Meeting recessed at 3:30 p.m. CDT

2. Wednesday, June 29

- 2.1. Formal RFI [2565](#)
 - 2.1.1. Motion to approve the following response passed unanimously.

X12 reviewed both of the examples provided in the context of X12 version 004010.

Option 1: N4*AUSTELL*GA*301687852*US

Option 2: N4*AUSTELL**301687852*US*SP*GA

The segment comment “A combination of either N401 through N404, or N405 and N406 may be adequate to specify a location.” makes option 1 the generally more conventional option. Option 1 eliminates the unnecessary use of the N405 and N406 for many locations through the use of the N402, while option 2 provides the flexibility of supporting state and province codes greater than 2 characters used in other countries. Since segment comments are not part of the actual X12 standard both of the options provided are syntactically correct. Ultimately, because both options are valid which option is used is a decision that must be agreed to by trading partners.
- 2.2. Report Backs
 - 2.2.1. X12I approved MRs 82, 158, 187, 191, 203, 204, 242. X12I approved as modified MR 235. Deferred MRs 176 and 189 and noted that they have been in the assemble impact assessment status a while. Asked about what happened to MR 188, which isn’t on mr.x12.org.
- 2.3. Ballot Recommendations
 - 2.3.1. Motion to recommend MRs 82 and 191 for ballot to PRB passed unanimously.

Meeting recessed at 2:30 p.m. CDT

3. Wednesday, June 29

3.1. Report Backs

3.1.1. X12N confirmed that it had approved MRs 35, 138, 162, and 170. All four will be recommended for ballot to PRB.

3.2. During vetting MR 188 was determined to be a staff task, capitalizing a code description for data element 736. That is why it doesn't appear on mr.x12.org.

Meeting adjourned at 2:15 p.m. CDT
