Current Meeting	Sept. 26, 2021 – October 6, 2021	Virtual Meeting	Co-chair	• Posted to iMeet
Next Standing Meeting	January 23, 2022 – Wednesday, February 2, 2022	Hilton Portland & Executive Tower 921 SW 6th Ave. Portland, OR 97204 United States (503) 226-1611	Co-chair	• Posted to iMeet
Interim Meeting	Bi-Weekly: 2nd & 4th Wednesday; 10:00 CT/ 11:00 ET	See iMeet calendar	Co-chair	• Posted to iMeet
Management Meeting				

Key Discussion Items
Discussion

MRs:

♦ **MR170** – Updated the IA document with the decided standard NM108 and NM109 situational rules for a billing provider in the PACDR guides.
The group decided to turn this into a global change for all billing provider NM108 and MN109 across guides. We will need to review all of the billing provider NM1s and add them to the IA sheet for this MR before submitting to support for SC X12N vote.

Note# 350165- SITUATIONAL RULE: Required when NM109 is used. If not required by this implementation guide, do not send.

Note# 44- SITUATIONAL RULE: Required for providers in the United States or its territories when the provider is eligible to receive a National Provider Identifier (NPI).
OR
Required for providers not in the United States or its territories when the provider has received an NPI. If not required by this implementation guide, do not send.
REMOVE NOTE 10301156: If, for whatever reason, the data is not stored within the payer's system, do not use. We need to look through the guides and remove this note as well.

Decisions
• Group agreed

Discussion
♦ **MR171** – The group determined that we need to get a listing of all of the references of HPID/OEID across all guides from support and then put them on the IA sheet for this MR before submitting to support for SC X12N vote.

Decisions
• Group agreed

Discussion
♦ **MR162** - Revise the PER04, PER06, and PER08 as shown below in any X12N-maintained implementation guide that include the common-content element note. "The maximum number of characters to be supported for this data element is 256."   This MR requested to add in the note above however during the discussion, the group made the decision that we don't need this note in any of the PER segments. It was put in the 007010 guide when the standard DE increased to 2048 from 256 in 005010. We don't believe there is a reason to have this restriction in the guides so we are going to remove the note instead. This note only seems to be in the 837 guides. We will get a list and place that list in the IA document.

Decisions
♦ Motion by Stacey: For DE364 in the PER segments remove the restrictive note "The maximum number of characters to be supported for this data element is 256." Second was Pete   11 approvals, 0 disapprovals and 2 abstentions

Discussion
Interim meeting schedule confirm: biweekly – second & fourth Wednesday of the month

Decisions
Group agreed
