X12-04 B2X Subcommittee Mission

The Business to Everything (B2X) Subcommittee operates within the Registered Standards Committee and is responsible for initiating and enabling cross-industry collaboration related to leveraging X12's expansive vocabulary and rich data type system with both established and innovative technologies to enable and expand business-to-any interoperability. The B2X shall develop and maintain industry-based recommendations related to business-to-any interoperability, including best practice recommendations, position papers, and other instructional and informational materials.
