFORNIA
Subcommittees: N

Reason For Change

Align with UB manual

Intended use:
Data element: 1352

Proposed work:
Modify Data Element 1352 Description as follows:

From:
Code indicating patient status as of the "statement covers through date"

To:
A code indicating the disposition or discharge status of the patient as of the discharge date.

Action Summary

SIMPLE DATA ELEMENTS
Changes purpose of simple data element 1352.

Impact Summary

SIMPLE DATA ELEMENTS/PAGE NUMBER

  1352   99

Development History

AUGUST 2019

MR 016319 has been deferred in X12N. X12N is primary.

MR# 017319

Create a new TR3 for set 897. This MR supports WR 00982.

Status: DEFERRED

Submitter: ASC X12M

Company: X12M

Subcommittees: M

Reason For Change

To provide guidance to the X12 community on business scenarios supported by the 897 Data Synchronization transaction set.

Intended use:
Set: 897

Proposed work:
Create a new TR3: 897 Data Synchronization Transaction - Cleaning Products

Action Summary

Not Applicable

Impact Summary

Not Applicable

Development History

AUGUST 2019

MR 017319 has been deferred in X12M. X12M is primary.

MR# 018319

Modify set 271 adding an STC segment. This MR supports WR 00983.

Status: DEFERRED

Submitter: LUANN HETHERINGTON

Company: HIGHMARK, INC.

Subcommittees: N

Reason For Change

While a submitter is requesting eligibility and benefit information for a patient using the eligibility and benefit inquiry (270), allow the payer the opportunity to identify required clinical information for prior authorization; if applicable in the eligibility and benefit response (271).

Intended Use:
Set: 271
Segment: STC

Proposed work:
This MR is to add an STC segment after the EB segment to the 271 for the purpose of identifying clinical information to support the code value found in EB16, DE 1796 Health Care Services Review Requirement Code. For example, this would allow a payer to identify clinical information (using LOINC in the STC segment) necessary for approval of a prior authorization as part of the eligibility response. The submitter of the prior authorization request could submit this information using the 278 request with an attached 275 transaction containing the requested clinical information.

Action Summary

TRANSACTION SETS
Adds segment(s) to transaction set 271.

Impact Summary

TRANSACTION SETS/PAGE NUMBER

271 83

Development History

AUGUST 2019

DM 018319 has been deferred in X12N. X12N is primary.

MR# ## ADM193

Administrative MR changing Code Source information.

Status: DM APPROVED FOR PUBLICATION AT SUMMER X12 MEETING

Submitter: X12 Staff

Company: X12J

Subcommittees: J

Reason For Change

Several Maintenance Requests submitted during and after the Summer 2019 Standing Meeting don't require the full X12 process and are summarized in this Administrative MR.

WR00968: Update code source 231 to correct address for NUBC and to update name to match current name for code source

WR00970: Update code source name and address to align with current name and NUBC address.

WR00971: Update name and address for Patient Status Code (Code list 239) to align with current name and address for NUBC

WR00972: Synchronize with NCPDP's description of the NCPDP Pharmacy Number.

WR00975: Modify Code Source 239 Name. This was not entered, it is a duplicate of WR00971.

WR00976: Modify Code Source 132 Available From.

WR00977: Modify Code Source 235 Available From.

WR00979: Modify Code Source 236 Available From.

WR00980: Modify Code Source 959 Source

Action Summary

CODE SOURCE

Changes name of code sources 230, 231 and 239. Changes "source" of code source 959. Changes "available from" of code sources 132, 230, 231, 235, 236, 239 and 959. Changes "abstract" of code source 307.

Impact Summary

CODE SOURCES/PAGE NUMBER

132 116	230 117	231 117	235 117	236 117
239 117	307 118	959 118		

Development History

AUGUST 2019

MR ADM193 approved for publication.

MR# ## C18729

Add code SM meaning SAMMI -- System for Award Management Managed Identifier to DE 66. This MR supports CMR # 001872.

Status: DM APPROVED FOR PUBLICATION AT SUMMER X12 MEETING

Submitter: FRANK NAPOLI

Company: LOGISTICS MANAGEMENT INSTITUTE

Subcommittees: J

Reason For Change

DoD is retiring the DUNS (and DUNS +4) entity identifiers; They will be replaced by the SAMMI (System for Award Management (SAM) Managed Identifier). This request positions DoD so that when the SAMMI is approved for use, the code will be in the EDI standard.

INTENDED USE:
Transaction Set(s): 856
Segment(s): N1
Composite Data Element(s):
Data Element(s): 66

Action Summary

SIMPLE DATA ELEMENTS
Adds code(s) to simple data element 66.

Impact Summary

271 Eligibility, Coverage or Benefit Information

FUNCTIONAL GROUP=**HB**

This X12 Transaction Set contains the format and establishes the data contents of the Eligibility, Coverage or Benefit Information Transaction Set (271) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to communicate information about or changes to eligibility, coverage or benefits from information sources (such as - insurers, sponsors, payors) to information receivers (such as - physicians, hospitals, repair facilities, third party administrators, governmental agencies). This information includes but is not limited to: benefit status, explanation of benefits, coverages, dependent coverage level, effective dates, amounts for co-insurance, co-pays, deductibles, exclusions and limitations.

Adds segment to table/position 2/1310.	D	018319

NOTES

2/0200 If the Eligibility, Coverage or Benefit Inquiry Transaction Set (270) includes a TRN segment, then the Eligibility, Coverage or Benefit Information Transaction Set (271) must return the trace number identified in the TRN segment.

832 Price/Sales Catalog

FUNCTIONAL GROUP=SC

This X12 Transaction Set contains the format and establishes the data contents of the Price/Sales Catalog Transaction Set (832) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to furnishing or requesting the price of goods or services in the form of a catalog.

NOTE	POS.NO.	SEG.ID	NAME	REQ.DES.	MAX USE	LOOP REPEAT
N	0100	CTT	Transaction Totals	O	1	
	0200	SE	Transaction Set Trailer	M	1	

Adds segment to table/positions 2/0810, 2/0812, 2/2980, 2/2982, 2/2984 and 2/2986. Deletes segment from table/position 2/1684 (YNQ).	4	002119

NOTES

2/0150   If BCT10 is used and G5301 is used, then the G5301 takes precedence.

3/0100   Number of line items (CTT01) is the accumulation of the number of LIN segments. Hash total (CTT02) is not used in this transaction.

AK3 Data Segment Note

To report errors in a data segment and identify the location of the data segment

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN:

997

REF	ELE ID	NAME	RPT	ATTRIBUTES
01	721	Segment ID Code	M	ID 2/3
02	719	Segment Position in Transaction Set	M	N0 1/10
03	447	Loop Identifier	X	AN 1/6
04	720	Segment Syntax Error Code	O	ID 1/3
05	C072	Composite Loop Identifier	X	

Adds data element to position 05. Changes requirement designator in position 03.	D	008318

SYNTAX NOTES

03　　E0305 - Only one of AK303 or AK305 may be present.

Adds syntax note to position 03.	D	008318

BER Beer Information

To specify beer style and related characteristics

Creates segment.	4	002119

TRANSACTION SETS USED IN:

832　　897

REF	ELE ID	NAME	RPT	ATTRIBUTES
01	1832	Beer Style	M	ID 2/3
02	739	Measurement Value	O/Z	R 1/20

SEMANTIC NOTES

02　　BER02 is the value of a beer's bitterness, identified in the International Bitterness Units (IBU) Scale

BVI Beverage Information

To specify beverage category and type.

Creates segment.	4	002119

TRANSACTION SETS USED IN:

832　　897

REF	ELE ID	NAME	RPT	ATTRIBUTES
01	1820	Beverage Category	M	ID 2/2
02	1073	Yes/No Condition or Response Code	O/Z	ID 1/1
03	1073	Yes/No Condition or Response Code	O/Z	ID 1/1
04	1821	Cider Type	O	ID 2/2
05	1822	Pre-Mix Drink Code	O	ID 2/2

SEMANTIC NOTES

02　　BVI02 indicates if the beverage is Alcoholic

03　　BVI03 indicates if the beverage is Carbonated

COI Container Information

To specify a container's characteristics of packaging, material color, closure device types etc. Example: Bottle made of blue glass with a cork closure.

Creates segment.	4	002119

TRANSACTION SETS USED IN:

832　　897

REF	ELE ID	NAME	RPT	ATTRIBUTES
01	103	Packaging Code	O	AN 3/5
02	1830	Container Material Color	O	ID 2/3
03	1819	Closure Type	O	ID 2/3

CTX Context

Describes an event context in terms of the application or implementation contexts in force at the time the event occurred and the position in the EDI stream at which that context was activated

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN:

824　　999

REF	ELE ID	NAME	RPT	ATTRIBUTES
01	C998	Context Identification	10 M	
02	721	Segment ID Code	O	ID 2/3
03	719	Segment Position in Transaction Set	O	N0 1/10
04	447	Loop Identifier	X	AN 1/6
05	C030	Position in Segment	O	
06	C999	Reference in Segment	O	
07	C072	Composite Loop Identifier	X	

Adds data element to position 07. Changes requirement designator in position 04.	D	008318

SYNTAX NOTES

04　　E0407 - Only one of CTX04 or CTX07 may be present.

Adds syntax note to position 04.	D	008318

IK3 Implementation Data Segment Note

To report implementation errors in a data segment and identify the location of the data segment

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN:

999

REF	ELE ID	NAME	RPT	ATTRIBUTES
01	721	Segment ID Code	M	ID 2/3
02	719	Segment Position in Transaction Set	M	N0 1/10
03	447	Loop Identifier	X	AN 1/6
04	620	Implementation Segment Syntax Error Code	O	ID 1/3
05	C072	Composite Loop Identifier	X	

Adds data element to position 05. Changes requirement designator in position 03.	D	008318

SYNTAX NOTES

03   E0305 - Only one of IK303 or IK305 may be present.

Adds syntax note to position 03.	D	008318

ISX Interchange Syntax Extension

To allow the interchange sender to specify additional information required for the interchange receiver to perform syntax interpretation of the interchange. This segment allows specification of a release character, character encoding, and similar capabilities.

CONTROL SEGMENT

TRANSACTION SETS USED IN:

None

REF	ELE ID	NAME	RPT	ATTRIBUTES
01	I69	Release Character	O	1/1
02	I70	Character Encoding	O	ID 1/2
03	I71	Overriding X12 Version / Release / Subrelease Code	X/Z	ID 6/6
04	I72	Industry Identifier	X/Z	AN 1/15

SYNTAX NOTES

04   C0403 - If ISX04 is present, then ISX03 is required.

SEMANTIC NOTES

03   Overriding code reference applies to interchange content.

03   Value must be a published ASC X12 version/release/subrelease of an X12 standard.

03   When an ISX03 value is received in an interchange, all code value validation for code values defined by the X12 base Standard will be made against the X12 version conveyed by this element. This value overrides, for code value validation only, the first six characters of GS08 when GS07 equals "X." This applies to any functional groups contained within the interchange, and does not override the transaction set, loop, segment, or data element attributes.

03   In order to use ISX03, the sender must have explicit agreement of the receiver.

04   When an ISX04 value is received in an interchange, all code value validation for code values defined by the X12 Standard will be made against the implementation guide conveyed by this element. ISX04 constrains the full set of codes from the X12 standard specified in ISX03.

Adds semantic note to position 04. Changes semantic note at position 03.	D	018117

LE Loop Trailer

To indicate that the loop immediately preceding this segment is complete

CONTROL SEGMENT

TRANSACTION SETS USED IN:

124	148	175	185	186	189	200	201	217	223
240	255	264	265	267	271	272	285	404	417

838	841	846	850	854	860	890	894	895	940
945									

REF	ELE ID	NAME	RPT	ATTRIBUTES
01	447	Loop Identifier	X	AN 1/6
02	C072	Composite Loop Identifier	X	

Adds data element to position 02. Changes requirement designator in position 01.	D	008318

SYNTAX NOTES

01   R0102 - At least one of LE01 or LE02 is required.

01   E0102 - Only one of LE01 or LE02 may be present.

SEMANTIC NOTES

00   One loop may be nested (contained) within another loop, provided the inner (nested) loop terminates before the outer loop. When specified by the standard setting body as mandatory, this segment, in combination with "LS", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The preferred value for the identifier is the segment ID of the required loop beginning segment.

COMMENTS

00   See Figures Appendix for an explanation of the use of the LE and LS segments.

Adds syntax note to positions 01 and 01.	D	008318

LS Loop Header

To indicate that the next segment begins a loop

CONTROL SEGMENT

TRANSACTION SETS USED IN:

124	148	175	185	186	189	200	201	217	223
240	255	264	265	267	271	272	285	404	417

945									

REF	ELE ID	NAME	RPT	ATTRIBUTES
01	447	Loop Identifier	X	AN 1/6
02	C072	Composite Loop Identifier	X	

Adds data element to position 02. Changes requirement designator in position 01.	D	008318

SYNTAX NOTES

01   R0102 - At least one of LS01 or LS02 is required.

01   E0102 - Only one of LS01 or LS02 may be present.

SEMANTIC NOTES

00   One loop may be nested (contained) within another loop, provided the inner (nested) loop terminates before the outer loop. When specified by the standard setting body as mandatory, this segment in combination with "LE", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The preferred value for the identifier is the segment ID of the required loop beginning segment.

COMMENTS

00   See Figures Appendix for an explanation of the use of the LS and LE segments.

Adds syntax note to positions 01 and 01.	D	008318

SPT Spirit and Liqueur Information

To specify spirit type, style and related characteristics

Creates segment.	4	002119

TRANSACTION SETS USED IN:

832   897

REF	ELE ID	NAME	RPT	ATTRIBUTES		
01	1823	Spirit Type Code		M	ID	2/3
02	1824	Spirit Style		O	ID	2/3
03	1825	Color		O/Z	ID	2/3
04	1826	Liqueur Flavor		O/Z	ID	2/2
05	C075	Composite Added Flavor		O		
06	1828	Distilled From Spirit Type		O	ID	2/2
07	1829	Whiskey Production Type		O	ID	2/2
08	1073	Yes/No Condition or Response Code		O/Z	ID	1/1

SEMANTIC NOTES

03   SPT03 indicates the spirit color

04   SPT04 indicates the spirit liqueur flavor

08   SPT08 indicates if the beverage is a Cream Based Liqueur

TD4 Carrier Details (Special Handling, or Hazardous Materials, or Both)

To specify transportation special handling requirements, or hazardous materials information, or both

TRANSACTION SETS USED IN:

104	830	832	840	843	848	850	853	855	856
857	860	861	865	870	888	897			

REF	ELE ID	NAME	RPT	ATTRIBUTES		
01	152	Special Handling Code		X	ID	2/3
02	208	Hazardous Material Code Qualifier		X	ID	1/1
03	209	Hazardous Material Class Code		X	AN	1/4
04	352	Description		X	AN	1/80
05	1073	Yes/No Condition or Response Code		O/Z	ID	1/1
06	224	Hazardous Material Shipping Name		O	AN	1/25
07	254	Packing Group Code		O	ID	1/3
08	1834	Primary Classification Code		O	R	1/3
09	230	Subsidiary Classification Code		O	ID	1/3
10	230	Subsidiary Classification Code		O	ID	1/3
11	230	Subsidiary Classification Code		O	ID	1/3
12	808	Hazardous Material Shipment Information Qualifier		O	ID	3/3
13	380	Quantity		O	R	1/15
14	355	Unit or Basis for Measurement Code		O	ID	2/2
15	809	Hazardous Material Shipment Information		O	AN	1/25

Adds data element to positions 06, 07, 08, 09, 10, 11, 12, 13, 14 and 15.	D	011319

SYNTAX NOTES

01   R010204 - At least one of TD401, TD402 or TD404 is required.

02   C0203 - If TD402 is present, then TD403 is required.

SEMANTIC NOTES

05   TD405 identifies if a Material Safety Data Sheet (MSDS) exists for this product. A "Y" indicates an MSDS exists for this product; an "N" indicates an MSDS does not exist for this product.

WIN Wine Information

To specify wine composition and related characteristics

Creates segment.	4	002119

TRANSACTION SETS USED IN:

832   897

REF	ELE ID	NAME	RPT	ATTRIBUTES		
01	C073	Composite Grape Varietal Sequence		O		
02	1825	Color		O/Z	ID	2/3
03	C074	Composite Date Time Period		O/Z		
04	1831	Wine Quality Designation		O	ID	2/3

SEMANTIC NOTES

02   WIN02 indicates the color of the wine

03   WIN03 indicates one or more grape harvest years, as part of a particular wine composition

C072 Composite Loop Identifier

The loop ID number given on the transaction set diagram are the values for this data element.

MANAGEMENT DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

Creates composite data structure.	D	008318

SEGMENTS USED IN:

AK3   CTX   IK3   LE   LS

C073 Composite Grape Varietal Sequence

Provides the sequence of grapes in the wine, including the varietal name and percentage. The sequence is from highest to lowest percentage.

Creates composite data structure.	4	002119

SYNTAX NOTES

01   P010203 - If either C07301, C07302 or C07303 are present, then the others are required.

04   P040506 - If either C07304, C07305 or C07306 are present, then the others are required.

07   P070809 - If either C07307, C07308 or C07309 are present, then the others are required.

10   P101112 - If either C07310, C07311 or C07312 are present, then the others are required.

13   P131415 - If either C07313, C07314 or C07315 are present, then the others are required.

16   P161718 - If either C07316, C07317 or C07318 are present, then the others are required.

19   P192021 - If either C07319, C07320 or C07321 are present, then the others are required.

22   P222324 - If either C07322, C07323 or C07324 are present, then the others are required.

25   P252627 - If either C07325, C07326 or C07327 are present, then the others are required.

28   P282930 - If either C07328, C07329 or C07330 are present, then the others are required.

SEMANTIC NOTES

01   Identifies the sequence of the grape varietal in all occurrences of Data Element 350

02   Identifies the grape varietal name in all occurrences of Data Element 1833

03   Identifies the grape varietal percentage in all occurrences of Data Element 739

C074 Composite Date Time Period

To specify one or more years that pertain to the product or service

Creates composite data structure.	4	002119

CODE　DEFINITION AND EXPLANATION

HF　Country Subdivision from where Procured

Province or state where the product was sourced. ISO code list 3166-2 character

SEE CODE SOURCE 5

HQ　Alcoholic Beverage Subregion

Code identifying the geographical region where the raw material for alcoholic beverages were grown. Code list managed by GS1 Canada (8-digit code) called Alcoholic Beverage Subregion

SEE CODE SOURCE 987

Adds codes HF and HQ.	4	002119

Adds expanded definition to codes HF and HQ.	4	002119

355 Unit or Basis for Measurement Code

TYPE= ID   **MIN= 2**   **MAX= 2**

Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken

CODE   DEFINITION AND EXPLANATION

ZZ Mutually Defined

CAP Cap Pressure

Consists of a plastic or ceramic stopper held in place by a set of wires. A device which adheres to plastic or glass bottles with normal application torque. Pressures sensitive liners are supplied pressed into closures and adhere to the bottle finish when the closure is applied.

CCN Cork and Cage - Natural

Known as a muselet, a wire cage that fits over the cork of a bottle to prevent the cork from emerging under the pressure of the carbonated contents. Made of natural materials.

CCP Cap Crown Pry Off

A cap which requires tools to open. Example: a glass bottle with metal cap.

CCS Cork and Cage - Synthetic

Known as a muselet, a wire cage that fits over the cork of a bottle to prevent the cork from emerging under the pressure of the carbonated contents. Made of synthetic materials.

COA Cork - Alternative

Cork cylinders made of natural cork granules combined with food grade polymers, resins and binding agents that are molded into shape.

COC Cork - Composite

Cork cylinders made of natural cork granules which have been joined together using synthetic or natural binding agents that are molded into shape. Also referred to as Cork Aggolmerate.

CON Cork - Natural

Cork of natural materials. Need tools to remove the cork from the bottle

COS Cork - Synthetic

Cork made from synthetic material. Need tools to remove the cork from the bottle

CPM Cap Roll-on-Pilfer Proof - Metal

Metal cap that screws onto threads on the neck of a bottle, generally with a metal sleeve down the neck to resemble the traditional wine capsule ("foil").

CPP Cap Roll-on-Pilfer Proof - Plastic

Plastic cap that screws onto threads on the neck of a bottle, generally with a plastic sleeve down the neck to resemble the traditional wine capsule ("foil").

CTS Cap Twist-off Crown Steel

Twist off crown cap that can be screwed off by hand. Example: beer bottle.

FPO Peel off - Foil

Protective sleeve called a foil (commonly referred to as a "capsule") covering the top of commercially corked wine and protecting the cork.

PBT Push Button Tab

A metal closure with scored tabs when pushed, opens the container without dislodging the tabs.

PTF Pull Tab - Flexible

A flexible cover which can be easily removed in order to open a container.

PTM Pull Tab - Metal

A metal lid closure scored and has a tab when pulled, opens the container without dislodging the closure. The most common seal of aluminium cans.

SPP Spigot - Plastic

A spigot made of plastic which is a protruding edge which allows the lifting and pouring of liquids contained within a container.

SPS Spigot - Steel

A spigot made of steel which is a protruding edge which allows the lifting and pouring of liquids contained within a container.

STF Swing-Top / Flip-Top

Consists of a plastic or ceramic stopper held in place by a set of wires. A device which adheres to plastic or glass bottles with normal application torque. Pressures sensitive liners are supplied pressed into closures and adhere to the bottle finish when the closure is applied.

TCS T-Cork Stopper

Reclosable cork with top. Opened by hand.

ZIP Zip Tab

A metal ring that is pulled off the top of a can to provide an opening for drinking or pouring.

CODE	DEFINITION AND EXPLANATION

BR Beer

A beverage that is made by the fermentation of cereals, usually barley or hops but also maize, wheat, rice and sorghum, by the addition of yeast and water. These products are differentiated by various brewing techniques and include products described as lager, bitter, ale, stout, lambic and specialty beers. Includes beer mixed drinks. Excludes products such as soft drinks that may be labelled as beer, such as ginger beer/ale and root beer.

CR Cider

A beverage that is produced by fermenting the pulp of apples or the juice of pears, with or without the addition of water and /or sugar. These products are also called cider (apple) or perry (pear). They can be sweet, dry, cloudy or clear. Includes apple and pear wines. Excludes products such as beers, and non-fermented apple/pear drinks and juices.

LR Liqueur

An alcoholic beverage flavored variously by fruits, herbs, spices, flowers, nuts or cream, combined with distilled spirits.

PD Pre-mixed drink (Coolers & Cocktails)

An alcoholic beverage that is pre-mixed with another drink, usually a soft drink. Includes soft or milk based drinks which have spirits added during the production process. Also includes pre-mixed cocktails, such as vodka martini and mixed wine drinks such as spritzers.

ST Spirits

An alcoholic beverage distilled from fermented fruit juice, fruit, grains or sugar. Products will normally have a high alcohol content of around 35-40%. Includes products such as brandy, schnapps, gin, rum, tequila, vodka and whisky.

WE Wine

A beverage made by the fermentation of the juice of the grape, usually having an alcoholic content of 14 percent or less. These products can be white, red or rosé in color and dry, sweet or medium in flavor.

CODE	DEFINITION AND EXPLANATION

AB Absinthe

It is an anise-flavored spirit derived from botanicals, including the flowers and leaves of Artemisia absinthium ("grand wormwood"), together with green anise, sweet fennel, and other medicinal and culinary herbs. Absinthe traditionally has a natural green color, but may also be colorless.

AM Armagnac

Armagnac is a distinctive kind of brandy produced in the Armagnac region in Gascony, southwest France

AP Applejack

Applejack is a strong apple-flavored alcoholic drink produced from apples, popular in the American colonial era. The name derives from "jacking," a term for "increasing" (alcohol content) and specifically for "freeze distilling," the traditional method of producing the drink.

AQ Aquavit

Aquavit, or Akvavit, is a distilled spirit that is principally produced in Scandinavia. Aquavit is distilled from grain and potatoes, and is flavored with a variety of herbs.

AR Arak Raki Ouzo

All three of ouzo, arak and the Turkish raki are distilled from the leftovers of vinication - grape seeds, stems, skins and the like.

BA Baijiu

Baijiu, also known as shaojiu, is a category of at least a dozen Chinese liquors made from grain. Baijiu literally means "white (clear) alcohol" or liquor.

BI Bitters

A bitters is traditionally an alcoholic preparation flavored with botanical matter so that the end result is characterized by a bitter, sour, or bittersweet flavor.

BO Bourbon

Bourbon whiskey is a type of American whiskey, a barrel-aged distilled spirit made primarily from corn.

BR Brandy

Brandy is a spirit produced by distilling wine. Brandy generally contains 35-60% alcohol by volume (70-120 US proof) and is typically drunk as an after-dinner digestif.

CA Cachaca

Cachaca is a distilled spirit made from fermented sugarcane juice. Also known as aguardente, pinga, caninha, Marvada and other names, it is the most popular spirit among distilled alcoholic beverages in Brazil.

CL Calvados

Calvados is an apple or pear brandy from the Normandy region in France.

CO Cognac

Cognac is a variety of brandy named after the town of Cognac, France. It is produced in the surrounding wine-growing region in the departments of Charente and Charente-Maritime.

FR Fruit Spirit

Fruit Spirit, also known as Eau de Vie (French for spirits), is a clear, colorless fruit brandy that is produced by means of fermentation and double distillation.

GE Genever

Genever is a clear, botanically rich, malted grain-based spirit that can only be made in Holland or Belgium. It is a blend of two or more distillates.

GI Gin

Gin is a distilled alcoholic drink that derives its predominant flavor from juniper berries.

GR Grappa

Grappa is an alcoholic beverage, a fragrant, grape-based pomace brandy of Italian origin that contains 35 to 60 percent alcohol by volume (70 to 120 US proof).

HU Huangjiu

Huangjiu, often translated as yellow wine, is a type of Chinese alcoholic beverage made from water, cereal grains such as rice, sorghum, millet, or wheat, and a qū starter culture.

KO Korn

Korn, also known as Kornbrand or Kornbranntwein, is a German colorless distilled beverage produced from fermented cereal grain.

MA Marc

Marc is distilled from what is left over after pressing the grapes used in wine production, including the skins, pulp, seeds.

ME Mezcal

Mezcal, or mescal, is a distilled alcoholic beverage made from any type of agave.

OR Orujo

Orujo is a pomace brandy from northern Spain. It is a transparent spirit with an alcohol content over 50% (100° proof).

PA Pastis

Pastis is an anise-flavored spirit and aperitif from France, typically containing less than 100 g/l sugar and 40-45% ABV (alcohol by volume).

PI Pisco

A white brandy made in Peru from muscat grapes.

RA Rum Agricole

Rum Agricole, or Rhum Agricole, is the French term for cane juice rum, a style of rum originally distilled in the French Caribbean islands, made from freshly squeezed sugar cane juice.

RK Rakia

Rakia, Rakija, Arak, Raki or Ouzo, is the collective term for fruit brandy popular in the Balkans. It is colorless, unless herbs or other ingredients are added.

RU Rum

Rum is a distilled alcoholic drink made from sugarcane byproducts, such as molasses, or directly from sugarcane juice, by a process of fermentation and distillation. The distillate, a clear liquid, is then usually aged in oak barrels.

SA Sake

Sake, also known as Japanese rice wine, is an alcoholic beverage made by fermenting rice that has been polished to remove the bran.

SC Schnapps

Schnapps is a type of alcoholic beverage that may take several forms, including distilled fruit brandies, herbal liqueurs, infusions, and flavored liqueurs made by adding fruit syrups, spices, or artificial flavorings to neutral grain spirits.

SH Shochu

Shochu is a Japanese distilled beverage less than 45% alcohol by volume. It is typically distilled from rice (kome), barley (mugi), and sweet potatoes.

SM Sambuca

Sambuca is an Italian anise-flavored, usually colorless, liqueur. Its most common variety is often referred to as white sambuca to differentiate it from other varieties that are deep blue in color (black sambuca) or bright red (red sambuca).

SO Soju

Soju is a clear, colorless distilled beverage of Korean origin.

TE Tequila

Tequila is made from the distillation of the juice from the blue agave plant.

TM Tequila Mixto

Mixto tequila is tequila that is not 100% agave, and must first be mixed with sugar or molasses before fermentation begins.

TN Tennessee

Tennessee whiskeys undergo a filtering stage called the Lincoln County Process, in which the whiskey is filtered through (or steeped in) a thick layer of maple charcoal before it is put into new charred oak barrels for aging.

VO Vodka

Vodka may be distilled from any starch or sugar-rich plant matter. Most vodka today is produced from grains such as sorghum, corn, rye or wheat. Among grain vodkas, rye and wheat vodkas are generally considered superior.

WH Whisky

Whisky, or whiskey, is a type of distilled alcoholic beverage made from fermented grain mash.

CODE	DEFINITION AND EXPLANATION

AN Anejo

Anejo or aged or vintage refer to the aged process in which youngest teqila is stored for at least one year, but less than three years in small oak barrels.

BE Blended

Blended Whiskey is the product of blending different types of whiskeys and sometimes also neutral grain spirits, colorings, and flavorings.

BG Blended Grain

Blended Grain Whiskey is the product of blending different types of single grain whiskies.

BL Blanco

Blanco (white or plata (silver)) is an unaged spirit and bottled or stored immediately after distillation, or aged less than two months in stainless steel or neutral oak barrels.

BM Blended Malt

Blended malt, formerly called a vatted malt, or pure malt, is a blend of different single malt whiskies from different distilleries.

EA Extra Anejo

Extra Anejo (ultra-aged) refers to the aged process in which tequila must be aged for a minimum of three years in oak barrels.

HA Hors d'age

Beyond Age known as Hors d'age is a designation which Bureau National Interprofessionnel du Cognac (BNIC) states is equal to Extra Old (XO), used by producers to market a high-quality product beyond the official age scale (the storage period in a cask).

JO Joven

Joven tequila is usually silver tequila with the addition of grain alcohols and caramel color, however, some higher end gold tequilas may be a blend of silver and reposado.

LD London Dry

London Dry, or Dry, refers to a Gin that the base spirit is distilled to a completely neutral spirit of 96% alcoholic volume. All flavors must be added through the distillation process, and be from natural plant materials. Nothing more may be added after distillation except for water and a tiny amount of sugar.

RE Reposado

Resposado, or rested, a type of tequila that has been aged in oak for a period of two to twelve months.

SG Single Grain

A single-grain scotch whisky contains barley and one or more other cereal grains, usually wheat or corn. It refers to a product made at a single distillery.

SM Single Malt

Single malt whisky is from a single distillery made exclusively from malted barley.

UN Unclassified

This term is used to describe those product attributes that are unidentifiable given existing or available product information.

VO VSOP

Very Superior Old Pale, known as VSOP or Reserve, designates a blend in which the youngest brandy is stored for at least four years in a cask.

VS VS

Very Special, known as VS, designates a blend in which the youngest brandy has been stored for at least two years in a cask.

XO XO

Extra Old, known as XO or Napoleon, designates a blend in which the youngest brandy is stored for at least six years in a cask.

CODE DEFINITION AND EXPLANATION

CF Charcoal Filtered

Carbon filtering is a method of filtering that uses a bed of activated carbon to remove contaminants and impurities, using chemical adsorption.

CH Chill Filtered

Chill filtering is a method in whisky making for removing residue. In chill filtering, whisky is cooled to between -10 and 4 degrees Celsius (often roughly 0 degrees) and passed through a fine adsorption filter. This is done mostly for cosmetic reasons - to remove cloudiness - rather than to improve taste or consistency.

CS Cask Strength

Cask strength also known as "Barrel Proof" or "Barrel Strength," is a term used by whisky producers to describe a whisky that has not been substantially diluted after its storage in a cask for maturation.

NC   Non-Chill Filtered

Non-chill filtering is a method in whisky making to preserve peat particles that contribute to the smokiness and aroma of whiskey. Non-chill-filtered whisky is often advertised as being more "natural," "authentic," or "old-fashioned."

SB   Small Batch

Small batch whiskey is whiskey produced by mixing the contents of a relatively small number of selected barrels. Small batch whiskeys are commercially positioned for the upper-premium market.

SI   Single Barrel

Single barrel whiskey (or single cask whiskey) is a premium class of whiskey in which each bottle comes from an individual aging barrel, instead of coming from blending together the contents of various barrels to provide uniformity of color and taste.

SP   Single Pot

Single pot still whiskey is a style of Irish whiskey made by a single distillery from a mixed mash of malted and unmalted barley distilled in a pot still.

SW   Straight Whisky

Straight whiskey or straight whisky, as defined in United States law, is whiskey created by distilling a fermented (malted or unmalted) cereal grain mash to create a spirit not exceeding 80% alcohol content by volume (abv) and then aging the spirit for at least two years at an abv concentration not exceeding 62.5% at the start of the aging process.

CODE	DEFINITION AND EXPLANATION

AB   Amber - Brown

A brownish orange color located on the color wheel midway between the colors of gold and orange.

BE   Blue

The color between violet and green on the optical spectrum of visible light. human eyes perceive blue when observing light with a wavelength between 450-495 nanometers.

BK   Black

The darkest color, the result of the absence or complete absorption of light. Like white and grey, it is an achromatic color, literally a color without hue.

FC   Flint - Clear

Natural transparent with no specific color.

GE   Green - Emerald

The color between blue and yellow on the spectrum of visible light. It is evoked by light with a predominant wavelength of roughly 495-570 nanometers.

WE   White

White is a color that reflects all the colors of the visible light spectrum to the eyes.

BER

TRANSACTION SETS USED IN:

832   897

CODE   DEFINITION AND EXPLANATION

01 Standard American Beer-American Light Lager

Light Lager is a very low in malt flavor with a light and dry body. The hop character is low and should only balance with no signs of flavor or aroma. European versions are about half the alcohol (2.5-3.5% abv) as their regular beer yet show more flavor (some use 100% malt) then the American counterparts.

02 Standard American Beer-American Lager

American lager or North American lager is pale lager that is produced in The United States. A very pale, highly-carbonated, light-bodied, well-attenuated lager with a very neutral flavor profile and low bitterness. Served very cold, it can be a very refreshing and thirst quenching drink.

03 Standard American Beer-Cream Ale

A cream ale is related to pale lager. They are generally brewed to be light and refreshing with a straw to pale golden color.

04 Standard American Beer-American Wheat Beer

Color is pale to light amber. This beer can be made using either ale or lager yeast. American wheat beer is generally brewed with at least 30 percent malted wheat. These beers are typically served with the yeast in the bottle, and pour cloudy. Traditionally more hoppy than a German hefeweizen, American wheat beer differs in that it should not offer flavors of banana or clove. It is a refreshing summer style. Darker versions of this style also exist but are not as common.

05 International Lager-International Pale Lager

A highly-attenuated pale lager without strong flavors, typically well-balanced and highly carbonated. Served cold, it is refreshing and thirst-quenching.

06 International Lager-International Amber Lager

A well-attenuated malty amber lager with an interesting caramel or toast quality and restrained bitterness. Usually fairly well-attenuated, often with an adjunct quality. Smooth, easily-drinkable lager character.

07 International Lager-International Dark Lager

A darker and somewhat sweeter version of international pale lager with a little more body and flavor, but equally restrained in bitterness. The low bitterness leaves the malt as the primary flavor element, and the low hop levels provide very little in the way of balance.

08 Czech Lager-Czech Pale Lager

A lighter-bodied, rich, refreshing, hoppy, bitter pale Czech lager having the familiar flavors of the stronger Czech Premium Pale Lager (Pilsner-type) beer but in a lower alcohol, lighter-bodied, and slightly less intense format.

09 Czech Lager-Czech Premium Pale Lager

Rich, characterful, pale Czech lager, with considerable malt and hop character and a long, rounded finish. Complex yet well-balanced and refreshing. The malt flavors are complex for a Pilsner-type beer, and the bitterness is strong but clean and without harshness, which gives a rounded impression that enhances drinkability.

10 Czech Lager-Czech Amber Lager

Malt-driven amber Czech lager with hop character that can vary from low to quite significant. The malt flavors can vary quite a bit, leading to different interpretations ranging from drier, bready, and slight biscuit to sweeter and somewhat caramelly.

11 Czech Lager-Czech Dark Lager

A rich, dark, malty Czech lager with a roast character that can vary from almost absent to quite prominent. Malty with an interesting and complex flavor profile, with variable levels of hopping providing a range of possible interpretations.

12 Pale Malty European Lager-Munich Helles

A clean, malty, gold-colored German lager with a smooth grainy-sweet malty flavor and a soft, dry finish. Subtle spicy, floral, or herbal hops and restrained bitterness help keep the balance malty but not sweet, which helps make this beer a refreshing, everyday drink.

13 Pale Malty European Lager-Festbier

A smooth, clean, pale German lager with a moderately strong malty flavor and a light hop character. Deftly balances strength and drinkability, with a palate impression and finish that encourages drinking. Showcases elegant German malt flavors without becoming too heavy or filling.

14 Pale Malty European Lager-Helles Bock

A relatively pale, strong, malty German lager beer with a nicely attenuated finish that enhances drinkability. The hop character is generally more apparent than in other bocks.

15 Pale Bitter European beer-German Leichtbier

A pale, highly-attenuated, light-bodied German lager with lower alcohol and calories than normal-strength beers. Moderately bitter with noticeable malt and hop flavors, the beer is still interesting to drink.

16 Pale Bitter European beer-Kolsch

A clean, crisp, delicately-balanced beer usually with a very subtle fruit and hop character. Subdued maltiness throughout leads into a pleasantly well-attenuated and refreshing finish. Freshness makes a huge difference with this beer, as the delicate character can fade quickly with age. Brilliant clarity is characteristic.

17 Pale Bitter European beer-German Helles Exportbier

A pale, well-balanced, smooth German lager that is slightly stronger than the average beer with a moderate body and a mild, aromatic hop and malt character.

18 Pale Bitter European beer-German Pils

A light-bodied, highly-attenuated, gold-colored, bottom-fermented bitter German beer showing excellent head retention and an elegant, floral hop aroma. Crisp, clean, and refreshing, a German Pils showcases the finest quality German malt and hops.

19 Amber Malty European Lager-Märzen

An elegant, malty German amber lager with a clean, rich, toasty and bready malt flavor, restrained bitterness, and a dry finish that encourages another drink. The overall malt impression is soft, elegant, and complex, with a rich aftertaste that is never cloying or heavy.

20 Amber Malty European Lager-Rauchbier

An elegant, malty German amber lager with a balanced, complementary beechwood smoke character. Toasty-rich malt in aroma and flavor, restrained bitterness, low to high smoke flavor, clean fermentation profile, and an attenuated finish are characteristic.

21 Amber Malty European Lager-Dunkles Bock

A dark, strong, malty German lager beer that emphasizes the malty-rich and somewhat toasty qualities of continental malts without being sweet in the finish.

22 Amber Bitter European Beer-Vienna Lager

A moderate-strength amber lager with a soft, smooth maltiness and moderate bitterness, yet finishing relatively dry. The malt flavor is clean, bready-rich, and somewhat toasty, with an elegant impression derived from quality base malts and process, not specialty malts and adjuncts.

23 Amber Bitter European Beer-Altbier

A well-balanced, well-attenuated, bitter yet malty, clean, and smooth, amber- to copper-colored German beer. The bitterness is balanced by the malt richness, but the malt intensity and character can range from moderate to high (the bitterness increases with the malt richness).

24 Amber Bitter European Beer-Pale Kellerbier

A young, fresh Helles, so while still a malty, fully-attenuated Pils malt showcase, the hop character (aroma, flavor and bitterness) is more pronounced, and the beer is cloudy, often with some level of diacetyl, and possibly has some green apple and/or other yeast-derived notes. As with the traditional Helles, the Keller version is still a beer intended to be drunk by the liter, so overall it should remain a light, refreshing, easy drinking golden lager.

25 Amber Bitter European Beer-Amber Kellerbier

A young, unfiltered, and unpasteurized beer that is between a Helles and Marzen in color, spicier in the hops with greater attenuation. Interpretations range in color and balance, but remain in the drinkable 4.8% ABV neighborhood. Balance ranges from the dry, spicy and pale-colored interpretations by St. Georgen and Löwenbräu of Buttenheim, to darker and maltier interpretations in the Frankische Schweiz. This style is above all a method of producing simple drinkable beers for neighbors out of local ingredients to be served fresh. Balance with a focus on drinkability and digestibility is important.

26 Dark European Lager-Munich Dunkel

Characterized by depth, richness and complexity typical of darker Munich malts with the accompanying Maillard products. Deeply bready-toasty, often with chocolate-like flavors in the freshest examples, but never harsh, roasty, or astringent; a decidedly malt-balanced beer, yet still easily drinkable.

27 Dark European Lager-Schwarzbier

A dark German lager that balances roasted yet smooth malt flavors with moderate hop bitterness. The lighter body, dryness, and lack of a harsh, burnt, or heavy aftertaste helps make this beer quite drinkable.

28 Strong European Beer-Doppelbock

A strong, rich, and very malty German lager that can have both pale and dark variants. The darker versions have more richly-developed, deeper malt flavors, while the paler versions have slightly more hops and dryness.

29 Strong European Beer-Eisbock

A strong, full-bodied, rich, and malty dark German lager often with a viscous quality and strong flavors. Even though flavors are concentrated, the alcohol should be smooth and warming, not burning.

30 Strong European Beer-Baltic Porter

Baltic Porter often has the malt flavors reminiscent of an English porter and the restrained roast of a schwarzbier, but with a higher OG and alcohol content than either. Very complex, with multi-layered malt and dark fruit flavors.

31 German Wheat Beer-Weissbier

A pale, refreshing German wheat beer with high carbonation, dry finish, a fluffy mouthfeel, and a distinctive banana-and-clove yeast character.

32 German Wheat Beer-Dunkles Weissbier

A moderately dark German wheat beer with a distinctive banana-and-clove yeast character, supported by a toasted bread or caramel malt flavor. Highly carbonated and refreshing, with a creamy, fluffy texture and light finish that encourages drinking.

33 German Wheat Beer-Weizenbock

A strong, malty, fruity, wheat-based ale combining the best malt and yeast flavors of a Weissbier (pale or dark) with the malty-rich flavor, strength, and body of a Dunkles Bock or Doppelbock.

34 British Bitter-Ordinary Bitter

Low gravity, low alcohol levels, and low carbonation make this an easy-drinking session beer. The malt profile can vary in flavor and intensity, but should never override the overall bitter impression. Drinkability is a critical component of the style.

35 British Bitter-Best Bitter

A flavorful, yet refreshing, session beer. Some examples can be more malt balanced, but this should not override the overall bitter impression. Drinkability is a critical component of the style.

36 British Bitter-Strong Bitter

An average-strength to moderately-strong British bitter ale. The balance may be fairly even between malt and hops to somewhat bitter. Drinkability is a critical component of the style. A rather broad style that allows for considerable interpretation by the brewer.

37 Pale Commonwealth Beer-British Golden Ale

A hop-forward, average-strength to moderately-strong pale bitter. Drinkability and a refreshing quality are critical components of the style.

38 Pale Commonwealth Beer-Australian Sparkling Ale

Smooth and balanced, all components merge together with similar intensities. Moderate flavors showcasing Australian ingredients. Large flavor dimension. Very drinkable, suited to a hot climate. Relies on yeast character.

39 Pale Commonwealth Beer-English IPA

A hoppy, moderately-strong, very well-attenuated pale British ale with a dry finish and a hoppy aroma and flavor. Classic British ingredients provide the best flavor profile.

40 Brown British Beer-Dark Mild

A dark, low-gravity, malt-focused British session ale readily suited to drinking in quantity. Refreshing, yet flavorful, with a wide range of dark malt or dark sugar expression.

41 Brown British Beer-British Brown Ale

A malty, brown caramel-centric British ale without the roasted flavors of a Porter.

42 Brown British Beer-English Porter

A moderate-strength brown beer with a restrained roasty character and bitterness. May have a range of roasted flavors, generally without burnt qualities, and often has a chocolate-caramel-malty profile.

43 Scottish Ale-Scottish Light

A malt-focused, generally caramelly beer with perhaps a few esters and occasionally a butterscotch aftertaste. Hops only to balance and support the malt. The malt character can range from dry and grainy to rich, toasty, and caramelly, but is never roasty and especially never has a peat smoke character. Traditionally the darkest of the Scottish ales, sometimes nearly black but lacking any burnt, overtly roasted character.

44 Scottish Ale-Scottish Heavy

A malt-focused, generally caramelly beer with perhaps a few esters and occasionally a butterscotch aftertaste. Hops only to balance and support the malt. The malt character can range from dry and grainy to rich, toasty, and caramelly, but is never roasty and especially never has a peat smoke character.

45 Scottish Ale-Scottish Export

The Scottish Export is the strongest of the three lower-ABV ales in the family. A malt-forward, low-ABV, toasty-not-roasty beer with minimal hops, but at the 80 shilling level we're expecting a more pronounced set of flavors.

46 Irish Beer-Irish Red Ale

An easy-drinking pint, often with subtle flavors. Slightly malty in the balance sometimes with an initial soft toffee/caramel sweetness, a slightly grainy-biscuity palate, and a touch of roasted dryness in the finish. Some versions can emphasize the caramel and sweetness more, while others will favor the grainy palate and roasted dryness.

47 Irish Beer-Irish Stout

A black beer with a pronounced roasted flavor, often similar to coffee. The balance can range from fairly even to quite bitter, with the more balanced versions having a little malty sweetness and the bitter versions being quite dry. Draught versions typically are creamy from a nitro pour, but bottled versions will not have this dispense-derived character. The roasted flavor can be dry and coffee-like to somewhat chocolaty.

48 Irish Beer-Irish Extra Stout

A fuller-bodied black beer with a pronounced roasted flavor, often similar to coffee and dark chocolate with some malty complexity. The balance can range from moderately bittersweet to bitter, with the more balanced versions having up to moderate malty richness and the bitter versions being quite dry.

49 Dark British Beer-Sweet Stout

A very dark, sweet, full-bodied, slightly roasty ale that can suggest coffee-and-cream, or sweetened espresso.

50 Dark British Beer-Oatmeal Stout

A very dark, full-bodied, roasty, malty ale with a complementary oatmeal flavor. The sweetness, balance, and oatmeal impression can vary considerably.

51 Dark British Beer-Tropical Stout

A very dark, sweet, fruity, moderately strong ale with smooth roasty flavors without a burnt harshness.

52 Dark British Beer-Foreign Extra Stout

A very dark, moderately strong, fairly dry, stout with prominent roast flavors.

53 Strong British Ale-British Strong Ale

An ale of respectable alcoholic strength, traditionally bottled-conditioned and cellared. Can have a wide range of interpretations, but most will have varying degrees of malty richness, late hops and bitterness, fruity esters, and alcohol warmth. Judges should allow for a significant range in character, as long as the beer is within the alcohol strength range and has an interesting 'British' character, it likely fits the style. The malt and adjunct flavors and intensity can vary widely, but any combination should result in an agreeable palate experience.

54 Strong British Ale-Old Ale

An ale of moderate to fairly significant alcoholic strength, bigger than standard beers, though usually not as strong or rich as barley wine. Often tilted towards a maltier balance.

55 Strong British Ale-Wee Heavy

Rich, malty, dextrinous, and usually caramel-sweet, these beers can give an impression that is suggestive of a dessert. Complex secondary malt and alcohol flavors prevent a one-dimensional quality. Strength and maltiness can vary, but should not be cloying or syrupy.

56 Strong British Ale-English Barleywine

A showcase of malty richness and complex, intense flavors. Chewy and rich in body, with warming alcohol and a pleasant fruity or hoppy interest. When aged, it can take on port-like flavor.

57 Pale American Ale-Blonde Ale

Easy-drinking, approachable, malt-oriented American craft beer, often with interesting fruit, hop, or character malt notes. Well-balanced and clean, is a refreshing pint without aggressive flavors.

58 Pale American Ale-American Pale Ale

A pale, refreshing and hoppy ale, yet with sufficient supporting malt to make the beer balanced and drinkable. The clean hop presence can reflect classic or modern American or New World hop varieties with a wide range of characteristics. An average-strength hop-forward pale American craft beer, generally balanced to be more accessible than modern American IPAs.

59 Amber and Brown American Beer-American Amber Ale

An amber, hoppy, moderate-strength American craft beer with a caramel malty flavor. The balance can vary quite a bit, with some versions being fairly malty and others being aggressively hoppy. Hoppy and bitter versions should not have clashing flavors with the caramel malt profile.

60 Amber and Brown American Beer-California Common

A lightly fruity beer with firm, grainy maltiness, interesting toasty and caramel flavors, and showcasing rustic, traditional American hop characteristics.

61 Amber and Brown American Beer-American Brown Ale

A malty but hoppy beer frequently with chocolate and caramel flavors. The hop flavor and aroma complements and enhances the malt rather than clashing with it.

62 American Porter and Stout-American Porter

A substantial, malty dark beer with a complex and flavorful dark malt character.

63 American Porter and Stout-American Stout

A fairly strong, highly roasted, bitter, hoppy dark stout. Has the body and dark flavors typical of stouts with a more aggressive American hop character and bitterness.

64 American Porter and Stout-Imperial Stout

An intensely-flavored, big, dark ale with a wide range of flavor balances and regional interpretations. Roasty-burnt malt with deep dark or dried fruit flavors, and a warming, bittersweet finish. Despite the intense flavors, the components need to meld together to create a complex, harmonious beer, not a hot mess.

65 IPA-American IPA

A decidedly hoppy and bitter, moderately strong American pale ale, showcasing modern American or New World hop varieties. The balance is hop-forward, with a clean fermentation profile, dryish finish, and clean, supporting malt allowing a creative range of hop character to shine through.

66 IPA-Specialty IPA - Belgian IPA

An IPA with the fruitiness and spiciness derived from the use of Belgian yeast. The examples from Belgium tend to be lighter in color and more attenuated, similar to a tripel that has been brewed with more hops. This beer has a more complex flavor profile and may be higher in alcohol than a typical IPA.

67 IPA-Specialty IPA - Black IPA

A beer with the dryness, hop-forward balance, and flavor characteristics of an American IPA, only darker in color - but without strongly roasted or burnt flavors. The flavor of darker malts is gentle and supportive, not a major flavor component. Drinkability is a key characteristic.

68 IPA-Specialty IPA - Brown IPA

Hoppy, bitter, and moderately strong like an American IPA, but with some caramel, chocolate, toffee, and/or dark fruit malt character as in an American Brown Ale. Retaining the dryish finish and lean body that makes IPAs so drinkable, a Brown IPA is a little more flavorful and malty than an American IPA without being sweet or heavy.

69 IPA-Specialty IPA - Red IPA

Hoppy, bitter, and moderately strong like an American IPA, but with some caramel, toffee, and/or dark fruit malt character. Retaining the dryish finish and lean body that makes IPAs so drinkable, a Red IPA is a little more flavorful and malty than an American IPA without being sweet or heavy.

70 IPA-Specialty IPA - Rye IPA

A decidedly hoppy and bitter, moderately strong American pale ale, showcasing modern American and New World hop varieties and rye malt. The balance is hop-forward, with a clean fermentation profile, dry finish, and clean, supporting malt allowing a creative range of hop character to shine through.

71 IPA-Specialty IPA - White IPA

A fruity, spicy, refreshing version of an American IPA, but with a lighter color, less body, and featuring either the distinctive yeast and/or spice additions typical of a Belgian witbier.

72 Strong American Ale-Double IPA

An intensely hoppy, fairly strong pale ale without the big, rich, complex maltiness and residual sweetness and body of an American barleywine. Strongly hopped, but clean, dry, and lacking harshness. Drinkability is an important characteristic; this should not be a heavy, sipping beer.

73 Strong American Ale-American Strong Ale

A strong, full-flavored American ale that challenges and rewards the palate with full malty and hoppy flavors and substantial bitterness. The flavors are bold but complementary, and are stronger and richer than average-strength pale and amber American ales.

74 Strong American Ale-American Barleywine

A well-hopped American interpretation of the richest and strongest of the English ales. The hop character should be evident throughout, but does not have to be unbalanced. The alcohol strength and hop bitterness often combine to leave a very long finish.

75 Strong American Ale-Wheatwine

A richly textured, high alcohol sipping beer with a significant grainy, bready flavor and sleek body. The emphasis is first on the bready, wheaty flavors with interesting complexity from malt, hops, fruity yeast character and alcohol complexity.

76 European Sour Ale-Berliner Weisse

A very pale, refreshing, low-alcohol German wheat beer with a clean lactic sourness and a very high carbonation level. A light bread dough malt flavor supports the sourness, which shouldn't seem artificial. Any Brettanomyces funk is restrained.

77 European Sour Ale-Flanders Red Ale

A sour, fruity, red wine-like Belgian-style ale with interesting supportive malt flavors and fruit complexity. The dry finish and tannin completes the mental image of a fine red wine.

78 European Sour Ale-Oud Bruin

A malty, fruity, aged, somewhat sour Belgian-style brown ale.

79 European Sour Ale-Lambic

A fairly sour, often moderately funky wild Belgian wheat beer with sourness taking the place of hop bitterness in the balance. Traditionally spontaneously fermented in the Brussels area and served uncarbonated, the refreshing acidity makes for a very pleasant café drink.

80 European Sour Ale-Gueuze

A complex, pleasantly sour but balanced wild Belgian wheat beer that is highly carbonated and very refreshing. The spontaneous fermentation character can provide a very interesting complexity, with a wide range of wild barnyard, horse blanket, or leather characteristics intermingling with citrusy-fruity flavors and acidity.

81 European Sour Ale-Fruit Lambic

A complex, fruity, pleasantly sour, wild wheat ale fermented by a variety of Belgian microbiota, and showcasing the fruit contributions blended with the wild character. The type of fruit can sometimes be hard to identify as fermented and aged fruit characteristics can seem different from the more recognizable fresh fruit aromas and flavors.

82 Belgian Ale-Witbier

A refreshing, elegant, tasty, moderate-strength wheat-based ale.

83 Belgian Ale-Belgian Pale Ale

A moderately malty, somewhat fruity, easy-drinking, copper-colored Belgian ale that is somewhat less aggressive in flavor profile than many other Belgian beers. The malt character tends to be a bit biscuity with light toasty, honey-like, or caramelly components; the fruit character is noticeable and complementary to the malt. The bitterness level is generally moderate, but may not seem as high due to the flavorful malt profile.

84 Belgian Ale-Biere de Garde

A fairly strong, malt-accentuated, lagered artisanal beer with a range of malt flavors appropriate for the color. All are malty yet dry, with clean flavors and a smooth character.

85 Strong Belgian Ale-Belgian Blond Ale

A moderate-strength golden ale that has a subtle fruity-spicy Belgian yeast complexity, slightly malty-sweet flavor, and dry finish.

86 Strong Belgian Ale-Saison

Most commonly, a pale, refreshing, highly-attenuated, moderately-bitter, moderate-strength Belgian ale with a very dry finish. Typically highly carbonated, and using non-barley cereal grains and optional spices for complexity, as complements the expressive yeast character that is fruity, spicy, and not overly phenolic. Less common variations include both lower-alcohol and higher-alcohol products, as well as darker versions with additional malt character.

87 Strong Belgian Ale-Belgian Golden Strong Ale

A pale, complex, effervescent, strong Belgian-style ale that is highly attenuated and features fruity and hoppy notes in preference to phenolics.

88 Trappist Ale-Trappist Single

A pale, bitter, highly attenuated and well carbonated Trappist ale, showing a fruity-spicy Trappist yeast character, a spicy-floral hop profile, and a soft, supportive grainy-sweet malt palate.

89 Trappist Ale-Belgian Dubbel

A deep reddish-copper, moderately strong, malty, complex Trappist ale with rich malty flavors, dark or dried fruit esters, and light alcohol blended together in a malty presentation that still finishes fairly dry.

90 Trappist Ale-Belgian Tripel

A pale, somewhat spicy, dry, strong Trappist ale with a pleasant rounded malt flavor and firm bitterness. Quite aromatic, with spicy, fruity, and light alcohol notes combining with the supportive clean malt character to produce a surprisingly drinkable beverage considering the high alcohol level.

91 Trappist Ale-Belgian Dark Strong Ale

A dark, complex, very strong Belgian ale with a delicious blend of malt richness, dark fruit flavors, and spicy elements. Complex, rich, smooth and dangerous.

92 Historical Beer-Gose

A highly-carbonated, tart and fruity wheat ale with a restrained coriander and salt character and low bitterness. Very refreshing, with bright flavors and high attenuation.

93 Historical Beer-Kentucky Common

A darker-colored, light-flavored, malt-accented beer with a dry finish and interesting character malt flavors. Refreshing due to its high carbonation and mild flavors, and highly sessionable due to being served very fresh and with restrained alcohol levels.

94 Historical Beer-Lichtenhainer

A sour, smoked, lower-gravity historical German wheat beer. Complex yet refreshing character due to high attenuation and carbonation, along with low bitterness and moderate sourness.

95 Historical Beer-London Brown Ale

A luscious, sweet, malt-oriented dark brown ale, with caramel and toffee malt complexity and a sweet finish.

96 Historical Beer-Piwo Grodziskie

A low-gravity, highly-carbonated, light-bodied ale combining an oak-smoked flavor with a clean hop bitterness.

97 Historical Beer-Pre-Prohibition Lager

A clean, refreshing, but bitter pale lager, often showcasing a grainy-sweet corn flavor. All malt or rice-based versions have a crisper, more neutral character. The higher bitterness level is the largest differentiator between this style and most modern mass-market pale lagers, but the more robust flavor profile also sets it apart.

98 Historical Beer-Pre-Prohibition Porter

An American adaptation of English Porter using American ingredients, including adjuncts.

99 Historical Beer-Roggenbier

A dunkelweizen made with rye rather than wheat, but with a greater body and light finishing hops.

100 Historical Beer-Sahti

A sweet, heavy, strong traditional Finnish beer with a rye, juniper, and juniper berry flavor and a strong banana-clove yeast character.

101 American Wild Ale-Brett Beer

Most often drier and fruitier than the base style suggests. Funky notes range from low to high, depending on the age of the beer and strain(s) of Brett used. Funkiness is generally restrained in younger 100% Brett examples, but tends to increase with age. May possess a light acidity, although this does not come from Brett.

102 American Wild Ale-Mixed-Fermentation Sour Beer

A sour and/or funky version of a base style of beer.

103 American Wild Ale-Wild Specialty Beer

A sour and/or funky version of a fruit, herb, or spice beer, or a wild beer aged in wood. If wood-aged, the wood should not be the primary or dominant character.

104 Fruit Beer-Fruit Beer

A harmonious marriage of fruit and beer, but still recognizable as a beer. The fruit character should be evident but in balance with the beer, not so forward as to suggest an artificial product.

105 Fruit Beer-Fruit and Spice Beer

A harmonious marriage of fruit, spice, and beer, but still recognizable as a beer. The fruit and spice character should each be evident but in balance with the beer, not so forward as to suggest an artificial product.

106 Fruit Beer-Specialty Fruit Beer

A harmonious marriage of fruit, sugar, and beer, but still recognizable as a beer. The fruit and sugar character should both be evident but in balance with the beer, not so forward as to suggest an artificial product.

107 Spiced Beer-Spice, Herb, or Vegetable Beer

A harmonious marriage of SHV and beer, but still recognizable as a beer. The SHV character should be evident but in balance with the beer, not so forward as to suggest an artificial product.

108 Spiced Beer-Autumn Seasonal Beer

An amber to copper, spiced beer that often has a moderately rich body and slightly warming finish suggesting a good accompaniment for the cool fall season, and often evocative of Thanksgiving traditions.

109 Spiced Beer-Winter Seasonal Beer

A stronger, darker, spiced beer that often has a rich body and warming finish suggesting a good accompaniment for the cold winter season.

110 Alternative Fermentables Beer-Alternative Grain Beer

A base beer enhanced by or featuring the character of additional grain or grains. The specific character depends greatly on the character of the added grains.

111 Alternative Fermentables Beer-Alternative Sugar Beer

A harmonious marriage of sugar and beer, but still recognizable as a beer. The sugar character should both be evident but in balance with the beer, not so forward as to suggest an artificial product.

112 Smoked Beer-Classic Style Smoked Beer

A smoke-enhanced beer showing good balance between the smoke and beer character, while remaining pleasant to drink. Balance in the use of smoke, hops and malt character is exhibited by the better examples.

113 Smoked Beer-Specialty Smoked Beer

A smoke-enhanced beer showing good balance between the smoke, the beer character, and the added ingredients, while remaining pleasant to drink. Balance in the use of smoke, hops and malt character is exhibited by the better examples.

114 Wood Beer-Wood-Aged Beer

A harmonious blend of the base beer style with characteristics from aging in contact with wood. The best examples will be smooth, flavorful, well-balanced and well-aged.

115 Wood Beer-Specialty Wood-Aged Beer

A harmonious blend of the base beer style with characteristics from aging in contact with wood (including alcoholic products previously in contact with the wood). The best examples will be smooth, flavorful, well-balanced and well-aged.

116 Specialty Beer-Clone Beer

Based on declared clone beer.

117 Specialty Beer-Mixed-Style Beer

Based on the declared base styles. As with all Specialty-Type Beers, the resulting combination of beer styles needs to be harmonious and balanced, and be pleasant to drink.

118 Specialty Beer-Experimental Beer

Experimental beer is produced in or as a new style, using a new recipe, or as a type of beer that does not fit within present beer style criteria or definitions.

SOURCE: Codes for Representation of Names of Countries, ISO 3166-(Latest Release) Codes for Representation of Currencies and Funds, ISO 4217-(Latest Release)

AVAILABLE FROM: American National Standards Institute
25 West 43rd Street, 4th Floor
New York, NY 10036

ABSTRACT: Part 1 (Country codes) of the ISO 3166 international standard establishes codes that represent the current names of countries, dependencies, and other areas of special geopolitical interest, on the basis of lists of country names obtained from the United Nations. Part 2 (Country subdivision codes) establishes a code that represents the names of the principal administrative divisions, or similar areas, of the countries, etc. included in Part 1. Part 3 (Codes for formerly used names of countries) establishes a code that represents non-current country names, i.e., the country names deleted from ISO 3166 since its first publication in 1974. Most currencies are those of the geopolitical entities that are listed in ISO 3166 Part 1, Codes for the Representation of Names of Countries. The code may be a three-character alphabetic or three-digit numeric. The two leftmost characters of the alphabetic code identify the currency authority to which the code is assigned (using the two character alphabetic code from ISO 3166 Part 1, if applicable). The rightmost character is a mnemonic derived from the name of the major currency unit or fund. For currencies not associated with a single geographic entity, a specially-allocated two-character alphabetic code, in the range XA to XZ identifies the currency authority. The rightmost character is derived from the name of the geographic area concerned, and is mnemonic to the extent possible. The numeric codes are identical to those assigned to the geographic entities listed in ISO 3166 Part 1. The range 950-998 is reserved for identification of funds and currencies not associated with a single entity listed in ISO 3166 Part 1.

9240 East Raintree Drive
Scottsdale, AZ 85260

INTERNET: http://www.ncpdp.org

ABSTRACT: A number that provides pharmacies with a unique, 7-digit national identifying number that assists pharmacies in their interactions with federal agencies and third-party providers. The National Council for Prescription Drug Programs (NCPDP) maintains this database. The NCPDP Provider Identification Number was formerly known as the NABP (National Board of Pharmacy) number. NCPDP also enumerates licensed dispensing sites in the United States as part of its Alternate Site Enumeration Program Numbering System (ASEP). The purpose of this system is to enable a site to identify itself to all third-party processors by one standard number, in order to adjudicate claims and receive reimbursement from prescription card programs.

INTERNET: http://www.gs1ca.org

ABSTRACT: Conventions and implementation guidelines for electronic data interchange utilizing the ASC X12 Standards.

GS1 Canada is a neutral, not-for-profit, industry-driven organization that enables the development and implementation of global standards for electronic business and supply chain processes.

GS1 Canada - ECCnet maintains an Alcohol Industry Code List for the "Alcoholic Beverage Subregion". The 8 digit code identifies the geographical region of where raw materials are grown for alcoholic beverages.
