

# ASC X12C COMMUNICATIONS AND CONTROLS SUBCOMMITTEE

## Interim Meeting Minutes

**MARCH 11, 12 noon – 1 pm EST**

**Attendance—9 people, 7 constituents**

### 1. Thursday, March 11

#### 1.1. Administration

- 1.1.1. The February interim meeting minutes were corrected and will be considered approved, barring further objections, on March 19, 2021.
- 1.1.2. The subcommittee may hold an interim meeting to discuss the 999 TR3 before the next scheduled meeting.

#### 1.2. Pending Items

- 1.2.1. [The All Zeros Proposal](#): This proposal is waiting on X12N for a discussion of the 999 TR3. Stacey Barber has informed X12N/TGC/WG7 that X12C wants to review the draft responses to the 999 public review comments before they are sent out. X12C will join the Tuesday, March 30<sup>th</sup> WG7 call at 1:30 p.m. EDT.
- 1.2.2. The subcommittee has no pending RFIs.
- 1.2.3. The Chair will start a new maintenance request to [make changes](#) to the C072 Composite Loop Identifier and the Application Control Structures X12.
- 1.2.4. There were no postings to the subcommittee's discussion thread on the new MR process.

#### 1.3. Active

- 1.3.1. Discussed a common misperception that a 999 response has to be sent using the same version as the received transaction. That is not the case. A 999 may be returned using a different version, which could be helpful in that there are new 999 codes that provide more useful feedback about functional groups. This option could be recommended in the TR3s, and a TR4 or TR2 explanatory document would be helpful as well. The subcommittee agreed that it should provide more insight to the industry about this.

**Meeting recessed at 12:15 PM EST**
