

# X12N/TGC

## Technical Task Group

The X12N Technical task group (TGC) is a standing advisory task group operating under the Insurance subcommittee (X12N) of the Accredited Standards Committee (ASC). The task group's activities are overseen by the X12N officers. The task group adheres to all applicable corporate, committee, and subcommittee policies and procedures.

### Scope

The X12N Technical task group (TGC) coordinates the activities of the X12N workgroups with responsibilities related to the technical aspects of work products and consistency across those products. The task group also coordinates communication among those work groups and between those work groups and the X12N Business task group (TGB).

### Responsibilities

The X12N Technical task group's responsibilities are:

- Ensuring timely and accurate Requests for Interpretation (RFIs) responses
- Ensuring timely and accurate technical solution development and technical design
- Ensuring the development of business and technical requirements supporting health care and property & casualty acknowledgements
- Ensuring harmonization across X12N work products including:
  - Consistent use of segments, data elements, and information (such as codes, situational rules, and examples)
  - Common content
- Ensuring timely and accurate submission of maintenance requests to support X12N work products
- Coordinating with other subcommittees via the appointed internal liaisons

## Document History

Revisions are effective on the approval date, unless otherwise stated in the approval.

<b>Date</b>	<b>Description</b>
07/02/2019	Renamed to ASC90.C00 to support easier referencing; simplified and standardized the format.
09/15/2017	Renamed to ASC90.18.
